TO THE

MEMORY

OF

WILLIAM ROBERTSON SMITH

PREFACE

THE idea of preparing a new Dictionary of the Bible on critical lines for the benefit of all serious students, both professional and lay, was prominent in the mind of the many-sided scholar to whose beloved memory the present volume is inscribed. It is more than twelve years since Prof. Robertson Smith began to take steps towards realising this idea. As an academical teacher he had from the first been fully aware of the importance of what is known as Biblical Encyclopaedia, and his own earliest contributions to the subject in the *Encyclopædia Brztannica* carry us as far back as to the year 1875. If for a very brief period certain untoward events arrested his activity in this direction, the loss of time was speedily made up, for seldom perhaps has there been a greater display of intellectual energy than is given in the series of biblical articles signed 'W. R. S.' which appeared in the *Encyclopædia Britannica* between 1875 and 1888. The reader who is interested in Bible study should not fail to examine the list, which includes among the longer articles BIBLE, CANTICLES, CHRONICLES, DAVID,' HEBREW LANGUAGE, HOSEA, JERUSALEM, JOEL, JUDGES, KINGS, LEVITES, MALACHI, MESSIAH, MICAH, PHILISTINES, PRIEST,, PROPHET, PSALMS, SACRIFICE, TEMPLE, TITHES, ZEPHANIAH: and among the shorter, ANGEL, ARK, BAAL, DECALOGUE, ELI, EVE, HAGGAI, LAMENTATIONS, MELCHIZEDEK, MOLOCH, NABATÆANS, NAHUM, NAZARITE, NINEVEH, OBADIAH, PARADISE, RUTH, SABBATH, SADDUCEES, SAMUEL, TABERNACLE, VOW.

Genesis of the Encyclopedia.

Nor should the students of our day overlook the service which this far-seeing scholar and editor rendered to the nascent conception of an *international* biblical criticism by inviting the co-operation of foreign as well as English contributors. That names like those of Noldeke, Tiele, Welhausen, Harnack, Schurer, Gutschmid, Geldner, appeared side by side with those of well-known and honoured British scholars in the list of contributors to the *Encyclopædia* was a guarantee of freedom from dangerous eccentricity, of comprehensiveness of view, of thoroughness and accuracy of investigation.

Such a large amount of material illustrative of the Bible, marked by unity of aim and consistency of purpose, was thus brought together that the *Encyclopædia Britannica* became, inclusively, something not unlike an *Encyclopædia Biblica*. The idea then occurred to the editor and his publishers to republish, for the guidance of students, all that might be found to have stood the test of time, the lacunae being filled up, and the whole brought up, as far as possible, to the high level of the most recent scholarship. It was not unnatural to wish for this; but there were three main opposing considerations. In the first place, there were other important duties which made pressing demands on the time and energy of

the editor. Next, the growing maturity of his biblical scholarship made him less and less disposed to acquiesce in provisional conclusions. And lastly, such constant progress was being made by students in the power of assimilating critical results that it seemed prudent to wait till biblical articles, thoroughly revised and recast, should have a good chance of still more deeply influencing the student world.

The waiting-time was filled up, so far as other occupations allowed, by pioneering researches in biblical archaeology, some of the results of which are admirably summed up in that fruitful volume entitled *The Religion of the Semites* (1889). More and more, Robertson Smith, like other contemporary scholars, saw the necessity of revising old work on the basis of a more critical, and, in a certain sense, more philosophical treatment of details. First of all, archaeological details had their share — and it was bound to be a large share — of this scholar's attention. Then came biblical geography — a subject which had been brought prominently into notice by the zeal of English explorers, but seemed to need the collaboration of English critics. A long visit to Palestine was planned for the direct investigation of details of biblical geography, and though this could not be carried out, not a little time was devoted to the examination of a few of the more perplexing geographical problems and of the solutions already proposed (see *e.g.* APHEK, below, col. 191 *f.*). This care for accuracy of detail as a necessary preliminary to a revision of theories is also the cause of our friend's persistent refusal to sanction the republication of the masterly but inevitably provisional article BIBLE in the *Encyclopædia Britannica*, to which we shall return later. The reader will still better understand the motive of that refusal if he will compare what is said on the Psalter in that article (1875) with the statements in the first edition of *The Old Testament in the Jewish Church* (1880), in the *Encyclopædia Britannica*, article PSALMS (1885), and in the second edition of *The Old Testament in the Jewish Church* (1892).

It is only just, however, to the true 'begetter' of this work to emphasise the fact that, though he felt the adequate realisation of his idea to be some way off, he lost no time in pondering and working out a variety of practical details — a task in which he was seconded by his assistant editor and intimate friend, Mr. J. S. Black. Many hours were given, as occasion offered, to the distribution of subjects and the preparation of minor articles. Some hundreds of these were drafted, and many were the discussions that arose as to the various difficult practical points, which have not been without fruit for the present work.

In September, 1892, however, it became only too clear to Prof. Smith that he was suffering from a malady which might terminate fatally after no very distant term. The last hope of active participation in his long-cherished scheme of a Bible Dictionary had well-nigh disappeared, when one of the present editors, who had no definite knowledge of Prof. Smith's plan, communicated to this friend of many years' standing his ideas of what a critical Bible Dictionary ought to be, and inquired whether he thought that such a project could be realised. Prof. Smith was still intellectually able to consider and pronounce upon these ideas, and gladly recognised their close affinity to his own. Unwilling that all the labour already bestowed by him on planning and drafting articles should be lost, he requested Prof. Cheyne to take up the work which he himself was compelled to drop, in conjunction with the older and more intimate friend already mentioned. Hence the combination of names on the title-page. The work is undertaken by the editors as a charge from one whose parting message had the force of a command.

Such is the history of the genesis of the *Encyclopædia Biblica*, which is the result primarily of a fusion of two distinct but similar plans — a fusion desired by Prof. Robertson Smith himself, as the only remaining means of realising adequately his own fundamental ideas. With regard to details, he left the editors entirely free, not from decline of physical strength; but from a well-grounded confidence that religion and the Bible were not less dear to them than to himself, and that they fully shared his own uncompromisingly progressive spirit. The Bible Dictionary which he contemplated was no mere collection of useful miscellanea, but a survey of the contents of the Bible, as illuminated by criticism — a criticism which identifies the cause of religion with that of historical truth, and, without neglecting the historical and archaeological setting of religion, loves best to trace the growth of high conceptions, the flashing forth of new intuitions, and the development of noble personalities, under local and temporal conditions that may often be, to human eyes, most adverse. The importance of the newer view of the Bible to the Christian community, and the fundamental principles of the newer biblical criticism, have been so ably and so persuasively set forth by Prof. Robertson Smith in his Lectures that his fellow-workers may be dispensed from repeating here what he has said so well already. 'There remaineth yet very much land to be possessed.' Let us assume, then, that the readers of this *Encyclopædia*, whatever be their grade of knowledge or sphere of work, are willing to make an effort to take this widely extended land in possession.

Principles of the Encyclopædia.

Every year, in fact, expands the narrow horizons which not so long ago limited the aspirations of the biblical scholar. It is time, as Prof. Robertson Smith thought, to help students to realise this, and to bring the standard books on which they rely more up to date. It may seem hopeless to attempt this with an alphabetically arranged encyclopaedia, which necessarily involves the treatment of points in an isolated way. By an elaborate system of cross references, however, and by interspersing a considerable number of comprehensive articles (such as, in Part I, APOCALYPTIC LITERATURE, CAINITES, DRAGON), it has been sought to avoid the danger of treating minute details without regard to their wider bearings. Many of the minor articles, too, have been so constructed as to suggest the relation of the details to the larger wholes. Altogether the minor articles have, one ventures to hope, brought many direct gains to biblical study. Often the received view of the subject of a 'minor article' proved to be extremely doubtful, and a better view suggested itself. Every endeavour has been used to put this view forward in a brief and yet convincing manner, without occupying too much space and becoming too academic in style. The more comprehensive articles may here and there be found to clash with the shorter articles. Efforts, however, have been made to mitigate this by editorial notes in both classes of articles.

It will also doubtless be found that on large questions different writers have sometimes proposed different theories and hypotheses. The sympathies of the editors are, upon the whole, with what is commonly known as 'advanced' criticism, not simply because it is advanced, but because such criticism, in the hands of a circumspect and experienced scholar, takes account of facts and phenomena which the criticism of a former generation overlooked or treated superficially. They have no desire, however, to 'boycott' moderate criticism, when applied by a critic who, either in the form or in the substance of his criticism, has something original

to say. An 'advanced' critic cannot possibly feel any arrogance towards his more 'moderate' colleague, for probably he himself held, not very long ago, views resembling those which the 'moderate' critic holds now, and the latter may find his precautionary investigations end in his supporting, with greater fulness and more complete arguments, as sound the views that now seem to him rash. Prof. Robertson Smith's views of ten years ago, or more, may, at the present day, appear to be 'moderate' criticism; but when he formulated them he was in the vanguard of critics, and there is no reason to think that, if he had lived, and devoted much of his time to biblical criticism, his ardour would have waned, and his precedence passed to others.

There are, no doubt, some critical theories which could not consistently have been represented in the present work; and that, it may be remarked, suggests one of the reasons why Prof. Robertson Smith's early *Encyclopædia Britannica* article, BIBLE, could not have been republished, even by himself. When he wrote it he was still not absolutely sure about the chronological place of P (Priestly Code). He was also still under the influence of the traditional view as to the barrenness and unoriginality of the whole post-exilic period. Nor had he faced the question of the post-exilic redaction of the prophetic writings. The fundamental principles of biblical criticism, however, are assumed throughout that fine article, though for a statement of these we must turn to a more mature production of his pen. See, for example, *The Old Testament in the Jewish Church*[2], pp. 16 *ff.* (cp 1st ed. pp. 24 *ff.*), and notice especially the following paragraph on p. 17:—

'Ancient books coming down to us from a period many centuries before the invention of printing have necessarily undergone many vicissitudes. Some of them are preserved only in imperfect copies made by an ignorant scribe of the dark ages. Others have been disfigured by editors, who mzxed up foreign matter with the original text. Very often an important book fell altogether out of sight for a long time, and when it came to light again all knowledge of its origin was gone; for old books did not generally have title-pages and prefaces. And, when such a nameless roll was agazn brought znto notice, some half-informed reader or transcriber was not unlikely to give it a new title of his own devising, which was handed down thereafter as if it had been original. Or agazn, the true meaning and purpose of a book often became obscure in the lapse of centuries, and Zed to false interpretations. Once more, antiquity has handed down to us many writings which are sheer forgeries, like some of the Apocryphal' books, or the Sibylline oracles, or those famous Epistles of Phalaris, which formed the subject of Bentley's great critical essay. In all such cases the historical critic must destroy the received view, in order to establish the truth. He must review doubtful titles, purge out interpolations, expose forgeries; but he does so only to manifest the truth, ana' exhibit the genuine remains of antiquity in their real character. A book that is really old and really valuable has nothing to fear from the critic, whose labours can on& put its worth in a clearer light, and establish its authorzty on a surer basis.'

The freedom which Prof. Robertson Smith generously left to his successors has, with much reluctance, yet without hesitation, on the part of the editors, been exercised in dealing with the articles which he wrote for the *Encyclopædia Britannica*. The editors are well assured that he would have approved their conduct in this respect. Few scholars, indeed, would refrain from rewriting, to a large extent, the critical articles which they had produced some years previously; and this, indeed, is what has been done by several contributors who wrote biblical articles for the former Encyclopædia. The procedure of those who have revised our friend's articles has in fact been as gentle and considerate as possible. Where these articles seemed to have been destined by himself for some degree of per-

manence, they have been retained, and carefully revised and brought up to date. Some condensation has sometimes been found necessary. The original articles were written for a public very imperfectly imbued with critical principles, whereas now, thanks to his own works and to those of other progressive scholars, Bible students are much more prepared than formerly to benefit by advanced teaching. There is also a certain amount of a new material from Prof. Smith's pen (in two or three cases consisting of quotations from the MS of the second and third courses of Burnett Lectures), but much less, unfortunately, than had been expected.

Freedom has also been used in taking some fresh departures, especially in two directions—viz., in that of textual criticism of the Old Testament, and in that of biblical archaeology. The object of the editors has been, with the assistance of their contributors, not only to bring the work up to the level of the best published writings, but, wherever possible, to carry the subjects a little beyond the point hitherto reached in print. Without the constant necessity of investigating the details of the text of the Old Testament, it would be hard for any one to realise the precarious character of many details of the current biblical archæology, geography, and natural history, and even of some not unimportant points in the current Old Testament theology. Entirely new methods have not indeed been applied; but the methods already known have perhaps been applied with somewhat more consistency than before. With regard to archzology, such a claim can be advanced only to a slight extent. More progress perhaps has been made of late years in the field of critical archzology than in that of texual criticism. All, therefore, that was generally necessary was to make a strong effort to keep abreast of recent archzological research both in Old Testament and in New Testament study.

The fulness of detail with which the data of the Versions have been given may provoke some comment. Experience has been the guide of the editors, and they believe that, though in the future it will be possible to give these data in a more correct, more critical, and more condensed form, the student is best served at present by being supplied as fully as possible with the available material. It may also be doubted by some whether there is not too much philology. Here, again, experience has directed the course to be pursued. In the present transitional stage of lexicography, it would have been undesirable to rest content with simply referring to the valuable new lexicons which are now appearing, or have already appeared.

With regard to biblical theology, the editors are not without hope that they have helped to pave the way for a more satisfactory treatment of that important subject which is rapidly becoming the history of the movement of religious life and thought within the Jewish and the Christian church (the phrase may be inaccurate, but it is convenient). Systems of Prophetic, Pauline, Petrine, Johannine theology have had their day; it is perhaps time that the Bible should cease to be regarded as a storehouse of more or less competing systems of abstract thought. Unfortunately the literary and historical criticism of the New Testament is by no means as far advanced as that of the Old Testament. It may not be long before a real history of the movement of religious life and thought in the earlier period will be possible. For such a history for the later period we shall have to wait longer, if we may infer anything from the doubtless inevitable defects of the best existing handbook of New Testament theology, that of the able veteran critic, H. J. Holtzmann. The editors of the present work are keenly interested in the subject at

present called 'Biblical Theology'; but, instead of attempting what is at present impossible, they have thought it better to leave some deficiencies which future editors will probably find it not difficult to supply. They cannot, however, conclude this section without a hearty attestation of the ever-increasing love for the Scriptures which critical and historical study, when pursued in a sufficiently comprehensive sense, appears to them to produce. The minutest details of biblical research assume a brightness not their own when viewed in the light of the great truths in which the movement of biblical religion culminates. May the reader find cause to agree with them! This would certainly have been the prayerful aspiration of the beloved and lamented scholar who originated this *Encyclopædia*.

Acknowledgments.

To the contributors of signed articles, and to those who have revised and brought up to date the articles of Prof. Robertson Smith, it may seem almost superfluous to render thanks for the indispensable help they have so courteously and generously given. It constitutes a fresh bond between scholars of different countries and several religious communities which the' editors can never forget. But the special services of the various members of the editorial staff require specific acknowledgment, which the editors have much pleasure in making. Mr. Hope W. Hogg became a contributor to the *Encyclopædia Biblica* in 1894, and in 1895 became a regular member of the editorial staff. To his zeal, energy, and scholarship the work has been greatly indebted in every direction. In particular, Mr. Hogg has had the entire responsibility for the proofs as they passed in their various stages through the hands of the printer, and it is he who has seen to the due carrying out of the arrangements—many of them of his own devising—for saving space and facilitating reference that have been specified in the subjoined 'Practical Hints to the Reader.' Mr. Stanley A. Cook joined the staff in 1896, and not only has contributed various signed articles, which to the editors appear to give promise of fine work in the future, but also has had a large share in many of those that are of composite authorship and unsigned. Finally, Mr. Maurice A. Canney joined the staff in 1898; he also has contributed signed articles, and has been eminently helpful in every way, especially in the reading of the proofs. Further, the editors desire to acknowledge their very special obligations to the Rev. Henry A. Redpath, M.A., editor of the *Concordance to the Septuagint*, who placed his unrivalled experience at their disposal by controlling all the proofs at a certain stage with special reference to the LXX readings. He also verified the biblical references.

T. K. CHEYNE.
J. SUTHERLAND BLACK.

20th September 1899.

ABBREVIATIONS, SYMBOLS, AND BIBLIOGRAPHICAL NOTES

The following pages explain the abbreviations that are used in the more technical parts (see above, p. xiv. 3 i. [a]) of the *Encyclopædia*. The list does not claim to be exhaustive, and, for the most part, it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will, it is hoped, be welcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Josh., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezra, Neh., Esth., Job, Ps., Pr., Eccles., C(an)t., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mi., Nah., Hab., Zeph., Hag., Zech., Mal.; 1 Esd., 4 Esd. (*i.e.*, 2 Esd. of EV), Tob., Judith, Wisd., Ecclus., Baruch, Epistle of Jeremy (*i.e.*, Bar. ch. 6), Song of the Three Children (Dan. 3_{23}), Susanna, Bel and the Dragon, Prayer of Manasses, 1–4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thess., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1–3 Jn., Jude, Rev. [or Apoc.].

An explanation of some of the symbols (A, ℵ, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. xvi. It may be added that the bracketed index numerals denote the edition of the work to which they are attached: thus *OTJC*$^{(2)}$ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions *RP*$^{(2)}$, *AOF*$^{(2)}$; see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D_2, E_2, Jz, P_2.

When a foreign book is cited by an English name the reference is to the English translation.

It is suggested that this work be referred to as the Encyclopedia Biblica, and that the name may be abbreviated thus: *Ency.* Bib. or *EBi.* It will be observed that all the larger articles can be referred to by the numbered sections (§§); or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

CONTRIBUTORS TO VOLUME I

Arranged according to the alphabetical order of the signatures appended to their articles.
Joint authorship is where possible indicated thus: A. B. §§ 1–5 ; C. D. §§ 6–10.

A. A. B. BEVAN, ANTHONY ASHLEY, Lord Almoner's Professor of Arabic, Cambridge.

A. E. S. SHIPLEY, A. E., M.A., F.Z.S., Fellow, Tutor, and Lecturer at Christ's College, Cambridge.

A. J. JÜLICHER, ADOLF, Professor of Church History and New Testament Exegesis, Marburg.

A. K. KAMPHAUSEN, ADOLF, Professor of Old Testament Exegesis, Bonn.

A. R. S. K. KENNEDY, ARCHIBALD, R. S., M.A., D.D., Professor of Hebrew and Semitic Languages, Edinburgh.

C. C. CREIGHTON, C., M.D., 34 Great Ormund Street, London.

C. F. B. BURNEY, Rev, C. F., M.A., Lecturer in Hebrew, and Fellow of St. John's College, Oxford.

C. H. W. J. JOHNS, Rev. C. H. W., M.A., Queen's College, Cambridge.

C. J. B. BALL, Rev. C. J., M.A., Chaplain to the Honourable Society of Lincoln's Inn, London.

C. P. T. TIELE, C. P., Professor of Comparative History and Philosophy of Religion, Leyden.

E. M. MEYER, EDUARD, Professor of Ancient History, Halle.

F. B. BROWN, Rev. FRANCIS, D.D., Davenport Professor of Hebrew and the cognate Languages in the Union Theological Seminary, New York.

G. A. S. SMITH, Rev. GEORGE ADAM, D.D., LL.D., Professor of Hebrew and Old Testament Exegesis, Free Church College, Glasgow.

G. A. Si. SIMCOX, G. A., M.A., Queen's College, Oxford.

G. B. G. GRAY, G. BUCHANAN, M.A., Lecturer in Hebrew and Old Testament Theology, Mansfield College, Oxford.

G. F. M. MOORE, Rev. GEORGE F., D.D., Professor of Hebrew in Andover Theological Seminary, Andover, Mass.

H. G. GUTHE, HERMANN, a.o. Professor of Old Testament Exegesis, Leipsic.

H. v. S. SODEN, BARON HERMANN VON, Professor of New Testament Exegesis, Berlin.

H. W. H. HOGG, HOPE W., M.A., 4 Winchester Road, Oxford.

H. Z. ZIMMERN, HEINRICH, a.o. Professor of Assyriology, Leipsic.

I. A. ABRAHAMS, ISRAEL, London, Editor of the *Jewish Quarterly Review.*

I. B. BENZINGER, Dr. IMMANUEL, Berlin,

J. A. R. ROBINSON, Rev. J. ARMITAGE, D.D., Canon of Westminster.

J. M. MASSIE, JOHN, M.A., Yates Professor of New Testament Exegesis in Mansfield College, Oxford; formerly scholar of St. John's College, Cambridge.

K. B. BUDDE, KARL, Professor of Old Testament Exegesis, Strassburg.

K. M. MARTI, KARL, Professor of Old Testament Exegesis and the Hebrew Language, Berne.

Lu. G. GAUTIER, LUCIEN. Professor of Old Testament Exegesis and History, Lausanne.

L. W. K. KING, LEONARD WILLIAM, M.A., F.S.A., Assistant to the Keeper of Egyptian and Assyrian Antiquities, British Museum.

M. A. C. CANNEY, MAURICE A., M.A. (Oxon.), St. Peter's Rectory, Saffron Hill, London, E.C.

M. J. (Jr.) JASTROW, Jun., MORRIS, Ph.D., Professor of Semitic Languages in the University of Pennsylvania.

M. R. J. JAMES, MONTAGUE RHODES, Litt.D., Fellow and Dean of King's College, Cambridge.

N. M. M'LEAN, NORMAN, M.A., Lecturer in Hebrew, and Fellow of Christ's College, Lecturer in Semitic Languages at Caius College, Cambridge.

N. S. SCHMIDT, NATHANAEL, Professor of Semitic Languages and Literatures, Cornell University, Ithaca, New York.

O. C. W. WHITEHOUSE, Rev. OWEN C., M.A., Principal and Professor of Biblical Exegesis and Theology in the Countess of Huntingdon's College, Cheshunt, Herts.

P. W. S. SCHMIEDEL, PAUL W., Professor of New Testament Exegesis, Zurich.

R. H. C. CHARLES, Rev. R. H., M.A., D.D., Professor of Biblical Greek in Trinity College, Dublin; 17 Bradmore Road, Oxford.

R. W. R. ROGERS, Rev. ROBERT W., Ph.D., D.D., Professor of Hebrew, Drew Theological Seminary, Madison, New Jersey.

S. A. C. COOK, STANLEY A., M.A. (Cantab.), Ferndale, Rathcoole Avenue, Hornsey, London, N.

S. R. D. DRIVER. Rev. SAMUEL ROLLES, D.D., Regius Professor of Hebrew, Canon of Christ Church, Oxford.

T. G. P. PINCHES, THEOPHILUS G., M.R.A.S., Egyptian and Assyrian Department, British Museum.

T. K. C. CHEYNE, Rev. T. K., M.A., D.D., Oriel Professor of the Interpretation of Holy Scripture at Oxford, Canon of Rochester.

T. N. NÖLDEKE, THEODOR, Professor of Semitic Languages, Strassburg.

T. W. D. DAVIES, T. W., Ph.D., Professor of Old Testament Literature, North Wales Baptist College, Bangor; Lecturer in Semitic Languages, University College. Bangor.

W. B. BOUSSET, W.. a.o. Professor of New Testament Exegesis, Gottingen.

W. E. A. ADDIS, Rev. W. E., M.A., Lecturer in Old Testament Criticism, Manchester College, Oxford.

W. E. B. BENNETT, Rev. W. H., M.A., Professor of Biblical Languages and Literature, Hackney College, London, and Professor of Old Testament Exegesis, New College, London.

W. H. K. KOSTERS, The late W. H., Professor of Old Testament Exegesis, Leyden.

W. J. W. WOODHOUSE, W. J., M.A., Lecturer in Classical Philology, University College of North Wales, Bangor.

W. M. M. MULLER, W. MAX, Professor of Old Testament Literature, Reformed Episcopal Church Seminary, Philadelphia.

W. R. RIDGEWAY, WILLIAM, Professor of Archaeology, Cambridge.

W. R. S. SMITH, The late W. ROBERTSON, Professor of Arabic, Cambridge.

W. S. SANDAY, Rev. WILLIAM, D.D., LL.D., Lady Margaret Professor of Divinity, Canon of Christ Church, Oxford.

W. T. T.-D. THISELTON-DYER, Sir WILLIAM TURNER, C.M.G., LL.D., F.R.S., Director Royal Gardens, Kew.

MAPS IN VOLUME I

PRACTICAL HINTS TO THE READER

Further Explanations.—The labour that has been bestowed on even minor matters in the preparation of this *Encyclopædia* has seemed to be warranted by the hope that it may be found useful as a students' handbook. Its value from this point of view will be facilitated by attention to the following points :—

1. Classes of Articles, — The following notes will give a general idea of what the reader may expect to find and where to look for it:—

i. *Proper* Names. —Every proper name in the Old and the New Testament canons and the OT Apocrypha (Authorised Version or Revised Version, text or margin) is represented by an article-heading in Clarendon type, the substantive article being usually given under the name as found in the AV text. , *Adoraim*, on the same line as ADORA (col. 71), and *Adullamite*, three lines below ADULLAM (col. 73), are examples of space-saving contrivances.

ii. *Books.* — Every book in the OT and the NT canons and the OT Apocrypha is discussed in a special article—*e.g.* Acts, Chronicles, Deuteronomy. The 'Song of Solomon' is dealt with under the title CANTICLES, and the last book in the NT under APOCALYPSE.

iii. ***General*** Articles. —With the view, amongst other things, of securing the greatest possible brevity, many matters have been treated in general articles, the minor headings being dealt with concisely with the help of cross-references. Such general articles are: ABI AND AHI, names in AGRICULTURE, APOCALYPTIC LITERATURE, APOCRYPHA, ARMY, BAKEMEATS, BREAD, CANON, CATTLE, CHRONOLOGY, CLEAN AND UNCLEAN, COLOURS, CONDUITS, CUTTINGS OF THE FLESH, DISPERSION, DIVINATION, DRESS.

iv. *Other Subjects.* —The following are examples of important headings :—ADAM AND EVE, ANGELS, ANTICHRIST, BLESSINGS AND CURSINGS, CHRISTIAN, NAME OF, CIRCUMCISION, COMMUNITY OF GOODS, COUNCIL OF JERUSALEM, CREATION, DELUGE, DEMONS, DRAGON.

v. Things. — The *Encyclopædia Biblica* is professedly a dictionary of things, not words, and a great effort has been made to adhere rigidly to this principle. Even where at first sight it seems to have been neglected, it will generally be found that this is not really the case. The only way to tell the English reader what has to be told about (*e.g.*) CHAIN is to distinguish the various things that are called, or should have been called, 'chain' in the English Version, and refer him to the articles where they are dealt with.

vi. *Mere Cross-references* (see above, **1**, i.; and below, **2**).

2. Method of Cross-References.—A very great deal of care has been bestowed on the cross-references, because only by their systematic use could the necessary matter be adequately dealt with within the limits of one volume. They have made possible a conciseness that is not attained at the expense of incompleteness, repetition of the same matter under different headings being reduced to a minimum. For this reason the articles have been prepared, not in alphabetical order, but simultaneously in all parts of the alphabet, and have been worked up together constantly and kept up to date. The student may be assured, therefore, that the cross-references have not been inserted at random; they have always been verified. If any be found to be unwarranted (no such is known), it must be because it has been found necessary, after the reference was made, to remove something from the article referred to to another article. The removed matter will no doubt be represented by a cross-reference (cp, *e.g.*,).

The method of reference employed is as follows:—

i. *Identification of* Article. (*a*) *Long Names.* —To save space long headings have been curtailed in citations —*e.g.*, APOCALYPTIC LITERATURE is cited as APOCALYPTIC.

(*b*) Synonymous Articles.—Persons of the same name or places of the same name are ranged as 1, 2, 3, etc., under a common heading and cited accordingly. In other cases (and even in the former case when, as in ADNAH in col. 67, one English spelling represents different

Hebrew spellings (the articles usually have separate headings, in which case they are cited as i., ii., iii., etc., although they are not so marked. Usually geographical articles precede biographical, and persons precede books. Thus SAMUEL i., 2 is the second person called Samuel; SAMUEL ii. is the article SAMUEL, BOOKS OF. If a wrong number should be found the reason is not that it was not verified, but that the article referred to is one of a very small number in which the original order of the articles had to be changed and the cross-reference was not detected. Thus in the article ALUSH the reference to BEKED ii., I, ought to be to BERED i., I.

ii. *Indication of Place in Article Cited.* — Articles of any length are divided into numbered sections (§§ I, 2, etc.) indicated by insets containing a descriptive word or phrase. As convenience of reference is the great aim, the descriptive phrases are limited to, at most, three or four words, and the sections are numbered consecutively. Logical subordination of sections, therefore, cannot appear. Divisions larger than sections are sometimes indicated in the text by I., II., etc., and subdivisions of sections by letters and numbers *(a, b,* c, *a, β, γ,* i., ii., iii.). References like (BENJAMIN, § 9, ii. *β*) are freely used. Most of the large articles have prefixed to them a table of contents.

iii. *Manner of Citation.* — The commonest method is (see DAVID, § 11, *(c)* ii:). 'EZRA *(q.v.,* ii. § 9) means the article EZRA-NEHEMIAH, BOOK OF, § 9. Sometimes, however, the capitals or the *q.v.* may be dispensed with. CHAIN printed in small capitals in the middle of an article would mean that there is an article on that term, but that it hardly merits *q.v.* from the present point of view. In articles (generally on RV names) that are mere cross-references *q.v.* is generally omitted ; so, *e.g.*, in ABADIAS in col. **3.**

3. Typographical Devices. i. *Size of Type.* — *(a) Letters* — Two sizes of type are used, and considerable care has been devoted to the distribution of the small-type passages. Usually the general meaning of an article can be caught by reading simply the large-type parts. The small-type passages generally contain such things as proofs of statements, objections, more technical details. In these passages, and in footnotes and parenthesis, abbreviations (see below, 8), which are avoided as much as possible elsewhere, are purposely used. *(b) Numbers.* — Two sizes of Arabic numerals are used. (Note that the smallest 6 and 8 are a different shape from the next larger 6 and 8). In giving references, when only the volume is given, it is usually cited by a Roman number. Pages are cited by Arabic numbers except where (as is often the case) pages of a preface are marked with Roman numbers. When numbers of two ranks are required, two sizes of Arabic numbers (5_5) are used irrespectively of whether the reference be to book and chapter, volume and page, or section and line. If three ranks are needed, Roman numbers are prefixed (v. 5_5).

ii. *Italics.* — Italic type is much used in citing foreign words. In geographical articles, as a rule, the printing of a modern place-name in italics indicates that the writer of the article identifies it with the place under discussion. For the significance of the different kinds of type in the map of Assyria see the explanations at the foot of the map. On the two kinds of Greek type see below, 4 ii. *(b).*

iii. *Small Capitals.* — Small Roman capitals are used in two ways : (1) in giving the equivalent in RV for the name in AV, or *vice versa,* and (2) in giving a cross-reference (see above, 2 iii.). On the use of small italic capitals see below, 4 ii. *(b).*

iv. *Symbols.* — *(a) Index Figures.* — In 'almost always[6] clear,' '6' indicates footnote 6. In 'Introd.[(6)],' '(6)' means sixth edition. In 'D_2' '2' means a later development of D (see below,).

(b) Asterisk. — B* means the original scribe of codex B. **canho* means that the consonants are known but the vowels are hypothetical. *v.* 5^* means *v.* 5 (partly).

(c) *Dagger.* — A dagger † is used to indicate that all the passages where **a** word occurs are cited. The context must decide whether the English word or the original is meant.

(d) Sign of Equality. — 'AALAR, 1 Esd. 5_{36} AV = Ezra 2_{59} IMMER, i.,' means that the two verses quoted are recensions of the same original, and that what. is called Aalar in the one is called Immer in the other, as will be explained in the first of the articles entitled IMMER.

(e) Sign of Parallelism. — ‖ is the adjective corresponding to the verb =. Thus 'Aalar of 1 Esd. 5_{36} AV appears as Immer in ‖ Ezra 2_{59}.'

(f) Other devices. — '99 means 1899. 1 Ch. 6_{81} [66] means that verse 81 in the English version is the translation of that numbered 66 in Hebrew texts. √ is used to indicate the 'root' of a word.

v. *Punctuation.* — No commas are used between citations, thus : 2 K. $6_{21\ 25}$ Is. 21_7. Commas are omitted and semicolons or colons inserted whenever ambiguity seems thus to be avoided — *e.g.*, the father Achbor [1] is called 'Father of Baal-hanan [1] king of Edom,' and the son Baal-hanan [1] is called 'ben Achbor [1] ; one of the kings of Edom.'

4. Text-Critical Apparatus. — As all sound investigation must be based, not on the ancient

texts as they lie before the student, but on what he believes to be the nearest approach he can make to their original reading, the soundness of every text is weighed, and if need be, discussed before it is used in the *Encyclopædia* Biblica.

i. *Traditional Original* **Text.**—In quoting the traditional Hebrew text the editions of Baer and of Ginsburg have been relied on as a rule; similarly in the case of the New Testament, the texts of Tischendorf and of Westcott and Hort (see below,).

ii. *Evidence of Versions.*—The Vulgate (ed. Heyse-Tischendorff) and the Peshitta (ed. Lee and London Polyglott) and the minor Greek versions (Field, *Hexapla:* Hatch-Redpath, *Concordance*) have been quoted quite freely; the testimony of the Septuagint has been attended to on every point.

In exceptional cases 'Holmes and Parsons' has been consulted; ordinarily Swete's manual edition (including the variants) and Lagarde's *Pars Prior* have been considered sufficient. In general (for the main exception see next paragraph) only variations of some positive interest or importance have been referred to. Almost invariably a quotation from the LXX is followed by symbols indicating the documents cited (thus *υιοι* [BAL]). This does not necessarily imply that in some other MS or MSS a different reading is found; it is simply a guarantee that Lagarde and Swete's digest of readings have both been consulted. The formula [BAL] standing alone means that the editors found no variant in Lagarde or Swete to report. In the parts, therefore, where Swete cites ℵ or other MSS as well as BA, BAL includes them unless the context indicates otherwise; BAL might even be used where B was lacking. When BAL stands alone the meaning is everywhere the same; it is a summary report of agreement in Lagarde and Swete.

Proper names have been felt to demand special treatment; the aim has been to give under each name the readings of Lagarde and all the variants of BℵA as cited in Swete. The commonest, or a common form for each witness is given at the head of the article, and this is followed at once or in the course of the article by such variants as there are. Where all the passages containing a given name are cited in the article, the apparatus of Greek readings (as in Swete and Lagarde) may be considered absolutely complete. In other cases, completeness, though aimed at, has not been found possible.

The distinction between declinable and indeclinable forms has generally been observed; but different cases of the same declinable form have not as a rule (never in the case of common nouns) been taken note of. Where part of one name has been joined in the LXX to the preceding or succeeding name, the intruding letters have usually been given in square brackets, though in some very obvious cases they may have been ignored.

When MSS differ only in some giving ι and others ει that is indicated concisely thus: 'αβεια [B], αβια [AL],' becomes 'αβ[ε]ια [BAL].' Similarly, -τ., -ττ. becomes -[τ]τ.

A great deal of pains has been bestowed on the readings, and every effort has been made to secure the highest attainable accuracy. In this connection the editors desire to acknowledge their very special obligations to the Rev. Henry A. Redpath, M.A., editor of the *Concordance* to the Septuagint, who has placed his unrivalled experience in this department at their disposal by controlling the proofs from the beginning with special reference to the LXX readings. He has also verified the biblical references.

Unfortunately, misprints and other inaccuracies—inaccuracies sometimes appearing for the first time after the last proof reading—cannot be avoided. Corrections of errors, however minute, addressed to the publishers, will always be gratefully received.

Some typographical details require to be explained:—

(a) In giving proper names initial capitals, breathings, and accents are dispensed with; they were unknown in the oldest MSS (see Swete, 1 p. xiii 2).

(b) The Greek readings at the head of an article are given in uncials, and the Vulgate readings in small italic capitals; elsewhere ordinary type is used.

(c) The first Greek reading is given in full; all others are abbreviated as much as possible. Letters suppressed at the beginning of a word are represented by a dash, letters at the end by a period. In every case the abbreviated form is to be completed by reference to the Greek form immediately preceding, whether that is given in full or not. Thus, *e.g.*, 'αβελσαττειμ, β. . . . ττιμ, -ττειν, βελσα.'[1] means 'αβελσαττειμ, βελσαττιμ, βελσαττειν, βελσαττειν.' That is to say, the abbreviated form repeats a letter (or if necessary more) of the form preceding. Two exceptions are sometimes made. The dash sometimes represents the *whole* of the preceding form—*e.g.*, in cases like αβια, -ς,—and one letter has sometimes been simply substituted for another: *e.g.*, ν for μ in ειμ, -ν. These exceptions can hardly lead to ambiguity.

(d) The following are the symbols most commonly quoted from Swete's digest with their meaning:—

[1] This is a misprint in the art. ABEL-SHITTIM. 'βελσα.' should be 'βελσα', without the period.

* = original scribe.	*D* = testimony of the Grabe-Owen collation **of** D before D was partly destroyed (see Swete, I p. xxiv).
1 = his own corrections.	*D*sil = readings inferred from the collation (*D*) *e* ***silentio.***
a, b, c = other correctors.	ℵc.a = a corrector of ℵ belonging to the 7th cent. (Sw., 2 p. viii; cp *1*, p. xxi).
ab = first corrector confirmed by second.	Bedit = *e.g.*, on Sirach 461, p. 471.
a? b? = a orb.	ℵc.b. = see Sw., *2* **p.** viii.
a? b = b, perhaps also a.	ℵc.c. = *e.g.*, Sir. 107, **p.** 663,
a(vid) = prob. **a**	
a vid = a, if it be a *bona fide* correction at all.	

(e) The following are the MSS most commonly cited :—

ℵ Sinaiticus (see Swete, I **p.** xx).	F Cod. Ambrosianus (Swete, I p. xxvi).
A Alexandrinus (Swete, p. xxii).	87 Cod. Chisianus (Swete, **3** xii).
B Vaticanus (Swete, I p. xvii).	Syr. Cod. Syro. Hexaplaris Ambrosianus (**3** xiii).
C Cod. Ephræmi (Swete, 2 p. xiii).	V Cod. Venetus (= 23, Parsons ; Swete, 3 p. xiv).
D Cod. Cottonianus Geneseos (Swete, I p. xxiii).	Q. Cod. Marchalianus (Swete, **3** p. vii).
E Cod. Bodleianus Geneseos (Swete, I p. xxvi).	Γ Cod. rescriptus Cryptoferratensis (Swete, **3** p. ix *f.*).

5. Proper Name Articles. — Propername articles usually begin thus. The name is followed by a parenthesis giving (1) the original; (2) where necessary, the number of the section in the general article NAMES where the name in question is discussed or cited; **(3)** a note on the etymology or meaning of the (personal) name with citation of, similar names; (4) the readings of the versions (see above, 4 ii.).

6. Geographical Articles, — The interpretation of place-names is discussed in the article NAMES. The maps that are issued with Part I. are the district of Damascus, the environs of Babylon, and 'Syria, Assyria, and Babylonia' (between cols. and). The last-mentioned is mainly designed to illustrate the non-Palestinian geography of the Old Testament. It is made use of to show the position of places outside of Palestine mentioned in Part I. which happen to fall within its bounds.

In all maps biblical names are assigned to sites only when the article discussing the question regards the identification as extremely probable (the degree of probability must be learned from the article).

The following geographical terms are used in the senses indicated :—

Dēr, *deir*, 'monastery.'	*Khirbet*-(*Kh.*), 'ruins of —.'
Ḥaj(*j*), 'pilgrimage to Mecca.'	*Nahr* (N.), 'river.'
Jebel (J.), 'mountain.'	*Tell*, 'mound' (often containing ruins).
Kefr, *Kafr*, 'village.'	*Wādi* (W.), 'valley,' 'torrent-course.'
Khān, 'caravanserai.'	*Welī*, ***wely***, 'Mohammedan saint,' 'saint's tomb.'

7. Transliteration, etc. — Whilst the ***Encyclopædia Biblica*** is meant for the student, other readers have constantly been kept in view. Hence the frequent translation of Hebrew and other words, and the transliteration of words in Semitic languages. In certain cases transliteration also saves space. No effort has been made at uniformity for its own sake. Intelligibility has been thought sufficient. When pronunciation is indicated —*e.g.*, Bĕhēmōth, Leviāthān —what is meant is that the resulting form is the nearest that we can come to the original as represented by the traditional Hebrew, so long as we adhere to the English spelling.

In the case of proper names that have become in some degree naturalised in an incorrect form, that form has been preserved : *e.g.*, Shalmaneser, Tiglath-pileser. Where there is an alternative, naturally the closer to the original is selected : therefore Nebuchadrezzar (with *r* as in Ezek., etc.), Nazirite. Where there is no naturalised form an exact transliteration of the original has been given —*e.g.*, Asur-rēs-isi —and the component parts of Assyrian names are thus separated by hyphens, and begin with a capital when they are divine names.

In the case of modern (Arabic) place-names the spelling of the author whose description has been most used has generally been retained, except when it would have been misleading to the student. The diacritical marks have been checked or added after verification in some Arabic source or list.

On the Assyrian alphabet see BABYLONIA, § 6, and on the Egyptian, **EGYPT, § 12.** One point remains to be explained, after which it will suffice to set forth the schemes of transliteration in tabular form. The Hebrew h (ח) represents philologically the Arabic h and h, which are absolutely distinct sounds. The Hebrew spoken language very likely marked the distinction. As the written language, however, ignores it, ח is always transliterated h. The Assyrian guttural transliterated with an h, on the other hand, oftenest represents the) Arabic h, and is therefore always transliterated h (in Muss.-Arn. *Dict.*, *x*. for χ), never h. There is no h in transliterated Assyrian; for the written language did not distinguish the Arabic h from the Arabic h ʿg or', representing them all indifferently by ʾ, which accordingly does not, in transliterated Assyrian, mean simply א but א or ח or h or ע or g. Hence *e.g.*, Nabii-nahid is simply one interpretation

of Nabū-na'id. Egyptian, lastly, requires not only h, h, and h, like Arabic, but also a fourth symbol h (see EGYPT, §).

TRANSLITERATION OF HEBREW (AND ARABIC) CONSONANTS

'	א	ء		z	ז	ز		l	ל	3		ṣ	צ	ص

8. Abbreviations, Symbols, and Biographical Notes, — The following pages explain the abbreviations that are used in the more technical parts (see above 3 i. *(a)*) of the *Encyclopædia*. The list does not claim to be exhaustive, and for the most part it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will be not unwelcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Jos., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezr., Neh., Est., Job, Ps., Pr., Eccles., C(an)t., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mi., Nah., Hab., Zeph., Hag., Zech., Mal.; 1 Esd., 4 Esd. (*i.e.* 2 Esd. of EV), Tob., Judith, Wisd., Ecclus., Baruch, cap. 6 (*i.e.*, Epistle of Jeremy), Song of the Three Children (Dan. 3_{23}), Susanna, Bel and the Dragon, Prayer of Manasses, 1-4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thes., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1-3 Jn., Jude, Apoc. [or Rev.]. An explanation of some of the symbols (A, א, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. vx. It may be added that the bracketed index numerals denote the edition of the work to which they are attached; thus *OTJC*$^{(2)}$ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions *RP*$^{(2)}$, *AOF*$^{(2)}$: see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D_2, etc.

When a foreign book is cited by an English name the reference is to the English translation.

It is suggested that the *Encyclopædia Biblica* itself be cited as *EBi*. It will be observed that all the larger articles can be referred to by the numbered sections; or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

ENCYCLOPEDIA BIBLICA

A

AALAR (αλλαρ [B]), 1 Esd. 5 36† AV=Ezra 2 59, IMMER, i.; cp also CHERUB, *a.*

AARON (אַהֲרֹן, § 7; see also below, § 4, end; ααρων [BAL], αρ. [A]; *AARON*). In the post-exilic parts of the OT (including Ezra, Neh., Ch., and for our present purpose some of the Psalms) Aaron is the ancestor of all lawful priests,[1] and himself the first and typical high-priest.

1. In P. This view is founded upon the priestly document in the Hexateuch, according to which Aaron, the elder brother of Moses, took a prominent part, as Moses' prophet or interpreter, in the negotiations with Pharaoh, and was ultimately, together with his sons, consecrated by Moses to the priesthood. The rank and influence which are assigned to him are manifestly not equal to those of Moses, who stood to Pharaoh as a god (Ex. 7 1). He does, indeed, perform miracles before Pharaoh—he changes his rod into a serpent which swallows up the rods, similarly transformed, of the Egyptian sorcerers; and with the same rod he changes the waters of Egypt into blood, and brings the plagues of frogs and lice—but the order to execute the marvel is in each case communicated to him through Moses (Ex. 7 *f.*). It is Moses, not Aaron, who disables the sorcerers by boils (Ex. 9 8 *f.*), and causes the final destruction of the Egyptians in the Red Sea (14 15-18). Through his consecration by Moses, Aaron became 'the priest' (so usually) or, as he is elsewhere called, 'the anointed priest' (Lev. 4 3 5 16 6 15) or 'the high-priest' (Lev. 21 10 Nu. 35 25 28). His sons, representing the common priests, act under him (Nu. 3 4). As high-priest he has splendid vestments, different from those of his sons (Ex. 28); he alone is anointed (Ex. 29 7)[2]; he alone, once a year, can enter the holy of holies (Lev. 16). He is the great representative of the tribe of Levi; and his rod, unlike the rods taken to represent the other tribes, buds miraculously, and is laid up for ever by the ark (Nu. 17 6 *f.* [21 *f.*]). Within this tribe, however, it is only the direct descendants of Aaron who may approach the altar, so that Korah the Levite, when he claims the power of the priesthood, is consumed by fire from Yahwè (Nu. 16 35). Aaron occasionally receives the law directly from Yahwè (Nu. 18). Even his civil authority is great, for he, with Moses, numbers the people (Nu. 1 3 17), and it is against him as well as against Moses that the rebellion of the Israelites is directed (Ex. 16 2 Nu. 14 2 5 26 16 3). This authority would have been greater but for the exceptional position of Moses, for in the priestly portions of Joshua the name of Eleazar (*q.v.* 1), the next high-priest, is placed before that of Joshua. The 'priestly' writer mentions only one blot in the character of Aaron: *viz.*, that in some way, which cannot be clearly ascertained in the present state of the text, he rebelled against Yahwè in the wilderness of Zin, when told to 'speak to the rock' and bring forth water (Nu. 20 12). In penalty he dies, outside Canaan, at Mount Hor, on the borders of Edom (*v.* 22 *f.*).

2. In earlier writers. As we ascend to the exilic and pre-exilic literature, Aaron is still a prominent figure; but he is no longer either the high-priest or the ancestor of all legitimate priests. Ezekiel traces the origin of the priests at Jerusalem no farther back than to ZADOK (*q.v.* 1, § 3), in Solomon's time. Dt. 10 6 (which mentions Aaron's death, not at Hor but at Moserah, and the fact that Eleazar succeeded him in the priesthood) is generally and rightly regarded as an interpolation. In Mic. 6 4 (time of Manasseh?) Aaron is mentioned between Moses and Miriam as instrumental in the redemption of Israel.

3. In E. In the Elohistic document of the Hexateuch (E) he is mentioned as the brother of Miriam the prophetess (Ex. 15 20; for other references to him see Ex. 17 12 24 1 9 10 14, Nu. 12 1); but it is Joshua, not Aaron, who is the minister of Moses in sacred things, and keeps guard over the tent of meeting (Ex. 33 11), and 'young men of the children of Israel' offer sacrifice, while the solemn act of sprinkling the blood of the covenant is reserved for Moses (Ex. 24 5 6). Aaron, however, seems to have counted in the mind of E as the ancestor of the priests at 'the hill of Phinehas' (Josh. 24 33) and perhaps of those at Bethel. At all events, the author of a section added in a later edition of E speaks of Aaron as yielding to the people while Moses is absent on Mount Horeb, and taking the lead in the worship of Yahwè under the form of a golden calf. The narrator, influenced by prophetic teaching, really means to attack the worship carried on at the great sanctuary of Bethel, and looks back to the destruction of Samaria by the Assyrians in *721* as Yahwè's 'visitation' of the idolatrous worship maintained in N. Israel (Ex. 32; see especially *v.* 34).

4. In J. It is extremely probable that Aaron's name was absent altogether from the earliest document of the Hexateuch (J) in its original form. In it Aaron appears only to disappear. For example, according to our present text, Pharaoh sends for Moses and Aaron that they may entreat Yahwè to remove the plague of frogs; but in the course of the narrative Aaron is ignored, and the plague is withdrawn simply at 'the word of Moses' (Ex. 8 8-15*a* [4-11 *a*]). Apparently, therefore, the name of Aaron has been introduced here and there into J by the editor who united it to E (cp EXODUS, § 3 n.). If that is so we may perhaps agree with Oort that the legend of Aaron belonged originally

[1] In 1 Ch. 12 27, if MT is correct, Aaron (AV AARONITES) is almost a collective term for priests said by the Chronicler to have joined David at Hebron. In 27 17† RV rightly reads 'Aaron.'

[2] On passages in P which seem to conflict with this, see the circumspect and conclusive note of Di. on Lev. 8 12.

to the 'house of Joseph,' which regarded Aaron as the ancestor of the priests of Bethel, and that single members of this clan succeeded, in spite of Ezekiel, in obtaining recognition as priests at Jerusalem. So, doubtfully, Stade (*GVI* i. 583), who points out that no strict proof of this hypothesis can be offered.

As to the derivation of 'Aaron,' Redslob's ingenious conjecture that it is but a more flowing pronunciation of *hā'ārōn*, 'the ark,' is worth considering only if we can regard Aaron as the mythical ancestor of the priests of Jerusalem (*bnē hā'ārōn = bnē Aharōn*). So Land, *De Gids*, Nov. 1871, p. 271.

See PRIESTS; and cp, besides the works of We., St., and Ki., Oort's essay 'Da Aaronieden' in *ThT* xviii. 289-335 ['84].
W. E. A.

AARONITES, RV '[the house of] Aaron' (לְאַהֲרֹן; ΤΟ ΑΑΡΩΝ [B], ΤΩΝ a. [A], ΤΩΝ ΥΙΩΝ A. [L]; ܠܒܝܬ ܐܗܪܘܢ; *DE STIRPE AARON*), 1 Ch. 12 27. See AARON, note 1.

ABACUC (*ABACUC*), 4 Esd. 1 40†. See HABAKKUK.

ABADDON (אֲבַדּוֹן, but in Prov. 27 20 Kr. אֲבַדּוֹ, by contraction[1] or misreading, though the full form is also cited by Gi., for Kt. אבדה;[2] ΑΠΩΛ[Ε]ΙΑ [BℵA], but Job 31 12 ΠΑΝΤΩΝ ΤΩΝ ΜΕΡΩΝ [BRA], . . . ΛΕΡΩΝ [ℵc.c]; Rev. 9 11, ΑΒΑΔΔΩΝ [ℵA, etc.], ΑΒΑΔΔ. [B etc.], ΑΒΒΑΔΔ. [some curss.] etc.; ܐܒܕܢܐ; *PERDITIO*, but Rev. 9 11 *ABADDON*), RV Job 26 6, Prov. 15 11 27 20; RV mg. Job 28 22 31 12, Ps. 88 11 [12], elsewhere EV DESTRUCTION; in Rev. 9 11 Abaddon is stated to be the Hebrew equivalent of APOLLYON (ΑΠΟΛΛΥΩΝ [ℵA]). Etymologically it means '(place of) destruction.' We find it parallel to Sheol in Job 26 6 28 22; Prov. 15 11 27 20 (see readings above). In these cases RV makes it a proper name, either Abaddon or Destruction, as being parallel to the proper names Sheol or Death. In Ps. 88 11 [12] 'Destruction' is parallel to 'the grave'; in Job 31 12 the same term (in RV) is equivalent to 'utter ruin.' Thus Abaddon occurs only in the Wisdom-Literature. There is nothing in the usage to indicate that in OT it denotes any place or state different from Sheol (*q.v.*), though by its obvious etymology it emphasises the darker aspects of the state after death. An almost identical word (אַבְדָן) is used in Esth. 9 5 (constr. אָבְדַן; 8 6) for 'destruction' in its ordinary sense as a common noun. In later Hebrew אבדון is used for 'perdition' and 'hell' (Jastrow, *Dict. s.v.*), and is explained in Targ. on Job 26 6 as בית אבדנא, house of perdition—*i.e.*, hell. The Syriac equivalent word (ܐܒܕܢܐ) has the meaning 'destruction,' and is used to translate 'Α.

Rev. 9 11 mentions a king or angel of the abyss, whose name in Hebrew is Abaddon, and in Greek Apollyon (Ἀπολλύων, Destroyer), the *-on* being supposed to be a personal ending in Hebrew, as it is in Greek. This is, of course, poetic personification (cp Rev. 6 8 20 14), and may be paralleled in the OT (Job 28 22; cp Ps. 49 14 [15]), and in Rabbinical writers (Schöttgen, *Horæ Hebr. Apoc.* ix. 11, and *PRE*[(3)] *s.v.*). The identification with the ASMODEUS of the Book of Tobit is a mistake. Apollyon has become familiar to the world at large through the *Pilgrim's Progress*, but Abaddon may be said not to exist outside of the Apocalypse. W. H. B.

ABADIAS (ΑΒΔΙΑΣ [BA]), 1 Esd. 8 35† = Ezra 8 9, OBADIAH, 11.

ABAGTHA (אֲבַגְתָא, etymology doubtful, but see BIGVAI, BAGOAS; according to Marq. [*Fund.* 71] the corresponding Gr. is ΑΒΑΤΑΖΑ [BℵA], which [reading αβαζατα] he regards as presupposing אבזתא, cp BIGTHA; the fifth name in the list as it stands is ΖΑΘΟΛΘΑ [Bℵ], ΖΗΒΑΘΑΘΑ [A]), a chamberlain of Ahasuerus (Est. 1 10). See ESTHER, ii. § 3.

ABANA, RV **Abanah** (אֲבָנָה, 2 K. 5 12† Kt., אֲמָנָה [Kr.]; ΑΒΑΝΑ [BL], ΑΡΒ. [(ρ superscr.) B^b?], ΑΝΑΒ. [B^a?mg.], ΝΑΕΒ. [A]; ܐܒܢܐ; *ABANA*), one of the 'rivers' (נְהָרוֹת) of Damascus. The name, which occurs nowhere else, should probably be read AMANA (AV mg.) or AMANAH (RV mg.; see further AMANA, 2); in this form, as meaning 'constant,' it would be equally suitable to a river and to a mountain, though it was first of all given to the mountain range of Antilibanus, from which, near Zebedāni, the Nahr Baradā ('the cold') descends to refresh with its sparkling waters the city and the gardens of Damascus.[1] The romantically situated *'Ain Fījeh* (πηγή), a little to the S. of *Sūk Wādy Baradā* (the ancient Abila), appears from its name to have been regarded as the chief source of the Baradā. It is not, certainly, the most distant one; but it does, at any rate, 'supply that stream with twice as much water as it contains before it is thus augmented' (Baed. *Pal.*[(2)] 336). Close to it are the remains of a small temple, which was presumably dedicated to the river-god. The clear waters of the Nahr Baradā have a charm which is wanting to the Jordan through the greater part of its course. This explains Naaman's question in 2 K. 5 12, as far as the Amana is concerned. It is the fate of the Baradā to disappear in the swamps called the Meadow Lakes, about 18 m. to the E. of Damascus, on the verge of the desert. See PHARPAR. T. K. C.

ABARIM, THE (הָעֲבָרִים; ΑΒΑΡΕΙΜ [BAL], -ΙΝ [BL], and phrases with πέραν [BAL], see below; Jos. ΑΒΑΡΕΙΣ), literally 'Those-on-the-other-side'—*i.e.*, of the Jordan—is employed by the latest documents of the Pentateuch (P and R) in the phrase, Mt. or Mts. of the Abarim, to describe the edge of the great Moabite plateau overlooking the Jordan valley, of which Mt. NEBO was the most prominent headland:—Nu. 27 12 [R], τὸ ὄρος τὸ ἐν τῷ πέραν [RA], τ. ὄ . . . π. [τοῦ ἰορδάνου] [L]; Dt. 32 49 (P [R]), τ. ο. τ. αβαρειν [BL], . . . ειμ [A], 'this Mt. of the Abarim, Mt. Nebo'; Nu. 33 47 *f.* (P [R] in Israel's itinerary between the Moab plateau and the plains of Shittim), 'Mts. of the Abarim' (τὰ ὄρη τὰ αβαρειμ, ὀρέων a. [BAL]). In Nu. 33 44 we find Ije-ha-abarim (AV IJE-ABARIM), 'heaps of the Abarim' (to distinguish it from the Ijim of Judah, Josh. 15 29; see IIM, 1), on the extreme SE. of Moab. Since the employment of the name thus confined to Moab occurs only in late documents, it is probably due to the fact that at the time these were written the Jews were settled only over against Moab. Josephus, too, uses the word in the same limited application (*Ant.* iv. 8 48, ἐπὶ τῷ ὄρει τῷ Ἀβαρει), and Eusebius (*OS*[(2)] 216 4, Ἀβαρείμ) so quotes it as employed in his own day. But there are traces in the OT of that wider application to the whole trans-Jordanic range which the very general meaning of Abarim justifies us in supposing to have been its original application. In Jer. 22 20 (RV), Abarim (AV 'the passages'; 𝔊^BAℵQ, dividing the word in two, τὸ πέραν τῆς θαλάσσης) is ranged with Lebanon and Bashan—that is to say, is probably used as covering both Gilead and Moab;—and in the corrupt text of Ez. 39 11, 'the valley of the passengers,' as AV gives it (similarly RV), most probably should rather be 'a valley of [Mt.] Abarim' (עֲבָרִים for עֹבְרִים; so Hi., Co., Siegfr., Bu.). If so, that extends the name to Bashan. Thus the plural noun Abarim would denote the E. range in its entire extent—being, in fact, practically equivalent to the preposition עבר (originally a singular noun from the

[1] Kö. *Hebr. Sprache*, ii. 479 γ, gives parallel contractions; cp BDB.

[2] On the several forms see Ba. *NB* § 194 n. 2, § 224 b.

[1] Rev. William Wright, formerly of Damascus, states that 'the river whose water is most prized is called the Abanias, doubtless the Abana' (*Leisure Hour*, 1874, p. 284; so *Expositor*, Oct. 1896, p. 294). Is the name due to a confusion with Nahr Bāniās (certainly not the ancient Amana)? No Abanias is mentioned in Porter's *Five Years in Damascus* or in Burton and Drake's *Unexplored Syria*.

same root). There is no instance of the name earlier than Jeremiah. 'Targ. Nu. 27 12 Dt. 32 49 gives טורא דעבראי.

As seen from W. Palestine this range forms a continuous mountain-wall, at a pretty constant level, which is broken only by the valley-mouths of the Yarmük, Zerkä or Jabbok, and Arnon. Across the gulf of the Jordan valley it rises with great impressiveness, and constitutes the eastern horizon (cp Stanley, *SP*; GASm, *HG* **53, 519, 548)**. The hardly varying edge masks a considerable difference of level behind. On the whole the level is maintained from the foot of Hermon to the S. end of the Dead Sea at a height of from 2000 to 3000 feet above the ocean. The basis throughout is limestone. N. of the Yarmük this is deeply covered by volcanic deposits, and there are extinct craters NE. of the Lake of Galilee. Between the Yarmiik and the Wädy Hesbän, at the N. end of the Dead Sea, run transverse ridges, cut by deep'wädies, and well wooded as far S. as the Zerkä. S. of Wädy Hesbän rolls the breezy treeless plateau of Moab, indented in its western edge by short wädies rising quickly to the plateau level, with the headlands that are more properly the Mts. of Abärim between them; and cut right through to the desert by the great trenches of the wädies, Zerḳā, Mā'īn, and Mōjīb or Arnon. For details see ASHDOTH-PISGAH, BAMOTII-BAAL, BETH-PEOR, MOAB, NEBO, PISGAH, ZOPHIM, etc., with authorities quoted there. On Nu. 3347 *see* WANDERINGS, § 11. ***G.* A. S.**

ABBA (ⲁⲃⲃⲁ [Ti. WH], *i.e.* **אַבָּא**, Ab, 'father,' in the 'emphatic state'), an Aram. title of God used by Jesus and his contemporaries, and retained by Greek-speaking Christian Jews. See Mk. 14 36 Rom. 8 15 Gal. 46f; where in each case 6 *πατήρ* is subjoined.

ABDA (**עַבְדָּא**, § 51, frequent in Phœn. and Aram. On the form cp Renan, *REJ* v. 165*f.* ['82], and see NAMES, §§ **37**, 51).

1. Father of Adoniram (1 K. 46; *aßaw* [Al; *εφρα* [B]; *εδραμ* [L]).
2. Levite in list of inhabitants of Jerusalem (see EZRA, ii. § 56, § 15 [1] *a)*, Neh. 11 17 (*αβδας* [ℵc.a.mg. sup.], *ωρηβ* [ℵ*], *ωβηβ* [B], *ιω. [A]*, *αβδιας* [L]) = 1 Ch. 9 16, OBADIAH, 9 (*q.v.*).

ABDEEL (**עַבְדְּאֵל**, § 21, 'servant of God'), father of Shelemiah, Jer. 36 26†. (Not in 𝔊.)

ABDI (**עַבְדִּי**, § *52*, abbr. for 'servant of Yahwè'? cp Palm. **עבדי**, and see OBADIAH; ⲁⲃⲇⲓⲁ [L]).

1. Father of Kish, a Levite under Hezekiah, mentioned in the genealogy of ETHAN [*q.v.*], 1 Ch. 644 [29] 2 Ch. 29 12 : *αβδ[ε]ι* [BAL].
2. One of the b'ne ELAM [*q.v.* ii. 1], in list of those with foreign wives (see EZRA, i. § 5 end), Ezra 10 26 (*αβδ[ε]ια* [BℵA], -*ς* [L]) = 1 Esd. 927 (RV OABDIUS, AV om., *ωαβδ[ε]ιος* [BA]).

ABDIAS (ABDIAS), 4 Esd. 1 39†. See OBADIAH, 1.

ABDIEL (**עַבְדִּיאֵל**, §§ 21, **37**, 'servant of God'; ⲁⲃⲇⲉⲏⲗ [B]; -ⲇⲓⲏⲗ [AL]), in genealogy of GAD. 1 Ch. 5 15†.

ABDON (**עַבְדּוֹן**; ⲁⲃⲇⲱⲛ [AL], see also below), one of the four Levitical cities within the tribe of Asher; Josh. 21 30 1 Ch. 6 74 (59)†. The site has not been identified, but Guérin has suggested that of '*Abdeh*, 10 m. N. from 'Akka (Acre). The same city is referred to in Josh. 19 28, where **עֶבְרֹן** (AV HEBRON; RV EBRON) is a graphical error for **עבדן**, Abdon, which, in fact, some MSS. read (Josh. 21 30, *δαββων* [B]; 1 Ch. 6 74 [59], *αβαραν* [B], om. [L]; Josh. 19 28, *ελβων* [B], *αχραν* [AL]).

ABDON (**עַבְדּוֹן**, **§77**; dim. of EBED; ⲁⲃⲇⲱⲛ [BAL]).

1. b. Hillel, one of the six minor judges (see **JUDGES,** §). After judging Israel eight years, he was buried at Pirathon in Ephraim, his native place. He had forty sons and thirty grandsons, 'that rode on three-score and ten ass colts'—*i.e.*, was head, *of* a large and wealthy family (cp Judg. 5 10), Judg. 12 13 15† (*λαβδωμ* [AL], *v.* 15 -*ω* [A]); on Ew.'s conjecture that his name should be restored in 1 S. 1211, see BEDAN, 1.
2. b. Shashak, a Benjamite (1 Ch. 8 23† *αβαδων* [B]).
3. b. Jeiel the father of Gibeon; 1Ch. 830 (*αβαλων* [B]) = 1 Ch. 9 36 (*σαβαδων* [B], *σαβδων* [Al).
4. b. Micah, a courtier of King Josiah (2 Ch. **34** 20, *αβδοδομ* [B]), elsewhere called ACHBOR (*q.v.* 2). 5. See BEDAN, 2.

ABEDNEGO (**עֲבֵד נְגוֹ** or **עֲבֵד נְגוֹא**, § 86; a corruption of **עֲבֵד נְבוֹ**, 'servant of Nebo,' which occurs in an Assyrio-Aramaic inscription, COT2 *126*; ⲁⲃⲇⲉⲛⲁⲅⲱ [BA 87]; ܥܒܕܢܓܘ; *ABDENAGO*), the court name given to Azariah [10], the friend of Daniel (Dan. 1 7, etc.). On name see also NERGAL.

ABEL (**הֶבֶל**, § 6; ⲁⲃⲉⲗ [ADL]; *ABEL*), Gen. 4 2 *ff.* There are three phases in Jewish beliefs respecting Abel. The second and the third may be mentioned first. The catastrophe of the Exile shifted the mental horizon, and made a right view of the story of Abel impossible. Abel was therefore at first (as it would seem from P) neglected. Afterwards, however, he was restored to more than his old position by devout though uncritical students of Scripture, who saw in him the type of the highest saintliness, that sealed by a martyr's death (cp Kohler, 3QR v. **413** ['93]). The same view appears in parts of the NT (Mt. 23 35 = Lk. 11 51; Heb. 114; 12 24; 1 John 3 12). God bore witness, we are told (Heb. 11 4), that Abel was righteous—*i.e.*, a possessor of true faith, —and it was by faith that Abel offered *πλείονα* (Cobet conjectures *ἥδίονα*) *θυσίαν*. Hence Magee assumes that Abel had received a revelation of the Atonement *(Atonement and Sacrifice*, i. 50-53). The original narrator (J), however, would certainly wish us to regard Abraham **as** the first believer; the story of Cain and Ahel is an early Israelitish legend retained by J as having a profitable tendency. On this earliest phase of belief, see CAIN, § 4 *f.*

Meaning of the name.—The Massorites understood Abel (Hebel) to mean 'a breath,' 'vanity' (cp **Ps.** 39 6 [7]); but the true meaning, both of Abel and of the collateral form Jabal, must be something concrete, and a right view of the story favours the meaning 'shepherd,' or, more generally, 'herdman.'. This is supported by the existence of a group of Semitic words, some of which denote domesticated animals, while others are the corresponding words for their herdmen. **Cp,** *e.g.*, Ass. *ibilu*, 'ram, camel, ass' (but some explain 'wild sheep': see **Muss-**Arn. *s.v.*); Aram. *habbālā*, 'herdman' (used widely; see PS, *s.v.*), Ar. *ibil*, 'camels,' *abbāl*, 'camel-herd.' The attempt of Lenormant (*Les origines*, i. 161) and, more definitely, Sayce (*Hibbert Lects.* 186; **236, 249**), to find in the name a trace of a nature-myth, Ahel (= Bab. *ablu*, 'son') being originally 'the only son Tammuz, who was a shepherd like Jabal and Ahel' (Sayce), and whom Lenormant regards as, like Ahel in early theology a kind of type of Christ, is adventurous. The name 'son' is insufficient as a title of Tammuz (*Abal-napišti*); and there is nothing said of a mourning for Abel's death. The title of 'shepherd' applied to Tammuz in *4* **R** 27 1 is explained by the following word 'lord' (see Jeremias, *Izdubar Nimrod*, 50). In the *Testament of Abraham* (ed. James) Ahel plays the part of Judge of the nether world, like the Jama (Yima) of the Aryans. T. K. *C.*

ABEL (**אָבֵל**, §§ **89-100)** occurs, apparently in the sense of 'meadow,' in the place-names dealt with in the following six articles. *As* a place-name it is to be struck out of **1 S.** 6 18*b*, where for MT **עד אבל הגדולה** (so also Pesh.) 𝔊BA reads *ἕως* (*ἕ. τοῦ* [L]) *λίθου τοῦ μεγάλου*, with which the Targ. Jon. agrees *(so* also RV). Ew., We., and others further change the points so as to read : 'and a witness is the great stone.' Dr. suggests as an alternative : 'and still the great stone, whereon'—etc. On Abel in 2 S. 2018, see ABEL-BETH-MAACHAH. G. A. S.

ABEL-BETH-MAACHAH, RV Abel-Beth-**Maacah** (2 S. 20 14 : **אָבֵלָה וּבֵית מַעֲכָה**, 'to Abel and Beth-maacah,' RV 'unto Abel and to Beth-maac(h)ah' [many strike out the conjunction, but the places may have been different; cp **2** S. 20 15 L,

2 K. 15 29 BAL], εις ἀβελ και εις Βαιθμαχα [B], . . . Βηθμαχα [A], κ. ἀβηλα κ. Βαιθμακκω [L]).

Cp 2 S. 20 15, בְּאָבֵלָה בֵּית הַמַּעֲכָה, EV 'in Abel of Beth-maac(h)ah,' εν Αβελ την Βαιθμαχα [B], EV A. εν Βηθμαχα [Al, εν τη A. κ. Βαιθμακκω [L]; 1 K. 15 20, אָבֵל בֵּ׳מ׳, Αδελμαθ [B], Αβελ οικου (sic) Μααχα [A], Αβελμααχα [L]; 2 K. 15 29, אָבֵל בֵּ׳מ׳, Αβελ κ. την Θαμααχα [B], Καβελ κ. τ. Βερμααχα [A], Αβελ κ. τ. Βαιθμααχα [L]; 2 S. 20 18 (on which see ARAM, § 5), אָבֵל, EV ABEL, (τη) Αβελ [*bis* BAL].

This place, mentioned, although in now mutilated form [Al-bi-il, by Tiglath-pileser III. (cp Schr. *COT* on 2 K. 15 29), is the present *Ābil*—called also *Ābil el-Ḳamḥ* ('of the wheat') to distinguish it from *Ābil es-Sūk* (see ABILENE)—a small village inhabited by Christians on the ***Nahr*** *Bareighīt*, on a hill 1074 ft. above the sea, overlooking the Jordan valley, almost directly opposite to *Bāniās*, and on the main road thence to Sidon and the coast. It is a strong site, with *a* spring and a (probably artificial) mound; below is a broad level of good soil, whence the modern name. See Yāḳūt 156; Rob. *LBR* 372 *f.* (who argues against *Ībel el-Hawā*, a site 8 m. farther north); *PEF Mem.* i. **85 107;** Merrill, *East of* ***the*** *Jordan*, 309, 315. In 2 Ch. 16 4, we have, instead of the Abel-beth-maacah of the parallel passage (1 K. 15 20), ABEL-MAIM (אָבֵל מָיִם, **Αβελμαιν** [A], -μαν [B], -μαειμ [L]; cp Jos. *Ant.* viii. 12 4, **Αβελανη**), or 'Abel of Waters,' a name suitable for *so* well-watered a neighbourhood. On Judith 4 4 7 3 where Pesh. reads Abelmeholah, and א apparently Abel-maim, see BELMEN (cp also BEBAI). On the ancient history of the place see ARAM, § 5. G. A. S.

ABEL-CHERAMIM (אָבֵל כְּרָמִים, 'meadow of vineyards,' § 103; εβελχαρμειν [B]; ἀβελ ἀμπελωνων [AL]: Judg. 11 33 † RV), the limit of Jephthah's pursuit and slaughter of the Ammonites. Ens. and Jer. (OS[2] 225 5 96 **10**, Ἀβελ ἀμπέλων, *Abel uinearum*) identify it with a village of their day, named Ἀβελ, **7 R.** m. from Philadelphia. This Abel may be any of the many fertile levels among the rolling hills around 'Ammān, on which the remains of vineyards and of terraces are not infrequent. *G. A. S.*

ABEL-MAIM (אָבֵל מַיִם, 2 Ch. 16 4†), see ABEL-BETH-MAACHAH.

ABEL-MEHOLAH (אָבֵל מְחוֹלָה, *i.e.*, 'dancing meadow'; εβελμαωλα, ἀβωμεουλα, εβαλμαο. [B]; ἀβελμαουλ(α), Βαcελμεο.[A]; ἀβελμεουλ(α), -μαωλα [L]; *ABELME(H)ULA*; Jos. *Ant.* viii. 137, ἀβελα), the home of Elisha the prophet (1 K. 19 16), and probably also of Adriel b. Barzillai 'the Meholathite' (1 S. 18 19; 2 S. 21 8), is mentioned in conjunction with Bethshean as defining the province of one of Solomon's officers (1 K. 4 12). Gideon pursued the Midianites 'as far as Beth-shittah towards Zererah as far as the border'—lit. 'lip,' probably the high bank which marks the edge of the Jordan valley proper—' of Abel-meholab, by Tabbath' (Judg. 7 22). According to Eus. and Jer. (OS 97 11 227 35), Abelmaula (or 'Αβελμαελαί) lay in the *Ghōr*, 10 R. m. to the south of Scythopolis (Bethshean), and **was** still an inhabited village in their time, with the name Bethaula, Βηθμαελά (though they mention also an *Abelmea*, 'Αβελμεά). This points to *a* locality at or near the place where the *W. Māliḥ*, coming down from 'Ain Māliḥ, joins the Jordan valley.

ABEL-MIZRAIM (אָבֵל מִצְרַיִם [see below], πενθος αιγυπτου [BAL]; so Pesh. Vg.), Gen. 50 11† (J), otherwise (*v.* 10 *f.*) called GOREN HA-ATAD (גֹּרֶן הָאָטָד; ἀλωνι ἀταδ [B[a]AL], A. ταδ [B* vid.], A. ἀταт [*D*]) or 'the threshing-floor of the thorn-shrub' (EV 'of ATAD,' see BRAMBLE, 1), and said to be situated 'beyond Jordan' (cp *v.* 10 J). It was there that Joseph made a second mourning for his father, whence the etymological play on the name (*v.* 11). After this, Joseph and his brethren carried the embalmed body **of** Jacob to Maclipelah for burial, and then returned **to** Egypt (*v.* 13 *f.* J and P). The words 'which is beyond' Jordan' (*v.* 10 *f.*), however, cannot be accurate: the original text of J must, it would seem, have been altered, owing to a misreading or an editorial misunderstanding. The circuitous route round the north end of the Dead Sea has no obvious motive: had it really been meant, something more would have been said about it (cp Nu. 14 25). For הַיַּרְדֵּן, 'the Jordan,' J must have written either הַשִּׁחֹר (less probably הַיְאֹר)—*i.e.*, the most easterly arm of the Nile (a frontier of Canaan, according to Josh. 13 3)—or הַנָּהָר, 'the stream'—Le., the *Wādy el-Arīsh*, the usual SW. boundary of Canaan (cp Gen. 15 18, where J calls this Wādy, not the נחל but the נהר of Egypt—*i.e.*, 'the stream on the border of Egypt' (Kautzsch-Socin), on which see EGYPT, RIVER OF).

The meaning of the narrative is this. At the first Canaanite village (the first after the border had been crossed) the 'great company' (*v.* 9) halted, while Joseph and his fellow-Hebrews mourned in their own way (cp *v.* 3*b*) in the very place where wedding and funeral ceremonies are still performed in the Syrian villages (Wetz.). The repetition of 'which is beyond Jordan' must be due to the editor.

It is remarkable that Jer. (OS *85* 15) though he does not question the reading 'beyond Jordan,' Identifies ***Area*** *Atath* with *Bethagla*—*i.e.*, BETH-HOGLAH (*q.v.*), which **is** certainly on the ***west*** bank of the Jordan. Dillm. is more consistently conservative, and, followed by Sayce (*Crit.* ***and Mon.*** *27 f.*), finds in the trans-Jordanic Abel-Mizraim a testimony *to* the Egyptian empire in Palestine in the pre-Mosaic age, proved **by** the Amarna tablets. The exegetical difficulties of this view, however, are insuperable.

As to the name Abel-mizraim it is not improbable that its original meaning was 'meadow of Muṣri' (in N. Arabia, see MIZRAIM), but that before J's time it had come to be understood as meaning 'meadow [on the border] of Egypt.' Cp Wi. *Altor. Forsch.* 34, and see EGYPT, RIVER OF. T. K. C.

ABEL-SHITTIM (אָבֵל הַשִּׁטִּים, § 100, *i.e.*, 'the meadow of the acacias'; Samar. omits the article; ἀβελcαττειμ [L], B . . ττιμ [A], -ττειν [F], Βελcα. [B]; *ABEL-SATIM*, Num. 33 49), or, more briefly, **Shittim** (הַשִּׁטִּים, 'the acacias, cαττειν [BA], -μ [L]; but Nu. 25 1 cαττειμ [F], -ν [L]; Josh. 2 1 εκ cαττει [A], εξαττειν [F], 3 1 εκαττειν [F]; Mic. 6 5† των cχοινων [BAQ] (for cχινων? cp Sus. **54**). in the Arabah or Jordan basin at the foot of Mount Peor and opposite Jericho. In the time of Jos. (*Ant.* iv. 8 1, v. 1 1) a town named Abila ('Αβιλή), rich in palm trees, occupied such a site at a distance ***of*** 60 stadia ($7\frac{1}{2}$ R. m.) from the river. Cp *BJ* iv. 7 *6*, where it is described as near the Dead Sea, and Jer. (Comm. on Joel), who locates it *6* R. m. from Livias. This seems to point to the neighbourhood of *Khirbet el-Kefrein*, where the Wādy Kefrein enters the Jordan valley, and there are ruins, including those of a fortress. It **was** at Abila, according to Jos., that Moses delivered the exhortations of Dt. The palm trees have disappeared, but there is an acacia grove at no great distance (Tristram, Conder). According to *RP*[(2)] v. 50, this is the Aubal or 'Abel' mentioned among the places conquered by Thotmes III.

In Joel 3 *[4]* 18 שִׁטִּים should perhaps be treated as a common noun and translated 'acacias' (so RV mg., and Marti in *HS*; cp τῶν σχοίνων [BאAQ]). At all events the reference is not to Abel-shittim across the Jordan. Some (We., Now.) think the name has been preserved in the *Wādy es-Sanṭ* (see ELAH, VALLEY OF), but the latter does not require the watering of which Joel speaks; and he intends, rather, some dry gorge nearer Jerusalem, perhaps (like Ez. 47 1-12) some part of the Kedron valley, *Wādy en-Nār* (cp Dr. *ad loc.*; GASm. *HG* **511**; also, for acacias on W. of Dead Sea, Tristr. *Land of Isr.* 280, *298*).

ABEZ, RV **Ebez** (אֶבֶץ; ΡΕΒΕC [B], ΑΕΜΕ [A], -ΜΙC [L]; *ABES;* Josh. 19 20†),[1] one of the sixteen cities of Issachar. The site is unknown, but the name is evidently connected with that of the judge IBZAN (*q.v.*) of Bethlehem—*i.e.*, the northern Bethlehem. This Bethlehem, it is true, is Zebulunite, while Ebez is assigned to Issachar; but the places must have been very close to each other, and the frontiers doubtless varied. Conder's identification with *El Beiḍā*, 2 m. from Beit Laḥm, might suit as to position, but 'the white village' can have nothing to do with the old name.

W. R. S.

ABI (אֲבִי, so Targ. Jon.; abbrev. of *ABIJAH;* ΑΒΟΥ [BA], -Θ [L]; Jos. 'Αβία; *ABI*), daughter of Zechariah, wife of King Ahaz, and mother of King Hezekiah (2 K. 18 2†). In the parallel passage (2 Ch. 29 1) the name is given as ABIJAH (אֲבִיָּה, αββα [B : see Swete], αββαθυθ [A], αβια [L]; ل [sic]; *Abia*), but the probability is perhaps in favour of the contracted form in K. (*So* Gray, *HPN* 24.)

ABI, Names with. There has been much discussion as to the interpretation of the names compounded with *abi*, *aḥi*, and some other words denoting relationship[1] (cp AMMI-, HAMU-, DOD-). Without assuming that this discussion is in all points closed (cp NAMES, § 44), the writer thinks it best to state the theory which he has himself long held, adopting certain points (with acknowledgment) from Gray's very lucid and thorough exposition, and then to consider the religious and archæological aspects of the subject.

1. Are the names sentences?

The question whether these names are sentences has long been answered by some critics in the affirmative, and the arguments of Gray (*HPN* 75-86) put the student in possession of all the points to beurged. He also ably criticises the alternative view (viz., that the two elements in Abimelech, Ammiel, etc., are related as construct and genitive). It is usual to refer on this side to such Phoenician names as אחתמלך, in which the term of relation is always fem. in names of women and masc. in those of men. But this is decisive only for Phœnician names, and even in their case only for names in אחי and אחת ('brother' and 'sister'). Compounds with *ab* ('father') are used indifferently of men and women in Phoenician, just as they are in Hebrew. In the latter case, therefore, at least, the term of relation cannot refer to the bearer of the name—*i.e.*, cannot be in the construct state. No doubt in Ps. 110 4 Melchizedek (which suffers, along with other compound names containing a connective *i* [see below, § 3], from the same ambiguity as names containing a term of kinship) is understood as a construct relation, 'king of righteousness,' and the phrase אבי הוד—as we should certainlyread in Is. 9 5 *[6]* for אבי עד[2]—obviously means for the writer 'glorious father' (*i.e.*, glorious ruler of the family of Israel; cp Is. 22 21). It would seem, therefore, that in the post-exilic age some names of this type were so understood. But we must remember that in later times the original sense of a formation may be forgotten. Gray's main objections to taking *abi* etc. as originally constructs are as follows: (1) The theory will not account for names like Eliab, Joah, etc. Eliab clearly stands to Abiel as Elijah to Joel; in the latter case the genitive relation is excluded; inferentially it is equally so in the former. (2) The use of *ab* with a noun denoting a quality is a pure Arabism,[1] which should not be lightly admitted, while such an interpretation as 'father of Yah' for Abijah is unlikely. (3) A woman's name like 'brother of graciousness' (Ahinoam) is inconceivable.[2] In favour of taking the names compounded with a terni of relationship as sentences Gray urges that, though *ab*, *aḥ*, *'am*, etc., all denote a male relative, the proper names compounded with them are used indifferently of men and women; while, on the other hand, nouns with *6en* (sou) prefixed are used exclusively of men, the corresponding names of women having *bath* (daughter) for *ben.* He infers, therefore, that, while in the case of names in *ben* and *bath* the element denoting kindred refers to the hearer of the name, in the case of *a6* etc. it does not.

2. Which part is predicate?

Assuming that these compound names are sentences, are there grounds for determining which of the two elements is subject and which is predicate? (1) In cases like Abijah, Ahijah, only the first part can he regarded as indefinite[3] and therefore as predicate. We must, therefore, render 'Yahwè is father,' etc. The same principle would apply to Joab, Joah (if these are really compounds). Quite generally, therefore, whenever one element is a proper name it must be subject.[4] But (2) a divine proper name may give place to אל (*ēl*) or some divine title—*e.g.*, Lord. Hence Abiel, Abimelech, will be best explained on the analogy of Abijah—*i.e.*, 'God is father,' 'the divine king is father.' Lastly (3) the divine name or title may give place to an epithet, such as *rum*, 'lofty.' Here the syntax is at first sight open to doubt. The usages of the terms of relationship in the cases just considered would suggest that *-ram* in Abi-ram is subject; but the fact that *ram* nowhere occurs by itself designating Yahwè seems to the writer to show that it must be predicate. Abram, therefore, means, not 'the exalted one is father,' but 'the (divine) father is exalted.' Cp ADONIRAM, JEHORAM.

3. Connective *ī*.

The question whether the connective *ī*, which occurs in most of the forms, is the suffix of the first pers. sing., or an old ending, has been variously answered. Should Abinoam, Ahinoam be rendered 'my father (or my brother) is graciousness' (so Olshausen, *Lehrb. d. hebr. Spr.* § 277 *e*), or 'the (divine) father, or brother, is graciousness'? Gray well expounds the reasons for holding the latter view. Thus, there are certain forms in which י does not occur—*e.g.*, Abram, Abšalom, beside Abiram, Abišalom. We also find Abiel beside Eliab. Lastly, the analogy of ירמיהו (Jeremiah), יחזקיהו (Hezekiah), etc., favours the theory that the names before us contain utterances respecting the relation of a deity to all the members of the tribe or clan which worships him. To some this may appear a slight argument; but to the writer it has long been an influential consideration. An argument on the opposite side offered by Boscawen and Hommel will he considered later (see § 5).

4. Religious conception.

It is not easy at first to appreciate, or even to understand, the conception which underlies compound names of this class. The representation of a god as the father of a tribe or clan may be less repulsive to us than the representation of him as a brother or as some other kinsman. Even a prophet does not object to the expression 'sons of the living God' (Hos. 1 10 [2 1]: see the commentators); but any one can see that to substitute some other relation

[1] On some possible hut by no means clear instances of *ēm*, 'mother,' in compound names, see Gray, *HPN* 64 *n.* 2.

[2] The interpretation of אבי עד as 'everlasting one' stands or falls with the interpretation of, *e.g.*, Ahinoam as 'father of graciousness,' and of Abitub as 'father of goodness.' Though defended by reference to such names by Guthe (*Zukunftsbild des Jes.* 41 ['85]), it is now generally rejected in favour of 'perpetual father (of his people),' or 'father (*i.e.* producer) of booty.' But neither of these explanations gives a satisfactory parallel to 'prince of peace.' We must read אֲבִי הוֹד. 'Prince of peace' suggests a reminiscence of Abšalom, which the writer prohablyinterpreted 'father of peace,' *i.e.*, peaceful (or prosperous) ruler.

[1] Rare in *ancient* Arabic (see NAMES, § 45).

[2] Even if in modern Ar. *abu* is so used of a woman (see NAMES, § 45, third note).

[3] This assumes that the connective *ī* is not pronominal (see below, § 3).

[4] The same principle will apply to othercompoundscontaining, instead of a term of kinship, a title, *e.g.*, as in MELCHIZEDEK (*q.v.*), ADONIJAH, etc., or a concrete noun, as in URIAH.

for sonship would in such a context be impossible. Names in Abi-, Amnii-, etc., are, in fact, of primitive origin, and must be explained in connection with primitive ideas of the kinship of gods and men (see WRS *RS*[2] Lect. 2). Names like Ahijah, Ahinoam, etc., imply a time when the god was regarded as brother. The question then arises, May we take 'brother' in a wide sense as kinsman? or did such formations descend from a remote age when society was polyandrous? Strabo (16 4) wrote of a polyandrous society in Arabia Felix that 'all are brothers of all,' and Robertson Smith (*Kin.* 167 *f.*) was of opinion that far back in the social development of Hebrew life lay a form of fraternal polyandry. Now, supposing that the Hebrews when in this stage conceived themselves to be related to a male deity, it is difficult to see under what other form than brotherhood such relationship could be conceived. Of course, if names expressing this conception were retained in later ages, they would receive a vaguer and more satisfactory meaning, such as 'Yahwè is a kinsman,' or 'protector.'[1]

Lastly, to supplement the Hebraistic arguments in § 3, we must brieflv consider the argument in favour of the explanation 'My father is peace' for Abishalom, 'My father is graciousness' for Abinoam, etc., is based on early Babylonian and S. Arabian names.

5. Relationship indtribal?

Boscawen (*Migration of Abraham*, Victoria Institute, Jan. 1886) long ago pointed out a series of primitive Babylonian names such as Ilušu-abišu, 'his god is his father,' Ilušu-ibnišu, 'his god made him,' which, in complete correspondence with the Babylonian penitential psalms, indicate a sense of the relation of a protective god not merely to a clan but to a person; and Hommel, in the interest of a too fascinating historical theory, has more recently given similar lists (*AHT* 71 *ff.*), to which he has added a catalogue of S. Arabian names (*ib.* 83, 85 *f.*) compounded with *ili*, *abi*, where these elements appear to mean 'my God,' 'my father,' etc. The present writer, however, must confess that, though aware of the names collected by Boscawen, he has long been of opinion that the course of the development of Israelitish thought and society is entirely adverse to the view that the relation of the deity described by *abi*, *aḥi*, etc., was primarily to the individual. This is a question of historical method—on which no compromise is possible—and not of Assyriology. We cannot argue that because the Babylonians, even in remote ages, bore names which imply a tendency to individualistic religion, the Israelites also—who, as far as our evidence goes, were much less advanced in all kinds of culture than the early Babylonians—had a similar tendency, and gave expression to it in their names. It is, therefore, wise to use these Babylonian and S. Arabian names, not as suggesting a theory to be followed in interpreting Israelitish names, but as monuments of early attainments of Semitic races which foreshadow those of the choicest part of the Jewish people at a much more recent period. The value of these names for explaining the formation of Hebrew proper names may be comparatively slight; but they suggest the idea that it was only the want of the higher spiritual prophecy (as known in Israel), as a teaching and purifying agent, and of somewhat different historical circumstances, which prevented the Babylonians from rivalling the attainments in spiritual religion of the later Jewish church. T. K. C.

ABIA (אֲבִיָּה), RV **Abijah.** For 1 Ch. 3 10 Mt. 1 7 see ABIJAH, 1; for Lk. 1 5†, *ibid.*, 6.

ABIAH, an English variant of ABIJAH (*q.v.*) in AV of 1 Sam. 8 2 1 Ch. 2 24 6 28 [13] 78, corrected in RV to the more usual form, except in 1 Ch. 2 24 6 28 [13].

ABIALBON, the Arbathite (אֲבִי־עַלְבוֹן הָעַרְבָתִי, § 4, [γαλ]αβιηλ υιος του αραβωθαιου [B], αειελβων ο αρωβωθειας [A], [ταλς]αβιης ο σαραιβαθι [L]), 2 S. 23 31, the name of one of David's 'thirty,' should in all probability be 'Abibaal a man of Beth-arabah' (so Bu., and partly Klo. and Ki.), the *al* (על) in *Abi-albon* being a relic of *Baal* (בעל), and the final syllable *bon* a corruption of *Beth* (בית). 𝔊BL, it is true, agrees with 1 Ch. 11 32 (אֲבִיאֵל הָעַרְבָתִי; αβιηλ ὁ γαραβαιθθι [B], α. ὁ γαραβεθ [א], α. ὁ σαραβεθθει [A], α. ὁ αραβαθι [L]) in supporting the name ABIEL (see Dr. *TBS* 283); but we know that early names of persons contained the name *baal* as a title of Yahwè where later writers would have preferred to see *el* (see BEELIADA). T. K. C.

ABIASAPH (אֲבִיאָסָף, § 44; 'the (divine) father gathers' or 'removes' or [if the א be not original, see below] 'adds' [cp the popular etymologies of JOSEPH], unless it be supposed that P and the Chronicler adopted an ancient name indeed [Gray, *HPN* 244], but understood it in the sense 'father of Asaph' [*OTJC*[2] 204 n.]; αβιασαρ [B], -σαφ [FL]), Ex. 6 24 [P], one of the three sons of Korah, *i.e.* eponym of one of the three divisions of the Korahite guild of Levites, see ASAPH, 3. In 1 Ch. 6 23 [8] (αβιαθαρ [B], -ασαφ [AL], ܐܒܝܣܦ [*sic*], *Abiasaph*), 6 37 [22] (αβιασαρ [BA], -ασαφ [Ba. (vid.) b. L], ܐܒܝܣܦ; *Abiasaph*), 9 19 (αβιασαφ [BAL], ܐܒܝܣܦ, *Asaph*) the name occurs also, without consonantal א as EBIASAPH, אֶבְיָסָף (Samar. text omits א in Ex. 6 24), which name ought to be read for that of ASAPH also in 1 Ch. 26 1 (אָסָף; αβιασαφαρ [B], ασαφ [AL], ܐܣܦ, *Asaph*).

ABIATHAR (אֶבְיָתָר, § 44, *i.e.*, 'the (divine) father is pre-eminent'; cp ITHREAM; αβιαθαρ [BאAL]; in 1 Ch. 18 16, αβιεαθερ [א*]; αβιαθαρος, Jos. [*Ant.* vi. 14 6]), the son of Ahimelech and descendant of Eli; the priestly guild or clan to which he belonged seems to have claimed to trace back its origin through Phinehas and Eliezer to Moses, who, in the early tradition (Ex. 33 7, E), guards the sanctuary of Yahwè and delivers his oracles. It was Abiathar's father, Ahimelech, who officiated as chief priest in the sanctuary of Nob when David came thither, fleeing from the jealous fury of Saul. Having no other bread at hand, Ahimelech gave the fugitives the holy loaves from the sanctuary. One of the royal couriers, however (see 1 S. 21 7 [8], with Dr.'s note), saw the act, and betrayed Ahimelech to Saul, who forthwith put the priests to death. No less than eighty-five (according to MT)[1] fell by Doeg's hands, and of the whole number Abiathar alone escaped.

It may be inferred from 1 S. 22 15 that David had before this contracted friendship and alliance with the house of Eli, and we can readily believe that, just as Samuel marked out Saul as the destined leader of Israel, so the priests at Nob, noting the tendency of the king to melancholy madness, and his inability to cope with the difficulties of his position, selected David as the future king and gave a religious sanction to his prospective claims (cp DAVID, § 3). Certain it is that the massacre of the priests at Nob told strongly in David's favour. The odium of sacrilegious slaughter clung to Saul, while David won the prestige of close friendship with a great priestly house. Henceforth David was the patron of Abiathar, and Abiathar was bound fast to the interests of David—'Abide thou with me,' said the warrior to the priest, 'for he that seeketh my life seeketh thy life' (1 S. 22 23). Moreover, Abiathar carried the ephod or sacred image into the camp of David: it was in the presence of this image that the lot was cast and answers were obtained from Yahwè: nor docs it need much imagination to understand the strength infused into David's band by the confidence that they enjoyed supernatural direction in

[1] Cp Barton, 'Kinship of gods and men among the ancient Semites,' *JBL* xv. 168 *ff.*, especially 179 *ff.* ('96).

[1] See DAVID, § 3 n.

their perplexities. Abiathar was faithful to David through every change of fortune. It was with the sanction of the sacred oracle that David settled at Hebron and became king of Judah (2 S. 2 1-3), and it was Abiathar who carried the ark, that palladium of Israel, which David used to consecrate Jerusalem, the capital of his united kingdom (1 K. 2 26). Abiathar maintained his sacerdotal dignity amidst the splendour of the new court, though later (we do not know when) others were added to the list of the royal chaplains—viz., Zadok, of whose origin we have no certain information, and Ira, from the Manassite clan of Jair,[1]—while David's sons also officiated as priests (2 S. 8 17 *f.* 20 26). Zadok and Abiathar both continued faithful to their master during Absalom's revolt, and by means of their sons conveyed secret intelligence to the king after he had left the city.

When David was near his end, Abiathar along with Joab supported the claim of Adonijah to the throne, and consequently incurred the enmity of Solomon, the younger but successful aspirant. Solomon spared Abiathar's life, remembering how long and how faithfully he had served David. But he was banished from the court to Anathoth, his native place, and Zadok, who had chosen the winning side, became chief priest in his stead. To the men of the time, or even long after the time at which it happened, such a proceeding needed no explanation. It was quite in order that the king should place or displace the priests at the royal sanctuary. But in a later age the writer of 1 S. 2 27-36,[2] who lived after the publication of D, did not think it so light a matter that the house of Eli should be deprived, at a monarch's arbitrary bidding, of the priesthood which they had held by immemorial right. Therefore, he attributes the forfeiture to the guilt of Eli's sons. A 'man of God,' he says, had told Eli himself of the punishment waiting for his descendants, and had announced Yahwè's purpose to substitute another priestly line which was to officiate before God's 'anointed'—*i.e.*, in the royal presence. A late gloss inserted in 1 K. 2 27 calls attention to the fulfilment of this prediction.

A special point which has occasioned some difficulty remains to be noticed. In 2 S. 8 17 [MT 𝔊BAL and Vg.] and 1 Ch. 18 16 [*ib.* and Pesh.; MT, however, reading ABIMELECH], instead of Abiathar b. Ahimelech it is Ahimelech b. Abiathar that is mentioned as priest along with Zadok. In 1 Ch. 24 6 31 as well, MT has this reading, in *v.* 6 also 𝔊BAL Pesh.—except that 𝔊A* reads *viol*; in *v.* 3 these versions all read 'Ahimelech of the sons of Ithamar,' while in *v.* 31 MT 𝔊BAL Vg. omit the phrase 'b. Abiathar, and Pesh. the whole passage. It is reasonable to suppose that this confusion is due to an early corruption of the text, and that in 2 S. 8 17 we should read with the Pesh. 'Abiathar b. Ahimelech' (so The. *ad loc.*; Baudissin, *AT Priesterthum*, 195; Dr. *ad loc.*). The Chronicler, however, must have had 2 S. 8 17 before him in its present corrupt form. In Mk. 2 26, by a similar confusion, David is said to have gone into the house of God and received the shew-bread 'when Abiathar was high-priest.' In reporting our Lord's words the evangelist has confused Abiathar with Ahimelech, a mistake into which he was led by the constant association of David's name with that of Abiathar. Suggestions made to evade the difficulty—*e.g.*, that father and son each bore the same double name, or that Abiathar officiated during his father's lifetime and in his father's stead—are interesting when we remember the great names which have supported them, but are manifestly baseless (see ZADOK, 1). See Bu. *RiSa* 195 *f.*

W. E. A.

ABIB (אָבִיב, *i.e.*, '[month of] young ears of barley'). See MONTH, §§ 2, 5.

[1] See, however, IRA, 3, where a Judahite origin is suggested.
[2] The section in its present form is from the school of the Deuteronomist. But the expression 'walk before my anointed' proves conclusively that there is an older substratum.

ABIDA, and (AV in Gen.) **Abidah** (אֲבִידָע, § 44, 'the (divine) father knoweth'? cp Eliada, Beeliada; Jehoiada; αβ[ε]ιδα [BAL], αβιρα [AD], αβια [E], αβιαδα [L]; *ABIDA*), one of the five 'sons' of Midian, and grandson of Abraham by Keturah (Gen. 25 4 1 Ch. 1 33†). Unexplained, as yet, except that the same name occurs in Sab. inscriptions (אבידע, cp also ידעאב, Hal. 192, 202, etc.).

ABIDAN (אֲבִידָן, § 44, 'the (divine) father is judge'; cp Daniel; αβ[ε]ιδαν [BAL]; *ABIDAN*), chief of Benjamin in the time of Moses (Nu. 1 11 2 22 7 60 65 10 24†). On the age of the name see Gray, *HPN* 202, 244. Possibly P had a consciousness that *-dan* was archaic (cp DAN, § 1), and therefore suitable in the name of a tribal chief at the time of the Exodus. To infer with Hommel (*AHS* 298-301) from such a name as Abidan that P's record is itself ancient, is critically unjustifiable. P also gives the names SHAPHAT and SHIPHTAN, which are scarcely archaic.

ABIEL (אֲבִיאֵל, §§ 4, 44, 'God is father' (of the clan?); αβ[ε]ιηλ [BAL]; *ABIEL*).

1. Father of Ner and Kish (1 S. 9 1, also 14 51†, -ηρ [B]); see ABNER.

2. One of David's thirty mighty men (1 Ch. 11 32); see ABIALBON.

ABIEZER, AV **Abi-ezer** (אֲבִיעֶזֶר, § 44, 'the (divine) father is help,' cp Ahiezer; αβιεζερ [BAL]: Judg. 6 34 etc.).

1. The clan from which Gideon sprang belonged to the Gileadite branch of the tribe of Manasseh. In Gideon's time its seat was at Ophrah (Judg. 6 24), an unidentified site, but apparently on the west side of Jordan. It is probable that the first settlements of the Manassites lay to the west of that river, but the date at which their conquests were extended to the eastward is not known (Josh. 17 2 ιεζει [B], αχιεζερ [A], αβιεζερ [L]; Judg. 6 11 24). In Nu. 26 30 the name Abiezer appears, not as in the parallel 1 Ch. 7 18, but in an abbreviated form as IEZER (אִיעֶזֶר, AV JEEZER, αχιεζερ [BAL]), and the gentilic as IEZERITE (אִיעֶזְרִי, AV JEEZERITE, ὁ αχιεζειρει [B], -ζερι [AL]). In 1 Ch. 7 18 Abiezer finds a place in the Manassite genealogy as son of Hammolecheth the sister of Machir b. Manasseh. The patronymic ABI-EZRITE AV, ABIEZRITE RV (אֲבִי הָעֶזְרִי), occurs in Judg. 6 11 24 (πατρὸς τοῦ εσδρει [B]; π. αβιεζρι, π. τ. ιεζρι [A]; π. (τ.) εζρει [L]) and (perhaps as a gloss, see Moore, *ad loc.*) 8 32 (αβιεσδρι [B], πρς αβιεζρει [A], πατρὸς α. [L]).

2. Of Anathoth, one of David's heroes (2 S. 23 27, αβιεζερ [B]; 1 Ch. 11 28 27 12†), see DAVID, § 11 (*a*) i.

ABIGAIL (usually אֲבִיגַיִל, but אבוגיל in 1 S. 25 18 Kt., and אֲבִיגַל in 1 S. 25 32, 2 S. 3 3 Kt., and [so RV ABIGAL] in 17 25; and, perhaps with י and ג transposed, אֲבִגַיִל in 1 S. 25 3 36; possibly we should point אֲבִיגַיִל, § 45; so oftenest ܐܒܝܓܝܠ, sometimes ܐܒܝܓܠ; cp BDB *Lex. s.v.*; αβ[ε]ιγαια [BAL], but in 1 S. 25 3 αβιραια [A]; meaning uncertain; 'Abi' is a divine title (see NAMES, § 44, and cp *HPN* 77, 85).

1. Wife of NABAL (*q.v.*), and, after his death, of David (1 S. 25). Her tactful speech against the causeless shedding of blood (1 S. 25 22-31) is noteworthy for the history of Israelitish morality. Like Ahinoam, she accompanied David to Gath and Ziklag, and was taken captive by the Amalekites, but was recovered by David (1 S. 27 3 30 5 18). While at Hebron she bore David a son (see DANIEL, 4).

2. A sister of David, who married Jether or Ithra, and became the mother of Amasa, 2 S. 17 25 (see above), 1 Ch. 2 16[1] 17. In MT of the former passage, her father

[1] B omits Abigail in *v.* 16, and BA read ἀδελφή for ἀδελφαί of L.

is called Nahash (an error also found in 𝔊[BA], and clearly produced by the proximity of that name in v. 27; 𝔊[L] gives the correct reading, 'Jesse,' ιεσσαι), and her husband is called 'the Israelite' (so MT; ισραηλειτης [B], ܐܝܣܪܝܠܝܐ), which, however, seems to he a corruption from 'the Jezreelite' (ιεζραηλιτης [L], *de iesraeli* [ed. Rom.], *de Hiesreli* [cod. Amiat.]), just as 'Ahinoam the Jezreelitess' (1 S. 27 3) becomes in B αχειναaμ ἡ ἰσραηλεῖτις. It is true, in 1 Ch. *l.c.* Jether is called 'the Ishmaelite' (ισμαηλ(ε)ιτης [BA], *ismahelites*), but this is plainly a conjectural emendation of 'the Israelite' (L indeed has ισρα.; Pesh. om.). In 2 S. 17 25 the same emendation appears in 𝔊[A] (ισμα.). David's sister was not likely to marry an Ishmaelite. Heyse wonders to what town Jerome's reading can refer. We can easily answer the question. It was the Jezreel situated in Judah (Josh. 15 56), from which not only David's brother-in-law but also his first wife Ahinoam probably came (so Marq. *Fund.* 24; see JEZREEL, i. 2). T. K. C.

ABIGAL (אֲבִיגַל), 2 S. 17 25 RV†. See ABIGAIL, 2.

ABIHAIL (אֲבִיחַיִל, § 45, 'the (divine) father is strength,' cp Sab. אבחיל and the S. Arabian woman's name, Ili-hail [Hommel, *ANT* 320]; written אביהיל [Gi. Bä.] in 2 and 4; Hommel [in the Ebers Festschrift, 29; cp *AHT* 320] compares the same name [with ה] in S. Arabian inscriptions from Ghazzat (Gaza); but אביחיל is supported by 𝔊; ΑΒ[Ε]ΙΧΑΙΛ [BAL], ܐܒܝܚܝܠ, *ABIHAIEL, ABIHAIL*).

1. Father of ZURIEL (Nu. 3 35†, αβιχαια[1] [F]).

2. Wife of Abishur the Jerahmeelite (1 Ch. 2 29† אביהיל [Gi. Bä.]; αβειχαια[1] [B], αβιγ. [A], αβιηλ [L]).

3. A Gadite (1 Ch. 5 14†, αβ[ε]ιχαια [BA], αβιηλ [L]).

4. Daughter of Eliab, David's brother, and wife of Rehoboam (2 Ch. 11 18†, אביהיל [Gi. Bä.], βαιαν [B], αβ. [B[ab. vid.]], αβιαιαλ [A], τοῦ πατρὸς αὐτοῦ [L, who reads אביהו לבת אליאב]).

5. Father of Esther, whose name however is given as Aminadab by 𝔊 (Esth. 2 15 9 29†, αμ[ε]ιναδαβ [BℵAL*β*], and -δαν [ℵ]).

ABIHU (אֲבִיהוּא, § 44, 'my father is he'; ΑΒΙΟΥΔ [BAL], *i.e. ABIHUD*,[2] ΑΒΙΟΥΡ [A in Ex. 6 23], *ABIU*). See NADAB AND ABIHU.

ABIHUD (אֲבִיהוּד, § 45, 'the (divine) father is glory,' a name probably appearing in contracted form in EHUD [*q.v.* i. and ii.], cp Ammihud. Ishhod, as also אבי הוד [*ăbī hūd*], an almost certain correction of אבי עד [EV 'everlasting father'] in Is. 9 5, which, however; is to be treated as an Arabic *kunya*, 'father of glory' [Che. 'Isaiah,' in *SBOT*]; ΑΒΙΟΥΔ[3] [BAL]; ܐܒܝܗܘܕ; *ABIUD*), a Benjamite (1 Ch. 8 3†).

ABIJAH (אֲבִיָּה, אֲבִיָּהוּ, § 44, 'Yahwè is father'; on names ending in יָה, יָהוּ, see NAMES, § 24; ΑΒ[Ε]ΙΑ [BAL]).

1. Son of Rehoboam by a 'daughter of Absalom' (see MAACAH, 3), and for three years king of Judah (somewhere about 900 B.C.; see CHRONOLOGY, § 32). The writer of the 'epitome' in Kings (see Dr. *Introd.* 178) only tells us (1 K. 15 1-5 7)[4] that he continued his father's war against Israel, and that he 'walked in all the sins of his father;' and, since the first of these notices is very possibly due to an interpolator, we may confine our attention to the second. Why then does the epitomist take this unfavourable view of Abijah? As Stade points out, he must have read in the Annals of the kings of Judah statements respecting this king which, if judged by the standard of his later day, involved impiety, such as that Abijah, unlike his son Asa, tolerated foreign worships. It is surprising to find that the Chronicler (2 Ch. 13) draws a highly edifying portrait of Abijah, whom he represents as delivering an earnest address to Jeroboam's army (for 'there was war between Abijah and Jeroboam') on the sin of rebellion and schism, and as gaining a great victory over the Israelites, because he and his people 'relied on Yahwè the God of their fathers.' This, however, is a late Midrash, and has no historical value. The Chronicler (or his authority) wished to emphasize the value of the true ritual, and did this by introducing an artificial episode into an empty reign. Cp Bennett, *Chron.* 326 *ff.* (Pesh. always ܐܒܝܐ; Jos. αβιας: in 1 K. 14 31 15 1 *ff.*, MT has five times the corrupt reading אֲבִיָּם ABIJAM,[1] αβιου[2] [BA], -ια [L].)

2. A son of Jeroboam I., king of Israel, who died in his father's lifetime.[3] The account of his illness is given in 1 K. 14 1-18 (MT 𝔊[A]), and in another recension in 𝔊[BL] immediately after the narrative of Jeroboam's return from Egypt on the death of Solomon (3 K. 12 24 g *ff.* [Swete], 13 1-13 [L]). If we accept the former version as original, we are bound to bring it down to the age which was under the influence of Dt., for the prophecy in 1 K. 14 7-16 is in tone and phraseology closely akin to similar predictions in 16 1-4, 21 20-24, 2 K. 9 7-10, the Deuteronomistic affinities of which are unmistakable. Nor is it possible to simplify the narrative without violence. The 𝔊[BL] version, on the other hand, can, without arbitrariness, be brought into a simple and very natural form. Jeroboam is not yet king. His wife, not being queen, has no occasion to disguise herself, and Ahijah simply predicts the death of the sick child, without any reference to sins of Jeroboam which required this punishment. The writers who supplemented and expanded the older narrative were men of Judah; the original story, however, is presumably Israelitish. (See Kue. *Einl.* 25; St. *GVI* i. 350 n.; Wi. *ATUnters.* 12 *ff.*) Cp JEROBOAM, I.

3. A Benjamite, 1 Ch. 7 8† (AV ABIAH; αβιουδ [B], -ου [Al).

4. Wife of Hezron, 1 Ch. 2 24† (EV ABIAH).

5. Son of the prophet Samuel, 1 S. 8 2 (AV ABIAH; αβηρα [L]), 1 Ch. 6 28 [13]† (EV ABIAH).

6. The eighth of the twenty-four courses of PRIESTS (*q.v.*)—that to which Zechariah, father of John the Baptist, belonged, 1 Ch. 24 10 (AV ABIJAH); Lk. 1 5† (AV ABIA).

7. Mother of King Hezekiah, 2 Ch 29 1. See ABI.

8. Priest in Zerubbabel's band (see EZRA, ii. § 6*b*), Neh. 12 4 (αβιας [L], 17 [B om. *vv.*]); perhaps = No. 6.

9. Priestly signatory to the covenant (see EZRA, i. § 7), Neh. 10 7 [8]. T. K. C.—W. E. A.

ABIJAM (אֲבִיָּם), 1 K. 14 *f.*† See ABIJAH, 1.

ABILENE (ΑΒΕΙΛΗΝΗ [BA; W. and H.], ΑΒΙΛ, [ℵ[a]; Ti.]), given in Lk. 3 1 as the tetrarchy of Lysanias, at the time when Christ's ministry began, was a territory round Abila (ΑΒΙΛΑ), a town of some importance in Antilibanus, and known to both Josephus and Ptolemy as Abila of Lysanias ("A. ἡ Λυσανίου), to distinguish it from others of the same name, especially Abila of the DECAPOLIS (*q.v.*). The Antonine and Peutinger Itineraries place it 18 R. m. from Damascus on the way to Heliopolis or Baalbek, which agrees with that portion of the gorge of the Abana in which the present village, Sūḳ Wādy Baradā, lies. Not only are there remains of a large temple on the precipitous heights to the E. of this village, with ancient aqueducts and a Roman road,

[1] A mere scribal error, A for Λ; so invariably in the case of Abigail.

[2] Yet BA have αβιου (*i.e.* אביהו) 5 times for Abijam. See ABIJAH, 1 end.

[3] In 𝔊[BAL] this name is regularly substituted for Abihu of MT exc. Ex. 6 23 [A]. See ABIHU.

[4] According to Klo. 1 K. 15 5 *f.* should run thus, 'Because David had done that which was right . . . all the days of his life.' From 'all the days of his life' to 'Abijam (so read in accordance with the correction in *v.* 7) and Jeroboam' is probably a late gloss from the margin. The notice respecting the war between Abijah and Rehoboam seems to he derived from 2 Ch. 13 2, where alone it is in point.

[1] It is defended, however, by Jastrow, *JBL* xiii. 114 ('94).

[2] *i.e.* אֲבִיהוּ, see ABIHU.

[3] Josephus calls this son 'Οβίμης (*Art.* viii. 11).

tombs and other ruins on both sides of the river, but inscriptions have been discovered, one of which records the making of the road by 'a freedman of Lysanias the tetrarch,' and another its repair 'at the expense of the Abilenians.' Moreover, a Moslem legend places on the temple height the tomb of Abel or Nebī Hābīl, doubtless a confused memory of the ancient name of Abila, which probably meant 'meadow' (cp ABEL, ABEL-BETH-MAACHAH). The place was in fact, still called *Ābil es-Sūk* by Arabic geographers (Yākūt, 157; *Marāṣi'*, 1 4). The site is, therefore, certain (cp. Rob. *LBR* 478 *ff.* and Porter, Five *Years in Damascus*, i. 261 *ff.*, where there is a plan of the gorge). On the political relations of Abilene, see LYSANIAS. *G.* A. S.

ABIMAEL (אֲבִימָאֵל, 'God is a father,' cp Sab. name אבמעתתר, 'a father is 'Attar' [עשתר], Hal. *Mél.*; *ZDMG*, xxxvii. 18 ['83], and see JERAHMEEL, 1 n. 1; ΑΒΙΜΕΗΛ [AL]; B om. or wanting), a descendant of JOKTAN (Gen. 10 28; ΑΒΙΜΕΛΕΗΛ [E]; 1 Ch. 1 22†, -ΜΕΕΙΛ [L]). Tribal connection uncertain, but see Glaser, *Skizze*, ii. 426.

ABIMELECH (אֲבִימֶלֶךְ; ΑΒ[Ε]ΙΜΕΛΕΧ [BAL], -ΛΕΚ [B" Judg. 9 28], *i.e.*, most probably, 'Melech (Milk), the divine king, is father.' Abimilki and Aḫimilki occur as names of princes of Arvad in the Annals of Ašurbānipal (*KB* ii. 172 *f.*); the former name, which is evidently Canaanitish, also belongs to the Egyptian governor of Tyre in the Amarna tablets.

1. A Philistine, king of GERAR (see below), Gen. 26 1 7-11 16, who, according to a folk-story in J, took Rebekah to be Isaac's sister, and reproved Isaac for having caused this mistake, and so very nearly brought guilt upon the Philistines. The same tradition is preserved in E (Gen. 20), but without the anachronistic reference to the Philistines. The persons concerned are Ahimelech, king of Gerar, Abraham, and Sarah. The details are here much fuller, and the differences from J's narrative are striking. There is reason, however, to think that the narrative of E in its original form made no mention of Gerar. In this case the principality of Abimelech was described by E simply as being 'between Kadesh and Shur' (omitting the following words). In J's account (Gen. 26) there are traces of a confusion between two Gerars, the more southerly of which (the trne seat of Abimelech's principality) wa3 probably in the N. Arabian land of Muṣri (for particulars on this region see MIZRAIM, § 2 [*b*]). J's account also refers to disputes between the herdsmen of Abimelech and those of Isaac about wells, which were terminated by a covenant between Isaac and Abimelech at Beersheba (Gen. 26 17 19-33). The Elohistic form of this tradition passes lightly over the disputes, and lays the chief stress on the deference shown to Abraham by Abimelech when the oaths of friendship were exchanged. The scene of the treaty is, as in J, Beersheba (Gen. 21 22-32 *a*). On Ps. 34, title, see ACHISH. T. K. C.

2. Son of Jerubbaal (Gideon). His history, as related in Judg. 9, is of very great value for the light which it throws on the relations between the Israelites and the older population of the land in this early period. His mother was a Shechemite, and after his father's death he succeeded, through his mother's kinsmen, in persuading the Canaanite inhabitants of Shechem to submit to his rule rather than to that bf the seventy sons of Jerubbaal. With silver from the temple-treasure of BAAL-BERITH (*q.v.*) he hired a band of bravos and slaughtered his brothers,—Jotham, the youngest, alone escaping,—and was acclaimed king by the people of Shechem and Beth-millo, at the sacred tree near Shechem. From a safe height on Mt. Gerizim, Jotham cried in the ears of the assembly his fable of the trees who went about to make them a king (see JOTHAM, 1), and predicted that the partners in the crime against Jerubbaal's house would destroy each other, a prophecy which was signally fulfilled. After a short time (three years, *v.* 22), the Shechemites rose against Abimelech. Of the way in which this came about, and of Abimelechs vengeance, the chapter contains two accounts. According to the first of these (*vv.* 23-25, 42-45), an evil spirit from Yahwè sows discord between the Shechemites and Abimelech, who takes the city by a stratagem and totally destroys it. According to the other account (*vv.* 26-41), the insurrection is fomented by a certain Gaal b. Obed (see GAAL, § 1), who shrewdly appeals to the pride of the old Shechemite aristocracy against the Israelite half-breed, Abimelech.[1] Abimelech, apprised of the situation by Zebul, his Lieutenant in the city, marches against it; Gaal, at the head of the Shechemites, goes out to meet him, but is beaten and driven back into the city, from which he, with his partizans, is expelled by Zebul (on this episode, cp GAAL). Abimelech, carrying the war against other places[2] which had taken part in the revolt, destroys Migdal-Shechem (*vv.* 46-49, sequel of *vv.* 42-45). While leading the assault upon Thebez he is mortally hurt by a mill-stone which a woman throws from the wall. To save himself from the disgrace of dying by a woman's hand, he calls on his armour-bearer to despatch him (*vv.* 50-55; cp 1 S. 31 4).

Many recent scholars gather from the story of Abimelech that Israel was already feeling its way towards a stronger and more stable form of government. Jerubbaal, it is said, was really king at Ophrah, as appears from Judg. 9 2;[3] his son Abimelech reigned not only over the Canaanites of Shechem, but over Israelites also (*v.* 55). A short-lived Manassite kingdom thus preceded the Benjamite kingdom of Saul (We., St., Ki.). This theory rests, however, on very insecure foundations. That Jerubhaal's power descended, if Abinielechs representation is true, to his seventy sons (9 2), not to one chosen successor among them, does not prove that he was king, but rather the opposite. Abimelech was king of Shechem, to whose Canaanite people the city-kingdom was a familiar form of government; that he ruled in that name over Israelite towns or clans is not intimated in the narrative, and is by no means a necessary inference from the fact that he had Israelites at his back in his effort to suppress the revolt of the Canaanite cities (9 55). Cp GIDEON. *G.* F. M.

3. 1 Ch. 18 16. A scribe's error for AHIMELECH. See ARIATHAR (end).

ABINADAB (אֲבִינָדָב, 'my father apportions,' see NAMES, §§ 44, 46, or 'the father (*i.e.*, god of the clan) is munificent,' cp Jehonadab; ΑΜ[Ε]ΙΝΑΔΑΒ [BℵA], ΑΒΙΝ. [L]).

1. David's second brother, son of Jesse; 1 S. 16 8 17 13, also 1 Ch. 2 13 (αμιν. [L]). See DAVID, § 1 (*a*).

2. Son of Saul, slain upon Mt. Gilboa, according to 1 S. 31 2. The name Abinadab, however, is not given in the list in 1 S. 14 49. There may have been a mistake; Jesse's second son was named Abinadab. So Marq. *Fund.* 25 (ιωναδαβ [B]—*i.e.*, JONADAB [*q.v.* 3]), 1 Ch. 8 33 9 39; also 1 Ch. 10 2 (αμερναδαβ [B b. vid.], αμιν. [L]).

3. Of Kirjath-jearim, in whose house the ark is said to have been kept for twenty years (1 S. 7 1 *f.* 2 S. 6 3 *f.* 1 Ch. 13 7). See ARK, § 5.

4. 1 K. 4 11, see BEN-ABINADAB.

ABINER (אֲבִינֵר), 1 S. 14 50†, AV mg. See ABNER.

[1] Judg. 9 28: 'Who is Abimelech, and who is Shechem, that we should be subject to him? Were not the son of Jerubbaal, and Zebul his lieutenant, subjects of Hamor (the blue blood of Shechem)? Why should *we* be subject to him?' For other interpretations and emendations of this much-vexed verse, see Moore, *Judges*, 257.

[2] On the statement (Judg. 9 22) that 'Abimelech ruled over Israel three years,' see Moore *Judges*, 253.

[3] Judg. 8 22 *f.* is considered under GIDEON. Cp also Moore, *Judges*, 229 *f.*

ABINOAM (אֲבִינֹעַם, § 45, 'the (divine) father is pleasantness,' cp Ahinoam. Elnaam; αβ[ε]ινεεμ [BAL], ιαβιν. [A in Judg. 4 12]; *ABINOEM*), father of Barak (Judg. 4 6 12 5 1 12†).

ABIRAM (אֲבִירָם, § 44—*i.e.*, 'the Father is the High One,' cp ABI, NAMES WITH, § 2; αβειρων [BA], αβηρ. [L]; ܐܒܙܪܘܢ; *ABZRON*). another form of Abu-ram, which (Abu-rāmu) is a well-attested Babylonian and Assyrian name (it occurs, *e.g.*, in a contract-tablet of the time of Abil-sin, 2324-2300 B.C., and in the Assyrian eponym-canon under B.C. 677).[1] The second element in the name (-ram) is a divine title (cp 'Ρυρας ὁ ὕψιστος θεός, Hesych.), but is also used, in the plur., of all heavenly beings (Job 21 22). Parallel Hebrew names are Ahi-ram, Adoni-ram, Jeho-ram, Malchi-ram (see also ABRAM). Aḥiramu is the name of a petty Babylonian king under Ašur-nāṣir-pal, and Malik-ram-mu that of a king of Edom in the time of Sennacherib (*COT* i. 95, 281).

1. A fellow conspirator of DATHAN (*q.v.*), Nu. 16 (αβαρων [A once], αβιρ. [F twice]); Dt. 11 6 Ps. 106 17 and (AV ARIRON) Ecclus. 45 18, 4 Macc. 2 17† (αβηρων [V^d]).

2. Eldest son of Hiel the Bethelite, who died when his father laid the foundation of Jericho anew; 1 K. 16 34† (*ABIRAM*; L om. verse), cp Josh. 6 26 𝔊^BAL. See HIEL. T. K. C.

ABIRON (אבירם), Ecclus. 45 18† AV. See ABIRAM, 1.

ABISEI (*ABISSEI* etc.), 4 Esd. 1 2†. See ABISHUA, 2.

ABISHAG (אֲבִישַׁג, § 45, meaning obscure; αβεισα [B], αβισακ [A], -σακ [L]; ܐܒܝܫܓ; *ABISAG*) the Shunammite, David's concubine (1 K. 1 1-4), afterwards sought in marriage (2 13 *ff.*) by ADONIJAH, 1.

ABISHAI (אֲבִישַׁי, § 45, written אַבְשַׁי[2] in 2 S. 10 10 and always [five times] in Ch., where moreover A omits final ı; meaning doubtful, cp JESSE, AMASA, and for Lag.'s view see ABNER; αβεισα [Bא; A once], αβισαι [A], -αει [A three times], αβεσσα [L, also seven times B, and three times A], -βισς. [A, 1 Ch. 2 16], ασαι [A, 2 S. 3 30], αμεσσα [L, 2 S. 20 6]), the brother of Joab, is mentioned immediately after the 'first three' and at the head of 'the thirty' in the list of David's worthies (2 S. 23 18 *f.*; 1 Ch. 11 20 *f.*; reading 'thirty' for 'three' with *SBOT* etc., after Pesh.). He was one of David's close associates during his outlawry, and was his companion in the visit to Saul's camp on the hill of Hachilah (1 S. 26 6). He was faithful to him in Absalom's rebellion (2 S. 16 9), commanded a third part of the army (2 S. 18 2), saved David's life when it was threatened by a Philistine (2 S. 21 16 17), and, according to the Chronicler (1 Ch. 18 12), slew 18,000 Edomites in the Valley of Salt (but see JOAB, 1).

ABISHALOM (אֲבִישָׁלוֹם), 1 K. 15 2 10†. See ABSALOM, 1.

ABISHUA (אֲבִישׁוּעַ, § 44, for view of Lag. see ABNER; 'the (divine) father is opulence'? cp MALCHISHUA, and *Abi-išu'a*, Wi. *GI* 130 n. 3. See also Hom. *AHT* liii. 108 n. zog n. 1, *ZDMG* xlix. 525 ['95]).

1. A son of BELA (*q.v.* ii. 2), 1 Ch. 8 4 (αβεισαμας[3] [B], αβισουε [AL]; ܐܒܝܫܘܥ; *ABISUE*).

2. b. Phinehas, b. Eleazar, b. Aaron (1 Ch. 6 4 *f.* [5 30 *f.*], 50 [35], αβ[ε]ισου [BA], αβιουδ, -ισουα [L]; Ezra 7 5, αβ[ε]ισουε [BAL] = 1 Esd. 8 2, ABISUM [AV], *i.e.*, αβισουμ [243, 248], RV ABISUE (αβεισαι [B], αβισουαι A], αβισουε [L]). Called ABISEI in 4 Esd. 1 2† (*Abissei* ed. Bensly], *Abisaei* [cod. Amb.]).

ABISRUR (אֲבִישׁוּר, § 44. 'the (divine) father is as) a wall'? cp Sab. אבשור, Assyr. *Abudūrū*; αβ[ε]ισουρ [BA], αβιας. [L]; *ABISUR*), b. Shammai the' Jerahmeelite (1 Ch. 2 28 *f.*†). Derenbourg (*REJ*, 1880, p. 58) gives אבשור as a Himyaritic divine title (Hal. 148, 5). But the second part of Abi-shur may be a corruption of שחר; cp AHISHAHAR.

ABISUM, RV **Abisue** (αβισουμ [243 etc.]), 1 Esd. 3 2† = Ezr. 7 5, ABISHUA, 2.

ABITAL (אֲבִיטַל, § 45, 'my father is dew'? cp HAMUTAL; but should not these names be Abiṭub [אֲבִיטֻב], Hamuṭub [cp AHITUB]? A name compounded with טל seems very improbable. ל and ב might be confounded in Palmyrene characters; *ABITAL*); wife of David, mother of Shephatiah; 2 S. 3 4, 1 Ch. 3 3† (αβειταλ, της σαβ. [B]; αβιτ. [A]; -ταλ, -ταμ [L]). In 2 Ch. 3 6 2, 𝔊^B reads Αβειταλ for HAMUTAL, the name of Jehoahaz's mother. T. K. C.

ABITUB (אֲבִיטוּב: perhaps properly, as in versions, ABITOB, 'the (divine) father is good,' see NAMES, § 45; cp Aram. אביטב; αβιτωβ [BAL]; *ABITOB*), b. Shaharaim (1 Ch. 8 11†).

ABIUD (αβιουδ [BA], -ουτ [א*], *i.e.*, Abihud, or Abihu), son of Zerubbabel, and ancestor of Joseph, husband of Mary (Mt. 1 13), see GENEALOGIES OF JESUS, § 2 *c*.

ABNER (אַבְנֵר, § 44, but in 1 S. 14 50 אֲבִינֵר; αβεννηρ [BAL], -ενη. [A five times], αβαινηρ [A twice]; *ABNER*. Lag. *Uebers.* 75, holds that Abner = נֵר [אֲ]בֶן = 'son of Ner.' This is suggested by the 𝔊 form 'Abenner'; but cp רִבְקָה = 'Ρεβεκκα, בָּצְרָה = Βοσορρα. 'Abner' or 'Abiner' might mean 'my (divine) father is (as) a lamp'). Captain of the host under Saul and under Ishbaal. As a late but well-informed writer states, he was Saul's first cousin (1 S. 14 50, cp 9 1), Ner the father of Abner and Kish the father of Saul being both sons[1] of Abiel. The fortunes of Saul and Abner were as necessarily linked together as those of David and Joab. but tradition has been even less kind to Abner than to his master. Of his warlike exploits we hear nothing, though there was 'sore war against the Philistines all the days of Saul' (1 S. 14 52), and tradition loved to extol the prowess of individual heroes. Even at the battle of Gilboa there is no mention of Abner, though it was a part of his duty, according to David, or at least an early narrator, to guard the sacred person of the king (1 S. 26 15). All that we hear of him in Saul's reign is that he sat next to the king at table (1 S. 20 25), that, according to one tradition, he introduced David to the presence of Saul (1 S. 17 57), and that he accompanied the king in his pursuit of David (1 S. 26 5 *ff.*). It was natural that upon Saul's death he should take up the cause of Ishbaal (DAVID, § 6). It suffices to mention here some personal incidents of that unhappy time. That Abner slew his pursuer Asahel (one of Joab's brothers) was, doubtless, not his fault but his misfortune. But his motive in passing over from Ishbaal to David was a shameful one. Ishbaal may indeed have been wrong in interpreting Abner's conduct to Rizpah, Saul's concubine, as an act of treason (cp 2 S. 16 21 1 K. 2 22); but to give up the cause of the Benjamite kingdom on this account, and transfer his allegiance to David, was

[1] See Hommel, *PSBA* xvi. 212 ['94]; Schr. *COT* ii. 187.

[2] Erman and Maspero connect this name with Ab-sha, the Egyptian form of the name of the Asiatic chief represented on a famous wall-painting at Beni-Ḥasan. But subsidiary evidence is wanting. See JOSEPH, 1, § 10, and cp WMM, *As. u. Eur.* 36 n. 2. Hommel (*AHT* 53) connects Ab-sha or Ebshu'a with Abishua.

[3] This presupposes אֲבִישָׁמֵשׁ, a name for which there is no parallel in the OT, cp SAMSON, SHIMSHAI.

[1] In 1 S. 14 51 read בְּנֵי for בֶּן with Jos. *Ant.* vi. 6 6, followed by Dr., Bu., Klo. The text of 1 Ch. 8 33 = 9 39 should doubtless run, 'And Ner begat Abner, and Kish begat Saul (see Kau. note in *HS*).

ignoble. The result was not what he had expected—the highest place under a grateful king. He had just left David with the view of procuring a popular assembly for the recognition of David as king of all Israel, when Joab enticed him back, and treacherously assassinated him beside the gate of Hebron (see SIRAH, WELL OF), partly perhaps from jealousy, partly in revenge for the death of Asahel (2 S. 3 30).

Abuer's death was regarded by David as a national calamity. 'Know ye not,' he said, 'that a prince and a great man is fallen this day in Israel?' He ordered a public mourning for Abner, and himself sang an elegy over his grave, a fragment of which is preserved (2 S. 3 31-39); see POETICAL LITERATURE, § 4, iii. (h). The Chronicler gives Abuer a son named JAASIEL (4.71 2).

T. K. C.

ABOMINATION, a word occurring over a hundred times in the OT as a rendering of four[1] somewhat technical expressions (sometimes paraphrased 'abominable thing,' etc.).

1. פִּגּוּל (*piggūl*) occurs four times in exilic and post-exilic writings ,(&. 4 14 [בְּשַׂר פ׳], Lev. 7 18 *μίασμα*; 19 7 *ἄθυτον*; Is. 65 4† [מְרַק פִּגֻּלִים, 'broth,' *λωμὸν . . . μεμολυμμένα*; Kt. פרק פ׳, 'scraps']) as a technical term for sacrificial flesh become stale (*κρέας ἕωλον* or *βέβηλον* in Ez. [BAQ]), which it was unlawful to eat. See SACRIFICE. In the last passage WRS regarded *piggūl* as carrion, or flesh so killed as to retain the blood in it (*RS*(2) 343 n. 3).

2. שֶׁקֶץ (*šeḳeṣ*), also confined to exilic and post-exilic writings[2] (Ez. 8 10 Lev. 7 21 11 10-42 Isa. 66 17†; *βδέλυγμα* [BA]), is a term for what is taboo. See CLEAN AND UNCLEAN.

3. שִׁקּוּץ (*šiḳḳūṣ*, variously rendered *βδέλυγμα*, *εἴδωλον*, etc.), a much commoner word, of the same form as (1), and from the same root as (2), occurring once in the present text of Hos. 9 10, is freely used (over twenty times), chiefly from the Exile onwards, as a contemptuous designation oftenest of images of deities or of foreign deities themselves. See below, ABOMINATION OF DESOLATION and IDOL, § 2 *f*.

4. תּוֹעֵבָה (*tō'ēbāh*; *βδέλυγμα*), a word of uncertain etymology frequently occurring from Dt. onwards (esp. in Ezek.), is by far the commonest of these terms. It designates what gives offence to God (Dt. 12 31) or man (Pr. 29 27), especially the violation of established custom. The former usage is the more common; it applies to such things as rejected cults in general, Dt. 12 31 (see IDOL, § 2 *f*.), child-sacrifice (Jer. 32 35), ancestral worship (Ez. 43 8), images (Dt. 27 15), imperfect sacrificial victims (Dt. 17 1), sexual irregularities (Ezek. 22 11), false weights and measures (Dt. 25 16), etc. The latter usage, however, is not rare (esp. in Prov.). Thus J tells us eating with foreigners (Gen. 43 32), shepherds (46 34), Hebrew sacrifices (Ex. 8 26 [22]), were an abomination to the Egyptians (see EGYPT, §§ 19, 31).

ABOMINATION OF DESOLATION, THE (ΤΟ ΒΔΕΛΥΓΜΑ ΤΗΣ ΕΡΗΜΩΣΕΩΣ), an enigmatical expression in the apocalyptic section (Mt. 24 15-28) of the discourse of Christ respecting His ΠΑΡΟΥΣΙΑ (Mt. 24 15 = Mk. 13 14). The passage containing the phrase runs thus in Mt.—'When therefore ye see the abomination of desolation, which was spoken of by Daniel the prophet, standing (*ἑστός*) in the holy place (let him that readeth understand), then let them that are in Judæa flee unto the mountains.' The reference to 'Daniel, however, which is wanting in Mk., is clearly an addition of Mt. (cp Mt. 2 23 4 14, etc.), and Mark's *ἑστηκότα* (masc.), being more peculiar than Matthew's *ἑστός* (neut.), is to be preferred. Both reports agree in inserting the parenthetic appeal to the trained intelligence of the reader, which, being both natural and in accordance with usage in an apocalyptic context, it would be unreasonable to set aside as an 'ecclesiastical note' (Alford). There is an exact parallel to the clause in Rev. 13 18 (cp 17 9), 'Here is wisdom: let him that hath understanding count the number of the beast,' and a parallel of sense in Rev. 2 7 13 9: 'He that hath an ear (or, if any man have an ear), let him hear,' *i.e.*, let him understand (as Is. 33 19); the best commentary on which is a *terzina* in Dante (*Inf.* 9 61-63), 'O voi, che avete gl' intelletti sani,' etc. In fact, the whole section is a *μυστήριον*, not of the class in which Jesus delighted (Mt. 13 11), nor expressed in his highly original style, and is easily separable from its context. It is probably (apart from some editorial changes) the work of a Jewish writer, and was inserted to adapt the discourse, which had been handed down (itself not unaltered) by tradition, to the wants of the next generation.

Some light is thrown upon it by the 'little apocalypse' in 2 Thess. 2 1-12, which evidently presupposes an eschatological tradition (see ANTICHRIST). It is there explained how the *παρουσία* of Christ must be preceded by a great apostasy and by the manifestation of the 'man of sin,' whose *παρουσία* is 'with lying signs and wonders,' and who 'opposeth and exalteth himself against all that is called God or that is worshipped, so that he sitteth in the sanctuary (*ναός*) of God, setting himself forth as God,' but whom 'the Lord Jesus will slay with the breath of his mouth.' The resemblance between the two Apocalypses is strong, and we can hardly avoid identifying the 'abomination of desolation' in Mt. and Mk. with the 'man of sin' in 2 Thess. That the one stands and the other sits in the sanctuary constitutes but a slight difference. In both cases a statue is obviously meant. The claimant of divinity would not, of course, be tied to one place, and it was believed that by spells a portion of the divine life could be communicated to idols, so that the idol of the false god was the false god himself. In both cases, too, there is a striking resemblance to the *θηρία* of Rev. 13, the second of whom, indeed, is said to be represented by an image which can speak, trickery coming to the help of superstition (Rev. 13 15). In fact, the 'abomination' or 'the man of sin' is but a humanised form of the original of these *θηρία*—viz., the apocalyptic dragon, who in his turn is but the Hebraised version of the mythical dragon Tiämat, which was destroyed by the Babylonian light god (see CREATION, § 2). We can now recover the meaning of *τῆς ἐρημώσεως*. The 'abomination' which thrusts itself into the 'holy place' has for its nature 'desolation'—*i.e.*, finds its pleasure in undoing the divine work of a holy Creator.[1]

But why this particular title for the expected opponent of God? It was derived from the first of the great apocalypses. In Dan. 9 27 11 31 12 11, according to the exegetical tradition in 𝔊, mention is made (combining the details of the several passages) of an apostasy, of an 'abomination of desolation' (or 'of desolations') in the sanctuary, of a time of unparalleled tribulation, of resurrection, and of glory. That the original writer meant 'abomination' to be taken in the sense described above, and the appended qualification to be rendered 'desolating' or 'of desolation,' cannot indeed be said. שִׁקּוּץ as used in Daniel means 'image of a false god' (cp 1 K. 11 5; 2 K. 23 13), and the most natural rendering of שֹׁמֵם and (if the text be correct) מְשׁוֹמֵם or מְשֹׁמֵם is 'appal-

[1] It is also used in 1 S. 13 4 for נִבְאַשׁ, the word rendered 'stank' in 2 S. 10 6 (AV).

[2] But in Is. *l.c.* Duhm and Cheyne read שֶׁרֶץ; so also Sam. and some MSS. at Lev. 7 21. In Lev. 11 10 *ff.* we may point שֶׁקֶץ, and in Ez. 8 10 read שִׁקֻּצִים (with 𝔊, *Co.*).

[1] It is no objection that in Lk. 21 20 the *ἐρήμωσις* is referred to the hemming in of Jerusalem by Roman armies; cp Jos. *Ant.* x. 11 7, where the passages in Dan. are explained of the desolation by the Romans. The true meaning must he decided hy Matthew and Mark, where nothing is said of injuries from invaders. The memory of the experiences of 70 A.D. suggested to Luke a new interpretation of the traditional phrase.

ling.' The phrase appears to be an intentional alteration of בַּעַל שָׁמֵם *(Baal shāmēm)*, 'heaven's lord.' That this was a current title of Zeus may be inferred from the Syriac of 2 Macc. 6 2, where the temple at Jerusalem is called by the emissary of Antiochus 'the temple of *be'el shemīn*' (see Nestle, *ZATW* iv. 248 ['84]; cp his *Marginalien u. Materialien*, 35 *f.*; G. Hoffmann, *Ueb. ein. phön. Inschr.* 1889, p. 29; Bevan, *Daniel*, 193). The author of Daniel (whose meaning is correctly given by *MT*) contemptuously says, 'Call it not "heaven's lord," but "an appalling abomination"'; and the object to which he refers is an image of Olympian Zeus, which, together with a small βωμός, the agents of Antiochus set up on the great altar (θυσιαστήριον) of burnt offerings. The statement in 1 Macc. 1 59 is not destructive of this theory, for altars and idols necessarily went together, and the phrase of the Greek translator of the Hebrew original in *v.* 54[1] (βδέλυγμα ἐρημώσεως; cp τὸ βδέλυγμα, 6 7) might be used equally well of both or of either.[2] All this, however, had been forgotten when the apocalyptic section in Mt. 24 and Mk. 13 was written.

Another (a highly plausible) interpretation of the little evangelical apocalypse is given by Spitta *(Die Offenbarung Johannis*, 493-497), who thinks that it was written in apprehension of the erection of a statue of Caligula in the temple (see Schür. *Hist.* ii.). This implies that τὸ βδέλ. τῆς ἐρημ. means the statue of a historical king who claimed to be the supreme God, which, considering the nature of the context, is improbable, and is not supported by the use of the Hebrew phrase in Daniel. It is, no doubt, highly probable that apocalyptic writers regarded the mad Caligula as a precursor of the expected embodiment of the principle of 'lawlessness' (ἀνομία, 2 Thess. 2 7); but, without putting some violence on their inherited eschatological phrases, they could not have said that he was ἐρήμωσις or ἀνομία in person. For, after all, a Roman emperor could not be a purely destructive or lawless agent. Spitta's view, however, is preferable to that of Weiss, who, appealing to Lk. 21 20, understands the 'abomination' to be the Roman armies; and to that of Bleek and Alford, who explain it of the desecration of the holy place by the Zelots (Jos. *BJ* iv. 3 6-8). For the criticism and exegesis of the difficult passages, Dan. 9 27 11 31, see the commentary of Bevan and the translation and critical notes in Kau. *HS*; cp also Van Lennep's treatise on the seventy year-weeks of Daniel (Utrecht, 1888), where it is proposed, on amply sufficient grounds, to change the impossible וְעַל כְּנַף (9 27) into וְעַל־כַּנּוֹ, 'and instead thereof.' The greatest problem is how to explain or rather correct שִׁקּוּצִים מְשֹׁמֵם; in הַשִּׁקּוּץ מְשֹׁמֵם (11 31), for מְשֹׁמֵם we should perhaps read הַשֹּׁמֵם, or delete מ as a gloss from 9 27. There is a similar problem in 8 13. T. K. C.

ABRAHAM (אַבְרָהָם, § 44; ΑΒΡΑΑΜ [BAL]; once ΑΒΡΑΜ [A]).

1. Name, etc. The name has no meaning in Hebrew, and seems to be another form of ABRAM (*q.v.*), due probably to a misunderstanding of an early orthography.[3] In J and P, however, the latter is represented as the original name, which was changed at a critical point in the patriarch's life into Abraham (Gen. 17 5, P, where the etymology is a mere word-play; on J's narrative, see Fripp, *Gen.* 53). It is only from the time of Ezekiel

1 See Kö. *Einl.* 482.

2 Ges., Bertholdt, Grätz, and others explain the 'abomination' of a statue of Zeus: Hitz., Hilgenfeld, Bleek, Kue., of an altar. The insertion of the didactic story of Nebuchadrezzar's golden image slightly confirms the former view.

3 Hommel maintains that ה in the Minæan (S. Arabian) alphabet represents *a* (ā) or, in some cases, *ī*. The same peculiarity (ה for *ā*) characterises the Moabite, the Hebrew, and the Samaritan script. אברהם, therefore, was originally pronounced Abrām (Hommel, *Das graphische* ה *im Minäischen* 22-24). WMM (*As. u. Eur.* 309 n. 3) finds an Egyptian proper name B-'-rā-ru-ma-u = Baal-ram.

(see Ez. 33 24)[1] that Abraham was reverenced by the Jews as their greatest ancestor; cp Is. 41 8 *f.* 51 12 63 16 Neh. 9 7 *f.* 2 Ch. 20 7 30 6 Ps. 47 9 [10] 105 6 9 42 Ecclus. 44 19 1 Macc. 2 52 12 21 Mt. 1 1 3 9 Lk. 16 24 30 19 9 Jn. 8 39 53 56 Acts 7 2 13 26 Rom. 4 1 12 16 Heb. 6 13 11 17 Jas. 2 21, cp Gal. 3 7-9. But to give time for this general reverence to have arisen, we cannot help supposing that the name and, in some form, the story of Abraham were current in pertain circles considerably earlier. Local traditions respecting him doubtless existed before the glory of the southern kingdom departed, and these traditions form the basis of the composite תּוֹלְדֹת or 'family history' of Abraham (P for a special reason substitutes Terah) contained in Gen. 11 27-25 18. That these traditions are legends, and not historical records of the times which the 'family history' appears to describe, is certain (see HISTORICAL LITERATURE). But that in their present setting they are much more than legends needs to be not less firmly held. They have been purified both by abridgment and by expansion; and, since the fusion of the original and of the added elements is by no means complete, it is not impossible to study the one from the point of view of prehistoric research, and the other from that of the history of religion. Let us, then, briefly consider these two questions: (1) What did the Abraham narratives of Genesis mean to their first editors and readers? and (2) may any of them be regarded as containing a historical element?

1. The first question can be readily answered. Abraham to J and E is not so much a historical personage as an ideal type of character.

2. Story of J and E. This theory alone will account for the 'dreamy, grand, and solemn' impression which this patriarch makes upon us. The framework of the narrative may be derived from myths and legends, but the spirit comes from the ideals stored up in the minds of the narrators. A school of writers (for J and E are not merely individuals) devoted themselves to elaborating a typical example of that unworldly goodness which was rooted in faith and fervently preached by the prophets. That typical example was Abraham, who might, with a better right than the old Babylonian king, Ḫammurābi, have called himself the prophet of the heaven-god, and indeed is actually recognised by the Pharaoh (Gen. 20 7 E) as a prophet of Elohim. The 'dreaminess' which has been noticed in him is caused by his mental attitude. The Mohammedans appropriately call him 'the first Moslem.' He goes through life listening for the true *tōra*, which is not shut up in formal precepts, but revealed from time to time to the conscience; and this leaning upon God's word is declared to be in Yahwe's sight a proof of genuine righteousness (15 6 J). The *Pirqē Aboth* (*c.* 5; cp *Ber. rabba*, par. 56) reckons ten trials of Abraham's faith, 'in all of which he stood firm'; but this simply marks the intense Jewish reverence for the 'father of the faithful.' The word נִסָּה, '(he) tried,' occurs only once in the narratives (Gen. 22 1), but from the first the faith of Abraham was tried like gold in the fire. He marries a woman who is 'barren' (11 30 18 11 *f.* both J; 15 2 *f.* JE). He leaves his home at the divine bidding to seek an unknown land (12 1 J). As the climax, he is commanded to offer up the child of promise as a sacrifice (22 1-13 E). It is characteristic of the pre-exilic age that this privileged life presents no reverses of fortune (contrast Job). But prosperity does no moral harm to Abraham. He retains a pure and disinterested philanthropy, which would even, if possible, have saved wicked Sodom (18 22*b*-33*a*, a late Yahwistic passage).[2] Once, indeed, he appears as trusting in an arm of flesh, and defeating mighty kings (Gen. 14 1-17);

1 This is the earliest mention of Abraham outside the Hexateuch; for Is. 29 22 Jer. 33 26 Mic. 7 20 belong to passages inserted after the Exile.

2 See We. *CH* (2) 27 *f.*; *Documents of the Hex.* i. 26; Fripp, *Gen.* 48-50.

ABRAHAM

but this unique narrative, so flattering to the pride of the later Jews, is evidently a fragment of a post-exilic midrash on the life of Abraham.[1] It even contains a specimen of the mystic reckoning called 'gematria,' the number 318 in **14**14 being suggested by the name of Abraham's servant Eliezer,[2] of which it is the numerical equivalent, just as it is stated in the Haggada that Abraham served God from his third year, because עקב in עקב אשר שמעת (2218) is equivalent to 172 (he was 175 when he offered up Isaac, according to the Midrash Tanchuma), and as the 'number of the beast' in Rev. 13 18 is 666 (or 616).

3. Story of P.

The narratives of P differ, it is true, in some respects from those of J and E. This writer, who is a lover of gradual, orderly progress, even in the history of revelation, represents the migration into Canaan as having been planned, without any express divine command, by Terah (Gen. 11 31), and admits no theophany before that in Abraham's ninety-ninth year (17 1). He introduces, also, some important modifications into the character of the patriarch. The friendly intimacy between Yahwè and Abraham has disappeared; when Yahwè at length manifests himself, Abraham falls upon his face (17 3 17). A legal element, too, finds its way into his righteousness, the rite of circumcision having been undergone, according to P, by Abraham and all the males of his household. Still, it may be said of P as truly as of his predecessors that he regards Abraham as the greatest of men, and exhibits him as the pattern for Israelitish piety. With this object in view, he has no scruple in dealing very freely with the traditional material. Since all things are best at their beginnings, he asserts that the ancestor of Israel was all, and more than all, that his own sober imagination can devise. Later writers attempted to supply his deficiencies. Even in the OT we have a strange reference in Is. 29 22 (post-exilic) to dangers incurred by Abraham, which agrees with the hints dropped in the *Book of* Jubilees (c. 12), and points the way to the well-known legend of the furnace of Nimrod. Not less did the enigmatical war-chronicle in Gen. **14** stimulate later writers. Nicolaus of Damascus, the court historian of Herod the Great, related (Jos. Ant. i. 7 2; cp Justin, **36** 2) that Abraham came with an army out of Chaldæa and reigned in Damascus, after which he settled in Canaan; he adds that there still exists a village called Ἀβράμου οἴκησις (see HOBAH). The only Biblical trace of such a story is in Gen. **15** 2, where, however, 'Damascus' appears to be a gloss (see ELIEZER, 1). It is bold in Ew. (Hist. i. **312**) to assume on such a basis that Damascus was a traditional link in the chain of the Hebrew migration. More probably these stories were invented by the Jews of Damascus (who were a numerous body) to glorify the national ancestor. The Moslems took up the tradition with avidity (see Ew. *l.c.*), and still point to the village of Berza, or Berzat el Halil ('the marriage-tent of Abraham'), one hour N. from Damascus, where the marriage of the patriarch furnishes the occasion of an annual festival (Wetz. *ZDMG* xxii. 105 ['68]).

4. Historical Kernel.

2. What historical element (if any) do these narratives contain? The Abraham traditions are twofold. Some belong exclusively to the great patriarch; others are also attached to one or another of his successors. The latter we can disregard: the foundation of the sanctuaries of Shechem and Bethel has a better traditional connection with Jacob (Gen. **33** 18-20 28 11-22), and that of Beersheba with Isaac (26 24 *f.*), while the story of the imperilled wife has at least as good (or as bad) a claim to be connected with Isaac (26 1-11). There remain—(*a*) the migration from Ḥarrān or from Ūr Kasdim; (*b*) the close affinity between Abraham and Sarah, Abraham and Hagar (and Keturah), Abraham and Lot; (*c*) the abode and burial of Abraham near Hebron;[1] and, underlying all these, (*d*) the existence of an ancestor of the people of Israel bearing the name of Abraham or Abram. Let us first briefly consider (*c*) and (*d*).

i. *Existence of* Abraham **and** connection with Hebron.—The tradition, as it stands, is doubtless inadmissible. So much may be conceded to that destructive criticism which, denying that the old reverence for the story of Abraham has any justification, would throw that story aside as an outworn and useless myth. But the view taken by the patient reconstructive criticism of our day is that, not only religiously, but even, in a qualified sense, historically also, the narratives of Abraham have a claim on our attention. The religious value is for all; the historical or quasi-historical for students only. In the present connection it is enough to say (but see further HISTORICAL LITERATURE) that, since Abraham may be a genuine personal name, it cannot be unreasonable to hold that there is a kernel of tradition in the narratives. Hebrew legend may have told of an ancient hero (in the Greek sense of the word) bearing this name and connected specially with Hebron. This supposed hero (whose real existence is as doubtful as that of other heroes) cannot originally have been grouped with Jacob or Israel, for the name Abraham has a different linguistic colouring from the two latter. It was natural, however, that when HEBRON (*q.v.*) became Israelitish the southern hero Abraham should be grouped with the northern hero Jacob-Israel, and that the spirits of both heroes should be regarded as having a special connection with their people, and even as entitled to a kind of national cultus (cp IDOLATRY), which, though discouraged by the highest religious teachers, has left traces of itself both in early and in late books, and is characteristically Semitic.[2] The cultus was no doubt performed at Machpelah, on the possession of which P lays such great stress (*c.* 23); but that the traditional hero was actually buried there cannot be affirmed. Even among the Arabs there is hardly one well-authenticated case of a tribe which possessed a really ancient tradition as to the place where the tribal ancestor was interred.[3]

ii. Relation *of* Abraham *to* Sarah, *Hagar, Lot.*—With regard to (*b*) it should be noted that, though an assertion of relationship may be literally correct, it may also merely mean that two particular tribes or peoples have been politically connected. If, with Robertson Smith, we may regard Sarah as a feminine corresponding to Israel, we may take the marriage between Abraham and Sarah (or rather Sarai) to symbolise the political fusion between a southern Israelitish tribe and non-Israelitish clans to the south of Hebron (see, however, SARAH, i. § 2). The relationship between Abraham and Hagar may also have a political meaning, for the close intercourse, and at times political union, between Egypt[4] and Palestine and parts of Arabia is well attested. The story of the separation between Abraham and Lot[5] may

1 Much confusion has been caused by the uncritical use of cuneiform research (see Che. *Founders*, 237 *ff.*). That the writer of Gen. 14 1-11 had access, directly or indirectly, to Babylonian sources for some of his statements is denied by none. But this does not make him a historian. See Kue. ***Hex.*** **143, 324**; We. *CH*(2) **26**; **E.** Mey. ***GA*** i. 165 *f.* and cp CHEDORLAOMER, MELCHIZEDEK, § 4.

2 So, long ago, Hitzig, following ***Ber. rabba***, par. 43.

1 It is unnecessary to discuss here P's account of the origin of circumcision (see CIRCUMCISION, § 4), or the story of the defeat of the four kings in Gen. 14 (see above, § 2), or the birth and subsequent offering up of Isaac (see ISAAC, §§ 1 *f.*).

2 See 1 S. 28 13 ('I saw Elohim'), Is. **63** 17 Jer. **31** **13**, cp Lk. 16 22 Jn. 8 56, and cp Che. *Intr. Is.* 352 *f.* For parallel Arabian beliefs, see Goldziher, *Rev. de l'hist.* **des** *rel.* **1884**, p. 336 *f.*, and for the later Jewish belief in the prayers of the fathers, see 2 Macc. 15 13 *f.*, and Talmudic references in Castelli, *Il Messia*, 184 *f.*

3 WRS ***Kin.*** **18.**

4 We assume provisionally that Hagar is correctly regarded, from the point ***of*** view ***of*** the original tradition, as an Egyptian. See, however, HAGAR, and especially MIZRAIM, § 2 ***(b)***, BEER-LAHAI-ROI, § 2.

5 On the details of the story, cp WRS ***Kin.*** **14 *f.***

be but a foreshadowing of the separation between Israel and Moab and Ammon; but, if Lot is to be explained by Lotan (the eponym of an Edomitish clan, Gen. 36 20-29), the asserted relationship between Abraham and Lot accords with the theory of the original non-Israelitish character of Abraham.

iii. *Connection with Ḥarrān* **or** *Ūr*.—As to (a), even if we reject the theory of the migration of a clan called after Abraham from Ḥarrān or Ūr Kasdim, it does not at once follow that the tradition is altogether unhistorical. Not only Abraham, 'but the wives of Isaac and Jacob also, are declared to have come from Ḥarrān. This cannot be a baseless tradition. Critics, it is true, are divided as to its historical value, nor can we discuss the matter here. But there is, at any rate, as Stade admits, nothing ***a priori*** improbable in the view that certain Hebrew clans came from the neighbourhood of Ḥarrān to Palestine. The fluctuation of the tradition between Ḥarrān and Ūr Kasdīm need not detain us (see special articles). Both Ḥarrān and Urn were seats of the worship of the moon-god under different names, and we can well believe that at some unknown period the moon-worship of Ḥarrān affected thé Hebrew clans (cp SARAH, i. § 2, MILCAH, 1). For what critic **of** to-day can venture to assume that it was repugnance to this worship, and in general to idolatry (cp Josh. 24 2 *f.*),[1] that prompted the Hebrew clans to leave their early homes? Surely this asserted religious movement is a specimen of that antedating of religious conditions which is characteristic of the OT narrators, and was copied from them by Mohammed. First, the insight of Isaiah is ascribed to Moses; then, as if this were not wonderful enough, it is transferred to Abraham. But how recent is the evidence for either statement, and how inconsistent is the spiritual theism ascribed to Abraham with sound views of historical development! Instead therefore of speaking of 'that life of faith which historically began with Abraham' (H. S. Holland, *Lux Mundi*, 41), should we not rather say 'that life of faith which, though germinally present from the earliest times, first found clear and undoubted expression in the writings of the prophets and in the recast legends of Abraham'?

Hommel's ambitious attempt to prove the strictly historical character of the Abraham narratives from the Arabian personal names of the dynasty of Ḥammurābi is, critically regarded, a failure. The existence in early Semitic, antiquity of personal names expressing lofty ideas of the divine nature in its relation to man has long been known, though it is only in recent years that such names have been discovered so far back in the stream of history. But hitherto scholars have with good reason abstained from inferring the extreme antiquity of Hebrew narratives in which similar names occurred, because the age of these narratives had necessarily to be first of all determined by the ordinary critical methods, and the existence of such a phrase as 'in the days of Amraphel' (Ḥammurābi?) proves only that the writer may have been acquainted with documents in which events of this period were referred to, not that his own narrative is strictly historical.

For the later Haggadic stories concerning Abraham see Beer, *Leben Abrahams nach Auffassung der jüd. Sage*, **1859;** Hamburger, ***RE*** *für Bib. u. Talm.*(2) (*s.v.* 'Abraham'); also Grünbaum, *Neue Beitr. zur sem. Sagenkunde*, **1893,** pp. 89-131 (Jewish and Mohammedan legends); and, especially, a late apocryphal book called The Testament of Abraham (*Texts and Studies*, Cambridge, 1892), which presents perhaps the finest imaginable glorification of the character of the patriarch. All that he needs is to see the retributions of heaven and hell that he may learn (like Jonah) to have pity on sinners (see APOCRYPHA, § 11). For the archaeological aspects of the life of the patriarch see Tomkins, *Studies* ***on the Times*** *of Abraham* ('78; second ed. **'97).** The best critical literature is cited by Ki. *Hist.* i.; add to his list Hal. *REJ* xv. 161 *ff.* **('87)** *Rev. sém.* i. 1 *ff.* **('93)** Renan, *Hist. du peuple d'Israel*, i. **(1887)**; and reviews of Renan by Reinach, *REJ* xv. 302 *ff.*; and by WRS, *Eng. Hist.* ***Rev.*** iii. 128 *f.* ('88). Renan's statements that the Abraham of Genesis is the type of an Arab sheikh, and that the ancient Hebrews, represented by Abraham, worshipped a 'patriarchal, just, and universal God,' from whom the worship of Yahwè was a falling away, are fantastically erroneous. For Nöld.'s view that Abraham and Sarah are divine names, see bis essay on the patriarchs in *Im neuen* ***Reich*****, 1871,** p. 508 *ff.*, and on the other side Baethg. *Beitr. z. sem. Rel.-gesch.* 154 *ff.* See also EDOM (§ 2; supposed divine character of Abraham) and HOBAH (his connection with Damascus). T. K. C.

ABRAHAM'S BOSOM (Lk. 16 22†). See HADES.

ABRAM (אַבְרָם, § **44,** Gen. 11 27-17 5*a* 1 Ch. 1 27 Neh. 9 7†; αβραμ [BADL], but -ραν [A twice in Gen.], -ρααμ [A once in Gen.; B in Ch. and B* vid. ℵL in Neh.; ܐܒܪܡ; *ABRAM*), *i.e.* probably, in the mind of the priestly writer (Gen. 17 3), 'high father' (patriarch), to which the name Sarai, if taken as another form of SARAH [*q.v.*], would be a suitable companion. If, however, the name ABRAM be a genuine traditional one, it will be related to ABIRAM [*q.v.*], as ABNER [*q.v.*] is to ABINER, and be explained similarly (cp ABRAHAM, § 1).

ABRECR (אַבְרֵךְ), Gen. 41 43†, 'Then he made him ride in the chariot next in rank to his own, and they cried before him Abrech. So he set him over all Egypt' (Kau. *HS*). The passage occurs in E's (or E_2's) version of the appointment of Joseph to be grand-vizier, and the strange word Abrech greatly puzzled the ancient interpreters. 𝔊AEL gives *καὶ ἐκήρυξεν . . . κήρυξ*; the Targums אַבָּא לְמַלְכָּא, while Pesh., omitting וְנָתוֹן, paraphrases ܐܒܐ ܘܫܠܝܛܐ [cp 45 8 Pesh.], and Vg. *clamante præcone ut omnes coram* **eo** *genu flecterent.* Jerome himself, however (*Quæst.* ***in*** *Gen.*), remarks, 'Mihi videtur non tam præco sive adgeniculatio . . . intelligenda, quam illud qnod Hebrzei tradunt, dicentes "patrem tenerum," . . . significante Scripturâ quod juxta prudentiam quidem pater omnium fuerit, sed juxta ætatem tenerrimus adolescens et puer.' *So*, in fact, the Midrash (*Ber. rabba*, par. **90)** and the two later Targums (as an appendage to 'father of the king') expressly interpret, and in *Bab. Bathra*, 4*a* we even find this justified by the combination of רך and ***rex.*** In *Jubilees* 40 7 (Charles) the form is Abirer, ***i.e.*** Abirel ('God is a mighty one,' or, being an imaginary form, 'mighty one of God').

The different views of modern scholars can only be glanced at here. Luther is content with *Landesvater*, EV with 'bow the knee.' RV mg. adopts the view that the original word was 'similar in sound to the Hebrew word meaning to kneel' (so Benfey, Brugsch, Chabas). The Mas. vocalisation, however, is guess-work, and the Hiphil of ברך occurs only once again (Gen. 24 11), and then in the sense of 'to cause (the camels) to kneel down.' If we look at the context, we shall find reason to doubt whether any outward display of reverence at all (prostration would be more natural than kneeling) can be meant by Abrech. An official title is what the context most favours, not, however, such a title as 'chief of the wise men'[1] (ap-rex-u); but rather 'great lord,' or some other equivalent to 'grand-

[1] The words, 'and worshipped other gods,' belong to R. But the sense of the earlier narrators is correctly given (cp. Gen. 31 19 53 35 4). And, of course, Israel's point of religious departure must, considering primitive circumstances, have been in some sense polytheistic (cp Reinach, *REJ* xv. 311 ['87]; Boscawen, *The Migration of Abram*, 20 *f.*).

[1] Harkavy, *JAs.*, mars-avril **1870**, pp. 161-165. Le Page Renouf's explanation (***PSBA*** xi. 5 *ff.* ['88]), 'thy command is our desire' (*ab(-u)-rek*), *i.e.*, 'we are at thy service,' is much less suitable to the context.

vizier.' No such title including the letters b-r-k is quoted from the pure Egyptian vocabulary; but may it not be really a loan-word? This might account for the fact that Abrech is passed over in 𝔊. It is well known that from the fifteenth century onwards there was close intercourse between the Egyptians and the Semitic peoples, and that many technical words were borrowed from the latter. This being the case, it appears reasonable to connect Abrech with the Ass.-Bab. *abarakku* (fem. *abarakkatu*), which is applied to one of the five highest dignitaries in the empire.[1] Schrader, who once opposed this view (*COT* i. 139), now thinks that the Amarna discoveries (1888) have made it much more probable; and Brünnow has expressed the opinion that 'the Assyrian a-ba-rak-ku seem undoubtedly to be the prototype of Abrech'[2] (private letter). In spite of Dillmann's peremptory denial (1892), it has become very difficult to think otherwise. We might, indeed, correct the word out of existence; but Ball's text (*SBOT*) is hardly an improvement except in the substitution of the ויקרא of the Sam. text (cp 𝔊 Pesh.) for ויקראו, which is justified by the context, and had already been made by Geiger (*Urschr.* 463). T. K. C.

ABRONAH, AV **Ebronah** (עַבְרֹנָה), one of the stages in the wandering in the wilderness (Nu. 33 34 *f.*†, P; σεβρωνα [B], εβ. [AFL]). See WANDERINGS, §§ 12, 14. On *αβρωνα* [AB] in Judith 2 24, see ARBONAI.

ABSALOM (אַבְשָׁלוֹם, § 45, or—less correctly, as Nöld. thinks—as in 1 K. 15 2 10 אֲבִישָׁלוֹם, ABISHALOM, *ABESSALOM*; probably 'the [divine] father is peace,' cp Yahwè-shalom Judg. 6 24, a title of Yahwè, but not Ps. 120 7; αβεσσαλωμ [BA, and in 2 S. 3 3, and 1 Ch., also L], -εσλ. [A, 2 S. 18 15], -εσα. [L; but in 1 K. 2 28 σολομωντος, where also [illegible], *SALOMONEM*]; [illegible]; αβεσλωμ [A], 2 S. 18 15; Jos. αβεσσαλωμος and αψαλωμος; *ABSALOM*) was David's third son, his mother being Maacah, daughter of Talmai, king of GESHUR (*q.v.* 2). Born at Hebron, he grew up at Jerusalem, the idol of his father, and popular from his manly beauty and his winning manners. His tragic history is faithfully recorded by an ancient and well-informed writer in 2 S. 13-18.

We first hear of him in connection with the outrage on his sister Tamar by her half-brother Amnon, whom David, out of weak-minded affection for his first-born (2 S. 13 21, 𝔊BAL), omitted to chastise. Absalom soothed his sister, and silently bode his time. Then, after two years, he lured Amnon with the other princes to a feast of sheep-shearing on Absalom's estate at Baal-hazor (see HAZOR, 2), and at a concerted sign his servants slew Amnon during the banquet. The next three years Absalom passed in exile in Geshur (*q.v.* 2), till Joab, knowing that the king pined for the fugitive, contrived by the help of a 'wise woman' from Tekoa to bring him back. The form of the parable (2 S. 14 5-7) may belong to the 'wise woman,' but the ideas which it suggested came from Joab. Why was the king so willing to mitigate the custom of blood-vengeance for a stranger, and so hard towards his own son? We die, and are like water spilt on the ground; but God spares the life of him whose thoughts are bent on the restoration of the banished (2 S. 14 14 with Ewald's emendation). The king gave way to this gentle pressure, and allowed his son to come back to Jerusalem, but refused to see him for two whole years. Nor would Joab take any further step, till the impetuous prince set his barley field on fire, and, when Joab came in person to complain, declared that death was better than continued disgrace. He had his way. The king kissed him and restored him to full favour.

Four years followed (2 S. 15 7, L. Pesh. and Jos.; MT 𝔊BA Vg. have 'forty') during which Absalom prepared men's minds for coming events. He let his hair grow enormously long (2 S. 14 26), in token, as Robertson Smith thinks (*RS*(2) 484), of the sacredness of his person, though the ordinary view that it was merely a proof of vanity possesses the recommendation of simplicity. He rode in a chariot with horses (then scarcely known in Israel) and was accompanied by a guard of fifty men. He made every suitor's cause his own, and lamented aloud that his power did not match his desire to help (2 S. 15 1-6). At last he fired the train which had been so long and so carefully laid. On pretence of a sacrificial feast, he withdrew to Hebron, accompanied by 200 men, doubtless needy dependents, who followed him in ignorance of his plan. Here, at the old capital of Judah, amidst a people who were still unreconciled to their absorption in a larger state, he raised the standard of revolt. Ahithophel, a man of southern Judah, he made his principal counsellor; Amasa, Absalom's cousin, also from Judah, took command of the troops (cp GESHUR, 2). But an appeal was also made to the centrifugal forces always at work in the N. tribes, for, as he set out for Hebron, the rebel prince sent men through the land of Israel. At the sound of the trumpet these were to proclaim the accomplished fact, 'Absalom has been made king in Hebron.'

David, once the darling of the nation, was compelled to fly from the capital. Absalom as quickly entered it, and gave that public sign of his accession to the throne which the crafty Ahithophel recommended. The number of his counsellors was now increased by the addition of Hushai, 'David's friend' (on the epithet see HUSHAI), whose flattery he failed to see through. In reality Hushai only pretended to join the rebels. His object was twofold—to frustrate the counsel of Ahithophel, and to betray Absalom's plans to the priests, Zadok and Abiathar. These trusty friends of David were to communicate with a maid, and she was to impart her knowledge to two sons of the priests, who waited to bear it to the king. This counterplot attained its end. Ahithophel, who knew how deceptive was the popular enthusiasm, wished Absalom to 'strike David before there was time for second thoughts' (WRS). But Hushai persuaded the pretender to wait, and so David, who was informed of all that happened at Jerusalem, safely crossed the Jordan and established himself at Mahanaim, once Ishbaal's capital.

Thence, in three divisions, David's army sallied forth, and in the neighbouring forest (see EPHRAIM, WOOD OF) the rebel troops were routed. In the flight Absalom's head (hair?; Heb. ראש, cp 2 S. 14 26) was caught in the branches of a terebinth tree, and his mule left him hanging between heaven and earth. 'Not for a thousand shekels' would the soldier who saw him hanging have taken his life. How could he venture to disregard the king's charge to watch over the young man Absalom? If he had treacherously attempted Absalom's life, would not the king have found it out, and would not Joab himself have stood aloof? But Joab, who felt his courage called in question (2 S. 18 14, 𝔊BAL; see Bu. *SBOT*), with an emphatic denial of the statement, plunged three javelins into Absalom's body. The corpse of the ill-fated prince was flung into a pit, and the soldiers cast stones upon it, that the restless spirit might trouble them no more.[1] Meantime the old king was waiting at the gate of Mahanaim. The pathetic story of his broken-hearted grief at hearing the news of his dearly loved son's death is enshrined in all memories.

Such was the close of the sad tragedy which opened with the barbarous outrage upon Tamar. Just eleven years had passed since that event, so that if Absalom

[1] Friedr. Del., *Heb. in the light of Assyrian Research* (1883), p. 25 *f.*; cp *Par.* 225; *Ass. HWB* 12. This brilliant suggestion was temporarily adopted by the present writer (*Acad.* 12th Apr. 1884), who has, since the Amarna discoveries, returned to it.

[2] So also Sayce (*Acad.* 7th May 1892; *Crit. Mon.* 214 *f.*), but with an interpretation which needs fuller evidence.

[1] See Tylor's *Prim. Cult.* ii. 29.

was about twenty when he took up his sister's cause, he must have died a little over thirty. Apparently his three sons died before him (2 S 14 27 18 18). On his 'daughter,' see TAMAR, 3, and MAACAH, 3, *4*. The notice respecting Absalom's monument in 2 S 18 18 is not very clear, perhaps owing to some confusion in the text of *vv.* 17-19 (*so* Klo.). It is evidently parenthetical, and reminds the reader that Absalom had a suitable monument (erected, according to Klo.'s reading, by David) in the King's Vale (see SHAVEH, i., MELCHIZEDEK, § 3). The building close to Jerusalem, now known as Absalom's tomb, is of very late origin, as its Ionic pillars prove. W. E. A.

2. Father of Mattathias (1 Macc. 11 70; Ἀψάλωμος [AV], ψαλμωδός [ℵ]). Zöckler proposes to read 'Jonathan' for 'Mattathias' here; or else to read Mattathias in 1 Macc. 13 11 also.

3. Father of Jonathan (1 Macc. 13 11 : Ἀψάλωμος [AVℵ]), probably the same as (2).

4. An ambassador to Lysias; 2 Macc. 11 17 (Αβεσσαλωμ [A], μεσσαλα [1] A [*sic* V]). Possibly also to be identified with (2).

ABUBUS (ΑΒΟΥΒΟΣ [AℵV]; ܡܚܒܒ, cp HUBBAH, 1 Ch. 7 34 Kr.; *ABOBUS*), father of Ptolemy, captain of the plain of Jericho, and son-in-law to Simon the Maccabee (1 Macc. 16 11 15†).

ABYSS, THE (Η ΑΒΥΣΣΟΣ), the term substituted in RV of NT for the 'deep' and the 'bottomless pit' of AV; see Lk. 8 31; Rom. 10 7; Rev. 9 1 *f.* 11 11 7 17 8 20 1 3†. In the second of these passages, by an inexact use of the term, 'the abyss' is equivalent to Sheol; 'over the sea' in Dt. 30 13 is taken to mean 'over the world-encircling ocean into which the "rivers" of the underworld (Ps. 18 4 [5], נחלי בליעל) discharge themselves to "the place where all flesh wanders" (*i.e.*, Sheol; *Enoch* 17 6).' Elsewhere it means the deeply-placed abode of the 'dragon' or devil, of the 'beast' his helper, and of the δαιμόνια,—whether this abode be taken to be the 'deep (*tĕhōm*) that coucheth beneath' (Gen. 49 25 RV), or the 'waste place' with 'no firmament above and no foundation of earth beneath,' by which the fire-filled chasm was thought to be bordered (*Enoch* 18 12; cp 21 27). The former view is in accordance with OT usage, the *tĕhōm* of MT and the ἄβυσσος of 𝔊 being the flood or ocean which once enfolded the earth, but is now shut up in subterranean store-chambers (Ps. 33 7); and it is favoured by the use of θάλασσα in Rev. 13 1 as synonymous with ἄβυσσος. But the latter is more probably right in the Apocalypse, which agrees with *Enoch* in asserting the existence of a lake of fire, destined for the final punishment of the devil and his helpers. This fiery lake is not in either book technically called 'the abyss'; in *Enoch* 10 13 the Greek has τὸ χάος τοῦ πυρός, and in 21 7 διακοπὴν εἶχεν ὁ τόπος ἕως τῆς ἀβύσσου. The angelic overseer of this region is Uriel, who is described in *Enoch* 20 2 (Gizeh Gk.) as ὁ ἐπὶ τοῦ κόσμου καὶ τοῦ ταρτάρου. 'Tartarus' occurs also in Job 41 23, 𝔊, in the phrase τὸν τάρταρον τῆς ἀβύσσου [BℵA], which, being used in connection with Leviathan, is doubtless to be taken of the subterranean abode of Yahwè's enemy, the dragon (see DRAGON, § 4 *f.*). Cp ταρταρώσας, used of the fallen angels, 2 Pet. 2 4. T. K. C.

ACACIA (שִׁטָּה), Ex. 25 5 etc., RV. See SHITTAH TREE.

ACATAN (ΑΚΑΤΑΝ [BA]), 1 Esd. 8 38† AV=Ezr. 8 12, HAKKATAN.

ACCABA (ΑΚΚΑΒΑ [B]), 1 Esd. 5 30 RV=Ezra 2 46, HAGAB.

ACCAD (אַכַּד; ΑΡΧΑΔ [AL], ΑΧ. [DE]; ܐܟܕ; *ACHAD*) is one of the four cities mentioned in Gen. 10 10 as forming the beginning of the kingdom of Nimrod in the land of Shinar or Babylonia. In the cuneiform inscriptions the name of Akkad is most frequently met with in the title *lugal Kingi(ki) Uri(ki)*, which is rendered in Semitic by *šar (mātu) Šumēri u (mātu) Akkadī*. This title, which implied dominion over the whole of Babylonia, was borne from the earliest times by the Babylonian kings, and was adopted by those kings of Assyria who conquered Babylon (cp BABYLONIA, § 1). The Akkad referred to in Gen. 10 10 has been identified by some with the ancient city of *Agadè* which was situated in northern Babylonia and attained a position of supremacy over the rest of the country under Sargon I. about 3800 B.C. This identification, however, is entirely hypothetical, and is based only on the superficial resemblance of the names. L. W. K.

ACCARON (ΑΚΚΑΡΩΝ [A*]), 1 Macc. 10 89† AV=RV EKRON (*q.v.*).

ACCHO, RV **Acco** (עַכּוֹ), Judg. 1 31 and (see UMMAH) Josh. 19 30†; see PTOLEMAIS.

ACCOS (ΑΚΧΩΣ [A], ΑΚΚΩΣ [ℵ], ΙΑΚΚ. [V]; same as HAKKOZ [*q.v.*]), grandfather of Eupolemus; 1 Macc. 8 17†.

ACCOZ (ΑΚΒΩΣ [B]), 1 Esd. 5 38† AV=Ezra 2 61 RV, HAKKOZ, 1.

ACCUSER (ΚΑΤΗΓΩΡ [Ti., W & H following A], ΚΑΤΗΓΟΡΟΣ [Bℵ, etc.]. The form of word found in the best texts is simply a Hebraised form [קָטֵיגוֹר] of the common word ΚΑΤΗΓΟΡΟΣ. For Rabbinic usage see *e.g.* Buxt. *Lex.*), Rev. 12 10†. See SATAN, §§ 6 (3) 7.

ACELDAMA AV; RV **Akeldama** (ΑΧΕΛΔΑΜΑΧ [1] [Tisch. A, etc.], *ACHELDEMACH* [96 lat.], ΑΚΕ. [B followed by W & H], -ΔΑΙΜ. [D], *ACELDEMACH* [d]), the name according to Acts 1 19 of a field bought by Judas Iscariot for some unknown purpose. The vet. Lat. of Mt. 27 8 applies the name (not, as in the Gk. MSS., merely in translation, but in the original) also to a field bought by the priests of Jerusalem to bury strangers in.

1. The name. MS. evidence is so overwhelmingly in favour of some such form as Akeldamach that the RV is quite unjustified in rejecting it, especially when it corrects the c into *k*. Acts 1 19 states that in the language of the dwellers at Jerusalem this name meant 'the field of blood' (χωρίον αἵματος). חקל דמך (*ḥăkēl dĕmākh*), however, is obviously 'the field of *thy* blood,' an impossible expression. Klostermann has therefore argued with great acuteness (*Probleme im Aposteltexte*, 1-8 ['83]) that דמך (DMKh) is one word—viz., the well-known Aram. root 'to sleep.' All we have to do, then, is to understand it of the sleep of death, a usage known in Syr., and 'field of sleep' will mean cemetery, which, as Mt. tells us, was what the priests meant to make of the potter's field. Klostermann's argument is very strong—it is certainly natural to suppose that the name originated in some fact known to the people at large, as the transformation of a potter's field into a burying place would be—and his view was adopted by Wendt (Meyer[7] *ad loc.*). But we have no instance of a noun דמך so used, and *ch*, χ, may = א (cp ιωσηχ [Lk. 3 26, BK, etc.] = יוסי; Σειραχ, Sirach = סירא, Sira). Hence, whatever may have been the real origin of the name—we can never know—its form was probably חֲקֵל דְּמָא (Dalm. *Gram.* 161 and 105 n. 1 respectively), 'the field of blood' (so Dalm. 161 n. 6; Arn. Mey. *Jesu Muttersprache*, 49 n. 1). On the questions who bought the field and why it was called Aceldama see also *ACTS*, § 14. Cp JUDAS, 9.

2. Traditional site. Tradition which goes as far back as to the fourth century has placed Aceldama on a level overhanging the Valley of the Son of Hinnom on the NE. slope of the Hill of Evil Counsel,—a tradition which rests precariously on Jer. 18 *f.*, where the situation of the potter's house in Jeremiah's day is thought to be indicated. Potter's

1 If a Hebrew original could have been supposed for 2 Macc. μεσσαλα might have represented a transliteration of part of a participle of שלח (οἱ πεμφθέντες follows).

1 On this form see Dalm. (*Gram.* 304 n. 2), Kau. (*Gram.* 8).

material is still dug out in the neighbourhood. The traditional Aceldama was used to bury Christian pilgrims in at least from 570 *(Anton. Plac. Itin.* **26)**: especially during the Crusades, but, according to Maundrell, who says it was then called Campo Santo, even as late as **1697.** A charnel house into which the bodies were let down from above has stood here from very early times. The best history and description of the site (with plans) is that by Schick, *PEFQ,* 1892, pp. **283** *ff.*

G. A. S.—H. W. H.

ACHAIA (αχαια [Ti.WH]). It is a fact of some interest that both at the beginning and at the end of their history the word 'Achæan' was used as the general designation of the inhabitants of Greece proper. During the classical period Achaia denoted only the narrow strip of coastland and the adjoining mountain stretching along the S. shore of the Corinthian gulf from the river Sythas (mod. Trikalitikos) 20 m. west of Corinth, to the river Larisus near Cape Araxus (mod. Kalogria). In the time of Paul, Achaia signified the Roman province—*i.e.*, the whole country south of Macedonia and Illyricum, including some of the adjacent islands. The name Achaia was given to it in consequence of the part played by the Achæan League in the last spasmodic effort which occasioned the sack of Corinth and the downfall of Greek independence, **146** B.C. (Paus. vii. 16 10). Whether the formation of the province dates from that year, or not, is of no consequence to the student of the Bible. It was in 27 B.C. that Augustus definitely settled the boundaries of Achaia, assigning to it Thessaly, Ætolia, Acarnania, and part of Epirus (Strabo, p. **840).** The Achaia of Paul is, therefore, practically synonymous with the modern kingdom of Greece, but a little more extensive towards the north-west. The combination 'Macedonia and Achaia' embraces the whole of European Greece, as in Acts 19 21, *διελθὼν τὴν Μακεδονίαν καὶ Ἀχαΐαν* (see also Rom. **15** 26 1 Thess. 1 7 *f.*). From 27 B.C. Achaia naturally ranked as a senatorid province-i.*e.*, its governor was an ex-prætor, with the title proconsul (Strabo, *l.c.*). In 15 A.D., however, owing to their financial embarrassments, both Achaia and Macedonia were taken charge of by Tiberius; and it was not until **44** A.D. that Claudius restored them to the Senate (Tac. *Ann.* i. 76; Suet. *Claud.* 25). The writer of Acts 18 12 is thus quite correct in speaking of Gallio in **53** or **54** A.D. as *ἀνθύπατος*—*i.e.*, proconsul. The fiasco of Nero's proclamation made all Greece free, but this state of things lasted only a short time. With this exception, a proconsular governor was stationed in Corinth, the capital of Achaia, until the time of Justinian.

In the NT we hear of only three towns of Achaia—ATHENS, CORINTH, and CENCHREA;—but the Salutations of the two Corinthian Epistles (esp. 2 Cor. 1 1 *ἐν ὅλῃ τῇ Ἀχαΐᾳ*) imply other Christian communities in the province. In 1 Cor. 16 15 the 'house of Stephanas' is called the 'first-fruits of Achaia' (*ἀπαρχὴ τῆς Ἀχαΐας*). In this place, for 'Achaia' we should expect 'Corinth'; for, according to Acts 17 34, Dionysius the Areopagite and other Athenians must have been the first-fruits of teaching in the province of Achaia. In Rom. 16 5, where, according to the Text. Rec., Epaenetus is spoken of as the *ἀπαρχὴ τῆς Ἀχαΐας*, the best texts read *Ἀσίας* [Ti. W & H, following BAℵ, etc.]. The charity of Achæan converts is praised in 2 Cor. 9 2 Rom. **15** 26; but the reference may be merely to the church at Corinth (cp 2 Cor. 8 10).

W. J. W.

ACHAICUS (αχαϊκος [Ti.WH]), a member of the Corinthian church, who, along with Stephanas and Fortunatus, had carried to Paul at Ephesus news of the Corinthians which had gladdened and refreshed him (1 Cor. 16 17 *f.*). He is enumerated as one of the Seventy (Lk. 10 1) in *Chron. Pasc.* (Bonn ed. i. **402).**

ACHAN (עָכָן, Josh. 7), called **Achar** (עָכָר—*i.e.*, 'troubled'—, cp OCRAN, עָכְרָן) in 1 Ch. 2 7 and (*ACHAR* [ed. Bensly]) in **4** Esd. **737** [107] RV. 𝔊's readings are αχαρ [BF and (except Josh. 7 1, αχαν) L], αχαν [A; but αχαρ in Josh. 7 24 1 Ch. 2 7]); the son of Carmi b. Zabdib. Zerah b. Judah, who unlawfully took possession of some of the 'devoted' spoil of Jericho (see BAN). His breach of a taboo had involved the whole host in guilt (*RS*(2) **162),** and the community had to free itself of responsibility by destroying not only Achan but also his whole family (Josh. 7). This is quite in accordance with primitive notions (*RS*(2) 421), although our present text is due to later insertions in *v.* **24** *f.* With the variety in the form of the name is to be connected the word-play in Josh. 7 25. Cp CARMI, 1.

ACHAZ (αχαζ [Ti], αχας [WH], Mt. 1 9), RV AHAZ (*q.v.* 1).

ACHBOR (עַכְבּוֹר, § **68**, *i.e.*, MOUSE [*q.v.*]; cp Ph. עכבר, עכברא, עכברם; αχοβωρ [BAL]).

1. Father of Baal-hanan [1] king of Edom (Gen. 36 38, *χοβωρ* [A*D]; 39; 1 Ch. 1 49, עַכְבֹּר [Bä. Ginsb.], *αχωβωρ* [B], *χ.* [L]); also *v.* 50 in 𝔊BA. See EDOM, § *4.*

2. b. Micah; a courtier of King Josiah (2 K. 22 12 14; Jer. 26 22, MT and Theod. in Q mg. [BAR om.]; Jer. 36 12, *ακχοβωρ* [Bℵ?], *-βη* [ℵ*], *ακοβωρ* [Q]); in 2 Ch. 34 20 named ABDON [*q.v.*, 4] (*αβδοδομ* [B], *αβδων* [AL]).

ACRIACHARUS (αχιαχαρος [BA]; see further below).

1. The prosperous nephew of Tobit (see TOBIT). He was cup-bearer, signet-keeper, steward, and overseer of accounts to Esarhaddon at Nineveh (Tob. 1 21 *f.*).

In 1880 George Hoffmann pointed out[1] the identity of the Achiacharus of Tob. 1 21 *f.* 11 18 14 10† with Aḥīḳār (on the name see below), a legendary sage and vezir of Sennacherib, who is the hero of a romance found in certain Syriac and Arabic MSS. According to this romance, he almost lost his life through the base treachery of his sister's sou (cp Pesh. in Tob. 11 18), Nadan (= Aman of Tob. 14 10—cp [*ἐποίησεν*] *αδαμ* [B], *ναδαβ* *(K)*; see AMAN—and probably = Nabal [or Laban or other form] of Tob. 11 18; see NASBAS), whom he had adopted. Restored to favour, he gave sundry proofs of his marvellous wisdom, especially in connection with a mission to a foreign king. Assemanni had already observed (*Bib. Or.* 3, pt. 1 286 *a)* that in the Arabic story 'de Hicaro eadem fere narrantur quae de Æsopo Phryge'; chaps. *23-32* of the legendary *Life of Æsop* (Maximus Planudes) in fact tell of Æsop and his kinsman Ennos a quite similar story. There can be little doubt that the story is oriental in origin; but it has been argued by Meissner (see below) that the Æsop romance has preserved in some respects a more original form. The Greek recension, however, that must be assumed as the basis of certain Roumanian and Slavonic versions still surviving, was probably an independent version now lost, made from the Syriac. Allusions to an eastern sage *αχαϊκαρος* are found elsewhere (*e.g.*, Strabo, p. **762);** and traces of his story seem to have made their way into the Talmud (*ZDMG* **48** 194 *f.* ['94]). The mutual relations of these various recensions are still obscure; but there seems little reason to question that the allusions in Tobit are to an already well-known story. M. R. James *(Guardian,* Feb. *2,* **1898,** pp. 163 *f.*) suggests parallels to the same story in the NT.

Of the allusions, that in 11 18 is wanting in the It.; those in 11 18 and **14** 10 are absent from the 'Cbaldee' and Heb. texts; while the Vg. omits all save that in 11 18 (*Achior*)—perhaps the allusions were felt to have little to do with the story of Tobit.

Greek variants of the name are *αχειχαρος* [ℵ in c. 1, *-ειαχ.* once in ℵc.a], *αχε[ι]κ.* [ℵ in *14* 10], *αχεικαρ* [ℵ* in **11** *18*, *αχειαχαρος* ℵc.a], cp It. *Achicarus,* and in **14** 10 *Achicar.* The equivalent Hebrew **would** be אחיקר, and Meissner has pointed out that Pesh. has ܐܚܝܩܪ for יְקָר in 1 Ch. 6 5. The name remains obscure however. Pesh. has ܐܚܝܩܪ; 'Chald.' H2, אקיקר; H1 אחי אהרון; **Vg.** *Achior,* and Pesh. in 1 21 *f.* ܐܚܝܩܪ.

1 'Auszüge aus syrischen Akten persischen Märtyrer,' in *Abhandl. f. d. Kunde d. Morgenlandes,* 7, no. 3, p. 182.

In the romance the forms are حيقار ; سحاؤ [cod. Sach.]; سحو [cod. in Brit. Mus.].

R. Harris in *Story of Aḥiḳar* (see above), pp. vii.-lxxxviii.

2. 'King of Media' (Tob. 14 15 [א*]; It. *Achicar*) = NEBUCHADNEZZAR (*ib.* [B]) = AHASUERUS (*ib.* [A]). See TOBIT, BOOK OF.

ACHIAS (*ACHIAS*), 4 Esd. 1 2†. See AHIJAH, 1.

ACHIM (αχειμ [Bא*], -ν, αχιν, -ην [A etc.], αχιμ [א^b etc.], cp αχειμ = אחיאם, AHIAM, 1 Ch. 11 35 [BHA], and = יָכִין, JACHIN, Gen. 46 10 [A*vid.], 1 Ch. 24 17 [16] [B]), a name in the ancestry of Joseph (Mt. 1 14). See GENEALOGIES OF JESUS, § 2 *c*.

ACHIOR (αχ[ε]ιωρ [BHA], § 44), in the romance of JUDITH (*q.v.*), 'captain of all the sons of Ammon.' Having dared to warn Holofernes of the danger of attacking the Israelites, he was handed over to them to share their fate on the expected triumph of the Assyrian arms (6 5 *ff.*). He was hospitably received, and ultimately became a Jewish proselyte—no doubt to the great edification of Jewish readers of the story.

In some versions of Tobit his name takes the place of that of ACHIACHARUS (*q.v.*)—an error due to the similarity of *k* and *w* in Syriac.

ACHIPHA (αχειβα [B]), 1 Esd. 5 31† RV = Ezra 2 51, HAKUPHA.

ACHISH (אָכִישׁ, αγχους [BA], ακχ. [L]), a Philistine, son of Maoch (1 S. 27 2) or Maachah (1 K. 2 39 *f.*; αγχις [A]); a king of Gath, with whom David and his band took refuge from the persecution of Saul (see DAVID, § 5). He is described as a credulous man whom David found it easy to deceive, representing that his raids against Bedouin tribes were really directed against the Judahites and their allies, and taking care not to leave any of his captives alive to reveal the truth to Achish. At Ziklag, which had been assigned to him as his place of residence, David lived as a freebooter in vassalage to Achish for a year and four months (𝔊 only four months). The confidence, however, with which his suzerain regarded him was not shared by the Philistine lords, who prevailed upon Achish to dismiss David from his army when starting to meet Saul at Gilboa. See 1 S. 27 1-28 2 29 1-11, a connected passage of date prior to 800 (*SBOT*). In another passage (1 K. 2 39 *f.*), where the execution of Shimei [1] is accounted for by his having gone to Gath in search of some runaway slaves, it is said that the fugitives went to Achish. No doubt the same king is meant (son of Maacah, *v.* 39), though the reference to Achish has the appearance of being a later ornamental insertion made in oblivion of chronology.

To a very much later writer (see 1 S. 21 10-15 [11-16]) the account in 1 S. 27-29 seemed to reflect on David's patriotism. He therefore devised an entertaining and unobjectionable story, in the style of the Midrash, which he hoped would supplant the no longer intelligible historical tradition. According to him, David went alone, and was compelled to feign madness for safety till he could escape. The author of the title of Ps. 34 accepted this story, but by mistake (thinking of Gen. 20 2) wrote 'Abimelech' for 'Achish' (αβ[ε]ιμελεχ [BאAR], αχειμ. [U], *Achimelech*; Pesh. quite different).

T. K. C.

ACHITOB (αχειτωβ [B]), 1 Esd. 8 2 = 4 Esd. 1 1† AV = Ezra 7 2, AHITUB, 2.

ACHMETHA (אַחְמְתָא), Ezra 6 2†, the capital of Media; see ECBATANA.

ACHOR (עָכוֹר; αχωρ [BAL]), a valley on the N. boundary of Judah (Josh. 15 7), which, as we may infer from Josh. 7 (Εμεκαχωρ [BAL]) combined with Hos. 2 15 [17], led up from Jericho into the highlands of Judah. In Is. 65 10 it represents the E. portion of Canaan on this side the Jordan, To an Israelite its name naturally suggested gloomy thoughts. Hosea promises that in the future, when Israel has repented, the evil omen shall be nullified, and a much later prophetic writer (Is. *l.c.*) that the valley of Achor shall become *a* resting-place of flocks. Early legend connected the name with the sin of Achan the 'troubler' of Israel (Josh. 7 24-26†, *JE*). Many (*e.g.* Grove, very positively, in Smiths *DB*) have identified the valley with the Wādy el-Kelt, which leads down through a stupendous chasm in the mountains to the plain of the Jordan, and is, to unromantic observers, dark and dismal. This wādy, however, is scarcely lifeless enough to he Achor, for its slender torrent-stream rarely dries up. It is also scarcely broad enough; it would never have occurred to the most ecstatic seer that flocks could lie down in the Wādy el-Kelt. Some other valley must be intended. According to the *OS* (217 25 89 34) the valley was to the N. of Jericho, and its old name still clung *to* it. This cannot be reconciled with the statement in Josh. *l.c.* respecting the N. boundary of Judah.

ACHSAH (עַכְסָה, § 71, 'anklet'; ασχα [B], αχσα [AL]), according to Josh. 15 16-19, and (αζα [B], ασχα [B^ab mg.A]) Judg. 1 12-15 (cp 1 Ch. 2 49; AV **Achsa**, οξα [L]), a daughter of Caleb, who offered her in marriage to the conqueror of Kirjath-sepher. She was won by his younger brother Othniel. At her petition, because her home was to be in the dry southland (Negeb), Caleb bestowed upon her certain coveted waters called the Upper and the Lower Golath (see below). The simple grace of the narrative holds us spell-hound; but we must not, with Kittel (*Hist.* 1 299), pronounce the story historical on this account. That some clans should have been named after individuals is not inconceivable; but it is most improbable that we have any true traditions respecting the fortunes of such possible individuals, and it would be throwing away the lessons of experience to admit the lifelikeness of a narrative as an argument for its historicity. According to analogy, Achsah must represent a Kenizzite clan, allied in the first instance to the Calebites of Hebron, but also, very closely, to the clan settled at Debir and called Othniel; and the story arose in order to justify the claim of the Achsah clan to the possession of certain springs which lay much nearer to Hebron than to Debir (so Prof. G. F. Moore, on Judg. 1). That the cause is amply sufficient, can hardly be denied (cp the Beersheba and Rehoboth stories in Genesis). It only remains to discover the right springs. We know where to look, having identified Debir with the highest degree of probability. And our search is rewarded. In all other parts of the district the water supply is from cisterns; no streams or springs occur. But about seven miles (Conder) N. of *ed-Ḍāherīyeh* (the true Debir), and near Van de Velde's site for Debir (*Kh. ed-Dilbeh*), are beautiful springs (worthy of being Achsah's prize), which feed a stream that runs for three or four miles. and does not dry up.[1] The springs, which are fourteen, are in three groups,

[1] According to information received from Mr. F. C. Conybeare, there are two Armenian recensions, the earlier of which appears to be in some respects more primitive than the Syriac. There is also, probably, a Georgian version.

[1] *PEF Mem.* 3 302; see also GASm. *Hist. Geog.* 279 (cp p. 78), who speaks of only two springs.

and the two which are nearest to the head of the valley may be presumed to be the Upper and Lower Golath. · The identification is certainly a valuable one. See, further, GOLATH-MAIM.

ACHSHAPR (אַכְשָׁף, *i.e.* 'sorcery' ; αζειφ [B], αχcαφ [A], αχαc [L]), one of the unknown sites in the book of Joshua. It lay, according to P, on the border of the Asherite territory (Josh. 19 25 ; κεαφ [B]). Its king (if the same Achsbaph is meant) joined the northern confederation under Jabin, king of Hazor (11 1 ; αχιφ [A], αχειβ [F], [βασιλεα] χασαφ [L]); and shared the defeat of his allies (12 20). Rob. (*BR*, 4 55) connects it with the modern Kesāf, a village near the bend of the river Līṭāny where there are some ruins of uncertain date ; this identification would suit Josh. 11 1, but not 19 25. Maspero, on the other hand, followed by WMM (*As. u. Eur.* 154, cp 173), identifies Achshaph with the *Aksap* of the name-list of Tbotmes III. (*RP*(2), 5 46). In this part of the list, however, there are names of localities in the region of Jezreel, which is outside the land of Asher. Flinders Petrie (*Hist. of Eg.* 2 326) connects Aksap with *'Asāfeh*, 9 m. SSW. of Jeba, which is hazardous. At any rate there were probably several places noted anciently for their sorcerers and therefore called Acbshaph. The form κεαφ (see above) has suggested a most improbable identification with Haifa (*PEF Mem.* 1 165). The statement of Eus. in OS, 218 54 *ff.* (ακσαφ) is geographically impossible.

ACHZIB (אַכְזִיב ; probably 'winter-torrent ').

1. A town of Judah in the Shephēlah, mentioned with Ke'ilah and Marēshah, Jos. 15 44 (ακιεζει κ. κεζειβ [B], αχζεκ [A], αχζειβ [L]), also Mic. 1 14†, where 𝔊BAQ, losing the intended paronomasia, renders 'the houses of Achzib' οἴκους ματαίους. The name becomes CHEZIB (כְּזִיב; Samar. text, Chazbab; χασβι [AEL]) in Gen. 38 5†, where the legend presupposes that Chezib is the centre of the clan of Shelah ; and since in 1 Ch. 4 22† 'the men of Cozeba' (כֹּזֵבָא ; χωζηβα [AL] ; but σωχηθα [B], cp σωχα = Socoh) are said to belong to the same clan, we may safely recognise COZEBA (so RV ; AV CHOZEBA) as another form of the same name. The name may perhaps linger in *'Ain el Kezbeh*, between Yarmiik (Jarmuth) and Shuweikeh (Socoh), but to the E. of both (*So*GASm., after *PEF Mem.* 3 36). Conder's identification of Cozeba with the ruin of Kuweiziba, 2½ m. NE. of Halhiil towards. Hebron (*PEF Mem.* 3 313) is therefore superfluous. Buhl wisely doubts the proposal to identify it with Ḳuṣṣābe SE. of Tell el-Hesy (*Pal* 192).

2. A Canaanite town, 9 m. to the north of Accho, like which city it was: claimed but not conquered by the tribe of Asher, Josh. 19 29 (εχοζοβ [B], αχζειφ [A1], αζειφ [A''], αχαζειβ [L]), Judg. 1 31† (ασχαζει [BL], -χενδει [A]). Sennacherib mentions Akzibi and Akku together in the Taylor inscription (*RP*(2) 6 88). Achzib (Aram. *Achdib*) is the Ecdippa, ἔκδιππα, of *OS*, 95 13 224 77, the εκδιππων [*BJ* 1 13 4], εκδειπους (*Ant.* v. 1 22, where it is said to have been also called ἄρκη) of Jos., the modern *ez-Zīb*. T. K. C.

ACIPHA (αχειβα [B]), 1 Esd. 5 31† AV = Ezra 2 51, HAKUPHA.

ACITHO (ακιθω [A]), Judith 8 1†. RV, AHITUB (*q.v.*, 4).

ACRA (ακρα [AℵV]), 1 Macc. 1 33 etc., AV 'stronghold,' RV 'citadel.' See JERUSALEM.

ACRABBIM (עַקְרַבִּים), Josh. 15 3†, RV AKRABBIM.

ACRE (צֶמֶד, ζευγος in Is.; for 𝔊 in 1 Sam. cp We. Dr. *ad loc.*), Is. 5 10, 1 S. 14 14 AV mg. RV. The Heb. word seems to denote the amount of land which a span or YOKE [*q.v.*] of oxen could plough in the course of a day (cp below) ; perhaps, like the Egyptian ἄρουρα, it ultimately became a fixed quantity (cp Now. *Arch.* 1 202). Even at the present day the fellāḥīn of Palestine measure by the *faddān* (= Syr. *paddānā* 'yoke' ; cp *ZDPV* 4 79) ; cp also Lat. *jugum, jugerum.* The term is not restricted, to arable land, being applied in Is. *l.c.* to a vineyard. Winckler, however (*AOF*, 2nd ser., 2 90), derives *ṣemed* from Bab. *ṣamādu* (= *šaḳālu*) to weigh, properly to measure off (which is at any rate barely possible), and attempts to show that *ṣemed* in Is. can denote only a liquid measure (which is by no means obvious). See WEIGHTS AND MEASURES.

Apart from scanty notices supplied by the N T epistles, this book is our only source for the history of Christianity during its first thirty or thirty-five years. The question of its trustworthiness is, therefore, of fundamental importance.[1]

1. The 'We' sections or Journey Record.

The sections in which, as an eye-witness, the writer gives his narrative in the first person plural (16 10-17 20 5-15 21 1-18 27 1-28 16) may be implicitly accepted. But it may be regarded as equally certain that they are not by the same writer as the other parts of the book. In the sections named, the book shows acquaintance with the stages of travel of almost every separate day, and with other very unimportant details (20 13 21 2 *f.* 16 28 11, etc.) ; outside these limits it has no knowledge even of such an important fact as that of Paul's conflicts with his opponents in Galatia and Corinth, and mentions only three of the twelve adventures catalogued so minutely in 2 Cor. 11 24 *f.* cp 23 (Acts 14 19 16 22 23 *f.*). Even had the writer of the book as a whole (assuming him to have been a companion of Paul) been separated from the apostle — remaining behind, *e.g.*, in Macedonia during the interval between 16 17 and 20 5 — he would surely afterwards have gathered the needful details from eye-witnesses and embodied them in his book, instead of satisfying himself with such extraordinarily meagre notes as we have in 18 21-23 20 1-3 or 16 5-8. Even were be following an old journal, he could never have passed over so many important matters in silence simply because they were not to be found in his notes. Further, be contradicts the Epistle to the Galatians so categorically (see GALATIANS, EPISTLE TO, § 5 *f.*, and COUNCIL OF JERUSALEM) that, if we assume his identity with the eye-witness who writes in the first person, we are compelled (see below, § 6) to adopt one of two courses. We must either make Galatians non-Pauline or pronounce the writer of Acts as a whole to be a 'tendency' writer of the most marked character — hardly less so than a post-apostolic author who should have simply invented the 'we' sections. To suppose that the 'we' sections were invented, however, is just as inadmissible as to question the genuineness of Galatians. If the sections had been invented, they would not have been so different from the rest of the book. We must therefore conclude that the sections in question come from a document written by an eye-witness, the so-called 'we' source, and that this was used by a later writer, the compiler of the whole book.

It is upon this assumption of a distinct authorship for

[1] On title see below, § 3 n.

the 'we' sections that we are best able to pass a comparatively favourable judgment on the compiler's deviations from historical facts in other parts of the book. But there is one charge from which he cannot be freed, viz., that he has followed the method of retaining the 'we' without change. In the case of so capable a writer, in whom hardly a trace can be detected, either in vocabulary or in style, of the use of documents, this fact is not to be explained by lack of skill, such as is sometimes met with in the Mediæval chroniclers. The inference is inevitable that he wished—what has actually happened—that the whole book should he regarded as the work of an eye-witness. An analogous case is to be found in the 'I' taken over from the Memoirs of Ezra and Nehemiah (Ezra 7 27-8 34 91-15; Neh. 1 1-7 5 12 31 13 6-31; also in Tob. 13-36, and in *Protevangelium Jacobi*, 18 *f.*). Just as Ezra 10 and Neh. 8, as well as the sections just mentioned, must be held to rest on those Memoirs, although modified and with the 'I' dropped out, so in Acts we may assume much other matter to have been drawn from the source from which the 'we' sections are derived. Any attempt, however, to assign to this source whole sections of the book not having the 'we,' and to use the conclusion so gained as a proof of the trustworthiness of everything thns assumed to belong to it, must he postponed until this trustworthiness has been investigated by the means otherwise at our command.

In this investigation we begin with certain obvious inaccuracies—first of all with those which cannot be traced to the influence of any tendency. Let us take the manifestation of Christ to Paul near Damascus. According to 22 9 his companions see the light from heaven but do not, hear the voice of Jesus; according to 9 7 they hear the voice but see no one and do not fall down; according to 26 12-18 they fall down indeed with Paul, but it is he alone who sees the heavenly light, and hears the voice. This last account, moreover, represents him as having received at the time an explanation of what had occurred; according to 22 14 *f.*, he did not receive the explanation until afterwards, through Ananias.

2. Inaccuracies uninfluenced by tendency.

Further inconsistencies of statement are to he found when we compare the explanation of the departure from Jerusalem in 9 26-30 with that in 22 17-21; the account in 10 44 (ἔτι) with that in 11 15 (ἄρξασθαι); the explanation of the offering in 21 20-26 with that in 24 17 *f.*, the accounts in 21 31-34 22 23-29 23 27 with 28 17, according to which Paul was, in Jerusalem, a prisoner of the Jews and not as yet of the Romans; the occasion of the appeal to Cæsar in 25 9-11 with that in 28 18 *f.* The liberation of Paul and Silas from prison at Philippi (16 23-40) is not only a very startling miracle (with resemblances to what we read in Euripides, *Bacchæ*, 436-441, 502 *f.*, 606-628 [cp Nonnus, *Dionysiaca*, 45 262-285], and as regards Acts 16 35-39, in Lucian, *Toxaris*, 27-33), hut is scarcely reconcilable with 1 Thess. 2 2, where the language of the apostle hardly suggests that his 'boldness in God' was in any measure due to an occurrence of this kind.

So much for inaccuracies that cannot be attributed to any tendency on the part of the writer. There are others—and these of much greater importance—which can only be so explained. Before discussing these, let us ascertain clearly what the tendency of the writer is.

Every historian who is not simply an annalist must have 'tendency' in the wider sense of that word. His trustworthiness is not necessarily affected thereby: indeed, it has actually been urged by one of the apologists for Acts,[1] as an argument for the trustworthiness of the book, that it was designed to be put in as a document at the trial of Paul, and was written entirely with this view—a position that cannot, however, be made good. Now, it is clear that the book does not profess to be a history of the first extension of Christianity, or of the Church in the apostolic age: it covers really only a small portion of this field. It is equally certain that the title πράξεις (τῶν?) ἀποστόλων does not express the purpose of its author, who relates hardly anything of James and John, and of nine of the apostles mentions nothing but the names.[1] Neither is the hook a history of Peter and Paul, for it tells also of John, of both the Jameses, of the deacons, of Stephen, Philip, Apollos, and others. Nor is it a history of the spread of the gospel from Jerusalem to Rome; for the founding of the Roman church is not described but presupposed (28 15). and all that has any interest for the writer is the arrival there of Paul (19 21 23 11). It is often supposed that the aim of the book is expressly formulated in 1 8, and that the purpose of the author was to set forth the spread of Christianity from Jerusalem, through Samaria, and to the ends of the. earth. This is much too indefinite to account either for the difference in scale of the various narratives, sometimes so minutely detailed and sometimes so very vague, or for their marked divergences from actual history.

3. Tendency of the book.

It is, therefore, no prejudice on the part of critics, but the nature of the book itself, that leads us to ascribe tendency to the writer. Only (1) we must not, with the Tübingen School, consider it 'conciliatory.' According to that view, Acts was an attempt from the Pauline side, by means of concessions, to bring Judaism to a recognition of Gentile Christianity. A reconciliation of the two was thus to be effected in face of the danger that threatened both, from Gnosticism on the one side and from state persecution on the other. This cannot have been the purpose. Acts is much too harsh towards non-Christian Jews, for whom Christian Jews continued to retain a certain sympathy (2 23 7 51-53 18 5 *f.* 12-17 19 13-16 21 27-36 23 12-15, etc.); besides, most of the details which it gives have no relation to any such purpose. The main point on which the supposed reconciliation turns, the Apostolic Decree (15 28 *f.*), is to be explained otherwise (*see* COUNCIL OF JERUSALEM, § 10). (2) On the other hand, the book is not a mere apology for Paul. If it were, much of its contents would be unsuitable (*e.g.*, the enumeration of the conditions required in an apostle [1 21 *f.*], which were not fulfilled in Paul); it does not even give such a view of the personality of Paul as the facts known to us from the epistles demand (see below, §§ 7, 14). There remains only (3) one other possible view of the author's tendency. His aim is to justify the Gentile Christianity of himself and his time, already on the way to Catholicism, and he seeks to do this by means of an account of the origin of Christianity. The apostles, including Paul, are the historical foundation of Christianity, and 4 32 *a*, where we are told that all Christians were of one heart and soul, may be regarded as forming a motto for the book.

A whole series of demonstrable inaccuracies becomes comprehensible when viewed as resulting from this tendency. Paul never comes into conflict with the original apostles or their followers as he does in Gal. 4 17 5 7 10 12; 2 Cor. 10 14 *f.* 11 13-15 18-23.

4. Inaccuracies resulting from this tendency.

The one misunderstanding (Acts 15) that arises is cleared away by the original apostles; the attempt to enforce the circumcision of Titus (Gal. 2 3-5)—nay, the whole personality of Titus—is just as carefully passed over in silence as are the dispute with Peter at Antioch (Gal. 2 11-21; see COUNCIL OF JERUSALEM., § 3) and the Jndaising plots to impose on the Galatians and Corinthians another Gospel, that of circumcision (Gal. 1 8 *f.* 6 12 *f.*), and another Christ (2 Cor. 11 4 *f.*). Apart

[1] Aherle, *Tüb. Theol. Quartalschr.* 1863, pp. 84-134.

[1] It is not to be inferred from the absence of the article from the title in good MSS (πραξεις αποστολων [BD]) that the author meant to say that it was with the acts of only some of the apostles that he proposed to deal; for it would he very strange that he should admit such an incompleteness in the very title of his work. The article before ἀποστόλων is omitted because πράξεις is without it; and that is so simply because such is the usual practice at the beginning of hooks (cp Mt. 1 1 Acts 1 1 and see Winer (8), § 19 4, 10). Since therefore no form of the title can he assigned to the author of the book we conclude that the title must date from the time when the book was first united with others in one collection—its first occurrence is in the last third of the second century (Mur. Fragm. Tert. Clem.Al.). The simple πράξεις [א], common since Origen, is meaningless as an original title, and intelligible only as an abbreviation.

from the Gentiles, who seldom show hostility to Paul (14 5 16 16-23 19 23-41), it is (notwithstanding the end of 2 Cor. 11 26) only at the hands of non-Christian Jews that Paul meets with difficulties (13 45 18 6 19 9 28 24) or persecutions (9 23 *f.* 29 13 50 14 2 5 19 17 5-8 13 18 12 *f.* 20 3 19 21 27-36 23 12-21 24 1-9 25 2-9 24). For further illustrations of the operation of this tendency in the writer of Acts see SIMON and BARJESUS.

On the other hand, Paul brings forward nothing whatever in which the original apostles had not led the way: far from going beyond them at all, he appears to be entirely dependent on them.

His journeys to Arabia, Syria, and Cilicia (Gal. 1 17 21) are passed over in silence, and thus it is made out that not he but Peter gains the first Gentile convert, for Cornelius, in opposition to 10 2 22 35, where he is a semi-proselyte is represented in 10 28 45 11 1 18 15 7 as a pure Gentile. (Historically, however, after Peter had, in face of the doubts of the primitive church, so completely, and as a question of general principle, justified the reception of Cornelius into the Christian community without his being subjected to the requirements of the Mosaic law, as is related in 11 1-18, the question that led to the Council of Jerusalem could never again have sprung up.)

Again, whenever Paul comes into a strange city, he seeks (as we should expect him to do) to establish relations first of all with the synagogue, since, through the proselytes who might he looked for there, he could obtain access to the Gentiles: our view agrees also with Rom. 10 18-21. According to Acts, however, in almost every place where Paul betakes himself with his message to the Gentiles as distinct from the Jews, he has to purchase anew the right to do so, by first of all preaching to the Jews and being rejected by them (13 14 45 *f.* 18 4-6 19 8 *f.* 28 17 24-28). The only exceptions to this rule are Berœa (17 10-12), Paphos, Lystra, and Athens (13 6 14 7 17 17)—where the narrative passes at once to a quite singular incident—and towns so summarily dealt with as Derbe and Perga (14 21 25), along with Iconium, where Gentiles are brought to Christianity through the sermon in the synagogue (14 1). In 28 17-28, in order to make the right to preach to the Gentiles dependent on the rejection of the gospel by the Jews, the very existence of the Christian church, already, according to 28 15, to be found in Rome, is ignored. Such a dependence of Paul's life-work—his mission to the Gentiles—on the deportment of the Jews, and that too in every individual city, is quite irreconcilable with Gal. 1 16 2 7 *f.*, and with the motives which the author himself indicates in Acts 13 47 28 *&*, as well as with 9 15 26 17 *f.*

After the appearance of Jesus himself to Paul near Damascus, the apostle has yet further to be introduced to his work by human agency (in the first instance by Ananias [9 6 10-19 22 10 14-16], and subsequently [11 25] by BARNABAS [*q.v.*], a member of the original church), and this happens after the church of Antioch—the first Gentile Christian Church, and Paul's first important congregation—had already been founded by Christians from Jerusalem (11 20-24). (Both of these statements are contradicted by Gal. 1 16; the latter of them also by the order in which Syria and Cilicia are taken in Gal. 1 21.) Moreover, at the COUNCIL OF JERUSALEM (*q.v.* § 6) Paul has only to give in a report and to accept the decisions of the primitive church.

The tendency we have pointed out throws light also on the parallel (which is tolerably close, especially where miracles are concerned) between the acts and experiences of Peter and of Paul.

Both begin by healing a man lame from birth (3 2-10 = 14 8-10), and go on to the cure of another sick man (9 33 *f.* = 28 8); they heal many men at once, both directly (5 16 = 28 9) and mediately (5 15 = 19 12), besides doing signs and wonders generally (2 43 5 12 = 14 3 15 12 19 11); both bring a dead person to life (9 36-42 = 20 9-12); both perform a miracle of judgment (5 1-10 = 13 6-11); both, by the laying-on of hands, confer the gift of the Holy Ghost (8 14-17 = 19 1-7), and in doing so also impart the gift of tongues (10 44-46 = 19 6); both have a vision corresponding with one experienced by another man (10 1-22 = 9 3-16); both are miraculously delivered from prison (5 18 *f.* 12 3-11 = 16 23-34); both are scourged (5 40 = 16 22 *f.*); both decline divine honours in almost identical words (10 25 *f.* = 14 11-18, cp 25 6).

The life of Paul included many more incidents of this kind than that of Peter; but from what we have already observed we can understand how the author's wish not to allow Peter to fall behind Paul must have influenced the narrative. Still, he has by no means wholly sacrificed history to his imagination; had this been so, he would certainly have brought his narrative into much closer agreement with his own ideals. He has not, for example, introduced in the case of Peter, as in that of Paul, a stoning (14 19), or threats against life (9 23 *f.* 29 14 5), or an exorcism (16 16-18). And in like manner the omission of many of the items enumerated in 2 Cor. 11 23-27 12 12 may be explained, at least in part, by the supposition that he had no definite knowledge about them. He has, it would seem, at least in the main, confined himself to matter preserved by tradition, merely making a selection and putting it into shape.

5. Subsidiary tendencies. The author has two tendencies in addition to the religious-theological one.

1. There is first the *political* tendency, the desire to say as little as possible unfavourable to the Roman civil power.

In the Third Gospel we already find Pilate declaring that he finds no fault in Jesus, and he has this judgment confirmed by Herod, who in the other gospels is not mentioned at all in connection with the examination of Jesus. Pilate declares thrice over that he will release Jesus, and he is prevailed upon to pass adverse sentence only by the insistence of the Jews (Lk. 23 1-25). In Acts (which has even been regarded by some as an apology for Christianity intended to be laid before Gentiles; see above, § 3 n.), the first converts of Peter and Paul are Roman officers (10 1 13 7), while it is the Roman authorities who definitely declare Paul to be no political criminal as the Jews would have it (18 14 *f.* 19 37 23 29 25 18 *f.* 26 31 *f.*); it is by them also that he is protected (in more than one instance at any rate) from conspiracies (18 12-17 19 31 21 31-36 23 10 22-33 25 2-4).

When this political tendency is recognised, the conclusion of the book becomes intelligible. Otherwise it is a riddle. Even if the author meant to add still a τρίτος λόγος (third treatise)—which is pure conjecture—he could not suitably have ended the δεύτερος λόγος (second treatise) otherwise than with the death of Paul: that he did not survive Paul is even less likely than that he was otherwise interrupted at this point of his work. When we take account of this political tendency, however, 'none forbidding him' (ἀκωλύτως) is really a skilfully devised conclusion. The very last word thus says something favourable to the Roman authorities, and, in order not to efface this impression, the writer leaves the death of Paul unmentioned.

2. Secondly, he has in his mode of narration an *æsthetic* as well as a political tendency: he aims at *being graphic.*

This end is promoted very specially by the 'we,' and the details, otherwise purposeless, appropriated from the Journey Record; but it is also served by much in chaps. 1-12 that, without having any claim to be regarded as historical, contributes to the enlivening of the picture of the primitive Christian community (see below, § 13); also by the speeches (see § 14), and particularly by the miracle-narratives, which in almost every case where they are not derived from the 'we' document (see § 8) are characterised by touches of remarkable vigour (1 9-11 2 1-13 43 3 1-11 5 1-11 12 15 *f.* 17-25 6 8 8 6 *f.* 13 39 *f.* 9 3-19 33-42 10 1-22 12 3-11 13 11 14 3 8-13 16 23-34 19 11 *f.*).

The total influence of all these tendencies not having been so great as to lead the author wholly to disregard the matter supplied to him by tradition,

6. Total effect of these tendencies on the history. it has often been supposed possible to affirm that he had no such tendencies at all. The inaccuracies of the book are in this case explained simply by the assumption that the writer was not in possession of full information, and that, in a naïve yet still unbiassed way, he first represented to himself the conditions of the apostolic age, and afterwards described them, as if they had been similar to those of his own, when the conflict of tendencies in the primitive Christian Church had already been brought to an end. Certain it is that in his unquestioning reverence for the apostles, it was impossible for him to conceive the idea of their having ever been at variance with one another. On the other hand, it cannot possibly be denied that he must at the same time have either passed over accounts that were very well known to him or completely changed them. It is hard to understand how any one can airily say that to this writer, a Paulinist, the Pauline epistles remained unknown. Paradoxical as it sounds, it is certainly the fact that such a lack of acquaintance would be more easily explicable had he been a companion of Paul (a supposition which, however, it is impossible to accept; see above, § 1) than it is on the assumption that he lived in post-apostolic times. It is conceivable, though not probable, that Paul might sometimes have been unable to communicate his epistles to his companions

before sending them *off*. But a companion of Paul would at least he familiar with the events which are recorded in the epistles — events with which the representation in Acts is inconsistent. If we ark not prepared to declare the whole mass of the Pauline epistles to be spurious, and their statements about the events to which they allude unhistorical, there is no way of acquitting the writer of Acts from the charge of having moulded history under the influence of 'tendency.' Only this tendency must be understood as being simply a consistent adherence to the view of the history that he had before he studied his sonrces.

The tendencies of the author once established in regard to points where his historical inaccuracy admits of definite proof from a trustworthy source, one may perhaps found on them presumptions in regard to matters that admit of no such control. Did Paul circumcise Timothy (16 3)? Since Timothy's mother is called a Jewess, and Paul held the principle laid down in 1 Cor. 9 20, it is impossible to deny categorically that he did. Nevertheless, it remains in the highest degree improbable, especially after Paul had, just before (Gal. 2 3-5), so triumphantly and as a question of principle, opposed the circumcision of Titus. The difficulty of the case is not much relieved even by the supposition that the circumcision happened *before* the Council of Jerusalem, and only on account of the Jews of that place (16 3) and therefore, notwithstanding the statement of the same verse, not with a view to the missionary journeys. Again, did Paul take a Nazirite vow? We leave 18 18 out of account, since the text does not enable us clearly to decide whether that assertion concerns Paul or Aquila, and since a Nazirite could shave his head only in Jerusalem. In 21 20-26, however, Paul is represented as having taken such a vow, not only without waiting for the minimum period of thirty days required by traditional law (21 27 24 1 11, cp Jos. *BJ* ii. 15 1 [§ 313]; Num. 6 13-21; see NAZIRITE), hut also, and above all, with the expressly avowed purpose of proving that the report of his having exempted the Jewish Christians of the Diaspora from obligation to the ceremonial law was not true, and that he himself constantly observed that law (cp 28 17). This would, for Paul, have been simply an untruth, and that, too, on a point of his religious conviction that was fundamental (Gal. 4 9-11; Rom. 10 4, etc.). Just as questionable, morally, would it have been had he really described himself, especially before a court of justice (23 6, cp 24 21 26 5-8 28 20), simply as a Pharisee, asserted that he was accused only on account of the doctrine of the resurrection of the dead, and held his peace about his Christianity.

7. Possible further influences of tendency.

In view of the tendencies that have heen pointed out, there is. unhappily, some room for the suspicion that the author has not held himself bound to appropriate the 'we' source in its integrity. This is indeed made antecedently probable bv the fact that he has already in the Third Gospel passed over much that lay before him in his sources, and that the sections of the Journey Record actually adopted supply for the most part only superficial notices of the stages passed, or miracle stories. Add just in proportion to the freedom of the latter from legendary embellishments (16 16-18 20 9-12 28 3-9), and to their credibility even in the eyes of those who wholly reject the supernatural (although, of course, the narrators thought them miraculous), must be our regret at every instance in which the Journey Record has been set aside, or even in which its words (as has been conjectured to be sometimes the case; see above, § 1) are not reproduced exactly.

8. The Journey Record: *a.* its treatment.

This free treatment of the Journey Record increases the difficulty of ascertaining who was its author. Had the record been adopted intact, we should have been certain that it was not composed by any of those who appear among the companions of Paul in the sections where the narrative 'we' does not occur. But this means of solution is out of the question. And if the source came into the hands of the author of Acts as (let us say) an anonymous document, or if, in the interest of greater vividness, he used the 'we' without regard to the person originally meant, he may also at the same time have spoken of the writer of the Journey Record in the third person, even when he was otherwise following the document. Yet 20 5 is a strong indication that by the 'we' he does not wish us to understand any one at least of the seven mentioned in the immediately preceding verse. Thus the text at all events gives nowhere any ground for thinking of *Timothy*, who, moreover, is mentioned in 17 14 *f.* 18 5 in the third person. If we are to regard the record as coming from *Silas*, the author of Acts must have used it-without the 'we,' and, in a very fragmentary way indeed, for long periods during which, according to his own statement (15 40 16 19 25 29 17 4 10 18 5), Silas was with Paul. This, though not quite impossible, is very unlikely. Moreover, Silas is never again mentioned in Acts after 18 5; neither, from the same period — that of Paul's first stay in Corinth (2 Cor. 1 19)—is he again mentioned in the Pauline Epistles; and in 1 Pet. 5 12, he appears by the side of Peter. Whoever attributes the Journey Record to *Titus* must in like manner assume that much of it has been either not used at all or used without the 'we.' For Titus was with Paul at the time of the Council of Jerusalem (Gal. 2 1), and continued to he his companion at least during the latter part of the three years' stay at Ephesus, as also during the subsequent stay in Macedonia (2 Cor. 2 13 7 6 8 16 *f.* 23 12 18[1]). Besides, the writer of Acts would use a work of Titus somewhat unwillingly, for he completely suppresses his name (see above § 4[2]). Still, if so valuable a writing by Titus had been really available, the author of Acts would scarcely have completely neglected it.

9. *b.* Its author.

If it is thus just possible that Titus wrote the Journey Record, it is perhaps still more conceivable that it was written by ***Luke.*** In this way we should best he able to explain how, ever since the time of the Muratorian Fragment and Irenæus (*Adv. Haer.* iii. 14 1), the entire book of Acts as well as the Third Gospel came to be ascribed to him. It is true that, in the Pauline Epistles, the first mention of Luke is in Col. 4 14; Phil. 24; 2 Tim. 4 11 — in other words, not before Paul's imprisonment and the closing years of his life. Nevertheless, he may have been one of Paul's companions at an earlier period, if we are allowed to suppose that he occupied a subordinate position. The most suspicious fact is that, whilst Luke (see LUKE), if we may trust Col. 4 11 14, was, like Titus (Gal. 2 3), uncircumcised, the writer of the Journey Record not only uses Jewish specifications of date (Acts 16 13 20 6 *f.* 27 9), and goes to the synagogue or the Jewish place of prayer (16 16), but also includes himself (16 13) among those who taught there (Ἰουδαῖοι, 16 20, must not he pressed, as it may rest on an error on the part of the speakers; cp 16 37). We must thus, perhaps, abandon all attempt to ascribe the Journey Record to any known companion of Paul.

Other sources for Acts, in addition to that just mentioned, have long been conjectured: *e.g.* a Barnabas source for chap. 13 *f.* Here the naming over again of Barnabas and Saul, and the omission of John Mark (13 1), notwithstanding 12 25, are indeed remarkable, as are also

10. Other Sources.

1 Add to this that, if 2 Tim. 4 10 is to he taken as accurately preserving an incident in Paul's imprisonment at Cæsarea, it could hardly have heen Titus that accompanied Paul to Rome (Acts 27 28). The notices in the epistle to Titus are too untrustworthy to serve as a foundation for historical combinations.

2 It is just as incorrect to suppose that he is named in Acts 18 7 as it is to identify him with Silas.

the circumstance that, apart from 11 30 12 25 15 12 25, it is precisely in these two chapters that Barnabas is often (13 2 7 14 14; contrast 13 43 46 50 14 20) mentioned before Paul, and that it is only here (14 4 14) that Paul (with Barnahas) is called an 'apostle' (see APOSTLE).

Of primary importance would be the establishment of sources for chaps. 1-12.

Many traces of distinct sources can be detected. In addition to what is said under GIFTS, SPIRITUAL, and under COMMUNITY OF GOODS, §§ 1-4 two themes had been long recognised as running through the speech of Stephen: viz. refutation of the idea that the blessing of God depended on the possession of the temple (7 48-50), and censure of the national rebellion of the people against the divine will (7 51-53). The stoning of Stephen, moreover, is narrated twice (7 58*a* and 59*a*), in a very confusing way, and his burial does not follow till 8 2, after the mention of the great persecution and the flight of all the Christians except the apostles (8 1*bc*). In 8 3, the persecution is resumed, hut, as in 8 1*a*, only Saul is thought of as persecutor. The mention of Saul seems thus throughout (7 58 6 8 1*a* 3) to be a later insertion into a source in which he was not originally named. Resides, 8 1*bc* seems also to be an interpolation into the account of the last hours of Stephen. In as far as this interpolation speaks of the dispersion of the Christians it is continned in 11 19, while 8 4 may easily be an ingenious 'transition of some editor leading up to the story of Philip. 11 19 is further followed by the statement (11 22) that the church at Jerusalem elected a ***delegate***. This representation of the right of the church to elect delegates, which is found also in 6 5, seems to he more primitive than that in 8 14, according to which such an election was made by the apostles. Further in 8 15-17 the apostles are raised to a rank unknown to the 'earliest times. For, that Christians did not receive the Holy Ghost by baptism, hut only through subsequent laying-on of hands, and those the hands of the apostles, is disproved by Gal. 3 2 4 6, and even by the presupposition underlying Acts 19 2 *f.*, although the same notion reappears shortly afterwards (19 6). In like manner, finally, the words 'except the apostles' (8 1) may have been subsequently inserted, to preserve the dignity of the apostles and the continuity of their rule in Jerusalem. In 11 30 the friendly gifts destined for distribution during the famine come into the hands of the presbyters, not, as 6 1-6 would have led us to expect, into those of the deacons.

Observations such as the preceding have of late been expanded into comprehensive theories assigning the whole book to one source or to several sources, with additions by one editor or by several editors.

11. Theories as to Sources.

So R. Weiss, *Einl. in das NT* (1886, 3rd ed. '97), § 50, and ***Ap.-gesch.***, **1893** (vol. 9, pts. 3 and 4, of Gebhardt and Harnack's *Texte u. Unters.*); Sorof, ***Entstehung der Ap.-gesch.* (1890)**; Ban Manen, *Paulus*, 1: ***de handelingen der Apostelen*** (1890); Feine, *Eine vorkanonische Ueberlieferung* **des *Lucas***, 1891 (only on chaps. 1-12), Spitta ***Ap.-gesch.***, 1891; Clemen, ***Chronol. der Paulin. Br.*** 1893 and' (for chaps. 1-5) in *St. Kr.*, **1895**, pp. 297-357; Joh. Weiss, **St. *Kr.***, **1893**, pp. 480-540, 'Das Judenchristenthum in der Ap.-gesch.', etc., and 1895, pp. 252-269, ' Die Chronol. der Paulin. Rr.'; Gercke in *Hermes*, **1894**, pp. 373-**392** (only on the first chapters); Jüngst, ***Die Quellen der Ap.-gesch.***, **1895**; Hilgenfeld, *ZWT*, **1895**, pp. 65-115, 186-217, 384-447, 481-517; 1896, pp. 24-79, 177-216, 351-386, 517-558.

No satisfactory conclusion has as yet been reached along these lines; but the agreement that has been arrived at upon a good many points warrants the hope that at least some conclusions will ultimately gain general recognition. It is certainly undeniable that this kind of work has sharpened the wits of the critics, and rendered visible certain inequalities of representation, joints and seams, even in places where they are not so conspicuous as in 7 58-8 4.

Thus the tumult in Thessalonica is told in 17 8 for a second time after 17 5 in a disturbing way that leaves it impossible to say who it was that the Jews were trying (17 5) to drag before the people, or why it was that Jason (17 5 *f.*), whose part in the affair does not become clear till 17 7, was brought before the authorities. It is probable that 13 52 originally followed immediately on 13 49. Similarly, the account of the wholesale miracles of the original apostles (5 12*a* 15 *f.*) is interrupted by the interpolation of a fragment (5 12*b*-14) which is itself not homogeneous. The least that could be done here would he to arrange as follows: 5 12*a* 15 16 14 12*b* 13. But that the text should have become so greatly disarranged by transposition is much less likely than the supposition of several successive interpolations. On 18 24-28 15 1-34, see APOLLOS, and COUNCIL OF JERUSALEM, §§ 4 5. In the latter passage (15 1-34) the attempt has been made, hy separation of sources, to solve questions to which otherwise only tendency-criticism seemed to provide an answer. Similarly in the case of 21 20*b*-26. After the presbyters have just praised God for the success of Paul's mission to the Gentiles (21 20*a*) the proposal that he should put it in evidence how strictly legal he is in his views follows with but little fitness. And had Paul been engaged in carrying out a Nazirite vow, it is hardly likely that his presence in the temple (21 27-29) could have led to an attempt on his life. A reason for this attempt is found (21 28 *f.*) in the alleged introduction of a Gentile within the sacred precincts of the temple, a proceeding which no one would guess to be simultaneous with the presentation of an offering. Since, moreover, for a Nazirite vow at least thirty days are necessary (see above, § 7), it has been proposed to detach 21 20*b*-26, and to refer the seven days of 21 27 to the duration of the feast of Pentecost which Paul, according to 20 16, was to spend in Jerusalem: 21 19 20*a* 27 *ff.* would then also, along with 20 16 and 21 1-18, belong to the Journey Record.

We come now to the question how far this distribution of the matter among various sources affects the credibility of the book. It is indeed true that, in the case last mentioned, the archaeological mistake of assigning only seven days for the Nazirite rites would become more comprehensible if we recognised a variety of sources; yet even so we should have to admit that there is an error, and that the editor had been guilty of the oversight of incautiously bringing the two accounts together. And he, as well as the source from which 21 20*b*-26 is perhaps taken, would still remain open to the reproach of having, under the influence of a tendency of the kind described above (§ 6), ascribed to Paul a repudiation of his principles of freedom from the law. It cannot be too strongly insisted that in as far as Acts, viewed as a homogeneous work, has to be regarded as a tendency writing, it is impossible to free it wholly of this character by distributing the matter among the various sources: the most that can be done is in cases of excessive misrepresentation to put this in a softer light. In general, however, the editor has dealt with his sources in so masterful a manner that an unlucky hit in the selection and arrangement of the pieces has but rarely to be noted. It has been a practice among some of the scholars enumerated above to claim absolute trustworthiness for the whole of an assumed source which they suppose themselves to have made out, irrespectively of the nature of some of the contents, as soon as they have found it trustworthy in some particulars. Such an abuse of discrimination of sources in the interest of apologetics is not only illegitimate: it speedily revenges itself. These very critics for the most part find themselves compelled to attribute to their secondary sources and their editors an extraordinary amount of ignorance and awkwardness. In particular, all theories according to which a single assumed source (of which the 'we' sections form part) is taken as a basis for the whole of Acts must from the outset be looked upon with distrust. There is nothing to suggest that any diary-writing companion of Paul also wrote on the beginnings of the church at Jerusalem, and, even if there were, any assumption that his information on such a subject would be as trustworthy as his assertions founded on his own experience, would be quite unwarranted.

12. Bearing of these theories on trustworthiness.

The results then with reference to the trustworthiness of Acts, as far as its facts are concerned, are these. Apart from the 'we' sections no statement merits immediate acceptance on the mere ground of its presence in the book. All that contradicts the Pauline epistles must be absolutely given up, unless we are to regard these as spurious. Positive proofs of the trustworthiness of Acts must be tested with the greatest caution.

13. Trustworthiness of narrative.

Ramsay thinks he has discovered such proofs in the accuracy with which geographical names and contemporary conditions are reproduced in the journeys of Paul *(Church,* 1894, 1-168; *St. Paul,* 1895). Some of the most important of these points will be considered elsewhere (GALATIA, §§ 9-13, 22). Of the other detailed instances many will be found to break down on closer examination.

For example, Ramsay goes so far as to say (*St. Paul*, chap. 11, 4): 'Aquila, a man of Pontus, settled in Rome, bears a Latin

name, and must therefore have belonged to the province and not to non-Roman Pontus. This is a good example of Luke's principle to use the Roman provincial divisions fur purposes of classification.' As if a Jew from non-Roman Pontus, settled in Rome, could not have assumed a subsidiary Roman name, as countless other Jews are known to have done! And as if Luke would not have found it necessary to call him Ποντικός even if he were from non-Roman Pontus !

But it is not necessary to go thus into details which might be adduced as proving the author's accurate acquaintance with localities and conditions. For Ramsay attributes the same accuracy of local knowledge also to one of the revisers of the text, assigned by him to the second century A.D., whose work is now preserved to us in D, and also to the author of one source of the *Acta Pauli et Theclæ* (§ 3), assigned by him to the second half of the first century, whose work, however, he declares to be pure romance *(Church*, 2 5 6 4). If so, surely any person acquainted with Asia Minor could, even without knowing very much about the experiences of Paul, have been fairly accurate about matters of geography, provided he did not pick up his information so late in the second century as to betray himself by his language, as according to Ramsay (23 64 [end] 5 [end] 759 83-6; *St. Paul*, see Index under 'Bezan Text') the above mentioned reviser, whose work lies at the foundation of D, has done. In point of fact, Weizsacker (*Ap. Zeitalter*, 239 *f.*, 2nd ed. 230 *f.*; ET 1 274 *f.*) thinks that in Acts 13 *f.* the account of the route followed does come from an authentic source, but yet that the contents of the narrative are almost legendary.

Such, for example, are the incidents at Paphos in Cyprus, 13 6-12 (see BARJESUS), also 13 14 46 *f.* 14 1 *f.*, spoken of above (§ 4); the speech in 13 16-41 (see below, § 14); the healing of a lame man, 14 8-10, recorded after the model of 3 1-11; the paying of divine honours to Barnabas and Paul, 14 11-13, after the manner of the heathen fables *(Philemon and Baucis*, in adjacent Phrygia, see Ov. *Met.*, 8 621 626 *f.*); and the institution of the presbyterial organisation, 14 23. In the first main division of the BOOK (1-12), great improbability attaches to the publicity with which the Christian community comes to the front, to the sympathy that it meets with even among the masses, although not joined by them (2 47 4 21 5 13), and to the assertion that only the Sadducees had anything against it, and they only on account of the doctrine of the resurrection (4 1 *f.*), while the Pharisees had given up all the enmity they had displayed against Jesus, adopting a slightly expectant attitude. See, further, BARNABAS, BARSABAS, GIFTS, COMMUNITY OF GOODS PHILIP, PETER, CORNELIUS, CHRISTIAN, and also, for the journeys of Paul to Jerusalem, and the attempted rearrangement of them, COUNCIL OF JERUSALEM, § 1.

But, after every deduction has been made, Acts certainly contains many data that are correct, as, for example, especially in the matter of proper names such as Jason (17 5), Titius Justus, Crispus, Sosthenes (18 7 *f.* 17), or in little touches such as the title πολιτάρχαι (17 6), which is verified by inscriptions[1] for Thessalonica, as is the title of πρῶτος (28 7) for Malta, and probably the name of Sergius Paulus as proconsul for Cyprus (13 7). Only, unfortunately, we do not possess the means of recognising such data as these with certainty, where confirmation from other sources is wanting.

14. Trustworthiness of speeches.

With regard to the speeches, it is beyond doubt that the author constructed them in each case according to his own conception of the situation. In doing so he simply followed the acknowledged practice of ancient historians. (Thucydides [i. 22 1] expresses himself distinctly on this point; the others adopt the custom tacitly without any one's seeing in it anything morally questionable.) This is clearly apparent at the very outset, in Acts 1 16-22.

It is not Peter who needs to recount these events to the primitive Church already familiar with them :[2] it is the author of Acts who feels called on to tell his readers of them. And it was only for the readers of the book that there could have been any need of the note that the Aramaic expression Aceldama belonged to the Jerusalem dialect, for that was the very dialect which the supposed hearers were using (cp. further THEUDAS, and JUDAS OF GALILEE).

The speeches of Paul in Acts embody a theology quite different from that of his epistles.

A thought like Acts 17 28 is nowhere to be found in the epistles. Paul derives idolatry, not, as in Acts 17 29 *f.*, from excusable ignorance, but from deliberate and criminal rejection of God (Rom. 1 18-32). Only in Acts 13 38 *f.* 16 31 20 28, do some really Pauline principles begin to make themselves heard. The most characteristically Pauline utterances come, in fact, from Peter (15 7-11), or even James (15 19; see COUNCIL OF JERUSALEM, § 8). The speeches of Paul, especially that in 13 16-41, are so like those of Peter in idea, construction, and mode of expression, that the one might easily be taken for the other. For example, Paul's speech in 13 38 *f.* resembles Peter's in 10 43. Or cp 3 17 13 *f.* (Peter) with 13 27 *f.* (Paul); 2 25-31 with 13 35-37; or ὁ δίκαιος for 'Christ' in 3 14 with 22 14, but also with Stephen's in 7 52. For the speeches of Paul, especially 13 16-41, show affinities also with that of Stephen : see 13 17-19 22 as compared with 7 2 6f: 36 45 *f.* In like manner, the apologetic discourses of Paul in his own defence betray clearly an unhistorical origin (see § 7).

In short, almost the only element that is historically important is the Christology of the speeches of Peter. This, however, is important in the highest degree. Jesus is there called παῖς θεοῦ—that is to say, according to 4 25, not 'son,' but 'servant' of God (3 13 26),—holy and righteous (3 14 4 27 2 27); he was not constituted Lord and Messiah before his resurrection (2 36); his death was not a divine arrangement for the salvation of men, but a calamity the guilt of which rested on the Jews (3 13-15 5 30), even if it was (according to 2 23 4 28) fore-ordained of God ; on earth he was anointed by God (4 27) with holy spirit and with strength, and he went about doing good and performing cures, but, according to 10 38, only upon demoniacs; his qualification for this is in the same passage traced to the fact that God was with him. God performed miracles through him (2 22). A representation of Jesus so simple, and in such exact agreement with the impression left by the most genuine passages[1] of the first three gospels, is nowhere else to be found in the whole NT. It is hardly possible not to believe that this Christology of the speeches of Peter must have come from a primitive source. It is, nevertheless, a fact sufficiently surprising that it has been transmitted to us by a writer who in other places works so freely with his sources. At the same time, however, the *Didaché* or Teaching of the Twelve Apostles, especially 9 *f.*, also bears evidence that in the second century, in spite of Paul, and of the Epistles to the Hebrews, to the Colossians, and to the Ephesians, and of the Gospel of John, an equally simple Christology still reappeared at least in many Christian circles. That the writer of Acts also respected it may be conjectured from the fact that he has not put into the mouth even of Paul any utterances that go beyond it (13 23 22 14).

15. Authorship.

It has already been repeatedly assumed in the preceding sections that the writer of Acts is identical with the writer of the Third Gospel. The similarity of language, style, and idea, constantly leads back to this conclusion. Differences of spirit between the two writings are so difficult to find that their existence at any time can be held only on the assumption of a subsequent revision of the Gospel, with a view to their removal, by the author of Acts. The most important divergence between the two books is that according to Acts 1 3 (cp 13 31) the ascension of Jesus did not occur till forty days after his resurrection, while according to Lk. 24 13 29 33 36 50 *f.*, as also the Epistle of Barnabas (15 9) and probably even Jn. 20 17, it was on the very evening of the resurrection. According to the original view, as indicated by the absence of any special separate mention of the ascension, in 1 Cor. 15 4-12; Rom. 8 34; Heb. 1 3 10 12 12 2; Eph. 1 20 2 5 *f.* 4 9 *f.*; 1 Pet. 3 19 22, and perhaps even also in Acts 2 32-35 (see οὖν 2 33) the resurrection and the ascen-

[1] A detailed discussion by De Witt Burton will be found in the *Amer. Journ. of Theol.*, 1898, pp. 598-632.

[2] Unless the passage be indeed a legendary development of Mt. 27 3-10.

[1] Such passages as Mk. 10 17 *f.* 3 21 13 32 6 5; Lk. 11 29-32; Mt. 16 5-12 11 5 *f.* 12 31 *f.* as contrasted with those in the same gospels which already present secondary reproductions of the same facts—viz., Mt. 19 16 *f.* 12 23 (ἐξίσταντο : see below, § 17 *i.*) 24 36 13 58 12 40 14 15-21; Lk. 7 21; Mk. 3 28-30.

sion were the same act, and all appearances of the risen Jesus were thought of as being made from heaven. Whether thisfollowsalso from 'goeth before' (προάγει) in Mk. 16 7 and in Mt. 28 7, maybedoubted. Inanycasethe forty days indicate a significant development of the idea, already at work in the Third Gospel, that before his ascension Jesus must have continued on earth to maintain intercourse with his disciples, in order that he might instruct them as to matters which he had not been able to take up before his death. A development of this kind in the story of the ascension required time. Even the repetition of the list of apostles in 1 13 'from Lk. 6 14-16 marks Acts as a new work. It is, accordingly, very rash to suppose that Lk. 1 1-4 applies to Acts also, or to draw conclusions from this.

As the book is dedicated to Theophilus, Blass thinks (*Neue kirchliche Zeitsch.*, 1895, pp. 720-725) that the latter must, according to the custom that prevailed in antiquity, have been named in the title (that the title πράξεις τῶν ἀποστόλων is not original, see above, § 3 n.). The same custom, too, he argues, would require the author to mention his own name in the title. Accordingly as, since the end of the second century, the anthor has been believed to be Luke (see abbve, § g), Blass thinks he is justified in restoring the title thus—Λουκᾶ Ἀντιοχέως πρὸς Θεόφιλον λόγος δεύτερος. But this pure conjecture cannot overthrow the proof that the book does not come from a companion of Paul. On the contrary, had the title really run thus, it must have been regarded as a fiction. We should have had to suppose that the author, not content with suggesting (by retaining the 'we' of his source [see $ 1]) that he had been a companion of Paul on his missionary journeys, desired to make this claim expressly in the title.

The date of composition of Acts thus falls at least some time later than that of the Third Gospel. **16. Date.** The latter is now, on account of its accurate allusions to actual incidents in the destruction of Jernsalem (Lk. 19 43 *f.* 21 20), almost universally set down to a date later than 70 A.D., and on some other grounds, which, however, it must be said, are less definite, even considerably later (see GOSPELS). Similarly, for Acts, the dying out of all recollection of the actual conditions of apostolic times—in particular, the ignorance as to the gift of tongues (see GIFTS, SPIRITUAL) and the approaches to hierarchical ideas (1 17 20 8 14-17 15 28 20 28)—points only in a general way to a late period. Hence the surest datum is the author's acquaintance with the writings of Josephus.[1] For an instance see THEUDAS. Josephus completed his *Jewish War* shortly before 79 A.D., his *Antiquities* in 93 or 94, the work *Against Apion* after that, and his *Autobiography* somewhat after 100. As to the inferior limit, Marcion about 140 A.D. had the Third Gospel, but not Acts, in his collection: but we are not aware whether he rejected it or whether it was wholly unknown to him. As for the Apostolic Fathers, 1 Clem. 18 1, if it have any literary connection with Acts 13 22, can just as easily be the earlier as the later; and as regards the rest of their writings, apart from Polycarp 1 2 (=Acts 2 24), dating from about 150 A.D., we can find traces only of the'speech of Stephen; in the Epistle of Barnabas (16 2 9 4 *f.* 5 11 48 14 3=Acts 7 50 51 52 40-43), which in 16 4 speaks of Hadrian's projected building, about 130 A.D., of a heathen temple in place of the Jewish temple as imminent.[2] In Justin, about 152 A.D. (not 137; see *Acad.* 1896, No. 1239, p. 98), the points of contact are more marked. If Acts 20 18-35 has many ideas in common with those of the Pastoral Epistles, the indiscriminate use of πρεσβύτεροι and ἐπίσκοποι (20 17 28) shows that the author has not yet reached the stage in the development of church government which characterizes the First Epistle to Timothy, the latest of the Pastoral Epistles, which wishes to see the bishop, conceived of as a sole ruler and represented in the person of Timothy as apostolic vicar, set over the presbytery (1 Tim. 5 1 19). The date of Acts must, accordingly, be set down as somewhere between 105 and 130, or, if the gospel of Luke already presupposes acquaintance with all the writings of Josephus, between 110 and 130 A.D.

[1] The evidence for this has of late been brought together with very great completeness by Krenkel (*Josephus und Lucas*, 1894): see also the *Fortnightly Rev.* 22 485-509 ['77].

[2] The reference cannot be to the (historically very doubtful) rebuilding of the Jewish temple (about 120-125?). The καί after αὐτοί must he deleted, according to the best MSS and indeed as the connection demands.

The conclusions reached in the foregoing sections would have to be withdrawn, however, and the author of Acts regarded as an eye-witness, if the **17. Blass's Theory.** views recently put forth by Blass[1] should prove to be correct. According to Blass, the markedly divergent readings of D, and those of the same character found in some other authorities,[2] all came from the author's rough draft of the book (which he calls β), while the ordinary text, *a*, found in B, ℵ, A, C, etc., comes from the fair copy of this intended for Theophilus, which the author (being a poor man) made with his own hand. In doing *so* he changed his original—without special tendency or motive—and, still more, abridged it as only authors do in copying their own work. And here, as we have intimated, Blass says, the author can be no other than the eye-witness who can give his narrative in the first person with 'we.'[3] To pronounce upon this certainly interesting hypothesis is, however, not nearly so simple a matter as Blass allows himself to suppose.

(*a*) Blass himself says that D and the additions or marginal readingsin Syr.hl. in many cases already exhibit *a combination of a* **and** *β*, and that—as is witnessed by 15 5 18 19, etc., where both sources coincide—this occurred even in the archetype itself from which both (directly or indirectly) are derived.

But there are many cases where Blass ought to have expressly recognised this combination, where, instead of doing so, he simply deletes something in β without giving further explanation. For example, ἔκθαμβοι at the end of 3 11 comes from ***a*** alongside of οἱ δὲ θαμβηθέντες ἔστησαν ἐν in β, before τῇ στοᾷ; but Blass does not recognise the ἔκθαμβοι as incorporated in β (*i.e.*, by the process of combination just mentioned), though it is supported by the best witnesses for this text. Similarly, πιστεύσασιν ἐπὶ τὸν κύριον Ἰησοῦν Χριστόν (11 17), coming from ***a***, is an expression parallel to πιστεύσασιν ἐπ' αὐτῷ after τοῦ μὴ δοῦναι αὐτοῖς πνεῦμα ἅγιον in β at the end of the verse. Here Blass wrongly questions the well-supported πιστεύσασιν ἐπ' αὐτῷ.

He 'points out ***other** corruptions* also ***in** the **witnesses*** *to* p.

For example, in cod. 137 and Syr.hl. after Ἀριστάρχου Μακεδόνος (27 2), instead of Θεσσαλονικέως, the words Θεσσαλονικέων 66 Ἀρίσταρχος καὶ Σεκοῦνδος, which can originally have taken their place in the margin only as a reminiscence of 20 4 and not as avariant. He does well to put all such things on one side when trying to reconstruct an old recension β as distinct from ***a***.

[1] *St.Kr.* 1894, pp. 86-119; *Acta Apostolorum*, editio philologica, Gött., 1895; and *Acta Apostolorum secundum formam . . Romanam*, Leipzig, 1896. The theory oh Blass finds a supporter in Joh. Belser, *Beitr. zur Erklär. a Ap.-gesch.* ***auf** Grund **der** Lesarten des **Cod.** D **u. seiner** Genossen* (Freiburg im Breisgau, 1897); it is argued against by Bernhard Weiss, *Der **Codex** D in der Ap.-gesch.*, 1897, vol. 17 part 1 of Gebh. and Harnack's *Texte u. Untersuchungen* (well worthy of attention, though not comprehensive enough). On Ramsay, see above § 13.

[2] The additions and marginal readings of the Harklensian version (syr.hl.); the Fleurypalimpsest (ed. Sam. Berger, 1889); an Old Latin text of Acts 1 1-13 6 and 28 16-31, inserted in a MS of the Vg. from Perpiguan (also edited by Berger; ***Un ancien texte latin des actes des apôtres***, 1895, reprinted from ***Notices et extraits des manuscrits de la bibliothèque nationale***, Paris, tome 35, 1 partie); Cyprian, and Augustine, and in a secondary degree the composite texts E, 137, Gigas Lihrorum (ed. Belsheim, 1879), Sahid., Irenæus, etc.

[3] In his second book Blass no longer calls β the rough draft of Luke himself, but says: 'Actorum primum exemplar postquam Romæ confectum est vel mansit ibidem vel Christianis Romanis ab auctore ad describendum commodatum est; altera autem forma orientis ah initio fuit ubi Theophilum illum vixisse . . . puto' (pp. vii. *f.*). Insupport of this, heappeals especially (p. xi.) to the more detailed description in ***a*** of the journey on the coast of Crete (Acts 27), which would be more interesting in the East than in Rome and on the other hand to the greater precision in β with regard to the journey by sea to Malta and to Italy, which would he interesting to people at Rome. This seems, however, to he no improvement on his earlier view, since (to mention no other reason) the dedication to Theophilus is to be found also in β.

(*b*) Further, before putting forward this alleged recension as the original draft of Luke the eye-witness, he ought to haveestablished it from the witnesses on objective principles; but there is often no indication of his having done so.

From the very witnesses in which he gets his readings for β—readings often indeed found in only one of them—he omits a great many additions and readings which, judged by the criteria mentioned above under (*a*), show no signs of a secondary character but stand on exactly the same footing with those which he adopts. It is very misleading when in *St. Kr.* (where he deals with only a selection of instances) it is made *to* appear (p. 117) as if there were strictly only four passages (**227 839 9 4 27 2**) which from their attestation should belong to **β**, but are open to the suspicion of having been interpolated, and value is attached to the fact that D and the Fleury palimpsest are free of them. For although Blass, in his second edition, admits such additions as **ἀπόστολοι** after **οὖν (541), τῶν μαθητῶν** before **καὶ ἐξελέξαντο (65), τῷ ἁγίῳ** after **πνεύματι** (6 10), which these two authorities agree in supporting, he still, in spite of the attestation of the same documents, rejects the addition **ἐν Κορίνθῳ** before **ἐνιαυτόν** (18 11), and the reading **ἀπὸ τοῦ Ἀκύλα** instead of **ἐκεῖθεν** (18 7). Moreover, in spite of weighty testimony, Blass rejects, for example, the Hebraism **ἀντιλέγοντες καί** before **βλασφημοῦντες in 13 45**, which even Tischendorf (in **a**) accepts (in his second edition he substitutes on the authority of the Latin of the Gigas a reading, **ἀντιτασσόμενοι**, for which there is no support in Greek MSS); on the single testimony of Augustine he adds before **καὶ πρηνὴς** in **118** the words *'et collum sibi alligavit'*; on that of the Fleurypalimpsest alone he deletes 9 12. In these last two cases, as well as in many others, it is difficult to repress a suspicion that Blass allowed his decision to be influenced by his hypothesis. The credibility of the author and the possibility of making him out to have been Luke would have been called in question had he not intended to convey, in agreement with Mt. 27 5, that Judas had hanged himself, with the additional implication that the rope had broken, and had he recorded in **9 12** a vision of so remarkable a character that even Blass finds it too marvellous. This last, therefore, he questions even in **a**. That it might also have struck the scribe of the Palimpsest or one of his predecessors as too marvellous, and that Augustine or one of his predecessors could have hit upon the reconciliation between Mt. and Acts adopted by Blass is not taken into consideration. It is, however, a reconciliation that cannot be maintained, for assuredly Luke would not have left out the most important particulars of all—namely, that the rope had broken, and that Judas had hanged himself over the edge of a precipice —without which his fall could not have had the consequences described. Enough has been said to show what caution requires to he exercised with respect to the establishment of Blass's 5 text, quite apart from any judgment as to the manner of its origin.

(c) The very greatest difficulties present themselves when it is attempted to establish **β** in a really objective way. In many cases, more than two readings present themselves—so many sometimes that Blass in his first edition silently gives **np** the attempt to settle **β**; though in the second edition, as he (here) prints only **β**, he has been compelled to determine its text throughout.

Take, for example, **1418** or 10 11. Cases such as these are the first indication we meet with that we have to deal *not with two* ***6ut with several forms of the text***, and thus that Blass's hypothesis is false because insufficient. But, more particularly, there is an entire group of MSS—HLP—which on Blass's own admission contains, if not so many various readings, readings quite as independent in character as those in **β : erg., 16 6** the **διελθόντες** etc., which has found its way into the TR, and plays so important a part in the criticism of the epistle to the Galatians (see GALATIA, § **9**; also below, under *m*). In its divergent readings E comes still closer than HLP to D; in D and E the substance is often the same and only the expression different. Blass conjectures, therefore, 6 a t in the text fromwhich **E** was copied additions from β had once been inserted in Greek and Latin, and that the Greek had afterwards faded; they had therefore to he restored by translating back from the Latin. In point of fact, this would explain very well why the addition of D in **147** (**καὶ ἐκινήθη ὅλον τὸ πλῆθος**) becomes in E **καὶ ἐξεπλήσσετο πᾶσα ἡ πολυπλήθεια**, and would apply equally well to some ten other examples pointed out by Blass. But such readings as the **τούτων λεχθέντων** of **E** in **123** after the first **καί**; or the subj. **καὶ ῥυσθῶσιν** in **E** instead of the ind. **ἀπηλλάσσοντο yip** (**ἀπὸ πάσης ἀσθενείας**) in D's addition after **5 15**; or **ἐξελθόντες δὲ ἐκ τῆς φυλακῆς** in E instead of **ἀκούσαντες δέ** in 521—such readings do not admit of this explanation: thev are simply instances of the same kind of freedom **as** that with which **a** changes **β** (or **β** changes **a**). The same freedom may have manifested itself in other cases where Blass's hypothesis about **E** would in itself be considered adequate enough; the hypothesis therefore demands fuller investigation[1] before it can be accepted (see further below, under ***e***).

(*d*) On the other hand, it is proved that *the Greek* ***text of D rests*** *partly on retranslation from* ***the Latin.***

Of the many passages adduced in support of this by Rendel Harris, indeed (***Codex Bezæ*** in ***Texts and Studies,*** ed. Robinson ii. 1, 1891), the present writer holds only nine to be really valid proofs. But it is surely worthy of remark that three of these (**3 26 532 18 2**) are not even mentioned by Blass in his list of variants—where so much that is less important is to be found—ut simply passed over as *et vitiosa et emendatu facilia*; while f two others, one (14 6) is mentioned only in the first ed., and ıe other (15 26) only in the second; Harris's hypothesis is merely by Blass, and not taken further account. This would from his point of view have been excusable if the Latinisms in D had been merely such as even an author writing in Greek might himself have employed, and in point of fact has employed. in, for example, 17 9 (in **a** and β **λαμβάνειν τὸ ἱκανόν**=*satis accipere*). It is to this category that the only instances from D discussed by Blass belong: **ἐπιθέντες**=*imponentes* for **ἐπιβαλόντες (18 12), εἶναι** for **οὖσαν** (19 35), and, especially, **κεφαλή**=*caput* for **πρώτη** (16 12). But these last two Blass himself does not venture to attribute to Luke. Thus we are led, according to his own view, to the much more serious result that there are Latinisms in D which cannot have proceeded from the author of Acts. The same holds good of **all** Harris's nine passages referred to above. In 13 29 21 21, we find an **εἰσίν** meaninglessly added to an expression in which **τά** or **τούς** occurs, because the original expression had been rendered into Latin by a sentence with *sunt* (in like manner 5 38—only, the *sunt* is now wanting in the Latin text); in **3 26 18 ■**, the infinitive preceded by the article has its subject in the nominative instead of the accusative, because the construction had been changed in the Latin by the employment of a subordinate clause; in **15 26** we have **παραδεδώκασιν** instead of **παραδεδωκόσιν**, because the participle had been rendered by ***qui tradiderunt;*** **14 6** has **συνιδόντες καὶ κατέφυγον**=***intellexerunt et fugerunt;***[1] **5 32** has **πνεῦμα ὄν** (instead of **ὅ**)=***spiritus quem.*** Lastly, **19 29** directly concerns one of the readings of β. According to Blass this runs: **καὶ συνεχύθη ὅλη ἡ πόλις**, instead of **καὶ ἐπλήσθη ἡ πόλις τῆς συγχύσεως** (so **a**). But this is found only in the Gigas--a secondary authority—and in Pesh., which according to Blass is to a still less extent an authority for β. D, in this case the sole authority (in the proper sense of the .word) for **β**, has: **καὶ συνεχύθη ὅλη ἡ πόλις αἰσχύνης**. As Harris has pointed out, this **αἰσχύνης** can only be a retranslation from the Latin text of D: ***et repleta est tota civitas confusione(m).*** This is a correct rendering of the Greek of **a** as above. But ***confusio*** is **also** used for **αἰσχύνη**—compare, for example, Lk. **14 9**—and *confundi* (often) for **αἰσχύνεσθαι. αἰσχύνης**, however, could in the present instance have been employed in retranslation only if the verb was ***repleta est*** (**ἐπλήσθη**). **συνεχύθη**, therefore, can only have come in later, from another copy, to take the place of **ἐπλήσθη**. One sees how precarious a proceeding it is to seek for the most original form of Acts in a MS the text of which has passed through such vicissitudes. If Harris has in any instances proved retranslation from the Latin, the other instances also, though in themselves incapable of proof, gain in probability. We mention only **ἐμοῦ** for **ἐμέ** (3 22), **ἥν** for **ἧς** (3 25), and the additions **καί** before **προσκαρτερῶν** (8 13), **αἰτίαν** (4 21), **ἦσαν** (4 34), **αὐτούς** (7 52), **as** also **καὶ ἐκέλευσε κηρύσσειν τὸ εὐαγγέλιον** (1 2), the last four again being like 19 29 readings of β. In **fact,** it becomes a possibility that even such passages as reveal no error in retranslation were nevertheless originally Latin, and the suspicion falls naturally in the first instance upon the additions in **β**.

(e) *Other passages* ***in β*** we cannot accept **as** original, for the reason that they ***are plainly derived from a fusion of two texts.***

Is it possible that Luke can have actually written: **(16 39) παρεκάλεσαν αὐτοὺς ἐξελθεῖν εἰπόντες· ἠγνοήσαμεν τὰ καθ' ὑμᾶς, ὅτι ἐστὲ ἄνδρες δίκαιοι. καὶ ἐξαγαγόντες παρεκάλεσαν αὐτοὺς λέγοντες· ἐκ τῆς πόλεως ταύτης ἐξέλθατε, κ.τ.λ.**? Cod. 137 and the interpolation in Syr.hl. prove conclusively the inadmissibility of this repetition, by omitting **(καὶ) ἐξαγαγόντες παρεκάλεσαν αὐτοὺς λέγοντες**. The probability is rather that **παρεκάλεσαν** stood, in the one **MS** with indirect speech, and in the other with direct (so also, for example, in **21** 36 direct varies with indirect narration in the MSS); in this case **ἐξελθεῖν** had reference originally to the city, like **ἐξέλθατε**, and not, as now, to the prison. In *20* 18 the addition in **β—ὁμόσε ὄντων αὐτῶν**—wholly tautological as it is after As **δὲ παρεγένοντο πρὸς αὐτόν**, is certainly not to be attributed to the author: it is a variant of **ὡς δέ κ.τ.λ.** which was at first noted in the margin and after-

[1] In Acts 2, which we have specially examined with this view, we find that Blass omits no fewer than seven readings of **E** which on his principles ought to have been noted as variants; besides three others which he does notice (**2 33 41 47**), four of these seven (2 22 **ὑμεῖς πάντες** instead of **αὐτοί**; 2 24 **δι' αὐτοῦ** after **λύσας; 243 οὐ μικρά** after **σημεῖα**, and **τῶν χειρῶν** before **τῶν ἀποστόλων**) are unsusceptible of explanation by means of his hypothesis.

[1] As another instance we may add **διαρρήξαντες . . . καὶ ἐξεπήδησαν (14 14)**=*consciderunt et exilierunt*. So also 5 21 *f.* **7 4 13 29 16 17 34 20 10**. Moreover **ὅς** (for **ὅ**) **λαλήσας (425)** is due to retranslation of *qui [locutus est]*; similarly **3 11 4 12 11 1** And the As of 1125 (**ἐξῆλθεν ἀναζητῶν αὐτὸν καὶ ὡς συντυχὼν παρεκάλεσεν ἐλθεῖν**) can hardly he explained otherwise than as derived from the parallel Latin text: ***cum (invenisse[n]t deprecaba[n]tur venire).***

wards crept into the text of **DA** Vg. Gigas, hut in **E**, on the other hand, with skilful avoidance of tautology was changed to **ὁμοθυμαδόν**. The case is similar with the addition in 5 21 (found only in D)—ἐγερθέντες τὸ πρωΐ—an addition which, moreover, comes in very awkwardly after **παραγενόμενος δὲ ὁ ἀρχιερεὺς καὶ οἱ σὺν αὐτῷ**, especially as, instead of **συνεκάλεσαν**, D goes on to say **καὶ συγκαλεσάμενοι**. Here even Blass asks whether perhaps **παραγενόμενος** may have been wanting in *β*.

Yet, it may be said that, in this and in the similar cases here passed over, the hypothesis of Blass is simply deprived of one of the arguments on which its demonstration rests, while there appear to be enough of them left.

(f) Decisive, however, against this appearance, is the fact that *precisely the most characteristic of the variations of text* ***between*** *a and β* ***bear*** *witness against Blass's* ***theory.*** This confutation of his hypothesis follows inevitably from the hypothesis itself.

Just in proportion to the clearness and pointedness of *β* and the weakness of *α* in these respects, is the improbability of the author's having with his own hands obscured and perverted the sense. And here in the meantime we can leave altogether out of account the question whether or not he was also the eye-witness. In any case, after writing in his draft of **24** 27 that it was on account of his wife Drusilla that Felix left Paul bound, he would not have said in his fair copy simply that it was on account of the Jews—even if, as Blass thinks, both statements were correct. If in his draft he had stated that Paul had proclaimed the apostolic decree, not only in the later course (16 4), but also at the outset, of his new missionary journey (15 41), he would not in his fair copy have omitted to state this in the first and therefore more important of the places. In this instance even Blass considers an interpolation in *β* as conceivable in 15 41, hut chiefly because the expression seems to him to he somewhat obscure. In 22 29 *f.*, although the officer is in fear because a Roman citizen has been bound, Paul is not released, according to *a*, till the following day, not—as in *β*, immediately (**παραχρῆμα**). Blass himself says (*St. Kr.* 108); 'one cannot but be astonished at the carelessness of the abridgment in *a*.' All the more readily might it have occurred to him that it was the writer of *β* that perceived and corrected the defects **of a**. In his *Editio philologica* Blass wishes **τῇ ἐπαύριον** without any authority either deleted or changed to **τῇ ἑσπέρᾳ**. This would be justifiable only if it were perfectly certain that the narrative, even in *a*, is all of one piece and absolutely to the point. But such critics as Spitta, Clemen, and Jiingst have assigned 22 29 and 22 30 to two separate sources. **If** it is only the addition **ὁ δὲ κύριος ἔδωκεν ταχὺ εἰρήνην** after 14 2 in the draft that enables **us** to understand how it was that in spite of the disturbance (or, according to *β*, persecution) mentioned in 14 2, Paul and Rarnabas remained in Iconium, why does the author omit the words in his fair copy? More accurately considered, they are to be regarded as an interpolation, designed to do away with the contradiction, an interpolation which carried with it the further change of **ἐσχίσθη δέ** (14 4) into **ἦν δὲ ἐσχισμένον** and, in 14 5*a*, the interpolation of *iterum* and *secundo*. It is not in D, however, that this interpolation occurs, but only in Syr.hl., which elsewhere also smoothes away the evidences of the work of various hands in D—as for example, in 19 14 by the introduction of *qui* before **ἔθος εἶχον**, in **186** by the omission of δὲ after **ἀντιτασσομένων**, and in 14 2 by omitting the last two words in the quite tautological expression **οἱ ἀρχισυνάγωγοι τῶν Ἰουδαίων καὶ οἱ ἄρχοντες τῆς συναγωγῆς**. If, as Blass supposes, it were necessary to hold that Syr.hl. has preserved the original, whom could we possibly imagine, for example, to have added the words **τῆς συναγωγῆς**, or omitted the words *iterum* and *secundo*? But, moreover, in 14 2-5 the changes mentioned above would not have been at all necessary unless first 14 2 had been wrongly interpolated between **14 1** and **14 3**. Even though it may perhaps be a fragment from another source, 14 2 has its immediate continuation in 14 4. Here even Ramsay supposes a 'corruption': only it is 14 3 which he takes for a gloss. Thus we come again upon one of the many cases in which Blass holds *β* to be the original simply because it never occurs to him to bring the unity of Acts into question. Similarly, for example, he drops from *β*, and also even from *a*, the **ἑπτά** of **19 14**, which is irreconcilable with the **ἀμφοτέρων** of 19 16, on the sole authority of D, without recognising that the omission in D may have been **a** late expedient for removing the contradiction just as much as the *duo* for ἑπτά in Gigas. If the author in his draft had already written, after Ἰουδαίας in 15 1, the words **τῶν πεπιστευκότων ἀπὸ τῆς αἱρέσεως τῶν Φαρισαίων**, and in ***15 5*** had referred to this (by **a** simple οἱ δέ), why is it that in the clean copy his first use of the expression is in 15 5, so as almost inevitably to suggest the thought that a piece derived from another source begins at this point? (see COUNCIL **OF** JERUSALEM, **§ 4**. If, according to the rough draft (not only in 16 6 *f.*, hut also in 17 15 **19 1 20 3**), the journeys **of** Paul were determined by inspiration, why in his clean copy does the author leave this out in the last three of these passages? Here too, we can see the inapplicability of another of Blass's assertions,' **viz.** that nowhere in *a* or *β* is the narrative changed so as to become more interesting or more marvellous. Further the author of this three-fold mention of divine inspiration has fallen into an oversight—that, namely, of attributing to Paul (19 1) the intention of making a journey to Jerusalem just after he had returned from that city, without even the slightest reference to what had been said immediately before. For it is not possible to agree with Blass in regarding the journey of 19 1 as identical with that which had been intended by Paul, according to the addition of @ in 18 21 (found also in **TR**). This last was actually carried out (18 22, see COUNCIL OF JERUSALEM, § 1). And even if it had not been, the inspiration which hindered it must have been mentioned in 18 21, and not in **19 1**, after he had already got back to Phrygia from Cæsarea, which is only a few miles from Jerusalem. Cp further BARJESUS, § 1 6.

(g) Over against these instances, the list of which could be greatly increased, there are *a few* ***rare*** *cases in which β might really* ***be*** *held to* ***be*** *the original.*

The additions **κατέβησαν τοὺς ἑπτὰ βαθμοὺς καί** before **προῆλθον** (12 10), **τῇ δὲ ἐπαύριον** before 16 11 and in 27 1, **ἀπὸ ὥρας πέμπτης ἕως δεκάτης** after 19 9, **καὶ μείναντες ἐν Τρωγιλίῳ** after **Σάμον** (20 15) **δι' ἡμερῶν δεκαπέντε** before **κατήλθομεν** (27 5) **do** not seem to be 'inventions. And yet Blass not only opposed, at least in his first edition, the quite similar addition of **καὶ Μύρα** after **Πάταρα** (**21 1**) in D, Sah., and Gigas, inasmuch as it could have been introduced from 27 5, but also refused to accept the *sequenti autem* die which we find in *d* (**21 5**) instead of **ὅτε δὲ ἐγένετο ἡμᾶς ἐξαρτίσαι τὰς ἡμέρας** (the Greek text of D is wanting here). On the other hand, in 21 16 the text of *a* is not materially inferior to that of *β*, to which Blass attaches a very high value; for the imperf. **ἀνεβαίνομεν** of 21 15 does not mean "we went and arrived at Jerusalem" (this follows in 21 17), but "we took the road for Jerusalem," and thus, even according to *a*, Mnason may very well be thought of as living in a village between Cæsarea and Jerusalem, as is expressly stated in *β*. The author—in this instance the author of the 'we' source—has here quite naturally taken for granted that the journey from Cæsarea to Jerusalem cannot well be made in a single day.

(h) After what has been said, it is clear that *there is not the slightest necessity for assuming the bulk of the remaining variations in β, which are indecisive, to* ***be*** *original.*

They consist partly of what are simply changes in the construction, or periphrases without changing the sense (for both see for example **16 19** *f.*), partly of a somewhat more vivid way of expressing the situation which, however, in the cases we have in view—much more than seventy—could have been derived by **a** simple copyist from the adjoining context. Compare, for example, the very well-devised addition **τοὺς λοιποὺς ἀσφαλισάμενος** after **ἔξω** in 16 30.

(i) But do not these changes—materially so unimportant, but in form so considerable—at least prove that both forms of the text, no matter which is the earlier, emanate from the author of the book itself? They do not.

After having seen that precisely in the most significant passages of the hook (see above *e* and *f*) this does not hold, one must further remember that in HLP, and also in E, equally important variations are met with (see above, *c*). These, like those in *β*, resemble the variation by which one gospel **is** distinguished from another. Here, accordingly, transcribers have allowed themselves liberties which are usually regarded as permissible only to the authors of independent works. However surprising this may seem to **us**, the fact cannot he denied. When in Mk. 3 21, for **ὅτι ἐξέστη** (a reading which is **a** stumbling-block to many theologians even of the present day) D substitutes **ὅτι ἐξέσταται αὐτούς**, 'that he has evaded them,' or at least 'that he has stirred them up,'—is not the liberty taken with the text just as bold as Mt.'s in the exactly corresponding place, 12 23 (*i.e.*, just before the reference to a league with Beelzebub), when he changes it to **ἐξίσταντο**? But this freedom of treatment is by no means without analogies elsewhere in the literature of the time. The text of Plato in the Flinders-Petrie papyri (*Cunningham Memoirs* ***of*** *the Academy* ***of*** *Dublin*, **1891**) shows similarly pronounced deviations from the ordinary text—deviations which, according to Usener (*Nachr. d. Gesellsch. der Wiss. zu Gött.*, 1892, pp. 25-50, 181-215), are to be attributed to the copyists of the papyri, perhaps as early as within 120 years after Plato's death. **In** the papyrus text of Hyperides, Against *Philippides* (*Classical Texts* ***from*** *Papyri* in *Brit.* ***Mus.***, ed. Kenyon, 1891), Blass himself discovers 'very often . . . interpolation and arbitrary emendation,' and in the third Demosthenes letter published in the same collection, 'extensive variation' (*Jahrb. f. class. Philol.*, 1892, p. **42**, and 1894, **p. 447**).

In order more easily to comprehend the possibility **of** changes in the text on the part of a transcriber, it may be allowable to conjecture that he may have been accustomed to hear the book recited or even himself to recite it (with variations of the kind exemplified), on the basis of a perusal ***of*** it, but without its being committed to memory. Such recital was by no means impossible in the second century.

(k) The question *whether D shows in the gospels the same variations as in Acts* may be left **out** of account.

It would he important only if it could he answered in the affirmative for Mt., Mk., and Jn. For, that in these cases also the rough draft should have gone into circulation as well as the clean copy is really very improbable. But the independent variations are too few to warrant an affirmative answer. If the same he the case with the Third Gospel, then, according to Blass's hypothesis, we must assume that the draft of it was not copied ; but if they are sufficiently numerous, as Blass has recently declared (*Hermathena*, 21, 1895, pp. 121-143 ; and 22, 1896, pp. 291-313 ; *Evangelium secundum Lucam . . . secundum formam quæ videtur Romanam*, 1897; *Philology of the Gospels*, 1898), there is nothing to hinder our applying to them the judgment applied to those in Acts, however that judgment may go.

Neither is it decisive of the question that β is frequently not fuller but briefer than a (*e.g.*, **2626 74**).

(*l*) Very important, on the other hand, is Blass's assertion that the *uniformity of expression in a and* β is a 'very strong proof' that both recensions come from the hand of the author. But it is sufficiently met by Blass's own index.

According to this, there occur in the divergent 'passages of β (which are by no means of great compass) **64** words never elsewhere met with in Acts or the Third Gospel. If we deduct from these, besides 5 proper names, the 9 vouched for only by the Latin text (although Blass himself has not succeeded in giving them a Greek form that suggests the authorship of Luke), there still remain 50 (not **44**, as is stated in Blass's *Editio philologica*, **p.** 334). After deduction of 4 numbers, and the expressions *ἰστίον* and *στρατοπεδάρχης*, for which no other word could possibly have been chosen, the number stands at **44.** So also in his second edition (see the enumeration in his *Evang. sec. Luc.* p. xxvii.), although, from the somewhat different form of text adopted, the words that appear to be peculiar to β are not quite the same.

(*m*) In support of Blass's highly important assertion that ***the eye-witness Luke alone*** *could* ***have given his work in both the forms which we have in a*** *and* β, the most that can be adduced — out of all that has been remarked on in the course of the section — are the passages referred to under (*g*). But of the 'seven steps' in Jerusalem, Luke, according to Blass's own view, gained his knowledge not from personal observation, but only from the written (or oral) testimony of an eye-witness.

All the same he takes the liberty, according to Blass, of leaving the note out in writing his fair copy. This being so the omission of the five other details, even if with Blass one carries this back to the author of the hook, does not prove that they had formed part of his own experience; he may equally well have obtained them from a written source. Four of them (16 11 20 15 27 1 5) belong, in point of fact, to the 'we' source. It is not at all easy to see why **a** transcriber might not have ventured to omit them, with ***so*** much else, as of inferior interest. We may therefore thankfully accept them, as well as other data in β which have been shown or may ultimately appear to he more original than ***a***, as contributions to our historical knowledge ; but they do not prove more than this—that in such cases β has drawn more faithfully from a true source than ***a*** has. There remains, accordihgly, in favour of the eyewitness as author of Acts, only 11 28, where D (along with, essentially, the Perpignan Latin text, and Augustine), instead of **ἀναστὰς δέ**, has **ἦν δὲ πολλὴ ἀγαλλίασις· συνεστραμμένων δὲ ἡμῶν ἔφη**, and then **σημαίνων** instead of **ἐσήμανεν.** This might possihly he from the 'we' source- hut the inference is not that it can only have been by an eye! witness that the 'we' in ***a*** was set aside. Or why is it that 'we' is set aside by L in 16 17, by ℵ* (and differently by ABCH) in 21 10, by H in 28 16, by P and Vg. in **27 1** (**τοὺς περὶ τὸν Παῦλον**, or *eum*, for ἡμᾶς), hy HLP in 20 7 21 8*a* 28 1 16 13, by C[3] also in 28 1, by **D** also in 16 13 (**ἐδόκει** for **ἐνομίζομεν**)? And why, on the other hand, in 27 19 does it stand only in HLP Pesh.? **In** all of these cases (except **27 1**, see below) Blass has the same reading in β as in ***a***. (In ***16* 13**, he has, it is true, in β the **ἐδόκει** mentioned above, but he likewise obtains in ***a*** also [by the conjecture **ἐνόμιζον & προσευχῇ εἶναι**] a reading in the third person.) He thus acknowledges that it is copyists, not the eye-witness, that allowed themselves to remove the 'we,' or to introduce it. Only in 11 28 does Blass assume that it was Luke himself who changed into the third person in ***a*** the 'we' which he had written in β. So also it is only in one place, and even that only in his second edition, that Blass regards the third person in place of 'we' as a reading of β—namely, in 20 5 (on the authority of **D),** for in **27 1** it is only through a change of the whole of the first part of the verse, rendering **ἡμᾶς** impossible, that the third person is introduced. At all events, it is impossible that 11 30 as well as 11 28 can he derived from the 'we' source (see COUNCIL OF **JERUSALEM,** § **1).** Even the 'we' of 11 28 may possibly have been the insertion of a transcriber who knew (with Eus. ***HE*** iii. 46, Jer. ***De Vir.*** *Ill.* 7, and the Prologue [earlier than Jerome] to the Third Gospel in codd. Corbeiensis, Colbertinns, Amiatinns, Fuldensis, Aureus, etc.) that Luke was understood to have been a native of Antioch. Or has Blass himself not recognised that Irenæus also (iii. 14 1), or one of Irenaens's predecessors, has permitted himself on his own responsibility to say ***nos venimus*** instead of **κατέβησαν** in 16 8? The insertion of 'we' in 11 28 would not be bolder than the other infelicitous changes in β. It ought to he noted that Syr.hl. is not implicated in this insertion ; and the text of D is by no means in order, for it has ἔφη without telling what it was that Agabus did say (in the sense of **ἐλάλει),** while in the whole of the NT it is direct speech, or, as in four isolated exceptions in the case of Paul, at least indirect speech, that is connected with *φημί*. In Acts 11 28 the indirect speech depends rather on *σημαίνων*.

(*n*) **A** very dangerous support to the theory of Blass has been contributed by Nestle.[1]

In his view **ἐβαρύνατε** in D (Irenaeus has ***aggravastis***), instead of **ἠρνήσασθε** in 3 14, comes from a confusion of כבר (Job 35 16 15 10) and כפר in the *Semitic* ***source of Acts*** 1-12 (similarly, before him, Harris, p. 187, but otherwise pp. 162 *f.*), and in like manner **κόσμος,** instead of **λαός** in 2 47, from confusion of עָלַם and עַם (or in Aramaic עָלְמָא and עַמָּא). In itself considered, all evidence for the existence of a source (now pretty generally conjectured ; see above §§ 10 *f.*) for Acts 1-12 cannot be otherwise than welcome; hut) in the form thus suggested the evidence points rather to the conclusion (which Nestle leaves also open) that some person other than the author himself had, in transcribing, adopted another translation of the Semitic text.

(*o*) No happier is an attempt of Conybeare to provide a new prop for Blass's theory.

He points out in the *American Journ. of Philology* (17 2 [1896], pp. 135-171) the most interesting fact that the Greek commentary of Chrysostom, and, to an even greater extent, the many extracts from it in an Armenian Catena on Acts. follow or at least presuppose a series of β readings to he found partly in D (and other witnesses for the β text), partly only in Syr.hl. or in cod. **137.** He thinks he can thus prove that originally all the β readings were united in a single cod., in the copying of which they were partly removed to secure greater agreement with the prevailing text. But the number of β readings used by Chrysostom is insignificantly small when compared with those of which he shows no trace; and ***of such*** **as** ***do not appear in D*** Conybeare has adduced only five. Chrysostom accordingly furnishes no stronger support for Conybeare's thesis than any other witness for β would, for each of them shares some of its readings with D and some with other witnesses for β. But to explain this there is no need of Conyheare's assumption that all β readings are from one hand : it would he explained equally well by supposing them due to the labours of successive copyists (or editors). Conybeare, however, goes much further, and asserts that Luke himself is the author of all these β readings. He ventures to rest this assertion on a single passage—a very small foundation for such a structure. Moreover, it would have been just as easy for another as for Luke to add '*so* natural a phrase' as, according to Conybeare, **συντεχνῖται is** in 19 25.

Blass's theory, then, it would seem, is so inadequately proved that it cannot be held to have subverted any of the conclusions regarding Acts in preceding sections of this article. It has the merit, however, of having called attention in **a** very emphatic way to the importance of β. It has also raised new problems for the science of textual criticism — not to speak of the many valuable contributions it has itself made to that science and to the interpretation of the Book of Acts.

18. Estimate of Blass's theory.

19. Religious value of Acts.

The value of Acts as a devout and edifying work, cannot be impaired by criticism. Indeed, the book is helped by criticism, which leads not only beyond a mere blind faith in its contents, but also beyond the unhistorical assumption that one is entitled to impose on the author the demands of strict historical accuracy and objectivity. Its very ideal, in apostolic times unhappily not reached, according to which the company of believers were of one heart and one mind (**4** 32), shows that the author knew where the true worth of Christianity was to be found. The early Christians pray everywhere with and for one another ; they accompany the apostles and take pathetic farewells of them; they distribute their possessions and have all things in common. Particularly beautiful figures are those of Stephen, Cornelius, Lydia, and the jailer at Philippi. The jailer knows that most important question of religion, 'What must I do to be saved?' (16 30), and Peter also (4 12), as well as Paul, expresses the conviction that Christianity alone has a satisfactory answer to give. The writer. of Acts is able to rise above all

[1] *Expositor*, Sept. 1895, pp. 235-239 ; *St. Kr.*, 1896, pp. 102-104.

narrowness of sympathy (10 15 34 *f.* 15 10); and the conception of God in 17 28, which cannot be attributed to Paul, is really much more apt, and is more closely in accord with the results of philosophically purified thought, than that apostle's, still hampered as it was by Jewish modes of thinking. Lastly, sayings such as we find in 24 16 4 20 20 24 14 22 21 13 *f.* are of the deepest that can be said about the inner Christian life.

20. Literature. As Lightfoot remarks, the literature which has gathered round Acts is too large to catalogue profitably. To his own list (Smith's *DB* 2) may be added Holtzmann's comm. in the *Hand-comm. zum NT* (1889, 2nd ed. 1892). In the criticism of the book the most important landmarks are as follows: Schneckenburger (*Zweck der Ap.-gesch.* 1841), whilst maintaining its absolute trustworthiness, credited it with tendency to vindicate Paul against Judaisers. Baur (*Paulus*, 1845) and Zeller (*Ap.-gesch.*, 1854) regarded its tendency as 'reconciling' (*unionistisch*) in its scope, and its contents as untrustworthy. Bruno Bauer (*Ap.-gesch.*, 1850), whilst holding the same view as to its tendency, went much further as regarded its contents, taking them to be free and often even purposeless invention. Overbeck, in his revised 4th edition of De Wette's *Handbuch* (1870), propounded a modification of the tendency theory substantially identical with that which has been set forth in the present article. Pfleiderer (*Paulinismus*, 1873, 2nd ed. 1890; *Urchristenthum*, 1887), Weizsacker (*Ap. Zeitalter*, 1886, and ed. 1892; ET, 1894-95), and Jülicher (*Einl. in das NT*, 1894) urge, often with justice, that the author wrote in simple faith, and has much that is trustworthy. The most thorough-going apologist have been Mich. Baumgarten (*Ap.-gesch.*, 1852, 2nd ed. 1859), Karl Schmidt (*Ap.-gesch.* i. 1882), and Nösgen (*Comm.*, 1882). The most promising new phase of the criticism of the book is that which has for its task a separation of the sources (see above, § 11). In this connection mention must be made of a very remarkable return to tendency-criticism in a Marburg University Program of Johannes Weiss (which appeared after the present article was in type) entitled *Ueber die Absicht u. den literar. Char. der Ap.-gesch.* (1897). Weiss regards Acts as 'an apology for the Christian religion (against the accusation of the Jews) addressed to pagans, showing how it has come about that Christianity has taken over from Judaism its world-mission.' P. W. S.

ACUA, RV Acud (ακουδ [BA]), 1 Esd. 5 30† = Ezra 2 45, AKKUB, 4.

ACUB (ακουφ [B]), 1 Esd. 5 31† = Ezra 2 51, BAKBUK.

ACUD, see above, ACUA.

ADADAH (עֲדְעָדָה), Josh. 15 22†, probably (We., Di.) a corrupt reading for עַרְעָרָה *'Ar'ārah—i.e.*, Aroer (ערער); see AROER, 3.

(Αδαδα [AL]; αρουηλ [B], implying ערועל; cp ραγου. [1 S. 30 28, 𝔊L].)

ADAH (עָדָה; αδα [ADEL], *ADA*).

1. Wife of Lamech (Gen. 4 19-23†, *αδδα* [L]). See CAINITES, § 9.

2. Daughter of Elon the Hittite, and wife of Esau (Gen. 36 2 4 10 12 16 [R?]); called Basemath in Gen. 26 34 [P]. See BASHEMATH, 1.

ADAIAH (עֲדָיָה, § 35, once עֲדָיָהוּ [No. 8]; 'Yahwè passes by,' cp. ADIEL; αδαια [BAL]).

1. Grandfather of king Josiah, 2 K. 22 1 (εδεινα [B]; ιεδιδα, [A], *i.e.* יְדִידָה, the name of Josiah's mother; οζιου [L]).

2. 1 Ch. 6 41 [26], see IDDO, iii. 2.

3. b. Shimei, in genealogy of BENJAMIN (§ 9 ii. β), 1 Ch. 8 21 (αβια [B], *ahara* [A]).

4. A priest in list of inhabitants of Jerusalem (see EZRA, ii. § 5 [*b*], § 15 [1] *a*), 1 Ch. 9 12 (σαδιας [A]) = Neh. 11 12 (BN* om., *αδαιας* [L]). This name should perhaps be read instead of JEDAIAH (*q.v.* i. 1) in Neh. 12 6 or 7.

5 and 6. Two members of the b'ne BANI [*q.v.* 21 in list of those with foreign wives (EZRA, i. § 5, end), Ezra 10 29 (αδα [B], αδαιας [AL]) = 1 Esd. 9 30, JEDEUS (ιεδαιος [BA], αδαιας [L]), and Ezra 10 39 (αδειαμ [N], αδαιας [AL]) = 1 Esd. 9 34 (αδδαιας [L], om. [BA, EV]).

7. b. Joiarib, in list of Judahite inhabitants of Jerusalem (see EZRA, ii. § 5 [*b*], § 15 [1] *a*), Neh. 11 5 (δαλεα [B], αχαια [A]).

8. The father of Maaseiah [4], 2 Ch. 23 1 (עֲדָיָהוּ, *αζεια* [B], αδεια [Bab], αδαιου (gen.) [L]).

ADALIA (אֲדַלְיָא), son of Haman, Est. 9 8† (Βαρεα [B], Βαρελ [NA], -εα [L]). See ESTHER, §§ 3. 7.

ADAM (אָדָם, to which Kt. prefixes ב, Kr. מ [so 𝔊L Symm. Targ. Pesh. Vg., and many MSS and editions]; Kt. is to be preferred; see Di.'s note [1]) is mentioned once, if not twice. In Josh. 3 16 it is the name of the place beside or near which the descending waters of the Jordan 'stood and rose up in one heap'; here it is followed by the words (which may possibly be a gloss) 'the city that is beside Zarethan.' An echo of this name may very plausibly be found in *Tell ed-Dāmieh* and *Jisr ed-Dāmieh*, names of a hill and bridge at the confluence of the Jabhok (*Zerkā*) with the Jordan, some 16 m. in a direct line above the ford opposite Jericho. Indeed it is possible that for אָדָם (Adam) we should read אֲדָמָה (Adāmāh), the ה having dropped out owing to the circumstance that the following word begins with ה (so Kampffmeyer, *ZDPV* 16 14). In this case the resemblance of the ancient and the modern name will be closer. The same spot seems to be referred to in 1 K. 7 46, where, for 'in the thickness of the ground' [2] (AV mg.), we should probably read, 'at the crossing of Adamah,' [3] the name of some definite locality, not a description of the soil, being plainly required by the context (so G. F. Moore and Clermont-Ganneau).[4] This gives us a definition of the site of Adam or Adamah. It was at a ford of the Jordan between Succoth and Zarethan. Putting all the evidence together, we may hold that the Succoth of 1 K. 7 46 was E. of the Jordan on or near the Jabbok; while Zarethan was W. of the river, in the valley opposite Succoth. Beside Zarethan, at the 'crossing' or ford, was a town called Adam or Adamah (cp SUCCOTH, 2; ZARETHAN, § 1).

The second mention of a place of this name is in Hos. 6 7 where, for *k'ādām* (RV 'like Adam,' RV mg. 'like men'; ὡς ἄνθρωπος [BAQ]), we must at any rate read *b'ādām—i.e.*, 'at Adam'—to suit 'there' in the next clause, and to correspond to the localisation of Israel's sin in *v.* 8 (so in the main We.). 'There' the Israelites 'were traitors to Yahwè' and 'broke his covenant.' Of course there may be a doubt which of the places called Adam or Adamah is meant, and it may even be surmised that the letters אדם (ADM) are incorrect.[5] The fact, however, that the ford of *Dāmieh* is on the direct route (so we must believe) to the place called Gilead in *v.* 8, suggests that the 'city Adam' of Josh. 3 16 is intended. The confluence of two important streams may well have been marked by a sanctuary.

ADAM AND EVE.[6] The use of Adam and Eve as proper names within the Reformed Churches symbolises a theory of the Paradise story which is distinctively modern and western.

1. Reformation antipathy to allegory. 'The Reformers, always hostile to allegory, and in this matter especially influenced by the Augustinian anthropology, adhered strictly to the literal interpretation, which has continued to be generally identified with Protestant orthodoxy.' This was a necessary reaction against that Hellenistic allegorising which transmuted everything that seemed low or trivial in the early narratives into some spiritual or theological truth. The reaction had begun no doubt in pre-reformation days. Bonaventura, for instance, says that 'under the rind of the letter a deep and mystic

1 The σφόδρα σφοδρῶς of 𝔊B may be safely neglected, though if σφοδρῶς (which is wanting in A) be correct, it testifies to the antiquity of the inferior reading (מאדם). Symm., according to Field's restoration from the Syr. Hex., gives ἀπὸ αδομ; 𝔊L ἀπὸ αδαμη (interpolated)', Vg. *ab urbe quæ vocatur Adom.* Bennett in *SBOT* (crit. notes) regards the name 'Adam' and the description of it as 'the city,' as suspicious. But 'Adam' should perhaps rather be 'Adamah,' and 'the city,' etc. looks like a gloss. The text on the whole is correct.

2 במעבה הארמה. The ‖ 2 Ch. 4 17 has בַּעֲבִי הארמה.

3 במעברת ארמה.

4 Moore, *JBL* 13 77-79 ['94], cp *Judges*, 212 ['95]; Clermont-Ganneau, *PEF Qu. St.*, Jan. 1896, p. 80.

5 One might conjecturally read Dumah—*i.e.*, the Edmna of the OS (255 74; 119 22, cp Guérin, *Sam.* 2 14 *f.*), which is described as a village about 12 R. m. E. from Neapolis (Nāblus), and is the modern *Daumeh* (see Rob. *BR* 4 292 *f.*). This is obviously not the 'city' intended in Josh. 3 16. It is also not very likely to be meant by Hosea.

6 On the names see below, § 3.

meaning is hidden,' but states also that 'he who despises the Ietter of sacred Scripture will never rise to its spiritual meanings.' Still the completion of the movement (within certain limits) was reserved for the great exegetes of the Reformation — Luther, Melanchthon, and Calvin. Thus Luther explicitly says — 'It were better to read mere poetic fables than attach one's self to the so-called spiritual and living sense to the exclusion of the literal;' and again, 'We should stay by the dry clear words, except where the Scripture itself, by the absurdity of the simple meaning, compels us to understand some sayings figuratively' (quoted by Diestel, *Gesch. des AT in der chr. Kirche*). This predilection for a grammatical and historical interpretation was closely connected with the revival of classical studies, but had its primary justification in the endorsement which the NT appeared to give to the historical accuracy of the story of Paradise. It is the correctness of the historical acceptation of that story which criticism denies, and before proceeding to consider the results of criticism (see CREATION, § 1 and PARADISE), Protestant students may ask whether Jesus Christ and the NT writers really attached importance to the story of Eden as a piece of history. Our conclusion will of course have a direct bearing on the interpretation of the other early narratives.

2. NT views. Let us turn to (i.) passages spoken or written from a purely *Jewish* point of view. (*a*) In Mk. 10 6-8 (Mt. 19 4-6) we have a combined quotation from Gen. 1 27 2 24. Jesus passes over the facts of the Paradise story altogether, and fastens attention on the statement that man was from the beginning differentiated sexually, and that, by divine ordinance (so no doubt Jesus interprets Gen. 2 24), the marriage union was to be complete. His silence about the facts may no doubt be explained by the circumstances; elsewhere Jesus appears to many to accept the historical character of the deluge story (Mt. 24 37-39; Lk. 17 26 27). But one must be cautious; the reference to the deluge story presupposes the typical character of the early narratives, a theory which is inconsistent with a strictly historical point of view. (*b*) In Rev. 2 7 22 2 14, a literalistic view of the tree of life is presupposed. But these passages are undeniably based, not so much on Gen. 2, as on the apocalyptic description in Enoch 24 *f.* (*c*) In Rev. 12 9 20 2 we have a description of SATAN (*q.v.* § 6) as 'the ancient serpent,' alluding to Gen. 3 1; it is also said that he will 'deceive' the world as he deceived the first man. It is certain, however, that the writer also draws from a well of popular belief, enriched from a wider Oriental source, to which he gives as implicit a belief as to the biblical statement.

Passing to (ii.) the *Pauline* writings, we find (*d*) and (*e*) in Rom. 5 14 and 1 Cor. 15 22 45 references to detail: in the story of Adam; but the reference is made in a didactic interest. Paul accepts (as also probably does Luke) the Alexandrian idea of the typical character of the early narratives, and of the double creation of a heavenly and an earthly Adam. The latter doctrine, which the Alexandrian theology founded on the two separate accounts of creation in Gen. 1 and 2, Paul professes to base on the language of Gen. 2 7. There are also other anthropological ideas which he supports by reference to the fall of Adam. His real interest is in these ideas, not in the story of Paradise. He did not deduce them from the Eden story, and only resorts to that narrative as containing material which may, by the methods of Christian Gnosis, be made to furnish arguments for his ideas. (*f*) In Phil. 2 6 we have probably a contrast between the first Adam who thought equality with God an ἁρπαγμός (an object of grasping) and the second Adam who, thinking far otherwise, humbled himself even to the death of the cross, and thereby actually reached equality with God (Hilgenfeld). Here the story of Eden is only illustrative of an idea, though the illustration is suggested by the favourite typical view already referred to. (*g*) In 2 Cor. 11 3 there is a mere casual illustration.

(iii.) *Other* NT writers. (*h*) In Lk. 3 38 Adam is the last human link in the genealogy of the Saviour. The evangelist suggests a contrast between the first and the second Adam (see Lk. 3); but, scholasticism apart, what he really values is, not the historical character of Adam, but the universal Saviourship of Jesus. (*i*) John 8 44 contains a reference to Satan which presupposes the reality of the temptation and fall of the first man, but is simply and solely dogmatic, and belongs to the peculiar dualism of the Fourth Gospel. (*k*) In 1 Tim. 2 12-14 the social doctrine of the subordination of women is *apparently* inferred from the story of the first woman's temptation.

The conclusion to which these phenomena point could be fully confirmed by a similar examination of (iv.) *Apocrypha* passages — even, the references in 4 Esd., which imply so much brooding over the Paradise story, being in close connection with the typical theory of the early narratives, and the whole system of thought being quite as much based on the imaginative book of Enoch as on the sober narrative in Gen. 2-3. As a final proof that a historical character could not be assigned to the latter in the early Christian age, it is enough to refer to the Book of Jubilees (first cent. A.D., but before 70), which, at any rate in its view of the biblical narratives, represents the mental attitude of the times. Here the biblical stories are freely intermixed with legendary and interpretative matter (see Charles's translation).

We conclude, therefore, that the NT writers, whether purely Jewish or touched by Greek influences, regard traditional facts chiefly from a didactic point of view, as furnishing either plausible evidence for theories derived from other sources or at any rate homiletical illustrations.

3. Names 'Adam' and 'Eve.' The literal and historical acceptation of the story in Gen. 2 4*b*-4, which strong church authority still considers 'nearer to the truth than any other interpretation as yet propounded,'[1] may be supposed to be required by the phenomena of the narrative itself. Is this the case? First, are the proper names Adam and Eve found in the original story of Eden? The facts are these.

(*a*) Adam (אָדָם; αδαμ), as a quasi proper name for the first man (cp ENOSH), belongs with certainty only to P_2 (Gen. 5 3-5),[2] who has used it just before generically, in the sense of 'man' or 'men' (Gen. 5 1 ἀνθρώπων [AL]) followed by τὸν Αδαμ [*ib.*] (cp 1 26 27). The Yahwist (J) habitually uses the term הָאָדָם, 'the man. Once, however, if the text be correct,[3] we find אָדָם (ādām) used generically for 'man' or 'men' (2 20*b*), and once in lieu of a proper name subsequently to the birth of Cain and Abel (4 25), if we should not rather refer 4 25 *f.* to an editor. The conclusion is obvious. It is a true insight which is expressed in the quaint old couplet in Exeter Cathedral,

> Primns Adam sic pressit Adam, salvet Deus illum,
> Is qui venit Adam quærere factus Adam.

'Adam' can be used only in one of two senses (1) mankind, (2) the first man (apart from all historical reference), and to compare a supposed proper name Adam[4]

[1] Bp. John Wordsworth, *The One Religion* (Bampton Lectures for 1881), p. 138. So Bp. H. Browne in the *Speaker's Comm.* and Dr. Leathes in Smith's *DB*(2).

[2] In Gen. 2 19-23 3 8 *f.* 20 4, RV has rightly 'the man (=הָאָדָם) for 𝔊 AV 'Adam'; so in Dt. 32 8 'children of men' for 'sons of Adam': so EV mg. in Job 31 33 'after the manner of men' for 'as [like] Adam' (𝔊 otherwise 1 25). In 𝔊AL the article is omitted in Gen. 2 19 6 20*a* 23 3 12 [L] 20 4 1 25 Dt. 32 8 1 Ch. 1 1 (𝔊B also in the last two passages).

[3] In 2 20*b* 3 17 21 read לָאָדָם 'for the man' (τῷ Αδαμ [AEL]) with Schr., Dillm., and Kau. *HS*.

[4] The present writer can see no probability in the view of Hommel (*PSBA*, 7th March 1893, pp. 244 *f.*) that Adam in Gen

to that of the Babylonian divine hero Adapa (Sayce, *Crit. and Mon.* 94), or, stranger still, to the Egyptian Atum (Lefébure, *TSBA* **91**) are specimens of equal audacity. The word *'ādām* is of course earlier than any developed creation-myth (*sit venia verbo*), though it implies (cp Ass. *admu*, 'child'—*i.e.*, 'one made' by God),[1] the existence of the central element of all such mythic stories (see CREATION, §§ 20 *f.*).

(b) We must now proceed to consider the name Eve (Hawwah חַוָּה; Gen. 3 20 AV mg. CHAVAH. RV mg. HAVVAH, ζωη [AL], Aq. ***Aua,*** Symm. **Ζωογόνος**, elsewhere ευα [BAL]; ܚܘܐ; *HEVA*). This undoubtedly occurs as **a** proper name (**3 20 4 1**); but it is most probable that *3 20* formed no part of the original story, and that in **4 1** the name Eve is a later insertion.[2] Can its meaning be recovered? According to 3 20 Eve was so called 'because she was the mother of all living' (חַי). This suggests the meaning '**a** living being,' or, less probably, because an abstract conception, 'life' (𝔊AEL Ζωή).[3] It is also possible, no doubt, to compare 1 S. 18 18 (Kau. *HS*) and render 'mother of every kindred,'[4] in which case Eve (חַוָּה) will mean 'kinship,' or more strictly 'mother-kinship,' the primitive type of marriage being supposed to be based on mother-kinship (cp Gen. 3 20). It is best, however, to adhere to the first explanation, if we qualify this with the admission that Hawwah may possibly be a Hebraised form of a name in a non-Hebraic story.

Next, did the writer of the Eden story understand it *historically*? There are at least three points which must be regarded as decisive against this view.

4. The Narratives.

(1) The *naïveté* of the description. The same writer (J), in Nu. 22 28, ascribes the speaking of Balaam's ass to a special divine interference; but the speaking serpent and the enchanted trees in Gen. 2 *f.* appear as if altogether natural. Why? Because the author has no fear of being misunderstood. He knows, and his readers know, that he is not dealing with the everyday world, but with a world in which the natural and the supernatural are one. (2) The idealism of the narratives. The writer chiefly values certain ideas which the narrative is ***so*** arranged as to suggest. '(3) The total disregard of the contents of these stories in the subsequent narratives of the Yahwist. To these most critics will add (4) the licence which the Yahwist appears to have taken of adding certain features to the primitive story, *e.g.* at any rate the tree of the knowledge of good and evil. It is not safe to add ***(5)*** the poetical *form* of the story in Gen. 2 4b-3 (Briggs), for all that seems probable is that this story is ultimately based to some extent on lost poetical traditions.

It is equally certain, however, that the writer of our Eden story did not explain it *allegorically*. Reverence for tradition must have assured him that the kernel of it at any rate was trustworthy. After purifying the traditional story by the criticism of his religious sense, he must have supposed it to give **an** adequate impression of what actually took place once upon **a** time. Kant, among his other services in refutation of the nnhistorical rationalism of the last century, has the merit of having forcibly recalled attention to the fact that the narrative of Genesis, even if we do not take it literally, must be regarded as presenting a view of the beginnings of the history of the human race (*Muthmasslicher Anfang* **der** *Menschengeschichte*, **1786**).

What, then, is the Eden story to be called? It is a problem which there is a growing disposition to solve by adopting, in one form or another, what is called the *mythical* theory. The story cannot indeed be called **a** myth in the strict sense of the word, unless we are prepared to place it on one line with the myths of heathenism, produced by the unconscious play of plastic fancy, giving shape to the impressions of natural phenomena on primitive observers. Such a course is to be deprecated. The story of Gen. 2 4b-3 has been too much affected by conscious art and reflection to be combined with truly popular myths. Hermann Schultz has coined the expression 'revelation-myth'; but this is cumbrous, and may suggest to some an entirely erroneous view of the pre-Deuteronomic conception of revelation (cp Smend, ***AT*** *Rel.-gesch.* **86,** ***292***). The truth is that the story of Eden cannot be described by a single phrase. The mythic elements which it contains have been moralised far enough for practical needs, but not so far as to rob it of its primeval colouring. The parallel story in the Zoroastrian Scripture called Vendidad (Fargard ii.) is dry and pale by comparison. In its union of primitive concreteness with a nascent sense of spiritual realities our Eden story stands alone.

There is therefore no reason for shutting our eyes to the plain results of historical criticism. It is only when, as was the case when the late George Smith made his great discoveries (see his *Chaldean* ***Genesis)***, Babylonian myths are adduced as proofs of the historicity of Gen. 1-11, that they may truly be called ἄδωρα δῶρα. It is not the mythic basis, but the infused *idealism* of the Eden story, that constitutes its abiding interest for religious men; and it was owing to **a** sense of this, quite as much as to **a** desire to harmonise Greek philosophy with Scripture, that the allegoric spiritualism of Alexandria found so much favour in Greek Christendom. From the point of view of the pre-critical period this system could not but commend itself to earnest and devout thinkers. Who, said Philo, could take the story of the creation of Eve, or of the trees of life and knowledge literally? The ideas, however, which the sage derives from the stories are Greek, not early Jewish. For instance, his interpretation of the creation of Eve is plainly suggested by a Platonic myth. The longing for reunion which love implants in the divided halves of the original dual man is the source of sensual pleasure (symbolised by the serpent), which in turn is the beginning of all transgression. Eve represents the sensuous or perceptive part of man's nature, Adam the reason. The serpent therefore does not venture to attack Adam directly. It is sense which yields to pleasure, and in turn enslaves the reason and destroys its immortal virtue. These ideas are not precisely those which advocates of **a** mystical interpretation would put forward to-day. There is an equal danger, however, of arbitrariness in modern allegorising, even though it be partly veiled by reverence for exegetical tradition. It is only by applying critical methods to the story, and distinguishing the different elements of which it is composed, that we can do justice to the ideas which the later editor or editors may have sought to convey.

For a discussion of 'Biblical Mythus' see Schultz, *OT Theol.*, c. 2, and cp Smend, ***AT*** *Rel.-gesch.* **113**, 119-122; WRS *RS*(2) 19, 446. On the Avesta parallels, see Darmesteter, ***Le Zendavesta,*** tome *3*, pp. 57 *ff.*, and Kohut, 'The Zendavesta and Gen. 1-11,' *JQR* ['90], 223-229. On apocryphal romance of Adam and Eve, see below, APOCRYPHA, § 10. T. K. C.[1]

ADAMAH (אֲדָמָה). 1, One of the 'fenced cities' of Naphtali (Josh. 19 36† αρμαιθ [B], αδαμ[ε]ι [AL]).

5 1-5 is altered from Adon *i.e.* Yahu or Ea. We have no right to take our critical startink-point in **a** list given to **us** only in P, apart from this, the theory that the lists of the patriarchs in Gen. **4** and ***5*** are derived, as they stand, from Babylodian lists is scarcely tenable (see CAINITES, §§ 4 *ff.*).

1 To the proposal of Wi. (*AOF* 344, following Stucken) to connect אדם with Ar. *adamat*[un], *adīm*[un], 'skin,' Del.'s note on Gen. **27** (*Gen.*(5) **77**) will suggest a probable answer.

2 **Cp** Bu. *Urgesch.* 141, 212 *f.*; St. ***ZATW***, 1894, pp. 266 *ff.*

3 Nöld. however (with We. [see now *Heid.*(2) 154] and St.), thinks that חַוָּה properly meant 'serpent' (Aram. חִוְיָא), *ZDMG* **42** 487. The Midrash (***Ber. rab.*** par. 21, on Gen. **3** 20) actually compares the same Aram. word, explaining the name thus, 'She was given to Adam to glorify his life, but she connselled him like **a** serpent.' This hardly favours Nöld.'s suggestion.

4 **WRS** *Kin.* 177. But note that כָּל־חַי and כָּל־הָחַי are standing Hebrew phrases (see BDB ***Lex.)***.

1 The above article **is** written on the lines and sometimes **in** the words of **WRS.**

Apart from its being mentioned along with Chinnereth and Ramah and Hazor we have no clue to its site (cp Di. *ad loc.*). Cp ADAMI.

2, see ADAM, i.

ADAMANT (שָׁמִיר, *adamas;* see below, § 4). In modern English poetry and rhetorical prose—for the word is now not otherwise *used*—*adamant* is simply a term for 'the embodiment of surpassing hardness.'

1. Modern corundum. In the EV of OT it can be retained only if understood in the sense in which it is employed by Theophrastus—*i.e.*, in the sense of corundum (see § 2). This is crystallised alumina (Al_2O_3), an excessively tough and difficultly frangible mineral; transparent or translucent; vitreous, but pearly to metallic on basal face. Emery is a compact, crystalline, granular variety—grey to indigo-blue. In a purer state corundum occurs in transparent crystals of various tints of colour—red (Ruby), blue (Sapphire), green (Oriental Emerald), yellow (Oriental Topaz), purple (Oriental Amethyst), colourless (White Sapphire)—little inferior to the diamond in brilliancy, though they do not disperse rays of light to the same extent.

The term ἀδάμας, which is not known to Homer, was applied by the Greeks to that substance which from time to time was the hardest known.

2. *adamas* of the Greeks. In Hesiod it means hardened iron or steel, and the adamantine bonds by which Prometheus was fastened to a peak of the Caucasus (Æsch. *PV* 6, 64) must have been of this material, for the manufacture of which the tribes near the Caucasus, such as the Colchians and the Chalybes, were famous. The ἀδάμας of Theophrastus, however, though it is not included in his list of twelve stones used for engraving on, nor mentioned as employed in the art of engraving—was (1) a stone and (2) probably the white sapphire (a corundum). This is probable from the fact that a particular kind of carbuncle (ἄνθραξ) found near Miletus and described as hexagonal (γωνιώδης ἐν ᾧπερ καὶ τὰ ἑξάγωνα) was compared to it. For noble corundums (sapphires, rubies, oriental topaz, and oriental emerald) are, as a matter of fact, found as hexagonal prisms. It is most unlikely that Theophrastus meant the true diamond (see DIAMOND, § 1), though Pliny (*NH* xxxvii. 415) confuses with this his *adamas,* which—being hexagonal (whereas the diamond would be rather described as octohedral, or a double pyramid)—was, like that of Theophrastns, the white sapphire. As, however, Manilius (1st cent. A.D.) knows the real diamond—he says 'sic adamas, punctum lapidis, pretiosior auro est' (*Astronom.* iv. 926)—it is quite possible that Jerome (in the Vg.) meant by *adamas* the actual diamond; though in that case he was almost certainly wrong (see DIAMOND, § 1).

In the three places where Vg. uses *adamas, adamantinus,* it is to render the Hebrew *shāmīr,* a word which

3. *Shamir* of OT = corundum. may mean either 'sharp-pointed' or 'tenacious.' In each passage the reference is not to a brilliant gem but to something extremely hard: 'harder than flint' (Ezek. 39); parallel to 'a pen of iron' (Jer. 171); similarly Zech. 7 12. In the Pesh. *shāmīr* appears in the Syr. form *šammīrā.* Although the Arabic forms *sāmūr^un^* and *šammūr^un^* are identified by the native lexicographers with *'almās,* 'diamond,' the Syriac *šammīrā* is used not only of ἀδάμας as the 'hardest stone'—employed in cutting others (Bar Bahlūl, *Lex.* col. 39 *l.* 14, col. 863 *l.* 1), or in similes, for something hard (Isaac of Antioch, ed. G. Bickell, 2 62, *l.* 39)—but also definitely as = σμύρις or σμίρις, ܫܡܝܪܐ ܣܡܝܪܝܣ (Duval-Berthelot, *La Chimie au moyen âge,* 2 9, *l.* 5). There is some probability, therefore, in Bochart's suggested connection of שמיר with σμύρις (whence the English emery), which meant both corundum itself and granulated corundum, emery. Diosc. (v. 166) says:—'σμύρις is a stone with which gem-engravers polish gems,' and Hesychius (*s.v.* σμύρις), 'a kind of sand with which hard stones are polished.' The σμιρίτης λίθος of 𝔊 (Job 41 7 [15] [BKC]; -τος λ. [A]; = חותם צר of MT = 'a close seal' of EV, *v.* 15) is the same as the σμύρις of Dioscorides, by which he meant corundum in mass. Hesychius plainly means cotundum in grains—*i.e.* emery. The latter, called Naxium by the Romans (Pliny, *HN* xxxvi. 7 10) from the island of Naxos, where it is still produced in great quantities, was much used by the Greek gem-engravers of the fourth century B.C. Indeed corundum and emery were the only means of cutting gems known to them up to that time. For Theophrastus (*Lap.* 44), writing in 313 B.C., speaks of it alone as used by the engravers. He identifies it with the stone from which whetstones were made, and says that the best came from Armenia. Both corundum and emery are found in many places in Asia Minor, as well as in several of the Greek islands.

EV renders *shāmīr* by *adamant* only in Ezek. 3 9 and Zech. 7 12. In the remaining passage, Jer. 171, it less

4. The versions. happily renders it *diamond.* The word adamant occurs also in Ecclus. 16 16 AV; but RV, following 𝔊^BℵA^, omits the passage.

Vg. and Pesh. have been already dealt with (§ 3). 𝔊 in Ezek. 3 9 (διὰ παντός [BAQ]) and Zech. 7 12 (ἀπειθῆ [BℵAQΓ]) represents another reading, while in the case of Jer. 17 1 it omits the whole passage [BAℵQ] (though the verses appear in the Compl. Polygl. and, following Orig. and Theod., on the mg. of Q, where שמיר is rendered by [ὄνυχι] ἀδαμαντίνῳ). Wid Zech. 7 12 cp 4 Macc. 16 13. Strangely 𝔊 renders אֲנָךְ by ἀδάμας in Am. 7, EV PLUMBLINE. In the Targum שמיר is identified with חלמיש (see FLINT), although the Talm. regards it as a worm, abont which extraordinary legends are told (see reff. in Buxt. *Lex.* or Levy (*NH W-B s.v.*),[1] and Paul Cassel in a monograph ('56) tried to show that שמיר was an excessively fine, dust-like substance. W. R.

ADAMI. See below, ADAMI-NEKEB.

ADAMI-NEKEB, as RV, or more correctly, ADAMI-HANNEKEB (אֲדָמִי הַנֶּקֶב), *i.e.* the pass Adami, on the frontier of Naphtali, Josh. 19 33†; cp Vg. *Adami quæ est Neceb.* AV makes two names, 'ADAMI, NEKEB.' So 𝔊, αρμε και ναβωκ [B], or αρμαι και νακεβ [A]; L, however, αδεμμη αννεκβ. The Jer. Talm. (*Meg.* 1 1) also divides the expression, Adami being represented as *Dāmīn,* and Hannekeb as *Caidatah.* Neub. (*La Géog. du Talm.* 222) and GASm. (*HG* 396) identify Adami with Dāmieh, 5 m. W. of Tiberias, the site which the PE Survey proposes for the 'fenced city' Adamah of *v.* 36 (*Mem.* 1384). This, however, seems much too far S. when we consider that the 'tree of Bezaanim' (see BEZAANANNIM) was close to Kedesh, while JABNEEL (*q.v.* n. 2) appears to have been a north Galilæan fortress. These are the two localities between which Adami-nekeb is mentioned in Josh. 19 33. It is probable that the name Nkbu in the Karnak list of Thotmes III. (*RP*^(2)^ 547) means the pass Adami. T. K. C.

ADAR, RV, more correctly, ADDAR (אַדָּר; [εις] σαραδα [B], αδδαρα [AL]), an unknown site mentioned after HEZRON (*q.v.*) as one of the points on the southern frontier of Judah (Josh. 15 3†).

ADAR (אֲדָר [Aram.], Ezra 6 15†; אֲדָר [Heb.]), Esth. 3 7 13 8 12 9 1-19; 1 Macc. 7 43 49; 2 Macc. 15 36). See MONTH, §§ 3, 5.

ADASA (αδαςα [AKV]), the scene of the victory of Judas the Maccabee over Nicanor (1 Macc. 7 40 45), lay, as is implied in the narrative, not very far from Beth-horon. Josephus (*Ant.* xii. 105) makes its distance from Beth-horon 30 stadia, and Jer. and Eus. call it a village near Gophna (OS, 93 3 220 6). Gophna being obviously the modern *Jifna* between Jerusalem and Shechem, it is reasonable to identify Adasa with the ruin *'Adaseh,* on a bare shapeless down, 8 m. S. of that place (*PEF*

1 Cp Leopold Löw, 'Graphische Requisiten n. Erzeugnisse bei den Juden' ('70), pp. 181-83, in *Beitr. z. jüd. Alterthumskunde,* Bd. 1 of the Leipzig 'Institut zur Forderung d. israel. Literatur.'

Mem. 3106). The remark of Eus. that Adasa belonged to Judah, at which Jer. expresses so much surprise, rests on a confusion between ἀδασα, the 𝔊^A reading of HADASHAH (*q.v.*) in Josh. 15 37, and the place of like name in the passage before us.

ADBEEL (אַדְבְּאֵל, ΝΑΒΔΕΗΛ [AEL in Gen., A in Ch.]; -ΔΑΙΗΛ [*D* in Gen., B in Ch.]; ΑΒΔΙΗΛ [L in Ch.]; ΑΒΔΕΗΛΟϹ [Jos. *Ant.* i. 12 4]; cp Sab. אדבל; see Ges.-Bu. *s.v.*), one of the twelve sons of Ishmael (Gen. 25 13; 1 Ch. 1 29†). Doubtless the Arabian tribe Idibi'il, mentioned by Tiglath-pileser III. (*KB* 2 20 *l.* 56) with Tema, Sheba, and Ephah, but distinct from the Idibi'ilu named in inscriptions of the same king, who was a *Ḳipu*—*i.e.*, not 'warden of the marches' but 'governor' (of the N. Arabian land of Muṣri. See MIZRAIM II. [*b*]). Cp Wi. *Altor. Forsch.* 25. For a slightly different view, see ISHMAEL, § 4 *(3)*.

ADDAN (אַדָּן, § 57, connected with the divine name Addu; see HADAD, ADONIRAM), the name, or part of the name, of an unidentified town or district in Babylonia, mentioned in the great post-exilic list (see EZRA, ii. § 9); Ezra 2 59 (ΗΔΑΝ [BAL]) = Neh. 7 61, ADDON (ΗΡΩΝ [BℵA], ΗΔΑΝ [L]) = 1 Esd. 5 36, where אדן is represented by *-alar*, *-alan* of AV CHARAATHALAR, RV CHARAATHALAN (. . . αλαν [B], [AS] αλαρ [A], . . . ιδαν [L]). Cp CHERUB, ii.

ADDAR (אַדָּר), Josh. 15 3† RV, AV ADAR (*q.v.*).

ADDAR (אַדָּר), 1 Ch. 8 3†. See ARD.

ADDER. The details are given under SERPENT (§ 1, nos. 2, 4, 5, **6, 7)**. The Hebrew names are :

1. עַכְשׁוּב, *'akšūb* (Ps. 140 3 [4]†), generally believed to be a kind of adder. See SERPENT, § 1 (4).

2. פֶּתֶן, *pethen* (Ps. 58 4 [5] 91 13, AV **mg.** 'asp,' like AV elsewhere), also believed to be some species of adder or viper. See SERPENT, § 1 (5).

3. צִפְעֹנִי, *ṣiph'ōnī* (Pr. 23 32; mg. like text elsewhere, AV 'cockatrice,' RV 'basilisk,' 𝔊^BℵA, κεράστης; also Is. 11 8 59 5 EV mg.), likewise some kind of viper. See SERPENT, § 1 (7).

4. צֶפַע, *ṣepha* (Is. 14 29 EV mg.). See SERPENT, § 1, no. 6.

5. שְׁפִיפֹן, *šĕphīphōn* (Gen. 49 17†, AV mg. 'arrow-snake,' RV mg. 'horned snake'), the *cerastes.* See SERPENT, § 2 (2).

ADDI. 1. The sons of Addi in 1 Esd. 9 31 (αδδειν [B], αδδι [A], εδνα [L]) appear to take the place of the b'ne Pahath Moab of Ezra 10 30; but the name probably represents ADNA (*q.v.*, no. 1), the first in the group. In 𝔊^L the missing name is restored, but without 𝔊^L's usual ἡγουμένου (see PAHATH-MOAB).

2. Twenty-fourth in the ascending genealogical series, which begins with Joseph, Mary's husband, in **Lk.** 3 **23-38** (αδδει [Ti. WH following BℵA]). See GENEALOGIES OF JESUS, § 3.

ADDO (ΑΔΔΩ [A], etc.), 1 Esd. 6 1. See IDDO, iii. *3.*

ADDON (אַדּוֹן), Neh. 7 61 = Ezra 2 59, ADDAN.

ADDUS. 1. The sons of Addus, one of the groups added in 1 Esd. 5 34 [BA] (αδδους, see Swete; perhaps corresponding to Αττιλ [L]) to the 'sons of the servants of Solomon' (see LEVITES) in the great post-exilic list, Ezra 2 = Neh. 7 = 1 Esd. 5; see EZRA, ii. § 8.

2. 1 Esd. 5 38. RV JADDUS. See BARZILLAI, 3.

ADER (עֵדֶר), 1 Ch. 8 15†, RV EDER (*q.v.*, ii. 1).

ADIDA (ΑΔΙΔΑ [A]), 1 Macc. 12 38 13 13. See HADID.

ADIEL (עֲדִיאֵל, § 38, 'God passes by'?—cp Adaiah).

1. One of the Simeonite chieftains who dispossessed the Meunim (see RV), 1 Ch. 4 36† (εδιηλ [A], αδαηλ [L], perhaps αωσαλ [B]). See GEDOR, 2, and HAM, ii.; and Cp AMALEK, § 4.

2. A priest in the genealogy of Maasai (1 Ch. 9 12† αδιηλ [BAL]).

3. Ancestor of AZMAVETH, *q.v.*, ii. 4 (1 Ch. 27 25† ωδιηλ [BAL]).

4. See ADUEL.

ADIN (עָדִין, § 57, perhaps shortened from יְהוֹעַדִּין, 'Yahwè is pleasant,' cp JEHOADDAN, EDEN 1; ΑΔ[Ε]ΙΝ [BA], ΑΔΔΕΙ [L], *ADIN*).

The b'ne Adin, a family in the great post-exilic list (see EZRA, ii. § 9); Ezra 2 15 (αδιν [B], αδδ. [A], εδδει [L]) = Neh. 7 20 (ηδ[ε]ιν [BA]) = 1 Esd. 5 14 (αδειλιου or -ιας [B], αδινου [A], RV ADINU). A band of fifty males of this family came up with Ezra; Ezra 8 6 = 1 Esd. 8 32 (ADAN αμιναδαβ [L], *i.e.*, Adin and Ebed, the name of their head). The family was represented among the signatories to the covenant, Neh. 10 16 [17] (ηδ[ε]ιν [BℵA], αδειν [L]). See EZRA: i. § 7.

ADINA (עֲדִינָא, 'blissful,' cp under ADIN; ΑΔ[Ε]ΙΝΑ [BAL]; *ADINA*), a Reubenite chieftain in David's service (1 Ch. 11 42†). See DAVID, § 11 *a*, ii.

ADINO, 'the Eznite,' is appended unexpectedly in EV of 2 S. 23 8 to the description of David's principal hero.

The readings of 𝔊 are: αδεινων ο ασωναιος [B], αδειν ο -ναος [A], with the doublet (ουτος) εσπασατο την ρομφαιαν αυτου [in B, though not in A] from 1 Ch. 11 11 (BℵAL], where A* has εσπατο . . . . 𝔊^L, however, gives the single rendering [of a different text], ουτος διεκοσμει την διασκευην αυτων.

A comparison of *v.* 18 shows that what is required to make sense is 'brandished his spear,' עוֹרֵר אֶת־חֲנִיתוֹ, and these words are actually given in 1 Ch. 11 11 in lieu of עדינו העצנו, the words out of which MT (reading העצני) and its followers including EV vainly attempt to extract sense. Modern critics (except Klo.) correct MT in accordance with 1 Ch.

Klo.'s correction, 'He is our pride, he is our terrible one' (after which he ventures to render עַל 'because of') = הוּא עֶדְיֵנוּ הוּא עָרְצֵנוּ, words which are supposed to be a quotation from a warlike song referring *to* this hero, is too ingenious. The words might, it is true, be viewed as a misplaced marginal quotation relative to *David;* but then we should still have to supply some verb as a predicate to complete the account of David's warrior. See ISHBAAL; JASHOBEAM.

ADINU (ΑΔΙΝΟΥ [A]), 1 Esd. 5 14 RV; AV, RV mg. ADIN.

ADINUS, RV IADINUS (ΙΑΔ[Ε]ΙΝΟϹ [BA]), 1 Esd. 9 48 = Neh. 8 7, JAMIN.

ADITHAIM (עֲדִיתַיִם; on form of name see NAMES, § 107; ΑΓΕΘΘΑΙΜ [L]; BA om., but in v. 34 A has ΑΔΙΑΘΑΕΙΜ and B has ΙΛΟΥΘΩΘ for 'Tappuah'), an unknown site in the Shephēlah of Judah, apparently somewhere in its NE. portion (Josh. 15 36†).

ADLAI (עַדְלַי; ΑΔΑΙ [BA]; ΑΔΛΙ [L]; *ADLI;* 1 Ch. 27 29†), see SHAPHAT, 5.

ADMAH (אַדְמָה, ΑΔΑΜΑ [BAL]) and Zeboim (Hos. 11 8 EV, Gen. 10 19 AV, Dt. 29 23 [22] AV), or, as in Gen. 14 2 8 EV and everywhere RV except in Hos., Zeboiim (Hos. 11 8 Kt. צְבֹאִים, probably = צְבֹעִים [see below]; Gen. 10 19 Kt. צְבִיִם; 14 2 8 Dt. 29 23 [22] all Kt. צְבֹיִים; Kr. everywhere צְבוֹיִם; ϹΕΒΩΕΙΜ [BAL]; Samar. text om. both names in Gen. 10 19; σαδαμα [E] in Gen. 14 2), are mentioned together in passages of the Pentateuch and in Hos. 11 8. In Gen. 14 2 8 they are stated to have had kings of their own (see SHINAB) who joined in the revolt of certain southern peoples against Chedorlaomer king of Elam; in Dt. 29 23 [22] (σεβωειν [AF]) to have shared the fate of Sodom and Gomorrah. In Gen. 10 19 (σεβωιμ [A]) they are mentioned in the definition of the boundaries of Canaan proper—*i.e.*, the land W. of the Jordan. Except in Hos. 11 8 the names Admah and Zeboim are always preceded by those of Sodom and Gomorrah. Of the Pentateuch passages all except Gen. 10 19 are certainly post-exilic, and it is very possible that Kautzsch and Socin are right in regarding the mention of Gomorrah, Admah, and Zeboim in Gen. 10 19 as interpolated. In this case we have no right to assume it as certain that Admah and Zeboim were among the cities which an early Hebrew tradition stated to have been destroyed by brimstone and fire out of

heaven. Hos. 11 8 (imitated perhaps in Is. 15 9[1]) only implies that Admah and Zeboim had suffered some terrible destruction. As to the mode of their destruction and as to their locality no information is given. It is, in fact, not at all likely that the least famous of the 'cities of the plain' should have been selected by Hosea as representatives; Amos (4 11) and Isaiah (1 9 10) mention only Sodom and Gomorrah. It is possible that there was once some distinct legend respecting the destruction of Admah and Zeboim. Possibly, too, Zeboim was not a town, but the name of the district in which Admah was situated. Against this we must not appeal to Gen. 14 2, since the names of the kings there given are probably unhistorical. Nor can one help conjecturing that (if, as Rodiger, in Ges. *Thes.* suggests, צְבֹעִים=צְבֹאִים) Hosea alludes to a story which accounted for the dreary character of the Valley of Zeboim (now the *Wādy el-Ḳelt*; see ZEBOIM, 1), analogous to that connected with the valley of ACHOR. Such stories of overthrown villages are not uncommon. See SODOM AND GOMORRAH. T. K. C.

ADMATHA (אַדְמָתָא), one of the 'seven princes' (cp Ezra 7 14) at the court of Ahasuerus (Est. 1 14†; [BAK, L om.]). According to Marquart, however, these seven names have arisen from an original three (cp the *three* satraps, Dan. 6 1 *f.*) of which CARSHENA (*q.v.*) is one, Shethar and Tarshish are corrupt variations of the second (see SHETHAR), and Meres and Marsena corruptions of the third (see MARSENA). Admatha (or rather המדתא) would then be the father of Haman, and for ממוכי (cp note to MEMUCAN) should be substituted האגגי (the designation applied to Haman). See, further, *Fund.* 68 *ff.* Cp ESTHER, § 3.

ADMIN (αδμειν [BK]), a link, in the genealogy of Joseph, between Amminadab and Arni (Aram), in Lk. 3 33 RV mg. and W & H. See GENEALOGIES OF JESUS, § 3.

ADMINISTRATION. See GOVERNMENT.

ADNA. 1. (עַדְנָא [Ginsb. *q.v.*], עַדְנָה [Bä.]) One of the b'ne PAHATH-MOAB in the list of those with foreign wives (see EZRA, i. § 5 end), Ezra 10 30 (αιδαινε [B], εδ. [B[ab]], εδνε [A], αιανασηιε [L combining with next name, which in 1 Esd. 9 31 (L) is σιδια], εδενεχ' ηλ [א= Adna + following name, CHELAL]) = 1 Esd. 9 31 (εδνα [L]), ADDI, 1. With this name should be compared Hadauna, a Jewish name of the fifth century B.C., mentioned by Hilprecht as found at Nippur (cp Ḫazitu = עַזָּה).

2. (עַדְנָא [Ginsb. Bä.]), priest temp. Joiakim (see EZRA, ii. §§ 6 *b*, 11), Neh. 12 15 (αδανας [א[c.a mg. inf.]], om. [Bא*A], εδνας [L]).

ADNAH (עַדְנָה; εδναας [BA], -ναс [L]), a captain in Jehoshaphat's army (2 Ch. 17 14).

ADNAH (עַדְנַח [Ginsb. Bä.], other readings עַדְנַח, עַדְנָה; εδνα [BאL], *Ednas*). A Manassite, who deserted from Saul to David (1 Ch. 12 20 [21]). See DAVID, § 11 *a* iii.

ADQNAI (אֲדֹנָי). See NAMES, §§ 119, 109 n.

ADONI-BEZEK (אֲדֹנִי בֶזֶק, in *v.* 7 with *makkēf*; αδωνιβεζεκ [BAL] Judg. 1 4-7; 𝔊 has αδωνιβεζεκ also in Josh. 10 13 where MT has Adoni-zedek; a third variation is αδωνιζεβεκ [Jos. Procop. 𝔊[codd.]]; the change may be accidental or harmonistic), a Canaanite king whom Judah and Simeon, invading southern Palestine, encountered and defeated at Bezeli. Adoni-bezek fled, but was overtaken, made prisoner, and mutilated. He was afterwards carried to Jerusalem, where he died (Judg. 1 4-7). The name Adoni-bezek is commonly interpreted 'Lord of (the city) Bezek'; but such a formation is entirely anomalous. In similar compounds (Adoni with proper name) the second element is regularly the name of a god, never of a place (there are, in fact, no Hebrew or Canaanite proper names of persons in the OT thus compounded with the name of a locality); nor is *'ādōn* used of the sovereign of a city or country. In Jos. 10 1 *ff.*, which, in spite of radical differences, is based on a source closely akin to that of Judg. 1, if not identical with it, the head of the native kings who first made front against the Israelite invasion of the S. is Adoni-zedelc, king of Jerusalem (see ADONI-ZEDEC); and it is to Jerusalem that Adoni-bezelc is taken (? by his own servants) to die (Judg. 1 7). Hence the conjecture offered under ADONI-ZEDEC appears very probable. See also BEZEK. G. F. M.

ADONIJAH (אֲדֹנִיָּה, 2 S. 3 4; 1 K. 1 5 7 18 2 28; 1 Ch. 3 2; Neh. 10 16 [17], elsewhere אֲדֹנִיָּהוּ; 'Yahwè is lord,' § 36; cp Phœn. ארנבעל, ארנאשמן; αδωνι[ε]ιας [BA], ορνια [L]).

1. David's fourth son (in 1 Ch. 3 2 αδων[ε]ια [BA; so also in 2 K. 2 21 *ff.*], ορνιας [L]). Nothing is known of his mother, Haggith. Like Absalom, he was born at Hebron (2 S. 3 4; ορνειλ [B], -νιας [A]); like him he was conspicuous by his graceful presence, while like all David's sons he never felt the constraint of his father's authority. Absalom's death left him heir to the throne, and 'all Israel,' as he said himself, 'expected that he would become king' (1 K. 2 15). He therefore, in the manifest failure of the old king's faculties, thought it time to assume a semi-royal state, like Absalom before him (1 K. 1 5). On his side were the old and tried servants of David—Joab, the commander of the forces, Abiathar, who represented the old priestly family of Eli, and had been the companion of David's wanderings—followed by the people as a whole (see 1 K. 2 15). The 'new men,' however, Benaiah, captain of the body-guard, and Zadok, a priest of origin comparatively obscure, looked with evil eyes on his pretensions, and with the powerful aid of the prophet Nathan espoused the cause of the son of Bathsheba. The chance of each party, unless David's death was to be followed by civil war, lay in a sudden stroke which would put their claimant in possession and overawe his opponents.

The story is graphically told, though perhaps with a secret sympathy with Adonijah. Nor can we doubt that, like the other narratives of the same writer, it is in the main trustworthy. Adonijah made the first move. He invited all the royal princes save Solomon, together with Job and Abiathar and 'all the men of Judah,' to a sacrificial feast at a well-known sacred stone (see ZOHELETH) close to Jerusalem (1 K. 1 9 *f.*). They had left the weak old king, however, exposed to the machinations of their enemies, while the fortress was in the hands of Benaiah and his trained soldiers. Nathan was quick to seize the opportunity. By the help of Bathsheba, and with a presentation of facts which may or may not have been perfectly accurate,[1] he obtained from David an order for the immediate enthronement of Solomon. Adonijah's banquet was disturbed by news that Solomon reigned by his father's will, and was protected by Benaiah and the foreign guard. The company broke up in dismay, and Adonijah sought an asylum at the horns of the altar. The clemency of Solomon, however, spared his life, and but for an ill-timed revival of his ambitious dreams he might have remained in a happy obscurity. The cause of his ruin was a petition to be allowed to marry Abishag, for which he obtained the support of Bathsheba. Apparently the queen-mother did not detect his secret political

[1] 𝔊 closes this verse thus, καὶ τὸ κατάλοιπον Ἀδαμα [BRA; μ sup. ras א[1]], *i.e.*, 'and the remnant of Admah.' This may possibly be correct (see Duhm, *Jes.* 105, Ch. *Intr. Is.* 91). Moab may be figuratively called Admah, just as Jerusalem is figuratively called Sodom (Is. 1 10).

[1] The question is whether the promise of Solomon asserted by Nathan in 1 K. 1 24 is a clever fiction of Nathan, or not, and whether the description of the doings of Adonijah is, or is not, exaggerated. The former point is the more important of the two. We. (*CH* 261 n.) and Ki. (*Hist.* ii. 180 *f.*) take different sides. We.'s reply is, of course, to us the less palatable one; but we must consider Semitic craftiness, and the improbability of a merely private promise of Solomon. See 1 K. 1 12 13.

motive; indeed Abishag had only nominally been David's concubine. Solomon, however, regarded the proposal as virtually, if not expressly, a claim to the throne, and Adonijah perished by Solomon's sentence and Benaiah's sword.

Compare the narrative of Stade (*GI* i. bk. v. c. 2), with the somewhat different treatment of the matter by Kittel (*Hist.* ii. c. 4). W. E. A.

2. A signatory to the covenant (see EZRA, i. § 7), Neh. 10 16 [17] (εδανια [BN (though the names are otherwise divided)], ααναα [A], αδωνιας [L]). In the great post-exilic list, Ezra 2 = Neh. 7 = 1 Esd. 5 (see EZRA, ii. § 9), and in the list (Ezra 8) of those who came with Ezra, the name appears (*vv.* 13 18 14 13 respectively) perhaps more correctly (so Gray, *HPN* 137, n. 2) as ADONIKAM (*q.v.*).

3. A Levite, temp. Jehoshaphat; 2 Ch. 17 8 (αδωνιαν [BA], -νια [L]).

4. See ARAUNAH.

5. See ARNAN.

ADONIHAM (אֲדֹנִיקָם; 'the Lord is risen up,' cp AHIKAM; αδωn[ε]ικαm [BAL]).

The b'ne Adonikam, a family in the great post-exilic list (see EZRA, ii. §§ 9, 8 *c*); Ezra 2 13 (αδωνικαν [B]) = Neh. 7 18 (αδεικαμ [B], αδενικαμ [א]) = 1 Esd. 5 14; represented in Ezra's caravan (see EZRA, i. § 2, ii. § 15 (1) *d*), Ezra 8 13 (αδανεικαμ [B]) = 1 Esd. 8 39 (αδωνιακαιμ [B]); and probably among the signatories to the covenant (see EZRA, i. § 7), Neh. 10 16 [17]; *see* ADONIJAH, 2.

ADONIRAM (אֲדֹנִירָם, § 40, 'the Lord is high'; αδωn[ε]ιpàm [BAL]; *ADONIRAM*), chief receiver of tribute under David (2 S. 20 24), Solomon (1 K. 4 6; 5 14 [28]), and Rehoboam, on whose deposition he was stoned to death by the Israelites (1 K. 12 18; 2 Ch. 10 18† הֲדֹרָם, HADORAM, αδωραμ [A]).

In 2 S. 20 24 (ιεζεδραν [L]) and 1 K. 12 18 (αραμ [B]; *Aduram*), it is incorrectly (cp We. Dr. *TBS*) written ADORAM (אֲדֹרָם). Hilprecht (*PEF Qu. St.*, Jan. '98, p. 55), indeed, attempts to explain the form by connecting it with Addurāmu ('Addu is high'), a Jewish name on a tablet from Nippur; notice, however, that נ is not expressed and that 𝔊BAL reads 'Adoniram.'

ADONIS only in the phrase נִטְעֵי נַעֲמָנִים (a double plur.), Is. 17 10 RVmg. 'plantings of Adonis' (EV has 'pleasant plants'). In justification of

1. OT reference. the rendering see Che. *Is.*[(3)] 1 108, Kittel in Di. *Jes.*[(6)] To Ewald (*Proph.* 2 116, *Lehrb. d. hebr. Spr.* 718, n. 3) and still more to Lag. (*Semitica*, 1 31, *Uebers.* 205, n.) is due this important correction of the rendering. Clermont-Ganneau should also be consulted (*Études d'archéol. orientale* 1, 1880, pp. 26 *ff.*), also WRS *Eng. Hist.* Rev., 1887, p. 307; but cp We. *Ar. Heid.*[(1)] 7 n. Na'aman (=pleasant, gracious) was doubtless a title of the 'Lord' (Adon, whence Adōnis), and Adonis-worship seems to have penetrated under this title into Syria and Palestine, as we gather from the OT name NAAMAN [*q.v.*], from the names Numāna and Nāmāna in S. Palestine in pre-Israelitish times (Thotmes III.), and from the *Nahr Na'mān* (N. of Carmel), which seems to be the Belus of the ancients. That Adonis-worship flourished in Palestine when Isaiah wrote can easily be believed. The N. Israelites were at this time specially open to Syrian influences. They 'forgot' Yahwè because he seemed unable to protect them. So Isaiah indignantly exclaims, 'Therefore, though thou plantest (little gardens with) shoots of Adonis, and stockest them with scions (dedicated) to a foreign god . . . the harvest shall vanish in a day of sickness and desperate pain.' The phrase 'shoots of Adonis' points to the so-called 'gardens of Adonis,' baskets containing earth sown with various plants, which quickly sprang up and as quickly withered. In reality they were symbols of the life and death of Adonis; but Isaiah takes the withering as an image of the withered hopes of Israel. On these 'gardens' see Frazer, *Golden Bough* 1 284 *f.*; WRS *Rel. Sem.*[(2)] 414; Ohnefalsch Richter, *Kypros* 132 *f.*; and cp Che. 'Isaiah,' in *SBOT* (Eng.), 146.

Adonis was one of those local gods who live with and in nature, who suffer in summer's drought, die with the winter, and live again with the early spring. Legend, however, explained the death of the god as

2. Legend and cult. an event of far-off times. Adonis, it said, was killed whilst hunting the boar in Lebanon, and accordingly in the heat of summer was solemnised the great mourning festival (cp WRS *Rel. Sem.*[(2)] 411), at which his corpse was exhibited resting upon a bed of flowers—the quickly fading Adonis-garden. Far up in Lebanon, near the fountain of 'Afka, death suddenly overtook him; whereupon the spring became red with his blood. By 'Afka was an ancient temple of the goddess Aphrodite (so Luc. *Dea Syr.* 9; Eus. *Vit. Const.* 3 55, Sozom. HE 2 5), of which the ruins still remain; probably it contained the grave of the god. This legend, and the cult connected with it, must be very ancient. Indeed, in a source as early as the papyrus Anast. I., mention is made of the goddess of the 'mysterious' city of Byblus. In its origin it was distinct from the Babylonian legend of the loves of Ištar and Tammuz, though at an early date both this legend and the Egyptian story of Osiris were combined with it (Plut. *de Is.* 15, Luc. *Dea Syr.* 7; cp Apollodor. ii. 1, 3, 7, etc.). The cult spread through all the Phœnician colonies, especially to Cyprus, whence in the seventh century it was imported into Greece. Adonis, however, is not to be taken as the true name of the god; every god can be called 'Adon,' lord, just as every goddess is entitled to be called Rabbath, 'the lady.' At Byblus (see GEBAL, i.) the favourite of the goddess of Byblus was invoked as the 'lord' *par excellence*, and thus it was that the Greeks came to call him Adonis. What his real name was we do not know; for the name Tammuz, which he also bears, is Babylonian, and it is doubtful whether it ever became naturalised in Phœnicia.

Possibly his name survives, unsuspected, among the many divine names. Or perhaps the recollection of his sad fate may have hindered the formation of proper names derived from his; nor is it impossible that in the worship he never received a real name at all.[1] For in point of fact Philo, who never mentions Adonis, says of a certain Eliûn (עליון) = ὕψιστος, that he lived with a woman named Berut in Byblus, that he was slain by wild beasts, and was afterwards deified, and that 'his children brought him libations and offerings.' This seems to be the euhemeristic version of the Adonis legend. Now in 'Ahedat in the neighbourhood of Byblus, where doubtless the village Saarna lay, there has been found an altar Διὶ οὐρανίῳ ὑψίστῳ Σααρναίῳ ἐπηκόῳ (Renan, 234), and although such attributes are of frequent occurrence in Syria, Renan is probably right in recognising in this 'highest god' the Eliûn of Philo, and Adonis. Moreover, according to Philo (ii. 10), the god Ἀγρούηρος ἢ Ἀγρότης, 'the farmer,' whose brother is called Ἀγρός, 'field' (*i.e.*, שָׂדֶה)[2] and who 'had a sacrosanct image and a temple carried about Phœnicia on wheels,' was honoured in Byblus as θεῶν ὁ μέγιστος. He also recurs in the Greek inscriptions. In Byblus a temple was erected under Augustus Διὶ ὑψίστῳ (Renan, 223; cp 232 θεῷ Ἀρτ . . .) and the same god had a temple deep in the recesses of the mountains near Kal'at Fakra to the SE. of Byblus (*CIG* 4525 . . . ἐκ τῶν τοῦ Μεγίστου θεοῦ ᾠκοδομήθη). The Phœnician name represented by Ἀγρούηρος is unknown. See TAMMUZ. T. K. C. § 1—E. M. § 2.

ADONI-ZEDEC, or rather **-Zedek**, as RV (אֲדֹנִי־צֶדֶק, 'Ṣedeḳ is lord,' cp MELCHIZEDEK, though to later readers the name very probably meant 'lord of righteousness'; αδωnιβεζεκ [BAL]; *ADONISEDEC*), a king of Jerusalem at the time of the Israelitish invasion. See Josh. 10 1 *ff.*, where he leads a confederation of five kings of S. Canaan. According to Josh. 10, Joshua came from Gilgal to the relief of the Gibeonites threatened by the coalition; surprised and completely routed the army of the Amorite kings near Gibeon; captured the five kings in the cave of Makkedah; put them to death and impaled their bodies; then, turning back, razed Lachish, Eglon, and Hebron, with many other cities in the region. This story stands in a narrative of the

1 𝔊 φύτευμα ἄπιστον [BאAQΓ].

1 The inscription from the district of Hippo Diarrhytus (*CIL* viii. 1 1211) *sacerdos Adoni (sic)* proves nothing as to the cultus-name of the god; Adonis has here, as among the Greeks, become a proper name.

2 From the time of Scaliger it has been assumed that this name arose from a corruption or misunderstanding of שַׁדַּי (see SHADDAI). This is possible, but very far from certain.

conquest of all Palestine by Joshua in two great campaigns (Josh. 10 *f.*) which cannot be historical. A much more credible account is to be found, though in an abridged form, in Judg. 1 (see JOSHUA, § 8; JUDGES, § 3). Here Adoni-bezek is the king who opposes the first resistance to the advance of the tribes of Judah and Simeon against the Canaanites of the S. It is therefore in Budde's opinion (*ZATW* 7 148 ['87]) not improbable that the 𝔊 reading 'Adoni-bezek, king of Jerusalem' in Josh. 10 13 is correct, especially as Judg. 1 7 may be understood as saying that his own followers carried Adoni-bezek to Jerusalem, and so as implying that that city was his capital. The objection to this view is that the second element in Adoni-bezek ought to be a god, and we know of no god named Bezek. Hence it is very possible that Adoni-bezek in Josh. 10 [𝔊BAL] is a scribe's error, and that the original narrative of Judg. 1 had not Adoni-bezek, king of some nameless city, but Adoni-zedek, king of Jerusalem (see ADONI-BEZEK). W. R. S.—G. F. M.

ADOPTION (υιοθεσια), Ro. 8 15 23 9 4 Gal. 4 5 Eph. 1 5†. See FAMILY.

ADORA (see below) or **Adoraim** (אֲדוֹרַיִם; on form of name see NAMES, § 107; αδωραι [B], -μ [A and Jos. *Ant.* viii. 10 1], -ραμ [L]; *ADURAM*), mentioned with Mareshah, Ziph, and Lachish among the cities fortified by Rehoboam (2 Ch. 11 9†). The sites of all these places having been securely fixed, there can be no hindrance to identifying Adoraim with the modern *Dūra*, which is 5 m. W. by S. from Hebron, and is described by Robinson (2 215) as 'one of the largest (villages) in the district.' The site is well adapted for a town, being 'on the gradual eastern slope of a cultivated hill, with olive groves and fields of grain all round' (cp *PEF Mem.* 3 304). Under the new Egyptian empire an Adoraim is perhaps mentioned twice (WMM. *As. u. Eur.* 167, 174); but it is not clear that Rehoboam's city is intended. At any rate, Adoraim is doubtless the Adora or Dora of Josephus (*Ant.* xiii. 15 4 and elsewhere αδωρα, αδωρεος, δ.; C. *Ap.* 9 δωρα), and the ADORA of 1 Macc. 13 20 (αδωρα [AKV]). In the latter, Adora is a point on the route by which Tryphon entered Judæa; in the former, it is usually coupled as an Idumæan city, with Marissa (Mareshah), the fate of which it shared, being captured by John Hyrcanus and compelled to accept circumcision and the Jewish law (Jos. *Ant.* xiii. 9 1; *BJ* i. 2 6). T. K. C.

ADORAM (אֲדֹרָם), 2 S. 20 24; 1 K. 12 18†. See ADONIRAM.

ADRAMMELECH (אַדְרַמֶּלֶךְ, αδραμελεχ [BL], -λεκ [A]; Jos. -λεχος, ανδρομαχος).

1. A Babylonian deity. According to 2 K. 17 31, after 'the king of Assyria,' *i.e.*, Sargon (see SARGON), had transplanted the Sepharvites into Samaria, they there continued to worship Adrammelech and ANAMMELECH (*q.v.*), the gods of Sepharvaim. This passage presents two difficulties. In the first place, according to the biblical account the worship of Adrammelech was accompanied with the sacrifice of children by fire: 'they burnt their children in fire to Adrammelech and Anammelech.' Throughout the cuneiform inscriptions, however, there is no allusion to human sacrifice, and in the sculptures and reliefs no representation of the rite has been discovered. The second difficulty concerns the explanation of the name Adrammelech and its identification with some known divinity of Babylonia. The name was originally explained as *Adar-malik*, 'Adar the prince,' Adar being regarded as the phonetic rendering of the name of the god *Ninib*. This identification, however, was unsupported by any evidence, and has now been abandoned. A clue to the solution of the problem, however, is afforded by the statement that Adrammelech was a god of Sepharvaim, a city that is generally identified with Sippar (cp SEPHARVAIM). The god whose worship was especially centred at Sippar was Šamaš the Sun-god. That this was the case is abundantly proved by references throughout the historical and religious texts of the Babylonians and Assyrians, and the remains of the great temple of the sun-god exist in the mounds of Abu-Habbah at the present day. Some scholars, therefore, would see in Adrammelech a subsidiary name or title of the Sun-god himself. Others, however, do not accept this view. They strike at its chief support by repudiating the identification of ספרוים with Sippar, suggesting that it is to be identified with *Šabara'in*, a city mentioned in the Babylonian Chronicle. No satisfactory explanation of the name, therefore, has yet been offered. But cp NISROCH. L. W. K.

2. A son of the Assyrian king Sennacherib, who, according to 2 K. 19 37 (αδρεμελεχ [A]) and Is. 37 38 (αδραμελεχ [Bℵ¹AOQ], ανδραμ. [ℵ*]), in conjunction with his brother SHAREZER (*q.v.*), slew his father while he was worshipping in the temple of Nisroch at Nineveh, and thence escaped into Armenia. In the Babylonian Chronicle mention is made of this revolt, in which Sennacherib met his death; but the only trace of the name Adrammelech hitherto found is in Abȳdēnus under the form Adramelus, and in Polyhistor under that of Ardumusanus. Scheil however thinks that ADRMLK and Adramelus are corruptions of Aššur-MU-NI-IK (or -GAL), the idiographic reading of the name pronounced Ašur-šum-ušabši. This is the name of a son of Sennacherib for whom his father erected a house amidst the gardens of Nineveh. For analogies cp the royal name Sammughes = Šamaš-MU-GI-NA. The Ardumusanus of Polyhistor may be a corruption of the phonetic form given above, just as Σαοσδούχινος is Šamaš-šum-ukīn, the phonetic reading of Šamaš-MU-GI-NA. (See Scheil, *ZA* 12 1; *Rev. bib.*, April 1897.) Cp ESARHADDON, NISROCH.

ADRAMYTTIUM (αδραμυττιον or ατρ.; the adjective, which alone occurs in the NT, is, as in some cursive MSS of Acts, αδραμυττηνος or ατρ.; neither inscriptions nor coins give the form -ττηνος of Tisch. following ℵB³; W & H -υντη. after AB*). A seaport of Mysia, which gave, and still gives, its name to the gulf, a great triangular indentation along the S. foot of Mt. Ida, whence it was called also the 'Idæan.' Adramyteum, in the E. recess of the gulf, was always important. It would profit by the trade in timber from Ida. There were also copper mines in the neighbourhood, and iron mines at Andeira not far to the NW. Strabo (p. 606) describes it accurately as 'a colony of Athens, a city with a harbour and roadstead'; but its importance goes back to a much earlier epoch if, as Olshausen asserts (*Rhein. Mus. f. Phil.* '53, p. 322; cp Hazar-maveth), the name points to foundation by the Phœnicians. Of necessity Adramyteum was intimately connected with the road system of NW. Asia. The coast road from Ephesus and the inland road from Pergamus converged to Adramyteum, whence they diverged, on the one hand, across the Mysian peninsula to Cyzicus on the sea of Marmora, and, on the other, to Assos, Troas, and the Hellespont. Consequently, it became an assize town, or head of a *conventus juridicus*. Adramytian coasters such as that in which Paul performed the first stage of his journey to Rome (Acts 27 2†) must have been familiar visitors to Cæsarea and the Syrian harbours. *Adramyti* (*Edremid*), which preserves the old name, is 5 m. from the sea. Thus, Kiepert is perhaps right in putting the ancient town on an eminence by the sea, 8 m. SW. of the modern Adramyti (*Z. d. Gesellsch. f. Erdk.*, 1889, 292 *f.*). Nevertheless, Edremid is heir to the importance of Adramyteum. Silver mines are now worked in the hills behind the town. W. J. W.

ADRIA (εν τω αδρια, Acts 27 27 [BKA], *ADRIAS*; 'stony sea,' Wiclif), the division of the Mediterranean which lies between Sicily and Malta on the W. and Crete on the E. So the name is applied by Paus. v. 25 3 (speaking of the straits of Messina), ἐκ τοῦ Ἀδρίου καὶ

ἐξ ἑτέρου πελάγους ὃ καλεῖται Τυρσηνόν. Cp id. viii. 54 3. Procopius considers Malta as lying on the boundary (*BV* i. **14**: Γαύλῳ τε καὶ Μελίτῃ προσέσχον, αἳ τότε Ἀδριατικὸν καὶ Τυρρηνικὸν πέλαγος διορίζουσιν). Ptolemy distinguishes between the Adriatic *sea* and the Adriatic *gulf*. Acts reproduces the language of the sailors. For this extended application of the name cp Straho, who, writing about 19 A.D., says that the Ionian Sea is 'part of what is now called Adrias' (p. **123**). This implies that the ancient use of the word had been more limited. In mediaeval times the name was still more widely extended, being practically= 'Levant,' as opposed to 'Ægean' (cp Ram. *Paul* **298**. See MYRA). The question is connected with the identification of the island upon which Paul was cast (Acts 28 1) after fourteen days' drifting in Adria (see MELITA). We may compare the shipwreck of Josephus 'in the middle of the Adria' (κατὰ μέσον τὸν Ἀδρίαν) : he was picked up by a ship sailing from Cyrene to Puteoli (*Vit.* 3).

W. J. W.

ADRIEL (עַדְרִיאֵל, not 'God's flock,' but either (*a*) miswritten for עַזְרִיאֵל, 'God is helper' [cp forms of name in 𝔊, 2 S. **21** 8 below]; or (*b*) the Aram. form of Heb. עַזְרִיאֵל. The former view is adopted in NAMES, § **28**; the latter by Nestle, *ZDPV* 15 257; cp BARZILLAI; see also *HPN* 266 n. 1, 309 n. 8). Son of BARZILLAI (*q.v.*, n. **4**) the Meholathite, to whom Saul married his daughter MERAB (*q.v.*); 1 S. 18 19 (om. **B**; ιηλ (usually = ισραηλ) [A], εδριηλ [L]), 2 S. 21 8 (σερει [B], εσδρι [A], εζρι [L]).

ADUEL (αδουηλ [Bא], ναυη [A]; [Syriac], the great grandfather of Tobit (Toh. 1 1). No doubt another form of ADIEL (*q.v.*).

ADULLAM (עֲדֻלָּם, οδολλαμ [BAL], οδολαμ [B, 2 Ch.; B^a vid, Mi.; A, 1 S.], οδολλα [A, Josh. 15 35], αδαλλαμ [L *ib.*]; *ODOLLAM*, variants *ADU(L)LAM*, *ODOLAM*, *ODULLAM*; gentilic עֲדֻלָּמִי, **Adullamite,** οδολλαμ[ε]ιτης [ADEL], -μητης, οθολλαμιτης [E]), a town in the Shephelah (Josh. 15 33 35), with a changeful history. For a considerable time it seems to have remained Canaanitish. We still have a legend in Gen. 38 1 *f.* (J) which describes the fusion of Judahite clans with a Canaanitish clan whose centre was Adullam. This fusion had apparently not been accomplished in David's time, for Adullam was still outside the 'land of Judah' when David took refuge there (1 S. 22 1; cp *D.* 5). We cannot therefore accept the editorial statement in Josh. 12 15 (cp *D.* 7) that Joshua 'smote' the king of Adnllam. The Chronicler speaks of Rehoboam as having fortified Adullam (2 Ch. 11 7). He names the place in conjunction with Soco (Shuweikeh), which harmonises geographically with Micah's combination of it (Mic. 1 15, if the text be correct) with Mareshah (Merāsh). It is included in the list of cities which are stated to have been occupied by the Jews in the time of Nehemiah or Zeruhbahel (Neh. 11 30; so א^c.a mg. inf. L; BHA om.); but the list in Neh. 11 25-36 appears to be an archæological fiction of the Chronicler. Judas the Maccahee, at any rate, in a raid into 'Idumæa,' occupied Adullam and kept the sabbath there (2 Macc. 12 38).

The chief interest of Adullam, however, lies in its connection with DAVID (*q.v.*, § **3**). Here, not in some enormous cave (such as that fixed upon by tradition at Khareitūn),[2] hut in the 'stronghold' of the town, David on two occasions found a safe retreat (1 S. 22 1; 2 S. 5 17; cp 23 13).

Where was Adullam? The authority of the Palestine Survey has led many recent writers to adopt the identification of Adullam with 'Īd-el-mā, proposed in **1871** by M. Clermont-Ganneau. This is the name of a steep hill on which are 'ruins of indeterminate date,' with an ancient well at the foot, and, near the top, on both sides, caves of moderate size. The site is in the east of the Shephēlah, about **3** m. SE. of Soco, and 8 from Mareshah; and, though it is much more from Bethlehem, 'the journey would be nothing for the light-footed mountaineers who surrounded David' (Clermont-Ganneau, *PEFQ* 177 ['75]). The identification, however, is only conjectural. The caves are unimportant (1) because the MT (cp Jos. *Ant.* vi. 12 3) speaks of a single cave, and (2) because with We., Ki., Bu., and Kau. we should correct מערה, 'cave,' in 1 S. 22 1 2 S. 23 13 1 Ch. 11 15, into מְצָדָה, 'stronghold'; cp 1 S. 22 4 *f.* **2 S.** 23 14. Nor does the position of 'Īd-el-mā exactly agree with that assigned to Adullam in the *Onomasticon*. On the very slight resemblance of the name to Adullam no reliance can be placed. Other sites are quite possible. Cp GASm. *HG* **229** *f.* See MICAH, § 2 *a*, n.

T. K. C.

[1] The word is found both with d and with z on Aramaic seals; *e.g.*, הדרעזר (*CIS* 2, no. 124) but הרעדר, 'Horus is a help' (*ib.* 77).
[2] The Maghāret Khareitūn enters history, not with David, but with an ascetic named Chariton, who, after having been taken by robbers on the way to Jerusalem, founded one of his two lauras here, and died in the cave about 410 A.D.

ADULTERY. See MARRIAGE, § **4**.

ADUMMIM, The Ascent of (מַעֲלֵה אֲדֻמִּים; Josh. 15 7 αδδαμειν [B], αδομμι [A], αδαμμειν [L]; 18 17 αιθαμειν [B], εδωμι [A], εδωμειμ [L]; *ADOMMIM*), a point marking the frontier between Judah and Benjamin. The sharp rise near the middle of the road from Jericho to Jerusalem appears to he intended; the name (connected with אדם, 'red') was pel-haps suggested by the ruddy hue of the chalk rocks in that neighhonrhood, to which appears to be due the name of the khān el-Ahmar ('the red'), the traditional 'inn' of the Good Samaritan, and that of *Tala'at ed-Dam* ('the hill of blood'), NE. of the khān. With the latter spot the ascent of Adummim has been plausibly identified (*PEF Mem.* 3 172).

ADVERSARY. The word so translated in 1 S. 1 6† (צָרָה *ṣāra*, RV 'rival,' αντιζηλος [L],[1] cp Lev. 18 18 [BAL]) is the technical term for a fellow-wife, answering to Ass. *ṣirritu*, Ar. *ḍarratun*, Syr. *'artha* (*'arra*). All these forms are dialectal variations of a single Old-Semitic word. Similarly, in Lev. 18 18 the words 'to vex her' are better rendered by RV 'to he a rival *to her*.' The words that follow may he rendered, interpreting the metaphor, 'marrying the second sister, in addition to the first, in the lifetime of the latter.'

The sense of the metaphor is given by the Arabic *litakūna ḍarrataha*. See Dr. *TBS*, *ad loc.* and especially Lag.'s *Mittheilungen* 1 125 *f.* (*GGN*, 1882, no. 13). W. R. S.

ADVOCATE (παρακλητος), 1 Jn. 2 1, see PARACLETE.

AEDIAS (αηδειας [B]), 1 Esd. 9 27 = Ezra 10 26, RV ELIJAH, **3**.

ÆNEAS (αινεας [BHA]), a paralytic at Lydda healed by Peter (Acts 9 33†). The form of the name, Ænĕas, not as in Homer Ænēas, is noteworthy. It is met with in Thucydides, Xenophon, and Pindar.

ÆNON (αινων [Ti. WH]), Jn. 3 23†. See SALIM.

ÆSORA (αισωρα [RA], etc.), Judith 4 4† RV = AV ESORA (*q.v.*).

AFFINITY. See FAMILY, KINSHIP.

AGABA, RV ACCABA (ακκαβα [B]), 1 Esd. 5 30 = Ezra 2 46, HAGAB.

AGABUS (αγαβος [Ti. WH]; § 68), one of the 'prophets' who came from Jerusalem to Antioch at the time of the dispersion from Jerusalem 'upon the tribulation that rose about Stephen' (Acts 11 19, cp 8 4). He predicted a great famine over all the world, 'which came to pass in the days of Claudius' (Acts 11 27 28). The reference, doubtless, is *to* the great dearth which visited Judæa and the surrounding districts—especially Jerusalem—between 44 and 48 A.D. (Jos. *Ant.* XX. 2 6; 5 2;

[1] The text of **BA** differs.

Eus. *HE* ii. 11 3). For other famines in the reign of Claudius, see Suet. *Claud.* 18; Tac. *Ann.* xii. 43.

The next mention of Agabus is in Acts 21 10 *f.*, where it is said that he 'came down from Judæa' to Cæsarea when Paul was there, and, taking Paul's girdle, bound his own feet and hands with it to symbolise the captivity of the apostle. As this reference looks like a first mention of Agabus, those who ascribe the whole of Acts to one writer regard it as an indication that the second half of the book was written first. By others the passage is naturally regarded as one of the indications that the author of Acts did not himself write the 'we' passages, but adopted them from an earlier source. On the other hand, Overbeck and Van Manen tegard *vv.* 10-14 as an interpolation, and suppose that the 'we' was introduced by the last redactor. Jüngst thinks that the prophecy cannot originally have been ascribed to Agabus, but must have been assigned to one of Philip's prophesying daughters, or these would not have been mentioned. At all events, it is to be noted that 'from Judæa' (21 10) does not harmonise with 21 8, for Cæsarea belonged to Judæa.

Agabus is included in the lists of the 'seventy disciples of our Lord' by pseudo-Dorotheus and pseudo-Hippolytus, and is commemorated in the great Greek Menæa (Apr. 8), along with Rufus, Herodion, and Asyncritus.

AGAG (אֲגַג, אֲגָג, cp Ass. *agagu*, 'be powerful, vehement, angry'; *Igigi*, the spirits friendly to man, Maspero, *Dawn of Civ.* 634; αγαγ [BAL],), a king of the Amalekites, so celebrated in early tradition that the Yahwist makes Balaam say, by an obvious anachronism, of the future Israelitish kingdom, 'His king shall be higher than Agag' (Nu. 24 7; γωγ [BAL], following Samar. text). Saul, after his successful campaign against the Amalekites, exempted Agag from the general doom of devotion to the deity by slaughter, and brought him to Gilgal, where Samuel hewed him in pieces before Yahwè —*i.e.*, at the great sanctuary where festal sacrifices were offered (1 S. 15 8 *f.* 20 *f.* 32 *f.*). Making allowance for the endeavour of the narrator to harmonise an old tradition with later ideas (see SAUL, § 3), and throwing ourselves back into the barbarous period which begins to pass away under David, we cannot doubt that the slaughter of Agag was a eucharistic sacrifice (see SACRIFICE), akin to that of the *naḳīʿa* (lit. 'victim rent in pieces'), which was in use among the Arabs after a successful fray, and which might be *a* human sacrifice (WRS *RS*(2) 491, cp 363; We. *Ar. Heid.* 112 [87]).

AGAGITE (אֲגָגִי; for Greek readings see below), a member of the family of Agag; a title applied anachronistically to Haman (Esth. 3 1 10 8 3 5). Haman, as an Amalekite, is opposed to Mordecai, the descendant of Kish (Esth. 2 5). Neither description is to be taken literally (see ESTHER, § 1, end). The meaning is that there is an internecine struggle between the Jews and their enemies, like that between Saul and Agag of old. Similarly, Haman is called a 'Macedonian' in the Greek parts of Esther; 126 (μακεδονα [L^a]; but βουγαιος [BXALP]; AV Agagite; RV BUGEAN) 16 10 (EV Macedonian; μακεδων [BKALP]; but βουγαιος [L^a]), and the name has made its way back into 9 24 (μακεδων [BℵALβ]); cp ESTHER, § 10. Elsewhere the 𝔊 reading is βουγαιος [BℵAL^{aβ}] (only in 3 1 8 5 [ℵ^{c.a mg.}]), perhaps a corruption of Γωγαιος (in Nu. 24 7, the same version has Γωγ for Ayay).

AGAR (αγαρ [BA]). 1. The sons of Agar, Bar. 3 23 RV; AV Agarenes. See HAGAR, § 2, n.

2. Gal. 4 24 *f.*, RV HAGAR (*q.v.*, end).

AGATE (כַּדְכֹּד, Is. 54 12, ιαςπιc [BℵAQ]; כַּדְכֹּד, Ez. 27 16 [Bä. Ginsb.], χορχορ [BQ], κορχορυς [A]. etc.; שְׁבוֹ, αχατης [BAL]) occurs four times in AV, twice for Heb. *kadkod*, RV 'rubies' and twice for *shĕbō*. On the identification of these stones, see CHALCEDONY. On the question whether the agate, which is a variegated chalcedony (translucent quartz) with layers or spots of jasper, was known to Israel, see PRECIOUS STONES.

AGEE (אָגֵא, αγοα [A]; αcα [B]; ηλα [L]; Jos. ηλογ [gen.]; *AGE*), father of SHAMMAH (*q.v.*, 3); 2 S. 23 11. His name should doubtless be corrected to Ela אֵלָא (so Marq. *Fund.* 17); ג and ל in the older character were very similar. He is mentioned again in 1 K. 4 18. See ELAH, 6.

AGGABA (αγγαβα [B ab mg. A]), 1 Esd. 5 29† RV= Ezra 2 45, HAGABAH.

AGGÆUS, AV Aggeus (*Aggei* [ed. Bensly]), 1 Esd. 6173, 4 Esd. 1 40†. See HAGGAI.

AGIA (αγια [BA]), 1 Esd. 5 34† RV=Ezra 2 57, HATTIL.

AGRICULTURE.—Agriculture is here considered (1) as conditioned by the land (§ 1), (2) as conditioned by the people (§§ 2-10), (3) as a factor in the life of the people (§§ 11-15); a concluding paragraph (§ 16) will contain some notes on historical points.

1. Conditioned by land.

I. The great variety of the conditions in the different natural divisions of Palestine (Dt. 1 7) must be kept in mind.[1] The various local products, natural and industrial, of these districts. so often alluded to by the Old Testament writers, the most important of which are wheat and barley, olive and vine and fig, will be described in special articles (*qq.v.*). On the seasons see RAIN, DEW. We simply note here—First, the long dry season (Apr.-Oct.), including all the harvests, the dates of which vary slightly in the different districts (cp FEASTS, § 10): the קציר in spring, when rain seemed miraculous (1 S. 12 16 *f.*) and the steady W. wind every evening made it possible to winnow with ease, barley beginning in April, wheat about a fortnight later; the ץ~) summer fruits and vegetables, in summer; olives in autumn; the בציר, vines, from August onwards. *Second*, the wet season (Oct.-Apr.), the earlier part of which saw the preparation of the soil by the early rain (מורה, יורה) for the winter crops, to be brought to maturity by the succeeding showers, especially those in March–April (מלקוש), before which was the time for sowing the summer crops.

With such stable conditions, all that seems to be needed is *a* fair amount of intelligent industry; and the lack of this, rather than any great change of climate, is probably the cause of the retrogression of modern times.[2] The productivity, however, was not uniform (cp parable of sower), and there seems to be **a** somewhat periodic diminution in the amount of rainfall. Agriculture is also exposed to pests; the easterly wind קדים, drought, MILDEW, and LOCUSTS (*qq.v.*: see also ANT, § 4).

2. Sources of information.

II. We consider now, more in detail, agriculture as dependent on the energy, skill, and general condition of the inhabitants. Our account must naturally be fragmentary.[3] The minute prescriptions of the Mishna must of course be used with caution. We begin with—

1. Technical details of agricultural procedure. (For the most part we shall deal only with the raising of grain crops. For other departments see VINES, GARDEN, CATTLE, etc.) Incidentally the biblical records describe many agricultural processes, and mention by name some of the implements used. Of these implements, however, they give no description; and the only specimens found, up to the present time, are of sickles (see below, § 7).

For Egypt, however, we have fuller sources—many pictures of processes and implements, and some actual specimens. And

[1] See PALESTINE for details on Geology (§ 3), Physical divisions (§ 4 *ff.*), Hydrography (§ 13), Climate and Vegetation (§ 14 *f.*).

[2] See however Fraas, *Aus dem Orient* 199.

[3] There is no Hebrew word corresponding to our term *farm*. Tilling the soil is עבדת האדמה; husbandman is אכר, etc.; field is שדה.

AGRICULTURE

since modern Egypt and modern Palestine are very similar these ancient Egyptian remains may he used to illustrate ancien; Palestine. Further, since modern implements and methods are, in Egypt, very like those of antiquity, the same is probably true of Palestine. Hence it is reasonable to hold that, in Palestine also, modern may he taken to illustrate ancient.

Our main side-lights,[1] therefore, are modern Palestine and ancient Egypt ; and they are best used in this order, subordinated always to the actual data of the O T itself.

We shall take the processes in natural order.

Sometimes land had to be cleared of wood or shrub (ברא Josh. 17 18), or of stone (סקל), chiefly in vineyards.

3. Preparing soil.

For loosening or otherwise moving the soil many words are used, such as ניר, din, פלח, פתח, עזק, נערד ; שוה, שדד, of which the first group denotes ploughing, the second, breaking np the soil (אדמה) or the clods (מגרפות Joel 117) with the mattock or hoe, while the third as clearly means levelling off the surface with something serving for a harrow. Of the names of the instruments [2] we have מחרשת or מחרשה, את, מעדר, of which the first pair probably representsthe plough(N T ἄροτρον); the last, a sort of mattock ; while את must remain undetermined, ploughshare or hoe. It is clear, therefore, that we have at least three processes—ploughing, hoeing, and harrowing. We cannot be sure that there was of old in different parts of the country any more uniformity than there is now.

It is not likely that the shallow soil would ever be much more deeply ploughed than now, when a depth of 5-6 inches is considered sufficient. Perhaps ploughing would sometimes (as now), after Sufficient rain, be dispensed with.[3] Hoeing would probably take the place of ploughing in steep places (Is. 7 25), as now in stony ground.[4] In modern Judæa there is no ploughing *before* sowing except where manure is used. In Galilee, on the other hand, there is one ploughing, and in some districts more than one. When ground has been left unsown with grain and is overgrown with weed, this is ploughed in.

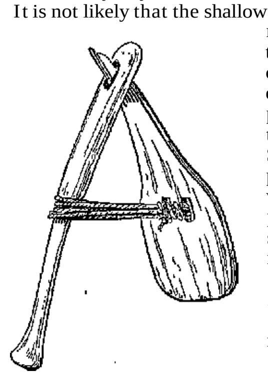

FIG. 1.—Egyptian Hoe (*Brit. Mus.*). For picture of hoe in use see fig. 3, and cp EGYPT, § 34, n.

Turning now to the implements used for these purposes, and beginning with the less important, we note that the Egyptian *hoe*[5] (fig. 1), of such importance in ancient Egypt as to be the natural svmbol of agriculture, as the goad is in modern Palestine,[6] has no representative in modern Syria; but neither has it in modern Egypt. A modern Syrian hoe may be seen in *PEFQ*, 1891,pp. 110-115 ; as also mattock, spade, etc.

4. Implements for preparing soil.

The ***harrow*** does not seem to have been used by the ancient Egyptians, although their modern representatives use a weighted plank or a toothed roller. In modern Palestine a bush of thorns is sometimes used. The writer of Job 39 10, however, seems to have known of some implement drawn by beasts following the labourer ; but this throws little light on general usage.

The *plough*, although it is probably, strictly speaking, an inferior substitute for the spade, is in common practice a very important implement, and merits more detailed treatment.

Of the Israelitish plough we know only that it had, at least sometimes, an iron share that needed sharpening (לטש, 1 S. 13 20, editorial comment in corrupt text). That the Syrian plough was light[1] we have the testimony of Theophrastus. The modern Syrian plough, which is light enough to be carried by the ploughman on his shoulder, and is simpler than the usual ancient Egyptian[2] plough (fig. 3) in having only one handle and therefore not needing two men to manage it, may safely be taken to illustrate that used by the Israelites. There is no more uniformity in its construction than in any other matter relating to agriculture, and it would seem to be at its simplest in' Southern Palestine. The woodcut (fig. 2) illustrates its general form. It is of wood, often oak. The stalieon to which the pointed metal sheath that serves for a share is thrust, passes up through a hole in the pole, to end in a cross handle piece. The pole is of two pieces, joined end to end. The *yoke* (עֹל, מוטה, more rarely sin, מוטות העֹל ; ζυγόν, ζυγός) is repeatedly mentioned in the OT. It varied in weight according to circumstances (1 K. 124). It is now made as light as possible, often of willow. Two pegs, joined below by thongs or by hair string, form a collar for each of the oxen, and two smaller pegs in the middle keep in position the ring or other arrangement for attaching the plough pole. Repairs are attended to once a year by a travelling

1 Babylonia, as well as Egypt, no doubt presented points of contact with Palestine; but in the department of agriculture our direct knowledge of Babylonia is very slight. See *RP*(2) 3 94 *ff.*, and Meissner, *Beitr. z. altbab. Privatrecht.*

2 *See* partial list of Talmudic names in Hamburger and Ugolinus, and now also a very full collection in Vogelstein's work (see below, § 17).

3 In Egypt two ploughs seem generally to have been used, the one behind the other ; perhaps the second turned up the soil between the furrows made by the first (cp however, next note). On the other hand, at least in later time;, the Egyptians sometimes used a lighter plough, drawn by men or boys.

4 If we could regard the Egyptian agricultural pictures as representations of actual scenes we should have to conclude that in Egypt the hoe was used sometimes before (so always [?] in the Old Empire), sometimes after, or both before and after the plough, to break up the great clods of earth. The depicting of 'the various operations side by side, however, is very likely a mere convention designed to represent in one view all kinds of field work. So Prof. W. Max Müller in a private communication to the present writer.

5 The illustration (fig. 1) needs only the explanation that the twisted cord adjusts the acuteness of the angle of the two other parts.

6 Cp Wetzstein's note on Judg. 331 (*l.c.* below, § 17).

1 The simplest plough would be made of one piece of a tree, bent while growing. See Verg. *Georg.* 1 169, and illustration in Graevius, *Thes. Antiq. Rom.* 11, p. 1674.

2 The ancient Egyptian plough, which underwent little modification in the course of millenniums, was all of wood, although, perhaps, the share was of a wood (harder?) different from the rest of the plough, and may sometimes have been sheathed in metal (Wilkinson). Of the Assyrian plough we know from an embossed relief found near Mōṣul, that it (sometimes) had a hoard for turning over the earth, and just in front of it a drill that let the seed down, to be covered by the soil as it turned over.

3 Where two forms of the Arabic name are given, the first is from Schumacher, and the second from Post (*op. cit.* below, § 17). The Hebrew names are from Vogelstein (*op. cit.* below, § 17).

expert. The ploughman holds in his left hand a *goad* (*messās*=מלמד, דרבן,[1] דרבנות) some eight or nine feet in length, having at one end a metal point, and at the other a metal blade to clean the share.

The *team* (צמד, ζεῦγος) would, as now, oftenest consist of oxen (Am. 6 12), but sometimes of cows (Job 1 14, Heb. text), and perhaps sometimes of asses (Is. 30 24; Dt. 22 10). Even camels and mules may now be seen occasionally. In Armenia many pairs of oxen draw one plough, the driver sitting on the yoke; but this is hardly the meaning of 1 K. 19 19.

yards (Is. 5 5; Ecclus. 28 28), where hedges (משוכה Is. 5 5) were also in use; and there was sometimes a border, *e.g.*, of כסמת (see FITCHES, 2) (Is. 28 25). Between grain-fields, however, the commonest practice was to set up *stones* to mark the line of partition (גבול Hos. 5 10); on the strong sentiment that prevailed as to the unrighteousness of tampering with these, see below (§§ 12, 14).

6. Sowing. Whether the various words used for sowing the seed were technical terms we cannot tell. זרע is a word of general significance. In Is. 28 25 three words are used in one verse: הפיץ and יזרק of scattering קצח (see FITCHES, 1) and cummin with the hand; barley is, whether the land has been already ploughed or not, to plough in the seed.[3] This protects it from ants and from dryness due to intermission of the early rain.[4] As to protection from man and beast, see HUT.

The *furrows* were called תלם, מענה[2] (מענית). They are now sometimes very carefully drawn (cp האריכו, Ps. 129 3), and are some nine to ten inches apart.

5. Irrigation, etc. Irrigation (השקה, הרוה; see GARDEN) must have been one of the processes used by Israel.[3] Palestine, indeed, differed from Egypt (Dt. 11 10 *f.*, on which see EGYPT, § 34, n.) in having a copious supply of rain and in having natural springs (Deut. 8 7); hence many districts, especially in valleys,[4] would bear crops without being watered artificially. But later practice shows that even these would yield better harvests if they had artificial irrigation, and there may have been districts under cultivation which were entirely dependent on it. It would not be safe to assign an early date to the elaborate methods and regulations of Mishna times; and it is difficult to determine whether by the streams, that were so highly prized (Dt. 8 7; Nu. 24 6, Cant. 4 15),[5] and without which a garden could not live (Is. 1 30), artificial canals are meant, and whether, *e.g.*, the bucket (דלי, Is. 40 15; Num. 24 7) was used in irrigation. The Mishna has regulations concerning *manuring* (זבל), and there *may* be a reference to it in such passages as Ps. 83 10 [11] (דמן לאדמה) or Is. 25 10 (Kthib). In NT times, at least, manure was used for trees (Lk. 13 8; βάλω κόπρια), as now for figs, olives, etc.; it was worked in at the last yearly ploughing, which was after the first winter rain. For grain crops the use of manure is exceptional (*e.g.*, at Hebron). Remains show that in the hilly country *terracing* (מנדלות מרקחים, Cant. 5 13?) was used even more than now, especially for vine cultivation; but the wider terraces are still used for grain, the clearing of the soil being called *naḳb*.

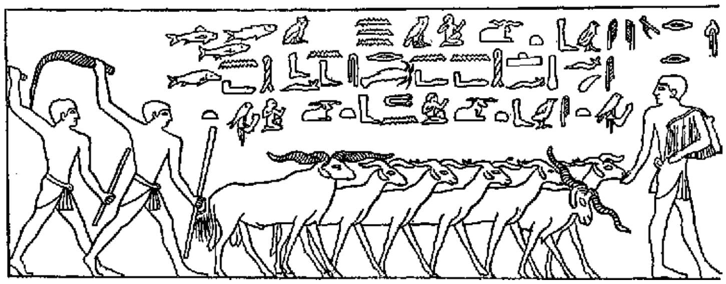

FIG. 4.—Rams trampling in the seed. From the *masṭaba* of Ti. After Baedeker.

Fences (גדר) were employed, perhaps only in vine-

To reap is קצר. Two names of implements have been preserved (חרמש, only in Dt. [16 9; 23 26†]; מגל, only

7. Reaping. in Jer. [50 16; AV mg. scythe[5]] and Joel [3 (4) 13]; δρέπανον); but whether they refer to the same thing or to varieties, we do not know. Perhaps the commonest method was to pull up by the root (see fig. 5), a practice confined in ancient Egypt to certain crops, but still followed both in Egypt and in Palestine. The use of ***sickles*** in Canaan in very early times is, however, proved by the finding of sickle flints[6] at Tell-el-Hesy in the earliest and all succeeding layers, while the use of iron sickles by the Jews in at least pre-Hellenistic times is proved by the finding of the specimen represented in fig. 7.

By putting together different allusions,[7] we can follow the various steps. The reaper (קוצר) filled his hand

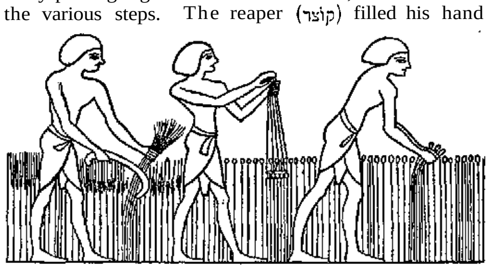

FIG. 5.—Pulling up grain. After Erman.

[1] Vogelstein argues from *Kelim*, 96 that this is the name of the metal head.
[2] Cp, however, Del. on Ps. 129 3, Ges.-Buhl *sub voc.* etc.
[3] See now the account in Vogelstein, § 4.
[4] Cp *RS*(2) 106.
[5] The prophets delight to speak of the copious supplies of water that will refresh even the most unlikely places in the ideal future (see Cheyne on Is. 30 25).

[1] In Am. 9 13 משך הזרע is used of the process of sowing.
[2] It is not unlikely that שורה is to be dropped, with We. Che. and Do. (against Di.), as = שעורה.
[3] According to Strabo, this was done also in Babylon (cp above, col. 78, n. 2), and in ancient Egypt the seed was sometimes, especially in the Old Empire, trodden in by sheep (Erman, *Life in Ancient Egypt*, ET 429; not goats), in the time of Herodotus by swine.
[4] On the stages and accidents of growth cp Vogelstein, § 10.
[5] For מַזְמֵרָה, which AV mg. thrice renders 'scythe,' EV has, more correctly, PRUNING-HOOKS (*q.v.*).
[6] The method of setting the sickle flints is shown by the specimens found by Dr. Petrie in Egypt (*Illahun*, etc. pl. 7 no. 27; see above, fig. 6).
[7] *E.g.*, Ruth 2 23; Ps. 129 7; Is. 17 5; Job 24 24; Jer. 9 22 [21].

AGRICULTURE

(כף) with ears (שבלים) of the standing corn (קמה), and with his arm (זרוע) reaped them (קצר). The stalks (nip) were, in Egypt, and still are, in Palestine, cut pretty high np (Anderlind; knee high). They must sometimes have been cut, whether at this or at a later stage, very near the ear (ראש שבלת Job 24 24). The armfuls (עמר) would fall (Jer. 9 22 [21]) in a heap (עמיר) behind the reaper, to be gathered by the מעמר מאסף, in his bosom (בחצנו) and tied. (מאלם) into sheaves (אלמה) and set in heaps (צבתים).[1]

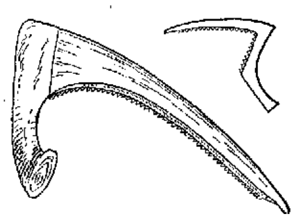

FIG. 6.—Sickle with cutting edge of flints found at Illahun. After Petrie.

In Egypt the sheaf consisted of two bundles, with their heads in opposite directions. In modern Syria frequently the sheaves are not tied at all. It has been

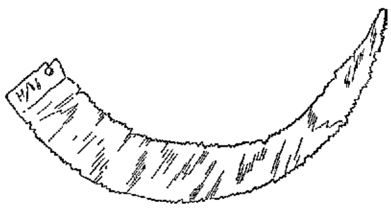

FIG. 7.—Iron sickle found at Tell el Hesi. After *PEFQ.*

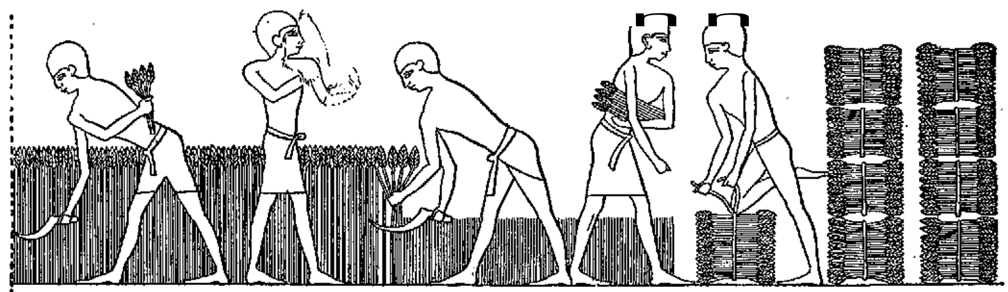
supposed[2] that already in Amos's time the bundles (עמר) may sometimes have been heaped into a heavy load on a cart (עגלה Am. 2 13); but the reference may very well be to the threshing wain.[3] In Egypt they were conveyed in baskets or bags, by men or on donkeys, to the threshing-floor.

Threshing was called חבט, דקק, דוש, גלגל, המם ; of which the first describes beating with a rod, the second is indefinite (to break up fine), and the third is literally to trample. (*a*) The first of these evidently represents the most primitive practice, still followed sometimes in both Palestine and Egypt. Naturally, gleaners (מלקט) and apparently others in certain circumstances—*e.g.*, Gideon in time of danger—beat out the grain; and in much later times (Is. 28 27) it was usual to heat out cummin and קצח (see FITCHES, 1) with *rods* (מטה and שבט respectively). The other processes were probably more common in later times. For these was needed a *threshing-floor* (גֹּרן,[1] ἅλως, ἅλων), for which was selected some spot freely exposed to the wind, often a well-known place (2 S. 24 16).[2] Beating the floor hard for use may be alluded to in Jer. 51 33 (Heb. Text ; הדריכה). Sometimes the wheat heads may have been struck off the straws by the sickle onto the threshing-floor (Job 24 24), as Tristram describes (*East. Cust.* 125); but usually the bundles would be first piled in a heap (גדיש) on the floor, and then from this a convenient quantity (מדשה)[3] from time to time spread over the floor.



8. Threshing.

The threshing then seems to have been done in two ways: either (*b*) by driving *cattle* round the floor on the loosely scattered stalks till their hoofs gradually trampled (דוש) out the grain (בר), for which purpose oxen[4] were used (Hos. 10 11),[5] or (*c*) by special *implements.*[6]

The instruments mentioned, which were drawn usually by oxen, are (*a*) חרוץ[7], חריץ[8] (?), (חרוץ) מורג ;[9] (*b*) עגלה with אופן[10] (wheel) prefixed (Is. 28 27), and perhaps alone (Am. 2 13† ; see, however, We. *ad loc.*). These two sets of expressions probably correspond pretty closely to two instruments still in use in Palestine, and a description of them and their use will be the nearest we can come to an account of their ancient representatives.

a. The Syrian *nōrag* (מורג) is a wooden drag[11] (see fig. 10) with a rough under-surface, which when drawn over the stalks chops them up. The illustration needs few explanations. The roughness is produced by the skilful insertion in holes, a cubic inch in size, of blocks of basalt (פיפיות Is. 41 15) which protrude (when new) some inch and a half. The sledge is weighted by heavy stones, or by the weight of the driver, who, when tired, lies down and even sleeps, or sits on a three-legged stool.

β. The *Ḥīlān* of Northern Syria, called in Egypt by

8.—Sickling and bundling. After Lepsius.

1 It is hardly possible to determine how many of these terms are practically synonyms. According to Vogelstein *op. cit.* 61 *ff.*, the loose צְבָתִים were tied into אֲלֻמּוֹת, and piled into עֳמָרִים, while עָמִיר (see *Excurs.* I.) is an entirely distinct word meaning hay.

2 *E.g.*, by Wellhausen.

1 'Barn-floor,' 2 K. 6 27 AV.

2 But in 1 K. 22 10 בגרן is probably dittography for בגדים.

3 So written without dagesh, by Baer.

4 It is not hear how the horses of Is. 28 28 are supposed to be used. Du. proposes to read ופרשיו as a verb.

5 In Egypt in later times oxen were so used, three in a line, with their heads hound together at the horns hy a beam (see fip. 9), or in the ancient empire, donkeys, ten in a line; so in modern Syria, the line being called a *ḳaran.*

6 Just as several rods are used together in method (*a*), so there could he duplicates of *ḳaran* (*b*), or of implement (*c*), or mixtures of (*b*) and (*c*) used simultaneously, as now in Ḥaurān.

7 'Threshing-wain,' Job 41 30 [22] RV.

8 Clearly some kind of sharp instrument of iron (2 S. 12 31 = 1 Ch. 20 3†), EV 'harrow,' Hoffm. (*ZATW* 2 66) 'pick.'

9 Perhaps by a gloss we have here independent names for one thing (Is. 41 15). By ברקנים (Judg. 8 7, 16†), which some would add here, the Talmud (with 𝔊L [once]; 𝔊BAL (once) transliterates) understands 'thistles': a view that is confirmed by the existence in modern Egyptian Arabic of a word *berkān* as the name of a thorny plant. See BRIER, 1.

10 אופן alone = (threshing) wheel, Prov. 20 26 RV

the name of the unused *nōrag* (see fig. 11), and known to the Romans as *plostellum Poenicum*, has in place of sharp stones revolving metal discs, which, when pressed down by the weight of the driver seated in a rude arm-chair, effectually cut up the straw

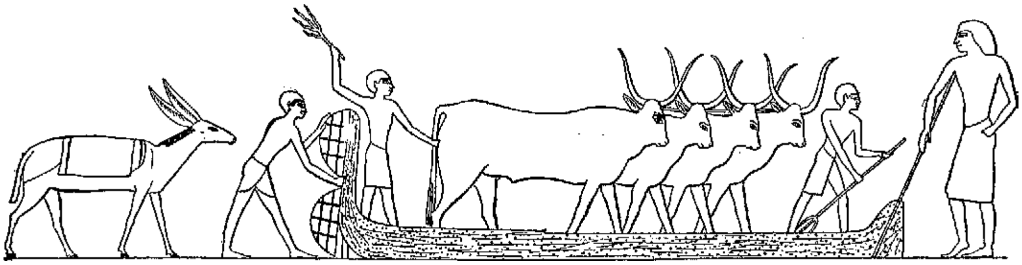


FIG. 9.—Carrying from harvest-field, and threshing. After Rosellini.

The work is done sometimes by horses, but most commonly, as of old, by oxen, either singly or (oftener) in pairs, sometimes muzzled, contrary to ancient Egyptian usage and Hebrew maxim.[1]

The modern floor is a circle some fifty feet in diameter,

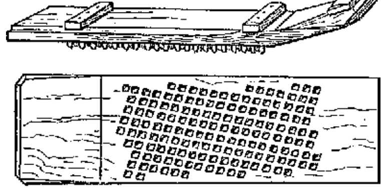

FIG. 10.—Syrian threshing-sledge. After Benzinger.

with the heap (*kadīs*) in the centre, from which a supply (*ṭarḥa*) is from time to time spread all round in ring form, some two feet deep and seven or eight feet broad. When one *ṭarḥa* has been thoroughly threshed—to insure which, it is from time to time stirred up with the

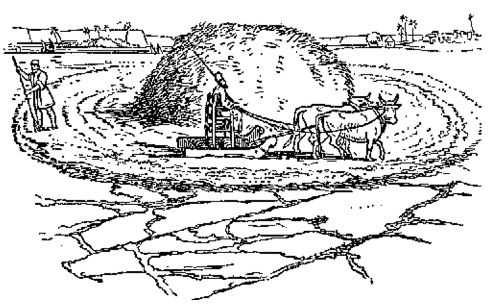

FIG. 11.—Modern Egyptian threshing-machine (*nōrag*). After Wilkinson.

handle of the winnowing instrument, or even with a special two-pronged fork (*deiḳal*, δίκελλα)—the mixed mass (*darīs*) of grain (*ḥabb*), chopped straw (*tibn* תֶּבֶן), and chaff etc. (*ṭayyār*), is formed into a heap (*'arama*), to make room for a new *ṭarḥa*.

[1] The Mishna seems to assume the practice in *Kelīm* 16 7 החסום שלו—*i.e.*, של בקר. It is doubtful whether the preceding phrase המלקוט של בקר refers to a practice, reported by some travellers, of bandaging the eyes of the oxen in threshing. Philological considerations would give the preference to Maimonides's explanation: '*Sacculus pelliceus in quem colligunt stercus jumenti ne pereat triticum dum trituratur*.'

AGRICULTURE

9. Winnowing. The process of winnowing (זרה) is often mentioned. Two names of instruments are preserved, the מזרה (EV 'fan') in Is. (30 24) and Jer. (15 7), and the רחת (EV 'shovel') in Is. alone (30 24).[1] They seem to refer to different things: perhaps to the implements still called by similar names in Palestine[2]—the fork and the shovel. The products are grain (in), chopped straw (תבן), and chaff (מֹץ, חֲשַׁשׁ, עוּר, ἄχυρον). The first is heaped up in round heaps (ערמה Ru. 3 7; Cant. 7 3, Heb. Text). The second is kept for 'provender (Is. 11 7). The third is blown away by the wind (Ps. 1 4).

In modern Syria the *midrā* (see fig. given in Wetzstein, *op. cit.* below: § 17) is a wooden fork almost 6 ft. in length, with some at least of its five or six prongs separately inserted, so that they are easily repaired. The prongs are bound together by fresh hide, which on shrinking forms a tight band. The *raḥt* is a kind of wooden shovel (see fig. in Wetzstein, *l.c.*), with a handle 4 ft. long. It is used chiefly for piling the grain, but also for winnowing leguminous plants and certain parts of the *darīs* that have had to be re-threshed. The winnowers stand to the E. of the *'arama* heap, and (sometimes first with a two-pronged fork called *sha'ūl* and then), with the *midrā*, either toss the *darīs* against the wind or straight up, or simply let it fall from the inverted fork, according to the strength of the evening W. breeze. While the chaff is blown away some 10 to 15 ft. or more, the straw (*tibn*) falls at a shorter distance, and is preserved for fodder; the heavy grain, unbruised ears, and joints of stems, fall almost where they were, ready for sifting.

FIG. 12.—Winnowing. After Erman.

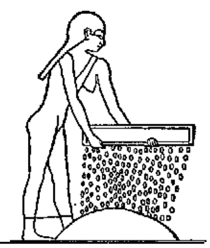

FIG. 13.—Sifting. After Lepsius.

10. sifting, etc. Strange to say, in the case of sifting it is the names of the implement that are best preserved. The ***sieve*** is called *Kĕbhārah* (כברה,[3] Am. 9 9†) and *nāphah* (am, Is. 30 28). In the former case probably the good grain, in the latter probably the refuse, passes through. In modem Syria there are

[1] 𝔊 omits these words; but πτύον occurs repeatedly in the NT.

[2] Fleischer denies any philological connection between Ar. *raht* and רחת, regarding the former as a Persian word, borrowed in the sense of *tool*.

[3] But 𝔊 λικμός.

two main kinds of sieve used on the threshing-floor. They are made of a hoop of wood with a mesh-work of strips of camel-hide put on fresh, and become tight in drying. The coarser meshed *kirbāl* is like the *kebhārah* of Amos. When the winnowed heap is sifted with it, the grains of wheat pass through, while the unbruised ears etc. remain in the sieve,[1] and are flung back into the *ṭarḥa* to be re-threshed. The finer meshed *ghirbāl* is like the נָפָה of Is. 30 28; all dust, bruised grains, etc. pass through, but none of the good wheat.

When the grain has been finally separated, it is heaped with the *raḥt* in hemispherical piles (*ṣobba*), which probably represent the 'ărēma (עֲרֵמָה) of the metaphor in Cant. 7 3 (Heb.). By this Boaz slept (Ru. 3 7), as do the owners still, while (as a further precaution) private marks are made on the surface, and a scarecrow is set up.

Storage.—In Jer., Dt., Joel, Ps., 2 Ch., there are names of places for keeping stores of grain;[2] but we do not know anything about them.[3] In the dark days of Gedaliah corn and other stores were hidden in the ground (Jer. 41 8); dry cisterns hewn out of the rock are still so used. For a representation of an ancient cistern see *ZDPV* 8, opp. p. 69. The mouth is just wide enough to admit a man's body, and can be carefully covered over. Grain will keep in these cisterns for years.

2. Next falls to be considered the dependence of agriculture on the general condition of the people, a dependence that is very obvious from the present state of agriculture in Palestine.

11. General conditions.

In the days of Israel's greatness, when agriculture was the chief occupation of the people, the population, whatever may have been its numerical strength, was certainly enough to bring the country, even in places that are now quite barren, into a state of cultivation. The land would be full of husbandmen tilling their fields by day, and returning to their villages at night. Yet, down to the end of the monarchy, the old nomadic life still had its admirers (Jer. 35), who, like the Bedouin of to-day, would despise the settled tiller of the soil. At the other extreme also, in such a society as is described, *e.g.*, by Amos and Isaiah, there was an aristocracy that had little immediate connection with the land it owned. Slave labour would doubtless, as elsewhere, be a weak point in the agricultural system, tending to lower its status (Zech. 13 5; Ecclus. 7 15 [16]); though this would not preclude the existence, at some period or other, of honourable offices such as those attributed by the Chronicler to the age of David (1 Ch. 27 25-31). After making allowance for homiletic colouring, we are bound to suppose that agricultural enterprise must have suffered grievously from a sense of insecurity in regard to the claims of property, and from the accumulation of debts, with their attendant horrors. Civil disturbances (such as those abounding in the later years of Hosea) and foreign wars would, in later times, take the place of exposure to the inroads of nomadic tribes. The burden of taxation and forced labour (1 S. 8 12) would, as now in many eastern lands, foster the feelings that find expression in the narrative of the great schism (1 K. 12 4) and in some of the accounts of the rise of the kingdom (on the 'king's mowings,' Am. 7 1, see MOWINGS and GOVERNMENT, § 20).

12. Laws.

The existence of an effort to ameliorate evils of the kind to which allusion has just been made, and of a consciousness of their inconsistency with the true national life, is attested by the inclusion in the Pentateuchal codes of a considerable number of dicta on agricultural matters, in which we see how religious sanctions became attached to traditional agricultural practices.

Already in the *Book of the Covenant* a fallow year (Ex. 23 11), once in seven, is prescribed for the sake of the poor and the beast, and a day of rest (*v.* 12), once in seven, for the sake of the cattle and the slave; while the principle is laid down that for damage done to a neighbour's field reparation must be made (Ex. 22 5 *f.* [4 *f.*]). In the *Deuteronomic Code*, if there is already the precept against sowing in a vineyard two kinds of seed (22 9), or ploughing with an ox and an ass together (22 10), and the requirement of a tithe (14 22), there are still such maxims as the sacredness of property (19 14, landmarks; = Prov. 22 28 = 23 10*a* [cp Job 24 2], and, in the form of a curse, Dt. 27 17) on the one hand, and, on the other, generous regard for the needs of others (23 25 [26], plucking ears; 24 19, sheaf; 20, olive; 21 23 24 [23], grapes), even of beasts (25 4, muzzle), with a provision against abuse of the privilege (23 25 [26], no sickle; 23 24 [25], no vessel); while an effort is made to moderate the damage done to agriculture by war (20 7, exemption from conscription; 20 19 *f.*, preserve trees). In the *Priestly Code* there is still, in the remarkable collection preceding the last chapter of Leviticus, a further development of the provision for the poor at harvest time (19 9, corners = 23 22), with a repetition of the charitable maxims (19 9 *f.*); but there is on the whole an emphasising of such prescriptions as non-mixture of seeds (19 19), defilement of seed (11 37 *f.*), uncircumcision of fruit-trees (19 23-25), strict calculation of dates of agricultural year (23 16); while the Jubile year makes its appearance. Here we are appreciably nearer the details of such discussions as those in *Zera'im* etc. Of course, the question how far such maxims made themselves felt in actual practice, or even as a moral directive force, is not answered by pointing out their existence in literary form.

III. We pass now to the consideration of agriculture as a factor in the life of the people.

13. Common life.

That agriculture was an important element in popular life is very evident. Land was measured by yokes (1 S. 14 14; Is. 5 10) and valued by the amount of seed it needed (Lev. 27 16). Time was measured by harvests (Judith 2 27[1]), and places were identified by the crops growing on them (2 S. 23 11, lentils; 1 Ch. 11 13, barley). Tilling the soil was proverbially the source of wealth (Pr. 12 11 28 19); implements not needed for other purposes would as a matter of course be turned to agricultural use (Is. 2 4)—and so on. That work in the fields was not confined to slaves and people of no culture is evident, not only from the existence of such narratives as that of Joseph's dream, but also from what is told of Saul (1 S. 11 5), and Elisha (1 K. 19 19), and Amos (7 14) before they appeared on the stage of history. On the other hand, the narrator of the story of Ruth seems to represent neither Boaz himself nor his deputy as doing more than overseeing and encouraging the labourers (Ru. 2 5); and in the time of the writer of Zech. 13 5 (RV) a tiller of the soil seemed to be most naturally a purchased slave, while the ideal of the writer of Is. 61 5 is that ploughmen and vine-dressers should be aliens.

At all times, however, even the rich owner entered naturally into the spirit of the agricultural life. If it was perhaps only in the earlier times that he actually ploughed or even followed the oxen, he would at all times be present on the cheerful harvest field and visit his vineyard to see the work of the labourers (Mt. 20 8), his sons included (Mt. 21 28), and give directions about the work (Lk. 13 7), when he would listen respectfully to the counsel of his men (Lk. 13 8 *f.*). It was not derogatory, in the mind of the Chronicler, to kingly dignity to interest one's self in agriculture (2 Ch. 26 10),[2]

[1] For צְרוֹר is most likely *stones*.

[2] מִסְכְּנוֹת, מְזָוֵינוּ, מַמְּגֻרוֹת, אוֹצָרוֹת, אֲסָמִים, מַאֲבָסִים, NT ἀποθήκη.

[3] In Egypt corn was stored in buildings with a flat roof reached by an outside stair. There were two openings, or sets of openings, near the top, for pouring in the grain, and near the bottom, for withdrawing it (see model in Brit. Mus.).

[1] The text of 2 S. 23 13 is very doubtful. cp Dr. *ad loc.*

[2] The meaning of Eccles. 5 9 [8] is obscure.

and a proverb-writer points out the superiority of the quiet prosperity of the husbandman to an insecure diadem (Prov. 27 23-27).

Not unnaturally it is the life of harvest-time that has been most fully preserved to us. We can see the men, especially the younger men (Ru. 2 9), cutting the grain, the young children[1] going out to their fathers (2 K. 4 18) in the field, the jealousies that might spring up between the reapers (Gen. 37 7), and the dangers that young men and maidens might be exposed to (Ru. 2 9 perh. Hos. 9 1 *f.*), the simple fare of the reapers (Ru. 2 14), and the unrestrained joviality of the evening meal (Ru. 3 7) after the hot day's work (2 K. 4 19), the poor women and girls gleaning behind the reapers and usually finding more than they seem sometimes to find nowadays, beating out the grain (Ru. 2 17) in the evening and carrying it away in a mantle to the older ones at home (Ru. 3 15), not only the labourers but also the owners sleeping by the corn heaps at night (Ru. 3 7), so that the villages would, as now in Palestine and Egypt, be largely emptied of inhabitants. The Egyptian monuments could be drawn on for further illustrations.

Such a mode of life had naturally a profound effect on the popular sentiment, the religions conscience, and, in time, the literary thought of the people : and. to complete our survey of the subject, a few words must be said here on these matters.

14. Sentiment.

That the agricultural mode of life was regarded as originating in the earliest ages is evident from Gen. 3 and 4 ;[2] but it was sometimes regarded as a curse (3 17 *f.*), or at least as inferior to pastoral life (4 3 *f.*), while at other times nomadic life was a curse (4 12), instead of being a natural stage (4 20). These two sides are perhaps reflected in the glowing descriptions in which certain writers delight—*e.g.*, Dt. 33 28 : a tilled land of corn and wine and oil (Dt. 8 7-9), a pasture land flowing with milk and honey (Ezek. 20 6). This land, which is lovingly contrasted with other lands (Ezek. 20 6 15), was felt to be a gift of Yahwè to his people, and specially under his watchful care (Dt. 11 12). The agricultural life was, therefore, also of his appointment (Gen. 3 23 ; Ecclus. 7 15 [16]), and indeed lay as the basis of his Torah. From him the husbandman received the principles of his practice (Is. 28 26), as also, he depended absolutely on Yahwè for the bringing into operation of the natural forces (Dt. 11 14) without which all his labour would be in vain (*v.* 17). This, however, was only a ground of special security (Dt. 11 12), for no other god could give such blessings as rain (Jer. 14 22), and Yahwb did give them (Jer. 5 24). If they were not forthcoming, therefore, it was because Yahwb had withheld them (Am. 4 7), and this was because of his people's sins (Jer. 5 25), which also brought more special curses (Dt. 28 38-40). The recognition of Yahwè had, therefore, a prominent place in connection with the stages of agricultural industry (see FEASTS, § 4), the success of which was felt to depend on the nation's rendering him in general loyal obedience (Dt. 11 3-17) ; the land itself was Yahwè's ; the people were but tenants (Lev. 25 23) ; and the moving of the ancient landmarks, though not unknown, was a great wrong (Job 24 2). Some of the moral aspects of agricultural life have been already sufficiently touched on. It is probable that many of the maxims referred to were widely observed, being congruent with the better spirit of the people. Thus Amos records it as an outrage on the ordinary sentiments of common charity, that even the refuse of the wheat should be sold for gain (Am. 8 6). Other maxims, again, can be little traced in practice.

In this description of Hebrew ideas we have taken no note of the differences between earlier and later times. Deuteronomy and the prophets have been the main authority. In the public consciousness, however, there lived on much of the old Canaanitish popular belief, in which the *Bă'ālim* hold the place here assigned to Yahwb, so that, *e.g.*, the fertile spot is the Baal's plot of land, who waters it from unseen sources, underground or in the heavens (see BAAL, § 1)—a mode of expression that lived on into Mishna times, although its original meaning had been long forgotten.

The influence on Hebrew literature was very deep. The most cursory reader[1] must have observed how much the modes of expression reflect the agricultural life. Prouhetic descriptions of an ideal future abound in scenes conceived in agricultural imagery.[2] Great joy is likened to the joy of harvest (Is. 16 9 *f.*) ; what is evanescent is like chaff that is burned up or blown away ; something unexpected is like cold (Pr. 25 13), or rain (Pr. 26 1), in barvest—and so on. Lack of space prevents proof in detail of how, on the one hand, figures and modes of speech are drawn from all the operations and natural phenomena of agriculture, while, on the other hand, every conceivable subject is didactically or artistically illustrated by ideas and expressions from the same source. It is a natural carrying forward in the NT of this mode of thought, to find Jesus publishing his epoch-making doctrines of the 'kingdom' so largely through the help of the same imagery. No doubt the commonest general expression is 'kingdom' ; but even this often becomes a vineyard, or a field, or a tree, or a seed ; and it is extended by sowing etc. It is unnecessary to pursue the subject farther. The whole mode of thought has passed over into historical Christianity, and thus into all the languages of the world.

15. Literature.

16. Historical.

We shall now in closing give some fragmentary notes towards a historical outline of the subject.

The traditional account of the mode of life of the ancestors of Israel in the earliest times introduces agricultural activity only as an exceptional incident. Agriculture must be rudimentary in the case of a nomadic people. That Canaan, on the other hand, was for the most part well under cultivation,[3] when the Israelites settled in the highlands, there can be no doubt. The Egyptian Mohar found a garden at Joppa,[4] and of the agricultural produce claimed by Thotmes III. at the hands of the Rutennu[5] some at least must have been grown in Palestine. Israel doubtless learned from the Canaanite not only the art of war (Judg. 3 2), but also the more peaceful arts of tilling the soil, which, as the narratives of Judges and Samuel prove, were practised with success, while it is even stated that Solomon sent to Hiram yearly 20,000 Kor of wheat and 20,000 Bath of oil (1 K. 5 11 [25] Var. Bible). Later, Ezekiel (27 17 ; see Cornill) tells us how Judah bartered wheat with Tyre,[6] as well as honey, oil, balm, and פנג (see PANNAG) ; which illustrates the tradition in 1 K. 20 34 (see COT) that there were bazaars (see TRADE ; STRANGER, § 2) for Israelitish merchants in Damascus, and for those of Damascus in Samaria. It is strange, but true, that in the very period to which this last notice refers, there arose a popular reaction against the precious legacies of Canaanitish civilisation (see RECHABITES). The Assyrian conquest of Samaria naturally checked for a time the cultivation of the soil (2 K. 17 25, lions), the colonists introduced by Sargon and Ašur-bāni-pal being imperfectly adapted to their new home. In Judæa under Gedaliah the Jews 'gathered wine and summer

6 Cp a similar relation in the time of Herod (Acts 12 20).

fruits very much' (Jer. 40 12), and had stores of wheat, barley, oil, and honey, carefully hidden in the ground (Jer. 41 8). In Is. 41 15 mention is for the first time explicitly made of a threshing instrument with teeth (פִּיפִיּוֹת); but whether this was of recent introduction it is impossible to determine. On the fall of the Babylonian power the old relations with Tyre were doubtless renewed (Ezra 3 7; cp Is. 23 15 18). The imperial tribute, however, is regarded as heavier than the agricultural resources of the country could then well bear (Neh. 5 3 *f.*). This tribute may have been partly in money (5 4), but also apparently to a considerable extent in produce (Neh. 9 37, תְּבוּאָה). In Joel, of course, there is a description of agricultural distress, but in such a way as to imply that agriculture was in general receiving full attention. In Eccles. (2 5 *f.*) there is acquaintance, as in other things, so in agriculture, with several artificial contrivances. To go into the detailed accounts of the Mishna is beyond the present purpose.

17. Literature. For complete bibliographies see the larger Cyclopaedias, Biblical and Classical. AGRIPPA (ἀγρίππα), Acts 25 *f.* † See HERODIAN FAMILY, 7.

AGUR (אָגוּר; so Pesh.; ܐܓܘܪ; but 𝔊 and Vg., translating, φοβηθῆτι [BAℵ]; *Congregantis*), b. Jakeh, an author of moral verses (Prov. 30 1). His name is variously explained as 'hireling' of wisdom (Bar Bahlūl) and 'collector' of words of Torah (Midr. *Shemoth R.*, par. 6). Such theories assume that Solomon is the author of the verses, which (see PROVERBS) is impossible. All the description given of him in the heading is 'the author of wise poems' (read, not הַמַּשָּׂא, but הַמֹּשֵׁל, with Grätz, Cheyne, Bickell). Very possibly the name is a pseudonym. The poet who 'takes up his parable' in *v.* 5 expresses sentiments very different from those of Agur; he seeks to counteract the bold and scarcely Israelitish sentiments of his predecessor.

See Ew., *Salom. Schriften* 250 *ff.*; Che., *Job and Solomon* 149 *ff.*, *Jewish Rel. Life* Lect. V.; Smend, *AT Rel.-gesch.* 479 *f.*; and, with cautio:, Dillon, *Sceptics of the OT* 131 *ff.* 269 *ff.* Cp also PROVERBS; ITHIEL ii.; LEMUEL. T. K. C.

AHAB (אַחְאָב, § 65,[1] 'father's brother,' cp Ahiam and the Assyr. woman's name, Aḫat-abišu, and see Wi. *ZA*, **1898,** Heft 1; also חאב [for אחאב] oh an inscription from Safa [*Journ. As.* 1881, **19** 463]). **1.** (Αχααβ [BAL], -ααμ [A once]; *Achab*; Assyr. *Aḫabbu.*) Son of Omri, and king of Israel (875-853? B.C. Cp CHRONOLOGY, § 32, and table in § 37). The importance of this king's reign is shown by the large space devoted to it in the Book of Kings.

1. Sources. To obtain a just idea of his character, however, is not easy, the Israelitish traditions being derived from two very different sources, in one of which the main interest was the glorification of, the prophets, while the other was coloured by patriotic feelings, and showed a strong partiality for the brave and bold king. To the former belong 1 K. 17-19 and 21; to the latter, chaps. 20 and 22.[2] Both groups of narratives are very old; but the former is more difficult than the latter to understand historically. In chaps. 20 and 22 we seem to get nearer to the facts of history than in chaps, 17-19, 21; at the same time we must remember that even here we have to deal, not with extracts from the royal annals, but with popular traditions which are liable to exaggeration, especially at the hands of well-meaning interpolators.[1] The story of Ahab in his relation to Elijah has been considered elsewhere (see ELIJAH, § 1 *ff.*). We can hardly deny that the writer exalts the prophet to the disadvantage of the king. Ahab

2. Ahab's policy. was not an irreligious man, but his interests were mainly secular. He wished to see Israel free and prosperous, and he did not believe that the road to political salvation and physical ease lay through the isolation of his people from all foreign nations. The most pressing danger to Israel seemed to him to lie in its being slowly but surely Aramaised, which would involve the depression and perhaps the ultimate extinction of its national peculiarities. Both under Baasha and under Omri, districts of Israelitish territory had been annexed to the kingdom of Damascus, and it seemed to Ahab to be his life's work to guide himself, not by the requirements of Yahwè's prophets, but by those of political prudence. Hence he not only maintained a firm hold on Moab, bnt also made himself indispensable as an ally to the king of Judah, if he did not even become, in a qualified sense, his suzerain (see JEHOSHAPHAT, *1*). Besides this, he formed a close alliance with Ethbaal, king of Tyre (Jos. *Ant.* viii. 13 1), whose daughter Jezebel (Baalizebel?) he married. The object of this alliance was doubtless the improvement of Israel's commerce. The drawback of it was that it required on Ahab's part an official recognition of the Tyrian Baal[2] (commonly known as Melkart), which was the more offensive because the contrast between the cultus even of the Canaanitish Baalim and that of the God of Israel was becoming stronger and stronger, owing to the prophetic reaction against the earlier fusion of worships. Ahab himself had no thought of apostatising from Yahwè, nor did he destroy the altars of Yahwè and slay his prophets. Indeed, four hundred prophets of Yahwè are said to have prophesied before him when he set out on his fatal journey to Ramath Gilead. His children, too, receive the significant names of Athaliah, Ahaziah, and Jehoram.

We can understand Ahab's point of view. But for its moral dangers, we might call it thoroughly justifiable. It was of urgent importance to recover the lost Israelitish territory and to secure the kingdom of Israel against foreign invasion. If Israel were absorbed by Damascus, what would become of the worship of Yahwè? To this question Elijah would have given the answer which AMOS (*q.v.*, § 18) gave after him: 'Perish Israel, rather than that the commandments of Yahwè should be dishonoured.' Jezebel's judicial murder of Naboth and Ahab's tame acquiescence showed Elijah what might be expected from the continued combination of two heterogeneous religions. It was for the murder of Naboth that Elijah threatened king Ahab with death,[3]

[1] Cp Noldeke, 'Verwandtschaftsnamen als Personennamen' in *Kleinigkeiten zur semitischen Onomatologie* (*WZKM* 6 307-316 ['92]).

[2] See KINGS, § 8, and cp Ki. *Gesch.* 2 184-186 [ET. 2 214-216].

[1] We must begin, however, with an analysis of the narratives. Van Doorninck (*Th.T*, 1895, pp. 576-584) has made it highly probable that the narrative of the siege of Samaria and the battle of Aphek in 1 K. **20** has received many interpolations tending to make the deliverance of the Israelites more wonderful, in addition to those already pointed out by We. (*CH* 285 *f.*), and Kue. (*Einl.* § 25, n. 10).

[2] Of Baalath, the female counterpart of Baal, the Hebrew tradition makes no mention. It is an interpolator who has introduced into 1 K. 18 19 the words 'and the prophets of the Ashera, 400,' which are wanting in the MT of *v.* 22, though supplied in 𝔊BL [𝔊L omits 400 in *v.* 22] (cp WRS, *RS*(2) 189; We. *CH* 281; Klo. *Sa. Kö.* 367; Ki. in Kau. *HS*). Of course, Baalath may have had her cultus by the side of Baal, hut not in such a way as to strike Israelitish observers. Nor could either Baalath or Astarte (Jezebel's father had been a priest of Astarte, Jos. *c. Ap.* 1 18) have been called 'the Asherah' by a contemporary writer.

[3] Note that 1 K. 21 20*b*-26—in which (*1*) the whole house of Ahab is threatened, and (2) the punishment is connected with Ahab's religious policy—forms no part of the **old** narrative (see Ki. in Kau. *HS*).

and it was probably for this, or for other unrecorded moral offences of Ahab and the partizans of Baal, that the uncourtly prophet Micaiah 'never prophesied good concerning Ahab, but evil' (1 K. 22 8).

To what precise period of Ahab's reign his encounters with Elijah belong, we are not told. Nor is it at all certain to which years the events recorded in 1 K. 20 are to be referred. To the popular traditions further reference is made elsewhere (see ISRAEL, HISTORY OF, § 29). Suffice it to say here that they show us Ahab's better side; we can understand from them that to such a king much could be forgiven. Our remaining space will be devoted to the two inscriptions relative to episodes in the life of Ahab.

3. Mesha Inscription.

The earliest record comes from MOAB (*q.v.*). King Mesha informs us in his famous inscription (*l.* 8) that Moab had been made tributary to Israel by Omri, and that this subjection had continued 'during Omri's days and half of his son's days, forty years,: after which took place the great revolt of Moab.[1] How this statement is to be reconciled with that in 2 K. 1 1 3 4 need not be here considered. It is, at any rate, clear that the loss of the large Moabitish tribute, and of the contingent which Moab would have to furnish to Israelitish armies, must have been felt by Ahab severely.

4. Shalmaneser II.'s Inscription.

The second mention of this king occurs in the Monolith Inscription of SHALMANESER II. (*q.v.*). In the list there given of the allied kings of Syria whose forces were defeated by Shalmaneser at the battle of Ḳarḳar (near the river Orontes) in 854 B.C. occurs the name of Aḫabbu Sir'lai, which, as most scholars are now agreed, can only mean Ahab[2] of Israel[3] (or, as Hommel thinks, of Jezreel). Two important questions arise out of this record.

5. Why was Ahab at Karkar?

(1) Did Ahab join Bir'idri (Benhadad I.) of Damascus of his own accord, jealousies being neutralised by dread of a common foe? or was he a vassal of Bir'idri, bound to accept the foreign policy of his suzerain and to support it with (or at any rate through) his warriors on the field of battle? The former alternative is adopted by Kittel[4] and M'Curdy; the latter by Wellhausen and Winckler. To discuss this here at length is impossible. The remarks of Wellhausen will seem to most students very cogent. 'If feelings of hostility existed at all between Ahab and Benhahad, then Ahab could not do otherwise than congratulate himself that in the person of Shalmaneser 11. there had arisen against Benhadad an enemy who would be able to keep him effectually in check. That Shalmaneser might prove dangerous to himself probably did not at that time occur to him; but if it had, he would still have chosen the remote in preference to the immediately threatening evil. For it was the political existence of Israel that was at stake in the struggle with Damascus.'[5] Cp BEN-HADAD, § 2.

It does not follow, however, that we must give Wellhausen's answer to the second question, which is (2) Are the events related in 1 K. 20 22, with the exception of the contest for Ramath Gilead, to be placed before or after the battle of Karkar (854 B.C.)?

6. Relative date of Karkar and 1 K. 20 22.

It is, no doubt, highly plausible to suppose that Ahab took advantage of the blow dealt to the power of Damascus at Karkar to shake off the suzerainty of Benhadad: so far, at least, it seems reasonable to follow Wellhausen. But it is not likely that, considering the threatening attitude of Assyria, Benhadad would have thought it prudent to fritter away his strength on those 'furious attacks' on Israel to which Wellhausen refers;[1] it is not likely, in short, that the siege of Samaria and the battle of Aphek are to be placed after 854 B.C. It may be asked, if they are not placed thus, where are we to find room for them? In 1 K. 20 *23-34*, Ahab is represented as gaining the mastery over Benhadad, who has to make most humiliating concessions to him. After such a success, how can we account for Ahab's enforced presence at Karkar as vassal of Benhadad? The answer is that tradition selects its facts, and that the facts which it selects it idealises as an artist would idealise them. We may admit that Ahab, in his obstinate and patriotic resistance to Damascus, was not unvisited by gleams of good fortune; but the fact, which tradition itself records, that he was once actually besieged in his capital, cannot have stood alone. Of Ahab's other misfortunes in war tradition is silent; but we can easily imagine that the power which was too strong for Omri was at last able to force his son to send a large contingent to the army which was to meet Shalmaneser at Karkar.

That the siege of Samaria, at any rate, was before 854 B.C. is rendered probable by the criticism given elsewhere (see JEHORAM, 1, § 2) of the narrative in 2 K. 7. In particular, the kings of the Hittites and of *Muṣri*, who are referred to in *v.* 6, are just those with whom Benhadad would have to deal before 854 B.C., while Shalmaneser was still occupied at a distance.

The above solution of the historical problem is that of Winckler, which unites elements of Wellhausen's view and of that of Kittel.

The last-named critic deserves credit for an ingenious explanation (*Gesch. 2 232*) of the magnanimity attributed to Ahab in 1 K. 20 31-34. It will be remembered that, according to Kittel, Ahab sent forces to Ḳarḳar of his own accord, not as a vassal of Benhadad. This enables him to suggest that the king of Israel may have spared his rival's life in order to enlist him in a coalition against Assyria, the idea of which (according to this hypothesis) was Ahah's. It must he confessed, however, that this view ascribes more foresight to Ahab than, according to AMOS (*q.v.*, § 5), was possessed by the Israelites even at a later day, and it was certainly unknown to the compiler of our traditions, who makes no mention of the battle of Ḳarḳar.

We may regard it, then, as highly probable that the battle of Ḳarḳar was fought at some time in the 'three (?) years without war between Syria and Israel' mentioned in 1 K. 22 1.

The numbers of the force assigned by Shalmaneser in his inscription to Ahab (2000 chariots, 10,000 men), as compared with those assigned to other kings,[2] deserve attention.

7. Ahab's army.

It is possible, no doubt, as Winckler suggests, that contingents from Judah and Moab were reckoned among the warriors of Ahab.[3] This does not, however, greatly diminish the significance of the numbers. After all, the men of Judah were southern Israelites. Even if Moabitish warriors were untrustworthy against a foe such as Benhadad, there is no reason to doubt that the men of Judah would sooner see Israel free from Benhadad than swallowed up by its deadly foe. Ahab was certainly no contemptible antagonist in respect to the number of warriors he could bring into the field.

8. His death.

He himself, like David (2 S. 18 3), was 'worth ten thousand,' and the dread with which he inspired the Syrians is strikingly shown in the account of his last campaign. We read that

1 For a somewhat different view, see CHRONOLOGY, § 29, n. 1.

2 Against Kamph.'s view, that Ahab is mentioned by a mistake of the Assyrian scribe instead of Joram, cp Schr. *KGF* 370.

3 The form Sir'lai may he illustrated by the vocalisation אֲשַׂרְאֵל Asarel, 1 Ch. 4 16, which Lag. (*Uebers.* 132) thinks may represent the original pronunciation rather than יִשְׂרָאֵל.

4 Ki., however, after adopting this view of the course of events in his narrative, turns round, and with some hesitation indicates his preference for the view of Kamph. (*Chronologie der hebr. Kön.* 80), held also formerly by We., according to which the Assyrian scribe confounds Ahah with his son Jehoram (*Hist.* 2 273). On the whole question cp Schr. *KGF* 356-371.

5 *Hist.*(3) 61. So the conservative critic Köhler (*Bibl. Gesch.* 3 379). On the other side, see M'Curdy, *Hist. Proph. Mon.* 1 277 *ff.*

1 *IJG* 50; 2nd and 3rd ed. p. 71.

2 Bir'idri (Benhadad) has 1200 chariots, 1200 horsemen, 20,000 men (Schrader, *COT* 1 186).

3 That Jehoshaphat's military support of Ahab was not altogether voluntary is surmised by We. and positively asserted by Wi. That it only hegan at the expedition to Ramath Gilead is too hastily supposed by Ki. (*Gesch.* 2 *232* [ET, *2* 272]).

Benhadad charged the captains of his chariots to 'fight neither with small nor great, save only with the king of Israel,' and that when they thought they had found him they 'surrounded him (𝔊) to fight against him' (1 K. 22 31 *f.*). It was not, however, by a device of human craft that the great warrior was to die. A chance shot from a bow pierced Ahab's armour. The grievous wound prompted the wish to withdraw; but for the king in his disguise (*v.* 30) withdrawal was impossible, for the battle became hot and the warriors pressed on from behind. The dying king stood the whole day through, upright and armed as he was, in his chariot. At sunset he died, and when the news spread 'The king is dead' (2 K. 22 37, 𝔊), the whole Israelitish army melted away. In Micaiah's language, it became 'scattered abroad, as sheep that had no shepherd' (2 K. 22 17). The dead body of the king was carried to Samaria and buried there.[1]

A brief reference is made in 1 K. 22 39 to Ahab's luxury, which confirms the reading of 𝔊A in Jer. 22 15: 'Art thou a true king because thou viest with Ahab?' (ἐν Αχααβ [A], εν αχαζ [BℵQ], κεδρω [Q mg.], MT בארז), an indignant protest addressed by Jeremiah to Jehoiachin (so Cornill in *SBOT*, who enters into the text-critical points more thoroughly than Giesebrecht).

2. (Αχιαβ [BKAQ], perhaps the most correct form; see NAMES, § 65. In Jer. 29 22 אֶחָב is clearly a scribe's error; Eastern MSS have a *Kr* אַחְאָב.) Son of Kolaiah and fellow-exile of Jehoiachin (Jer. 29 21 *f.*). He and another exile (Zedekiah) fed the fanaticism of the Jews with false hopes of a speedy return. They were denounced by Jeremiah, who predicted for them a violent death at the hands of Nebuchadrezzar. We learn more about them from the writer (probably the editor of the Book of Jeremiah) who inserted *vv.* 22*b*-31*a*. It was in his time, perhaps, a matter of notoriety that Ahab and Kolaiah had suffered the cruel punishment of being burned alive (cp Saulmugina's fate, *RP*(1) 177). Therefore, he makes Jeremiah refer to this, and at the same time accuse the false prophets of having led a profligate life, in accordance with the idea which underlies Gen. 38 24; Lev. 20 14 21 9. Cp Cornill, *Jeremiah* (*SBOT*, Heb. text). T. K. C.

AHARAH (אַחְרַח [Bä]), or Ahrah (אַחְרַח [Ginsb.]), third son of BENJAMIN (§ 9 ii. β), 1 Ch. 8 1†. See AHIRAM.

AHARHEL (אֲחַרְחֵל; ἀδελφου ρηχαβ [BA], αραιηλ αδελφου ρηχαβ [L]; *AHAREHEL*), a name in an obscure part of the genealogy of JUDAH (1 Ch. 4 8†).

AHASAI, or rather as RV, AHZAI (אַחְזַי; in some MSS and edd. אַחְזָי; a shortened form of Ahaziah; om. BA, αζαχιου [ℵc.a mg. inf.], ζακχιου [L]), a priestlyname in a list of inhabitants of Jerusalem (see EZRA, ii. §§ 5 [*b*], 15 [1] *a*), Neh. 11 13† = 1 Ch. 9 12† JAHZERAH (יַחְזֵרָה; ιεδειου [B], ιεζριου [A], εζερα [L]), which is probably a corruption of Jahzeiah (see JAHAZIAH).

AHASBAI (אֲחַסְבַּי), 2 S. 23 34. See ELIPHELET, 2.

AHASUERUS (אֲחַשְׁוֵרוֹשׁ; in Kt. of Esth. 10 1, the edd., following the Palestinian reading, have אחשרש). 1. An Ahasuerus is mentioned in MT in Ezra 4 6 and Dan. 9 1; and in Esther he is one of the leading *dramatis personæ*.

In MT of Esther he is mentioned in 1 1 *f.* 9 *f.* 15* *f.** 19 2 1* 12* 16 21‡ 3 1 6 *ff.* 12‡ 6 2 7 5* 8 1 7*‡ 10*‡ 12 9 2* 20 30* 10 1* 3.[2] The readings of 𝔊 are: Ezra 4 6, ασθηρου [B], ασσουη. [A], ασσυη. [L]; Dan. 9 1, ασουηρου [Theod.], but ξερξου [87, *i.e.*, the LXX; also Syr. mg.]; in Esther ασσυηρου [a text of 𝔊L, on which see below], but αρταξερξου [β text of 𝔊L and 𝔊BℵA], -ξεξ. [B* vid. once], αταρξερξης [A* once], αρταρξερξης [A thrice].

In Ezra 4 6, where he is a king of Persia whose reign fell between that of Koresh (Cyrus) and that of Artaḥšasta (Artaxerxes Longimanus), he can hardly be any other than the king called *Khshayārshā* in the Persian inscriptions (Persep., Elvend, Van), חשיארש in an Aramaic inscription [481 B.C.] from Egypt (*CIS* ii. 1 122), and Ξέρξης by the Greeks (cp above, readings of Dan. 9 1). This name, which to Semites presented difficulties of pronunciation, was distorted likewise by the Babylonians in a variety of ways. As Prof. Bezold has informed the writer of the present article, we find on Babylonian tablets not only such forms as *Khishiarshu*, *Akhshiyarshu*, *Akkashiarshi*, *Akkisharshu*, but also *Akhshiyawarshu*, *Akhshuwarshi*, and *Akhshiwarshu*, with the substitution of *w* for *y*, as in אחשורש.[1] In other cases also the OT uses אַחַשְׁ to represent the Persian *khsh*, at the beginning of words. The insertion of ו before the final *sh* rendered the pronunciation easier to the Hebrews; but whether the vowel was contained in the original form of the Hebrew texts we cannot determine.[2]

The Ahasuerus of the Book of Esther is a king of Persia and Media (1 3 18 *f.*), whose kingdom extends from India to Ethiopia and consists of 127 satrapies (1 1 8 9 9 30). He has his capital at Shushan in Elam. He is fond of splendour and display, entertaining his nobles and princes for 180 days, and afterwards the people of his capital for seven (𝔊BℵA six) days (1 3-8). He keeps an extensive harem (2 3 14 *f.*), his wives being chosen from among all the 'fair young virgins' of the empire (2 2-4 12-14). As a ruler he is arbitrary and unscrupulous (3 8-11, and *passim*). All this agrees well enough with what is related of Xerxes by classical authors, according to whom he was an effeminate and extravagant, cruel and capricious despot (see ESTHER, § 1). This is the prince, son of Darius Hystaspis (Vishtāspa), whom the author of Esther seems to have had in mind. There has been an attempt to show, from the chronological data which he gives, that he knew the history of Xerxes accurately. He tells us that Esther was raised to the throne in the tenth month of the seventh year of Ahasuerus (2 16 *f.*), after having spent twelve months in the 'house of the women' (2 12). The command to assemble all the 'fair young virgins' in his palace (2 1-4) must, therefore, have been promulgated in his sixth year. But, in what is usually reckoned as the sixth year of his reign—viz. 480 B.C.—he was still in Greece. He could not, therefore, issue a decree from Shushan till the following year. This can be regarded as the sixth of his reign only by not counting the year of his accession, and taking 484 as the first of his reign. It is not impossible that the Persians may have taken over from the Babylonians the practice (see CHRONOLOGY, § 9) of reckoning the whole of the year, in the course of which a change of ruler occurred, to the late king; but it is not known as a fact. In this uncertainty we shall do well to suppose that the author of Esther has arbitrarily assumed his chronological data, and that his occasional coincidences with history are accidental merely.

2. For the Ahasuerus who is called the father of Darius the Mede in Dan. 9 1, see DARIUS, 1.

3. Tobias heard (Tob. 14 15†) of the destruction of Nineveh by 'Nebuchadnezzar and Ahasuerus' (so RV, AV ASSUERUS: ασυηρος [B], ασσυ. [ℵc.a], ασου. [A], but 'Achiacharus, king of Media' [ℵ*], cp ACHIACHARUS, 2). See TOBIT, BOOK OF.

C. P. T.-W. H. K.

1 In 22 38, the words 'They washed his chariot in the pool of Samaria and the dogs licked his blood,' etc., are an interpolation intended to explain how the dogs could lick Ahab's blood (which must have been dried up in the long journey from Ramah) and so fulfil the prediction of 21 19. But this was to happen at Jezreel, not at Samaria (We. *CH* 360).

2 The asterisks (*) indicate that 𝔊BAL omits the proper name, which is sometimes inserted by ℵc.a mg. The double-daggers (‡) indicate that the editions following the Palestinian reading omit the second ו.

1 Cp Strassmaier, *Actes du viiie congrès des orientalistes*, sect. sém. 18 *f.* for a form corresponding to אחשורש (Aḥshawarsh?) found on Babylonian contract tablets.

2 See further Bevan, *Daniel* 149, where Aḥašyarš or Ahšayarš is proposed as the original Jewish form.

AHAVA (אַהֲוָא), a place (Ezra 8 15; ϵγϵιμ [B], ϵγϵι [AL]) or, as in the parallel 1 Esd. 841 (THERAS; om. B; Θεραν, accus. [A]; ϵϵιⲁ [L]) and Ezra 82131 (θογϵ [B], aoys [B?A; in *v.* 31 sup. ras.], ⲁⲁογⲁθ [L]) = 1 Esd. 8 50 ('for the young men,' τοῖς νεανίσκοις [BAL], *i.e.*, apparently בחרים for נהר אהוא) 861 (Theras, θϵρⲁ [BA], ϵϵιⲁ [L]), a river, near which Ezra assembled his caravan before its departure for Jerusalem. The site and the river remain unidentified. We know that both were in the Euphrates basin, and that CASIPHIA (*q.v.*; cp. Jos. *Ant.* xi. 5 2; see Be-Rys, *Ezra*, *ad loc.*) was not very far off. The form Theras (see above) seems to have arisen from תרא(κ) for אהוא, which is the reading of some MSS for אהוא in Ezra 8.

AHAZ (אָחָז, a shortened form of JEHOAHAZ, the Jauḫazi of the inscriptions: see *KB* 220). 1. (ⲁχⲁz [BℵAQΓL], see also below, § 4 end, Jos. Ἀχάζης, ACHAZ [Vg. and Mt. 1 9 AV].)

1. Syro-Ephraimitish war.

Son of Jotham and eleventh king of Judah (733?-721, cp CHRONOLOGY, § 34 *ff.* and table in § 37). He was young, perhaps only twenty years of age[1] (2 K. 16 2), when he ascended the throne, and appears already to have struck keen observers such as Isaiah by a want of manliness which was quite consistent with tyranny (Is. 3 12*a*). The event seems to have been regarded by Rezin (or rather Rezon) of Damascus as favourable to his plan for uniting Syria and Palestine in a league against Assyria. Pekah, who had just become king of Israel by rebellion and assassination, was only too glad to place himself at the disposal of Rezin, who alone could defend him from Tiglath-pileser's wrath at the murder of an Assyrian vassal. Rezin and Pekah, therefore, marched southward, —being safe for the moment from an Assyrian invasion —with the object of forcing Judah to join their league (2 K. 16 5; Is. 8 1-9; cp ISAIAH, i. § 11). They could feel no confidence, however, in any promise which they might extort from Ahaz. For Ahaz, who, unlike Rezin, had no personal motive for closing his eyes to the truth, was conscious of the danger of provoking Assyria. Let us, then, said Rezin and Pekah, place a creature of our own, who can be trusted to serve us, on the throne of Judah (Is. 7 6). Their nominee is called *ben-Tabel* (see TABEEL, 1), whom the language ascribed to the allies hardly allows us to identify with Rezin.[2] He was probably one of Rezin's courtiers, and thus (what a disgrace to Judah!) a mere Syrian governor with the title of king. The attempt to take Jerusalem was a failure. The fortress proved too strong to he taken by storm, and to have prolonged the siege, in view of the provocation given to Assyria and the terrible promptness of Assyrian vengeance, would have been imprudent. Ahaz, too, in his alarm (which was fully shared by the citizens),[3] had already made this vengeance doubly certain by sending an embassy to Tiglath-pileser with the message, 'I am thy slave and thy son: come up and deliver me' (2 K. 16 7; this verse should be read immediately after *v.* 5).[4]

[1] In 2 Ch. 28 1, some MSS of 𝔊 and Pesh. read 'twenty-five' for 'twenty. This is more natural in view of the age assigned to Hezekiah at his accession. The)' five' may, however, have crept in from 27 1 29 1. 𝔊BAL reads 'twenty.'

[2] Wi. *AT Untersuch.* 73-75; cp, however, ISRAEL, HIST. OF, § 32.

[3] See Is. 7 2 8 6. The latter passage is partly corrupt; but it is clear, at least, that the people of Judah are reproved for distrusting Yahwè's power to save his people, and 'desponding' because of 'Rezin and hen-Remaliah.' The 'waters of Shiloah' are a symbol of Yahwb (cp Ps. 46 4; Is. 33 21). See Che. 'Isaiah' (*SBOT*). The interpretation of 𝔊, which paraphrases מְשׂוֹשׂ אֶת־ (AV and RV, ungrammatically, 'rejoice in') by βούλεσθαι ἔχειν βασιλέα, is certainly wrong though supported by some eminent names (Ges., Ew., Kne., Si.), for it is opposed to Is. 7 2 8 12. Even were the supposition that there was a large party in the capital favourable to Rezin and Pekah more plausible than it is, it would still be unwise tb base the supposition on a passage so strangely expressed and of such questionable accuracy as Is. 8 6.

[4] If the statement of the compiler in 2 K. 16 3 that Ahaz offered up his son (𝔊L and Symm. say 'his sons,' with 2 Ch. 28 3) is correct, we may perhaps assign the fearful act to this period.

One man, Isaiah ben Amoz, had kept his head cool amid this excitement. He assured Ahaz on the

2. Isaiah's advice.

authority of the God of prophecy that the attempt of Rezin and Pekah would be abortive and that Damascus and Samaria themselves would almost immediately become a prey to the Assyrian soldiery (Is. 7 4-9 16 8 1-4 17 1-11). He hade Ahaz be wary and preserve his composure (הִשָּׁמֵר וְהַשְׁקֵט)—to take no rash step, but quietly perform his regal duties, trusting in Yahwè. When the news came that Ahaz had hurriedly offered himself as a humble vassal to Assyria in return for protection from Rezin, Isaiah changed his tone. He declared that Judah itself, having despised the one means of safety (faith in Yahwè and obedience to his commands), could not escape punishment at the hands of the Assyrians. Under a variety of figures he described the havoc which those dreaded warriors would produce in Judah—a description to which a much later writer has added some touches of his own (*vv.* 21-25; see *SBOT*).

Was Ahaz right or wrong in seeking the protection of Assyria? Stade has remarked that 'he acted as any

3. Ahaz's policy.

other king would have acted in his position.'[1] On the other hand, Robertson Smith thought that 'the advice of Isaiah displayed no less political sagacity than elevation of faith.' 'If Ahaz had not called in the aid of Tiglath-pileser, his own interests would soon have compelled the Assyrian to strike at Damascus; and so, if the Judæan king had had faith to accept the prophet's assurance that the immediate danger could not prove fatal, he would have reaped all the advantages of the Assyrian alliance without finding himself in the perilous position of a vassal to the robber empire. As yet the schemes of Assyria hardly reached as far as Southern Palestine.'[2] There is some force in this. The sending of tribute to Assyria was justifiable only as a last resource. To take such a step prematurely would show a disregard of the interests of the poorer class, which would suffer from Assyrian exactions severely. It is doubtful, however, whether the plans of Assyria were as narrowly limited as is supposed. Tiglath-pileser did not, even after receiving the petition of Ahaz, attack Damascus instantly. First of all he invaded Philistia and Northern Arabia.

We shall have occasion to refer again to the important chapter of Isaiah which describes the great encounter between the king and the prophet (see ISAIAH, i. § 2 *b*). Suffice it to say that we misunderstand Isaiah if we connect his threat of captivity in chap. 7 *f.* too closely with the foreign policy of Ahaz. It was not the foreign policy but the moral weakness of Ahaz and his nobles which had in the first instance drawn forth this threat from Isaiah (Is. 58-16). Nor can we venture to doubt that, if Ahaz had satisfied the moral standards of Isaiah, this would have had some effect on the prophet's picture of the future. 'Visions' and 'tidings' of men of God such as Isaiah are not merely political forecasts: they are adjusted to the moral and mental state both of him who speaks and of those who hear.

It is not to Isaiah or to a disciple of Isaiah, but to the royal annalist, that we owe the notice that the

4. Consequences.

tribute of Ahaz was derived from the treasury of the palace and of the temple, and that Ahaz did not spare even the sacred furniture (2 K. 16 8 17).[3] It would be interesting to know whether he sent the brazen oxen on which the brazen 'sea' had hitherto rested (they were copies of Babylonian sacred objects, and properly symbolised Marduk) to Tiglath-pileser, or whether he melted them

[1] *GVI* 1 595.

[2] WRS *Proph.*[2] 265; cp Kittel, *Hist.* 2 346 (near foot).

[3] On the text of 2 K. 16 17, which is corrupt, see St. *ZATW* 6 163.

down for himself. It is more important, however, to notice that this time, apparently, the tribute for Assyria was provided without any increase in the taxation. Isaiah, we may suppose, would have approved of this.

Isaiah's forecasts were verified, not, indeed, to such an extent as much modern speculation about the prophetic books demands, but as far as his own generation required. Damascus fell in 732; Samaria had a breathing time till 722; and, according to Sennacherib, there was a partial captivity of Judah in the next reign. It was after the first of these events that Ahaz first came in contact with an Assyrian king. In 734 the name of Jauḫazi of Judah occurs among the names of the kings who had paid tribute to Tiglath-pileser; but we have no reason to suppose that he paid it in person. It was in 732, after the fall of Damascus, that he paid homage in person to his suzerain. On this occasion he 'saw the altar that was at Damascus' (2 K. 16 10), and, on aesthetic grounds, liked it better than the bronze altar which had hitherto been used at Jerusalem for burnt offerings. It was probably an Assyrian altar, for the Assyrians on principle introduced their own cultus into conquered cities. So Ahaz sent a model of the altar to the chief priest Uriah (cp Is. 8 2), who at once made an altar upon the pattern, and transferred the old altar to a new position. This was, doubtless, against the will of Isaiah, who in his earliest extant prophecy so strongly denounces the love of foreign fashions. Possibly at the same time Ahaz borrowed the sun-dial (if EV rightly paraphrases the expression, 'the steps of Ahaz'; see, however, DIAL). Nor is it likely that Ahaz paused here.[1] A suggestive allusion to the addiction of Ahaz to foreign worship is traceable in 2 K. 23 12; but there is a textual difficulty in the passage (see Kaniphausen's note in Kau. *HS*).[2]

The reign of Ahaz was inglorious, but on the whole peaceful. It was a severe blow to the commerce of Judah when Rezin, on the accession of Ahaz, attacked and captured Elath (on the Arabian Gulf), and restored it to its former possessors, the Edomites; but at the close of Ahaz's reign Isaiah was able to contrast the peace enjoyed by 'the poor of Yahwè's people' with the chastisement inflicted by Assyria on the restless Philistines.[3]

Other readings of 𝔊 are: αχας [B often, A¹? vel forte a? once, A once, Qᵃ once], -χααζ [A twice], αχαβ [A, 2 Ch. 18]. In Jer. 22 15 𝔊ᴮℵQ 'Ahaz' takes the place of the true reading 'Ahab' of 𝔊ᴬ (see AHAB, 1 [end]).

2. (χααζ [A]; αζαζ [L]), a descendant of Saul; 1 Ch. 8 35 *f.* (ζακ [B]) = 9 41 (om. EV MT 𝔊ᴮᴬ; but correctly inserted by 𝔊ᴸ Pesh.), 9 42 (αχαζ [B]). See BENJAMIN, § 9 ii. *β*.

T. K. C.—W. E. A.

AHAZIAH (אֲחַזְיָהוּ, אֲחַזְיָה, 'he whom Yahwb supports'; οχοζ[ε]ιας [BAL]; for other readings see end of no. 2). 1. Son of Ahab and Jezebel, and king of Israel (853-851? **B.C.** Cp CHRONOLOGY, § 28 and table in **§ 37**). A poor successor to the heroic Ahab. Once more Israel must have been dependent on Damascus, while Moab (see AHAB, § 2) continued to enjoy its recovered independence. The single political action reported of him is his offer to JEHOSHAPHAT (*q.v.*, 1) to join in a trading expedition to Ophir (1 K. 22 50). The close of his life is described in a prophetic legend of very late origin (see ELIJAH, § **3**). He fell through the lattice of an upper room in his palace in Samaria, and though he lingered on a sick-bed for some time, did not recover. The story (2 K. 12-17) is a painful one, and was used by Jesus to point the contrast between the unchastened zeal of his disciples and the true evangelical spirit (Lk. 9 54-56). The one probably historical element is the consultation by Ahaziah of the oracle of Baal-zebub of Ekron. To most of Ahaziah's contemporaries his action would have seemed quite natural[1] (cp 2 K. 5 8 7 *ff.*).

2. Son of Jehoram (or Joram) and Ahab's daughter Athaliah, king of Judah (843-842? B.C. Cp CHRONOLOGY, § 28 and table in **§ 37**). He was only twenty-two when he ascended the throne,[2] and only one event in his brief reign has been recorded—the part which he took with Jehoram king of Israel in a campaign against Hazael of Damascus. The kings of Israel and Judah laid siege to Ramah in Gilead (the place before which Ahab lost his life in battle) which was still held by the Aramaeans. Jehoram withdrew wounded. Ahaziah also went to his home, but afterwards visited his sick kinsman at Jezreel. During this visit JEHU (*q.v.*) revolted, and the two kings (equally obnoxious to Jehu) went forth in their chariots to meet him. Ahaziah saw his uncle Jehoram pierced by an arrow, and took to flight. As he fled in the direction of BETH-HAGGAN (*q.v.*; 2 K. 9 27, 𝔊) Jehu dashed after him with the cry, 'Him too.' At the ascent of Gur by Ibleam, on the road to Jerusalem, he too was struck by an arrow. Thereupon he turned his horse northwest, and reached Megiddo, but died there of his wound. He was buried in the royal cemetery at Jerusalem. The conflicting account in 2 Ch. 229, from whatever late source derived, is of no historical value

(Other readings—2 K. 829 9 21 οχοζει [B]; 2 K. **14** 13 ιωαχας [B], αaζια [A], L om. 1 Ch. 3 11 οζεια [B], οζιας [A].), In 2 Ch. 21 17 he is called 'Jehoahaz, and in 226 Azariah. See JEHOAHAZ, 3.

W. E. A.

AHBAN (אַחְבָּן, § 45, meaning obscure, for form cp Eshban, 'brother of an intelligent one' [BDB], or less improbably 'brother has given heed,' so Gray, *HPN* 83, n. 2, who suggests the vocalisation אֲחִבֵן), a Jerahmeelite family name, 1 Ch. 2 29† (αχαβαρ [B], οζα [A], ναδαβ [L, cp vv. 28 30], *AHOBBAN*).

AHER (אַחֵר; αερ [B], αορ [A], om. [L Pesh.]; *AHER*), a very doubtful Benjaniite name (1 Ch. 7 12†). See HUSHIM, 2; DAN, § 9; BENJAMIN, § 9 ii. *a*.

Be. (*in loc.*) explains the name **as** meaning 'the other one,' and conjectures it to be a euphemism for Dan the express mention of the name of this tribe seeming in mbre than one instance to have been deliberately avoided. (*See* however DAN, § 9.) On the other hand 𝔊ᴮᴬᴸ reads 'his son' for 'the sons of' (בנו for בני), and the name is entirely wanting in 𝔊ᴸ and Pesh., the former (and perhaps originally also the latter) connecting Hnshim (ιεσσουδ, *ḥūšā*) with what goes before (see IRI). See also AHARAH.

AHI (אֲחִי, § 52, probably abbrev. from AHIJAH).

1. In genealogy of GAD, 1 Ch. 5 15† (Vg. wrongly translates, *fratres* ***quoque;*** Pesh. and 𝔊ᴸ om.; 𝔊ᴮᴬ combines with the preceding name Buz—[ζαβ]ουχαμ [B], αχι(βουζ) [A]).

2. In genealogy of ASHER (**§ 4** n.), 1 Ch. 7 34†. 𝔊ᴮᴬ, attaching part of the following name (see ROHGAH), produces Αχι(ουρα) [A], or Αχι(ουια) [B]; hut 𝔊ᴸ has ηειγ.

AHI, NAMES WITH. See ABI, NAMES WITH.

AHIAH, frequently in AV and once (Neh. 10 26 [25]) inconsistently in RV. See AHIJAH, 1 *f.* 4.

AHIAM (אֲחִיאָם, § 65, for which we should probably point אֲחִיאֵם, 'mother's brother' [cp AHAB], analogous to the Sab. pr.n. אחתאמהו, 'sister of his mother'; cp *HPN* 64, n. 2), one of David's heroes, 2 S. 23 33 (αμναν [BA], om. [L]) = 1 Ch. 11 35† (αχειμ [Bℵ], αχιαμ [AL]). See DAVID, § 11 *a* i.

AHIAN (אַחְיָן, § 65, 'relative, cousin,' cp ܐܚܝܢܐ; ιααιμ [B], αειν [A], αειμ [L]; *AHIN*), a Manassitc name (1 Ch. 7 19†). See SHEMIDA.

AHIEZER (אֲחִיעֶזֶר, § 44, 'the [divine] brother is help,' cp Abiezer, Eliezer; αχιεζερ [BAFL]).

1. h. Ammishaddai, chief of the Danites, temp. Moses [P] (Nu. 1 12 2 25 εχι. [F]; 7 66 71 10 25)†.

2. One of David's archers (1 Ch. 12 3†). See DAVID, § 11 *a* iii.

[1] Schr. *COT* 1 249 255, Wi. GBA 234.

[2] For לְאָרָם read לְאֱדֹם; cp the Ḳrē. וארומים for וארומים.

[3] The heading of Is. 14 28-32 is probably correct. See **Che.** ***Intr. Is.*** 80 *f.*; but cp Duhm ***ad loc.***

[1] Smend, ***A T*** *Rel.-gesch.* 157.

[2] So 2 K. ***826***. In 2 Ch. 22 2 his age is given as forty-two (𝔊ᴮᴬ 20); but this is clearly miswritten for twenty-two (so 𝔊ᴸ; cp 21 5 20).

AHIHUD (אֲחִיהוּד, 'the [divine] brother is praise,' cp ABIHUD; αχιωβ [A], -ωρ [BFL], *AHIHUD*), an Asherite selected to assist Joshua and Eleazer in the division of Canaan (Nu. 34 27 P†).

AHIHUD (אֲחִיחֻד; ιαχειχωλ [B], -χιχαδ [A], ογα [L]; *AHIUD*), in genealogy of BENJAMIN (§ 9 ii. β), 1 Ch. 8 7†. Cp UZZA, 1.

AHIJAH (אֲחִיָּה, 'Yahwè is brother' [*i.e.*, protector]; cp Abijah and the Babylonian name A-ḫi-ia-a; Jastrow, *JBL*, 1894, p. 105; αχ[ε]ια [BAL]).

1. b. Ahitub, priest at Shiloh, bore the ephod, temp. Saul; 1 S. 14 3 (Jos. Ἐχίας, Ἀχίας, AV AHIAH). In 4 Esd. 1 2† he appears as ACHIAS (*Achias* [ed. Bensly]) between Ahitub and Amariah of Ezra 7 2 *f.*, or 1 Ch. 6 7.

2. In genealogy of BENJAMIN (§ 9 ii. β), one of those who were 'carried captive' (1 Ch. 8 7; AV AHIAH), whose name should perhaps be read in *v.* 4 for AHOAH (אֲחוֹחַ; *αοα* [L], *Ahoe;* but *αχια* [B], ܐܚܝܐ; A om.); see further AHOHITE.

3. The Pelonite; a corruption of Ahithophel the Gilonite, the name of his son (one of David's heroes) being omitted (1 Ch. 11 36; see ELIAM, 1; AHITHOPHEL).

4. b. Shisha (SHAVSHA), and brother of ELIHOREPH (*q.v.*); one of Solomon's secretaries of state (1 K. 4 3; AV AHIAH). See BEN-HESED, § 3.

5. A Levite, who owes his existence to a demonstrable text-corruption (1 Ch. 26 20; read with BAL, ἀδελφοὶ αὐτῶν, 'and the Levites their brethren').

6. According to AV (which with 𝔊L prefixes 'and'), the fifth son of JERAHMEEL (*q.v.*, 1), 1 Ch. 2 25. But 𝔊BA gives correctly ἀδελφὸς αὐτοῦ, *i.e.*, אָחִיהָ (so Ki.). We. (*De Gent.* 15) prefers אֶחָיו, 'his brothers.' (L *αχιαμ*.)

7. An Issacharite, father of King Baasha (1 K. 15 27 33, etc.).

8. Signatory to the covenant; Neh. 10 26 [25] (*αρα* [B]; *αια* [א vid. A], *αδειας* [L]; *ECHAIA*). See EZRA, i. § 7.

9. A Shilonite; the prophet who foretold to JEROBOAM (*q.v.*, 1) the disruption of Solomon's kingdom (1 K. 11 29, etc.; *αχ[ε]ιας* [BA twice]). In 2 Ch. 10 15 (*χια* A" but not in ‖ 1 K. 12 15), and in the story of his meeting with Jeroboam's wife (1 K. 14 4*a*-18), the name appears in the form אֲחִיָּהוּ (Ahīyyāhu), on which see ABIJAH (beginning).

AHIKAM (אֲחִיקָם, § 44, 'the [divine] brother riseth up,' cp Adonikam and Phœn. אבקם; αχ[ε]ικαμ [BאAQL]; χειкαм [א* once]: Jos. αχικαμος, ικ., *AHICAM*), like his father SHAPHAN (*q.v.*) a courtier of Josiah. He appears to have belonged to the party favourable to religious reforms. Hence he was included in the royal deputation to Huldah (2 K. 22 12 14, = 2 Ch. 34 20; cp HULDAH), and was foremost in the defence of Jeremiah on a critical occasion (Jer. 26 24). He was the father of GEDALIAH [*q.v.*, 1] (2 K. 25 22 Jer. 39 14 40 5).

a. c. s.

AHILUD (אֲחִילוּד, § 45). 1. Father of Jehoshaphat, David's 'recorder' or vizier (2 S. 8 16; *αχεια* [B], *αχιμελεχ* [A], *αχιναaμ* [L], Jos. Ἄχιλος; 20 24, *αχ[ε]ιλουθ* [BA], *αχιθαλαα* [L]; 1 K. 4 3, *αχειλιαδ* [Bא], *αχιμα* [A]; *αχιθαλαμ* [L]; 1 Ch. 18 15, *αχεια* [BK], *αχιλουδ* [AL]). The name does not mean 'child's brother' (BDB with a ?), nor is it connected with the Ar. tribal name Laudhān (Hommel? see *Exp. Times* 8 283 ['97]). It is difficult not to suggest that אחילוד = אחי[מ]לך = אחילד = Ahimelech (cp above 2 S. 8 16 [A], and below [2], 1 K. 4 12 [B]). For his vizier David would naturally choose some one from a family well known to him. One son of Ahimelech (Abiathar) was a priest of David; another might well have been his vizier. See JEHOSHAPHAT, 2; AHIMELECH, 1.

2. Father of Baana, one of Solomon's prefects or governors of departments, 1 K. 4 12 (*αχειμαχ* [B], *ελουδ* [A], *αχιαβ* [L]). The governor of Naphtali (*v.* 15) is called Ahimaaz—no doubt the son of Zadok who bore this name. Probably therefore this Ahilud is the same as no. 1. Solomon provided well for the families of his father's friends—Zadok, Ahimelech, Hushai, and Nathan (cp AHIMAAZ, 1, 2; BAANA, 2; AZARIAH, 6).

T. K. C.

AHIMAAZ (אֲחִימַעַץ, § 45, meaning uncertain, cp MAAZ; αχ[ε]ιμααc [BAL]).

1. b. Zadok; 2 S. 15 27 (*αχειμαιας* [B]), 36 (*αχιμασσυιος* [A"; σ 2° ras. A"']); 17 17 20 (*αχειμας* [B]), 18 19-29, and, according to the Chronicler, eleventh in descent from Aaron in the line of Eleazar, 1 Ch. 6 8 *f.*, and 53 *αχεισαμα* [B]). Along with his father and brother he remained faithful to David during the revolt of Absalom, and brought important information from Jerusalem to the king as to the enemy's plans; he was also the first courier to reach the king after the battle in which Absalom was killed. Most probably identical with

2. One of Solomon's prefects (see GOVERNMENT, § 18, end), governor of Naphtali; 1 K. 4 15. Cp AHILUD, 2.

3. Father of Ahinoam (1), Saul's wife; 1 S. 14 50† (*αχ[ε]ιναας* [B]).

AHIMAN (אֲחִימָן,[1] § 45; *ACHIMAN, AHIMAN*). 'Ahi,' as usual, is a divine title, and 'man' may be the name of a deity (Měnī; see FORTUNE.).

1. One of the sons of the ANAK (*q.v.*; cp also SHESHAI, TALMAI); Nu. 13 22 (*αχ[ε]ιμαν* [BFL], *αχικαμ* [A]); Josh. 15 14 (*αχ[ε]ιμα* [BAL]); Judg. 1 10 (*αχιναaν* [B], *αχ[ε]ιμαν* [B ab. mg. L], TOY *αχιμααμ* [A]).

2. One of the 'porters for the camps of the Levites'; 1 Ch. 9 17 (*αιμαμ* [B], *-ν* [AL]; *Ahimam*, Cod. Am. *Abiman* [‖ Neh. 11 19 om. everywhere]) in list of those with foreign wives (EZRA, i. § 5, end) = Ezra 10 24 (where he is called URI) = 1 Esd. 9 25 (EV om.). The name in 1 Ch. is probably corrupt. See URI, 3.

AHIMELECH (אֲחִימֶלֶךְ, 'the [divine] king is brother,' see ABIMELECH and cp Phœn. חמלך, Ass. *Aḫimilki*; *αχ[ε]ιμελεχ* [BAL]).

1. Father of Abiathar, erroneously described in 2 S. 8 17 as *son* of Abiathar, also in four places in 1 Ch., in the first of which, moreover, the name in MT is ABIMELECH; see ABIATHAR (last paragraph). For a conjecture that Jehoshaphat, David's vizier, and Baana, Solomon's prefect, were also sons of this Ahimelech, see AHILUD, 1 and 2.

𝔊A reads *αμιμελεχ* in 1 S. 21 1*a* 22 9 and *αβιμ.* in 1 S 21 1*b* 2; B has *αβειμελεχ* invariably except in 1 S. 21 1*a*, and Ps. 52 title,[2] *αβιμ.*; and in 1 S. 30 7 and the five corrupt passages, *αχειμ.*; Vg. *Achimelech*, but in 1 Ch., though not in 2 S. 8 17, *Ahim.* The Vg. and 𝔊U read Ahimelech also in Ps. 34, title; see ACHISH (end).

2. A Hittite companion of David in the time of his outlawry, 1 S. 26 6† (*αχ[ε]ιμελεχ* [B aL], *αβ[ε]ιμ.* [BA]).

AHIMOTH (אֲחִימוֹת, § 45, αλειμωθ [B], οχιμ. [A], αμιωθ [L]), a name in the genealogy of Kohath (1 Ch. 6 25 [10]). If the reading of MT and Versions is correct, *-moth* should be a divine name or title. Barton compares the cosmogonic MWT in Philo of Byblus; but this is too doubtful (see CREATION, § 7), and though מות 'death,' in Ps. 49 14 [15] and elsewhere is personified, a name like 'Death is (our) brother' or 'protector,' is improbable. Possibly Ahinioth should be Ahimahath (see *v.* 35 [20], cp 2 Ch. 29 12); see MAHATH, 1.

AHINADAB (אֲחִינָדָב, § 44; 'the [divine] brother apportions,' but cp further ABINADAB; αχειναδαβ [B], αιναδαβ [A], αχιναδαβ [L]; *AHINADAB*), Solomon's prefect over the district of Mahanaim beyond Jordan (1 K. 4 14†). See GOVERNMENT, § 18 (end).

AHINOAM (אֲחִינֹעַם, § 45, 'the [divine] brother is pleasantness,' αχ[ε]ινααμ [BAL]; Jos. αχινα; *ACHINOAM*). 1. Daughter of Ahimaaz and wife of Saul, 1 Sam. 14 50† (*αχ[ε]ινοομ* [BA]).

2. Of Jezreel in Judah (see ABIGAIL, 2) whom David married during his outlawry. Like Abigail, she was carried off by the Amalekites when they plundered Ziklag. At Hebron she bore to David his eldest son, Amnon, 1 S. 25 43 (*αχειναaν* [B]); 27 3; 30 5 (*αχεινοομ* [B],

[1] A better pointing would be אחִימָן; the present vocalisation, אֲחִימָן, is based on a popular etymology; אחִימן, frater meus quis? (Jer. in *OS*(2) 15 21, etc.).

[2] Other readings here, *αβειμ.* [א]; *Achimelech;* Pesh. quite different.

αχιναaμ [A, *up.* sup. ras. A[1]]), cp *v.* 18 ; 2 Sam. **22** (αχινοομ [BA]), 32 (αχεινοομ [B]) ; 1 Ch. 3 1†.

AHIO (אַחְיוֹ, §§ **24, 43,** possibly, if MT is correct, 'brother of Yahwb,' or 'Yahwb is brother.' The analogy of other names ending in ŏ seems against this view ; Jastrow, *JBL*, **1894,** p. 101).

1. b. Abinadab, brother of UZZAH (*q.v.*, 1), 2 S. 6 3 *f.*; ‖ 1 Ch. 13 7 has 'his brethren,' and We. reads אָחִיו, 'his brother'; see Dr. (in each case, however, 𝔊BAL **has** οἱ ἀδελφοὶ αὐτοῦ, *i.e.*, אָחִיו, in 2 S.).

2. In genealogy of BENJAMIN (§ 9 ii. *β*), one of the sons of Beriah, who put to flight the inhabitants of Gath, 1 Ch. 8 14 (ἀδελφὸς αὐτοῦ, 'his brother' [B], οἱ ἀδελφοὶ *a&*, 'his brethren' [A], οἱ ἀ. αὐτῶν, 'their brethren' [L]; Be. and Kau. אָחִיו ; We. אָחִיו *[De Gent. f.* 29] ; Ki. אחיהם).

3. In genealogy of BENJAMIN (§ 9 ii. *β*), son of Jehiel, the 'father' of Giheon ; 1 Ch. 8 31 ἀδελφὸς αὐτοῦ [B], -φοὶ ah. [A], οἱ ἀδ. αὐ. [L]) = 9 37† (BA om. αὐτοῦ).

AHIRA (אֲחִירַע ; αχ[ε]ιρε [BAFL]; ܐܚܝܕܥ ; *AHIRA*). A Naphtalite family-name reported in P (Nu. 1 15 2 29 7 78 83 10 27†). The old interpretation ' my brother is evil' must be abandoned. Either y is miswritten for ב (see the Palmyrene characters), in which case we get the good Heb. name Ahiram,[1] or we have here a half-Egyptian name meaning ' Ra' (or Re'—*i.e.*, the Egyptian sun-god) is brother or protector' (so Che. *Zsa.* 2 144). The latter view is quite possible (cp the Egyptian name Pet-baal). The Canaanites, who were strong in the territory of Naphtali, were very receptive of foreign religious influences.[2] Cp ASHUR, HUR, HARNEPHER. The reading of Pesh. (uniformly Aḥida') is no doubt either merely a natural variant, or a copyist's substitution of a more normal for a rarer form; cp ABIDA. T. K. C.

AHIRAM (אֲחִירָם, § 44, cp Jehoram ; αχ[ε]ιραν [AL], ιαχ. [B], αχιαν [F]; *AHIRAM*). 1. In the genealogy of BENJAMIN (§ 9 i.) ; Nu. 26 38 (where we have also the gentilic **Ahiramite** ; אֲחִירָמִי ; αχειρανι [L], ια . . ρει [B], αχιραι [A], -ιανει [F]) = Gen. 46 21, where 'Ahiram, Shephupham' ought no doubt to be read for ' Ehi and Rosh, Muppim' (אחירםשפופם for אחיוראשמפים), cp ROSH. In the similar list in 1 Ch. 8 we find in *v.* 1 AHARAH [*q.v.*] (אחרח), and in that in 1 Ch. 7 6 *ff.* in *v.* 12, AHER [*q.v.*] (אחר), cp HUSHIM, 2 ; DAN, § **9**.

2. Perhaps we should read Ahiram also for AHIRA *(4.71.)* in Nu. 1 5, etc.

AHISAMACH (אֲחִיסָמָךְ, 'the [divine] brother sustains' ; αχισαμακ [B], -μαχ [AFL] ; Jos. ισαμαχος, ισαχαμος), a Danite ; Ex. 31 6 (αχισαμαχ [B]) 35 34 38 23 [P]. See DAN, § 9 n.

AHISRARAR (אֲחִישַׁחַר, §§ **35, 44,** 'the [divine] brother is dawning light,' cp Abner, Shehariah; αχεισαδαρ [B], αχισααρ [A], ασσαειρ [L]), in genealogy of BENJAMIN (§ **9 ii.** *α*), 1 Ch. **7** 10†. See JEDIAEL, **1.**

AHISHAR (אֲחִישָׁר, § 44), Solomon's comptroller of the palace (1 K. 4 6†). The name, however, is suspicious.

𝔊B gives the double rendering, αχει ἦν οἰκονόμος, and ελιακ ὁ οἰκ., and perhaps even a third rendering ελιαβ υἱὸς σαφ ἐπὶ τῆς πατριᾶς ; ελιακ should he αχιηλ, which 𝔊L has, and may be the true 𝔊 reading. But MT (𝔊A αχισαρ) has yet to he accounted for. For וַאֲחִישָׁר we should probably read אָחִיו שַׂר. Zahud, who has just been mentioned, is described as not merely **a** priest but ' the officer(placed) over the palace ' (so Klo.). See ZABUD, 1. T. K. C.

AHITHOPHEL (אֲחִיתֹפֶל, § **45,** meaning uncertain ; αχ[ε]ιτοφελ [BAL], -λος, Jos.), a Gilonite (see GILOH), a counsellor of David much esteemed for his unerring insight (2 S. 15 12 16 23). His son ELIAM (*q.v.*, 1) was, like Uriah, a member of David's bodyguard (**2 S. 23 34** ; cp DAVID, § 11 *a* i), and since Bathsheba, the wife of Uriah, is described as the daughter of Eliam (2 S. 11 3), it has been conjectured that Ahithophel was her grandfather, and that indignation at David's conduct to Bathsheba led Ahithophel to cast in his lot with Absalom's rebellion. This, however, is a mere possibility, and ambition would be a sufficient motive for Ahithophel's treason to David, just as the slight involved in Absalom's preference of Hushai's counsel to his own was certainly one chief cause of his final withdrawal' from Absalom. At first, indeed, he had full possession of the ear of the pretender. **It** was by his advice that Absalom took public possession of his father's concubines, and so pledged himself to a claim to the throne, from which there was no retreat (2 S. 16 20 *ff.*). Ahithophel was also eager in his own person to take another bold and decisive step. He wished to pursue David with **12,000** men and cut the old king down in the first confusion and entanglement of his flight towards the Jordan (2 S. 17 1-4). This plan was defeated by Hushai, whereupon Ahithophel, seeing that all hope was gone, went to Giloh and strangled himself.

In 1 Ch. **11 36** 'Ahithophel the Gilonite' has been corrupted into 'Ahijah the Pelonite,' אֲחִיָּה הַפְּלֹנִי for אחיתפל הגלני ; **cp** Klo. *Sam.*, *ad loc.* (αχ[ε]ια [BAℵL]), and see GILOH, end.

W. *E.* A.

AHITOB (αχειτωβ [B], etc.), 1 Esd. 8 2 **RV,** 4 Esd. 1 1† RV. See below, AHITUB, 2.

AHITUB (אֲחִטוּב or אֲחִיטוּב [1 S. 14 3 22 9 20], § **45** ; cp Aḫi-ṭābu *KB* 5, no. 11 14, αχ[ε]ιτωβ [BAL]).

1. **A** member of the family in which the priesthood, first at Shiloh, then at Nob, appears for some generations to have been hereditary. He was grandson of Eli, son of Phinehas, and elder brother of Ichabod (1 S. 14 3 ; cp 4 19-21). His son, Ahijah, is mentionedas priest in 1 S. 14 3 ; another son, Ahimelech, appears as priest in **1 S.** 22 9 11 12 20. It is unnecessary with Thenius and Bertheau to identify Ahimelech with Ahijah; but that Ahitub, the father of Ahimelech, is identical with Ahitub, the father of Ahijah, is clear from 1 K. 2 27, which implies that Abiathar, the son of Ahimelech (1 S. 22 20), was of the house of Eli. Nothing further is directly told of Ahitub; but, if Wellhausen's suggestion that the destruction of Shiloh (Jer. 7 12) took place after the battle of Aphek (1 S. 4) be accepted, the transference of the priestly centre from Shiloh to Nob (1 S. 22 9-11), will have taken place under him.

The description of Ahituh as father of Zadok (2 S. 8 17 = 1 Ch. **18 16,** 1 Ch. **6** 8 [5 34] 53 [38]) is due to an intentional early corruption of the text in Samuel, which originally ran 'Abiathar, the son of Ahimelech, the son of Ahituh, and Zadok were priests' (for the argument see We. *TBS* 176 *f.*).

2 and **3.** Father of **a** (later) Zadok, mentioned in 1 Ch. **6** 11 *f.* [5 37 *f.*], and in pedigree of Ezra (see EZRA, i. § 1) Ezra 7 2 = 1 Esd. 8 2 = 2 Esd. 1 1 (in the last two passages AV ACHITOB, RV AHITOB) ; and *a* priest, father of Meraioth and grandfather of Zadok, in the list of inhabitants of Jerusalem (**EZRA,** ii. §§ 5 [*b*], 15 [*c*] *a*), 1 Ch. 9 11 = Neh. 11 11 (αποωβωχ [B], αποβωκ [ℵ], αιτωβ [A]). These references, however, are probably due to intentional or accidental amplification of the original genealogy, and do not refer to any actual person. Ryle, apparently takes another view ; see his notes on *Ezra* 7 1-5, **and** Neh. **11 11.**

4. Ancestor of Judith ; Judith 8 1† RV, AV following 𝔊A ακιθω ACITHO, *Achitob* ; so also It., Syr. ; om. B. *G.* B. *G.*

AHLAB (אַחְלָב, *i.e.*, 'fat,' 'fruitful'; δαλαφ [BAL], *i.e.*, αλαφ [Clermont Ganneau points out the place-name Mahāleb, N. of Tyre *(Rev. Crit.* **1897,** p. 503)]), a Canaanite town claimed by Asher (Judg. 1 31), and referred to probably in Josh. 19 29, at the end of which verse there appears to have been originally a list of names including (by a correction of the text) Ahlab and Achzib.[1] See HELBAH.

[1] Αχειρε in 3 K. **2 46** *h* [B] answers to Adoniram (cp 1 K. **4 6**) of MT.

[2] On names of foreign deities in Israelite names, see under ELIDAD, and NAMES, §§ 42, 81, **83.**

[1] Josh. 19 29 ends thus, הַיָּמָּה מֵחֶבֶל אַכְזִיבָה, which AV renders ' at the sea from the coast to Achzib,' and RV 'at the *sea* **by** the

Many (*e.g.*, Neubaner, Grove, Fiirst) identify either Ahlab or Helbah with the Guš Ḥālāb (גוש חלב, 'fat clods') of the Talmuds—the Giscala of Josephus. But this place (*el Jish*), which is mentioned with Meron (*Meirôn*), and Biri (*Kefr Bir'îm*), must have lain on Naphtalite ground. 'The statement in Talm. *Menachoth* 85 *6*, that Gush Ḥalab belonged to Asher is a mere guess, suggested by the blessing of Asher in Dt. 33 24. For a sounder view see HELBAH.

AHLAI (אַחְלַי, acc. to Olsh. [*Heb. Gr.* 610] = *utinam.* Del., *Prol.* 210, compares Bab. interj.-name *Aḫulalpia*, 'O that I at last.' More probably the name is a corruption of אֲחִיאֵל, or the like).

1. Son, or (an inference from *v.* 34 which comes from a later hand) daughter of Sheshan b. Isha, a Jerahmeelite; 1 Ch. 2 31 (αχαι [B] αδαι [A], ουλαει [L]). See JERAHMEEL, 1.

2. Father (or mother?) of ZABAD (*q.v.*); 1 Ch. 11 41† (αχαια [B], αχεα [ℵ], ολι [AI, σαμααλι [L], *i.e.*, a combination of part of *Lappa* or Σαμαια with ααλι). T. K. C.

AHOAH (אֲחוֹחַ), *1* Ch. 8 4†. See AHIJAH, 2, BENJAMIN, § 9 ii. β.

AHOHITE, THE (הָאֲחֹחִי, *i.e.*, a man of the family of Ahoah or AHIJAH? *q.v.*, 2). The designation (1) of Zalmon (2 S. 23 28†, αωειτης [B], ελω. [A], ακαχι [L]; ܘܨܠܡܘܢ ܒܪ ܐܚܘܚ) = ILAI [see ZALMON, 2] (1 Ch. 11 29: αναχωνει [ℵ*], αχ. [Bℵ[1]], final χ being confounded with ν; αχωρ [A[a] sup. ras. seq. ras.], ακαθι [L]; ܘܨܠܡܘܢ ܕܡܢ ܚܘܚ).

Also (2) of Dodai, or of Eleazar b. Dodai (as in 1 Ch. 27 and in 2 S. and 1 Ch. 11 respectively; see DODAI, ELEAZAR, *3)*, one of David's heroes (see ELEAZAR, *3)* in the list *1* Ch. 27 4 (εκχωχ [B], αωθι [A], αχωχι [L]) = 1 Ch. 11 12 (αρχωνει [B], αχ. [ℵ], αχωχι [A], υἱὸς Δωδαι πατραδέλφου αὐτοῦ [L]) = 2 S. 23 9 (that is, if with AV we treat בן־אחחי as = האחחי of the parallel passages, and do not [with Marq. *Fund.* 16 *f.*] correct the whole expression everywhere into בת הלחמי 'the Bethlehemite' [cp *v.* 24], the corruption in the Heb. text of Sam. being accounted for by the half-effacement of the letters, which the scribe read in the false light of *v.* 28). 𝔊 evidently omits, since the forms σουσει [B], δουδει [B[b vid.] L], σωσει [A] must be corruptions for דּדי, Dod(a)i.

AHOLAH, RV correctly **Oholah** (אָהֳלָה; ooha [B indecl. and decl., and, except *v.* 44, Q; but B, not B[a] -λλ. *v.* 4], ολλα [A and in *v.* 44 Q]), a symbolical name equivalent to Oholibah (see AHOLIBAH), given by Ezekiel to Samaria (23 4 *f.* 6 44†).

AHOLIAB, RV correctly **Oholiab** (אָהֳלִיאָב; ελιαβ [BAFL]), the associate of BEZALEEL (*q.v.*) in the work of the tabernacle in P (Ex. 31 6 35 34 36 1 2 38 23 [𝔊 37 21†]). See DAN, § 8 n., and cp HIRAM, 2.

AHOLIBAH, RV correctly **Oholibah** (אָהֳלִיבָה, *i.e.*, 'she in whom are tents'—alluding to the worship at the high places; cp Ezek. 16 18; οολιβα [BQΓ], ολ. [A, *v.* 22 Q, *v.* 36 B]), a symbolical name, equivalent to Oholah (see AHOLAH), given by Ezekiel to Jerusalem (23 4 11 22 36 44†).

AHOLIBAMAH, RV correctly **Oholibamah** (אָהֳלִיבָמָה, § 61, *i.e.*, 'tent of the high place,' cp Phcen. אהלמלך *CIS* 1, no. 50, and see HIRAM, 2.

1. Wife of Esau (ολιβεμα [ADE]; ελιβαμα [L]; αλιβαμην [Jos.; cod. Laur. oh.]); Gen. 36 2 (ολιβαιμα [E]), 5 14 (ελιβεμα [A], 18 (ελιβεμα [A once], ολιβεμμα and ελιβαμα [D]), 25† (ολιβα [E], ελιβεμαθ [L; before θυγατηρ]). See BASHEMATH, 1; ANAH, 3 (end).

2. An Edomite chief (ελ[ε]ιβαμας [D[vid.]L], ελιβεμας [A]), Gen. 36 41, and (ελ[ε]αβαμας [BA], ελιβαμα [L]), 1 Ch. 1 52†. See EDOM, § 4.

region of Achzib,' but in the margin 'at the sea from HEBEL to Achzib.' 𝔊, however, points the way to a correction of the text (ἡ θάλασσα καὶ ἀπὸ λεβ καὶ εχοζοβ [B], ἡ θ. κ. ἀ. τοῦ σχοινίσματος εχοζοβ [A], ἡ. β. κ. ἔσται ἀ. τ. σ. αχαζειβ [L]). This implies the reading מחלב, which is not improbably a corruption of אחלב· אַכְזִיבָה, which should rather he וְאַכְזִיב, was an attempt to make sense with מֵחֶלֶב.

AHUMAI (אֲחוּמַי,[1] § 65; αχειμει [BA*], αχιμαι [A[a] sup. ras. et in mg.], αχιμαν [L], ܐܚܘܡܝ; *Ahumai* [cod. am. *Ahimai*]), the eponym of a clan of Judah (1 Ch. 4 2†). Should we read Ahiman (L)?

AHUZAM, RV correctly **Ahuzzam** (אֲחֻזָּם, perh. = 'possession'; for pr. names in *am* see NAMES, § 77), one of the sons of Ashhur 'father of Tekoa'; 1 Ch. 4 6† (ωχαια [B], ωχαζαμ [A], οζα [L]).

AHUZZATH (אֲחֻזַּת, 'possession'; οχοζαθ [AEL], -ζαχ [*D*]; *OCHOZATH*), the 'friend' (𝔊, wrongly, νυμφαγωγός) of Abimelech, king of Gerar (Gen. 26 26†). 'Friend' = minister; cp 1 Ch. 27 33, and see HUSHAI.

The name with the title ὁ νυμφαγωγὸς αὐτοῦ is introduced *also* in 𝔊ADL in the similar narrative of Gen. 21 22-34. For the termination *-ath* there are parallels in Basemath (fem.), Gen. 26 34; Mahalath (fem.), Gen. 28 9; Goliath (the Philistine), 1 S. 17 4; Genubath, 1 K. 11 20; cp names in *-ath* in Aram. inscriptions (Cook, *Gloss. Aram. Inscr.* under ת). Cp Dr. *HT*(3) 236, n. 2.

AHZAI (אַחְזַי), Neh. 11 13† RV, AV AHASAI (*q.v.*).

AI (1) (הָעַי, always thus with def. article, *i.e.*, 'the stone heap'; γαι [BAL, etc.]; written **Hai** in Gen. 12 8 13 3† AV; αγγαι [BAL]). The name appears also in various other forms.

AIJA, or rather Ayya (עַיָּא; om. Bℵ*A, αιω [ℵc.a mg. inf.], γαι [L], Neh. 11 31†); AYYAH, RV mg. (עַיָּה [Bä Gi], not עַזָּה as in most edd., AV GAZA [*q.v.*, 2], *RV* AZZAH; γαιαν [B], γαζης (genit.) [A], αδια [L]; *aza*; ܥܙܐ; 1 Ch. 7 28); AIATH, or rather Ayyath (עַיָּת; *ayyai* [BℵAQ], *Is.* 10 28†).

As to the site of Ai, we learn from Josh. 7 2 (in clause *b* γην [AFL]; in *v.* 3 γαι sup. ras. [B?]) that it was situated 'beside Beth-aven, on the east of Bethel,' and, from the account of Joshua's stratagem, that it lay on the S. side of a steep valley (Josh. 8 11), while from the description in Gen. 12 8, it appears that there was a 'mountain' or flat ridge with a wide view between Ai and Bethel. That there was a close connection between the two places appears also from the expression 'the men of Bethel and Ai' (Ezra 2 28; αια [BA]). With the position thus suggested, Isaiah's graphic picture of an Assyrian invasion from the north (Is. 10 28 *ff.*; αγγαι [Bℵc.a, c.b AQ]; αγγε [ℵ*] = GEBA in *v.* 28) entirely agrees. Where, then, shall we place Ai on the map? Scarcely at et-Tell (Sir C. W. Wilson, *PEFQ.* 1869. 123-6, and Smith's *DB*(2))—there are no signs that et-Tell was ever the site of a city—but at some other spot in the neighbourhood of *Dēr Dīwān* (a village twenty minutes SE. of et-Tell). Robinson, with some hesitation, fixed on a low hill, just S. of this place, where there are still foundations of large hewn stones, and on the W., ancient reservoirs, mostly dug out of the rock. The spot (called *Khirbet Ḥaiyān*) is 'an hour distant from Bethel, having near by, on the N., the deep Wādy el-Maṭyāḥ, and towards the SW. other smaller wādys, in which the ambuscade of the Israelites might easily have been concealed' (*BR* 2 313). To Tristram in 1863, this conjecture 'carried with it the weight of evidence,' particularly because it would be difficult to assign a site to Abraham's camp between Beitīn and Tell el-Hajar (et-Tell), and because Robinson's site affords such ample space for the military evolutions described in Josh. 8, over which, however, some uncertainty is thrown by the variations of 𝔊 in *vv.* 11-13. Both Guérin and the PEF Survey corroborate this view, which, if not proved, is at any rate probable.

As to the history of **Ai**: it was a royal Canaanitish city, and was the second city conquered by Joshua, who destroyed it and doomed it to be 'a mound for ever' (תֵּל־עוֹלָם). By Isaiah's time, however, it had been rebuilt (Is. 10 28), and after the Exile it was re-

[1] See Gray. *HPN* 62, 279, n. 10.

occupied by Benjamites; Ezra 2 28 (αια [BA]) = Neh. 7 32 (αλεια [BS], αι [A]) = 1 Esd. 5 21 (𝔊^BA and EV om.; γαι [L]). In the time of Eusebius (OS 181, 76, Αγγαι) it was once more deserted; but its situation was still pointed out. Its name was prophetic of its history. Or had it some other name before its destruction by Joshua?

2. (עַי; without article; Γαι [Q]; Symm. ἡ ἰσχύς) an Ammonite city, if the text in Jer. 49 3† is correct (𝔊^BNA omits; Rothstein in Kau. *HS* and Co. in *SBOT*, after Graf, read 'Ar עָר). T. K. C.

AIAH, more strictly Ayyah (אַיָּה, 'falcon'). 1. An Edomite tribal name individualised, Gen. 36 24 (AV AJAH; αιε [AD], N. [E; N precedes], αιαι [L]) = 1 Ch. 1 40 (αιθ [B], αια [AL]). The tribe seems to have broken off from that of Zibeon, and to have been less important than that of ANAH (*q.v.*). To identify this insignificant Aiah with the 'goodly land' in which Se-nuhyt the Egyptian exile found a home, according to the old story (so Maspero, *RP*(2) 2 17 23; *PSBA* 18 106 ['96]) is unsafe. On the Iaa (Maspero, Aïa) of the story of Se-nuhyt, see WMM *As. u. Eur.* 47.

2. Father of Saul's concubine Rizpah (2 S. 3 7, ιαλ vel forte ιαα [B*], ιοδ vel forte ιολ [B?], Ιολ [A], Σιβα [L], Σίβατος [Jos.]; 21 8 *ff.*, Αια [BA], Ασαια [L]). To draw a critical inference (with Mez, *Der Bibel des Jos.* 35 *f.*), from L's Σιβα in 3 7 seems unwise. We must not assume that Ziba is the original reading rather than Aiah. א and צ could very easily be confounded, and from Σια to Σιβα was but a step. The name of one of Rizpah's sons was Mephibosheth (Meribaal), and the son of Jonathan, whose steward was Ziba, was also called Mephibosheth (Meribaal). The question as to the source or sources of the passages in which RIZPAH (*q.v.*) is referred to, remains therefore where it was.

AIATH (עַיָּת), Is. 10 28†. See Ai, 1.

AIJA (עַיָּא), Neh. 11 31. See AI, 1.

AIJALON, or (Josh. 10 12 19 42; 2 Ch. 28 18†, all AV) less correctly AJALON (אַיָּלוֹן from אַיָּל 'hart'; αιλων [BAL]).

1. A town in the Shephēlah, assigned to Dan in Josh. 19 42 (αμμων [B], ιααλων [A], ελ. [L; but with ιαλων *v.* 43 for Elon]), and named as a Danite Levitical city in 21 24 [P] (ιαλων [A]) = 1 Ch. 6 69 [54] (corrected text, see Ball *ad loc.* in Ellicott's Bible; εγλαμ [B], ηλων [A]). It is the modern *Yālō*, situated on a ridge on the south side of the broad level valley of Aijalon, well known from Joshua's poetical speech (Josh. 10 12; αιλωμ [L]), and now called *Merj* (the meadow of) *Ibn 'Umar*. It is about 5 m. from Lower Beth-horon, and 14 from Jerusalem. In the time of the Judges it was still in the hands of the Amorites (Judg. 1 35; apparently misread αἱ ἄρκοι [BAL], and translated a second time μυρσινών [B], which, however, stands for HERES in L), but was afterwards occupied by Benjamites, 1 Ch. 8 13 (αιλαμ [B], αδαμ [A], αλων [L]); cp. 2 Ch. 11 10. The Chronicler states that Rehoboam fortified it (2 Ch. 11 10, αλδων [B], αιαλων [AL]), and that Ahab lost it to the Philistines (2 Ch. 28 18, αιλω [B]), on whose territory it bordered. In 1 S. 14 31, the occurrence of the word is doubtful. For 'to Aijalon' Klost. and Budde (*SBOT*) read 'until night.' 𝔊^BAL omits altogether. Some fresh references to Aijalon are derived from Egyptian sources. For instance, Shishak (Sheshonḳ I.) mentions Aiyurun—*i.e.*, Aijalon—among the conquered cities of Judah in his Karnak list, and there is an earlier mention still in the Amarna tablets, where Aialuna appears as one of the first cities wrested from the Egyptian governors. A vivid sketch of the battle-scenes of the valley of Aijalon will be found in GASm. *HG* 210-13.

2. (Judg. 12 12; Αιλωμ [B], -λ[ε]ιμ [AL]), a locality in Zebulun, the burial-place of ELON (*q.v.*, ii. 1 *f.*). Its name ought probably to be pointed אֵילוֹן (Ēlōn), and etymologically connected with אלון or אלה, 'oak' or 'terebinth' (see TEREBINTH, § 1), indicating a sacred spot. Cp ALLON, 2. T. K. C.

AIJELETH-SHAHAR, UPON, RV 'set to Aijeleth hash-Shahar (אַיֶּלֶת הַשַּׁחַר, [ὑπὲρ] τῆς ἀντιλήμψεως τῆς ἑωθινῆς [BNA]; Aq. [ὑπὲρ] τῆς ἐλάφου τῆς ὀρθρινῆς), Ps. 22, title. If we consider the tendency of the phrase, 'Upon ALAMOTH (*q.v.*),' to get corrupted, it seems highly probable that 'Aijeleth' should rather be read 'Alamoth' (א and י confounded), while Shahar should perhaps rather be שִׁיר חָדָשׁ, 'a new song.' (The article prefixed to Shahar may be in the interests of an exegetical theory.) The latter corruption has very probably taken place in Ps. 57 9 (see Che. *Ps.*(2)). A 'new song' would be a song upon a new model.

AIN (עַיִן). 1. If MT may be followed, this is the name of a city in the Negeb of Judah (Josh. 15 32) assigned to Simeon (19 7; cp 1 Ch. 4 32). According to Josh. 21 16 it was one of the priests' cities; but the parallel list in 1 Ch. 6 59 [44] probably correctly substitutes ASHAN (*q.v.*) which is mentioned in Josh. 19 7 [MT 𝔊^BAL] alongside of Ain as a distinct place. The name being thus removed from this list, Ain always appears in close conjunction with Rimmon, and Mühlau (*HWB*(2) *s.v.* 'Ain') suggests that the two places may have lain so close together that in course of time they joined. Hence he would account for the EN-RIMMON (עֵין רִמּוֹן; om. BRA; κ. εν ρεμμιον [N^c.a mg. inf.]; κ. εν ρεμμων [L]) of Neh. 11 29. But if we consider the phenomena of 𝔊 (see below), and the erroneous summation (if MT be adhered to) in Josh. 15 32, it becomes evident that Bennett's thorough revision of the readings in his Joshua (*SBOT*) is critically justified (cp ASHAN), and that the real name is EN-RIMMON [1] (*q.v.*).

How, indeed, could a place dedicated to the god Rimmōn (Rammān) have been without a sacred fountain?

Josh. **15 32**, και ερωμωθ [B], και ρεμμων [A], και αιν και ρεμμων [L]; Josh. 19 7, αιν κ. ρεμμωθ [A], αιν κ. ρεμμων [L], but ερεμμων [B]; Josh. **21 16**, ασα [B] which favours עָשָׁן 'ASHAN' (*q.v.*), αιν [A], ναειν [L], which harmonise with MT. In 1 Ch. 4 32 (κ. ρεμμων [B], κ. ην *[sic]* Ps sup. ras. [A^a?] followed by -μμων [A]; κ. ενρεμμων [L]) we should also, with Ki., read En-rimmon.

2. (לָעַיִן, the article being included; (ἐπὶ) πηγάς [BAL]; Vg. *(contra) fontem Daphnim*; Tg. Onk. as MT; for the rest see below.) A place mentioned in Nu. 34 11 to define the situation of one of the points on the ideal eastern frontier of Canaan: 'to Harbel on the east side of Ain' is the phrase. Though both AV and RV sanction this view of העין, it is more natural to render '*the* fountain,' and to find here a reference to some noted spring. Jerome thought of the spring which rose in the famous grove of Daphne, near Antioch; in this he followed the Targums of Ps. Jon. and Jerus. which render '(the) Kiblah' (הָרִבְלָה) by 'Daphne,' and 'the fountain' (הָעַיִן) by 'Ainūthā. Robinson[2] and Conder prefer the fountain which is the source of the Orontes. Both these views rest on the assumption that Riblah on the Orontes has just been referred to, which is a pure mistake (see RIBLAH). The fountain must at any rate be not too far N. of the Lake of Gennesaret which is mentioned at the end of the verse. Most probably it is the source of the Nahr Ḥāṣbāny, one of the streams which unite to form the Jordan (see RIBLAH). From this fountain to the 'east shoulder' of the Lake of Gennesaret a straight line of water runs forming the clearest of boundaries. If, however, we place Baal-gad at Bāniās, we shall then, of course, identify 'the fountain'

1 Except of course in Josh. 21 16 (see above). In Zech. 14 10† the first half of the name is omitted (see EN-RIMMON).

2 See *BR* 4534. Rob.'s view (p. 393) on the Daphnis of Vg. (connecting it with the spring at Difneh, near Tell el-Ḳāḍy) seems erroneous.

with that which springs from the famous and romantic cavern at the southern base of the Hermon mountains. It should be added that it is not impossible to alter the pointing and read לְעִיּן '(eastward) of IJON,' Ijon being mentioned elsewhere as on the N. frontier of the land of Israel. But then why did the writer introduce it merely incidentally? T. K. C.

AIRUS (ιαιρος [A]), 1 Esd. 5 31 AV = Ezra 2 47 REAIAH, 3.

AJAH (אַיָּה), Gen. 36 24† AV = RV AIAH (*q.v.*, 1).

AJALON (אַיָּלוֹן), Josh. 10 12 AV = RV AIJALON, 1.

AKAN (עֲקָן), Gen. 36 27† = 1 Ch. 1 42 AV JAKAN.

AKATAN (ακατan [BA]), 1 Esd. 8 38. RV = Ezra 8 12 HAKKATAN.

AKELDAMA (ακελδαμαχ [B]), Acts 1 19† RV, AV ACELDAMA.

AKKOS (ακβως [B]), 1 Esd. 5 38† RV = Ezra 2 61 HAKKOZ, 1.

AKKUB (עַקּוּב, 'posthumous,' but the name seems corrupt,; ακουβ [BA], ακκ. [L]). 1. b. Elioenai, six generations removed from Zerubbabel : 1 Ch. 3 24 (*ιακουν* [B], *ακκουβ* [A], *ακουν* [L]).

2. The B'ne Akkub, a group of doorkeepers in the great post-exilic list (see EZRA, ii. § 9); Ezra 2 42 (*ακουμ* [BA], *ακκ.* [L]) = Neh. 7 45 (*ακου* [B], *-υμ* [NA], *-υβ* [L]) = 1 Esd. 5 28 (DACOBI ; RV DACUBI ; *δακουβι* [A], *λακουβατου* [B]). Akkub is a porter in the list of inhabitants of Jerusalem (see EZRA, ii. § 5 [*b*], § 15 [1] *a*), 1 Ch. 9 17 (*ακουμ* [B]) = Neh. 11 19 (*ακουβ* [L]), cp Ezra 10 24, = 1 Esd. 9 25 (where, however, the name is omitted between Shallum and Telem). He is mentioned also in Neh. 12 25 (*ακουβ* ℵc.a mg. sup.] ; om. BN*A).

3. An expounder of the Law (see EZRA, ii. § 13 [*f*] ; cp i. § 8, ii. §§ 16 [5], 15 [1] *c*). Neh. 8 7 (*ακουβ* [L], om. BAN) = 1 Esd. 9 48 (EV, JACUBUS ; *ιακουβος* [A], *ιαρσουβοος* [B]).

4. The B'ne Akkuh, a family of NETHINIM (*q.v.*) in the great post-exilic list (see EZRA, ii. § 9), Ezra 2 45 (*ακαβωθ* [B]) = Neh. 7 48 (*ακουδ* [A], *-ουα* [ℵ] ; om. B with MT, EV) = 1 Esd. 5 30 (*ακουδ* [BA] ; AV ACUA ; RV AKUD).

AKRABATTINE, RV ; AV incorrectly ARABATTINE 1 Macc. 5 3†, Jos. *Ant.* xii. 8 1 ; ακραβαττηνη [ℵA] ; -αττανη [ℵc.a V] ; ACRABATTENE [Cod. Am.] ; ܥܩܪܒܬܐ, cp Judith 7 18, below), a district where Judas the Maccabee fought against the Edomites, situated 'in Idumæa' [KV Jos.] or 'in Judæa' [A]. The district intended is no doubt that to the SE. of Judæa, in Idumæa (see AKRABBIM). There is no sufficient ground for the opinion of Ewald that the Edomites had settled as far N. as another Akrabatta, a toparchy or district in Central Palestine, to the N. of Judæa (*Akrabatta*, *ακραβετα*, etc. [Jos. *BJ* iii. 3 5 ‖ Pl. *HN* v. 14 iv. 93 9] ; *ακραββειν* [Ens. *OS*(2) 214 61]), apparently represented by the modern 'Aḳrabeh, 8 m. SE. of Nāblus. (The reading *ἐν Ἰουδαίᾳ* in 1 Macc. must therefore be rejected.) See Schür. *Hist.* 1 220 n. 2, 3 158.

Doubtless, however, we should identify with 'Akrabeh the EKREBEL (*εγρεβηλ* [BK], *εκρεβηλ* [A] ; ܥܩܪܒܬܐ), near Chusi, on the brook Mochmur (Judith 7 18†), the names being almost the same in the Syr. (= Talm. עקרבת). T. K. C.

AKRABBIM, Ascent of, so always in RV; also Nu. 34 4 in AV, which has in Judg. 1 36 'going up to Akrabbim,' in Josh. 15 3† ing. '. . . to ACRABBIM,' text MAALEH-ACRABBIM (מַעֲלֵה עַקְרַבִּים, *i.e.*, 'ascent of Scorpions,' [προς]αναβασις[2] ακραβειν [BAL] ; *ascensus scorpionum*), mentioned in Josh. 15 3 (ακραββειμ [sup. ras. A? vid.], εκραβειν [L]) as one of the localities marking the southern frontier of Judah.

It must have been one of the passes leading **up** from the southern continuation of the Ghōr into the waste mountain country to the west. Knobel identifies it with the pass of eṣ-Ṣafā, leading up towards Hebron out of the W. el-Fikreh on the road from Petra. Robinson (*BR*(2) 2 180 *f.*) describes this pass as being 'as steep as a man can readily climb.' 'The rock is in general porous and rough, but yet in many spots smooth and dangerous for animals. In such places a path has been hewn in the rock in former days; the slant of the rock being sometimes levelled, and sometimes overcome by steps cut in it. The vestiges of this road are more frequent near the top. The appearance is that of a very ancient pass' (*BR*(2) 2 291). Robinson, however, identifies this Nakb eṣ-Ṣafā with Zephath or Hormah, and not with Akrabbim (see also HALAK, MOUNT). Scorpions are of frequent occurrence throughout this neighbourhood.

1 Cp BAKBUK.

2 *επανω* for *a m της αναβασεως* in Judg. 1 36 [AL ; Lag. points *ἐπ' ἄνω*].

AKUD (ακουδ [B]), 1 Esd. 5 30 RV = Ezra 2 45 AKKUB, 4.

ALABASTER (αλαβαστρον [accus. Ti WH] Mk. 14 3, also with art., την α. [W & H after Bℵc], τον α. [Ti. after ℵ*A], το α. [TR after G, etc. ; also F in Lk. 7 37] ; cp ο aha. [B], το αλα. [A] 2 K. 21 13 [for צלחת 'dish,' 'cup']) was found in large quantities in Mesopotamia, and from it are made the huge bulls which are to be seen in the British Museum and in the Louvre. The alabaster of the ancients was a stalagmitic *carbonate* of lime hence called by mineralogists 'Oriental alabaster' to distinguish it from the modern alabaster, which is the *sulphate* of lime. See *EB*(9), *s.v.* ALABASTER. In Greek the word *ἀλάβαστος* or *ἀλάβαστρος* is frequently used of vases or vessels made to hold unguents, as these were generally fashioned out of this material, which was thought by many (cp *e.g.*, Pl. *HN* xiii. 3) to preserve the aroma of the ointment : Theocritus (*Id.* 15 114) is able to speak of 'golden alabasters.' Many alabaster vases have been found in Egypt, and the specialised sense given to צלחת in the Egyptian Greek version of Kings (see above) is natural enough. The town of Alabastron, near the famous quarries of Ḥat-nub[1] (cp Erman, *Anc. Eg.* 470, n. 3), was well known for the manufacture of such articles (in fact it seems to have derived its name from the material).[2] Many of these go back to nearly 4000 B.C. and often show fine workmanship. Similar articles have been found in Assyria dating from the time of Sargon (8th cent. B.C.).

Such a vessel was the 'alabaster cruse' which was emptied upon Jesus's head by the woman at the house of Simon the Leper at Bethany (Mt. 26 7 = Mk. 14 3 Lk. 7 37†). The expression 'brake' in Mark does not refer, it would seem; to the breaking of a seal or of the neck of the vessel; the object was to prevent profanation of the vessel by subsequent use for any commoner purpose (cp *Comm.*, *ad loc.*).

ALAMETH (עָלֶמֶת), 1 Ch. 7 8 AV, RV ALEMETH.

ALAMMELECH, RV ALLAMMELECH (אַלַּמֶּלֶךְ [Bä.], אַלְ' [Gi.], אַלַּמֶּלֶךְ [v.d. Hooght] ; *ελειμελεκ* [B], *ελμελεχ* [L ; om. A]), a place in Asher on the border of Zebulun (Josh. 19 26†), the name of which is possibly echoed in that of the *Wādy el-melek*, which drains the plain of the Buṭṭauf (Asochis), and joins the Nahr el-Muḳaṭṭa' (Kishon). So Di., Buhl. The pointing of the Heb. is peculiar: אַלַּמֶּלֶךְ is usually explained as if אַלַּת מֶלֶךְ, 'sacred tree of Melech' ; but ת can hardly have been assimilated to מ, nor is this the best reading. Possibly the real name was אֵל מֶלֶךְ (אֵיל), El Melech; cp El Paran. The authors of the points may have wished to avoid confusion with the personal name Elimelech. Or the name might be a corruption of ēlammāk (see ALMUG TREES), if Solomon was able to naturalise this tree. T. K. C.

1 Near Tell el-'Amārna (see *PSBA* 16 74 ['94]).

2 The reverse supposition is sometimes held, viz. that the material is derived from the place-name. The ultimate origin of the word is unknown.

ALAMOTH, UPON (עַל־עֲלָמוֹת), a technical musical phrase of uncertain meaning; cp MUSIC, § 6.

(a) Ps. 46 title [1] (ὑπὲρ τῶν κρυφίων [BℵRT]=עַל־עֲלָמוֹת; om. A; Aq. ἐπὶ νεανιοτήτων=עַל־עֲלָמִיּוֹת; Symm. ὑπὲρ τῶν αἰωνίων); *(b)* 1 Ch. 15 20 (ἐπὶ αλαιμωθ [B], ..αλεμ. [ℵ], ..αλημ. [A], περὶ τῶν κρυφίων [L]; two anonymous Gk. versions have ἐπὶ τῶν ἀναβαθμῶν [מַעֲלוֹת] and ἐπὶ τῶν αἰωνίων [עלמות]). In two other passages, *(c)* Ps. 9 title [1] (ὑπὲρ τ. κρ. [BℵAR]; Aq. νεανιότητος, Symm. περὶ τοῦ θανάτου=עַלִימוּת, Th., Quint. ὑπὲρ ἀκμῆς, Sext. νεανικότης); *(d)* in Ps. 48 14 [15] (εἰς τοὺς αἰῶνας [NART], *i.e.*, apparently עֹלָמוֹת [B]; om. Aq. ἀθανασία, Symm. εἰς τὸ διηνεκές) it appeals in the corrupt form עַל־מוּת, which Tg. takes to be עֲלָמוּת 'youth' (?).

Thus we find it three times forming part of a heading of a psalm (for עַל־מוּת in *d* should be restored as עַל־עֲלָמוֹת from its present position to the heading of Ps. 49, on the analogy of Ps. 46). Of the two half-translations of AV and RV respectively ('upon Alamoth,' 'set to Alamoth'), the former presupposes that the phrase denotes the particular instrumental accompaniment; the latter, that Alamoth is the name of a tune. Most moderns explain 'for sopranos,' 'ălāmōth having the constant meaning 'maidens.' Whether soprano voices would be suitable for Ps. 46, the musical reader may judge. Gratz and Wellhausen snppose a reference to some *Elamite* instrument. There is, however, a more probable solution. See PSALMS, and cp MUTH-LABBEN, MAHALATH, NEHILOTH, and AIJELETH-SHAHAR.

ALCIMUS (ἄλκιμος [AK], occasional forms -ιν. -ειμ. -χι. [A], -ισμ. *[K]*; in several cursive MSS of 1 and 2 Macc. and in Jos. *Ant.* xii. 97 with add. [και or ο κ.] ι[ω]ακ[ε]ιμος; in *Ant.* xx. 10 3, and one cursive at 1 Macc. 7 9 simply ι[ω]ακ[ε]ιμος; *i.e.*, יקים = Eliakim or Jehoialtim, for which he adopted the like-sounding Greek name by which he is known; cp NAMES, § 86), a priest 'of the race of Aaron'[1] (*Ant.* xx. 10 3, admitted by the inimical[2] writer of 1 Macc.; 'of the seed of Aaron,'[3] 7 14), *i.e.*, a Zadokite, though not of the family of Onias ('not of this house,'[4] *Ant.* xx 10 3).

Ant. xii. 97, indeed equates 'another house' (ἕτερον οἶκον) with 'not of the stock of the high priests [at all]' (οὐκ ὄντι τῆς τῶν ἀρχιερέων γενεᾶς); hut the source here followed by Jos. is on other grounds apparently inferior, and we may conclude that Alcimus was really more eligible[5] to the high priest's office than his enemies the house of Hasmon, who were ordinary priests.

When, therefore, the victorious king of Syria, DEMETRIUS I. (*q.v.*, 1) determined (1 Macc. 7 9) to support his claim to the high priest's office (*v.* 5) with force, Alcimus was accepted, not only by the Hellenising party but also (*v.* 13) largely by the legitimist party, the Assideans (*q.v.*).

The treaty (1 Macc. 659) of Lysias (and the youthful Antiochus V. Eupator) in 162 B.C., which satisfied the aims of the Assideans and made it unnecessary for them further to identify themselves with the 'friends of Judas' (1 Macc. 9 26; cp 28), had heen immediately followed, if we may trust *Ant.* xii. 9 7, by the execution of the now 'impossible' high priest MENELAUS (*q.v.*) (1 Macc., our most important source, not having mentioned Menelaus at all, says nothing of what took place between his tenure of office and the effective appointment [ἔστησαν αὐτῷ τ. ἱερωσύνην, 7 9; cp 2 Macc. 14 73 καταστῆσαι] of Alcimus by Demetrius). According to the same passage in Jos., which states also that a young Onias, son of Onias III., made his way to Egypt on the death of his father (on which, however, see ONIAS; ISRAEL, § 69), Alcimus became (ἐγένετο) high priest on (μετά) the death of Menelans, the office being indeed bestowed (δέδωκεν) on him by the king (Antiochus V. according to the present context). According to 2 Macc. 14 3, too, Alcimns had heen at some time high priest before his appointment by Demetrius. We know really nothing certain about the events of this short interval. We first reach firm ground with the intervention of Demetrius.

Demetrius did not mean to resume the hopeless policy of his uncle Epiphanes (or the Assideans would have held aloof); but he wanted Alcimns and his friends to help him in crippling the Hasmonean party of political independence.

There would be a special reason for Alcimus being active against the Hasmoneans if he was shrewd enough to foresee (what we now know) that their ultimate goal must be the high priesthood. (On the other hand the 'calumny' [*v.* 27] put into his mouth by the author of 2 Macc. [14 26] that Judas had already been made high priest seems historically impossible; it belongs to the distorted story of 2 Macc., see next note.)

Bacchides (*q.v.*) was the agent selected for the task.[1] At first the presence of Alcimus was a great help; his legitimacy was a sonrce of strength.

This would have special weight if his predecessor Menelaus is really to he regarded, with 2 Macc. (3 4 + 4 29) as a 'Benjamite,' and with Wellhausen (*IJG* 200, n. 1, 2nd ed. 235, n. 1) as one of the Tobiadæ (see, however, Lucius, *Der Essenismus* 77, and cp ISRAEL § 69). If we could trust the Talmud there would be a special point in his favour in his connection with Jose b. Joezer, leader of the Sanhedrin (his uncle, *Ber. Rabba*, ch. 65; his father, *Bab. Bathra*, 133 *a*).

The mass of the people seem to have followed the Assideans in accepting Alcimus (1 Macc. 7 13 'first'; cp We. *Phar. u. Sad.* 84, n. 2); but the severity of the measures taken by the representatives of Demetrius,[2] sixty men (perhaps those that had been till now much implicated with the Hasmonean party)[3] being slain in one day (1 Macc. 7 16), in face of solemn pledges of peaceable intentions, entirely changed the situation. Fear and dread fell on all the people (1 Macc. 7 18). After some further severities Bacchides considered his task accomplished and returned to Antioch. The late severities, however, had turned the heart of the people again to Judas, who was trying to strengthen his position (1 Macc. 7 24), and Alcimus judged it prudent to withdraw (25). He had of course no difficulty in bringing further incriminating charges against Judas (*ibid.* and *Ant.* xii. 10 3). This time NICANOR (*q.v.*) was entrusted with the task of restoring Alcimus. During the various exciting incidents of the next interval,—the diplomacy, battles, and death of Nicanor,—we hear nothing of Alcimus[4] (1 Macc. 7 26-50).

Of course in the rejoicings over Nicanor's day and the recovery of the Maccabean party he had no part; perhaps he was absent. (It is at this point, indeed, that *Ant.* xii. 10 6 makes Alcimus die[5] hut this belongs to the story there followed of Judas's succeeding to the high-priesthood, on which see MACCABEES, i. § 4 and cp below.)

When Bacchides came a second time (1 Macc. 9 1) to carry through what Nicanor had been unable to accomplish, Judas failed to find adequate support and fell (160 B.C.), and the Maccabean party were without a leader. Alcimus was once more installed, and probably accepted by all except the Maccabeans, who ere long chose Jonathan as successor to his brother.

How far the Hellenistic tendencies of Alcimns carried him we do not know. At his death (159 B.C.[6]) he seems to have been engaged on some changes in the temple enclosure, the nature and even the object of which we do not know with any certainty.

According to Josephus he had 'formed the intention of pulling down the wall of the temple' (βουληθέντι καθελεῖν τὸ τεῖχος τοῦ ἁγίου, *Ant.* xii. 10 6 beg.). 1 Macc. states (9 54) that it was the wall of the inner court of the temple (τὸ. τ. τῆς αὐλῆς τῶν ἁγίων τῆς ἐσωτέρας) that he commanded (ἐπέταξεν) to pull down, adds that he pulled down the works (τὰ ἔργα) of the prophets, and then appends the peculiar statement that he began the pulling

1 γένους μὲν τοῦ Ἀαρῶνος.
2 See 1 Macc. 7 9.
3 ἐκ τοῦ σπέρματος Ἀαρών.
4 τῆς οἰκίας ταύτης.
5 Although we cannot of course trust 2 Macc. 14 7, 'mine ancestral glory' (τὴν προγονικὴν δόξαν). According to 2 Macc. Alcimus's fault was his *voluntary* Hellenising (ἑκουσίως, 14 3; contrast 'by compulsion,' κατὰ ἀνάγκην, 15 2). Cp Kosters, *Th.T* 12 538 ['78].

1 So 1 Macc. 7 8; on the distorted account in 2 Macc., where 14 12 has to do dbty for both 1 Macc. 7 8 and 7 26, see Kosters, *Th.T* 12 533 535, and on the displacement of Bacchides to 2 Macc. 8 30, *ib.* 504 *f.* (cp the place of Bacchides in Jos. *BJ* i. 1 2).
2 How far these transactions are to be attributed directly to Alcimus (so apparently 1 Macc. 7 14 *ff.* 23), and how far they were due to Bacchides (so apparently *Ant.* xii. 10 2; cp 1 Macc. 7 19) we cannot say.
3 His uncle being according to *Ber. Rabba* and *Baba Bathra* (*ll.cc.*), of the numhbr.
4 On the motive of the author of 2 Macc. in representing Nicanor as untrue to his master (2 Macc. 14 28-35) and thus bringing Alcimus again on the scene (*v.* 26) see Kosters, p. 535.
5 'And when he was dead the people bestowed the high priesthood on Judas, who, hearing of the power of the Romans, etc. (= 1 Macc. 8).
6 Josephus assigns him variously three years (*Ant.* xx. 10 3) or four years (*ib.* xii. 10 6) of office.

down. It seems rash to assume that this confused account is in its original form. If the last clause is not an interpolation (and there is cursive MS authority for its omission, see H & P), and even perhaps if it *is*, should we not perhaps read 'to pull' for 'he pulled' (καθελειν for καθειλεν)?

The much discussed question what the wall (τεῖχος) referred to was, we have really not the means of determining. Its identification with a low harrier in the Herodian temple beyond which Gentiles must not pass the *sōreg* (סורג) described in *Middoth* 2 3 is at the best precarious[1] (*see* the remarks of Schiirer, *GJV* **1** **176**, n. **5** and the discussions there referred to).

The somewhat sudden death of Alcimus (1 Macc. 9 55 *f.*; cp however, *Ant.* xii. 106, συχνὰς ἡμέρας) was naturally treated by his enemies as a sign of divine displeasure. The moderation (such as it is) of the writer of 1 Macc. was not at all to the taste of the later rabbis (see the stories in Hamburger, ***RE*** 428 *f.*, Derenbourg, *Hist. Pal.* 52, n. 2). That on the whole, however, Alcimus did not interfere much with ritual and practice is plain, or at least probable, from this last act being all that is mentioned against him, and even in this case we do not know his motive (cp Grirnm ad *loc.*, and We. 216, *IJG*(3) 262). Still, if he has been rather severely judged, even for the evidence supplied by the opposite party, Wellhausen (*l.c.*) seems to go to the other extreme.

The historical importance of this, perhaps in himself somewhat insignificant character (who figures all the more strikingly on the scene that we cannot find very clear traces of any immediate predecessor or successor[2]), lies in the fact that his tenure of office formed a turning-point in the development of Jewish parties.[3] The Assideans refused to follow the Hasmoneans. Two generations later, the meaning of this became more apparent (see ASSIDEANS, PHARISEES, ESSENES).

The primary source is 1 Macc. 7-9. Cp Jos. *Ant.* xii. 9 7-11 2, xx. 10 3, and on the relation of these *see* MACCABEES, FIRST, i. § 9; on the relative value of 2 Macc. 14 *see* the elaborate article of Kosters, 'De polemiek van het tweede hoek der Makkabeën,' *Th. ALCOVE (קֻבָּה), Nu. 25 8† RV mg., AV TENT (*q.v.*).

ALEMA (EN ΑΛΑΜΟΙϹ [A], -ΛΕΜ. [ℵ*], -Λ[Ε]ΙΜ. ℵc.a c.b (vid.) V], Syr. ܐܠܝܡ, *in Alimis*), a place mentioned along with Bosora, Carnaim, etc. (1 Macc. 5 26). Being in Gilead it cannot be, as some say, the Beer-elim spoken of in Is. 15 8 as belonging to Moah, and the Beer of Nu. 21 16 (see BOSOR). It has been placed by Merrill at Alma, S. of Edrei, and by Schumacher at Kefr el-MB, E. of Lake of Galilee; hut it is probably *'Ilmā*, 10 m. SW. of the Lejā, and of Buṣr el-Hariri, which is probably Bosor. (Cp Buhl *Topog.* **des** *N. Ostjordanlandes* 13; We. *IJG* 212 [3rd ed. 257] n.) G. A. S.

ALEMETH or **ALLEMETH** (עָלֶמֶת; so everywhere [Bä Gi], except 1 Ch. 7 8 'in pause' עָלָמֶת, ALAMETH, ΓΕΜΕΕΘ [B], ΕΛΜΕΘΕΜ [A]; ordinary edd. have עַלֶּמֶת, whence RV ALLEMETH in 1 Ch. 6 60 [45] = Josh. 21 18, where the form is ALMON, עַלְמוֹן, ΓΑΜΑΛΑ [B], ΑΛΜΩΝ [A], ΕΛΜ. [L]; usually ΓΑΛΕΜΕΘ [BA], ΑΛΑΜΩΘ [L]), a Levitical town in Benjamin (1 Ch. 6 60 [45], ΓΑΛΗΜΕΘ [A]), the name of which appears in 1 Ch. 8 36 (ΣΑΛΑΙΜΑΘ [B], ΓΑΛΕΜ. [A], ΑΛΕΦ [L]) = 9 42† (ΓΑΜΕΛΕΘ [B], ΑΛΕΦ [L]) as that of a descendant, or family of BENJAMIN (§ 9, ii. β). See also ZALMON, ii. (end), ELAM, ii. 1. Robinson's identification (*LBR*) with the modern *'Almīt*, 1 m. NE. from *'Anāta* (Anathoth), is generally accepted.

ALEXANDER (ΑΛΕΞΑΝΔΡΟϹ [AKV], 'helper of men'). 1. Alexander III., king of Macedon (336-323 B.C.), surnamed the Great. The victories of Alexander powerfully impressed the Jewish imagination; yet the only biblical passages in which he is mentioned by name are 1 Macc. 1 1-8 **6** 2. The writer of Daniel (166 or 164 B.C.) recalls a 'mighty king' ruling 'with great dominion,' whose kingdom is 'broken' after his death (Dan. 11 3 *f.*). In the vision of chap. 7, it is the fourth of a series of 'beasts'; it is 'dreadful and terrible,' and 'devoured and brake in pieces, and stamped' the rest. Naturally, it was the destructive side of Alexander's work that impressed the imagination; the fall of Tyre and Gaza would bring that aspect into prominence. His Palestinian conquests are thought to be alluded to in Zech. 9 1-8 (see ZECHARIAH, BOOK OF); and in Is. 25 *f.*, the fate of Tyre may be contrasted tacitly with that of Jerusalem (see ISAIAH, ii. § 13). It is during the seven months' siege of Tyre that Jewish history comes into connection with Alexander (333-332 B.C.). The tradition is given by Jos. ***Ant.*** xi. 8 3 *ff.* (cp *Yoma*, 69*a*).

The Jews refused compliance with Alexander's requisitions. After the two months' siege of Gaza he advanced on Jerusalem; hut Jaddua (Jaddus), the high priest (cp Neh. **12** 11 22), warned by a dream how to avert his anger, met the conqueror at Scopus. Alexander worshipped the Name on the high priest's mitre, and entering Jerusalem sacrificed in the Temple, heard Daniel's prophecies relating to himself, and gave the Jews autonomy, not only in Jerusalem but also in Babylon.

As to all this other writers preserve absolute silence, and the story in Josephus seems inconsistent with the statement in Arr. iii. 1, that in seven days from Gaza Alexander was at Pelusium in Egypt. Yet Just. xi. 10 says that 'many kings wearing fillets met him'; and Curt. iv. 517, that he visited some who refused to submit. Jewish soldiers were certainly in his armies, even on his most distant expeditions; and in Alexandria, founded immediately after the supposed visit, the Jewish element was large. The privileges conferred on the Jews are *a* feature of subsequent history. It is possible that Alexander derived from the Jews much valuable information about the interior of Asia (Mahaffy, ***Greek*** *Life*, chap. 20). Whether true or false, the episode strikes a true note in Alexander's character. Nevertheless, it raises suspicion to find the story appropriated by the Samaritans. Still more, to remember the visit to Gordium before the battle of Issus, and that to the oracle of Ammon before the Persian expedition. Finally, the king's action at Babylon is a curious parallel (Arr. iii. 16). He there rebuilt the shrines destroyed by Xerxes, especially that of Belus—τά τε ἄλλα καὶ τῷ Βήλῳ καθὰ ἐκεῖνοι ἐξηγοῦντο ἔθυσεν.

The Jerusalem episode must be characterised as an attempt to secure Jerusalem a place in the cycle of Alexander-legends, on the model of the visit to the Egyptian Ammon. (Cp H. Bois, *Rev.* ***de*** *théo. et phil.*, Lausanne, **1891**; Henrichsen, *St. Kr.*, 1871). W. J. W.

2. Alexander Balas, a man of low origin, who passed himself off as the son of Alexander Epiphanes (cp 1 Macc. **10** 1, 'A. ὁ τοῦ 'Αντιόχου 6 'Επιφανής [AKV], see MACCABEES, FIRST BOOK OF, § 2); 'Αλέξανδος [A] in *v.* **58**. His real name was Balas (so Strabo [p. 751], τὸν Bdhav 'Αλέξανδρον; Jos. [*Ant.* xiii. 4 8], on the other hand, 'A. 6 Βάλας λεγόμενος), which may possibly be connected with בעלא, 'Lord.' The additional name 'Alexander' seems to have been given him by Attalus II. of Pergamum, who was one of the first to support him against DEMETRIUS. In rivalry with the latter Balas exerted himself to secure an alliance with JONATHAN (1 Macc. 10 1 *ff.*), and by conferring upon him the title of 'high priest of the nation and friend of 'the king,' was successful (*a* 20). After a varying career he was compelled to flee to Arabia,

[1] The seventeenth of the thirty-five festivals prescribed in *Megillath Taanith*—viz. on 23rd Marchesvan—has by some, *e.g.*, Gratz, been brought into connection with the *sōreg* and Alcimus. This is however contested, *e.g.*, by Derenbourg, *Hist.* ***Pal.*** 60 *f.* (see text of *Meg.* Taan., *ib.* 442 *ff.*).

[2] Josephus, ignoring his previous irreconcilable statement in xii. **106**, already quoted above, expressly says (*Ant.* **xx.** 10) that on the death of Alcimus the office of high priest was vacant for seven years.

[3] Cp We. *Phar. u.* ***Sad.*** § **v.**; Lucius ***Der*** *Essenismus*, etc. 75 *ff.* ['81], with Schiirer's review (*TLZ* ['81], especially col. **494**).

where he was killed at Abæ after a reign of five years, 150-145 B.C. (1 Macc. 11 13-18). For classical references see *Dict. Class. Biog.*, *s.v.*; Schürer, *GJV* 1 178, n. 10; and for the history of the time see ISRAEL, § 76, MACCABEES, i. § 5.

3. Son of Simon of Cyrene, mentioned together with his brother, RUFUS [*q.v.*] (Mk. 15 21).

4. A member of the family of the high priest in Acts 4 6 probably to be identified with the third son of Annas, called Eleasar by Josephus (*Ant.* xviii. 2 2). See ANNAS.

5. Of Ephesus, a Jew, who was 'brought forth' (προεβίβασαν [Text. Rec.]) from the multitude, or 'brought down' (κατεβ. [D, etc.]) or (more probably) 'instructed' (συνεβ. [BℵA], cp RV mg.) by the Jews, and unsuccessfully attempted their defence in the theatre on the occasion of the tumult excited by Demetrius the silversmith (Acts 19 33). There is no conclusive reason either for or against identifying him with :

6. The coppersmith (ὁ χαλκεύς), who is described (2 Tim. 4 14) as having done Paul 'much evil' (at his trial?).

7. Mentioned with HYMENÆUS (*q.v.*) as having 'made shipwreck concerning the faith' (1 Tim. 1 19 *f.*), and as having been, in consequence, delivered by the apostle unto Satan. Whether or not he is to be identified with no. 6 above, we cannot tell. In some texts of the Apocryphal *Acts of Paul and Thecla*, he appears with Demas and Hermogenes as a hypocritical companion of Paul; in others it is 'Alexander the Syriarch' who is mentioned. See Lipsius, *Apokr. Ap. Gesch.* ii. 1 462 466.

ALEXANDRIA (αλεξανδρ[ε]ια [VA], 3 Macc. 3 1; gentilic αλεξανδρεγς [BℵA], Acts 6 9 18 24†). The site of the city was chosen by Alexander the Great during his passage from Memphis down the Canobic (Canopic), or most westerly, branch of the Nile, on his way to the Oracle of Ammon (331 B.C.).

1. The city.

Holm remarks that it was a novelty to call a city after its founder, this particular form of name having previously been made only from names of deities (*e.g.*, Apollonia); it indicates Alexander's desire for divine honours, a claim supported by the priests of Ammon (Holm, *Gk. Hist.* 3 384 ET). The city was laid out by Deinocrates under the king's supervision, 12 m. W. of the Nile, and thus its harbours were not choked by the Nile mud, which is carried east by the current.

It lay on the neck of land, 2 m. broad, interposed between the Mareotis lagoon and the sea. A mile distant, parallel with the coast, lay the island of Pharos, connected with the city by a dam (which served also as an aqueduct to supply the island), seven stades in length (hence called the Heptastadium), pierced with two openings. Two harbours were thus created, both protected by projections from the mainland.

The western harbour was called that of Eunostus, after a king of Soli, son-in-law of Ptolemy I. (but see Mahaffy, *Greek Life* 163 for another suggestion). The eastern harbour was then the more important, although it is not so to-day. Its entrance was marked by the huge lighthouse (built on the island by the Cnidian Sostratus) which gave its name (*pharos*) to all similar structures. Opposite to it ran out the point of Lochias.

Bordering on the great (eastern) harbour was the palace-quarter (Brucheium), the abode of the Macedonians. The western division of the city, occupied previously by the village Rhacōtis, continued to be the Egyptian quarter. The Jewish colony was in the east of the city.

Lake Mareotis was connected with the sea by a canal, and as it communicated also with the Nile, the periodical flood prevented the accumulation of silt and the formation of morass. To this, and to the constant Etesian winds, Strabo traces the salubrity of the site (p. 793). The lake was the haven for the products of upper Egypt coming directly from Syēnè, as well as for those of India and the East, brought by way of Arsinoè on the Red Sea and the royal canal to the Nile, or through Berenicè or Myos Hormos, lower down the coast. Hence the commerce of the lake was more valuable than that of the outer ports, whose exports largely exceeded their imports (Str., p. 793). Alexandria became the great port of transshipment for eastern commodities, while Egypt, under the Ptolemies, also took the place of the Black Sea coast as a grain-producing country. Most of her grain went to Italy (cp Acts 27 6 28 11; Jos. *BJ* vii. 21; Suet. *Tit.* 5). Near Ostia was a sanctuary modelled on the Alexandrian temple of Sarāpis, with a mariners' guild (*CIL* 14 47). Even under the Lagids Alexandria contained a large colony of Italians engaged in the trade with the West (cp *Eph. Epigr.* 1 600 602). For the importance of Egypt to Rome see Momms. *Prov. of Rom. Emp.* 2 252 ET.

Alexandria was not organised as a πόλις—*i.e.*, it possessed neither deliberative assembly nor senate (βουλή),—but from the first was merely a 'royal residence of the satrap king, never a foundation of Græco-Macedonians with city privileges in a foreign land' (Mahaffy, *Emp. of Ptol.* 76). The burgess body was Greek (primarily Macedonian),—standing alongside of the native Egyptian and the foreign elements not reckoned Hellenic, in somewhat the same way as the English in India alongside of the natives (Momm. *Prov. of Rom. Emp.* 2 262 ET). Chief among the non-Hellenes were the Jews, occupying two out of the five wards, apparently here not on the Ghetto system, but on the basis of original settlement; they were naturally attracted by the commercial advantages of the city, and were also deliberately settled there by the founder (Jos. c. *Ap.* 2 4, *BJ* ii. 18 7). Josephus asserts that the Alexandrian Jews had equal rights with the Macedonians and other Greeks. This, though technically an exaggeration, was probably practically true, seeing that such rights can only have been privileges enjoyed by the Greeks over the natives: but it is doubtful whether the Jews were free from the poll-tax. Of all the non-Hellenes, the Jews alone were allowed to form a community within that of the city, with a certain amount of self-government. 'The Jews,' says Strabo (quoted by Jos. *Ant.* xiv. 7 2), 'have in Alexandria a national head of their own (ἐθνάρχης), who presides over the people and decides processes and disposes of contracts as if he ruled an independent community' (ὡς ἂν πολιτείας ἄρχων αὐτοτελοῦς). Josephus traces their legal position to Alexander; but it was apparently Ptolemy I. who settled them in Egypt in large numbers (Jos. *Ant.* xii. 1; App. *Syr.* 50). The general result was that 'in acknowledged independence, in repute, culture, and wealth, the body of Alexandrian Jews was, even before the destruction of Jerusalem, the first in the world' (Momm. *op. cit.* 2 267 ET). Cp DISPERSION, §§ 7, 15 *ff.*

2. Its constitution.

Of the development of the city, and especially of the foundation of the institutions which gave it its place in the history of literature and science, little is known. The famous Museum was probably founded by Ptolemy I., aided by the advice of Demetrius of Phalērum, who migrated to Egypt on his expulsion from Athens (307 B.C.).

3. Letters.

The name (Μουσεῖον) points to an Attic origin. No detailed description can here be given. Besides, the materials are very scanty. It was a royal foundation, with a common hall, porticoes, and gardens, for the exclusive use of literary and scientific workers dependent on royal bounty, under the presidency of a priest who was the king's nominee: it was the 'first example of a permanent institution for the cultivation of pure science founded by a government' (Holm, *op. cit.* 4 317 ET). It was not a teaching establishment or training-place for youth, but a home of research adequately endowed. Attached to it was the Library, with more than 500,000 volumes (Jos. *Ant.* xii. 2 1).

The Museum and the Library combined were essentially a centre of learning, not of creative power. In their artificial atmosphere exact science and literary criticism flourished with brilliant results; but literature decayed—perhaps the uninspiring environment of the city had no slight effect upon its art and poetry (Mahaffy, *Greek Life* 165).

The Museum served as a model for subsequent foundations—*e.g.*, that of the emperor Claudius;—both Jews and Christians at a later time had similar centres of learning in the city. The fate of the library is uncertain; it is doubtful whether it was accidentally burnt along with the arsenal in 48 B.C. (Cæs. *BC* 3 111). The words of Dio, 42 38—ὥστε ἄλλα τε καὶ τὸ νεώριον, τάς τε ἀποθήκας καὶ τοῦ σίτου καὶ τῶν βίβλων,—πλείστων δὴ καὶ ἀρίστων, ὥς φασι, γενομένων,—καυθῆναι,—perhaps refer only to stores of books for sale (Mahaffy, *Emp. of Ptol.* 454).

Ptolemy II. established a supplementary library in the Sarapieion, in the quarter Rhacōtis. In science,

especially, Alexandria maintained a sort of primacy throughout the imperial period, and residence in the Museum was the hall-mark of learning (cp Acts 18 24, and a φιλόσοφος ἀπὸ Μουσείου, in Halicarnassus, *Bull. de Corr. Hell.* 4 405. Alexandrian physicians, in particular, were regarded as the best in the empire; cp οἱ ἐν Ἐφέσῳ ἀπὸ τοῦ Μουσείου ἰατροί [Wood, *Ephesus*, Appendix, Inscriptions from Tombs, etc., 7, *l.* 6]).

In Roman times Alexandria was the second city in the empire, and the first commercial citv in the world (Strabo, p. 798; μέγιστον ἐμπόριον τῆς οἰκουμένης). At the end of the Ptolemaic period she numbered upwards of 300,000 free inhabitants, and in imperial times still more (Diod. 17 52). Mommsen (*op. cit.* 2 262 ET) develops the comparison between her and Antioch—both 'monarchical creations out of nothing' (Paus. viii. 333).

4. Character.

The latter excelled in beauty of site and in the magnificence of her imperial buildings; the former in her suitability for world-trade. In the character of their population and their attitude towards their respective national religions, the similarity between the two cities is close. The Alexandrian mob, like that of Antioch, was capricious and turbulent; the smallest spark kindled a conflagration to he quenched only with blood (Diod. 184, Dio 39 57).

Polybius (34 14) says that a personal visit to the city filled him with disgust at the demoralisation produced by the constant presence of masses of mercenaries necessary for keeping under control the mongrel mob the degenerate descendants of the Greeks; compared with these two, the native Egyptian element struck him as 'aciiteandeducated.' Cæsar draws a similar picture (*BC* 3 110). A vivid illustration is found in the bloody scenes which heralded the accession of Ptolemy V. (Pol. 15 30-33). A point of similarity with the Antiochians was the fondness of the Alexandrians *for* giving nicknames (cp Paus. v. 21 12: καί πως καὶ ἐπιχώριον τὸ ἐς τὰς ἐπικλήσεις τοῖς Ἀλεξανδρεῦσίν ἐστιν. Id. i. 9 1; Sen. *ad Helv.* 196: 'Loquax et in contumelias præfectorum ingeniosa provincia . . . etiam periculosi sales placent'). The Ptolemies had each a nickname, and even Vespasian, for his tax on salt fish, was called the 'sardine-dealer' (Suet. *Vesp.* 19: Κυβιοσάκτης). As regards the status of the highly composite population, the Roman emperors mostly retained the old state of things. The Alexandrians continued to stand quite apart from the rest of the country in character and in privileges (cp Philo, *in Flacc.* 10; *CIG* 4957), so much so that the Alexandria-franchise was a necessary preliminary to the acquirement of Roman citizenship (Pliny, *Ep. ad Tr.* 6 [22]: 'Admonitus sum a peritioribus debuisse me ante ei Alexandrinam civitatem inpetrare, deinde Romanam, quoniam esset Ægyptius.'—Jos. *c. Ap.* 24). The Egyptians of the Nomes were unable to gain Roman citizenship, like other provincials, by enlistment in the legions.

The greatness of Alexandria has led some to speak of its founder as though he were endowed with more than human foreknowledge, and had foreseen the future of the city as a centre of Hellenism and queen of the Levant. Others regard the city as merely a Greek emporium, a second and more successful Naucrătis, owing to accident its rise to the position of a cosmopolitan capital.

5. Its success.

Nevertheless, it must have been evident to Alexander that, after the destruction of Tyre, 'the great trading area of the Levant was for the moment without focus' (Hogarth, *Philip and Alex.* 188), and the site actually selected was the only one possible on the Egyptian coast (though Mahaffy, *Emp. of Ptol.* 12, calls this in question). Egypt further, offered peculiar facilities for that amalgamation of Greeks and Macedonians which he desired, and, owing to its support of his secret belief in his divinity, it had a special place in his affections. The success of Naucrătis undoubtedly exerted an influence in the way of directing attention to the W. of the Delta; and it is not without reason that Cleomenes, a native of Naucrătis, created financial governor of Egypt, is called one of the architects of Alexandria (Justin 13 4). Nor should we fail to account of the fact that the island of Pharos was the traditional landing-place of Odysseus (Hom. *Od.* 4 355). This influence is distinctly asserted in the story of the dream which directed the king to the site opposite Pharos (Plut. *Alex.* 26).

In fine, considering Alexander's economic designs and achievements in the far East, and the success of his eastern colonies, we cannot venture to deny that he consciously created a centre for a new mixed race, with a definite dream of the possibilities afterwards realised.

Much has been hoped from systematic exploration.

6. Sites not recoverable.

The modern town stands mainly on the silt gathered on either side of the Heptastadium, which has thus converted the island of Pharos into a peninsula. All the great monuments of the Ptolemaic age seem to have stood within the present inhabited area, or on ground now absorbed by the sea; but the site of no ancient building is known, except that of the Cæsareum, which was near the sea. The Sema or Soma, in which Alexander's body was deposited, may perhaps be represented by the mosque of *Nebi Daniāl*, the most sacred locality in Alexandria. The last person known to have seen the body was the emperor Septimius Severus (Dio, 70 13).

The general result is that, owing to subsidence, the remains of Ptolemaic Alexandria are now below water level, and that nothing is to be hoped for from the site (*Egypt. Expl. Fund Report*, 1894-5). See, also, DISPERSION, § 7.

ALLAMMELECH (אַלַּמֶּלֶךְ [v. d. Hooght], etc.), Josh. 19 26† RV = AV ALAMMELECH.

ALLAR (αλλαρ [B]), 1 Esd. 5 36† RV = Ezra 2 59 IMMER, 2; cp also CHERUB, 2.

ALLEGORY (αλληγορουμενα [Ti.WH]), Gal. 4 24†. See PARABLES, §§ 1, 3, 5.

ALLELUIA (αλληλουϊα [Ti.], -ια [WH]), Rev. 19 1 3 *f.* 6†. See HALLELUJAH.

ALLEMETH (עַלֶּמֶת; but BL. Gi. עָלֶמֶת), 1 Ch. 6 60 [45] RV = AV ALEMETH.

ALLOM, RV **Allon** (αλλων [B]), 1 Esd. 5 34 = Neh. 7 59 AMON, 3.

ALLON (fib&), Josh. 19 33 AV. As a proper name this rightly disappears from RV. See BEZAANANNIM (Greek readings at end).

ALLON (אַלּוֹן; cp Elon and see AIJALON, 2; αμων [B], αλλων [A], σηλ. [L]), a Simeonite (1 Ch. 4 37†).

ALLON-BACHUTH, RV **Allon-Bacuth** (אַלּוֹן בָּכוּת, *i.e.*, 'the oak of weeping,' see also BOCHIM; βαλανος πενθους [BAL]); the spot 'below Bethel' where Deborah, Rebekah's nurse, was buried (Gen. 35 8† E). According to another tradition (cp DEBORAH, 1), however, it seems to have been a palm tree (Judg. 4 5); or rather, perhaps, *allōn* could be used of a palm tree, just as the cognate words *el* (in Elparan) and *elath* are undoubtedly used. In 1 S. 10 3 it seems to be called 'the terebinth [?] (אֵלוֹן, δρυος [BAL]) of Tabor,' where 'Tabor' (θαβωρ [BA], τῆς ἐκλεκτῆς [L]) may be a bad reading for 'Deborah' (Thenius).

T. K. C.

ALLOY (בְּדִיל), Is. 1 25 RV mg., EV 'tin.' See METALS.

ALMODAD (אַלְמוֹדָד, or rather as in 𝔊^AL and Vg. אֶלְמוֹדָד, Elmodad, *i.e.*, 'God loves'; a Sabæan name [*ZDMG* 37 13 18]; ελμωδαδ [AL]), one of the descendants of JOKTAN (*q.v.*); Gen. 10 26 (ελμωδαμ [E], ιελμωδαδ [L]) = 1 Ch. 1 20†. See Glaser, *Skizze* 280, 425, and cp *Mudadi* on a primitive Bab. contract-tablet (Hommel, *AHT* 113).

ALMON (עַלְמוֹן), Josh. 21 18† = 1 Ch. 6 60 [45] ALEMETH (*q.v.*).

ALMON-DIBLATHAIM (עַלְמֹן־דִּבְלָתָיְמָה; on form of name see NAMES, § 107; γελμων δεβλαθαιμ [BAL]), a station of the Israelites between Dibon-gad and the mountains of Abarim, Nu. 33 46 and (γ. δαιβ-

λαθαιν [A]) *v.* 47†; apparently the same as BETH-DIBLATHAIM (*q.v.*).

ALMOND, ALMOND TREE, ALMOND BLOSSOM (שָׁקֵד,[1] καρυον [ADL] Gen. 43 11, Num. 17 8 [23] καροια [B]; αμυγδαλον [BℵAC], Eccles. 12 5; as an adjective καρυινην [BQ and practically ℵA], Jer. 1 11†; מְשֻׁקָּד = 'made like almond blossoms,' εκτετυπωμενοι καρυισκους [BAFL], Ex. 25 33 *f.*; καρυωτα [BAL] 37 19 *f.*†). The Hebrew root means to 'wake' or 'watch'; and the tree is said to be so named because it is the first to awake from the sleep of winter.[2] The etymology is alluded to in Jer. 1 11 *f.*

The almond is referred to in the story of Jacob, who (Gen. 43 11, J) instructs his sons to take with them into Egypt a present of the fruits of Palestine including almonds. The verisimilitude of this detail cannot be questioned. It was natural for a Hebrew to presume that Palestinian almonds would be prized in Egypt, nor need we trouble ourselves as to the exact date of the acclimatisation of the almond tree on the banks of the Nile.[3]

The original native country of the almond (*Prunus Amygdalus*, Stokes) was W. Asia; from which it has gradually spread, in the main probably by human intervention, throughout the Mediterranean region. Almonds are still an important article of commerce in the Persian Gulf, nor is there anything improbable in their being exported from Syria into Egypt in early or even in more recent times. No ancient writer, according to Celsius (*Hierob.* 1 298), mentions them as grown in Egypt.

The 'cups made like almond blossoms' on the branches of the golden candlestick, consisting each of 'a knop' or knob 'and a flower' (Ex. 25 33 *f.* 37 19 *f.*) represented, says Dillm. (*ad loc.*), 'not the corolla but the calyx of the almond flower.' Some have proposed to translate מְשֻׁקָּדִים 'awakened' *i.e.*, fully opened (as opposed to closed buds); but this is certainly untenable. In Jer. 1 11 an almond staff seen by the prophet becomes, from the associations of its name, a symbol of Yahwè's watchfulness. The most interesting reference is in the difficult passage Eccles. 12 5. There are three clauses in the verse, and in each unfortunately there is some obscurity. It is the first, rendered by AV, 'The almond tree shall flourish, [RV blossom],' which now concerns us. As regards this, it has been doubted, (1) whether שקד by itself can mean the almond *tree*; (2) whether the pinkish-white blossoms are a likely metaphor (according to the ordinary view) for an old man's white hairs; and (3) what is the meaning of the verb (יָנֵאץ). The consonants of the Heb. text support the meaning 'he will reject the almond,' *i.e.*, will be unable to eat it, though a delicacy; but the vowel-points and all the ancient versions have the same rendering as EV. This seems on the whole more probable. Though Jer. 1 11 is not sufficient to prove that שקד can mean the tree, the equivalent form in Syriac, *šegdā*, appears to have this sense. The metaphor is possible if we remember that the flowers come out as a pale flash on the dark leafless branches; if the metaphor is to be pressed closer, the flowers are, as Koch describes them, 'white or of a pale red.'[4]

(2) See HAZEL. N. M.—W. T. T.-D.

ALMS. The English word is derived through the A.S. form 'ælmæsse' from the eccl. Lat. *eleemosyna*, which again is borrowed from the Greek ἐλεημοσύνη.

1. Terms. The Greek word, which is exceedingly rare in classical authors, means *pity*, and in the Greek of the NT (Lk. 11 41 12 33 Acts 3 2 *f.* 10 9 36 10 4 31) signifies also a special result of pity—viz., relief given in money or kind to the poor. In biblical Hebrew there is no corresponding word, and it is not even quite certain that the technical and restricted use of the word ἐλεημοσύνη occurs in 𝔊. No doubt in such passages as Ecclus. 7 10 and Tob. 4 7 12 8-11, the author or translator has almsgiving chiefly or even exclusively in view. Still ποιεῖν ἐλεημοσύνην does not in itself mean more than עשׂה חסד, 'to do that which is merciful or kindly.' On the other hand, the NT use of 'to give ἐλεημοσύνας,' etc., is quite decisive for the specialised sense of the word.

The close connection between religion and deeds of mercy frequently appears in ancient religion.

2. OT estimate. The Bedouin Arabs, maintaining therein a primeval usage, regard the wayfarer as 'the guest of Allāh,' to whom hospitality is due (Doughty, *Ar. Des.* 1 228). The sacrificial meal often included an act of charity to the poor. Thus the poor were allowed to take handfuls from the meal-offering made to the Arab god, al-'Oḳaiṣir (WRS *Rel. Sem.*(2) 223), and the same use of sacrifice was familiar to the Greeks (see, *e.g.*, Xen. *Anab.* v. 39). Indeed the general law of sacrificial feasts was open-handed hospitality in which the poor shared. The OT, however, carries this beneficent tendency farther than any other ancient religion. It made systematic provision for the poor, and institutions of this kind can be traced throughout the religious history of Israel, from the eighth century onwards. Indeed it is significant that in the OT scarcely a trace of beggars and begging in the strict sense is to be found (see, however, 1 S. 2 36 Ps. 109 10). In the 'Book of the Covenant' (see EXODUS, ii. § 3), Ex. 23 10 *f.*, the Hebrew landowner is directed to leave his land fallow each seventh year 'that the poor of thy people may eat.' The merciful spirit of the Deuteronomist is conspicuous in the stress he lays on the care for the poor. Every third year the owner was to bring forth a tenth from his granaries and bestow it exclusively on the poor, including the Levites (Dt. 14 28 *f.*). According to a custom still preserved in Palestine, every Israelite was free to pick and eat grapes from his neighbour's vineyard, or to pluck ears from the cornfield, as he passed along (Dt. 23 24 *f.* [25 *f.*]). Out of consideration for the poor, the owner must not, in a grasping spirit, glean to the uttermost his cornfield, vineyard, or oliveyard (Dt. 24 19-22). The earliest part of the Priestly Code, viz., the 'Law of Holiness' (see LEVITICUS), reflects the same precept (Lev. 19 9 *f.* 23 22); besides this, in Deuteronomy and generally in the later writers of the OT, private and voluntary almsgiving is especially commended. On the whole it may be said that the prophets plead the rights of the poor as their advocates, while in Deuteronomy and in post-exilic literature, the needy Israelite is commended to the charity of his brethren. See, among passages too numerous to quote, Is. 58 7 (a very late passage) Prov. 14 21 19 17 Ps. 112 9 Job 29 12 *f.* One reference to almsgiving—viz. Dan. 4 27 [24]—deserves special notice. Probably the force of the Aramaic words is 'redeem' or 'make good thine iniquities . . . by showing mercy to the poor,' and if this interpretation of פְּרֻק be correct, we have here a clear implication of the later Jewish doctrine that alms had a redemptive or atoning power.

In the OT Apocrypha and in Rabbinical literature almsgiving assumes a new and excessive prominence.

3. Apocrypha and Rabbin. literature. So much was this the case that צדקה, which in the older writings means 'righteousness' in general, came to be used for almsgiving in particular, and this use of the word has been naturalised in the Arab. *ṣadaḳat*[un] 'alms for God' (*Ḳor. Sur.* 9 104, etc.;

1 Syriac has the same word in the form *šegdā*; the Arabic for almond is *lauz* = Hebrew לוז (see HAZEL).

2 Lag. *Uebers.* 45. Cp Plin. 16 25 (quoted by Celsius): 'Ex iis quæ hieme aquila exoriente concipiunt, floret prima omnium amygdala mense Januario; Martio vero pomum maturat.'

3 Cp Maspero, *Dawn of Civ.* 27.

4 Prof. Cheyne informs us that the wild almond, now rare, was noticed in a glade of Hermon by Robertson Smith, who found its blossoms distinctly white. Tristram speaks of many wild almond trees on Mt. Carmel (*NHB* 332).

Doughty, *Ar. Des.* 1 446), and the Syr. *zedk̥etha* (Pesh. Lk. 11 41, etc.).

The following citations furnish examples of the propitiatory virtue ascribed *to* alms in later Judaism: 'Shut up mercy (ἐλεημοσύνην, perh. 'alms') in thy treasuries, and it shall deliver thee from all affliction' (Ecclus. 29 12); 'Mercy' (or 'alms') 'delivereth from death' (Tob. 4 10); 'Through alms a man partakes of eternal life' (*Rosh hashshanah* 3); 'He who says, I give this piece of money as alms, that I or my sons may inherit eternal life, is a perfectly righteous man' (Pesacbin, 5; Reff. from Weber, *Altsynag. Theol.* 276 *f.*); 'Almsdeeds are more meritorious than all sacrifices' (San. 49 *b*); 'As sin-offering makes atonement for Israel, so alms for the Gentiles' (*Baba Bath.* 10 *b*; Reff. from Levy, *NHWB*, *s.v.* צדקה).

Alms were systematically collected in the synagogue of the Diaspora for poor Jews in Palestine (this custom is mentioned by Jerome as existing in his time), and also every week for the poor of the synagogue itself. Officers were appointed to make the collection, and boxes for the reception of alms also were placed in the synagogues (Vitring. *Syn. Vet.* iii. 1 13). In Mk. 12 41 *f.*, however, the reference is not to alms-chests but to one of thirteen trumpet-shaped boxes, placed in the court of the women to receive contributions towards the expenses of the temple worship (Schiir. *GJV* 2 209).

Jesus, then, did not need to awaken zeal for alms-giving among his countrymen: it was there already;

4. NT. and there was apparently more occasion for it, since in the NT we meet with persons who were, in consequence of bodily infirmity, beggars by profession (Mk. 10 46 Lk. 18 35 Jn. 9 *f.*, and note the technical term προσαίτης). He purified it from the ostentation which often corrupted it (Mt. 6 2-4); he accentuated the feeling of compassion, without which it is worthless (Lk. 10 33); above all, he taught that the disposition which gives alms by mechanical rule and bargains with God for compensation here or hereafter should yield to that impulse of the new heart which sees the supreme reward in likeness to a heavenly Father (Mt. 5 45). We cannot wonder then that, in the infant church at Jerusalem, without compulsion or rigid communistic system (see Acts 5 4), there was an ideal charity which made 'all things common' (Acts 4 32), and prompted rich men like Barnabas to sell their property for the sake of the needy (Acts 4 36 *f.*). No doubt the expectation that Christ's second coming was at hand stimulated this uncalculating generosity; but low esteem of worldly goods and love of the brethren were the mainsprings of this new development. It is also significant that the first election of Christian officers was made to secure a due distribution of alms. The Gentile churches, moreover, were bound to the mother church at Jerusalem by the offerings which they made for the poor in that city (Rom. 15 26 *f.* 1 Cor. 16 1-3 2 Cor. 9 1 *f.* Acts 24 17). Of course almsgiving found other channels. The author of the epistle to the Hebrews assumes that it is a necessary feature of the Christian life, and speaks of it as a sacrifice of thanksgiving which continues after the Jewish altar has been done away with. From very early days each church had its lists of poor (1 Tim. 5 9) and its common fund (Ignat. *Ad Polyc.* 4); and whereas in heathen clubs 'charity was an accident, in Christian associations it was of the essence' (Hatch, *Organ. of Early Christ. Church* 36). Cp COMMUNITY OF GOODS, especially § 5. W. E. A.

ALMUG or **ALGUM**[1] **TREES** (אַלְמֻגִּים, πελεκητά [BA], απ. [L], 1 K. 10 11 *f.*†; אַלְגּוּמִּים, πευκινα [BAL], 2 Ch. 2 8 [7] 9 10 *f.* [π. απελεκητα, L, *v.* 10; απελ., L, *v.* 11]†) yielded a precious wood, which was brought to Solomon, along with gold and gems, from OPHIR (*q.v.*; cp SOLOMON) by the ships of Hiram, and was used to make 'pillars' (מִסְעָד, ὑποστηρίγματα [BAL], RV mg. 'a railing,' 1 K. 10 12 = 2 Ch. 9 11 מסלות, ἀναβάσεις [BAL], EV terraces') for the temple and the palace, as well as harps and psalteries;' In 2 Ch. 2 8 [7], these trees appear along with cedars and firs among the products of Lebanon, with which Solomon asks Hiram to furnish him; but there is no mention of them in the parallel passage in Kings.[1]

The very various opinions that have been held as to the identity of the tree are enumerated by Celsius (*Hierob.* 1 171 *ff.*).

Three may he mentioned: (1) The Jewish traditional rendering is 'coral'; but this is obviously unsuitable, unless we may understand by 'coral-wood: simply a red wood. (2) Kimhi takes it to be 'brad-wood, the *bak̥k̥am* of the Arabs, a red dye-wood found in India. (3) Most moderns, following Celsius (see his reasons, *op. cit.* 1179 *ff.*), believe it to he 'sandalwood, probably of the redder sort (*Pterocarpus Santalinus*, Linn.) which is still used in India for purposes similar to those recorded in Chronicles. The ancient versions yield no light; but see below.[2]

The evidence appears to point to some valuable Oriental wood brought (like lign aloes and cassia) into the Eastern Mediterranean by the ancient commerce of the Red Sea. If we may assume it to be a red wood adapted for carving, it may well be either (1) brad-wood (a name of uncertain origin; the French *braise*, a glowing coal, has been suggested; it was *transferred* to the S. American country) = *Cæsalpinia Sappan*, Linn., a tree of India and the Malay Isles, apparently the *bak̥k̥am* of the Arabs; or it may be (2) red sandalwood, *Pterocarpus Santalinus*, Linn., an inodorous dye-wood, still surviving as a colouring matter in pharmacy,[3] a native of Southern India, where it is much valued for temple pillars. Possibly both species may be included under the expression.

[𝔊 in 2 Ch. 2 8 9 10 *f.* gives ξύλα πεύκινα, which agrees with the Chronicler's statement that the algum-wood came from Lebanon. Cheyne, therefore, proposes to identify 'almug' (the form attested by the earlier record, that in Kings) with *ēlammāku*, the name of one of the trees used by Sennacherib in building his palaces. The tree seems from its name to have been of Elamite origin; but so useful a tree may have been planted in Hermon and Lebanon. For מֵאֹפִיר in 1 K. 10 11, it is possible to read מִשְּׂנִיר. Less probably we may suppose with Hommel that this hard and rare wood was "a product of the trade of Ophir.' See *Exp. T.* 9 470 *ff.* 525 ('98), and cp ALAMMELECH.] N. M.—W. T. T.-D.

ALNATHAN (ελναθαν [A]), 1 Esd. 8 44, RV ELNATHAN, 2.

ALOES and (once) **Lign Aloes**[4] (אֲהָלִים; Num. 24 6 σκηναι [BAL], EV 'lign aloes'; Pr. 7 17 τον οικον μου [BKA]; or אֲהָלוֹת Ps. 45 8 [9],

1. Substance. στακτη [Aq. αλωθ], Cant. 4 14 αλωθ [BA], αλοη [א] (Aq. αλοη, Sym. θυμιαμα), Jn. 19 39† αλοη [BאA]),[5] the modern *eagle-wood*, a precious wood exported from SE. Asia, which yields a fragrant odour when burnt. It is entirely distinct from (1) the common bitter 'aloe' used in medicine, to which alone the name was given by classical writers;[6] (2) the plant

[1] The two forms, though differently rendered by 𝔊 and other versions, are obviously variants of the same word. The etymology is unknown.

[1] The Chronicler has probably mistaken an imported article of merchandise for a native product of Phœnicia.

[2] Jerome renders *thyina—i.e.*, 'citron wood' (*Callitris quadrivalvis*, Vent.)—an Algerian tree inordinately valued by the Romans for tables, not likely to have been known in biblical times or *to* biblical people.

[3] It was the 'sanders' used in mediæval cookery for colouring sauces.

[4] *I.e.*, lignum ἀλόης, a hybrid phrase; *vide* Skeat, *Etym. Dict.*, *s.v.*

[5] [The critical student will not fail to observe that three of the four OT passages in which אהלים or אהלות occurs belong to books or parts of hooks which eminent critics have regarded as post-exilic, and may be reminded here that the occurrence of rare plant-names is one of the phenomena which have to be considered in fixing the period of such documents. He will also notice that the reading of the fourth passage has on good grounds been amended. See the close of this article.—ED.]

[6] This latter is described, among ancient writers, hy Pliny (*HN* 27 4) and Dioscorides (3 22), and its hitterness alluded *to* by Juvenal (6 181; 'plus *aloes* quam *mellis* habet').

commonly known as the American aloe (*Agave americana*), celebrated for the long period which elapses before its flowering. The biblical wood most probably corresponds to that described by Dioscorides (1 21) under the name ἀγάλλοχον[1] (cp Ges. *Thes.* אהלים)—'a wood imported from India and Arabia, resembling thyine wood (Rev. 18 12), compact, aromatic, in taste astringent and rather bitter, with a skin-like and somewhat variegated bark.' He speaks of its medicinal use—sweetening the breath and improving the internal condition of the body—and adds that it is burned instead of frankincense (cp Ar. *kutār* and see INCENSE).

2. Name. The Hebrew name אהלים or אהלות and the Greek ἀγάλλοχον[2] are almost certainly, and the Greek ἀλόη and English *aloe* not improbably, derived from the same Sanskrit word *aguru* = eagle-wood (see especially Yule's *Hobson-Jobson*, art. 'Eagle-wood').

This appears in Pali as *agaru* or *agalu*, in Mahratti as *agaru* or *agara*; probably another form is the Malayālam *agil*, whence Portng. *aguila*, Fr. *Bois d'aigle*, and Eng. *eagle-wood*. 'The Malays call it *Kayū* (wood) *gahru*, evidently the same name though which way the etymology flowed it is difficult to say' (Yule, *l.c.*). [Hommel, *Exp. T.* 9 525, compares *aigalluhu* (var. *akarhu*?) in Am. Tab.]

It is, however, possible that Gr. ἀλόη, Syr. *'alwai* (or *'elwai*), Pers. *alwa*[3] have an entirely separate origin: the Syriac word oftener means the bitter medicinal aloes (so in the majority of references quoted in PS *Thes.*, s.v.), and the Persian word is so explained by the lexicographers.[4] In that case we have an instance of what is not uncommon in language, viz., that two things have arrived at the same name from different starting-points.

3. Source. The 'aloes' and 'lign aloes' of the Bible are thus identified with the product of some tree of the genus *Aquilaria*, the chief home of which is in SE. Asia. According to Arab writers there were many different varieties of the *aghālūjī* or *'ūd* found in different parts of India and Ceylon, differing from one another in value according to the greater or less compactness of the wood, though all had the property of yielding a fragrant vapour if burned when dry.[5] They speak of its use in perfuming clothes and persons, thus illustrating Ps. 45 8 [9] and Cant. 4 14; and there are parallels to the usage mentioned in Pr. 7 17.

It would seem that the kind of eagle-wood most likely to be introduced into Europe in classical times was that yielded by a tree generally distributed through the Malayan region, which in early Eastern commerce would therefore naturally be associated with cassia. This is *Aquilaria malaccensis*, which is figured by Rumphius under the name of *Garo*, and has from ancient times been esteemed by the Chinese. To this day 'it is the most important product of the forests of S. Tenasserim and the Mergui Archipelago. Another eagle-wood is obtained in NE. India from *Aquilaria Agallocha*; but it is less likely that this should have formed an article of commerce in biblical times. Other kinds were obtained from the East in the Middle Ages: what the early Arab travellers have to say about them may he seen in Dymock, *Pharmacographia Indica* 3 218 220. They were similar but no doubt inferior products derived from different trees, and are probably to be regarded as comparatively modern substitutes.

Eagle-wood consists of diseased wood, infiltrated with odoriferous oil and resin. It occurs in irregular pieces varying in colour from grey to dark brown. It is found in the centre of the tree, and the search for it is laborious. The account of Dioscorides (see above, § 1) is accurate. The exterior, which cannot of course be the bark, is veined with a darker colour.

As regards the importation of this substance into W. Asia no difficulty arises when we remember the undoubted fact of a trade carried on by China with India and Arabia in early times, of which Ceylon was probably a chief depot. See on this subject Flückiger and Hanbury, *Pharmacographia*, 2nd ed., p. 520 *f.* A difficulty, however, appears when we consider Balaam's words (Num. 24 5 *f.*):—

'How good are thy tents, O Jacob,
Thy dwelling-places, O Israel!
As valleys stretched forth,
As gardens beside a river,
As *lign aloes*[1] which Yahwè has planted,
As cedars beside waters.'

The wood may, indeed, have been imported by the Phœnicians, and thus be mentioned side by side with myrrh, cassia, cinnamon, etc., the spices of Arabia and India; but how could a Palestinian writer use, as a suggestive simile for the expansion of Israel, the growth of a tree which *ex hypothesi* was never seen in Palestine, but only far away in SE. Asia? The difficulty is pointed out by Dillmann, who remarks, 'Perhaps the original reading was אֵילִם (palms, Ex. 15 27; Gen. 14 6).' The word suggested, however, seems generally to mean 'terebinths'; Prof. Cheyne points out the parallel in Is. 61 3.[2] *Pistacia Terebinthus*, though often only a bush, may be a tree of from twenty to forty feet.

N. M.—W. T. T.-D.

[1] In later Greek also called ξυλαλόη.

[2] This latter passed into Arabic as *aghālūjī* or *aghālūkhī*; but Arab writers usually call it *al-'ūd* 'the wood' *par excellence*, or *al-'ūd al-Hindī*, 'the Indian wood.'

[3] These three are evidently forms of the same word; but here again it is difficult to say which way the etymology flowed.

[4] On the other hand, in the single instance mentioned by Dozy (*Suppl.*) of the occurrence of the same word (*alwiy*) in Arabic—viz., in a poem quoted by Al-Makkarī (*Hist. and Lit. of Arabs in Spain*, ed. Dozy etc. 2 776 *l.* 15)—it seems to have the same meaning as the biblical word. Describing the pride of certain people, the poet says, with allusion to the old Arab custom of lighting fires in prominent places near their dwellings to attract wanderers to hospitable entertainment, 'and they throw on the fire of hospitality, from pride, their *alwiy* and their *kibā'*' (the latter also is said to be a species of *agallochum*).

[5] See the Arabic references discussed at length in Celsius, *Hierobot.* 1 135-171.

[1] Instead of אֲהָלִים 𝔊BAF reads אֹהָלִים, 'tents'; but this is obviously unsuitable. Cp its rendering in Pr. 7 17 (τὸν δὲ οἶκόν μου).

[2] But see *SBOT*, Heb. on Is. *l.c.*, and cp CEDAR.

ALOTH (עֲלוֹת). According to 1 K. 4 16 Solomon had a prefect, Baanah, 'in Asher and in Aloth' (ἐν τῇ Μααλα [B], . . . Γαλααδ [L] omitting 'Asher'; ἐν Ἀσηρ καὶ ἐν Μααλωτ [A]). It is better, as in RV and Kau. *HS*, to read 'in Asher and Bealoth.' See BAALATH-BEER. Klostermann, recognising that a more northerly place is desirable, suggests the emendation 'Zebulun' (notice 'Naphtali,' *v.* 15, and 'Issachar,' *v.* 17).

ALPHA AND OMEGA (τὸ ἄλφα καὶ τὸ ω [Ti. WH] Rev. 1 8 21 6 and [τὸ α in B] 22 13). For similar use of first and last letters of the alphabet in Rabbinic writings see Schottgen, *Horæ Hebraicæ* 1 1086 *f.*

ALPHABET. See WRITING.

ALPHÆUS (ἀλφαῖος [Ti. WH]; Heb. [Aram.] חַלְפַי [חִלְפַּי], either a contraction from חַלְפְיָה or a *gentilicium* from the place-name Heleph; on account of the ח W & H write Ἁλφαῖος).

1. Father of Levi the publican, named only in Mark (Mk. 2 14 = Lk. 5 27 = Mt. 9 9 [where Matthew is usually identified with Levi]).

2. Father of the second James in the lists of apostles (Mt. 10 3 Mk. 3 18 Lk. 6 15, Acts 1 13; see APOSTLE, § 1), not to be identified with Clopas and so made a brother of Joseph the father of Jesus. See CLOPAS, § 3.

There is no reason for identifying (1) and (2). The Itala, it is true, and apparently also the more important of the MSS known to Origen, as well as D, read Ἰάκωβον instead of Λευειν in Mk. 2 14; but if this had been the original reading, it would be impossible to account for the subsequent substitution for James of a quite unknown Levi. The reading Ἰάκωβον arose simply because, at a very early date, a copyist knew of no son of Alphæus but James, and therefore took Λευειν for an error which he was bound to correct. If the Alphæus of Mk. 2 14 were to be identified with the Alphæus of the lists of apostles, on the assumption that Levi and the second James were brothers, then we should expect to find these two

brothers forming a pair in the lists just as Peter and Andrew do, or John and the first James. This objection to the identification, however, is valid only on the assumption that Levi under the name of Matthew was admitted into the number of the twelve.

The Syrian writer Amrus in the 14th cent. makes Alphæus accompany Nathanael (identified with Bartholomew) on his journeyings through Nisibis, Mesopotamia, and the rest of Western Asia (Lipsius, *Apocr. Ap.-gesch.* ii. 261 *f.*). P. W. S.

ALTANEUS (ἀλτανναιος [A]), RV MALTANNEUS, 1 Esd. 9 33† = Ezra 10 33 MATTENAI, 2.

ALTAR.[1] The Heb. מִזְבֵּחַ means literally 'a place of slaughter or sacrifice' (cp Ar. *Madbaḥ*,[2] and Syr. *Madhbᵉḥa*).

1. Names. The Gk. and Lat. terms, βωμός (cp βουνός), *ara* (cp ἀείρω), *altare* (cp *altus*), on the other hand, describe the form of the altar as a raised structure without reference to its purpose. Occasionally (23 times) 𝔊 uses the Gk. word βωμός; as a rule, however, מזבח is rendered by θυσιαστήριον. The translation thus effected is close and exact; but θυσιαστήριον is unknown in classical literature, being apparently confined to biblical, Jewish,[3] and ecclesiastical writers. In the NT βωμός occurs only once (Acts 17 23), and there the writer is speaking of an altar used for heathen worship. Elsewhere θυσιαστήριον is always employed.

We have, then, in the Hebrew word an accurate definition of the altar : it is a place of sacrifice. Why

2. Primitive idea. an altar should be required in order that the victim may be slain in a manner acceptable to the deity, and advantageous to the worshipper, is not so obvious as we might at first be inclined to think. We might deem it a sufficient explanation to say that the altar served ends of obvious convenience. The flesh of the victim being placed on a raised platform specially appropriated to this object, the sacrifice was separated from contact with common things and from contamination, while a means was provided for performing the rite with due solemnity and in full sight of those who desired to associate themselves with the sacred offering. There is evidence, however, that in primitive times the altar possessed a much deeper significance than this. (The development of this primitive idea is traced elsewhere. *See* IDOLATRY, § 2 ; SACRIFICE ; MASSEBAH.)

To the Arabs any stone might become for the nonce an altar, and evidently their Hebrew kinsfolk followed

3. Usage. originally the same ancient way. Thus, after the victory of Michmasb, when Saul was told that his hungry warriors were devouring the flesh meat which they had taken as booty, without reserving the blood as an offering to Yahwè, he commanded his people to roll a great stone towards him, and on this natural altar the blood, the mysterious seat of the soul, was poured out, so that all was in order (1 S. 14 32-35). It is to be observed that here there is no question of burning. In Gideon's sacrifice, of which we have an account in Judg. 6 11 *ff.*, the offering of cooked flesh and unleavened cakes is indeed consumed by fire miraculously kindled; but the altar on which the gifts are placed is simply a rock, and the broth of the cooked flesh is poured out upon it or at its base.

According to Ex. 20 24-26, on the other hand—a passage which, whatever be its date (see EXODUS, ii. § 3), may represent an ancient usage—the altar is to be of earth—a material used in early times by other nations—*e.g.*, Carthaginians. Romans, and Greeks (for reference: see Di., *ad loc.*)—or, if of stone, then of unhewn stone, the reason given being that an iron instrument would destroy the sanctity of the altar. Originally, it can scarcely be doubted, the idea was that changing the form of the sacred stone would drive the deity from his abode (cp IDOLATRY, § 4); but such ideas had passed away when the compiler wrote, and iron tools continued to be forbidden in deference to ancient custom no longer understood. Further, the altar here prescribed was to have no steps. In this way the person of the sacrificer was to be saved from exposure, an object secured by the priestly legislator in a very different way—viz., by making 'linen breeches,' or drawers, part of the priestly attire. Altars so constructed might be erected all over Israel : see HIGH PLACE, § 2 *f.* On the recognition of the altar as a sanctuary for homicides see WRS *Rel. Sem.* 183 *f.*, and cp ASYLUM.

Very different was the altar erected in the forecourt of Solomon's temple at Jerusalem. The first

4. Solomon's temple. Book of Kings (9 25) makes direct mention of the fact that Solomon built an altar on which he offered sacrifice three times a year. So, too, in 8 64, reference is made to the altar which 'stood before Yahwè'—*i.e.*, in front of the temple proper—and it is described as the 'brazen altar' (מזבח נחשת). Thus the material itself offers a striking contrast to the altars of earth and stone which had been in use previously. Like the rest of the temple and its furniture, it was the work of a Phœnician artist, Huram-Abi (2 Ch. 2 13, perhaps rightly; see, however, HIRAM, 2). Unfortunately, the account of the altar, which we should expect before 1 K. 7 23, is wanting.

The text of the passage has been mutilated because a later editor, misinterpreting 1 K. 8 4 (itself a very late insertion), supposed that the furniture of the tabernacle, including, of course, the brazen altar, had been moved by Solomon into his temple, so that no further altar of this kind was needed. The excision of the passage describing Solomon's brazen altar must have been effected in comparatively modern times, for the Chronicler shows that he had it before him in the text of the Books of Kings which he used (see St. in *ZATW* 3 157 ['83]).

The Chronicler (2 Ch. 4 1) gives its dimensions. It was 20 cubits long and broad by 10 cubits high. Now, these are precisely the measurements of the altar in Ezekiel's temple (Ez. 43 13 *ff.*). The prophet really constructs his ideal temple of the future from his recollections of the old temple in which he may very well have served as a priest. We shall, therefore, not go far wrong if, with most modern archæologists, we take Ezekiel's description as applicable to Solomon's altar. On that supposition, although the altar was 20 cubits broad and long at the base, the altar-hearth[1] was only 12 cubits by 12. The altar consisted of three platforms or ledges, the higher being in each case two ells narrower than the lower ledge. At the base was a gutter (EV 'the bottom,' RV mg. 'the hollow,' Ez. 43 13) one ell broad (חֵיק, κόλπωμα, κοίλωμα, κύκλωμα in 𝔊), intended apparently for the reception of the sacrificial blood; and there was a similar gutter at the top round the altar-hearth.

5. Horns of altar, etc. At the four corners on the top were four projections called 'horns.' Possibly they represent, as Stade has suggested, the beginning of an attempt to carve the altar stone into the form of an ox, which symbolised the power of Yahwè[2] (Nu. 23 22 24 8). Be that as it may, down to the latest times the horns of the altar were regarded as specially sacred, so that in the consecration of priests (Ex. 29 12) and in the ritual of the sin offering (Lev. 4 7 *ff.*) the blood was sprinkled upon them. It has been inferred from Ps. 118 27 that at one time the horns were used also for fastening the victim; but the meaning of the words is exceedingly obscure, and no conclusion of any value can be deduced from them.

The ascent to the altar was made by a flight of steps

[1] On references to Greek altars see UNKNOWN GOD and ABOMINATION, ii.

[2] The Arabic *Madbaḥ* does not mean 'altar.' It has acquired that meaning through translations of the Bible. It is also used in the sense of 'trench' (on which see WRS *Rel. Sem.*(2) 341 n. 1 ; cp the remarks on *ghabghab*, *op. cit.* 340 *f.* 198 228).

[3] Prof. Moore has pointed out that it occurs, not only as is sometimes stated, in Philo, but also in Eupolemus, *Ep. Arist.*, Jos., and other Jewish authors.

[1] The word for hearth or place for burning, which should probably be written אריאל (see ARIEL, 2), occurs not only in Is. 29 1 *ff.*, but also on the stone of Mesha (*ll.* 12 17 *f.*).

[2] Robertson Smith, however, regards the 'horns of the altar' as a modern substitute for the actual horns of sacrificial victims, such as the heads of oxen which are common symbols on Greek altars (*RS* 436).

on the **E.** side, and it is plain that an arrangement of this kind was absolutely necessary, when we consider the great height of the structure.

On the whole matter we must remember that Solomon had no strict rule to follow : he simply desired, with the help of Phœnician art, to consult for the splendour of the royal worship. We need not, therefore, wonder that one of his successors, Ahaz (2 K. 16 10 *ff.*), with the co-operation of Uriah the priest, constructed a new altar after the pattern of one that he had seen at Damascus, and made it the chief place of sacrifice.

6. Ahaz's altar.

Solomon's altar was placed, as has been already implied, in front—*i.e.*, on the **E.** side—of the temple proper. Can we identify the exact site? Not perhaps with anything like certainty; but it is worth while to mention the theory advocated by Willis, and more recently by Nowack. The Kubbet eṣ-ṣaḫra, or dome of the rock, which stands on the temple area, covers a great rock pierced by a channel which passes into a sink beneath, and is connected with a water-pipe. The rock has been an object of the highest veneration to Christians, and (especially) to Moslems. It has been supposed that the rock stood on the threshing-floor of Araunah the Jebusite (on the name see ARAUNAH), that it was there David saw the angel (2 S. 24 16 *ff.*) and erected his altar, and that Solomon (2 Ch. 3 1 *ff.*) afterwards included the ground within the temple site. Solomon would naturally build his altar on the spot already chosen by his father and hallowed by the apparition; nor is it incredible, when we consider how tenaciously Orientals, under changed modes of belief, cling to the old sacred places, that David and Solomon built their altars on the rock now covered by the Kubbet eṣ-ṣaḫra. The story of the apparition to David would, on this hypothesis, find a parallel in the apparition to Gideon (Judg. 6 11 *ff.*), and in that to Manoah (Judg. 13 19). The perforation, the water, and the sink would be explained as means for carrying off blood and offal from the altar. It is true, as Dean Stanley has pointed out, that the rugged form of the rock would make it unsuitable for a threshing-floor; hut that is no reason why the rock should not have stood 'by the threshing-floor' and been the place where the angel appeared. Cp ARAUNAH.

7. Site.

Within the temple proper, and in front of the Debïr or innermost shrine, stood another altar, mentioned in 1 K. 6 20 *f.* The text, which is corrupt, should be emended thus, with the help of 𝔊^A (κέδρου): 'he made an altar of cedar in front of the Debir.' From Ez. **41** 22 we learn that it was **3** cubits high by 2 cubits broad, and that the altar had 'corners' which took the place of the horns of the brazen altar. Ezekiel speaks of it also as a 'table.' Upon it, from ancient times (1 S. **21** [6] 7), the shewbread was placed before Yahwk, to be afterwards consumed by the priests.

8. Altar of shewbread.

We assume here that the TABERNACLE (*q.v.*), as described by the 'priestly writer,' is an ideal structure. Said to have been made at Sinai, it was in reality an imaginary modification of the temple, suitable (*so* it was supposed) to the circumstances of the time when the Israelites wandered in the wilderness.

9. P's brazen altar.

(*a*) The altar, called simply 'the altar' (**Ex.** 27 1 **30** 18 **40** 7 32, etc.), 'the altar of burnt offering' (Ex. **30** 28 31 9, etc.), or 'the brazen altar' (Ex. **38** 30 39 39), stood in the outer court, and was square, 5 cubits broad and long, by **3** high. Instead of being wholly of brass, it was a hollow framework of acacia planks overlaid with brass. It was thus small and portable. It had four 'horns'; midway between top and bottom ran a projecting ledge (so RV, AV 'compass'; כרכב; 27 5), intended, perhaps, as a place for the priest! to stand upon when they ministered, though the meaning of the word and the purpose intended are disputed. Below this ledge there was a brazen grating (so RV, AV 'grate,' 27 4) or NETWORK (*q.v.*), מכבר מעשה רשת נחשו, which may have been a device to support the ledge and admit the passage of the blood poured out at the base of the altar. There were four brazen rings at the corners of this network, and into them the staves for carrying the altar were inserted. These staves, like the altar itself, were of acacia wood, overlaid with brass. *So*, too, the altar utensils—viz., סִירוֹת or pans for clearing away ashes, יָעִים or shovels, מִזְרָקוֹת basons or saucers for catching the blood and sprinkling, מִזְלָגוֹת fleshhooks or forks, מחתות or fire-pans for removing coals, etc.—were all of brass. Perpetual fire was to burn on this altar (Lev. 6 12 *f.*).

(*β*) Ezekiel, as we have seen, mentions an altar within the 'holy place,' which he also calls 'the table which stands before Yahwè.' The 'priestly writer' calls it 'the table' [Ex. 25 23 37 10), 'the table of the face or presence' (Nu. **4** 7, לחם פָּנִים, cp RITUAL, § 2), because it stood before Yahwè (Ezek. 41 22), 'the pure table' (Lev. **24** 6). In 2 Ch. **29** 18 it is spoken of as 'the table of shewbread,' שֻׁלְחַן הַמַּעֲרֶכֶת—lit., the table on which rows (of loaves) were laid—to describe the purpose for which it was intended. It was of acacia wood overlaid with gold, and was 2 cubits long, 1 cubit broad, 1½ high. It was surrounded by a golden rim or moulding (זֵר, Ex. 25 11; see CROWN), and at the bottom there was a border or ledge (הַמִּסְגֶּרֶת, Ex. **25** 25, EV 'border'), with a golden rim of its own. Where the feet of the table joined the ledge, golden rings were placed for the insertion of staves. The table was furnished with deep plates (קְעָרוֹת, Ex. 25 29, EV 'dishes'), 'spoons' or saucers (כַּפּוֹת) for the incense (Lev. 24 7), 'flagons' (קְשָׂוֹת, Ex. 25 29 [see FLAGON]) for the wine, 'bowls' (so EV, מְנַקִּיּוֹת 25 29) for pouring the wine in libations.

10. P's 'table.'

(y) The altar of incense (מִזְבֵּחַ מִקְטַר קְטֹרֶת, Ex. 30 1, or מִזְבַּח קְטֹרֶת), also called 'the golden altar' (Ex. 39 38), belongs only to the secondary sections of the Priestly Code. Ezekiel knows of no altar within the temple proper save the altar of the shewbread, and originally 'the golden altar' was only another name for this table. The Priestly Code, in its original form, speaks of the brazen altar as '*the* altar'; and, whilst in Ex. 30 10 the high priest on the day of atonement is to place blood on the horns of the altar of incense, in Lev. 16, where the solemn ritual of that great day is minutely prescribed, nothing is said of an altar of incense. The mention of the altar in the books of Chronicles and Maccabees (as also in the interpolated passage 1 K. 7 48) is due simply to the influence of these novellæ in the 'Priestly Code.'

11. P's incense altar.

This altar was to be made of acacia wood; it was to be 2 cubits high, 1 cubit broad and long; the flat surface on the top (גַּב, **Ez.** 43 13, **AV** 'higher place,' RV 'base'), and the sides and horns, were overlaid with gold. It had a golden moulding round it (זֵר), and beneath this at the four corners were golden rings for the staves, which also were overlaid with gold.

In the reign of Darius a new altar of burnt offering was built, probably on the old site (cp Hagg. 2 15), but, in accordance with the law in Ex. 20 25, of unhewn stone (1 Macc. 4 44 *ff.*). It was desecrated, and, according to Josephus (*Ant.* xii. 5 4), removed by Antiochus Epiphanes. A new altar, also of unhewn stone, was built by Judas Maccabaeus. Within the temple proper were the table for the shewbread and the golden altar of incense (1 Macc. 1 21 4 49 *f.*); but the latter, as far as it was distinct from the table, seems to have been introduced late, for Hecataeus (Jos. c. *Ap.* **1** 22) mentions only the

12. Post-exilic.

candlestick and one altar (or table) as the furniture of the holy place.

In Herod's temple the altar of burnt offering in the court of the priests was still of unhewn stones. The Mishna (*Middoth* 31) states that it was 32 cubits square at the base, and gradually narrowed to 24 cubits at the top; but the dimensions are differently given by Josephus (*BJ* v. 56), and, before him, by Hecataeus (Müller, *Fragm.* 2394). The priests approached it by an ascent of unhewn stone. There was a pipe to receive the blood, which was afterwards carried by a subterranean passage into the Jordan, and there was a cavity beneath the altar for the drink offerings. On the N. side were brazen rings for securing the victims. A red thread marked the place for sprinkling the blood. The altar of incense stood within the holy place, between the golden candlestick and the table of shewbread.

13. Herod's temple.

As we have seen (§ 1), the word θυσιαστήριον is frequently used in the NT for the Jewish altars; and the Apocalypse speaks of the 'golden altar' (83, and 'altar' in the same sense *passim*), because the writer pictures the worship of heaven under forms drawn from the old temple worship. In a passage which is unique, the author of Hebrews (13 10) speaks of a Christian altar. The altar is, of course, not material but spiritual; it is the cross on which Christ offered himself, and the author is following the same line of thought when he exhorts believers 'to do good and communicate, since with such sacrifices God is well pleased.'

14. NT.

For the origin of altars see IDOLATRY, § 2; SACRIFICE; HIGH PLACE, § 3, and WRS *Rel. Sem.*; for the Hebrew altars in later times Benzinger's and Nowack's *Heb. Arch.* (both works '94). See also Stade, 'Text d. Berichtes üb. Salomos Bauten (*ZATW* 3 129 *ff.*), Smend's *Ezekiel* ('80), Cornill's critical text of Ezekiel ('86), and the comm. of Bertholet in *KHC*. For an account of the older literature on the archæology of Ezekiel's temple see Bottcher, *Proben ATlicher Schrifterklärung*, 1833.
W. E. A.

AL-TASCHITH, RV **Al-Tashheth** (אַל־תַּשְׁחֵת; 𝔊BℵAq., Symm., μη διαφθειρης; Symm. Ps. 75 1, περι αφθαρσιας). It is usual to supply עַל or אל before the phrase (Ps. 57-59 75†, headings [v. 1]), and to explain 'To the tune of "Destroy not"' (cp Is. 65 8; so WRS *OTJC*(2) 209). If, however, the view of the musical notes in the headings taken in PSALMS is correct, there can be no doubt that the phrase is corrupt, and that we should read with Gratz עַל־הַשְּׁמִינִית, 'on the Sheminith' (see SHEMINITH).

ALUSH (אָלוּשׁ; Sam. אליש; αιλουc [AFL], -λειμ[1] [B]; *ALUS*), a desert station of the Israelites between Dophkah and Rephidim (Nu. 33 13 *f.*† [P]). Not identified with certainty; but see Di. on Ex. 17 1. The Ar. (ed. Lag.) reads *al-wathanain*, 'the two idols,' probably because the translator understood by Alush the heathen temple at Elusa (see BERED, i. 1, and cp. WRS *Kin.* 293 *f.*). See WANDERINGS, §§ 12, 14.

ALVAH (עַלְוָה, γωλα [ADEL] = עולה? *ALVA*), Gen. 36 40 = 1 Ch. 1 51†, *Kr.* (EV ALIAH after *Kt.* עַלְיָה; BA as above; αλουα [L]), one of the 'dukes' (?) of EDOM (*q.v.*, § 4). Cp ALVAN.

ALVAN (עַלְוָן; γωλων [A], -ωμ [DE], -αμ [L] transposing ל and ו), Gen. 36 23 = 1 Ch. 1 40† ALIAN (עַלְיָן, but in many MSS עַלְוָן; so αλουαν [L], but cωλαμ [B], ιωλαμ [A]), a name in the genealogy of Seir. Cp ALVAH.

AMAD (עַמְעָד; αμιηλ [B], αμαδ [A], αλφααδ [L]), an unidentified point in the border of Asher (Josh. 19 26†). 𝔊B presupposes Ammiel. There are several other place-names compounded with עַם. See Gray, *HPN* 48 *f.*, who rightly declines the explanation of Am'ad as 'people of eternity.' 𝔊L's αλφααδ may point to אלפעל (ELPAAL) for which 𝔊B in 1 Ch. 8 11 gives αλφααδ. This may be correct.
T. K. C.

[1] 𝔊B points to a reading אֵילִם, Elim. Perhaps the writer, wishing to fill up the interval between the wilderness of Sin and Rephidim (cp Ex. 17 1), repeated Elim, the name of an earlier station. See ELIM.

AMADATHA, RV **Amadathus** (αμαδαθου [B]), Esth. 16 10, etc. See HAMMEDATHA.

AMAL (עָמָל; αμαα [BA], αλαμ [L]), in genealogy of ASHER (§ 4 ii.), 1 Ch. 7 35†.

AMALEK (עֲמָלֵק, αμαληκ [BAL], but -ηχ 1 S. 15 25 [A]; gentilic, **Amalekite**, הָעֲמָלֵקִי, αμαληκ [BAL], but also -κ[ε]ιτης [BAL]), a tribe with which the ancient Israelites, at several periods of their history, were engaged in warfare. According to two passages, each of which confirms the other, there appears to have been a time when Amalekites dwelt even in Central Palestine: in the Song of Deborah we read of 'Ephraim whose root is in Amalek' (Judg. 5 14; 𝔊AL, however, ἐν κοιλάδι), and Pirathon in Ephraim (the modern *Fer'atā*, about 6 m. WSW. of Nābŭlŭs) was situated 'on the mountains of the Amalekite,' or 'of the Amalekites' (Judg. 12 15, λαναακ [AL]). Of these northern Amalekites nothing further is known. According to several passages of the OT, the home of Amalek was in the desert of the Sinaitic peninsula. the modern *Tīh*, S. and SW. of Judæa. It is scarcely safe to conclude from Nu. 13 29 14 25 43 45 that they once had settlements also in southern Judæa; still less can we build any such theory upon Gen. 14 7, although the geographical allusions in this chapter have more authority than the legendary narrative itself.

1. Seat.

When the Israelites came out of Egypt into the desert of Sinai, they had an encounter with the Amalekites at Rephidim (Ex. 17 8-16), which is not very far from Mount Sinai (Nu. 33 15). It was natural enough that the nomads, who lived on the scanty products of this region, should do their utmost to expel the intruders, nor can we wonder at the mortal hatred with which the Israelites thenceforth regarded Amalek. That the narrative, in spite of its legendary features, has a historical foundation cannot be doubted. The story of an encounter in the desert of Paran—*i.e.*, the *Tīh* itself (Nu. 14 25 43 45)—is probably nothing more than a less accurate version of the same struggle, which, it is true, can hardly have been limited to a single skirmish. Whether the account of the Deuteronomist (Dt. 25 17-19) was derived from any other source besides Ex. 17 8 *ff.* is not quite clear, although he mentions one additional circumstance, namely 'the cutting off of those who were wounded (?)'—the term נחשלים was perhaps suggested by ויחלש in Ex. 17 13. The verbal repetition of the curse is worthy of note. In 1 S. 15 2, there is an obvious allusion to the passage in Exodus.

2. Exodus.

The mention of the Amalekites in Judg. 3 13 is perhaps due only to an ancient dittography (עמון ועמלק), a reading which, at all events, must have been known to the author of the Maccabean Psalm 83—see *v.* 7 [8]); but it may be questioned whether Bndde is justified in considering the reference to the Amalekites in connection with the Midianites (Judg. 6 3 33 7 12) as a mere gloss; it is in fact by no means improbable that besides the Midianites various other nomadic tribes made inroads upon the Israelite peasantry at the period in question.

The account of the wars of Saul against the Amalekites (1 S. 15) is unfortunately not altogether trustworthy. Even in its original form it must have contained many exaggerations; and it has been subjected to considerable revision. The high figures which appear in the narrative have no historical value. The same may be said of the vast extent attributed to the Amalekite territory in a passage imitated from Gen. 25 18 (1 S. 15 6). We may with some certainty, however, conclude that the very first king of Israel inflicted severe losses upon the wild nomads (cp SAUL, § 3). In this connection we read of King Agag (the only

3. Saul and David.

Amalekite proper name known to us, it may be noticed in passing), to whom the words of Balaam in Nu. 24 7 refer. The description of the death of Agag, obscure as it is, has a very antique colouring, and reminds us of Judg. 8 18-21. Popular tradition has strangely interwoven the fate of the Amalekites with that of Saul. According to one story, which does not agree with the narrative in 1 S. 31, Saul was slain by an Amalekite, who forthwith carried the news to David, but instead of being rewarded was put to death. Even in the book of Esther, composed many centuries later, reference is made to the enmity between Saul and Agag, as the Rabbins long ago observed: the righteous Mordecai is descended from the one, and the wicked Haman from the other.

At the moment when Saul fell on Mount Gilboa, the Amalekites, as it happened, were signally defeated by David. An ancient and well-informed narrator tells us how David, an exile at the court of the king of Gath, while professing to be very differently occupied (see ACHISH, DAVID, § 5), was in reality carrying on a war of extermination against the aboriginal tribes, in particular the Amalekites (1 S. 27 8). On one occasion the Amalekites profited by his absence to seize his residence, Ziklag, and carried off all its inhabitants. He pursued them, however, made a sudden attack with a band of only 600 men, rescued the whole of the spoil, and slew them all, with the exception of 400 who escaped on their camels (1 S. 30). Even the details of this narrative may, for the most part, be regarded as historical; it is obvious that the struggles here described were not wars on a large scale but mere raids such as are usual in the desert.

4. Later times. In after times Amalek does not come into prominence. The words of Balaam, which describe it as 'the first-born of nations' (*i.e.*, primeval nation?), and at the same time foretell its overthrow, are spoken rather from the point of view of the age in which Balaam is placed than from the point of view of the real author, who seems to have lived about the eighth century B.C. (cp BALAAM). According to the remarkable notice contained in 1 Ch. 4 42 *ff.*, 500 men of the tribe of Simeon, under leaders whose names are specified, exterminated the last remnant of the Amalekites in the mountain country of Seir and settled down in their place. Hence it would appear that the last Amalekites dwelt in the mountains of Edom. With this it agrees that Gen. 36, the substance of which must be at all events pre-exilic, represents Amalek as the son of Esau's first-born, Eliphaz, by a concubine—*i.e.*, as an Edomite tribe of inferior rank: see Gen. 36 12 (of which 1 Ch. 1 36 is an incorrect version), and compare *v.* 16. The concubine in question is Timna, according to *v.* 22 (= 1 Ch. 1 39), a sister of Lotan of Seir, and according to the second list in *v.* 40 *ff.* (where Amalek is omitted), an Edomite tribe or settlement. Thus the remnants of Amalek are, to some extent, reckoned as members of the Edomite race.

5. Late writers. The mention of Amalek among the contemporaneous enemies of Israel, by a psalmist of the Maccabean period (Ps. 83 7 [8]), is merely an example of the poetical licence whereby an ancient name is applied to a modern people, just as, *e.g.*, Greek writers of the sixth century A.D. call Goths 'Scythians.' As far as we can judge, the Amalekites were never a very important tribe; at their first appearance in history they are threatened with total destruction, and it would seem that neither Egyptian nor Assyrian records allude to their existence. Ancient Arabic authors, indeed, describe them as a mighty nation which dwelt in Arabia, Egypt, and other countries, and lasted down into post-Christian times. The present writer, however, thinks that in his short essay 'On the Amalekites' (Gottingen, 1864), he has succeeded in proving that these and other similar statements are either fancies suggested by passages in the OT, or else deliberate fictions, and therefore have no historical value. At the present day this opinion seems to be generally accepted.

6. Kenites. One branch of the Amalekites, it is true, appears to have lasted somewhat longer than the rest. When Saul attacked the Amalekites he ordered the *Kenites* to separate themselves from the doomed people, on the ground that they had shown kindness to Israel at the time of the exodus (1 S. 15 6). The Kenites must therefore have belonged to Amalek, or must, at least, have stood in close connection with them (cp Judg. 1 16 as in *SBOT*). Thus we find that the oracle of Balaam (Nu. 24 21 *ff.*) mentions this people, under the name of Kain (*v.* 22, EV mg.), immediately after Amalek. Their friendly relations with Israel are, moreover, shown by the fact that, according to Judg. 1 16, the father-in-law of Moses was a Kenite (elsewhere a Midianite), and also by the fact that his descendants entered Palestine in company with the tribe of Judah. Hence the Kenites are reckoned as a part of Judah (1 S. 30 29, cp 1 Ch. 2 55); but according to the more accurate view they were a distinct people, though they dwelt in the south of Judæa, and were recognised as kinsmen by David (1 S. 27 10). From 1 Ch. 2 55, it would appear that the Rechabites, with whom the nomadic life had become a religious institution, were included among the Kenites (Jer. 35 2 K. 10 15 23). In another district, the great plain of S. Galilee, we meet with Heber the Kenite (Judg. 4 *f.*). For W. Max Muller is mistaken when he derives the name from a city called Kin (*As. u. Eur.* 174); the Song of Deborah reckons Jael, the wife of Heber, among 'women in the tent' (Judg. 5 24), which shows that the people in question are nomads. Accordingly we have no right to regard these Kenites as wholly distinct from those in the South. The oracle of Balaam mentions Kenites in the rocky hills of the South, foretelling that they will be carried away captive by the Assyrians. Gen. 15 19 includes the Kenites among the ten nations whose land God will give to Israel.

This people must therefore have been a nomadic tribe, which, at least in part, belonged to Amalek, in part was absorbed into Israel, and in part, it may be, maintained a separate existence for some time longer. It is not impossible that the Bedouin tribe, Ḳain, which dwelt in the desert of Sinai and the neighbouring districts about six centuries after Christ, may be connected with the Kenites (Ḳain) of the OT, as the present writer, following Ewald, has stated (*op. cit.*). At the present time, some further arguments might be brought forward in favour of this hypothesis, which, however, is still very far from being absolutely proved.

7. Cain. On the other hand, there are many objections to the theory that Cain, the fratricide, is a representative of the Bedouin tribe of the Kenites, as well as to other hypotheses of Stade (*ZATW* 14 250-318 ['94]), great as is the acuteness with which they are supported. A few points alone can be here referred to. Cain, the brother of Abel the shepherd, is expressly described as a *husbandman*. After his evil deed he becomes 'a wanderer and a fugitive'—*i.e.*, an outlawed, homeless criminal. This is something quite different from a nomad, who regularly goes to and fro within the same pastures in the 'desert.' That the Kenites, from among whom Moses fetched a wife, and who have a good name almost everywhere in the OT, were a tribe of smiths[1] (and therefore of pariahs), has no evidence in its favour, nor can we find any indication that the later Arabian tribe of Kain (Bal-Ḳain) was of such a character. In the Ar. *ḳain*, which, it is true, also means 'smith, craftsman,' several words appear to be combined. Besides, blood-vengeance, which is first mentioned in the story of Cain, is by no means a

[1] Similarly Sayce, *Races of OT* 118. 'They formed an important guild in an age when the art of metallurgy was confined to a few.' See however Doughty, *Ar. Des.* 1 280-282.

peculiarity of nomad tribes; it prevailed also among the ancient Israelites, who of course were agriculturists (see also CAIN, § 4 *f.*). TH. N.

AMAM (אֲמָם; ϹΗΝ [B]; ΑΜΑΜ [AL]), an unidentified site in the Negeb of Judah (Josh. 15 26†).

AMAN. 1. (ΑΜΑΝ [A], ΑΔΑΜ [B], ΝΑΔΑΒ [א]) Ward of Tobit's nephew Achiacharus (Sennacherib's vezir, Tob. 1 22), who basely ill-used his benefactor, but came to grief himself while his victim escaped (Tob. 14 10); called Nadan in romance of Aḥiḳar (see ACHIACHARUS), and no doubt, therefore, the same as NASBAS (*νασβας* [BA], *ναβαδ* [א]; ܢܒܬ; *nabath* [Vg.], *nabal* [It.]), the *ἐξάδελφος* (EV 'brother's son') of Achiacharus (Tob. 11 18†), probably to be rendered, in accordance with the romance, '*sister's* son' (cp accompanying table). See ACHIACHARUS.

Tobiel
Tobit — Anael
Achiacharus (Tob. 1 21 *f.*) — sister
Nasbas (Tob. 11 18)
i.e., Nadan (romance)
prob. = Aman (Toh. 14 10).

2. (*αμαν* [BאAL]) 'Rest of Esther' 10 7, etc. *See* HAMAN.

AMANA (אֲמָנָה 'firm, constant'; 𝔊^BאA translates 'from the top of Amana' *ἀπὸ ἀρῆς πίστεως*; ܐܡܢܐ; *Amana*). 1. The name of a mountain, in Cant. 4 8, where 'the top of Amana' is introduced parallel to 'the top of Senir and Hermon.'

'With me from Lebanon, O bride, with me from Lebanon come;
From the summit of Amana, from the summit of Senir and Hermon.'

In the preceding distich reference is made to Lebanon. Evidently the poet means some part of the range of Antilibanus, probably the Jebel ez-Zebedāni, below which is the beautiful village of Zebedāni and the source of the Nahr Baradā (the Heb. ARANA, *q.v.*). In inscriptions of Tiglath-pileser III. and Sennacherib the mountain ranges Libnana and Ammanana are coupled (Del. *Par.* 103 *f.*).

2. Considering how well the form Amana is attested, it becomes a question whether in 2 K. 5 12 we should not adopt the Kr. in preference to the Kt., and read 'Amana' (so AV mg.) or AMANAH (so RV mg.) as the old Hebrew name of the Nahr Baradā (see ABANA).

Many MSS with the two Soncino and the Brescia editions have this reading in the text in Kings; Targ. and Pesh., with the Complut. ed. of 𝔊 and the Syro-Hex. text, **also** presuppose it. T. K. C.

AMANAH (אֲמָנָה Kr.), 2 K. 5 12† RV = AV AMANA, *2*.

AMARIAH (אֲמַרְיָה [and אמריהו, see nos. 5, 6, 7] 'Yahwè hath spoken' [see NAMES, § 33] or 'promised.' Less probably 'man of Yahwè' on analogy of Palm. n. pr. אמרשמשא 'man of the sun,' see Baethg. *Beitr.* 89 n.;[1] ΑΜΑΡ[Ε]ΙΑ [BAL]), a name occurring frequently, but with the exception of (1) only in post-exilic literature.

1. b. Hezekiah, an ancestor of Zephaniah (Zeph. 1 1, *αμορ[ε]ιου* [BA], *αμμορεου* [א*], *-ριου* [א^c.b vid.], *αμαριου* [א^c.c vid. Q]). The readings with 'o' as the second vowel suggest the pronunciation 'Amori' = Amorite. Another ancestor is called 'Cushi'—*i.e.*, the Cushite.

2. In list of Judahite inhabitants of Jerusalem (see EZRA, ii. § 5 [*b*] § 15 [1] *a*), Neh. 11 4 (*σαμαρ[ε]ια* [BA], *αμ.* [א], *-ιου* [L]) = 1 Ch. 9 4, IMRI, abbreviated form (אִמְרִי, *αμρ[ε]ι* [BA], *-βρι* [L]).

3. One of the b'ne BANI in list of those with foreign wives (EZRA, i. § 5 end), Ezra 10 42 (*μαρια* [Bא], apapras [AL]).

4. A priest in Zernbbabel's band (EZRA, ii. § 6 *b*), Neh. 12 2 ([*εσδραμ*]*αριαμ*[*αλουλ*] [B], *μαρεια* [א], *αμ.* [א^c.a], *αζαριας* [L]), cp *v.* 13 (*αραμια* [א*]), and in list of signatories to the covenant (see EZRA, i. § 7), Neh. 10 3 [4] (*αμαριας* [L]). A comparison of

[1] For another suggested compound of [א]מר see MERIBBAAL.

the lists in Neh. with 1 Ch. 24 makes it plausible to identify 'Amariah' with the priestly house of 'Immer' (*v.* 14) whose institution is ascribed to David's time (see IMMER, 2).

In the following (nos. 5-8), the unhistorical nature of the context strongly suggests that the name is introduced merely to give an air of antiquity to this priestly family.

5. Chief priest, temp. Jehoshaphat (2 Ch. 19 11 אמריהו; Jos. apauras).

6. A Levite, temp. Hezekiah, 2 Ch. 31 15 (אמריהו; papras [BA], *αμ.* [L]).

7. One of the b'ne Hebron, a Kohathite Levite (*αμαδια* [B]); 1 Ch. 23 19; in 24 23 אמריהו (*αμαριας* [A]).

8. Amariah occurs twice in the genealogy of the high priests, (*a*) as son of Meraioth; 1 Ch. 6 7 [5 33] (*αμαριας* [A]; Jos. *Ἀροφαῖος*) = 6 52 [37] (*αλιαρεια* [B, *i.e.*, MA misread ΛΙΑ]), and (*b*) as a son of Azariah, 6 11 [5 37] (*αμαριας* [AL]), cp Ezra 7 3 (*σαμαρεια* [BA] *αμαριου* [L]) = 1 Esd. 8 2 (*αμαρθειου* [B] *αμαριου* [AL], EV AMARIAS, as in 4 Esd. 1 2, *Ameriæ* [ed. Bensley]), probably the same as 5 above (cp Be.). See further HIGH PRIEST and note the suspicious recurrence of the sequence Amariah, Ahitub, and Zadok (cp We. *Prol.*(4) 222). See MERAIAH.

AMARIAS (ΑΜΑΡΙΟΥ [A]), 1 Esd. 8 2 = Ezra 7 3 AMARIAH (*q.v.*, 4).

AMABA (אמשא; rather, perhaps, עַמִּישַׁי Ammishai, cp ΑΜΕϹϹΑΕΙ [B in 2 S. 19, BA in *c.* 20, A in c. 17], -ΕϹΑΙ [A], -ΕϹϹΑ [L always; A occasionally], and other variants, see below; cp ABISHAI, AMASAI. The form Amasa rests on a false etymology [from עמש = עמס]; cp AMASHSAI; so Marq. *Fund.* 24).

1. Son of Abigail, the sister of Zeruiah and David (1 Ch. 2 16 *f.* 2 S. 17 25 *αμεσσει* [B], *-σσαει* [A]). His father was Jether a Jezreelite—not an 'Israelite' or an 'Ishmaelite' (see ABIGAIL, 2). He was among those that fell away from David to ABSALOM (*q.v.*), who entrusted him with the command of his forces (2 S. 17 25). In spite of this, David thought it prudent to conciliate Amasa by a promise of the same position in his own army, JOAB (*q.v.*) having earned the king's displeasure (2 S. 19 13 [14] *αμισσαι* [A]). On the renewal of revolt under Sheba (2 S. 20 1), in which according to one view he was implicated, Amasa was entrusted with mustering the men of Judah (*v.* 4). Joab soon took his revenge upon his rival. Amasa having failed to appear at the appointed time, David commissioned Abishai (2 S. 20 6)[1] to go with his men in pursuit of the rebels, and Joab naturally joined the party. The cousins met at Gibeon, and while Joab was pretending to give Amasa a friendly salute, he gave him a deadly blow[2] (2 S. 20 8-10). The narrator is not interested enough in the unfortunate man to tell us whether he ever received an honourable burial (*v.* 12 *αβεσσαει* [B once], *αμεσαι* [A once]). See SHERA, ii. 1 (end).

His death is referred to in 1 K. 2 5 *αμεσσαια* [B] *-σσα* [L], *αμμεσα* [A] and *v.* 32 (*αμεσσα* [EL; A omits]). (The *β* of *αμεσσαβ* in 1 Ch. 2 17 [B] may come from the following Hebrew word.)

2. (*ἀμασ[ε]ίας* [BAL]), an Ephramite, temp. Ahaz (2 Ch. 28 12†). T. K. C.

AMASAI (עֲמָשַׂי, perhaps rather to be read עַמִּישַׁי, Ammishai [so We. *IJG*(2) 24, n. 2], cp ܥܡܝܫܝ ܠܥܡܫܝ in 1 Ch. 6 25 35 ABISHAI; ΑΜΑϹΑΙ [BAL]. -ϹΕ [א]).

1. A name in the genealogy of Kohath (1 Ch. 6 25 [10], *αμεσσει* [B], *-μασι* [A], *-σα* [L]; 1 Ch. 6 35 [20], *αμαθειου* [B], *-μας* [A]).

2. Chief of David's 'thirty,' 1 Ch. 12 18 [19]; see DAVID, § 11 *a* iii., to whom the Chronicler ascribes an obviously not very ancient poetic speech.

He has been variously identified with Amasa (*e.g.*, by Ew.) and with Abishai, who is called Abshai in 1 Ch. 11 20. Ki. even corrects to 'Abishai' (*SBOT*, *ad loc.*). Neither Amasa nor Abishai, however, occupied the rank of chief of the thirty, according to the lists in 2 S. 23 and 1 Ch. 11. The matter is of no great moment, since the connection in which Amasai is mentioned in 1 Ch. 12 does not permit us to use the passage for historical purposes. The Chronicler's conception of Saul's fugitive son-in-law is dominated by the later view of David as

[1] Most critics change Abishai here and in *v.* 7 to 'Joab' (the reading of Pesh.), but perhaps mistakenly. See Bu. *SBOT*, *ad loc.*

[2] See Dr., or Bn., for restoration of the text.

the 'anointed' of Yahwè and the founder of the one legitimate dynasty (We. *Prol.*(2) 180).

3. A priest, temp. David (1 Ch. 15 24).

4. Ancestor of Mahath, a Kohathite Levite, temp. Hezekiah; probably a family name; cp no. 1 (2 Ch. **29** 12: μασι [BA], αμεσσι [L]).

5. See below, AMASHAI.

AMASHAI, or rather, as in RV, **Amashsai** (עֲמַשְׁסַי, where ס implies a reading עמסי based on a false derivation from עמס; perhaps really to be read Ammishai, see AMASAI), a priestly name in the post-exilic list of inhabitants of Jerusalem (see EZRA, ii. § 15 *a*), Neh. 11 13 (αμαc[ε]ια [BℵA], -cαι [L], -μεcαι [A]) = 1 Ch. 9 12 where the name is MAASAI, AV MAASIAI (מַעְשַׂי [Bä. Gi.], some authorities מַעְ׳ [Gi.]; μααcαια [B], -σει [L], μαcαι [A]; [Syriac], in Neh. [Syriac]).

AMASIAH (עֲמַסְיָה, § **29**, 'Yahwè bears,' cp AMOS; μαcαιαc [B], -αιιαc [A], αμαcιαc [L]), one of Jehoshaphat's captains (2 Ch. 17 16†).

AMATHEIS (εμαθθιc **[B]**), 1 Esd. 9 29 AV = Ezra 10 28 ATHLAI.

AMATHIS (αμαθειτιν [A]), 1 Macc. 12 25† **AV**, RV HAMATH (*q.v.*).

AMAZIAH (אֲמַצְיָהוּ, and in nos. **2-4**, אֲמַצְיָה, § 29, 'Yahwè is mighty,' cp AMOZ; αμεcc[ε]ιαc [BAL], -εcι. [AL], -μαc[ε]ι. [BAQ], -μαcci. [L]).

1. b. Joash; father of Uzziah and king of Judah *circa* **796-790** B.C. (see CHRONOLOGY, §§ **35, 37**) **2** K. **14** 1-20 **2** Ch. 25. Two points in his favour are mentioned in Kings—viz., that he punished his father's murderers and that he reconquered the Edomites who had revolted (see EDOM, § 8; JOKTHEEL, 2). Whether he was to any extent successful against that restless and warlike people has indeed been doubted, but on grounds which will not bear examination.

Am. 1 11 *f.* is, in fact more than probably **a** later insertion (see AMOS, § 9), so that 'the inference, drawn from this passage by Stade (in '87) and Kittel, that Amos knew of no great calamity befalling Edom in recent times, falls to the ground.

Amaziah's unfortunate challenge to Joash king of Israel (who treated him, according to the narrative, '**as** a good-natured giant might treat a dwarf,' 2 K. 14 8 *ff.*) ended seriously enough, in the strengthening of the old supremacy of northern over southern Israel (see ISRAEL, § **31**). It is quite possible that the Edomites took advantage of the weakness of Judah to recover in some degree their independence; but of this we have no information.

The Chronicler assures us (2 Ch. 25 **14**) that, on his return from the sanguinary battle in the 'valley of salt' (cp 2 K. 14 7), Amaziah adopted the worship of the Edomitish deities, forgetting that such an act would be possible only if the Edomites were either the masters or the allies of the people of Judah.

Like his father, Amaziah died a violent death; possibly, as Wellhausen, Stade, and Kittel suppose, the conspiracy against him was not unconnected with the disgrace which he had brought on his country. The Chronicler's treatment of Amaziah's reign is of special significance for the Chronicler's period (see Bennett, *Chron.* **413-417**, and cp Kue. *Einl.* § **51**, n. **4**).

Sources. The account given in Kings is of composite origin. 2 **K.** 14 8-14 comes from **a** somewhat unfriendly source, which may be of N. Israelitish origin. The rest of ch. 14 belongs to the Deuteronomistic compiler, who lays stress on Amaziah's better side, and who **at** the close of his story probably makes use of the royal annals.

2. Priest of Bethel, temp. Amos (Am. 7 10 12). See AMOS, § 1.

3. A Simeonite (1 Ch. 4 34 αμασ[ε]ια [BA], -σσιου [L]).

4. A Merarite, temp. David (1 Ch. 6 45 [30] αμεσσεια (?)[B], -ασια [L], μαεσσια [A]).

T. K. *C.*

AMBASSADOR, the EV rendering of the following three Hebrew words :—

1. *Mēlīṣ* (מֵלִיץ) in 2 Ch. 32 31 (πρεσβύτης), more properly 'interpreter' (as EV in Gen. 42 23 [ἑρμηνευτής], in Is. 43 27 [RV mg. ambassador, ἄρχοντες 𝔊BℵAQΓ, but Aq. Sym. ἑρμηνεῖς], and in Job 33 23 [𝔊BℵA have θανατηφόροι]).

2. *Mal'ākh* (מַלְאָךְ) in 2 Ch. 35 21 Is. 30 4 33 7 Ez. 17 15 (√לאך to send; cp BDB *Lex.*, ***ad loc.***; ἄγγελος), **a** word used indefinitely of any messenger, so, *e.g.*, of **a priest** (cp Mal. 2 7), a prophet (Is. 42 19; οἱ κυριεύοντες), or (as frequently) an angel. *Mal'ākh*, accordingly, often approximates *to* the idea of 'ambassador': cp the emissaries sent to Edom, Sihon king of the Amorites, and Ammon (Nu. 20 14 21 21 πρεσβεις, Judg. 11 12; EV 'messengers').

3. *Ṣīr* (צִיר) in Is. 18 2 (ὅμηρα [BℵAQΓ and Th., but Aq. πρεσβύτης, Sym. ἀπόστολος, 'hostages,' cp 1 Macc. 1 10 8 **7** 9 53, etc.]), Is. 57 9 **R**V (AV '**messengers**'; **πρέσβυς**), Jer. 49 14 Pr. 13 **17** 25 13 (EV in the **last,** messenger, **ἄγγελος**) and Ob. 1 1 (**περιοχή**, **a** confusion with מְצוּדָה or מָצוֹר). The denom. vb. הצטיר, '*to* feign one's self an ambassador,' found in MT of Jos. 9 (cp EV) should he read הצטיד, 'take provision' (so RV mg. after most versions; cp Bennett, *SBOT*, ***ad loc.***).[1]

In the Apocrypha 'ambassador' represents **πρέσβυς, πρεσβ[ε]υτής** in 1 Macc. 9 70 **119** 14 **21** (**πρεσβύτεροι** [ℵV]) **40** (**πρεσβυτέροις** [V]) 15 17 2 Macc. 11 **34** (in 1 Macc. 13 14 **21** AV has '**messengers**'), and **ἄγγελος** in Judith 3 1 AV (RV here and EV elsewhere '**messenger**'). In NT the word occurs in 2 Cor. **5** 20 Eph. 6 20 (πρεσβεύω), Philem. 9 RV mg. (πρεσβύτης).

A distinction between messengers and diplomatic agents naturally presupposes an acquaintance with state-craft hardly possible in Israel before the monarchy, and even in David's time emissaries from one court to another were liable to be abused, although the punishment inflicted upon the offenders may suggest that ambassadorial rights were beginning to be recognised (see **2** S. 10 1 *ff.*). The first use of *ṣīr*, apparently the only approach to a specific word for 'ambassador,' naturally belongs to the time when Israel had been forced into diplomatic relations with Egypt and Assyria (of whose frequent intercommunication at a much earlier period the Amarna tablets tell us so much). From the nature of the case *ṣīr* is presumably a loan-word.[2] The employment of the term *mēlīṣ*, 'interpreter,' is the more interesting since Aramaic was the language of diplomacy for Assyrians and Hebrews; cp Is. **36** 11, and see ARAMAIC LANGUAGE, § **2.** See ***POST,*** RABSHAKEH.

S. A. *C.*

AMBER (חַשְׁמַל; in pause **[Ez.** 8 2, where, however, Co. regards it as a gloss] חַשְׁמַלָה).

1. Ḥashmal = amber. Cp Egyp. *ḥsmn*, 'electrum'? or 'bronze'; see EGYPT, § 36, last note, also Lag. *Uebers.* 221; but cp Erman, *ZDMG* 46 115 ['92], and also Ebers, *ib.* 31 454; against the usual explanation of ׳ח see König, *Lehrgeb.* 1 99. Fr. Del. in Bä.-Del. *Ezekiel* xii. identifies the Egyptian word quoted, and also Heb. חשמל, with Ass. *ešmarū* which he defines in *Ass. HWB* as **a** costly brilliant metal (?). 'So Hommel, ***Die*** *Semit. Völker* 1 450.

The Heb. *ḥashmal* occurs thrice (or twice; see above) in Ezek.[3], and is rendered by the EV 'amber.' 𝔊BAQ has ἤλεκτρον, Vg.[4] *electrum*, a rendering which most scholars (*e.g.*, Smend) have adopted, supposing, from the context, that some metallic substance is meant, and understanding ἤλεκτρον to mean here a certain alloy of gold and silver (Egyptologists have given the same meaning to the apparently related Egyptian word). This interpretation, however, rests upon a mistake as to the ancient use of the term ἤλεκτρον (see also EGYPT, § **36**, last note).

It is true the name is sometimes used of **a** metallic substance. Thus, to cite the earliest case, Sophocles (*Antig.* 1036-38) makes Creon speak of electrum from Sardis (**τὸν πρὸς Σάρδεων ἤλεκτρον**) and Indian gold (**καὶ τὸν Ἰνδικὸν χρυσόν**), doubtless meaning by the former what the Greeks commonly called pale gold (**λευκὸς χρυσός**), a natural alloy of gold and silver (one part silver to three or four parts of gold) found native in great abundance in Lydia. That electrum, however was not a term commonly applied *to* such an alloy seems 'indicated by the pains which Strabo takes to explain the term as used in metallurgy of the residuum (**κάθαρμα**) left after the first smelting of gold ore (*circa* 146). He

[1] צִיר, 'ambassador,' appears in 𝔊 in four other places in Is., viz. 13 8 (for צִיר, 'a pang') 21 2 (צִירֵי מָרַי for צָרֵי מָדַי) 39 1 (between ספרים and מנחה) and 63 9 (for צָר compare Du., ***ad loc.***, Che. *Intr. Isa.* 350).

[2] The connection with Ar. *ṣār*, 'to go' (Ges.-Bu.), does not commend itself. It may perhaps be compared with Ass. *ṣirratu*, 'stick' or 'sceptre' (see Del. *Ass. HWB, s.v.*)—the official derives his name from the emblem of office, originally the courier's stick (?).

[3] 1 4 27, 'and out of the midst thereof as the colour of amber,' '**I** saw as the colour of amber'; 8 2 'as the appearance of brightness as the colour of amber.'

[4] For **a** rendering ἶρις in Ezek. 1 4 see Field, *Hexapla.*

himself usually employs the expression 'pale gold' when he alludes to the native alloy. Sophocles, too (*l.c.*), shows that he is employing the word in an unusual and extended way, by appending the qualifying phrase 'from Sardis.

Usually the word has quite another meaning.

In Homer, *e.g.*, where the word occurs thrice and is significantly applied to an article trafficked in by Phœnicians, the trader who captured Eumæus is described (*Od.* 15 460) as having a golden necklace (μετὰ δ' ἠλέκτροισιν ἔερτο) strung with pieces of electrum (similarly in *Od.* 18 296, ἠλέκτροισιν ἐερμένον). The use of the term in the plural in these passages forbids us by any possibility taking it as meaning the gold and silver alloy.

If, then, by electrum the versions do not mean metallic electrum they must mean amber. There are, however, two kinds of amber, and it remains to consider which is meant. The one, usually a dark red (rarely of a light colour), is found in the south of Europe (Catania, Reggio) and in the Lebanon; the other, usually of a yellow or golden colour, but occasionally darker in hue, has from ancient times been met with in great abundance on the shores of the Baltic (whence our chief modern supply is derived), and also occurs on the coasts of the North Sea. As the Phœnician had red amber thus at his very door, he may early have learned to employ it for purposes of art and ornament, just as he learned his art of dyeing with purple from having the murex in abundance by his shores. Moreover, red amber is, as stated above, also to be found in Sicily, and may have been procmed thence. As increased demand called for an increased supply, traders, sailing round the coast of the Ægean in quest of new fishing grounds for the purple-fish, would naturally search keenly for fresh supplies of the precious substance, for the ancients prized amber far beyond its modern value.

Its power of attracting light substances, and the fact that when warmed it emitted a faint perfume, invested it for them with an element of mystery. How far they actually ascribed to it certain medicinal properties, as is still the case in the East with ambergris—an animal substance that has lent its name (adopted by us from the Arabs) to amber—it is impossible to say. As these two substances, which have really nothing in common save the power to emit a kind of perfume, have been called by the same name, the fact that ambergris is prized as an aphrodisiac may perhaps indicate that there was some belief that amber (electrum) possessed some similar potency. This is actually stated by Pliny (*NH* xxxvii. 3 11), who tells us that in his own time the peasant women in the regions north of the Po wore amher necklaces, chiefly as an ornament, but also for medical reasons, and goes on to enumerate a number of ailments for which it was regarded as a specific, either taken as a potion or applied externally. That its property of attraction (whence our modern word electricity) was early known to the Greeks is proved by the notice of Thales.

But how would red amber naturally give a name to a metallic electrum? To the eye of the Greek the essential, difference between pure gold and the alloy (to which we have in English confined the name electrum) being the pale colour of the latter (λευκὸς χρυσός), any name which he would apply to it to differentiate it from pure gold would naturally be one which would indicate this paleness. The reddish amber of the South would not furnish such a name, having no resemblance in hue to metallic electrum. But the yellow Baltic amber, varying as it does in shade from almost white to a bright golden, would give a fairly accurate description of the alloy, whose hue varies with the proportion of its component parts. Similarly when, in the second passage quoted above from the Odyssey, a necklace of gold set with pieces of amber is likened to the sun (ἠέλιον ὥς), the golden (Baltic) amber answers to the description far better than the red. We may assume, then, that from remote ages supplies of Baltic (yellow) amber as well as of red amber were available.

2. Perhaps yellow amber.

Nor is this a mere hypothesis. It has been removed from the realm of probability into that of established fact, by the finding of amber in the tombs discovered at Mycenae by D. Schliemann in 1876, and of beads of the same material in his more recent excavations at Tiryns. As the red amber and the Baltic amber differ essentially in chemical composition, Dr. Helm, an eminent chemist of Dantzig, has been able to prove by actual analysis that this amber is the Baltic variety Schliemann's *Tiryns*, 1886, App. p. 372).

It was, doubtless, from the German tribes along one of the highways which were in constant use in historic times that the ancient supplies of Baltic amber were obtained. We know that down to the time of Herodotus (about 430 B.C.) the Greeks had not as yet opened up any line of communication with the amber coasts from the side of the Euxine.

Herodotus visited Olbia, and though he has given a pretty full account of those regions, mentioning a trade-route leading towards the East, and though we kuow from his own words (3 115) that the amber trade was a subject which had excited his attention, he expresses the commonly received opinion that it was obtained at the mouth of the Eridanus [Pol.

Neither does Baltic amber seem to have reached Greece in his time by any Russian-Balltan route (59). Down to the time of Theophrastus (315 B.C.) it was entirely through northern Italy that the Greeks got their supply of it.[1] .The lake-dwellings of Switzerland and the valley'of the Po have yielded abundance of beads of Baltic amber, and similar beads are well known in the tombs of central Italy. We need have little hesitation, therefore, in believing the statement of Pliny[2] (*NH* xxxvii. 3 44) that it was brought by the Germans into Pannonia and thence reached the Veneti, who dwelt at the head of the Adriatic.[3] As the main lines of commerce change but little through the ages, it was probably by this route that the amber beads reached Mycenae and Tiryns in the bronze age. and articles of the same kind may even have reached Palestine. The bead found at Lachish, however, has been proved, since this article was in print, to be not Baltic amber, but, like that found at Tell-Zakariya (*PEFQ*, April 1899, p. 107), a resin, and no trace of amber has yet been found in Mesopotamia (Per.-Chip., *Art. Chald.* 2 362). Nevertheless it is possible that even the yellow variety may have reached Palestine in the sixth century B.C., and the view of the ancient versions that the Hebrew *ḥashmal* indicates this substance may be correct.

W. R.

AMEN (אָמֵן;[4] in 𝔊 usually γένοιτο;[5] in work of Chronicler ἀμήν, and so in NT very often),[6] an adj.[7] signifying stability, used only as an interjection expressive of assent of one kind or another.[8] Three stages may be distinguished: (1) *Initial* Amen, referring back to words of another speaker: probably the earliest usage, occurring even in common speech[9] (1 K. 1 36 Jer. 28 6 11 5, the only certainly pre-exilic Amens).[10] (2) *Detached* Amen, the complementary sentence being suppressed (Dt. 27 15-26 Neh. 5 13; double in

1. In OT.

1 They appear to have confused with it a stone called λιγγούριον or *ligurius*; as so often occurs they mistook the region whence the article was transmitted to them for the actual place of production (Theophr. *De Lap.* 16).

2 Pliny's statement is confirmed by a remark of Herodotus (1 196) from which it appears that the only knowledge then obtainable respecting central Europe came by way of the Veneti, a fact which shows that the Greeks knew of a line of communication in this direction.

3 Pytheas of Massilia had, in the fourth century B.C., found the Guttones gathering it and giving it in trade to the Tutones.

4 It probably occurs in twelve places in the Hebrew, for in Is. 65 16, although Aq. (πεπιστωμένως), Sym., Pesh., and Vg. have *amen*, it should probably (so Che. Di. Du. Rys. in *HS*, and perhaps Targ. Jon. 𝔊^{BאAQΓ} [αληθινον]) be vocalised otherwise, perhaps]$ (as in Is. 25 1, where indeed the Gk. Vss. [hut Sym. not, as usual, ἀμήν, but πίστει] and Vg. read *amen*). 𝔊^{BאAQ} read it also, in a corrupt text, in Jer. 15 11 and in Jer. 3 19. EV has *amen* always; RV even in Jer. 11 5. It occurs in six places in 𝔊 Apocr. (for Judg. 13 20 cp Eth. Pesh.). Vg. adds Tob. 9 12 13 23 and 2 Esd. [Neh.] 13 31; in Ecclus. 50 29 it is probably late.

5 Eight (eleven) times, ἀληθῶς once.

6 There is much variety of text. T R has it in some 119 places, of which RV rejects 19 (see below, § 2).

7 See, however, Earth, *NB* §§ 5*c* and 7*b*.

8 For three kinds see *Shebu'oth* 36*a* (mid.).

9 It seems most likely that in Jer. 3 19 𝔊 read אֵיךְ as 'א'ך = אָמֵן יהיה כ'.

10 𝔊 has it also in Jer. 3 19 15 11 (Is. 25 1 is not pre-exilic).

Nu. 5 22 and in Neh. 8 6 = 1 Esd. 9 47). Amen must have been in liturgical use in the time of the Chronicler (1 Ch. 16 36 = Ps. 106 48). Later, but very similar, are Judith 13 20 Tob. 9 12 (Vg.), and Tob. 8 8. With the fact that none of these relates to temple service may be compared, *e.g.*, *Jer. Berach.* 14c. The Chronicler, however, appends Amen (*l.c.*) to extracts from Pss. 105 and 96.[1] *(3)* An apparent *final* Amen, there being no change of speaker; frequent from NT Epp. onwards, but in OT only *(a)* in subscription to first three (four) divisions of Psalter and *3* and 4 Macc.; and (6) at end of prayer, Neh. 13 31 and Tob. 13 18 (both only in Vg.). In Tob. 14 15 (BℵA) we have almost a fourth stage: (4) a simple *subscriptional* Amen, like that, *e.g.*, of the TR of Lk., without, strictly speaking, any preceding doxology.[2]

2. In NT. Just as 𝔊 translates, as we have seen, by *γένοιτο* in the Law, the Prophets, and even the Psalter, but has *ἀμήν* in the Chronicler and Apocrypha,[3] so in NT Lk. often avoids (omits or translates) Amen, and so even Mt. and to a *less* extent Mk. Stage (1) is represented by only Rev. 7 11[4] 19 4 22 20; (2) by Rev. 5 14 and the usage testified to by 1 Cor. 14 16; *(3)* by usage of Epistles (fifteen doxologies, mostly well-attested;[5] nineteen blessings, mostly ill-attested).[6] There is no real instance of (4).

The Amens of the Gospels (fifty-two in Synopt., twenty-five in Jn.) are a peculiar class, declared by Delitzsch[7] unparalleled in Hebrew literature: initial Amens[8] like group (1), but lacking the backward reference. The sayings that they introduce are only sometimes at all related to what now precedes them. The double *ἀμήν* (twenty-five times) of the Fourth Gospel, which occurs even in Jn. 13 38 (= Mk. 14 30, etc.), Delitzsch tried (*l.c.*) to explain as = Aram. *amen amēna* (= *amen amer' na* = *ἀμὴν λέγω*), which sounded like *ἀμὴν ἀμήν*; but Dalman argues strongly against this.[9] For a suggestion of a different kind see GOSPELS, § 50 n.[10]

The key to Rev. 3 14 *(6 ἀμήν)*, 'the faithful and true witness,' is doubtless the traditional Massoretic pointing of Is. 65 16 (at least as old as Sym.) with possibly a reminiscence of the practice of Jesus and of 2 Cor. 1 20. Here, again, *ἀμήν* is neut., and the meaning is not quite so clear; but probably *ἀμήν* has about the same meaning as in 1 Cor. 14 16.

3. Elsewhere. The liturgical use of Amen, vouched for in apostolic times by this last passage, is attested, **as** regards the Eucharist, by Justin Martyr for the second century (*Apol.* i. 65 ὁ παρὼν λαὸς ἐπευφημεῖ λέγων Ἀμήν), and, *e.g.*, by Jerome two centuries later (preface to **Bk.** ii. of *Com.* **in** *Ep. ad Gal.*, 'ad similitudinem . . . tonitrui ***amen*** reboat'), while the introduction of Amen in the baptismal service is probably later. Post-hihlical Judaism greatly developed the theory of the use of Amen.[11] He who pronounced it was greater than he who blessed. It opened the gates of heaven.[12] It must not be uttered in a slovenly or careless way nor yet prolonged too much.[13] The synagogue still uses it[14] and Mohammedans are in the habit of adding it after reciting the first ***Sura*** of the Koran.

4. Literature. For references to older literature see, *e.g.*, Vigouroux, *Bib. Dict.*, *s.v.*; for references to passages in Talm. see, *e.g.*, Kohut's *Aruch*, *s.v.*; for usage of temple doxology Gratz, *MGWJ*, **1872**, pp. 481-96, and *Psalmen* 62 *f.* 91 *ff.*; for Rabbinic treatment, *e.g.*, Jebuda Khalas, *Sefer ha-Mūsār*, *Pereq.* 4 (ed. Mantua, 42); Yosēf Caro, ***Beth*** *Yosēf* (*Orach-Ḥajim*) ed. Venice, 1550, 1 fol. 84*b*-85*b*. On the whole subject see H. W. Hogg 'Amen, notes on its Significance and Use in Biblical and Post-diblical times,' *JQR* 9 1-23 ['96] and in connection therewith Nestle, 'The Last Word in the 'Bible,' *Expository Times* January 1897, p. 190 *f.* To the ahove must now be added Dalman, ***Die*** *Worte Jesu* 185-7 ('98). H. W. H.

[1] Gratz accordingly argues that our Psalms are a synagogue arrangement.

[2] This is hardly trne of *N*.

[3] Except Judith 13 20.

[4] W & H give in square brackets, also a final 'Amen.'

[5] All except 2 Pet. 3 18.

[6] Also Rev. 1 7 (after *ναί*; neither doxology [?] nor benediction). Rev. 1 18 1 Jn. 5 21 2 Jn. 13 are excluded in RV. Cp *JQR* 9 8, n. 2.

[7] 'Talm. Stud. ix. ἀμην ἀμην' in *ZLTh.*, 1856, pp. 422-4.

[8] All in sayings of Jesus. The five finals (Mt. 6 13 28 20 Lk. 24 53 Jn. 21 25 Mk. 16 20) are wanting in the best MSS.

AMETHYST (אַחְלָמָה, **αμεθυςτος** [BAF], -**coc** [L], *amethystus*, ܚܡܪ ܚܠܐ). The amethyst is a variety of quartz (SiO_2) or rock-crystal (see CRYSTAL) of a clear purple or bluish violet colour (from iron peroxide or manganese), often marked by zigzag or undulating lines (the colour being disposed in clouds). The Greek name [Rev. 21 20; cp Ex. 28 19 = 39 12 [36 19 in 𝔊]), which was adopted into Latin, implies an ancient belief that the wearer of an amethyst could drink wine freely without fear of intoxication. The source of the belief is found in Theophrastus (*Lap.* 31), who is the earliest Greek writer to mention the stone, which he calls *τὸ ἀμέθυσον*. It is a simple case of sympathetic magic, for Theophrastus says *(Lap.* **31)** *τὸ δὲ ἀμέθυσον οἰνωπὸν τῇ χρόᾳ*: it is wine-coloured, hence its amuletic potency against the effects of wine. Greek engravers, accordingly, not infrequently cut Bacchanalian subjects on this stone. Hence the point of several epigrams in the *Anthologia Græca* (*e.g.*, ix. 752, on the ring of Cleopatra, adorned with Methè, Drunkenness; and ix. 748, on a gem engraved with a figure of Bacchus). It seems also to have been believed that the amethyst caused those who wore it to dream, or to have propitious dreams (cp the extract from Burhān in Lag. *Mitth.* 1 236). Hence the engraved *aḥlāmā* of the 'Breastplate' of P (Ex. 28 19 = 39 12; explained by Kimchi as the dream-stone; אחלמה from חלם 'to dream') has been commonly identified with the amethyst (thus apparently 𝔊), so much engraved by the Greeks. Cp PRECIOUS STONES.

Del., on the other hand (*Heb. Lang.* 36 n.), derives the name from *Aḫlamū*, an Armenian people and district often mentioned in Babylonian and Assyrian texts, supporting the suggestion by referring to Sennacherib's repeated mention of Armenia and its neighbonrhood 'as a rich mine of certain precious stones. Bondi considers it an Egyptian loan-word (*ekhnōme*), while Di. connects it with חַלָּמִית, the mallow, and adopts the explanation 'green malachite.' W. R.

AMI (אָמִי), Ezra 2 57† = Neh. 3 59 AMON (*q.v.*, 3).

AMINADAB (**αμιναδαβ** [Ti. WH]), Mt. 1 4 and (**αδμειν** [WH], mg. **αδαμ**) Lk. 3 33† AV = RV AMMINADAB (*q.v.*, 1).

AMITTAI (אֲמִתַּי, § 52, from אֱמֶת, 'truth,' perhaps a theophorous compound; αμαθ[ε]ι [BAL]), father of the prophet Jonah (2 K. 14 25 Jonah 1 1?).

AMMAH, The Hill of (גִּבְעַת אַמָּה; **ο Βογνος αμμαν** [B], **-μα** [A], **εμμαθ** [L], **ομματον** or **αμμ.** [Jos. *Ant.* vii. 1 3]), an unknown hill 'that lieth before Giah' (?), where Joab and Abishai stayed their pursuit after Abner (2 S. 2 24†). From a comparison of *vv.* 24 and 25 it is probable that we should restore the name also in *v.* 25 for 'one hill,' AV 'an hill' (גבעה אחת).

So Bu. (*SBOT*), Sam. ***ad*** *loc.* following We.'s suggestion that the two hills are the same. Oherwise Klo., who in *v.* 25 conjectures (מעלה) אדמים, the ascent of Adummim.

In *v.* 24 Sym. (*νάπη*, gully) Theod. (*ὑδραγωγός*) and Vg. (*aquæductus*) give the word a meaning which it hears only in post-hihlical Heb.; moreover, since the word אמה has no article prefixed, it cannot be an appellative here.

AMMI (Hos. 2 1, and, in Lo-ammi, 2 23 [25]). See LO-RUHAMAH.

AMMI, Names with. The element *'ammi* (עַמִּי) *or*, at the end of words, *'am* (עָם) has been interpreted in three different ways—viz., as meaning (1) [my] people, or (2) [my] kinsman or uncle, or else as being *(3)* the proper name of a god.

1. Initial ammi- = paternal uncle. So long as this group of names[1] was regarded by itself in the light of Hebrew philology alone,

[1] The exact limits of the group are uncertain; for in the case of several names that have been included in it, it is open to doubt

the interpretation of *'ammi* or *'am* by 'people' seemed the most obvious, and was most generally adopted for all names alike. The result was not quite satisfactory; for 'the people of God' or 'my people is God' (*'ammiel*) was, to say the least, an improbable meaning for the name of an individual. In the light of comparative philology and newly recovered parallel names in other languages, it became clear that 'people' was not the real meaning of the element in at least some of the names.

Names containing *'ammi* are common in the S. Arabian inscriptions, but in Arabic *'amm* signifies not 'people,' but 'paternal uncle'; the latter, therefore is the most reasonable interpretation of the element in Arabic words.[1] A closely similar interpretation is also thoroughly justifiable in Hebrew names; for the sense 'uncle,' or perhaps rather the wider meaning 'kinsman,' is secured for *'am* in Hebrew by a comparison of the parallel phrases נאסף אל אבותיו and נא׳ אל עמיו; cp the use of Ass. ammi for 'relatives' in Am. Ta. 6.45 32 : *KB* 5 106. Such an interpretation of *'ammi* in Semitic names generally is further supported by the fact that names of this type are found side by side in the same languages with names identical in form containing another element (see ABI, NAMES WITH) denoting a kinsman; thus, *e.g.*, in Hebrew we have the series Ammi-el, *Abi*-el Hi-el (= *Ahi*-el); *Ammi*-nadab, *Ahi*-nadab, *Abi*-nadab; and,' in S. Arabian (following *CIS* 4, *e.g.*, nos. 73 *10* 20 *1* 69 55 *3*) *'Am*-karib, *Abū*-karib, *Akhū*-karib, *Dōd*-karib.[2]

The interpretation of *'ammi* by 'uncle' (or 'kinsman') in the S. Arabian names and in several at least of the Hebrew instances (Ammiel, Amminadab, Eliam, Ammi-shaddai (?), Ammihud, Ammizabad, Ben-ammi) is now generally adopted; and this much at least may be regarded as well established,—that names in Ammi originated from the same circle of ideas as names in Abi, Ahi.

On certain ambiguities common to all these classes see ABI, ii. (viz. on their syntactical interpretation, § 1 *ff.*; on the human or divine, § 4, and on the general or special character of the reference, § 5).

With regard to the present group in particular a further question has arisen, viz., whether *Ammi* be not

2. Not = divine proper name. the proper name of a deity, and whether, in consequence, we ought not to assume the worship of this deity where such names are found. The facts which have raised this question are these:—

(1) Compounds with *'ammi* are parallel not only to compounds with *abi*, *ahi*, but also to compounds with divine proper names, thus in Hebrew we have Ammiel, Joel; Eliam, Eli*jah*; *Ammi*-nadab, *Yĕhō*nadab (cp Moabite *Chĕmōsh*nadab), Rĕhab*'am* (Rehoboam), and Rĕhab*yah*. (2) The chief god of the Katabān (or *walad 'amm*—a S. Arabian people) was called 'Amm, and Emu was a name given to the god Nergal by the Shuhites on the W. of the Euphrates; cp also the name AMMON (*q.v.*, § 1).

These facts, however, are insufficient to warrant us in separating names in *'ammi*, at least so far as their origin is concerned, from names in Abi, Ahi. Still, it is clear that *'amm(i)*, originally an appellative, applicable and applied by different clans or peoples to different gods, became in certain cases the proper name of a deity; and, where this usage can be independently proved to have been current, it is reasonable to interpret *'am* in such cases as the proper name of a deity (cp the parallel case of Baal); but we are scarcely justified in inferring from the mere existence of names in *'ammi* among a certain people that the proper name of their deity was *'Amm*; in particular it is very hazardous to conclude that the Hebrews worshipped a distinct deity *'Amm*.

The compound personal and local names in *'am* (final) present some considerable difficulties, which require

3. Final 'am. further consideration. Is the sense 'kinsman' for *'am* always the most natural

whether the text is sound, sometimes even in its consonants. The apparent cases of initial *'ammi* are the following six:—Ammiel, Ammihud, Ammihur, Amminadab, Ammishaddai, Ammizabad, and the place-name Amad; those of final *am the following seven:—Aniam, Eliam, Ithream Jashobeam, Jekameam, Jeroboam, Rehoboam, and the five Glace-names Jibleani, Jokdeam, Jokmeam, Jokneam, Jorkeam. Cp also Ben-ammi. See JEROBOAM, also AMASA AMASAI, AMASHAI.

[1] Glaser produces evidencd from the Minæan inscriptions to show that 'ammi,' as a term for God, was long in use, though at a distance from Palestine: see Hommel, *ZDMG* 49 526 ('95). Cp, however, Gray's remark, *HPN* 53.

[2] But cp DOD, NAMES WITH, where a different view is taken.

me? Or may we in some cases prefer the sense 'people,' 'kinsfolk,' on the grounds put forward in *HPN* 59 (cp 215)? The question is sometimes complicated by the uncertainty of the form in MT. It must also be remembered that Rehoboam (Rĕhab'am) was the son of an Ammonitish mother, and that the eponym of the Ammonites is called Ben-ammi (see AMMON, § 1); also that some have conjectured that Jeroboam was of foreign origin. Cp IBLEAM, ITHREAM, JASHOHEAM, JEKAMEAM, JEROBOAM, JOKNEAM, etc. (see col. 138, n. *1*).

As to the history of the names. Actual usage proves

4. History of names. that, like compounds with *abi* and *ahi*, Semitic compounds with *'ammi* (=kinsman) are of a very ancient origin.

We find at least two names (Ammi-satana, Ammi-zaduga) of the type among the kings of Babylon belonging to the Hammurābi dynasty (circa †2000 B.C.), and not improbably a third in the name Hammurabi itself.[1] The non-Babylonian character of these names has gained general acceptance in spite of Jensen's criticism (*ZA* 10 342 *ff.* ['95]); according to Winckler (*GI* *130*) they are of Canaanitish, according to Sayce (*RP*(2) 3 10 *ff.*) and Hommel (*AHT* 98 *ff.*), of Arabian origin.

Names of the type are certainly common in the early S. Arabian inscriptions; and Hommel goes so far as to assert that the biblical names beginning with *ammi* are, like those of the kings of the Hammurabi dynasty, of Arabian origin, and were introduced among the Hebrews at the time when they had close intercourse with the Arabs in Sinai (*ZDMG* 49 525, n. *1* ['95]). However this may be, it is clear not only that these names are of ancient origin, but also that at a still comparatively early period they fell into disuse among the Hebrews, and also, according to Hommel (*ANT* 86), among the *S.* Arabians. The only question with regard to the Hebrew instances is whether one or two of them (especially AMMI-SHADDAI, *q.v.*) are late—*i.e.*, post-exilic—artificial formations. Hommel has recently defended the genuine antiquity of 'Ammi-shaddai on the ground of its virtual equivalence to Ammi-satana (see above); but, even granting his premises, his conclusion does not necessarily follow, and, as a matter of fact, the equivalence is questionable; for (1) the transliteration of Ammi-satana is uncertain: some—*e.g.*, Sayce (*PSBA*, Nov. '97, p. 292)—transliterate Ammiditana; and (2), if it be correct, the word is quite as possibly a 3rd sing. pf. (so Winckler, *l.c.*) as = 'our mountain.' Cp SHADDAI, § 2.

The most recent discussions of these names (together with references to the literature, which is considerable) will be found in Gray, *HPN* 41-60 198 *f.* 245 253 *ff.* 323, *Expositor*, Sept. 1897, 173-190, and Hommel, AHT 48 83 *ff.* 106 *ff.* G. B. G.

AMMIDIOI, AV **Ammidoi** (αμμιδιοι [B]), 1 Esd. 5 20. See CHADIASAI.

AMMIEL (עַמִּיאֵל), § 46, 'El is my [?] kinsman,' cp ELIAM and AMAD, and see AMMI, § 1 *f.*, αμ[ε]ιηλ [BAL]).

1. Danite 'spy' (Nu. 13 12 [P]).

texts] ; 𝔊^BAL, etc., AMMIHUD [*q.v.*, ■]). Kr. may be a miscorrection, since a compound of חוּר would be not unlikely for a native of the S. Palestinian Geshur (see GESHUR, 2). Cp perhaps the Nab. and Sin. חורו ; and see HUH.

AMMINADAB (עַמִּינָדָב, § 46, 'my kinsman apportions,' or 'the [divine] kinsman is munificent'; ΑΜ[Ε]ΙΝΑΔΑΒ [BAL]).

1. Father of Elisheba, Aaron's wife, and of Nahshon 'head' of Judah [see ELISHEBA] (Ex. 6 23, αμιναδαμ [A]; Nu. 1 7, -δαμ [F]; 2 3 7 12 17 10 14 [P] αβιναδαβ [F]†). The names of father and son have been introduced into the genealogy of David (Ruth 4 19 *f.* 1 Ch. 2 10; also Mt. 1 4 Lk. 3 33, where—AV AMINADAB [on the variations Aminadam, Adan, see Tisch.]; cp We. *De Gent.* 17).
2. A Levite, temp. David (1 Ch. 15 10 *f.*).
3. b. Kohath, 1 Ch. 6 22 [7] (ισσααρ [A], *i.e.*, IZHAR, the MT reading in the ‖ *v.* 38). See IZHAR (1), ELISHEBA.
4. See ABIHAIL, 5.

AMMINADIB, an imaginary name in Cant. 6 12 AV, =עַמִּינָדִיב, a reading supported by 𝔊 (ΑΜ[Ε]ΙΝΑΔΑΒ [BℵA]), and the St. Petersburg Heb. MS (Strack) and other codices. To be consistent, however, AV should have recognised the existence of a proper name also in 7 1 [2] (MT *bath-nādīb* ; EV 'prince's daughter'; θ. ναδαβ [BK]), and rendered 'O daughter of Nadib,' or with 𝔊^A (ο. αμιναδαβ) 'of Amminadib.' The *dramatis personæ* of the pastoral poem *or* drama will then receive the addition of the father of the heroine (so Gratz). It has been shown elsewhere, however (see CANTICLES, § 6 *f.*), that the supposed drama or pastoral poem and its plot are non-existent; we are not in want of an 'Amminadib.' In 7 1 [2], the rendering of EV, 'O prince's daughter,' is sufficient, and נדיב (*nādīb*) at the end of 6 12 probably means 'prince,' as in 7 1 [2]. That '*ammi* and *nādīb* in 6 12 are separate words is expressly stated in the Massora, and most of our MSS follow this rule (so, too, Rashi and Ibn Ezra). On the right reading and translation of 6 12 *b*, and the right position of 6 11 *f.*, see CANTICLES, § 16. T. K. C.

AMMISHADDAI (עַמִּישַׁדָּי, §§ 42, 46, ΑΜ[Ε]ΙϹΑΔΑΙ [BAF], -ΔΕ [L]), father of Ahiezer (1), temp. Moses [P]; Nu. 1 12 2 25 (ϹΑΜ. [A]), 7 66 71 10 25 (ΜΙ. [A])†. The name seems to be a genuine old Semitic personal name (cp, perhaps, Ammi-satana at Babylon, 2161-2148 B.C.), and may mean 'The divine kinsman is my Lord.' Cp SHADDAI, § 2 *b* (end); AMMI, § 1. T. K. C.

AMMIZABAD (עַמִּיזָבָד; see AMMI, § 1), apparently son and lieutenant of BENAIAH, 1 (1 Ch. 27 6); but the passage is obscure and certainly corrupt (ΖΑΒΑΔ ... ΛΑΙΒΑΖΑΘ [B], ΑΜΙΡΑΖ. [A], ΑΜΕΙΝΑΖΑΒΑΔ [L, pointing to the reading Aminadab], ܥܡܝܙܒܕ).[1] See DAVID, § 11 *c*.

AMMON, AMMONITES. The people are called 'Children of Ammon' (בְּנֵי עַמּוֹן) or 'Ammonites'

1. Name. (עַמּוֹנִי, etc.); only twice is the tribe referred to as 'Ammon' (1 S. 11 11 [but see 𝔊], Ps. 83 7). For 2 Ch. 20 1 see MEUNIM (*c*), and for 2 Ch. 26 8, *ib.* (*b*) n.

𝔊^BAL αμμων but αμμαν in Gen. 19 38 [ADE], Nu. 21 24 [B once, AF twice]; Deut. 2 19 37 [B^ab A] 3 11 [B^ab AFL] 16 [BAFL]; αμμως Zeph. 2 8 [ℵ*]. The Ethnic αμμαν[ε]ιτης, or αμα. [A in 2 S. 11 1 *f.* 23 37, 1 K. 14 21]; and αμμων[ε]ι Ezra 9 1 Neh. 2 10, but αμμωνιτης [L] Neh. *l.c.* and in 13 1. The Ammonite persons mentioned in OT are Baalis, Hanun, Naamah (2), Nahash, Shimeath, Shobi, Tobiah, and Zelek; and in Apocr. Achior and Timotheus.

In the cuneiform inscriptions the land of Ammon is called Bît-Ammān (shortened into Amman), on the analogy of Bît-Ḫumri (Omri)=Samaria, as if Ammon were a person. The ancestor of the tribe, however, is not said, in the Hebrew Genesis, to be Ammon, as the ancestor of the Moabites is styled Moab, but Ben-ammi (בן־עמי; Gen. 19 38 [J]). The name of the reputed ancestor is indeed given in Gen. 19 38 (BAL; with which Vg. agrees) as Ammon; ἐκάλεσεν τὸ ὄνομα αὐτοῦ Ἀμμάν, ὁ υἱὸς τοῦ γένους μου. The received Hebrew text, however, appears to regard the name of the father of the Ammonites as Ben-ammi ('son of my kinsman'), and it should be noted in this connection that 𝔊^BAL (not Vg.) of *v.* 37 inserts an etymology for Moab, viz. 'from my father.' The Yahwist's etymologies are, as they stand, examples of popular paronomasia. They may point the way, however, to more probable explanations, and we may safely regard both *ab* 'father' and *'am* ('uncle,' 'kinsman') as divine names:

Gesenius long ago compared the compound proper names Ammiel, Amminadab,[1] and J. Derenbourg in 1880 suggested (*REJ* 1 123) that Ammi may be a name of the local divinity of the Ammonites, comparing the Ammonitish royal name Amminadab (Del. *Par.* 294), which on the analogy of Kammuš-nadab=Chemosh-nadab, should contain a divine name. A comparison with the parallel names shows however that Ammi, if a divine name at all, was clearly known as such over a much wider area than the narrow territory of Ammon (cp NAMES, § 46;[2] AMMI, ii. § 2).

According to Judg. 11 13 22, the land 'from Arnon unto Jabbok and from the wilderness unto Jordan,' was

2. Land and People. originally occupied by the Ammonites, who were dispossessed by the Amorites under Sihon, some time before the Israelitish invasion. This evidence, however, is of doubtful value, since the section Judg. 11 12-29 is of uncertain origin, and may be no longer in its original form (see Bu. Comm. 81; and cp Bu. *Ri. Sa.* 125; Ki. *Gesch.* 2 80). At any rate, all that Nu. 21 24 (cp Judg. 11 21 *f.*) affirms is that the Israelites conquered the land of the Amorites 'from Arnon unto Jabbok, (that is) unto (the land of) the Ammonites,' and, as the same verse continues, 'the border of the Ammonites was Jazer' (so Ew., Di., Nöld. reading יַעְזֵר with 𝔊^BAFL instead of עַז)—*i.e.*, the frontier town of the Amorites towards Ammon was Jazer (see 71.32). According to this statement, the Ammonites occupied the east of the district now called Belḳā, a view which accords excellently with the easterly position of the ancient capital city Rabbah or Rabbath-Ammon, and is no doubt accurate for the period to which JE belongs.

Little is known of the social condition of this people; but there is nothing to suggest a high degree of civilisation. There were no doubt other 'cities' besides Rabbah (Judg. 11 33 2 S. 12 31); but they were too insignificant to be mentioned by name. Although the district of Rabbah (see RABBAH) was exceptionally well irrigated, the total area of tillage between the Israelite frontier and the arid steppes to the east was narrow. Some of the Ammonitish clans must have ranged over these steppes as nomads. Their population, too, must have been comparatively small. According to all analogies they would enter from time to time into loose and shifting alliances with the neighbouring tribes; so that their fighting strength would be subject to great and sudden fluctuations.

The real history of the Ammonites does not begin

3. Traditions. till the time of Saul, though we have one very interesting and probable tradition from the legendary period of the Judges (see below on Jephthah).

We do indeed hear, in a passage that sounds like history (Gen. 14 5), of a people, called Zuzim, whom Chedorlaomer 'smote in Ham' (בְּהָם)—a name which is most probably corrupt (see HAM, ii.), but which some regard as another form of Ammon; and it is tempting to identify the Zuzim with the Zamzummim whom, according to Deut. 2 20 *f.*, the Ammonites in early time; dispossessed. But what we hear of the Zamzummim has a family likeness to the legends of other aboriginal races which were expelled by more powerful invaders, and the author of Dt. 1-4 40 (D2) did not write till after 597 B.C. (Kue. *Hex.* 270). In his time there were various influences at work to hinder the accurate writing of history, and it is even doubtful whether we can safely accept what he tells us of the early

[1] See Barnes, *The Peshitta Text of Chronicles.*

[1] Cp also Nestle, *Eig.* 90, 187 (n.).
[2] For further evidence in favour of a Semitic god Ammu, Ammi, *see* Hommel's review of Meissner's 'Beitr. zum altbab. Privatrecht,' *ZDMG* 49 522 *ff.* ['95]; but cp Jensen's criticism (*ZA* 10 342 *f.* ['95]).

relations between the Israelites on the one hand and the Moabites and the Ammonites on the other (Dt. 29 19 37). All we can say is that the story in Gen. 19 36-38 (J) proves an early Israelitish sense of kinship (combined however with moral repugnance) to the Moabites and Ammonites, so that it is not in itself incredible that the Israelites should have refrained from attacking these two peoples. True, in Jos. 13 25 (P) we are told that 'half the land of the Ammonites' was assigned to the tribe of Gad; but the district intended here may be the Amoritish kingdom of Sihon, and so pre-suppose the view of history given in Judg. 11 13-22 (see above, § 2).

Dt. 23 4 [3] affirms that the Ammonites and Moabites hired Balaam to curse Israel, and did not supply Israel with provisions, as a punishment for which they are to be excluded from the Israelitish community to the tenth generation.

The spirit and purport of this passage, however, is at variance with that of Dt. 2 27, and the narrative of Balaam in Nu. 22-25 (mainly JE) speaks only of the Moabites. For several reasons it is very probable that Dt. 23 1-8 [2-9] (see BALAAM, § 7) is a record, not of the pre-exilic, but of the post-exilic period when 'the problem as to who should and who should not be admitted into the community was a burning question' (Ku. *Hex.* 265). At any rate the view which this passage presents of the Ammonites cannot be accepted.

It is of more historical interest that in Nu. 22 we have a combination of two distinct traditions (E and J) respecting the origin of Balaam, one of which represents him as an Ammonite (see BALAAM, § 1).

The settlement of Israelitish tribes in Gilead and Bashan (see MANASSEH) could not but excite the animosity of the neighbouring peoples. No doubt there was a chronic border-warfare sometimes developing into more serious hostilities, sometimes mitigated by truce, alliances, or the subjection of one or other of the combatants. In Judg. 10 6-12 7 we have an account of the deliverance of the Israelites of Gilead from Ammonitish oppressors by a recalled outlaw named Jephthah. The traditional stories have been much edited (see JUDGES, § 17) and tell us naturally more about Jephthah (who was one of the actors in a most moving tragedy) than about the Ammonites. We are upon safer ground in the story of Saul.

4. Saul and David.

The victory of this heroic chieftain over the Ammonitish king Nahash, who, encouraged by the weakness of cis-Jordanic Israel, had besieged Jabesh-gilead, and displayed his deep contempt for his foes, is doubtless historical (1 S. 11). It is also thoroughly credible that David, when out of favour with Saul, received friendly treatment from Nahash (so we must interpret 2 S. 10 2). Equally intelligible is it that a change ensued in the relations between David and the Ammonitish court when the former had taken up the work, interrupted by the death of Saul, of liberating and uniting the Israelitish tribes. Only we must not, it would seem, place the war with the Ammonites too late. The gross insult offered by Hanun, the son of Nahash, to the ambassadors of David implies that the power of the latter had not yet been so consolidated as to wipe out the recollection of the days of Israel's humiliation. The insult was bitterly avenged. Ammon and its allies were defeated, and the power of the former was, for the time, broken (see 2 S. 12 31).

It is noteworthy that Shobi, son of Nahash, of Rabbath-ammon, was friendly to David during Absalom's revolt (2 S. 17 27), that ZELEK, an Ammonite, was among David's 'thirty' (2 S. 23 37), and that Solomon had an Ammonitish wife (NAAMAH, 2) whom one account (see Klostermann) makes the grand-daughter of Nahash, and who became the mother of Rehoboam (1 K. 14 21; the details in 1 K. 11 1-8 are untrustworthy). See NAHASH, 3.

It is probable that the Ammonites recovered their independence after Solomon's death. Later, like the kings of N. Israel, they became tributaries of the Assyrians; this is expressly mentioned by Shalmaneser II., Tiglath-pileser III., Sennacherib, and Esarhaddon (Schr. *KGP* and *COT*). So far as our oldest evidence goes, they caused no serious trouble again to the Israelites till the time of Jeroboam II., when, as Amos tells us (Am. 1 13), they made incursions into Gilead, and displayed great

5. Assyrian Age.

inhumanity, which probably from their own point of view was but justifiable revenge. The Chronicler, indeed, relates victories over the Ammonites won by Jehoshaphat and Jotham (2 Ch. 20 27 5, cp 26 8); but these, according to Robertson Smith (*OTJC*(2) 146), are Midrash. From Jer. 49 1, we may infer that after the deportation of the trans-Jordanic Israelites in 734 the Ammonites occupied the land of Gad; and, even if Jer. 49 be post-exilic, the fact is too probable to be doubted. It is this outrage upon 'Yahwè's people' which seems to be alluded to in Zeph. 2 3-11 Jer. 9 26 [25] 25 21. Once again the vindictiveness of the Ammonites was manifested when, in the reign of Jehoiakim, they made incursions into Judah as the auxiliaries of Nebuchadrezzar (2 K. 24 2). This is probably referred to in Ezek. 21 28 *f.* [25 *f.*]. Later, however, the general fear of the Babylonian rule seems to have altered the policy of the Ammonites, for Jer. 27 3 brings before us the king of Ammon entering into a league against Babylon with Zedekiah and other princes. It is to this act of rebellion that Ezekiel refers (21 18-32 [13 *ff.*]) when he anticipates the punishment of the Ammonites, while in 25 1-7 he threatens the same people with destruction for their malicious demeanour at the captivity of the Jews. Did the Ammonites withdraw in time from the anti-Babylonian league? It is a very probable conjecture, and, strange as it may seem, Jewish fugitives are said to have sought refuge with Baalis, king of Ammon, who instigated them basely to assassinate the noble GEDALIAH, 1 (Jer. 40 14).

In later times we find an Ammonite[1] among the chief opponents of Nehemiah, and at the same time connected by marriage with distinguished Jews (Neh. 6 18 13 4; cp TOBIJAH, 4). Other Ammonitish women had married into Jewish families (Ezra 9 1 *f.*)—*i.e.*, according to Kosters, into families which had remained on Jewish soil and not been touched by the reforming spirit of Ezra (see EZRA, ii. § 12). This would be all the easier if we are right in inferring from Jos. 18 24 (*vv.* 12-28 belong to P) that in *post-exilic* times there was in Benjamin a place called 'Village of the Ammonites' (CHEPHAR-HAAMMONAI). It is to this period of mixed marriages that we should not improbably refer the composition of Dt. 23 1-8 (see above), in which passage are mentioned the same three peoples as in Ezra 9 2.[2]

6. Persian and Greek.

Nearly three hundred years later the Ammonites (Timotheus) are among the enemies defeated by Judas Maccabæus (1 Macc. 5 6-18); they are also mentioned in a psalm assigned by some to the same critical period (Ps. 83 7).[3] Up to this time, then, Ezekiel's threat (Ezek. 25) against the Ammonites as well as against the Moabites and (virtually) the Edomites that they should be dispossessed by the 'sons of the East' (*i.e.*, the Arabian nomads) had not been fulfilled so far as the Ammonites are concerned. Their fate, however, cannot have been very long delayed. In the fifth century B.C. we already find 'Arabians' among the enemies of Nehemiah (Neh. 2 19 4 7 [1]), and we can hardly doubt that by degrees the Ammonites, like the Moabites before them, had to amalgamate with the land-hungry intruders.

It is true, Justin Martyr, who died 166 A.D., states (cp *Tryph.* 119) that the Ammonites were still numerous in his time; but Josephus (*Ant.* i. 11 5) once says precisely the same thing of the Moabites, though elsewhere he speaks of the Moabites and Gileadites as Arabians (*Ant.* xiii. 9 1), which agrees with the statement of Origen (*in Jobum* 1 1) that the term Ammonites had become merged in that of Arabs. This makes it probable that the omission of 'Ammonites' in 1 Esd. 8 69 (= Ezra 9 1) was not accidental but deliberate.

The close connection of Ammon with Moab, and, in

1 See, however, BETH-HORON, 4.

2 Prof. Ryle (*Ezra and Neh.* 115) thinks that 'the mention of the Ammonite, Moabite, and Egyptian together, suggests the influence of Deut. 23 3-7 [4 *ff.*].' Guthe (*SBOT*) assigns the enumeration of the peoples to the Chronicler.

3 Cp also ACHIOR.

a less degree, with Israel, and the fact that the Moabites spoke a dialect of Hebrew (see HEBREW, § 6) renders it almost certain that the Ammonites also spoke the 'language of Canaan.' This view is confirmed by Ammonitish proper names', *e.g.*, Hanun, 2 S. 10 1 (חנון 'treated graciously'); Nahash, 1 S. 11 1 (נחש 'serpent'); Naamah, 1 K. 14 21 (נעמה 'pleasant'); and the royal names Amminadab (see above, § 1), Puduilu = Abdeel (Jer. 36 26), and Ba'sa = Baasha (Schr. *COT* 1 127).

7. Language.

Baethgen's argument (in his *Beiträge*) for the polytheism of the Ammonites is based partly on Judg. 10 6, partly on the analogy of Moabitish religion. The only extant Ammonitish proper name, however, which can be held to be compounded with a divine name other than that of the supreme God, is Baalis (see BAALIS). At any rate Milcom was as much the great national god of Ammon as Chemosh was of Moab (see MOLOCH); the strange slip by which Jephthah is made to speak of Chemosh as the god of Ammon suggests that 'Ammon' has been substituted by an editor for 'Moab' in the passage (Judg. 11 12-28) in which it occurs. In 2 S. 12 30 where Milcom (*q.v.*) should be read instead of *malkām* 'their king,' reference seems to be made to a huge statue of Milcom in the capital city. The statement that Solomon became a worshipper of Milcom in his old age rests on no good authority (see SOLOMON). When we pass to later times, it is tempting to infer with We. (*IJG* (2) 156, n. 1) from the name of Nehemiah's Ammonitish enemy that the worship of Yahwè had begun to attract the Ammonites. The dissolution of the old national bonds may have favoured the growth of a monotheistic tendency. T.K.C. (W.H.B.)

8. Religion.

AMMONITES (עַמּוֹנִים), 2 Ch. 20 1, RV^mg. MEUNIM (*q.v.*, [*c*]).

AMMONITESS (עַמֹּנִית), 1 K. 14 21 31 2 Ch. 12 13 24 26. See AMMON.

AMNON (אַמְנוֹן, in 2 S. 13 20† אֲמִינוֹן, *i.e.*, 'safe'?, by some regarded as a diminutive used in a contemptuous sense [cp Dr. *TBS*, *ad loc.* Wr. *Ar. Gram.* (2) I. § 269; Ges. *Heb. Gram.* [ET '98] *250*, n. 1]; We. [*IJG* (2) 24, n. 2] explains as אִמִּינוֹן, 'my mother is the serpent,' see NUN; ΑΜΝΩΝ [BAL], ΑΜΜΩΝ [A, 2 S. 13 1-6 10*a*]).

1. David's eldest son (see DAVID, § 11 iii. *d*), slain by Absalom in revenge for his outrage on Tamar (2 S. 3 2 13 1 *ff.*; 1 Ch. 3 1†).

2. In genealogy of JUDAH (1 Ch. 4 20†).

AMOK (עָמוֹק, 'deep, inscrutable'), post-exilic priestly family; Neh. 12 7 20 (om. Bℵ*A; ΑΜΟΥΚ [L and, in *v.* 7, ℵ^c.a mg. sup. in *v.* 20 ℵ^c.a mg. inf. ΑΜΟΥ]). See EZRA, *a*, § 66, § 11.

AMOMUM (ΑΜΩΜΟΝ [Ti. WH following ℵ*AC]), an unidentified aromatic substance, mentioned only in RV mg., Rev. 18 13 (RV Spice, AV om. with Bℵ^c; Wyclif, however, gives 'amome'). The classical 'amomum' (= 'blameless'?) was a shrub of Eastern origin ('Assyriuni vulgo nascetur amomum,' Verg. *Ecl.* 4 25), from which were made oil for funeral rites and unguents for the hair. As, however, it is used also of any odour pure and sweet (Salm. *nd Solin* 284), its identification is uncertain. It may possibly be the vine *Cissus vitigena* (Linn.), a native of Armenia. The modern term is applied to a genus of aromatic plants (N.O. Zingibraceæ), including the cardamon and seeds of Paradise.

AMON (אָמוֹן), Jer. **46 25** RV. See NO-AMON.

AMON (אָמוֹן, אָמֹן, § 67; 'firm'? 'workmaster'? but see below). 1. (*αμως* [BA], *-ων* [L]; ܐܡܘܢ.) Fairly well attested as the name of the son of king Manasseh himself also king of Judah; 2 K. 21 18-26 (*αμμων* [A]) 2 Ch. **33** 14 (*αμνων* [B*A*, see Swete]), 2 Ch. 33 20-25. After a reign of 'two years' (*circa* 638 B.C.; see CHRONOLOGY, § 36) he was assassinated by certain of his courtiers (see Kittel, *Hist.* 2 378). The event produced a profound sensation. Amon, though disliked by religious reformers, was a favourite with the people, who avenged his death. If his name is derived from the Egyptian (Theban) sun-god, it is an interesting proof of the fluctuations of political party (Egyptian and Assyrian) in the reign of Manasseh (cp ISRAEL, § 36).

2. (*σεμμηρ* [AL]) less certainly, the name of a governor of Samaria under Ahab; 1 K. 22 26 (*Σεμηρ* [B], *Αμμων* [A]) = 2 Ch. 18 25 (*Εμηρ* [B]). 𝔊 pleads strongly against the correctness of the form Amon. Semer or Semmer, indeed, can hardly be correct but Emer or Emmer is the 𝔊 form for the Immer of MT in Jer. 20 1 and elsewhere (see IMMER), and out of this form both Amon and Semer (שֶׁמֶר) can easily have arisen as misreadings. See Sta. *ZATW* 5 173-175 ['85].

3. (*αμεει* [L].) The b'ne Amon (so MT), a group of Solomon's servants' (see NETHINIM) in the great post-exilic list (see EZRA, ii. § 9); Neh. 7 59 (*ημειμ* [BℵA]) = Ezra 2 57 AMI (אָמִי; cp 𝔊^L everywhere; *ημει* [BA]) = 1 Esd. 5 34 ALLOM, RV ALLON (*αλλων* [B], *αδλ.* [A], *i.e.*, ΛΛ and ΔΛ for M).

T. K. C.

AMORITES (אֱמֹרִי, collective, and always with article, except Nu. 21 29 Ezek. 16 4 5; ΑΜΟΡΡΑΙΟΙ [BAL]).

Other 𝔊 readings are:—*αμμορρεοι* [Is. 17 9 ℵ], *αμαρραιοι* [Dt. 4 F, 2 K. 21 11 A, 1 Ch. 1 74 L], *αμορρει* [Judg. 10 8 B], *αμορις* Gen. 14 13 A], *αμορ[ε]ι* [Ezra 9 1 BA], *αμμοραιος* [1 K. 7 14 A], *Amoritæ*).

In the List of Peoples 'the Amorite' appears among sons 'begotten' by Canaan (Gen. 10 16 J = 1 Ch. 1 14).

The term is used: (1) of a pre-Israelitish people living E. of the Jordan, Nu. 21 13 21 25 Josh. 24 8 (all E), also Josh. 2 10 9 10 (JE), Dt. 1 4 3 2 8 9 Judg. 10 8 11 1 K. 4 19 (𝔊^BL om.), Ps. 135 11 136 19, and elsewhere, (2) of a people on the W. of Jordan, Josh. 10 5 *f.* 24 12 15 18 (all E), also Josh. 7 7 (JE), 5 1 10 12 (both D), Judg. 1 34-36 6 10; 1 K. 21 26, 2 K. 21 11, 1 S. 7 14, 2 S. 21 2; (3) of a southern people, Dt. 1 7-44, cp Gen. 14 7; (4) of the ancient population of Canaan in general, Gen. 15 16 (J or R), 48 22 (E), Am. 2 9 *f.*, and Is. 17 9 (Lag. WRS Che. following 𝔊^BℵAQΓ) with the Hivites.

The Amorites are mentioned also in the lists of Canaanitish peoples subjugated by the Israelites (Gen. 15 21 Ex. 3 8 and elsewhere). The lists commonly include the Canaanites, Girgashites, Hittites, Hivites, Jebusites, and Perizzites, and once, in Gen. 15 19-21, the Kenites, Kenizzites, Kadmonites, and Rephaim, for which reference must be made to the separate articles. On the variation in the order of these enumerations, which are obviously 'rhetorical rather than geographical or historical,' cp Dr. *Deut.* 96 *ff.*

The passage in Amos (2 9*b*) is remarkable, because Amorite is used, precisely as by the Elohist (E), as a general term for the primitive population of Canaan, and because the Amorites, as an extinct race, are invested with a half-mythical character (like the Anakim).

Wellhausen (*CH* 341 *f.*) regards the designation 'Amorites' as substantially synonymous with that of Canaanites, though not quite so comprehensive. According to this view, the Canaanites, in the time of the biblical narrators, are still living in the land (*i.e.*, in the cities of the plain which were not occupied by the Israelites). The Amorites, on the other hand, are thought of as the old inhabitants of the hill-country E. and W. of the Jordan, now inhabited by the Israelites. Thus the Amorites belonged exclusively to the past; they had their day and ceased to be (Gen. 15). This explains how it is that, although under ordinary peaceful circumstances the Canaanites are spoken of as the old inhabitants of the land, whenever mention is made of war and conquest, the Amorites at once take their place (Gen. 48 22). So Moses' adversaries, Sihon and Og, are kings of the 'Amorites'; and, similarly, it is with the twelve kings of the Amorites that Joshua has to deal W. of the Jordan. Winckler however (*GI* 1 52 *ff.*) disputes the synonymity of the terms 'Canaanites' and 'Amorites' on the ground that, as the Amarna letters show, the coast-land as far N. as Sidon or even farther, was called Kinaḫi (= Canaan), and that

the Amorite population had its seat in the interior. He explains the distinction in the nomenclatures from the different local origin of the two writers (an Ephraimite and a Judahite respectively). On the extra-biblical facts, and on the inferences to be drawn, see CANAAN, §§ 3-9 and cp PHŒNICIA.

AMOS (עָמוֹס, § 56, 'borne [by God]'; cp AMASIAH, Ar. *'Omeis*, Phœn. אשמנעמס; ΑΜΩϹ [BAQ]).

1. Prophetic activity. Amos is the earliest of the prophets of whose discourses and predictions we possess written records with an accompanying statement of their authorship. Of the external facts of his life we should know little but for the narrative digression in 7 10-17, which interrupts the series of prophetic visions on the fall of Israel. From a statement there assigned to Amaziah, 'the land is not able to bear all his words,' we may reasonably infer that Amos's ministry in the northern kingdom had lasted for some time, when it was brought to an abrupt close by an act worthy of the heroic Elijah. Amos, it appears, came forward at length in a place where success was more difficult than anywhere else, and uttered a prophecy to this effect—'Jeroboam shall die by the sword, and Israel shall be carried away from its land.' It was in Bethel, the seat of the royal temple corresponding to that of Jerusalem in the south, and probably at some great festival, that Amos said this; and the priesthood, faithful to its royal head, took the alarm. Not so much because the prophet had threatened the reigning dynasty (for he had not done so in the interests of any upstart noble) as because he had begun to weaken the moral courage of the Israelitish people (Jer. 38 4). With the half-contemptuous speech, 'Carry thy prophecies to those in the neighbouring country who may think them worth paying for,' Amaziah, the head priest of Bethel, by the royal authority, bade Amos fly from the land of Israel. Amos would not retire without a parting testimony. These are his significant words: 'No prophet, no member of a guild of prophets, am I'; that is, I am no ecstatic enthusiast, like the prophets of Bethel, whose prophesying is a trade, and whose oracles are mere heathenish divination (cp Mic. 3 11). 'But a sheep-breeder am I,'[1] he continues, 'and one who tends sycomore figs' (see SHEEP, SYCOMORE): that is, I am above the sordid temptation to take fees. 'Yahwè took me from following the flock; Yahwè said unto me, Go, prophesy unto my people Israel.' That is, My prophesying has an immediate practical object which concerns the whole nation, and it is due to a moral impulse which has come straight from Israel's God. Then, in answer to the command, Prophesy not against Israel, Amos repeats his message with a startling personal application (cp Is. 22 17 f.).

Such was Amos—a strange phenomenon to the head priest of Bethel, as representing an entirely new type of prophecy.

2. Home. Whence then did this prophet come? Was he a native of Israel or a 'sojourner' from Judah? The heading of the book (on the origin of which see below, § 4) at first sight appears to be decisive in favour of the latter view. Budde has made it probable[2] that we should render 'Amos, who had been among the sheep-breeders, (a man) of Tekoa.' In any case, Amos is represented as a Tekoite. Now, there is no trace in ancient or in modern nomenclature of more than one TEKOA (*q.v.*). That Amos belonged to the southern kingdom has, nevertheless, been doubted,[3] on the twofold ground (1) that the interest of Amos is absorbed by (northern) Israel, and (2) that Tekoa lies too high for sycomores to be grown there. As to the first point, Amos, though deeply interested in Israel, is not, like the native Israelitish prophet Hosea, a sympathetic observer of the life and manners of the north. The inner impulse from above sending him to Israel is psychologically accounted for by the vastly greater importance of Israel as compared with Judah in religion, in politics, and, we may add, in literature. As to the second, Amos may very well have possessed a plantation of sycomores in some low-lying district in the Shephēlah or in the Jordan valley (see SYCOMORE). We may accept it, then, as a fact, that Amos was a Judahite, and sprang from a place famous in the time of David for the quick wits of its inhabitants (2 S. 14 2).

3. Preparation. The situation, too, of Tekoa, was well fitted to develop the future prophet's capacities. From the extensive view which his own hill commanded, he would gain, at any rate, a sense of natural grandeur, though we must not infer from this that he was capable as a Tekoite of writing Am. 4 13 and the parallel passages.[1] Not far off, he would meet with the caravans of the Dedanites (Is. 21 13) and other Arabian peoples, and would imbibe from them a longing to see other men and manners. Possibly, too, such an idiom as עִם שְׁבִי סוּסֵיכֶם (4 10) may be explained from Arabian influence (so We.).[2] Whatever the social position of Amos may have been, he was not tied to the soil, and may, before his journey to Samaria, have wandered, either on business or from curiosity, far away from home, and have seen and heard much of which his neighbours were ignorant. To suppose this is not to deny that even the stayer at home had opportunities of hearing news,[3] but to try to understand the alertness of Amos's intellect, the width of his knowledge, and the striking culture and refinement of his style. At any rate, it is plain that he studied thoroughly, on the spot, the condition of life and thought in the northern kingdom, and we must regret that we have no further contemporary traditions respecting him, than that contained in 7 10-17. One very singular tradition, indeed, we have, which appears to be a very late distortion of his story. It is the story (1 K. 13) of the man of God from Judah, who went to Bethel in the reign of Jeroboam I. and threatened the altar there with destruction by an earthquake[4] (cp Am. 3 14 7 9 9 1). Though this teaches us much concerning a late view of prophecy, however, it affords no fresh glimpse of Amos.

A post-exilic editor says (Am. 1 1) that Amos prophesied during the contemporary reigns of Uzziah of Judah, and Jeroboam II. of Israel.

4. Notes of date. Of Uzziah there is no express mention in the book; but the description of the careless ease of Jerusalem in 6 1*a* accords with the circumstances of his reign; to Jeroboam II. the prophet refers in 7 9, and his biographer in 7 10 *f.* The heading also states that the prophecy as a whole was delivered (*i.e.*, in its original form) 'two years before the earthquake.' Unfortunately, our only other authority for this earthquake[5] in Uzziah's reign is about as late as this note (Zech. 14 4). It is no doubt plausible to defend its historical character by referring to 4 11 ('I wrought an overthrow among you'), and by our prophet's vivid idea of earthquakes as one of God's means of punishment (8 8; cp Is. 2 19 21). Am. 8 8, however, is certainly an interpolation, and it is not impossible that the rather too precise

[1] Read נֹקֵד with Oort, We. (𝔊BAQ, αἰπόλος); cp 1 1. Mesha is also called נֹקֵד (2 K. 3 4). The word refers to a breed of stunted sheep, valued for their fine wool (see SHEEP).

[2] Kohut *Semitic Studies* 20 106 *ff.*

[3] According to Oort, Amos was an Israelite who cultivated sycamores in his own country, but after his expulsion dwelt among the shepherds of Tekoa (*Th. T* 25 121, etc. ['91]). Grätz (and so formerly Oort), following Ḳimḥi, supposes a second Tekoa in the north.

[1] G. A. Smith (*HG* 315) has given eloquent expression to this view. In *Twelve Prophets*, however, he admits the late origin of the passages.

[2] On the intellectual opportunities of Tekoa see Stickel (*Hiob* 269-276), who makes Job to have been written in this district.

[3] Robertson *Early Religion of Israel* 510.

[4] Klo. *Sam. u. Kön.* 349 and cp KINGS, § 8, note.

[5] Jos. (*Ant.* ix. 10 4) gives a long fabulous story about it.

statement in 1 1 is merely an exegetical inference from 7 36 (cp 7 8 8 2), which seemed to the editor to imply that Israel's punishment had been twice postponed, and that each postponement meant a year's grace (so G. Hoffmann; cp CHRONOLOGY, § 3). It is remarkable that the author of the heading, if he had access to tradition, did not rather refer to the solar eclipse prophesied in 8 9 (in its present form). This seems to be the eclipse which an Assyrian list of eponyms assigns to the month Sivan 763 B.C.[1] It is less important that, according to the same list, pestilences ravaged Assyria in 765 (the year of a campaign in the land of Hadrach, near Damascus and Hamath) and in 759. Pestilence in the land of Israel is indeed mentioned in Am. 4 10; but it is described as 'after the manner of Egypt.' The Egyptian Delta was of course not the only source of pestilences: the Assyrian plague may have germinated elsewhere.

5. Circumstances.

Still, it remains true that the period indicated by these last dates sufficiently accords with hints dropped in the Book of Amos. For example, the Israelites, according to Amos, have no apprehension of a speedy attack from Assyria. The circumstances of the period just mentioned enable us fully to account for this. Shalmaneser III. (783-773) had too much trouble with the land of Urarṭu (see ARARAT, § 2, ASSYRIA, § 32), and his successor Ašur-dân III. (772-755) had too many revolts at home to put down, to be dangerous to the kingdom of Israel. Assyria being thus occupied, it was easy for Jeroboam II. to recover from Damascus (repeatedly humiliated of late by Assyria) the districts which Hazael had taken from Israel. Hence, when Amos wrote, the extent of the Israelitish dominion was 'from the point where the Hamathite territory begins (מִלְּבוֹא חֲמָת) to the torrent of the Arābah,' a definition which is presumably equivalent to that in 2 K. 14 25, which gives 'the *sea* of the Arābah'—*i.e.*, the Dead Sea. The prophet's hearers delighted to sun themselves in this new prosperity, and boasted of the capture of LODEBAR and KARNAIM in Gilead as a great military feat (see LODEBAR, and We. on Am. 6 13). True, melancholy thoughts of the past would sometimes intrude—thoughts of the recent terrible earthquake, of the famines and pestilences, of the friends and neighbours lost in battle, and of the revolting cruelties of the Syrians and their Ammonitish allies in Gilead (1 3 13 4 6-11). Nor is it arbitrary to connect the splendour and fulness of Israelitish ritual in the prophet's time with the popular anxiety lest Yahwè should renew the troubles of the past. On the whole, however, the tone of Israelitish society is joyous and optimistic. As in Isaiah's earliest discourses, the upper classes appear as self-indulgent and luxurious, and, as in Isaiah, the women come in for a share of the blame (4 1; cp Is. 3 16). Not only the king (1 K. 22 39) but also the nobles have houses inlaid with ivory (3 15 cp 6 4*a*). Feasting is habitual (6 4-6), and the new custom of half-reclining on the divan[2] has been introduced at Samaria (3 12*b*). The good old sentiment of brotherliness is dying away; oppression and injustice are rampant (2 6-8 3 9 end, 10 4 1 5 11 *f.* 8 4-6). This indicates that great economic changes are going on (Isaiah makes the same complaint, Is. 5). Side by side with this we notice a keen interest in the ritual side of religion (4 4 *f.* 5 21-23 8 14 9 1). Jubilant worshippers sing the praises of the incomparable 'God of Jeshurun' (5 23; cp Deut. 33 26), and, as they think of his deliverances in the past, they even 'desire the battle day of Yahwè' (5 18). Amos, a stranger, alone sees below the surface of things. He does not, indeed, once name Assyria,[3] and seems to have no clear idea of the geography of the region 'beyond Damascus'; but every one knows what he means when he warns his hearers that Yahwè 'will raise up against them a nation' (6 14; cp Is. 5 26, where read לְגוֹי), and 'will carry them into captivity beyond Damascus' (5 27). On the whole, we may probably date the original prophecies of Amos between 765 and 750 B.C.[1]

There are only two passages which may be regarded as inconsistent with this date, as referring to later events.

6. Objections to 765-750 B.C.

(*a*) In 1 5[2] it is predicted that 'the people of Aram shall go into captivity unto Kir,' which was fulfilled, according to 2 K. 16 9, on the capture of Damascus by Tiglath-Pileser III. in 732. The prediction, however, was not meant to be taken so literally. 'Unto Kir' is evidently suggested by the tradition (9 7) that the Aramaeans came from Kir; the prophet cannot mean to lay stress upon such points as the locality of a captivity;[3] otherwise, why does he describe the scene of Israel's captivity so vaguely? The 'fulfilment' in 2 K. 16 9 is obviously due to interpolation; the later view of prophecy differed from that held by the great prophets themselves. (*b*) The other passage is 6 2, which, as emended by Geiger[4] (to make sense), reads thus, 'Pass ye to Calneh, and look; and go thence to Great Hamath, and go down to Philistian Gath; are ye better than these kingdoms, or is your region greater than theirs?' These places, says the writer, have already succumbed to the common enemy: how can Israel hope to escape? Calneh (not the Calneh of Gen. 10 10, but the N. Syrian city Kullani) was conquered by Tiglath-pileser III. in 738, Hamath by Sargon in 720, and Gath by the same king in 711;[5] and the passage breaks the connection between 6 1 and 3, and is not in the rhythm which is so closely adhered to in 6 1 3-7. The verse must, therefore, be a later insertion, by a scribe or editor who had read Is. 10 9 (Calno = Calneh), and is properly a marginal gloss on the words, 'Woe *to* them that are at ease in Zion' (6 1). Observe that Great Hamath (H. Rabba) contrasts with the simple Hamath of *v.* 14.

A strict analysis is indispensable, both for a sound view of the origin of this book, and for a due comprehension of the great prophet himself.

7. Analysis of Book.

We must, therefore, test the common assertion that the book possesses such a true literary unity as Amos, when in retirement, might naturally wish to give to his remembered prophecies. So much, at any rate, is clear, that, as it now stands, the book has three well-marked divisions. (1) Chaps. 1 2-2 16 present a series of judgments on the peoples of Syria and Palestine, each framed on the same plan, and coupling the description of an unpardonable moral fault with the declaration of punishment. The most detailed of the accusations is that brought against Israel, which forms a striking culmination of the series. The vaguest and least impressive is Judah's, which comes next before Israel's, and somewhat spoils its effect. (2) Chaps. 3-6 seem at first sight to contain three discourses, each introduced by 'Hear ye this word' and closing with a prediction of national ruin. Upon a closer examination, however, none of the 'discourses'

[1] See Schr. *COT* 2 193; Sayce, *TSBA* 3 149; Schr. *KGF* 338 *f.*, and cp CHRONOLOGY, § 24.
[2] In 3 12 render 'that sit in Samaria in the corner of a couch, and on the cushion of a divan' (for דמשק read מִשְׁכָּב, an obvious correction, which We. has somehow not made). See *JQR* 10 572.
[3] According to 𝔊BAQ, however, there is once an express mention of Assyria (3 9, אשור=אשר, for אשדד, Ashdod).

[1] The reason offered for a later date (745-744) by Zeydner and Valeton (in Wildeboer *Einl.* 110) is insufficient. Any observer who was not blinded by a fanatical religious belief could see that the inactivity of Assyria was only temporary, not to mention that the year 765 saw the Assyrians on the northern border of Palestine. Besides, the events which accompanied the accession of Tiglath-pileser III. in 745 were of too exciting a nature not to have suggested to Amos a fuller and more precise threatening than we find in his prophecies.
[2] On the former part of this verse see BETH-EDEN and AVEN, 3.
[3] On 𝔊's readings see KIR.
[4] *Urschrift* 96 *f.* Torrey's hesitation to remove *v.* 2 from the context which it distorts (*JBL*, 1894, p. 62 *f.*) seems very needless.
[5] Schr.'s view of Calneh (*COT* 2 143 *f.*; *HWB* 1 254) seems untenable (see CALNEH).

proves to have more than a semblance of unity. The section may be analysed into ten loosely connected passages—3 1 *f.* 3 3-8 3 9-15 4 1-3 4 4 *f.* 4 6-13 5 1-17[1] 5 18-27 6 1-7 6 8-14. (3) Chaps. 7-9. This is a series of five visions, interrupted, first by a short biographical elucidation of the third vision (7 10-15), and then by a threatening address (8 4-14), and followed by an evidently composite discourse, closing with most unexpected promises of the regeneration of Judah.

Now, if this summary is correct, it becomes impossible to maintain the true literary unity of the book. More than one editor must have been concerned in its arrangement, and the latest editor has had considerable difficulty in so disposing his material as to produce three portions, each one of a reasonable length. Considering that the book of the Twelve Minor Prophets comes to us from the post-exilic age (see CANON, § 39), and that the primary object of the later editors was not critical accuracy but edification, we are bound to look out very sharply for post-exilic insertions.

8. Post-exilic insertions: chap. 1 2.

Such an insertion we find at the very outset. The opening verse (1 2) has been often viewed as the text of the following discourse; but it seems very ill-adapted for that purpose, for the object of the discourse is not to exhibit the connection between Yahwk and a privileged sanctuary, but to show that even Israel (which has so many altars of Yahwè, 28) shall be punished like the other nations. Nor is the elegiac tone of 1 2*b* at all in harmony with the cycle of stern declarations which follows. The truth is that 1 2*a* is borrowed from Joel 3 [4] 16*a*, where alone the words suit the context, and 1 2*b* has a close phraseological affinity to Joel and other late writings.[2] It is no argument to the contrary that in 3 8 Yahwk is said to 'roar' and that the phrase 'the top of Carmel' is used by Amos in 9 3 : the editor had naturally made some slight study of the language of Amos. The reason of the insertion will be clear if we compare (a) 1 9 *f.* with Joel 3 2-6, (*b*) 1 11 *f.* with Joel 3 19, and (c) 9 13 with Joel 3[4] 18. These passages can all be shown to be late insertions, and 1 2 can he understood only in connection with them.

First, as to (*a*) and (6) it will be noticed that 1 9 *f.* differs from 1 6 *f.* only in the substitution of 'Tyre' for 'Gaza' and in the addition of the words,' 'and remembered not the covenant of brethren.'

9. chap. 1 9 *f.* 11 *f.*

(Even if, with Winckler, we correct צר in *v.* 9 *f.* into מצר—*i.e.*, the N. Arabian Muṣri [see MIZRAIM],—part of the following argument is still applicable.) It seems incredible that Amos should have condescended to repeat himself in this way, and doubtful whether the early Israelitish prophets knew anything about such an act as is imputed to Tyre in 1 9. And what can be the meaning of 'the covenant of brethren' in Amos's mouth? Many critics, indeed, have found in the phrase an allusion to the alliance between Solomon and Hiram (RV mg. refers to 1 K. 5 1 9 11-14); but this was a purely personal connection, and lay far back in the past. We might also think of the covenant between the kings of Israel and Tyre presupposed in 1 K. 16 31 *f.*; but would the Elijah-like prophet Amos have been the man to recognise this? Moreover, this was a personal or family covenant, whereas the charge against Edom in 1 11, that he 'pursued his brother with the sword,' presupposes a true national covenant resting on kinship (cp Mal. 1 2).

[1] Observe that between Am. 5 15 and 16 something analogous to *vv.* 7 10 must have fallen out (*vv.* 8 9 are an interpolation). *Vv.* 14-17 should correspond to *w.* 4-7 10-13.

[2] אָבַל metaphorically, as Joel 1 10; נְאוֹת, as Joel 1 19 *f.* 2 22 יָבֵשׁ as Joel 1 12. Cp also 1 2*b* as a whole with Jer. 9 [10] 9 23 10 25 37; Is. 33 9; Nah. 1 4 (all post-exilic passages except the first). See Che. Introd. to WRS's *Pr. Isr.* xv. *f.* [Volz. has lately expressed the same view (*Die vorexil. Jahveprofetie* p. 19 *f.*), which Nowack (*Kl. Proph.*, *ad loc.*) does not refute.]

This view is confirmed by Obad. 12, where 'in the day of thy brother' implies the same charge that is brought against Edom in the words quoted from Am. 1 11. Thus, the fault imputed to Tyre is that it co-operated with Edom in the time of Israel's distress, by making raids into Israelitish territory and selling captive Israelites to their unnatural 'brethren.' Was there ever such a time of distress for Israel between the age of David and that of Amos? It is, of course, the history of Judah, not that of N. Israel, that we have to search, for the claim to the overlordship of Edom was maintained by the Davidic family. The answer depends primarily on the results of our criticism of Chronicles. If we can regard the Chronicler as an only slightly prejudiced recorder of old traditions, we may believe that the Philistines and Arabians broke into and plundered Jerusalem (2 Ch. 21 16 *f.*), and conjecture that Tyrian slave-merchants drew their profit from the circumstances. Further, if, some time before that, the Edomites revolted from Judah and defeated King Joram (this, happily, is a fact attested not only in 2 Ch. but also in 2 K. 8 20-22), it is easily conceivable that Edomitish passion vented itself in a great slaughter of fugitive Israelites. Is it worth while, however, to defend the integrity of Am. 1 and the accuracy of the Chronicler by such a lavish use of conjectures? A prophet such as Amos was could not have fastened on such an offence of the Edomites to the exclusion of the cruel treatment of Edomites by Judahites referred to in 2 K. 14 7 (cp 2 Ch. 25 12), and we ought not to imagine a case of special barbarity in the ninth century when there is a well attested one in the sixth. It was, in fact, at the fall of Jerusalem in 586 that the Edomites, who had no such stern moralists as Amos and Isaiah to reprove them, filled up the measure of their revenge, to the indignation of Jewish writers, who forgot the cruelties of their own ancestors. Hence, to explain Am. 1 11-12 aright, we must refer to Ezek. 25 12 35 5 Is. 34 Obad. 10-14 Ps. 137 7, together with Joel 3[4] 19; and, to understand 1 9 *f.*, we must compare (besides the passages just mentioned) the description of the offence of Tyre in Joel 3(4) 2-6 (subsidiary evidence for the late date of Am. 1 11 *f.* is given below).[1] If it be asked, when these judgments on Tyre and Edom were inserted, the answer is, during (or much more probably after) the Exile, at a time when some fresh insult on the part of the Edomites reminded Jewish writers of earlier and deeper injuries (see ISAIAH, ii. § 14).

Next as to (*c*). Plainly, Joel 3(4) 18*a* is the original of Am. 9 13*b*. The opposite view would be inconsistent with the fact that Am. 9 13*a* is dependent on the late passage Lev. 26 5*a* (see LEVITICUS).

10. chap. 9 8-15.

Am. 9 13, however, is not a later insertion in the section in which it occurs. From 9 11 (or rather from 9 8) onwards, we are struck by affinities in expression of idea to works of the Babylonian and Persian periods, and by corresponding divergences from the style and thought of Amos.[2] That v. 7 cannot have been the conclusion of the prophecy is certain; but we have to regard *vv.* 8-15 as a post-exilic substitute for the original close. The editor cannot endure the idea of the final destruction of the whole house of Israel, and so he makes Amos declare in a strangely softened mood that only the 'sinful kingdom' (*i.e.*, that of Ephraim) will be wiped out, whereas the less guilty Judahites will

[1] Notice (1) the vague description of the offence of Edom. Does it consist in the purchase of Israelitish slaves from the Tyrian slave-merchants? or in the slaughter of Israelitish fugitives? or, more probably, did Edom prove that 'he kept his wrath for ever' in both these ways? (2) The mention of 'Teman' and 'Bozrah,' which names seem first to occur in Jer. 49 7 13. Cp the threat in 1 12 with that in Obad. 9.

[2] For the evidence, which is singularly strong, see Cheyne, 'Notes on the Prophets,' *Expositor*, Jan. 1897, pp. 44-47. On Am. 9 8-15 see also Preuschen, *ZATW* 15 24-27 ('95); Torrey, 'Notes on Am. 2 7 etc.,' *JBL* 16 8-172 ('96); Driver, *Joel and Amos* 120 *ff.*, who vainly endeavours to diminish the force of the arguments.

suffer the milder doom of dispersion among the nations. Even this will be only for a time. Israel shall return, the old Davidic kingdom shall be restored, and the sweet commonplaces of prophetic idylls shall be fulfilled.

Now, can we not see the reason of the insertion of the opening verse or prologue? It was to assure the post-exilic readers of Amos that the threats of the prophet had long since been fulfilled, and that restored Zion should be safe under the care of its lion-like divine protector. In other words, Amos was to be read in the light of the concluding portion of Joel. The insertion of the epilogue (9 8-15), in which we ought to note the reference to Edom (cp Joel 3 19), has a similar reason.[1]

Here, then, are already four certain post-exilic insertions. The companion passages now to be enumerated are equally noteworthy. No satisfactory picture of the prophet Amos is possible till we have recognised them.

11. chap. 2 4 f. First, Am. 2 4b is too deficient in concreteness to be the work of Amos, and is, on phraseological grounds, late.[2] If so, the *whole* of the judgment upon Judah also must be late. This is every way a gain. In particular, we can now see better how thoroughly Amos was absorbed in his mission to N. Israel. He cannot perhaps forget Judah; but his native country is only a fragment: the national pulse beats most vigorously in Ephraim (cp Is. 9 8 f. [7 f.]). The post-exilic editor, however, felt the need of a distinct reference to the sin and punishment of Judah, which he meant to be taken in combination with the encouraging statements of 1 2 and 9 11-15.

12. 4 13 b 13, 5 8 f. 9 5 f. It was a different feeling which prompted the insertion of 4 13 (with which 4 12b is connected) 5 8 f. 9 5 f. The conception of God had become deeper and fuller: the germs long ago deposited by the preaching of Amos and Isaiah had, through a widened experience, developed into the rich theology of II. Isaiah and the Book of Job. Not only by the wonders of history but also by those of nature was the sole divinity of Yahwè proved, and an ordinary reader of Amos inserted these doxologies (as we may call them) to relieve the gloom of the prophetic pictures.[3] Another such insertion was made (according to the text used by 𝔊) in Hos. 13 4.

13. chaps. 5 26 6 2. We now pass on to Am. 5 26. The construction and rendering of this passage have been much disputed. On the assumption that Am. 5 25-27 was all written by Amos, it is perhaps easiest (see Driver) to render ונשאתם, 'So ye shall take up . . . (Saccuth your king and Kaiwan your god, which ye made for yourselves),' והגלתי, 'and I will carry (you) into exile.'[4] But how unnatural this is! Nowhere else does the prophet mention an inclination of the Israelites to the worship of Assyrian gods, and the carrying of Assyrian gods by Israelites into Assyria is a very strange feature in a threat. Hence the whole verse is more than probably a later insertion, which took the place of a passage that had become illegible. The case of Is. 10 4a seems exactly parallel (see *SBOT*, *ad loc.*). Whether or no Succoth-benoth, the name of a god in 2 K. 17 30, contains the divine name Saccuth,[1] we may suppose that the writer of the inserted passage merely antedates a worship introduced into Samaria by the Babylonian colonists after 722 B.C. The awkwardness of the connection need not surprise us (this against König, *Synt.* § 368 b); the ו in ונשאתם is simply the *Waw explicativum* so often prefixed to glosses. Render, 'That is, ye carried in procession'; cp Is. 45 20. See CHIUN AND SUCCOTH.

14. chaps. 3 14b 5 13-15 6 2 9 8 8 11 f. Am. 6 2, another insertion, has been treated of already (see § 6 [b]). We pass on to 8 8 11 f. Verse 8 is not at all suitable as a description of the threatened punishment (see We., Nowack). The comparison with the Nile recurs in an interpolated verse (9 5). Passing on, we note that *v.* 13 speaks of literal thirst (suggested by the mention of the festivals in *v.* 10); but in *v.* 11 the hunger and thirst are metaphorical. Verses 9 f. 13 f. announce a sudden catastrophe; but in *v.* 11 f. a lengthened time of misery is described. The passage is clearly late, and is parallel to Is. 8 20 f. (partly late). The silence of prophecy is spoken of as a sore trial in Ps. 74 9. Other probable late insertions are 3 14 b 5 13-15 (cp Mic. 7 6), and the expression כדויד in 6 5 (see DAVID, § 13); and 6 9 f. is at any rate misplaced. To these it is plausible to add the reference to 'those who are at ease in Zion' in 6 1 (but it may be better to correct ציון into ann; so Che. *JQR* 10 573); also 3 7, which, as Duhm points out, may be a gloss on *v.* 8; certainly it interrupts a noble passage (*v.* 8 for יִנָּבֵא read יֶחֱרַד with We., or, much better, יִכָּאֵב). The last insertion is 9 8-15 (see § 10).

15. Pre-exilic editing. After these insertions have been removed, may we safely suppose that the rest of the book represents what Amos said in public? No: the analogy of the prophecies of Isaiah makes such a supposition highly improbable. Let us be content with knowing that we have a truthful record of the prophetic certainties of Amos, even though he did not always utter them in public. The manner and the contents of the passages into which the true Book of Amos falls must be our guide in determining the class (whether that of public or of private prophecies) to which they severally belong. It is both inherently difficult and contrary to analogy to suppose that 1 2-2 16 was ever really uttered; at any rate, 1 2-2 6a 8 is more adapted to produce an effect on readers than on hearers. Nor can we possibly imagine that the visions in chaps. 7-9 were used by the prophet as texts of spoken addresses; passages from discourses are no doubt here and there introduced, but they come from the arranging hand of the editor of this part.

It is a further question whether the arrangement of the different sections may he due to Amos himself. In answering it we must leave sufficient room for the *growth* of the book. It is not unreasonable to suppose that on his expulsion from Bethel the prophet paid a visit (perhaps a second visit; cp 6 1) to Jerusalem, and there 'noted' his prophecies 'in (on) a book for a later day' (Is. 30 8), when the judgment upon Israel should have been accomplished.' There, too, he may have committed his record (enriched with some never-spoken prophetic certainties) to the custody of those 'disciples' of Yahwè end of his prophets (see Is. 8 16), who began the long succession of students and editors of the religious literature. In their hands we may suppose that the hook assumed by degrees its present form. At any rate, a written record of Amos must have become quickly known; for Isaiah, it is clear, steeped himself in the originality of Amos before displaying his own truly

[1] There are similar interpolations in Hosea (*e.g.*, 1 7 1 10-2 1 [2 1-3] and the words 'David their king' in 3 5). See HOSEA, § 4.

[2] Cp 2 K. 16 15, Deuteronomistic. Critics on the other side quote Is. 5 24; Hos. 2 2 [4]; Ex. 18 16: Deut. 30 10; hut they do not meet the argument from weakness of style, and produce no parallel for the second part of the description of Judah's sin. Moreover, the two Pentateuch passages are not in point. Nor have critics realised the consequences of admitting the post-exilic origin of the prophetic hooks in their present form.

[3] The style is that of II. Isaiah and the later poets (cp Stickel, *Hiob* p. 276), not that of Amos. The strings of participles remind us of Is. 40 22 f.: Job 12 17-24; Zech. 12 1; Dan. 2 21 f. Notice also ברא (cp Cheyne, *Int. Isa.* xxi. 252), דרך על־במתי, י׳ הצבאות ,הבנה מעלתו ,מבליג ,צלמות ,כסיל ,כימה ,ארץ. In 9 5 violates the usage of Amos (but cp 𝔊). The ideas are equally late, though they are such as Amos, had he met with them, would have owned. *Inter alia*, comp. the third descriptive phrase in 4 13 with Ps. 139 2. It is probable that 5 8 f. originally stood after 4 13. Am. 9 5 f., however, presumably retains its original position.

[4] On the text see, besides the commentaries, N. Schmidt, *JBL*, 1894, p. 1 *ff.*; Torrey, *ib.* p. 61; WRS and Che., *Proph. Isr.*(2) 399 *ff.*; G. Hoffmann, *ZATW* 3 112 f.; Tiele, *Gesch. van* het *godsdienst* 315. On the construction see Dr. in Smith, *DB*(2) 122 (art. AMOS).

[1] So Del. *Par.* 215 f., hut see SUCCOTH-BENOTH.

AMOS

original genius. To Hosea, however, such a record cannot he proved to have been known (see We. on Hos. 8 14 4 15 10 5 8) : in other words, the circulation of Amos's prophecies was, originally at least, confined to Judah. The latest editor of the book, as we have seen, was post-exilic.

A special interest attaches to the description of the visions, together with the historical interludes in chaps. 7-9, partly because they exhibit the growth of Amos's prophetic certainty respecting the fall of Samaria, and partly because, like Is. 6 7 1-8 18, and 20 (in their original form), they appear to come from a partly biographic, partly prophetic, work, written or dictated by the prophet himself.

16. Amos's style.

Some have been surprised to find 'a plain countryman' like Amos possessed of such a refined and yet vigorous style.[1] They forget that the differences of culture in the East are still sometimes comparatively trifling, and that a man of low rank may express himself with considerable elegance. It is still more in point to remark that the most classic Arabic poems are the work of men who had a calling similar to that of Amos, while, even under the new Moslem empire, sons of the desert were wont to appear at court and win a rich guerdon by the finished style of their improvisations. Such critics have also forgotten the opportunities of self-culture which, both at Tekoa and elsewhere, Amos must have enjoyed; and when even G. Banr and Ewald point to certain 'solecisms in pronunciation and orthography' as evidences of provincialism, it may be replied that the errors in question may reasonably he ascribed to late copyists.[2] That Amos delights in images drawn from nature is clearly no fault (see, *e.g.*, 2 9 3 4 *f.* 8 12 5 19, and the first, second, and fourth visions). Only one of them is distinctively the comparison of a shepherd (3 12); and Amos is just as willing to speak of wonders of which he knows only by hearsay—such as the giant cedar trees (2 9), and (if the text be correct) the inundation of the Nile (88)—or of which he has a true Israelitish dread—such as an earthquake or a solar eclipse (8 8 *f.*), or the mysterious sea which yields no harvest (6 12; cp ἀτρύγετος), and which somewhere hides the terrible serpent of primitive mythology (9 3; see SERPENT, § 3 *f.*). It is a pity that, for reasons already given, we cannot speak of Amos as a sympathetic observer of the sky[3]—*that* is an essential characteristic of a much later poet (see JOB). As a literary craftsman he ranks high. In 1 3-2 16 we have a literary prophecy, which, until Amos forgets his art in his grief at the manifold offences of Israel, is marked by great regularity of structure. So in 4 6-11 we have the literary model of an equally symmetrical passage in Isaiah (Is. 9 8-21 [7-20] 5 26-30 10 1-4), and in 5 2 we have a short but strictly rhythmical elegy. Altogether, the Book of Amos forms a literary as well as a prophetic phenomenon.

17. Degree of originality.

It is true that both as a writer and as a speaker he must have had models; J and E were, of course, not the only writers of the pre-Amosian period, and Elijah and Elisha (of whose doings a faint echo has reached us) were not the only prophetic reformers (Am. 2 11 *f.* 3 7). There is no occasion, however, to suppose that there were prophets of precisely Amos's type before him—prophets who had exactly his conception of their duties, and were also, in a qualified sense, writers. It would he a mistake to infer, from Amos's use of formulae, that he was acquainted with earlier written prophecies. Prophetic formulæ could be transmitted by word of mouth as well as by the pen. That Amos had left Tekoa at intervals before his prophetic call is not only inherently probable, but also follows from such a passage as 3 7 *f.* (if correct), which Amos could hardly have written unless he had had the most vivid and direct ocular evidence of the effects of a true prophetic impulse even before his own turn came to receive one. His originality is shown, not only in his prophetic message, but also in his being (probably) the first to conceive the idea of using the pen in aid of the voice. The *tōra*-literature of the priests had already taken a considerable development (Hos. 8 12); Amos was, it appears, the first prophet who followed the example of the literary priests. The importance of this step it was beyond his power to estimate. Within a generation he expected Israel as a nation to disappear; but he thought it worth while to gather disciples who, like himself, could praise Yahwè even in the midst of ruin; and, after all, who could tell but Yahwè might have some other secret to reveal to one of these—to a Hosea or to an Isaiah? See § 18.

18. Pessimism.

That Amos's message is a gloomy one is in accordance with his conception of the divine character. In an age like his, the divine purpose could not be one of peace, though it required an immense devotion to Yahwè to be able to declare, seemingly unmoved, that He purposed the complete destruction of Israel (or, as we should say, of Israel and Judah). In spite of the universal scepticism which meets him (for how, it is said, can Yahwè be conceived of apart from his people?), Amos persists in his message, and even conceives the possibility that legendary supernatural agencies may be used to make the destruction more complete (9 3). It is not, therefore, open to us to account for the confidence of Amos simply by the advance of the Assyrian power. He does, indeed, regard Assyria as the chief destructive agent (6 14 7 17); but Assyria, when Amos spoke and wrote, was passing through a period of decline; consequently his conviction must have some other ground which naturally sharpens his eyes for the still present danger from Assyria. To this it must be added that, according to Amos, it would be easy for Yahwè, if the agency of Assyria were not available, to bring some other hostile nation from some corner of the earth, just as he 'brought up the Philistines from Caphtor, and the Aramaeans from Kir' (9 7). The real ground of Amos's prophetic pessimism is the increasingly unsound religious condition of his people. He may very possibly have admitted that there were fifty or at least ten Israelites who lived by the same pure religion as himself; but he could not conceive of Yahwè's saying, 'I will not destroy the land for ten's sake.' The righteous must, according to him, suffer with the wicked (9 10 was inserted to correct this idea), though he might perhaps have left a door of hope open for those who, like himself and his disciples, had close personal contact with the true God : the nation might perish; but when this had happened, God might have some secret purpose for those who 'knew' him.

Of this vague hope we hear nothing from Amos (cp ISAIAH). What the popular religion was, we know but too well. Whatever the nobler minds may have believed, 'the mass of the people,' as Robertson Smith well says, 'still thought of Him as exclusively concerned with the affairs of Israel,' and the connection between Yahwè and Israel had a non-moral, natural, basis. Ritual tended to make morality almost superfluous, and hy its increasing costliness actually promoted that injustice and inhumanity which Yahwè abhorred. There were also immoral superstitions at which Amos glances less (see 2 7) than Hosea. To this

19. Idea of God.

pernicious system the religion of Amos is diametrically opposed. Once, at any rate, he uses the striking title, 'Yahwè, the God of the Hosts' (5 27 is admittedly a genuine passage)—i.e., the God of celestial as well as earthly

[1] Against Jerome's application of Paul's self-depreciating language in 2 Cor. 11 6 to Amos see Lowth, *Prælect.* 21 (*Lectures* ET, 2 97 *f.*).

[2] Take, *e.g.*, יִשְׂחָק (7 9) for יִצְחָק. The same form occurs in Jer. 33 26, Ps. 105 9, both post-exilic passages. In 5 11 בּוֹשַׁסְכֶם is not a 'dialect form' for בּוֹסְכֶם; the scribe wrote ש by an error and then corrected it by writing ס. Read simply בּוֹס with We.

[3] GASm. (*HG* 315).

legions—together with 'the Lord Yahwè' (perhaps nineteen times), in antithesis to the nationalistic expression, 'Yahwè, the God of Israel.'[1] The Yahwè whom he himself worshipped was, in virtue of his perfect moral nature, the Sovereign alike of nature and of nations. Amos had not, indeed, fathomed the depths of this conception as had the Second Isaiah and the author of Job (Am. 4 13 and the parallel passages are later insertions: see above, § 12); but he is already to all intents and purposes an ethical monotheist, and his conviction of the impending destruction of Israel does but intensify his sense of the majesty of the one God. He does not, indeed, reject the old belief in the connection between Yahwè and Israel altogether (cp 7 15 'my people Israel'): he moralises it. For some wise object, Yahwè brought Israel out of Egypt (3 1 9 7), and entered into a personal moral relation to it; but his will, at any rate, is not unknown to the other nations, and their history is equally under his direction. Once, indeed, under the stress of moral passion, Amos even places the 'sons of Israel' on a level with the 'sons of the Cushites'[2]; this occurs near the end of his prophecy (9 7), and is evidently intended as a final withdrawal of a temporary and conditional privilege. It is not, however, on all the nations of the earth, but only on those which are in close proximity to Israel, that judgment is pronounced by Amos, as the spokesman of Yahwb; he aims at no theoretic consistency. These nations are to suffer the same doom as Israel at the hand of Assyria, because they, like Israel, have violated the unwritten law of justice and humanity. [Thus we can divine Amos's free attitude towards the lately written ethico-religious priestly laws (see EXODUS, § 3). He is probably acquainted with such laws (2 8; cp Ex. 22 25 *f.*); but he does not recognise them as of primary authority, for he nowhere appeals to them.[3]] And if by many favours, including the crowning favour of prcphecy (2 11), Yahwb has made himself specially known to the Israelites, it follows that he will judge Israel more strictly than he will judge the other nations (3 12). As a faithful friend, Amos assures his people that if they would only 'seek' the true Yahwè they would 'live' (5 4 14)—*i.e.*, would escape captivity and enjoy prosperity in their own land (cp Hos. 6 2 *f.*). He has no hope, however, that they will do so: the false popular religion is too deeply rooted. Indeed, Am. 5 has been so much interfered with by editors that it is doubtful whether *vv.* 4 14 can be appealed to as authorities on such a point; *v.* 14, at all events, appears to belong to an inserted section (see Nowack).

20. Denunciations.

It is not idolatry that Amos complains of. When he says, ironically, 'Go to Bethel and transgress' (4 4), he means, as he expressly tells us, 'Carry out the prescriptions of your wilfully devised ritual law.' Nor can we venture to say that a protest against the 'golden calves' is implied,[4] for no prophet is more explicit than Amos in mentioning the sins of his people. The two passages in which a reproof of Israelitish idolatry does appear to occur are certainly interpolations. In 8 14, for 'the sin of Samaria'[5] we should read 'the god of Bethel' (cp Gen. 31 13), in parallelism to 'thy god (אֱלֹהֶיךָ), O Dan,' and 'thy patron (read דֹּדְךָ with Wi. and see DOD), O Beersheba,' and the whole of 5 26 is a later. insertion, and is not true to the facts of the age of Amos (see above, § 12). What Amos most vehemently denounces is sacrifice. One may perhaps be tempted to suppose that he says more than he means, and that he does not object to sacrifices altogether, but only to the belief that when duly performed they can change the mind of the Deity. His language, however, seems too strong to be thus explained away, especially when we find him appealing in support of his statement to the fact that in the olden time, when Yahwb was so near to Israel, no sacrifices were offered (5 25). Is there, then, no form of worship in which Yahwb delights? None, except the practice of righteousness—*i.e.*, justice and humanity (see 5 21 24). But, alas, the Israelite will not recognise this. Pilgrims who are wholly indifferent to plain moral duties crowd to the sanctuaries of Bethel and Gilgal, and even to the far-off southern shrine of Beersheba[1] (5 5 8 14, cp Hosea 4 15), and parade their devotion to the different local forms of Yahwb in pious oaths, as if the true Yahwè could he pleased with the offerings or the oaths of such worshippers. How painful will be the awakening from this moral sleep, when the greatest of all realities makes its existence known, annihilating at one blow the sanctuaries of Israel and their worshippers (9 1)! Such was the announcement of the shepherd of Tekoa.

21. Estimate of Amos.

Taken in connection with the ideas on which it is based, it seems to justify us in calling him a surprising phenomenon. That the phenomenon can be partly explained there is no doubt. Neither Amos nor his special follower Isaiah is so entirely abnormal a product as an unthinking study of the works of either might suggest (see PROPHECY). But not the most comprehensive study of the history of Israel will altogether account for their appearance. And if they neither of them saw the whole truth, and both needed the correction of history and of later prophets and sages, we may still pay them the reverence which belongs to those who first uttered great moral and religious truths with the power that belongs to God-possessed men.

22. Special helps.

T. K. C.

2. Amos (Αμως [אBCD]) is the best supported reading in Mt. 1 10, where, however, King Amon (*q.v.*) is plainly intended; so TR and EV. It is a constant variation in 𝔊AB.

3. An ancestor of Joseph, Mary's husband (**Lk.** 3 25 [BאA]). On the two **lists** see GENEALOGIES OF JESUS.

AMOZ (אָמוֹץ, § 57, 'strong'; αμωc [BאAOQΓL], αμμ. [A in 2 K. 19 2 20 1 Is. 37 2]; *AMOS*), father of ISAIAH, 1 (Is. 1 1 αμωc[ειν]=αμωc ην [א*vid.], 20 2 [KAQ om.], 2 Ch. 26 22 [BA om.]).

AMPHIPOLIS (αμφιπολιν [Ti. WH], πολιν [א*]), one of the most important positions in northern Greece; it stands on a bend of the river Strymon, between the lower end of lake Cercinitis and the head of the Strymonic gulf, thus commanding the pass leading from the east into Macedonia (Liv. 45 30). Consequently it was a station on the *Via Egnatia*, 'the great military road which ran through Macedonia and connected Rome with the Hellespont' (Cic. ***De prov. cons. 2*** § 4). Paul, therefore, 'passed through' Amphipolis

1 'Thy God (O Israel)' is put into Amos's mouth by a later editor (4 12*b*: see above, § 12).

2 Who these Cushites are, is uncertain (see CUSH i. § 2 *h*). Apparently they had recently experienced some calamity.

3 Here he contrasts with Hosea, who clearly invests the written *tōrōth* which arose in certain priestly circles with primary authority (Hos. 8 12). Perhaps, as Duhm suggests, Hosea was himself a priest.

4 So Davidson (*Expositor*, 1887 (1), p. 175). To say that Amos does not protest against the 'golden calves,' is of course not to assert that he thinks them worthy symbols of Yahwè. Cp St. *GVI* 1 579; WRS, *Proph.* 575 *f.*

5 The text appears to have been altered by the same editor who inserted the reference to 'the two iniquities' in Hos. 10 10.

1 Hal. thinks that a northern Beer-sheba (perhaps Beeroth) is intended (*REJ* 11 72-77); but if Elijah went on pilgrimage to Horeb, which was not even in Palestine, why should not N. Israelites have gone to a venerated spot in S. Israel? עָבַר is precisely the right word to use of a sanctuary across the border (cp 6 2).

on his way from Philippi to Thessalonica (διοδεύσαντες, Acts 17 1†).

The site was intimately connected with some of the most interesting passages in Greek history; but it would be a mistake to imagine that the apostle or his companions either knew or cared for these things. It is now Nrochori. [Leake, *North. Gr.* 3 181 *f.*] W. J. W.

AMPLIAS, or rather as in RV Ampliatus (ΑΜΠΛΙΑΤΟC [Ti. WH]), saluted as 'my beloved in the Lord' (Rom. 16 8†); not otherwise known.

The name was not nnfrequently borne by slaves. In the list of the seventy disciples (Pseudo-Dorotheus) Amplias is represented as having been bishop of Odessus or Odyssus (on the **Black** Sea, near the site of the modern Varna).

AMRAM (עַמְרָם, § 77, 'in good condition'?or, 'the [divine] kinsman is exalted'; ΑΜΒΡΑΜ [BL; A in Ex. Nu.], ΑΜΡ. [AF; B in Nu.]).

1. b. Kohath, head of a Levitical subdivision, and father of Moses, Aaron, and Miriam (Ex. 6 18 20; Nu. 3 19 αμβραμ [AF], -βραν [L]; 26 58 *f.* 1 Ch. 6 2 [5 28]); from him come the Amramites (הָעַמְרָמִי, Nu. 3 27, 6 αμραμεις [B], αμβρααμ' εις [A], -ραμ' εις [F], -ραν εις [L]; 1 Ch. 26 23, αμραμι [A]). See LEVI.

2. One of the b'ne BANI, 2, in list of those with foreign wives (EZRA i. § 5 end) Ezra 10 34 (μαρ[ε]ι [B], αμβραμ [א], αμβραμ και [AL]) = 1 Esd. 9 34 OMAERUS, RV ISMAERUS (μαηρος [B], ισμ. [A], αμραμ [L]). See EZRA, ii. § 14 *b*.

3. 1 Ch. 1 41 (חַמְרָן), RV HAMRAN. See HEMDAN.

AMRAPHEL (אַמְרָפֶל; ΑΜΑΡΦΑΛ [ADEL]; Jos. 'Αμαρα Ψίδης), king of Shinar (Gen. 14 1 9†) = Hammurabi, king of Babylon, who, according to trustworthy cuneiform data, may have flourished about 2250 B.C. This assumes that אמרפל is corrupted from חמרבי or (Lindl, Sayce) חמרבי אל; but see CHEDORLAOMER (§ 4 *f.*), and cp Schr. *COT* 2 299 *f.*; Hommel, BAG 169, *AHT* 193; Wi. *AOF* 143 *ff.*; Bezold, *PSBA* 1188 ['88]. Targ. Jon. ingeniously, if uncritically, identifies Amraphel with Nimrod, who 'commanded Abram to be cast into the furnace.' If the identification with Ḥammurabi be accepted, we may be reminded that Nabopolassar and Nebuchadrezzar delighted to imitate this founder of Babylonian greatness, both in his building plans and in his methods of administration (see BABYLONIA, § 66, and cp Rogers, *Outlines of Early Bab. Hist.* 27-30). It may be that some Jewish favourite at the Babylonian court, who had received a Babylonian education (Sanabassar or Sheshbazzar for instance—note the Babylonian name), heard Hammurabi spoken of, and made historical notes from cuneiform tablets on events which had happened 'in the days of Amraphel,' also that one of these was adopted by later writers as the basis of a Midrash on Abraham and Melchizedek. On the other hand, those who identify NIMROD (*q.v.*) with Nazi-maraddaš (Nazi-maruttaš) may incline to think that the setting of contemporary history may be derived from an early pre-exilic traditional source, though the narrative in its present form is undoubtedly the production of post-exilic writers. The latter view is the more difficult one, but not therefore to be hastily rejected. Cp Lehmann, *Zwei Hauptprobleme der altorient. Chronologie* (1898) 84, and see ABRAHAM, § 4, CHEDORLAOMER (§§ 2, 4 end), HAM (i.), MELCHIZEDEK (§ 2), SHAVEH, I. T. K. C.

AMULETS is the RV rendering of *lĕḥāšīm*, לְחָשִׁים, Is. 3 20, a word used elsewhere of any charm (Is. 3 3, נְבוֹן לַחַשׁ, RV 'skilful enchanter'—not 'eloquent orator' or 'skilful of speech' as in AV and AV mg.), or, more specifically, of a charm against serpents (Jer. 8 17 Eccles. 10 11). In Is. 3 20 some sort of female ornament is meant, most probably earrings (so AV), which seem to be treated as idolatrous in Gen. 35 4. Doubtless, as WRS suggests ('Divination and Magic' in *J. Phil* 14 122 ['85]), the amulet is worn in the ear to prevent an incantation from taking effect. Among early peoples amulets and ornaments are closely connected (cp We. *Heid.*(2) 165). When the early significance of the protective power of the object is forgotten it serves as a simple adornment.[1] The Syr. equivalent *ḳĕdāšā* is properly 'a holy thing,' and the same idea is seen in the occurrence of the root in the old Yemenite *ḳădīs*, 'pearls'; cp WRS *Rel. Sem.*(2) 453; and see MAGIC, § 3 (3), cp also RING, § 2.

AMZI (אַמְצִי, § 52, perhaps abbrev. from Amaziah).

1. In the genealogy of ETHAN: 1 Ch. 6 46 [31] (αμεσσεια [B], μαεσσια [A], αμασια [L]). *See* also LEVI.

2. In genealogy of Adaiah, 3, the priest (see MALCHIJAH, 3); Neh. 11 12 (αμασ[ε]ι [BA], -σιου [L], αμεσσει [א]), omitted, however, in the || 1 Ch. 9 12.

ANAB (עֲנָב, ΑΝΩΒ [AL]), a hill-town of Judah, Josh. 15 50 (ΑΝΩΝ [B], ΑΝΑΒ [L]), one of the seats of the Anakim; Josh. 11 21 (ΑΝΑΒΩΘ [B]). It is doubtless to be connected with Ḥinianabi (עֵין־עֲנָב), mentioned in *Am. Tab.* 237, 26 with Magdali (see MIGDAL-GAD) and other cities of the land of *Gar* (SW. Judah). There is still a place of the name (*'Anāb*) on the west side of the Wādy el-Khalil, about 14 miles to the SW. of Hebron, and 4 or 5 m. W. from Shuweikeh (Rob. *BR* 2 159; so *PEMem.* 3 392 *f.*). See also ANUB.

ANAEL (ΑΝΑΗΛ [BRA], *i.e.*, חֲנַנְאֵל, HANANEEL), brother of Tobit and father of ACHIACHARUS (Tob. 1 21). See also AMAN.

ANAH (עֲנָה, meaning uncertain, cp Gray, *HPN* 110; ΑΝΑ [BADEL]), a Horite clan-name (Gen. 36). As the text stands the descent of Anah is represented in three ways. Anah is

1. Daughter of Zibeon (αιναν [L]), in *vv.* 2 14, 'Hivite' in *v.* 2 being obviously an old error of the text for 'Horite.'

2. Son of Seir and brother of Zibeon, *v.* 20 (αιναν [L]), 1 Ch. 1 38 (Ανας [L]).

3. Son of Zibeon, *v.* 24 *bis* (ωναν [AD], αιναν [L], ωνα [E], ωνας [AE]), also 1 Ch. 1 40 *f.* (Σωναν [B], ωναμ [A; *v.* 41 ανα], αναν [L]), 25 *bis* 29.

The first of these may, however, safely be disregarded. 'Daughter of Zibeon' is a variant (based on *v.* 24) of 'daughter of Anah' (dependent on *vv.* 20 25), which has intruded into the text (so Di., Kau.). As to (2) and (3), the differences of statement need not surprise us, for the genealogy only symbolises tribal relations. Anah was originally a sub-clan of the clan called Zibeon, and both alike were 'sons of Seir'—*i.e.*, Horites. A twofold tradition, therefore, could easily arise. The 'mules' which, from *v.* 24 AV, Anah would appear to have 'found in the wilderness' are an invention of the Midrash, some Rabbis explaining יֵמִם (ιαμειν [ADE], εαμιν [L]) by ἡμίονος, others by ἥμισυ (*Ber. rabba*, par. lxxxii.). The 'hot springs' of Vg. and RV are purely conjectural; the word הַיֵּמִם is evidently corrupt. As Ball points out (*SBOT* Gen. crit. notes, 93), it may have come in from *v.* 22 (הֵימָם). In *vv.* 2 14 and 18 (where 𝔊AEL omits), Anah is called the father of Oholibamah, the wife of Esau. See BASHEMATH. T. K. C.

ANAHARATH (אֲנָחֲרַת; ΡΕΗΡΩΘ Κ. ΑΝΑΧΕΡΕΘ [B], ΡΕΝΑΘ Κ. ΑΡΡΑΝΕΘ [A], ΑΝΑΝΕΡΕΘ [L]), a site on the border of ISSACHAR (Josh. 19 19)†. The reading seems corrupt (note the conflate readings of 𝔊BA). Perhaps we should read אֲרָנֶת and identify with *'Arrāneh*, a village on rising ground in the plain of Esdraelon, a little northward of Jenin (= En-gannim). So Schenkel's *Bib.-Lex.* and Riehm's *HWB*(2) (after Knobel).

Knobel's alternative view (adopted from de Saulcy by Conder) identifies Anaharath with en-Nā'ūra, which is not far from Iksāl (Chesulloth) and Sōlām (Shunem), and is therefore not altogether unsuitable, but somewhat remote from every attested form of the ancient name.

[1] For analogies cp CUTTINGS OF THE FLESH.

ANAIAH (עֲנָיָה, § 33, 'Yahwè has answered'; ἀνανια(ς) [BℵAL], thus identifying the name with ANANIAH).

1. In list of Ezra's supporters (see EZRA, ii. § 13 *f.*; cp i. § 8) at the reading of the law (Neh. 8 4 = 1 Esd. 9 43 ANANIAS, 4).

2. Signatory to the covenant; Neh. 10 22 [23] (Αια [B]; Αναια [Aℵ*]). See EZRA, i. § 7.

ANAK. See ANAKIM.

ANAKIM RV; AV, less correctly, ANAKIMS (עֲנָקִים; and הָעֲנָקִים; in Targg. generally rendered גִּבָּרַיָּא, 'giants'; ενακ[ε]ιμ [BAFL], but -ν [F*?]? Dt. 2 10]; *ENACIM*).

The Anakim are mentioned in Dt. 2 10 *f.* 21 Josh. 11 21 *f.* 14 12 15 Jer. 47 5 (𝔊BℵAQ; Heb. reads 'of their valley'); elsewhere called 'sons of Anak' (עֲנָק, ενακ [BAL]) Nu. 13 23 (εναχ [BF]); Dt. 9 2*b* and (MT 'sons of the Anak') Josh. 15 14*a*; Judg. 1 20; 'sons of the Anakim,' Dt. 1 28) υἱοὶ γιγάντων [BAL]) 9 2*a* (υἱοὶ Ἐνάκ); 'the children (יְלִידֵי) of Anak' (MT 'the Anak') Nu. 13 23*a* 28 (*wax* [B], αιναк [A]), Josh. 15 14*b*. The phrases are exactly parallel to 'Rephaim' and 'children of the Rapha' (see REPHAIM); indeed in Dt. 2 11 a writer of the Deuteronomic school, 'interested in history and archaeology' (Kue.), makes the Anakim a branch of the Rephaim.

These and other descriptive terms (which are not to be mistaken for race-names) are given at any rate to some portions of the pre-Israelitish population of Palestine, whom, like the Amorites, tradition endowed with colossal height (cp Nu. 13 33).[1] On the inhabitants of Palestine generally, see CANAAN.

According to Josh. 11 21 (D_2), the Anakim were to be found in the mountains about Hebron, in the fenced cities Debir and Anab, and, in general, in the mountains of Judah and Israel, whence Joshua and Israel drove them out. Verse 22 also states that a remnant of them survived in the Philistine cities of Gaza, Gath, and Ashdod (cp Jer. 47 5 𝔊; οἱ κατάλοιποι ενακειμ [BKAQ], where MT has 'the remnant of their valley'). The oldest narrator, however, gives the credit of their expulsion to Caleb, who drove out from Kirjath-arba the three sons of Anak: Sheshai, Ahiman, and Talmai—*i.e.*, the three tribes or clans which bore those names (Josh. 15 14). The editor of Judg. 1, quoting this passage, refers the deed to the tribe of Judah (*v.* 10); see HEBRON. In later times, a too literal interpretation of 'sons,' and genealogical interest, led to the transformation of Anak, and—what is still stranger—of Arba' ('four') in the place-name Kirjath-arba, into personal names. Thus Anak (virtually a personal name where it has the article) becomes father of SHESHAI, AHIMAN (1), and TALMAI (1), and son of Kirjath-arba; cp Josh. 21 11 (MT הָעֲנוֹק), 15 13 *f.* Judg. 1 10 (εναμ [A]).

The proof of this is supplied by 𝔊BAL, which in Josh. 15 13 21 11 instead of 'father of Anak' has μητρόπολιν [τῶν] ενακ. This no doubt represents the original text, which stated that Kirjath-arba, or Hebron, was an important city (a 'mother,' cp 2 S. 20 19) of the Anakim. A later scribe, prepared to find a genealogical notice and therefore surprised to find the word 'mother' in apposition to Arba, altered 'mother' (אֵם) into 'father' (אֲבִי). Thus he obtained the statement that Hebron was the city of one Arba who was the father of '(the) Anak.' In Josh. 14 15, however, he took a different course. The true reading must be that of 𝔊BAL which gives (nearly as in the parallel passages) πόλις αρβε ([L], αρβο [A], αργοβ [B]), μητρόπολις τῶν ενακ[ε]ιμ αὕτη. For this the scribe substituted 'the city of Arba, the greatest man among the Anakim.' The consequence was that Sheshai, Ahiman, and Talmai (the three Anakites mentioned in Josh. 15 14) became, literally 'sons of (the) Anak,' and grandsons of Arba—no contemptible acquisition for genealogists. So virtually Schleusner (Thes., *s.v.* μητρόπολις); but see especially Moore, *Judges* 24 *f.* Cp also Schwally, *ZATW*, 1893, p. 139 *ff.* T. K. C.

ANAMIM (עֲנָמִים), one of the peoples of Mizraim, Gen. 10 13 = 1 Ch. 1 11†; unidentified. See GEOGRAPHY, § 15 (2).

ANAMMELECH (עֲנַמֶּלֶךְ, ανημελεχ [B], αμη. [A]; om. L; ܥܢܡܠܟ; *Anamelech*), a Babylonian deity, whose worship was carried by the Sepharvites into Samaria when, along with the inhabitants of other Babylonian cities, they were transplanted thither by Sargon. As in the case of the kindred deity Adrammelech (see, however, ADRAMMELECH, 1), the worship of Anammelech was accompanied by the rite of human sacrifice (2 K. 17 31). The name Anammelech is probably to be explained as *Anu-malik* 'Anu' is the decider or prince'[1] (Schr., Del.), although there is no evidence that Anu enjoyed any special veneration in Sippara (see SEPHARVAIM), a city that was especially devoted to the worship of Šamaš the Sun-god.

It is very possible, however, that the text is corrupt (Hommel proposes a rather elaborate restoration [*Exp. T.* 9 330 *f.*]). It is also possible (see NISROCH) that Anammelech is merely a faulty variant of Adrammelech (rather Adarmelech). 𝔊L in 2 K. 17 31 has only αδραμελεχ.

Anu was the god of Heaven, and with him were identified a number of gods representing personifications of powers or localities of the upper region, such as *Uraš*, *Anšargal*, *Anšar*, *Enšar*, *Du'ur*, *Luḫma*, *Ekur*, *Alala*, *Alala-alam*, and *Enurula*. He stood at the head of the Babylonian pantheon, forming one of the supreme triad of Babylonian divinities, in which he was associated with *Bēl*, the god of Earth and of created things, and *En*, the god of the Abyss and all that is beneath the earth. See BABYLONIA, § 26. According to G. Hoffmann (*ZA*, 1896, p. 258), however, the name is ע[נ]ת[מלך]—*i.e.*, Anath-malk. Cp Astar[t]-Kemosh and Melk[at]-Astart. Anath (Anta) was the consort of Anu (see ANATH). L. W. K.

ANAN (עָנָן, § 50; shortened from ANANIAH). 1. Signatory to the covenant (see EZRA, i. § 7); Neh. 10 26 [27] (ηναμ [B], ηνα [ℵ], -αν [A], ηιναν [L]).

2. Anan (αν[ν]αν [BAL]) in 1 Esd. 5 30 = HANAN, 3 (חָנָן) Ezra 2 46.

ANANI (עֲנָנִי, § 50, abbr. from ANANIAH, cp Sab. ענני and Palm. ענני; ανανει [B], ανανι [A], -ιας [L]), descendant of ZERUBBABEL (1 Ch. 3 24).

ANANIAH (עֲנָנְיָה, Bℵ*A om., ανανια [ℵc.a mg. inf.], ανια [L]) in Benjamin, mentioned (*v.* 32†) in the list of villages, Neh. 11 20-36 (see EZRA, 2, § 56, § 15 (1) *a*), along with Nob and Ramah (Neh. 11 32), and possibly represented by the modern *Beit-Ḥanīna*, 3½ m. NNW. of Jerusalem.

ANANIAH (עֲנָנְיָה, §§ 33, 50; ανανια [BAL]), ancestor of one of Nehemiah's builders (Neh. 3 23).

ANANIAS (ανανιας [BAL]), the Gk. form of HANANIAH or ANANIAH.

1. RV ANNIS, mg. ANNIAS, a family in the great post-exilic list (see EZRA, ii. § 9), mentioned only in 1 Esd. 5 16 (αννεις [B], αννιας [A], om. L). The name has probably arisen from a misreading of Hodiah (הודיה read חניה); cp Neh. 10 17 *f.*, and see HODIAH, 2. Cp also Meyer, *EJ* 143, 155.

2. 1 Esd. 9 21 = Ezra 10 20 HANANI, 3.

3. 1 Esd. 9 29 = Ezra 10 28 HANANIAH, 7.

4. 1 Esd. 9 43 = Neh. 8 4 ANAIAH, 1.

5. 1 Esd. 9 48 (αννιας [B]) = Neh. 8 7 HANAN, 4.

6. A kinsman of Tobit. The archangel Raphael, while in disguise, claimed to be his son (Tob. 5 12). He is designated Ananias 'the great,' son of Semeus or Semelius (see SHEMAIAH, 23), also called 'the great.'

7. b. Gideon, ancestor of Judith (Judith 8 1, om. B).

8. In Song of Three Children, *v.* 66 (𝔊 Theod. Dan. 3 88); see HANANIAH. 1.

9. Son of Nedebaios (*Ant.* xx. 5 2, Νεβεδαιός in some MSS [AE] νεδεβαιος; cp NEDABIAH), high priest, *circa* 47-59 A.D., under Herod Agrippa II., king of Chalcis. He is mentioned in Acts 23 2 *ff.* 24 1 as the high priest before whom Paul was accused during the procuratorship of Felix. He flourished in the degenerate days of the priesthood, and, though Josephus says (*Ant.* xx. 9 2) that after his retirement he 'increased in glory every day,' allusion is made to him in the Talmud (*Pesaḥim*) in terms of the greatest contempt. Cp ANNAS (end).

[1] Anak, 'long-necked' (St. and most), or 'those with necklaces' (Klo.), with which cp Heb. *'ănāḳ*, 'a chain for the neck,' Aram. *'ūnaḳ*, Ar. *'unḳ*, 'neck.'

[1] In which case cp Anu(m) šarru = Anu the king, the usual title of the god Anu (Muss-Arn. *Ass. Dict.* 65).

10. Husband of SAPPHIRA (*q.v.*), Acts 51. See COMMUNITY OF GOODS, § 3.

11. A 'disciple' at Damascus, who was the means of introducing Paul, after his conversion, to the Christian community there (Acts 9 10-19).

ANANIEL (ανανιηλ [BℵA]; Heb. [ed. Neubauer] חֲנַנְאֵל, Hananeel), Tobit's grandfather (Tob. 1 1).

ANATH (עֲנָת; αναθ [BAL]), a divine name, mentioned in connection with Shamgar in Judg. 3 31 (δεινάχ [B]) and 5 6† (κεναθ [A]). If SHAMGAR (*q.v.*) were an Israelite, and b. Anath ('son of Anath') his second name, it would be tempting to take 'Anath' in 'ben Anath' as shortened from Ebed Anath 'servant of Anath' (so Baethgen, *Beitr.* 141; but see Noldeke, *ZDMG* 42 479 ['88]). More probably, however, Ben-anath is a Hebraised form of the name of a foreign oppressor who succeeded Shamgar[1] (certainly a foreign name), and in this case Anath must designate a foreign deity. Who then was this deity? Evidently the well-known goddess worshipped in very early times in Syria and Palestine (as appears, *e.g.*, from the names mentioned below), and adopted, as the growing evidence of early Babylonian influence on Palestine scarcely permits us to doubt, from the Babylonian pantheon. An(a)tu was in fact the daughter of the primitive god Anu, whose name is mentioned as that of a Syrian deity in 2 K. 17 31 (see ANAMMELECH, SEPHARVAIM). Of her character as a war-deity there can be no doubt. In ancient Egypt, where her cultus was introduced from Syria, she was frequently coupled with the terrible war-goddess Astart, and on an Egyptian stele in the British Museum she appears with a helmet on the head, with a shield and a javelin in the right hand, and brandishing a battle-axe in the left. She was, therefore, a fit patron-deity for Shamgar or for Sisera. That the fragmentary Israelitish traditions make no direct reference to her cultus, need not be matter for surprise. The names ANATHOTH, BETH-ANATH, BETH-ANOTH, compensate us for this omission. Wellhausen thinks that we have also one mention of Anath in Hos. 14 8 [9], where he renders an emended text 'I am his Anath and his Asherah' (in clause 2)—surely an improbable view. For a less difficult correction see Che. *Exp. Times*, April 1898.

For Archæology see Jensen, *Kosm.* 193 272 *f.*; E. Meyer, *ZDMG* 31 717 ['77]; Tiele, *Gesch. van den Godsdienst in die oudheid*, etc. ('93), 224; WMM *As. u. Eur.* 313. T. K. C.

ANATHEMA. See BAN, § 3.

ANATHOTH (עֲנָתוֹת, αναθωθ [BAL]), a town of Benjamin (cp below, 2), theoretically included by later writers among the so-called Levitical cities (see LEVITES), Josh. 21 18 P; 1 Ch. 6 60 [45] (αγχωχ [B], -ωc and αναθωθ [A], εναθωθ [L], Neh. 7 27 ναθωθ [A; om. B]).

The form of the ethnic varies in edd. and versions[2] (cp also ANTOTHIJAH). ABIEZER, 2, is called הָעַנְּתֹתִי, 2 S. 23 27, AV the ANETHOTHITE (ανωθειτης [B], αναθωθ. [Al, -ωθι [L]), הָעֲנְּתוֹתִי, 1 Ch. 27 12 (AV, ANETOTHITE, ὁ ἐξ αναθωθ [BAL]), and finally הָעֲנְּתֹתִי, 1 Ch. 11 28 (AV ANTOTHITE, αναθωθ[ε]ι [BA], -ωθιτης [L]). The last-mentioned form is used to designate JEHU, 5, in 1 Ch. 12 3 (ὁ αναθωθ[ε]ι [BAL], -βωθει [ℵ]; 4, αναθωθει [ℵ] not in Heb. or 𝔊BA). RV in each case ANATHOTHITE.

The name appears to be the plural of ANATH, and may refer to some images of that goddess which once stood there. Under the form Anath the place seems to be once referred to in the Talmud (*Yoma* 10*a*), where its building is assigned to Ahiman the Anakite. Tradition said that Abiathar, the priest in David's time, had 'fields' at Anathoth (1 K. 2 26); and Jeremiah was born of a priestly family which had property there (Jer. 1 1, 29 27 32 7-9, ανανα‌θωθ [A*v. 7] 37 12). It is once referred to by Isaiah (Isa. 10 30), and is mentioned in the great post-exilic list (see EZRA, ii. § 9), Ezra 2 23 = Neh. 7 27 = 1 Esd. 5 18 (ενατου [B]):

The connection of Anathoth with Jeremiah gives a special interest to its identification. A tradition, not older than the 15th century, fixes it at Ḳariet el-'Enab (Robinson's Kirjath-jearim); but, as Robinson has shown, it can only be the village now called *'Anāta*, which is situated NE. of Jerusalem, just at the distance required by the *Onomasticon*, and by the reference in Isa. 10 30. 'Anāta is well-placed, but only from a strategical point of view. Eastward and south-eastward its inhabitants look down on the Dead Sea and the Lower Jordan—striking elements in a landscape, no doubt, but depressing. Jerusalem is quickly accessible by the Wādy Sulēm and Scopus, but is not within sight. Here the saddest of the prophets presumably spent his earlier years.

2. b. BECHER (*q.v.*) in genealogy of BENJAMIN [§ 9, ii. *a*], 1 Ch. 7 8 (αναθων [BAL]).

3. Signatory to the covenant (Neh. 10 19 [20]). See EZRA, i. § 7. T. K. C.

ANCHOR (αγκυρα), Acts 27 29. See SHIP.

ANDREW (ανδρεας [Ti. WH] 'manly'), one of Christ's twelve disciples. Like Philip, he bore a Greek name; but so did many Jews of his time, and in Dio Cassius (68 32) we meet with another instance of a Jew called Andrew.

Besides the account of his call (see PETER), and his inclusion in the lists of the apostles (see APOSTLE, § 1), nothing is said of Andrew in the Synoptics, except that, in Mk. 13 3, he appears as one of the inner circle within the twelve, for he is one of the four who question Christ 'privately' about the impending ruin of the temple.

In the Fourth Gospel the picture is more fully drawn, and in one respect completes and explains the account of Andrew's call given in the Synoptics. We read that he belonged originally to Bethsaida (Jn. 1 44), that he was a disciple of the Baptist and heard his witness to Christ, that he and a companion (no doubt John) asked the wandering teacher where he dwelt, and went with him to his temporary home. Then, having 'found the Messiah,' Andrew made his brother, Simon Peter, a sharer in his joy. We next meet with Andrew, on the E. of the lake of Galilee, at the miraculous feeding of the multitude, on which occasion it is he that tells our Lord (6 8 *f.*) of the lad in the crowd who has 'five barley loaves and two fishes.' Once more, when the end is near, he shows in a memorable scene his special intimacy with the Master. When Greeks approach Philip with the 'desire to see Jesus,' it is to Andrew first that Philip communicates the request which they together lay before Christ (Jn. 12 22).

The rest of the NT, apart from the list of the disciples in Acts 1 13, is absolutely silent about Andrew. Such other tradition as we have is worthless.

Eusebius (*HE* iii.) speaks of him as preaching in Scythia, and we have in Andrew's 'Acts' the story of his martyrdom, at Patræ in Achaia, on a cross shaped like the letter X. Acts of Andrew the Apostle were in circulation among the Gnostics of the second century, but survived only in various Catholic recensions of much later date. Harnack enumerates (1) *Acta Andreæ et Matthiæ* (and their mission to the Anthropophagi) in Greek (edited by Tisch. *Act. Apost. Apocryph.*), Syriac (edited by Wright, *Apoc. Acts of the Apostles*), Ethiopic, and Coptic (fragmentary). The Latin version survives only in its influence on the Anglo-Saxon *Andreas and Elene* by Cynewulf, and in the *Miracula B. Andreæ* by Gregory of Tours; see Lips. *Apokr. Ap.-gesch.* 1 543 *ff.*, cpp. 27. (2) *Acta Petri et Andreæ* in Greek (fragments edited by Tisch.) as well as in an Ethiopic recension and a Slavonic translation (cp Lips. 1 553 *f.*). (3) *Martyrium Andreæ* in various Greek recensions (one edited by Tisch.), and in Latin (Harnack, *Altchrist. Lit.* 1 127 *f.*, cp Lips. 1 564 *ff.*). A 'gospel of Andrew' is mentioned in the *Decretum Gelasii*.

ANDRONICUS (ανδρονικος [VA; ανδρογιον] 2 Macc. 4 38 A*). 1. The Deputy of Antiochus Epiphanes

[1] Reading in Judg. 5 6, 'In the days of Shamgar and Ben Anath.' The notice in 3 31, which is much later than the song (see Moore) is, of course, valueless.

[2] Ba. and Ginsb., however, read everywhere עֲנְּתוֹתִי (cp the former's note on 1 Ch. 11 28). Exceptionally in Sam. *l.c.* Ginsh. עֲנְּתֹתִי.

in Antioch, who (according to 2 Macc. 4 31 *ff.*), at the instigation of Menelaus, put to death the deposed high priest Onias—a deed for which he was himself slain with ignominy on the return of the king. See MACCABEES, SECOND, § 3, end.

2. Deputy of Antiochus at Gerizim (2 Macc. 5 23). See MACCABEES, SECOND, § 3, end.

3. Andronicus and Junias are named in Rom. 16 7 as kinsmen and fellow-prisoners of Paul, as of note among the apostles, and as having been 'in Christ' before him. The expression 'kinsmen,' if taken literally, seems to imply that they were Jews by birth; 'fellow-prisoners,' on the hypothesis that Rom. 16 3-20 belongs really to an Ephesian Epistle, has been conjectured by Weizsacker to allude to an imprisonment which they shared with Paul in Ephesus, most likely in connection with the great 'affliction' (2 Cor. 1 8-11), which ultimately led to his leaving that city (Acts 19 23-20 1); on the application of the term 'apostle' to them see APOSTLE, § 3. The name Andronicus was not uncommon among Greek slaves; and it has been conjectured that this Andronicus may have been the Jewish freedman of a Greek master.

In the lists of 'the seventy disciples' which we owe to the Pseudo-Dorothens and the Pseudo-Hippolytus Andronicus is spoken of as bishop of 'Pannonia,' or of 'Spain.' In the fragments of the (Gnostic) περίοδοι Ἰωάννου, he and his wife Drusiana figure prominently as hosts of the apostle John at Ephesus, and he is represented as having been made by that apostle πρόεδρος, or president, of the church of Smyrna. In the Greek church Andronicus is commemorated, along with Crescens, Silas, and Epænetus, on 30th July. See Lipsius, *Apokr. Ap.-gesch.* (Index, p. 184).

ANEM (עָנֵם), 1 Ch. 6 73 [58] = Josh. 19 21 EN-GANNIM (*q.v.*).

ANER (עָנֵר), 1. (Sam. ענרם; αυναν [ADEL]; Jos. ΕΝΝΗΡΟϹ, a Hebronite) Gen. 14 13 24†. Perhaps a local name; cp *Ne'îr*, a hill near Hebron (*ZDMG* 12 479 ['58]). The correctness of the name Aner, however, is doubtful. The *αυναν* of @ points to עינן, Enan (*i.e.*, place of a spring), a name which may refer to one of the six springs near Hebron—*e.g.*, the deep spring of Sarah called *'Ain Jedîdeh* (Baed.(2) 137), at the E. foot of the hill on which ancient Hebrou lay.

2. (αμαρ [B], ενηρ [A], αν. [L]) a city in Western Manasseh (1 Ch. 6 70 [55])—perhaps a corruption of TAANACH (תענך); cp Josh. 21 25. T. K. C.

ANETHOTHITE, ANETOTHITE. See ANATHOTH, 1.

ANGEL. The English word 'angel' is a transcription of ἄγγελος, 𝔊's translation of Heb. *mal'ākh* (מלאך).

1. Names. The English word denotes primarily superhuman beings; but both the Hebrew and the Greek terms are quite general, and, signifying simply ***messenger***, are used indifferently of human or superhuman beings.[1] Other terms, less ambiguous in this particular respect, also occur.

These are: 'gods' (אלהים, cp Ps. 8 5 [6], and see **AV**, RV mg. *ib.* **82** 1 6 97 7 138 1), 'sons of [the] god[s]' (בני [ה]אלהים, **cp** Gen. 6 2 4 Job 1 6 2 1 **38** 7, or בני אלים, Ps. 29 1 89 6 [7], EV text), '[sons of] the mighty,' 'mighty ones' (אבירים, Ps. 78 25, cp *ib.* **103** 20, גבּרי כח), 'holy ones' (קדשים, Jb. 5 1 Ps. 89 5 [6] Zech. 14 5 Dan. 4 14 [17] 8 13), 'watchers' (עירין, Dan. 4 14 [17]), 'host of heaven (צבא השמים, 1 K. 22 19 Dt. 17 3), 'host of the height' (צבא מרום, Is. **24** 21), or 'host of Yahwk' (צבא יהוה, Josh. 5 14, **cp** use of צבא in Ps. 103 21 148 2 Neh. 9 6, and 'God's camp,' מחנה אלהים, Gen. 32 2 [3]). In the case of Ps. 68 17 [18] (אלפי שנאן) we owe the **AV** rendering 'thousands of angels' to old Heb. tradition (Targ. Saad. and Abulw.), which treated the difficult שנאן as a synonym of מלאך (cp Del., ***ad*** *loc.*). RV 'thousands upon thousands' is equally hazardous; cp Dan. 7 10.

In the NT also we find other terms in use: 'spirits' (πνεύματα, Heh. 1 14), 'principalities' (ἀρχαί, Rom. 8 38), 'powers' (δυνάμεις, *ib.*, ἐξουσίαι, Eph. 6 12), 'thrones' (θρόνοι, Col. 1 16), and dominions' (κυριότητες, *ib.*); cp further Cremer, ***Lex. NT***(3) 0 *ff.* 237, and the Heb. and NT Lexicons, *s.vv.*

[1] Karppe (*Journ. As.* ser. ix., 9 128) reads מלך, a derivative of הלך, as if 'the walker' = 'the messenger,' or Yahwk marching (Is. 63 1, *SBOT*) as opposed to Yahwk mounted on the cherub (Ps. 18 10 [11]).

The earliest OT writings contain no definite or ystematic angelology, but indicate a prevalent belief in other superhuman beings besides YahwA.

2. Pre-exilic. These were (1) the 'other ;ods' or 'gods of the nations,' who were credited with eal existence and activity; cp, *e.g.*, Nu. 21 29 Judg. 11 24 ınd v. Baudissin, *Stud.* 1 55-79. (2) Closely connected vith these were the 'sons of God'—*i.e.*, members of he divine guild. There is but one pre-exilic reference o these (Gen. 6 2 4), whence it appears that they were ıot subject to Yahwè, but might break through the ıatural order of his world with impunity. (3) Attendants on Yahwè—in Is. 6 some of these attendants ire termed Seraphim (see SERAPHIM), but others iistinct from these seem to be implied; cp *v.* 8. In a iimilar scene (1 K. 22 19-22), those who attend YahwA and form his council are termed collectively 'the host of heaven.' Such divine councils are also implied in Gen. 3 22 11 7 (both J); cp the plurals in these passages with that in Is. 6 8, and the question in 1 K. 22 20. In another passage (Jos. 5 14 *ff.*)—the pre-exilic origin of which, however, has been questioned (Kue. ***Hex.*** 248 ET)—the host of YahwA appears as disciplined and under a captain. According to some, the 'hosts' in the phrase 'Yahwè (God of) hosts'—a phrase current in early times—were angels (Che. *Proph. Is.*(5) 1 11 *ff.*; see further NAMES, § 123). The original text of Deut. 33 2 *f.* contained no reference to angels (see Dillm. *Comm.*; cp also Driver). Another element in early Hebrew folklore worthy of notice in the present connection is the belief in the horsemen of the air (2 K. 2 12 6 17). For a parallel in modern Bedouin folklore cp Doughty, ***Ar. De.*** 1 449. 'The melaika are seen in the air like horsemen, tilting to and fro.' Angelic horsemen play a considerable part in later literature—*e.g.*, in Zech., Apoc.

The most noteworthy features, then, of the pre-exilic angelology are the following:—(1) except in Gen. 28 32, these beings are never termed 'angels.' 'Angel' occurs frequently in the singular, but only in the phrase 'angel of YahwA' (more rarely, 'of God'), which denotes, not a messenger of, and distinct from, YahwA, but a manifestation of YahwA himself in human form (see THEOPHANIES, § 4). Kosters treats even Gen. 28 10-12 17 32 1 [2] 18 1 *f.* 19 1 *f.* as statements of the manifestation of the one God in many forms (cp WRS *Rel. Sem.* 426 *f.*, 2nd ed. 445 *f.*), and concludes that, before the Exile, מלאך was used exclusively of appearences of YahwA. Against this, Schultz's reference (*OT Theol.* 2 219) to 1 S. 29 9 2 S. 14 17 19 27 [28] is not quite conclusive. (2) These attendants on Yahwè are not also messengers to men. Even if the angels of Gen. 28 32 be distinct from God, they bring no message. For such a function there was no need so long as Yahwè himself appeared to men. (3) Beside these subordinate divine beings that attend Yahwè, but have no relations with men, there are other beings ('other gods,' 'sons of the gods') which are not subject to Yahwè, and do enter into relations with men.

Comparatively few as are the early references to angels or kindred beliefs (cp DEMONS, § 1), they are yet such as to justify us in attributing a comparatively rich folk-lore on these matters to the early Hebrews;

3. Later. but it is not until the exilic and post-exilic periods that angels come into prominence theologically. They do so then in consequence of the maturing belief, on the one hand, in the transcendence of Yahwè, on the other, in his supremacy. The development of angelology at this time must also have been favoured by the contact of the Jews with the Persians; and some details of the later doctrine may be due to the same influence—*e.g.*, the naming of angels, although the great majority of the names themselves (as in

Enoch 6 69) are quite clearly Hebraic, though of **a** late type (cp *HPN*, p. 210).

With the growing sense of Yahwè's transcendence, belief in his self-manifestation in human form ceased; and thus the phrase 'angel of YahwP,' set free from its old meaning, now came to denote one of the beings intermediate between YahwP and men. At first it was apparently the title of a particular angel (Zech. 1_{11} *f.*), but subsequently it became a quite general term (note the pl. Ps. 103_{20}, cp 34_7[8] and NT *passim).* It is now by angels, and no longer directly, that Yahwè communicates with men—even prophets. The experience of Ezekiel marks the transition—Yahwè speaks to him, sometimes directly (44_2), sometimes through another (40_3). With Zechariah the change is complete. He never sees Yahwè; he receives all divine instructions through angels (contrast Am. 7*f.*). Daniel receives the explanation of his visions in the same way; and in NT, warnings or other communications of the divine will are given by angels (Mt. 1_{20} 213, Lk. 1_{19}, Acts $10_{3\,30}$). The angels thus become the intermediaries of YahwB's revelation; but they are also the instruments of his aid (Ps. 91_{11} Dan. 328, and frequently; cp later, 2 Macc. 11 6 3 Macc. 6_{18}, Susan. 42 *ff.* [in LXX, but not in Theod.], Bel and Drag. 34-39; cp Acts $8_{26\,39}$*f.* Tobit, *passim*, Acts 12_7*ff.*, and especially Heb. 1_{14}), or punishment (Ps. 78_{49} 35_5*f.* Enoch 53_3 611 62_{11} 631 Apoc. Rar. 2123 Rev. 6 *f.*, also in 𝔊 Job 20_{15} 33_{23} 40_{11} *[v.* 6 in Heb. and EV] and see further below, § 5). Especially prominent in the apocalyptic literature is the cognate belief in the intercession of angels with God, in behalf of the righteous, or against the unrighteous: see, *e.g.*, Enoch 9_{10} 15_2 406 (where the function is specially referred to Gabriel, 40_{69}; yet cp also Tob. $12_{12\,15}$ where Raphael intercedes) $99_{3\,16}$ 104_1 Rev. 8_3*f.* Cp also in OT, Zech. 1_{12} Job 51 33_{23} Eccles. 56[5], and perhaps in NT, Mt. 18_{10}, unless this be a case of angelic guardianship.

In other respects also, the later angelology shows the influence of the growing sense of Yahwè's transcendence;

4. Supremacy of Yahwè.

the angels, exalted far above men by the functions just mentioned, are themselves abased before God (Iob 4_{18}). The awful exaltation of even angels above-men, is prominent in Daniel (Dan. $8_{16\text{-}18}$ 10_{16}*f.*). The countless number of the angels is emphasised (Job 33_{23}, Dan. 7 10, and later, Enoch 40_1 718 Mt. 2653 Heb. 12_{22} Apoc. Bar. 48_{10} 5111 59_{11}), and they are divided into ranks. Even in Zech. the angel of YahwP is a 'kind of grand vizier receiving the report of (less exalted) angels' (Smend). This conception of ranks becomes, later, more detailed[1] (see Dan. 10_{13} **121** Tob. 12_{15}, and Enoch—*e.g.*, chap. 40), and creates in **Gk.** the term ἀρχάγγελος (see Charles, *Book of Enoch*, p. 67; 1 Thes. 416 Jude 9); it may be traced farther, in NT, in the references to the 'seven spirits of God' (Rev. 45 cp 8_2), and to Michael (Jude 9 Rev. 12_7) and Gabriel (Lk. 1_{19}); probably also in the use of several terms together, in certain passages (*e.g.*, thrones, dominions, principalities, powers, Col. 1_{16}), and perhaps in the term 'elect angels' (1 Tim. 5_{21}).

The doctrine of YahwB's supremacy involved either an absolute denial of the existence of other superhuman beings or their subordination to him. To the latter method of accommodation post-exilic angelology owes some striking features. Thus, the patron angels of nations (clearly referred to in Dan. $10_{13\,20}$ 12_1, probably also in Is. 24_{21} *ff.* Joel 3[4]$_{11}$ Pss. 82 58_{10}; see Che. *Book of Psalms*[(1)] 229 *ff.* and *comm.*) are merely the ancient 'gods of the nations'—for which, in this connection, cp especially Dt. 4_{19} 29_{25} *f.* 338 𝔊—transformed to suit the new doctrine. Again, the 'sons of the Elohim'—formerly independent of YahwP, whose laws they broke with impunity—now become identified with the angels (cp Ps. 29_1 with 103_{20}, and 𝔊's translation of Gen. 62 [not L] Job 16 etc., cp also Lk. 2036); as such they constitute his council and do his bidding (Job 1 6 21; cp Zech. 1_{11}*f.*). Similarly, the host of heaven, which in the later years of the monarchy had been favourite objects of worship (cp, *e.g.*, Zeph. 1 5 Jer. 82 Dt. 4_{19}), and therefore rivals of YahwP, now again become subject to him and do him homage (Neh. 9 6); he is as supreme over them as over men (Is. 45_{12}, cp 40_{26}); he is equally supreme over all gods (*e.g.*, cp Ps. 964).

On the other hand, the difficulty with which Yahwè's claim to universal worship against all others was

5. Supremacy incomplete.

established-is also reflected in the new angelology. YahwB's supremacy over the 'gods,' or the 'host of heaven,' was won and maintained only by force (Job 25_2 cp **2122** Is. 24_{21} 3445; cp 271—for the passages in Job see Davidson's, for those in Isaiah, Cheyne's *Comm.*). This incomplete assimilation of the 'other gods' etc. to beings wholly subservient to YahwP, combined with a growing dislike to attribute evil or disorder directly to him, led to the differentiation of angels as beneficent or maleficent (see DEMONS, § 5, **SATAN, § 3**); but the OT nowhere lays stress on the moral character of angels, or knows anything of their 'fall.' Consequently, angels were divided not into good and bad, but into those who worked wholly, and those who worked only partly, in obedience to God. This latter division still seems to hold its own in NT alongside of the former; and, for this reason, in passages such as Rom. 838 1 Cor. 15_{24}*f.*, the question 'Are the angels referred to good or bad?' is probably ont of place (cp Everling).

For several centuries after the Exile the belief in angels did not gain equal prevalence in all circles: thus

6. Schools of belief.

P never mentions them (on Gen. 126 2_1 see Dillm.); the Priestly Chronicler does so but rarely—save when quoting directly from his sources—and Esther, Ecclesiasticus, Wisdom, and Maccabees, are marked more by the absence than by the presence of such references; 'Angel' does not occur in the Hebrew of Ecclus. 48_{21}. Still later the differences become conspicuous; the Sadducees were credited with complete scepticism (Acts 23 8); the ESSENES (*q.v.*, § 3) attached an exaggerated importance to the doctrine; the popular Pharisaic party and all the NT writers share, in general, the popular beliefs. Yet in John angels are alluded to only in 20_{12} 1_{51} (a passage based on an OT narrative), 12_{29} (a saying of the populace), and the intrusive verse 5_4; the epistles contain no mention of them (cp the comparative infrequency of references in John to demons (*q.v.*, § 6).

Several features of NT angelology have been already incidentally discussed; they are common to both Jewish

7. Apocalypses and NT.

and Christian writings. Scarcely less influential over the writers of the NT than the OT were the apocalypses then already extant—especially Enoch. It is in Enoch we

1 [The influence of non-Jewish upon Jewish beliefs can here scarcely he denied. These are the facts of the case: In Daniel (10 13) we hear of **a** class of 'chief princes,' two of whom (GABRIEL and MICHAEL, 11) are named (chaps. 10-12; cp also RAPHAEL and URIEL). In Tob. (12 15) the numher of the 'holy angels who present the prayers of the saints, and go in before the glory of the Holy One,' is given as seven (if the text is correct). In Enoch the number of the chief angels varies between, three, four, six, and seven (see chaps. **20** 40 2 78 1 89 1 90 21 **31**, and other passages). Manifestly this highest class of angels was suggested by the Zoroastrian Amesha Spentas or Amshaspands ('immortal holy ones'), who (like the counsellors of the king of Persia, Ezra 7 14) are seven, and this seems to he confirmed by the reference to the archangels in the **Book** of Tobit, which also mentions the Zend name of the chief demon (see ASMODEUS). In referring *to* this Iranian belief, however, we must not forget the possibility that it is to some extent historically connected with Babylonian spirit-lore. The **cultus** of the seven planets is no doubt primeval in Babylonia, and may have spread thence to the Iranian peoples. To explain the belief in the archangels solely from Babylonian sources would he plausible only if the Zoroastrian Gāthas, which are pervaded by the belief in the Amshaspands, were not earlier than the time of Philo. For this hold theory see Darmesteter, *Le Zendavesta* **3** 56 ('93), etc.; hut contrast the same writer's earlier theory in *SBE* (*Zendavesta*, i. Introd.).—T.K.C.]

first see elaborated a doctrine of the 'fall' of angels. The fall is regarded as the punishment for the intercourse mentioned in Gen. 6 2-4, and for an improper revelation of 'the secret things of the world' (cp in NT Jude 6 2 Pet. 2 4). Through their fall they become inferior to men, who therefore judge them (En. 14 4-7 15 2; cp 1 Cor. 6 3 Heb. 2). Enoch should be especially compared with Revelation.

The influence of the OT may be clearly seen in the NT angelophanies, which seem modelled on those of the early OT narratives,—only that now, under the influence of the later development, the angel is quite distinct from God (Acts 10 3 *f.* is not an exception). These angelophanies abound in the nativity and resurrection narratives and in Acts (5 19 8 26-40 10 3-7 30-32 12 7-11 27 23), but are conspicuous by their absence from the narratives of the life of Christ—the badly attested passage Lk. 22 43 being unique, except so far as Mt. 4 11 = Mk. 1 13 (contrast Lk. 4 4 *ff.*) may be considered parallel.

8. Jesus. Jesus accepts the popular belief in the existence of angels, but never (even in Mt. 18 10 or 26 53) countenances the belief that they influence life in the present—perhaps in the parable of the wheat and the tares (Mt. 13 24-30 37-40) he directly discountenances it. All he says of them has reference to themselves alone, or to their relations to men after life. Thus, at the second coming they will accompany the Son of Man (Mt. 16 27 and parallels; Jn. 1 51), and will then separate the good from the evil (*e.g.*, Mt. 13 41; cp Lk. 16 22). They do not marry (Mt. 22 30, and parallels); their knowledge is limited (Mt. 24 36 = Mk. 13 32); and they rejoice over repentant sinners (Lk. 15 10; cp Lk. 12 8 *f.*, with which contrast Mt. 10 32 *f.*, and cp earlier, Job 33 23). In particular, Jesus breaks away from the prevailing tendency to make angels the intermediaries of revelation: he himself becomes the sole revealer (Mt. 11 27 Jn. 1 7 6; cp 14 6 *ff.*), he will himself always be with his disciples (Mt. 28 20), and will instruct them directly (Lk. 21 15), or through the Spirit whom he sends (Jn. 15 26 14 17 26). Thus this part of the doctrine of angels was doomed to give way to the Christian doctrines of the abiding presence of Christ and of the Holy Spirit. It still survives, however, in Revelation (1 1 17 1 21 9; cp also in the contemporary Jewish *Apoc. Bar.* 55 3, 'The angel Ramid who presides over true visions'); also in Acts (10 3 *ff.* 27 23?)—yet here alongside of the new belief (10 13-16).

9. Paul. Paul already shows the influence of the teaching of Jesus—he claims to receive his gospel direct from him (Gal. 1 12 15 *f.*; cp Acts 9 3-6)—but still shares (Gal. 3 19) the common belief (Acts 7 53 Heb. 2 2 Jos. *Ant.* xv. 5 3; cp Dt. 33 2 𝔊) in the past instrumentality of angels in revelation, perhaps also in the present possibility of the same (Gal. 1 8; cp? 4 14). With him, too, angels still play a large part in human-life; his own practice and practical exhortations are governed by this belief (1 Cor. 4 9 6 3 11 10). An emphatic warning, however, is uttered against a practice (which was springing up in some quarters) of worshipping angels (Col. 2 18 cp Rev. 19 10). In the same epistle the creation of angels is asserted (1 16)—a point to which, as might be expected, no reference had been made in OT, where they are once mentioned as being present at the creation of the world, Job 38 7 (in Jewish literature, cp Jub. 2 2 Apoc. Bar. 21 6). The question whether Paul associated angels with cosmical forces turns on the interpretation of τὰ στοιχεῖα τοῦ κόσμου, Gal. 4 3 Col. 2 8 20 (see, on the one hand, Lightfoot, *in loc.*, on the other, Everling, as cited below, and cp ELEMENTS). Such an association would, at least, have accorded with the tendency of the time: note the angels of binds, sun, fire, and water, etc. (Rev. 7 1 19 17 14 18 16 cp Heb. 1 7 and Jn. 5 4, and, somewhat earlier, Enoch 60 11 *ff.* 61 10). The tendency began much earlier; in the OT angels and stars are closely associated (cp Job 38 7 Is. 34 4, and, in general, the double meaning attaching to the phrase 'host of heaven'); and the transition from Ps. 104 4 to a fixed belief in elemental angels is easy. . See PERSIA.

10. Literature. The literature of the subject is large; all the Old and New Testament Theologies contain discussions. on the OT, Piepenbring's *Théol. de l'ancien Test.* 1888 (ET, New York, '93) and Smend's *AT Rel.-gesch.* ('93) are specially helpful. The chief monographs for the OT are by Kosters ('De Mal'ach Yahwk' and 'Het ontstaan en de ontwikkeling der Angelologie onder Israël' *Th.T* 9 367-415 ['75], 10 34-69 113-141 ['76]; for the Pauline Doctrine, by Everling (*Die Paulinische Angelologie und Dämonologie* ['88]). On the vocabulary of the subject see M. Schwab, *Vocabulaire de l'angélologie d'après manuscrits hébreux* (Paris, '97). The question of foreign influence is discussed by Kohut (*Ueber d. jüd. Angelologie u. Demonologie in ihrer Abhängigkeit vom Parsismus*); for further literature on this point see Che. *OPs* 282. See further the valuable discussions of Montefiore (*Hibb. Lect.* viii., esp. p. 429 *ff.*), and Cheyne (*OPs* 322-327, 334-337), and cp Lueken, *Michael* ('98).

G. B. G.

ANGLE (Is. 19 8 Hab. 1 15). See HOOK, 3, FISH, § 3.

ANIAM (אֲנִיעָם, surely not 'mourning of the people' [Ges.], but miswritten [see 𝔊^B] for אֱלִיעָם, see ELIAM; differently Gray, *HPN* 44 n. 1, who would omit ׳, and derive from נעם; αλιαλειμ [B], ανιαμ [A], EN. [L]), in genealogy of MANASSEH (1 Ch. 7 19†). T. K. C.

ANIM (עָנִים, αιcαμ [B], ανειμ [A], -ιβ [L]), Josh. 15 50†, a hill town of Judah, mentioned after Eshtenioa (a name equally distorted in 𝔊^B). Perhaps the modern el-Ghuwein, which lies to the south of el-Khalil (Hebron) between es-Semū' and Tell 'Arād.

ANISE (ανηθον [Ti. WH], Mt. 23 23†) or DILL (RV mg.) is the plant *Anethum graveolens*.[1] The correct rendering is 'dill,'[2] and the plant is distinct from *Pimpinella Anisum*, which is the modern 'anise.' The biblical plant is described (Fluckiger and Hanbury's *Pharmacographia* (2) 327 *f.*), as 'an erect, glaucous annual plant, with finely striated stems, usually one foot to one foot and a half in height, pinnate leaves with setaceous linear segments, and yellow flowers. It is indigenous to the Mediterranean region, Southern Russia, and the Caucasian provinces, but is found as a cornfield weed in many other countries, and is frequently cultivated in gardens.'[3]

It is mentioned in Mt. 23 23, along with mint and cummin,[4] as being subjected by the scribes and Pharisees to tithe. This practice accords with the general principle stated. at the commencement of the Mishnic tract on 'tithes' ('Whatsoever is food, and is private possession, and has its increase out of the earth, is subject to tithe'—a rule based on the precept of Deut. 14 22, 'Thou shalt surely tithe all the increase of thy seed, that which cometh forth of the field year by year'), and the liability of dill in particular to tithe is, in the Talmud, specially mentioned (see the references in Celsius, *Hierobot.* 1 497). N. M.—W. T. T.-D.

ANKLETS and **ANKLE-CHAINS.** These have ever been favourite ornaments among Orientals.[5] Probably the oldest specimens are some in gold and silver which have been found in Egypt, where they appear to have been worn by men as well as women. The chains obliged the wearers to take short and tripping steps. To enhance the effect, bells were (at

[1] The Syriac and the Arabic versions correctly render by the word *shĕbhettā*, *shibitt*—a name for this plant which is probably derived from Persian (see Low, 373).

[2] This though supplanted by 'anise' in all the English versions 'from Wyclif onwards, is the word used in the A.S. version, 'myntan and *dile* and cymmyn.'

[3] Virgil gives it a place in the flower-garden (*Ecl.* 2 48), and Pliny in the vegetable-garden (*HN* xix. 8 52). Cp the Greek reff. in Liddell and Scott.

[4] In the parallel passage in Lk. (11 42) dill is not mentioned—'mint and rue and every herb (πᾶν λάχανον).'

[5] Cp Ar. *ḥalḥāl*, and Gk. περισφύριον and περισκελίς, the latter of which is 𝔊's rendering of the Heb. מִכְנָסַיִם (in the plur. or dual) 'breeches.'

any rate, in later times) attached to the chain—a practice which is alluded to in terms of disapproval in the Koran (*Sur*. 24 31). Ornaments of this nature are referred to in Is. 3 18.

They are here called עֲכָסִים,[1] RV 'anklets,' AV 'tinkling ornaments' (𝔊 ἐμπλόκια), a word from which comes the denominative verb in *v.* 16 (ברגליהם תעכסנה 'they make a tinkling with their feet,' 𝔊 παίζουσαι). Similar is צְעָדָה Is. 3 20†, RV 'ankle chains,' AV 'ornaments of the legs,' 𝔊 uncertain (cp Targ. שירי רגליא); cp אֶצְעָדָה, Nu. 31 50, RV as above, AV 'chains,' 𝔊 χλίδων. In spite of its apparently obvious connection with צעד 'to walk,' צעדה is applied also to ornaments worn on the arms: see BRACELET, 5.

ANNA (ΑΝΝΑ [BℵA]), the Greek form of the name HANNAH.

1. Wife of Tobit (Tob. 1 9 *ff.*).

2. Daughter of Phanuel, of the tribe of Asher (Lk. 2 36-38). Like Simeon, she represents the class of those who 'waited for the consolation of Israel,' and, like him, she is said to have had the gift of prophecy. Being constantly in the temple, and prepared for the honour by fastings and prayers, she was enabled to meet the child Jesus and his parents, when, like Simeon, she burst into a prophetic song of praise. She is also, it would seem, a prototype of the 'widows indeed' (see WIDOW) of the early Christian community (1 Tim. 5 9): hence the particularity with which the circumstances of her widowhood are described.

The name Anna or Anne became common among Christians from the tradition that the niother of the Virgin Mary was so called.

ANNAAS (CΑΝΑΑC [A]), 1 Esd. 5 23 AV = Ezra 2 35 SENAAH.

ANNAS (ΑΝΝΑC [A]), 1 Esd. 9 32 RV [Heb. חָרִם, § 50] = Ez. 10 31 HARIM.

ANNAS and CAIAPRAS (ΑΝΝΑC [Ti. WH]; ΚΑΙΑΦΑC [Ti. WH]). In 6 A.D. Quirinius, who on the deposition of Archelaus became governor of Syria, followed the custom of the Herodian family and appointed a new high priest. His choice fell on a certain Ananos (so in Josephus) or Annas (so in NT), son of Sethi (Jos. Σεθί) who continued to hold the office until the change of government in 15 A.D. Valerius Gratus, who succeeded Quirinius, gave the post in succession to three men, none of whom, however, held it for more than a year. The second of the three was a son of Annas, called Eleazar by Josephus (*Ant.* xviii. 2 2). At last, in 18 A.D., Valerius found in Joseph, called Caiaphas, one who was strong enough to hold the office till 36 A.D. Then Vitellius (35-39 A.D.) once more, in 36 and 37, appointed, one after the other, two sons of Annas named Jonathan and Theophilus (*Ant.* xviii. 4 3 5 3). Jonathan still held a prominent position in 50-52 (*BJ* ii. 12 5 *f.*), a point of which we have good proof in the fact that Felix caused him to be assassinated (*BJ* ii. 13 3 *Ant.* xx. 8 5). As in Acts 4 6, Annas, Caiaphas, Jonathan (so D; the other MSS have Joannes, EV JOHN), and ALEXANDER are assigned high-priestly rank, and the first three can be identified from Josephus, JONATHAN being a son, and CAIAPHAS, according to Jn. 18 13, a son-in-law of Annas, we seem to have good reason for conjecturing Alexander to be the Græcised name of Eleazar the son of Annas.

CAIAPHAS, then, was the acting high priest at the time of the trial of Jesus. His long term of office shows that in his relations with the Romans he must have been obsequious and adroit. Mk. and Lk. do not mention him in their account of the passion; but in Jn. 11 49 18 13 *f.* 24 28 and Mt. 26 3 57, we read that he presided over the proceedings of the Synedrium; he therefore it was who rent his clothes. According to Jn. 11 49-52, he became also an involuntary prophet as to what the death of Jesus meant.[1] With regard to his character in general, the accounts accessible to us give no details.

The most important personality in the group would appear to have been old ANNAS. This seems to be sufficiently implied in the fact that four of his sons[2] and a son-in-law successively held the high-priestly office—whether we assume that Annas expressly wrought for this end, or whether it was simply because those in power sought by this means to win him over to themselves. Only on the assumption that he was, in truth, the real manager of affairs, can we account for it that, according to Jn. 18 13-24, he gave a private hearing in the case of Jesus, as also that Lk. (Lk. 3 2) names him as colleague with Caiaphas, and (Acts 4 6) enumerates him in the first place, along with Caiaphas and two of his high-priestly sons, as holding high-priestly rank. Other instances, however, of a similar co-ordination of past high priests are not unknown; for example, in the case of Jonathan, son of Annas (*BJ* ii. 12 5 *f.*), of Ananias son of Nedebaios (*Ant.* xx. 9 2-9; see ANANIAS, 9), and of the younger Ananos and Jesus son of Gamaliel, both of whom were high priests for some time during the years 62-65, and had the conduct of affairs in their hands during the first period of the Jewish wars.

The Annas (Ananos) just mentioned, son of Annas, appointed in 62 A.D. by Agrippa II., availed himself of the confusion following on the death of Festus to procure the death of his enemies by tumultuary sentence. Among the victims of his tyranny was, it would seem, James, the brother of the Lord. The passage relating to it in Josephus (20 9 1), however, may perhaps be a Christian interpolation (see JAMES, § 3, end). In any case, the acting himself, even before the arrival of the new procurator, put an end to Annas's reign of terror by deposing him from the high-priesthood after a tenure of three months. H. v. S.

[1] Cp עֶכֶס a fetter (?) in Pr. 7 22, the pr. name עַכְסָה (see ACHSAH) and the Ar. *'ikās*, a chain connecting the head and forefoot of a camel—the usual method of hobbling the animal.

[1] It has been suggested that the reference to his prophesying may have arisen out of a popular etymology of Caiaphas, cp Ar. *ḳā'if* = soothsayer ('qui movit vestigia et indicia rerum, physiognomus,' Freyt.). cp Nestle, *ZWTh.* 40 149, and see Dalm. *Gram.* 127, n. 4. Blass thinks that Nestle has upset the etymology from כיפא 'stone' and כַּיְפָא 'oppression,' by showing that the name in Aramaic is written with ק, not כ.

[2] The fourth, Matthias, was appointed to the office for a short time, between 41 and 44, by Agrippa; perhaps Annas did not live to see this, and certainly he did not survive to see the priesthood held by his fifth son, Ananos II. (in 62 A.D.).

ANNIS, (ΑΝΝΕΙC [B]), 1 Esd. 5 16 RV, RVmg. **Annias**, AV ANANIAS (*q.v.*, 1).

ANNUUS (ΑΝΝΟΥΝΟΝ [A], om. BL), 1 Esd. 8 48, a name not in Ezra 8 19—in Ezra's caravan (see EZRA, i. § 2, ii. § 15 (1) d)—supposed by some to be a corruption of 'with him' (אתו) in Ezra, which may itself be a misread sign of the accusative (so 𝔊BAL).

ANOINTING. In the OT two distinct Hebrew terms, frequently occurring, are translated in EV by 'anoint,'
1. Terms. while a third (נסך) is incorrectly so understood in Ps. 2 6 by Targ. and Sym. and also by Ewald (cp We. *Heid.*(1) 118). (*a*) סוּךְ (*sūk*) is *always* (Dt. 28 40 Ruth 3 3 2 S. 12 20 14 2 2 Ch. 28 15 Ezek. 16 9 Dan. 10 3 Mic. 6 15) used of the application of unguents to the human body as a matter of toilet, and hence Ex. 30 32 means that the holy anointing oil shall not be used for ordinary toilet purposes. (*b*) משח (*māshaḥ*) and its derivatives.[3] In this case we have to distinguish between the primary physical, and a secondary and metaphorical use. In its physical sense משח is used (1) rarely, probably with the retention of the original meaning of the root, of rubbing an unguent or other substance on an object,—*e.g.*, oil on shields (Is. 21 5

[3] On these, as well as on several matters referred to in the course of this article, Weinel's study 'משח und seine Derivate' (*ZATW* 18 1-82 ['98]) should he consulted. Unfortunately, it appeared too late to be used in the preparation of the present article.

2 S. 1 21), paint on a ceiling, Jer. 22 14 (here translated in EV by 'painted'),—and probably we should interpret the word similarly in the recurring phrase (*e.g.*, in Ex. 29 2) 'wafers unleavened anointed with oil'; (2) of the application of unguents to persons or things *as a religious rite;* for details see below (§ 3 *ff.*), but observe that, with the possible[1] exception of Am. 6 6, משׁח is *never* used in the sense of סוּך. In its metaphorical sense מָשַׁח is used of the divine appointment or selection of a man for a particular purpose—viz., for the kingship (1 S. 10 1 15 17 2 S. 12 7 2 K. 9 3 6 12 Ps. 45 7 [8] 89 20 [21] 2 Ch. 22 7; cp below, § 5). For the relation of the term מָשִׁיחַ to the usages under discussion see MESSIAH, § 1. 'Anoint' in Ps. 92 10 [11] corresponds to Heb. בלל,[2] in Ps. 23 5 it corresponds to דִּשֵּׁן; 'anointing' in the probably corrupt passage Is. 10 27 corresponds to שֶׁמֶן (𝔊^BNAQ om.) and 'anointed ones' in Zech. 4 14 (AV; but RV 'sons of oil'; 𝔊^BNAQ υἱοὶ τῆς πιότητος) to בני היצהר.

In NT the EV also confuses two sharply distinguished terms. χρίω, which in the LXX, as in classical Greek, may be used in a physical sense, is in the NT used *exclusively* (Lk. 4 18 [cp Is. 61 1] Acts 4 27 10 38 2 Cor. 1 21) of God in a metaphorical sense; for we can hardly regard the quotation from Ps. 45 7 [8] in Heb. 1 9 as an exception. The derivatives χρίσμα (1 Jn. 2 20 27) and χριστός are used similarly; but the compounds ἐγχρίω (Rev. 3 18 also Tob. 6 8 [9] 11 8) and ἐπιχρίω (Jn. 9 6 11) retain the original physical sense.

Thus the NT use of χρίω resembles the metaphorical use of משׁח. The other NT term, ἀλείφω, is *always* used of the application of unguents to the body, whether (like the Heb. סוּךְ which it frequently represents, *e.g.*, Ruth 3 3 Micah 6 15, cp also 2 K. 4 2 𝔊^BAL) for toilet purposes (Mt. 6 17 Lk. 7 38 46 Jn. 11 2), or medicinally (Mk. 6 13 Ja. 5 14), or as a tribute of respect to the dead (Mk. 16 1 cp Jn. 12 3 7).[3]

From the foregoing analysis of the terms, it will be clear that 'anointing' was practised by the Hebrews both for secular and for sacred purposes. The unguent used was olive oil, with or without the addition of aromatic spices; for details see OIL. Anointing formed among the Hebrews, as among many other peoples (cp, *e.g.*, Pl. *HN* xiii. 1-6), a regular part of a full toilet, being in particular associated with washing (Ruth 3 3 Ezek. 16 9 Sus. 17); the omission of it was a sign of mourning, the resumption of the practice a sign that mourning was over (2 S. 14 2 Dan. 10 3 [cp Mt. 6 17] 2 S. 12 20 Judith 10 3 cp Is. 61 3 Eccl. 9 8); and hence 'to anoint' is a suitable figure for 'to make glad' (Ps. 23 5 cp 45 7 [8]). The head and face appear to have been most usually anointed (Ps. 104 15 Judith 16 10 Mt. 6 17 Lk. 7 38 cp Ps. 23 5 141 5 Eccles. 9 8), and the anointing of the feet to have been a special luxury (Lk. 7 46 Jn. 12 3). The medicinal use of unguents is referred to not only in Ja. 5 14 Mk. 6 13, but also in Is. 1 6 Lk. 10 34. On anointing the dead see EMBALMING.

2. Toilet.

Leaving the significance of anointing as a religious rite to a final section, we will here simply classify the persons or objects which were so anointed; and first the persons. (*a*) *The king.* In the OT, especially in the earlier writings, there are numerous references to the anointing of kings (cp, *e.g.*, 1 S. 16 3 12 9 16 2 K. 23 30 Ecclus. 46 13), and so frequently of the Hebrew kings to whom the term 'Messiah of Yahwè' belonged pre-eminently, if not exclusively, in the days of the monarchy and even later (Lam. 4 20); for the anointing of a *Syrian* king (by a Hebrew prophet) see 1 K. 19 15, and cp the general reference in Judg. 9 8 15, and *Am. Tab.* 376 'Manaḫbi(r)ia, king of Egypt, . . . established my father . . . over the kingdom, and poured oil on his head.' (*b*) *The prophet.* How far it was usual to anoint a prophet we cannot say; but we have one allusion (in a narrative of the 9th or 8th cent.) to such an anointing which cannot be reasonably explained away; if 'anoint' in 1 K. 19 15*b* 16*a* be literal, it would be unnatural to consider it in *v.* 16*b* (as in Is. 61 1) metaphorical; cp Ecclus. 48 8. (*c*) *The priest.* References to the anointing of priests, as part of the rite of consecration, are numerous in P. We have to distinguish, however, between those passages which refer to the anointing of the high priest (Aaron) alone, and those which refer to the anointing of the priests in general (for the former cp Ex. 29 7 Lev. 8 12 6 20 [13], and, outside P, Ps. 133 2 Ecclus. 45 15; for the latter, Ex. 30 30 40 13-15). It seems probable that passages of the latter class are secondary (cp We. *CH* 141 *f.*; Di. on Lev. 8 10-12; Nowack, *Arch.* 2 124). In this case the anointing of the high priest may be inferred to have been an earlier custom than that of anointing all priests. This would account for the origin of the term הכהן המשיח, 'the anointed priest' applied to the high priest (Lev. 4 3 5 16 6 22 [15]; cp Nu. 35 25 Lev. 21 10 12 2 Macc. 1 10, and perhaps Dan. 9 25 *f.*), and for its subsequent disappearance when all priests were anointed (cp הכהנים המשׁחים Nu. 3 3). We may infer from Zech. 4 14 that the custom of anointing the high priest was at least as ancient as the close of the sixth century; but we have no earlier evidence. On the other hand, the contrast between a priest and 'Yahwè's anointed' (1 S. 2 35—a Deuteronomic passage), and the different terms in which the Chronicler (1 Ch. 29 22) and the earlier historian (1 K. 2 35) refer to Zadok's appointment, are worthy of attention. Cp further (for some differences of view) Baudissin, *Die Gesch. des AT Priesterthums* 25 *f.* 48 *f.* 140 253.

3. Religious rite: anointing of persons.

Lifeless objects also were anointed. (*a*) Gen. 28 18 31 13 35 14 are, as far as OT is concerned, isolated references to the anointing of *sacred pillars* (see MASSEBAH); but the custom was well-known in antiquity (cp Di. on Gen. 28 18; WRS *Rel. Sem.*(2) 232). (*b*) The *tabernacle* and its appurtenances. P contains directions or statements about anointing 'the tent of meeting' and all its furniture (which is mentioned in detail, Ex. 30 26), or 'the tabernacle and all that is therein' (Ex. 40 9 Lev. 8 10 Nu. 7 1), as part of the rite of consecration. Special reference is made to the anointing of the altar (Nu. 7 10 84 88). In Dan. 9 24 we find an allusion to the anointing of 'the most holy' (probably = the altar) in the reconsecration after the pollution of the temple by Antiochus Epiphanes.

4. Lifeless objects.

NT contains no reference to anointing as a religious rite, unless, indeed, we ought to infer from Mk. 6 13 Ja. 5 14 that magical—and so far religious—properties were attributed to the oil used in anointing the sick (as distinct from the wounded, Lk. 10 34); but before the close of the second century A.D. it had come to form part of the ceremony of baptism. See Smith and Cheetham, *Dict. of Christ. Antiq.*, *s.vv.* 'Chrism,' 'Unction'; Mayor's *Comm.* on James (on 5 14).

Anointing occurs repeatedly as a metaphorical term to express a religious idea. As we have seen (1) the Heb. term (משׁח) is sometimes and the NT term (χρίω) always used metaphorically with God as subject. The metaphor may have originated in, as it was certainly subsequently used to express, the idea of God pouring out his spirit

5. Metaphors.

1 Possible, but hardly probable (cp Ges.-Bu., *s.v.* מָשַׁח). The feast described in the context is sacrificial: see *v.* 4 and cp WRS *Rel. Sem.*(2) 241, 258, 430 n. 4, and note that the word used in *v.* 6 for bowl (מזרק) is elsewhere exclusively used in connection with sacrifice, cp Driver (*ad loc.*), who, however, takes the passage as a description of effeminate luxury.

2 The text, however, is very questionable. Many (*e.g.* Cheyne, *Psalms* (1), Baethgen), following 𝔊^BNART Sym. Jer., point בַּלֹּתִי instead of בַּלֹּתִי, and translate 'my old age' or 'my wasting strength' instead of 'I am anointed.' In *Psalms* (2) Che. reads מָלְאַת=מַלֹּתִי.

3 In Mk. 14 8† 'anoint' is μυρίζω (see MYRRH, 2).

on a man (or people) for a particular purpose—*e.g.*, on Saul to smite the Amalekites (1 S. 15 17), on Jehu to smite the house of Ahab (2 K. 9 6 *f.*), on 'the Servant' 'to preach good tidings' (Is. 61 1). Thus, after Yahwè has anointed Saul (1 S. 10 1), the spirit of Yahwè comes mightily upon him (*v.* 6), cp 1 S. 16 13; and the connection between the outpouring of the spirit and anointing is clear in Is. 61 1 (Lk. 4 18) 2 Cor. 1 21, and especially in Acts 10 38. Similarly, 'the anointing from the holy one' (1 Jn. 2 20 27) is the illumination of the Holy Spirit, which teaches those that receive it concerning all things. Hence, the term 'anointed' could suitably be applied to Israel as a people—*e.g.*, Hab. 3 13; *see* further MESSIAH, § 3. In Ps. 45 7 89 20, the whole phrase 'to anoint with oil' is used with God as subject; in these cases either the whole phrase is a metaphor, or *māšaḥ* has acquired a quasi-causative sense.

On the relation of the various terms and customs to one another there have been different views, some of which must be briefly referred to.

6. Primitive significance.

Some (*e.g.*, Kamphausen in the article 'Salbe' in *HWB*[(2)]) derive the religious from the toilet use, seeing in the rite of anointing both the means of setting apart to God some person or thing as clean and sweet-smelling, and also the symbol of such a condition. But (1) it may be questioned whether the sharp distinction of terms relative to the two uses (cp § 1) he not against this view; (2) there is no positive evidence that the Hebrews interpreted the rite in this way, unless we *so* regard the custom of mixing sweet-smelling substances in the anointing oil—a custom which cannot be traced before P; and *(3)* the metaphorical use cannot be satisfactorily explained in this way. Reasons have been given in the preceding section for thinking that the religions rite of anointing men was at any rate understood at an early period to symbolise the outpouring of the divine spirit; hut it is possible that this symbolism is not original, even in the case of persons. It certainly does not explain the anointing of things—particularly the pillar at Bethel. This custom Robertson Smith (*Rel. Sem.*[(2)] 233 379 8, especially 313 *ff.*, cp SACRIFICE) seeks to explain as a sacrifice, the oil being a substitute for the animal fat which was smeared (smearing, it is to be remembered, being the original sense of משׁח) by the Arabs on similar pillars, and played a considerable part in many other forms of sacrifice. Fat being, according to ancient thought, one of the great seats of life, was peculiarly fitted for the food of the gods (hence the anointing of the pillar), and also for imparting living virtue to the persons to whom it might be applied (hence the anointing of thing's or other persons). In this case the view that anointing symbolised the imparting of the divine spirit, is a refinement of the idea in which the custom may he presumed to have originated (cp COVENANT, § 5 end,). The anointing of the temple and sacred furniture will then be a survival similar to that of sprinkling them with blood. G. B. G.

ANOS (ανως [BA; om. L]), 1 Esd. 9 34, apparently VANIAH of Ezra 10 36.

ANT (נְמָלָה,[1] μυρμηξ [BNA]; *formica*, Pr. 6 6 30 25†).

1. Name and allusions.

Classical writers often refer to the industry, forethought, and ingenuity of the ant, and especially to its habit of storing grain-seeds beneath the ground in time of harvest.[1]

Thus Ælian tells us that so great is the industry of ants that, when there is moonlight they work by night as well as by day. It was noticed how carefully their work was organised; they were described as marching like an army, the oldest acting as generals; when they reached the cornfield the older ants ascended the stalks and threw down the graids to the others, who stood around the foot. Each took its part in carrying away the food to their subterranean homes, which were carefully constructed with several chambers, and protected above hy walls of earth to keep out the rain. The seeds were divided into two, sometimes into four, segments, and in other cases peeled, to prevent their sprouting; if wetted by rain, they were brought out and carefully dried in the sun. The ant showed a weather-knowledge far surpassing man's. It was in all respects a πολιτικὸν ζῷον, and is so classed by Aristotle along with the crane and the bee.

The same observations are repeated in later times by Arabic and Jewish writers.

The Mohammedans seem to have associated the ant with Solomon: the 27th chapter of the Koran is styled 'the ant, because it mentions that Solomon, on his march, once entered 'the valley of ants,' whereupon an ant said, 'O ants, enter into your habitations, lest Solomon and his army tread you underfoot and perceive it not.' It was a custom with the Arabs, says Bochart, to place an ant in the hand of a new-born child, with a prayer that he might grow up wise and sagacious.

The only two passages in the OT which mention the ant obviously refer to some species of Harvesting Ant

2. Species.

—probably either to *Aphænogaster* (formerly called *Atta*) *barbara*, or to *A. structor*, or to *Pheidole megacephala*, which are to this day found in Syria, and, indeed, all round the Mediterranean basin.

Numerous other species of ant have been described in Palestine; hut, as far as is known, they resemble in their habits the ants of temperate and colder climates, and do not lay up any store of provisions against the winter: it is possible that, like the latter, they pass the cold season in a torpor or winter sleep.

The harvesting ants all belong to the genus Aphænogaster, or are closely allied to it. Their habits

3. Harvesting ant.

were well known to the ancients and to mediæval writers. These observers, generalising on insufficient data, assumed that all ants stored up food for winter consumption. When, however, the centre of learning shifting farther N. from the shores of the Mediterranean, the leaders of science were found in central and northern Europe, the position of things was reversed.

Naturalists, noticing that the ants whose habits they observed did not store grain and seeds, arrived at the conclusion that no ants did, and attempted to explain the accounts of the earlier writers by pointing out that they had probably mistaken for seeds the pupa3 which, when anything disturbs the ants' nest, are at once seized and borne to a place of safety. The consensus of opinion, accordingly, until about a quarter of a century ago, was that ants never lay up stores of food.

The investigations of Moggridge and Lespès, however, showed that, although this opinion is probably correct as far as ants in more northern climates are concerned, many of the ants in the countries bordering on the Mediterranean store up seeds collected from different plants. Not only do they collect seeds that have fallen, but they also frequently tear the fruit or seed-pod off the plant's and bear them to the *formicarium* or nest. They will, moreover, travel considerable distances to obtain their food, marching in two nearly continuous parallel lines, the length of the column sometimes measuring 24 yards or more. The two lines are moving in contrary directions—the one toiling laden with spoils towards the nest, the other hurrying back with empty mouths to the harvest ground.

The nests both of *A. barbara* and of *A. structor* are simply excavations in the ground—long cylindrical pas-

4. Nests: storing.

sages or rounded hollows, the floors of which are to some extent smoothed and cemented. In these hollows, about the size of a billiard

[1] The etymology of this word is very doubtful. It has been proposed to derive it (1) from a doubtful Heb. verb נמל (cp מול) 'to cut,' referring either to the shape of the ant's body (='insect'), or to its habit of cutting seeds from the corn-ears, or to the incision it is supposed to make in the seeds themselves to prevent their sprouting (though this last was hardly known to the ancient Hebrews); (2) from Ar. *namala* 'to creep' or 'to ascend by creeping'; (3) from a supposed root akin to Heb. נאם, 'to make a slight sound'. The connection with Ar. *namala* is certain; hut possibly the meaning of the verb may he derived from the noun. A kindred word is Ar. *anmul*, 'finger-tip' (Lag. *Uebers.* 21). The Syr. equivalent is *šušmānā* ('keen-scented'?); Ar. has the same word as Heb.—*namla*.

[1] See the list of passages quoted in Bochart, *Hier.*—among them Hor. *Sat.* i. 1 33; Virg. *Æn.* 4 402; Plin. *NH* 11 30; Ælian, 2 25 4 43 6 43. A brief account of the Jewish notices by Rev. A. Löwy in *PSBA* 368 [1880-81].

ball, the seeds are stored. In one nest Moggridge counted seeds from twelve different species of plant, and he enumerates eighteen distinct botanical families containing plants which furnish ants with seeds. *A. structor* is frequently found in the neighbourhood of towns or villages, and even in the streets; *A. barbara*, usually in the country.

The ants' nests are entered by one or two holes, whose presence is usually indicated by small heaps of refuse, partly composed of the earth excavated from the nest, and partly built up of the husks and other useless matter, which is carefully removed from the seeds before the latter are stored up. All this refuse is scrupulously removed from the nest, which is kept very clean. The ants do not allow the seeds to sprout; possibly by making an incision in them.

The amount of seed collected and stored in the granaries is very considerable and may cause serious loss to the agriculturist; from one nest an amount of seed estimated at 1 lb. in weight was taken, and there must be many hundreds of nests to the acre. The seed stores of the ants of Palestine are sufficiently important to be mentioned in the Mishna, which records the rules adopted as to their ownership.

The industry of the harvesting ants, and the amount of work they accomplish, justify their being held up as examples of untiring energy. They begin work early in the morning and keep at it far into the night, working as hard in the dark as in the sunlight. Meer Hasan Ali in his *History of the Mussulmans* describes how eight or twelve very small harvesting ants will find it difficult to move a grain of wheat, and yet they manage to transport such grains over a distance of 1000 yards to their nest. Their great sagacity is shown in numerous ways—the complexity of the organisation of their colonies (involving the differentiation of individuals to perform different duties), their powers of communicating one with another, and their slave-making propensities. Their habit of laying-up food for the future, and even (in some South-American species) of actually cultivating certain fungi for food, places them with the bees and wasps, as regards intelligence, second only to man in the animal kingdom.

The ants belong to the order Hymenoptera (which includes bees, wasps, and saw-flies), and to the family Formicidæ. N. M.—A. E. S.

ANTELOPE (תְּאוֹ *tᵉō*, Dt. 14 5; תּוֹא *tō'*, Is. 51 20; ΟΡΥΞ [𝔊BAL in Dt.; and Aq. Sym. Theod. in Is.]; ϹΕΥΤΛΙΟΝ [𝔊BNAQΓ in Is.]), an unclean animal mentioned along with the pygarg and chamois. The above is the rendering of RV and is much preferable to AV WILD OX, WILD BULL (which is based upon Targ. Gr. Ven., and is accepted by Kim.), although wild oxen and wild bulls were common enough throughout Palestine and Mesopotamia (see CATTLE, § 4). The allusion in Is. (*l.c.*) to the capture of the animal by means of a net wholly agrees with what is known of the manner in which antelopes, gazelles, etc. were usually captured.

The species here intended may be the *Antilope leucoryx* (or oryx, cp 𝔊), or the *A. bubalis*. Against the former proposal the objection has been raised that the oryx is called in the modern vernacular of N. Africa *yaḥmur*, which = Heb. יחמור 'fallow-deer' (see ROE); but it is not uncommon for the same name to be given to members of different species by different peoples.[1] On OX-ANTELOPE see UNICORN (beg.). S. A. C.

ANTHOTHIJAH (עַנְתֹתִיָּה) 1 Ch. 8 24† RV, AV ANTOTHIJAH (*q.v.*).

ANTICHRIST (ἀντίχριστος [Ti. WH]). *History of the Question.*[2] Researches into the meaning of 'Antichrist' have always started from the exegesis of

1. History: Early Period.

2 Thess. 2 1-12 and certain passages in the Apocalypse chap. 13).

The first period of the history of the discussion embraces the Greek and Latin ecclesiastical writers down to the beginning of the Middle Ages. Within this period the tradition is unusually stable. The Antichrist is taken to be a manifestation which is to be made at the end of time—a definite personality, as to whose origin, career, and end, perfectly definite and traditionally fixed views are set forth, which rest but partially on the NT. This exegetical tradition, the importance of which is greatly undervalued by recent commentators such as Bornemann, is, for reasons which will afterwards appear, of the utmost value. To say that the naïve dogmatic belief of the church-fathers in 'the truth of this eschatological phantasy down to its least detail' was absolute does not in any way disprove the correctness of their exegesis.

Of the two methods that came into vogue during the Middle Ages—the ecclesiastico-political method with polemical purpose (since Joachim of Floris, afterwards in chief favour with Protestant scholars, especially in the form hostile to papal claims) and the universal-historical (perhaps, since Nicolas de Lyra)—neither advanced the question in the least.

The beginnings of a truly scientific manner of looking at these as well as at other eschatological traditions were made by certain Spanish and French Jesuits, who threw themselves into the polemic against Protestant attacks with great learning and acumen. Their first step was to revert to the tradition of the church fathers, which they embodied in extensive works.[1] Thus the futurist method was restored to its ascendency.

2. Modern.

This method maintained its ground, until quite recently, among all scientific interpreters of the apologetic school. There is one point, however, in which the exegesis of the moderns—as, for example, Hofman (*Schriftbeweis*) and Luthardt (*Die Lehre von den letzten Dingen*) and almost the whole body of English writers on the subject—falls far below that of the church fathers: the concrete eschatological figures are more or less spiritualised. Thus, Antichrist becomes an impersonal general tendency; the 'temple' (2 Thess. 2 4) is interpreted as meaning Christendom; and the κατέχων, as law and order.

It is in the work of Ludovicus Alcasar (*Vestigatio arcani sensus in Apocal.*, Antwerp, 1614) that we find the earliest indications of a thoroughly scientific, historical, and critical handling of this question. The labours and the method of the Jesuit scholars, however, were afterwards made available for the Protestant Church by Hugo Grotius (*Annotationes*, Paris, 1644), who in the treatment of Antichrist may be regarded as the founder of the 'historical' or 'preterist' method. He interpreted, 2 Thess. 2 1-12, point by point, as referring to the occurrences of the reign of Caligula. In this method he was followed by Wetstein, Hammond, Clericus, and Harduin; and, since Kern (*Tüb. Z. f. Theol.*, 1833, i.), the preterist interpretation of the Antichrist has become almost universal, but as referring to Nero redivivus (so F. C. Baur, *Theol. Jahrbb.*, 1855; Holtzmann, in *BL*; Hilgenfeld, *ZWT*, 1862, 1866; Hausrath; and many others, including Renan, *L'Antéchrist*, 1876). Following an example partly given by Klöpper, however, Spitta (*Zum Gesch. u. Litt. des Urchristenthums* 109 *ff.*) has again sought the explanation of the predictions regarding Antichrist in the circumstances of the reign of Caligula.

Abandoning this (on the whole, mistaken) line, a few scholars have sought an interpretation of Antichrist in a Jewish tradition dating farther back than the Christian era and not resting on any historical events.

3. Recent.

Among these scholars may be named Reiche, De Wette, Lünemann, and Bornemann (in their respective commentaries) and Kähler (in *PRE*(2)). Ewald's observations in *Jahrb. f. bibl. Wiss.*, 1851, p. 250, and 1860, p. 241, are of special interest:

[1] For other examples see UNICORN, note.

[2] Cp. Lücke, *Einl. in d. Offenb. Joh.* 350 *ff.*; Bornemann, 'Die Thessalonicherbriefe' in Meyer's *Handbuch* 400 *ff.*

[1] Malvenda's *De Antichristo* (Lyons, 1647) being perhaps the fullest. The commentaries of Ribeira (Salamanca, 1591) and Blasius Viegas (Ebora, 1601) were specially influential.

for the first time he combined 2 Thess. 2 with Mt. 24 15 *ff.* and Rev. 11 3 *ff.*, and thus the problem ceased to he one of exegesis merely. The best work in this direction has been that of Schneckenhurger (see Biihmen's survey of his writings in *Jahrb. f. deutsche Theol.*, 1859), who endeavoured systematically (as the only true method) to ascertain the kindred Jewish tradition that lay at the basis of the NT passages. (Preliminary researches in the same sense had been contributed by Corrodi, *Krit. Gesch. des Chiliasmus* 1781 *ff.*; Bertholdt, *Christol. Jud.*, 1811, § 16; and Gfrörer, *Jahrhundert des Heils* 2 256 *ff.* 405 *ff.* 436.) Schneckenburger also brought Mt. 24 Rev. 11 and Jn. 5 43 into the field of his survey, and his view may be said on the whole to have stood the test of time.[1]

Still more recently Bousset (*Der Antichrist in der Ueberlieferung des Judenthums, des NT. u. der Alten Kirche*, 1895), following up the suggestions of Gunkel's *Schöpfung u. Chaos* (1895), and the method then for the first time securely laid down, has sought to supplement these investigations in two directions: (1) by a comprehensive induction based on all the eschatological portions of the NT that belong to the same circle of ideas, and the careful exclusion of all that do not so belong; and (2) by an attempt at a comprehensive and complete presentation of the tradition (which comes before us in the NT only in a fragmentary way) as it is to be met with in the Jewish sources, and, still more, in the later Christian exegetical and apocalyptic tradition. This tradition is in great measure quite independent of the NT, and in all probability dates, as far as its sources are concerned, from pre-Christian times.[2]

4. NT.

The NT Tradition. The name ἀντίχριστος occurs in the NT only in the Johannine Epistles (1 Jn. 2 18 22: 4 3: 2 Jn. 7), and thus in all probability its formation belongs to the late NT period. For an answer to the question who or what is meant by the name, it is best to start from the well-known (probably Pauline) passage in 2 Thess. 2 1-12, where we read that before the end of all things the man of sin, or, rather, of lawlessness (ὁ ἄνθρωπος τῆς ἀνομίας), the lawless one (ὁ ἄνομος), the son of perdition (ὁ υἱὸς τῆς ἀπωλείας), must be revealed. This 'man of sin,' it is clear, is to make his appearance as a false Messiah—an observation which, from the outset, precludes us from referring the expression to any foreign potentate such as Caligula[3] or Nero. He is sent to 'them that are perishing' (namely the Jews), because they received not the love of the truth (the true Messiah).[4] He does not employ any outward force, but accomplishes his work by means of false signs and lying wonders (cp the tradition of the Church fathers, as continued by De Wette, Ewald, Schneckenburger, B. Weiss, Lünemann, Bornemann). He will make his appearance in Jerusalem. In this account of the Antichrist the specially perplexing assertions are that he is to seat himself in the temple of God and that he is to declare himself to be God. This last act, at any rate, does not belong to the *rôle* of a false Messiah. It is also doubtful who or what ought to be understood by ὁ κατέχων, τὸ κατέχον, the power that stands in the way of the manifestation of Antichrist. If once a reference in the passage to a Jewish false Messiah be accepted, the mystery of iniquity (lawlessness: τὸ μυστ. τῆς ἀνομίας) will most probably mean the cruelty which the Jews as a whole had begun to show towards the Christians (same authorities as above). At this point we obtain a clear light upon Rev. 11. The perplexing fact that there the beast rises out of the deep and makes its appearance in Jerusalem (a view of the passage that appears certain—not only from 11 8, but also from the connection of 11 12 with 11 3—as against the other interpretations referring it to Rome) is explained by 2 Thess. 2. The beast that rises out of the deep and appears in Jerusalem is the Antichrist. If this be so, we are supplied with the following additional elements in the tradition: (1) a great drought that comes over the world in the last times (in Rev. through the two witnesses); (2) the two witnesses, their slaughter by the Antichrist, and their resurrection; (3) a previous assemblage of many nations in the neighbourhood of Jerusalem. The dim and fragmentary character of the whole narrative, however, is striking. In another place in the Apocalypse we find another parallel to the figure of the Antichrist—in Rev. 13 11 *ff.* The beast that 'had two horns like unto a lamb' (RV) is designated by the author of Revelation himself as a False Prophet. When it is spoken of as 'coming up from the land' (not 'earth' as in EV), we may reasonably understand Palestine to be meant. This false prophet also does his work by means of signs and wonders. Here we meet with a new and rather perplexing consideration: the sealing on their foreheads and hands of those whom he has led astray, and the buying and selling of them that is thus made possible. To the same great group of traditions a part of the eschatological discourse in the Synoptic Gospels (especially in Mt.) also appears to belong. Older theories of the βδέλυγμα τῆς ἐρημώσεως of Mt. 24 15 having broken down, and Spitta's explanation of it as referring to Caligula being beset with difficulties (indeed, an apocalypse which arose only in 40-41 A.D. could surely not have found its way among utterances of the Lord which were already becoming fixed), we seem compelled to fall back on an older tradition, and to explain the strange phrase of the Antichrist of 2 Thess. 2 4 sitting in the Temple (on these points cp ABOMINATION OF DESOLATION). In this case we arrive at new elements in the tradition: the subsequent flight of those who have believed, the shortening of the days (Mt. 24 22), and the picture of the end of the world and of the final judgment (Mt. 24 29 *ff.*). Here again the fragmentary brevity of the tradition is surprising.

[1] This applies also to the first part of the *Apocalyptische Studien* of B. Weiss, 1869.

[2] Attempts in this direction had already been made by Bertboldt and Schneckenburger.

[3] 2 Thess. 2 4 does not at all fit in with Spitta's interpretation of the passage as referring to Caligula's proposal to set up a statue of himself in Jerusalem.

[4] Cp Jn. 5 43.

5. Results.

If we now survey these eschatological fragments as a whole, two conjectures immediately force themselves on us: (1) that all these eschatological phantasies were not independently conceived by the various authors from whom we derive them;[1] that, on the contrary, the authors are mostly reproducing a tradition which already lay before them; and (2) that it is a single consistent tradition that underlies all these (partly coincident, partly complementary) fragments. If the second conjecture be true, we may venture to think that the tradition in question has not been lost beyond all possibility of recovery. In point of fact, our very first glance at later Christian apocalyptic literature satisfies us that this literature rests upon a tradition which is but partially dependent on the NT.

6. Early Church tradition.

The Tradition of the Early Church regarding Antichrist. Sources.[2] The tradition becomes tangihle as soon as we have a Christian literature copious enough. The influence of this tradition is already visible in the *Teaching of the Twelve Apostles* (chap. 16). Irenæus (*Adv. haer.* 5 25-30) also presents himself in this connection. Special importance, however, among the earlier witnesses attaches to Hippolytus's ἀπόδειξις περὶ τοῦ ἀντιχρίστου, the) *Carmen Apologeticum* of Commodian, Lactantius's *Inst. Div.* 7 15 *ff.* (Commodian and Lactantius have a place of their own in the tradition), and the *Commentary on the Apocalypse* of Victorinus. A further group of writings ascribed to an ecclesiastical writer of very great influence Ephraim Syrus, must be mentioned. Under his name are current three Homilies on the Antichrist: (1) One in Syriac (De Lamy, 3 187 *ff.*,—all of it genuine with the exception of a few chapters); (2) one in Greek (Assemani, 2 222-30 3 134-143), perhaps genuine; and (3) one in Latin (Caspari, *ut sup.* 208 *ff.*). The historical event from which all these prophecies start is the

[1] See the detailed argument for the impossibility of this in Gunkel *Schöpf. u. Chaos.*

[2] See Malvenda, *De Antichristo* (1647): Ehert, 'On Commodian's "Carmen Apologeticum"' in *Abh. d. kön. Sachs. Ges. d. Wissensch.* 5 38 78; Caspari, *Briefe und Abhandlungen* ('90) 208 *ff.* 429 *ff.* and, for the later period, Zezschwitz, *Vom römischen Kaiserthum deutscher Nation*, 1877; Gutschmid, *Kleine Schriften* 5 505 *ff.*: W. Meyer, *Ludus de Antichristo*, 1880.

beginning of the great barbarian migrations, the invasion of the eastward regions of the Roman Empire by the Huns (Gog and Magog). Allied in character to the foregoing are Cyril's *Catechesis* (xv), the pseudo. Johannine Apocalypse (Tisch. *Apoc. apocr.*), and the Commentary on the Apocalypse by Andrew of Cæsarea. Dependent on Ephraim's Greek homily are the περὶ τῆς συντελείας τοῦ κόσμου (ed. Lagarde) of the pseudo-Hippolytus, and the *Dioptra* of Philip Solitarius (3 10 *ff.*; Migne, *P. Gr.* 127). This whole mass of tradition is exceedingly valuable on account of its archaic oriental character. Of the older church fathers, Jerome also (*Ad Algasiam*, Quæst. xi.; *In Danielem* vii. and xi.) and Theodoret (*Hæret. fab.* 5 23), but not Augustine, and, of the later, John Damascenus (ἔκθεσις 427) claim special attention.

As, in the uniform view of these apocalyptic interpreters, the advent of the Antichrist is after the downfall of Rome, one might reckon almost with certainty on finding evidence of the currency of the tradition about the time of that downfall. Such evidence we actually possess in the primary document which was the common source of both the so-called Apocalypses of Daniel, the Greek (ed. Klostermann, *Analecta*), and the Armenian (ch. Kalemkiar, *Wiener Z.* 6 127 *f.*; cp Zahn, *Forschungen* 5 119 *ff.*). Again, at the time of the Mohammedan conquests a new rallying-point was given for this eschatological tradition, as we see in the apocalypse of the pseudo-Methodius (7th century, *Orthodoxographa*(2), Basel, 1569), closely connected with which is the later Apocalypse of Peter now extant in Syriac, Arabic, and Ethiopic redactions (Bratke,' *ZWT*, 1892), and also a series of late Byzantine (Vassiliev, *Anecdota Græco-Byzantina* 1, Moscow, 1893), and late Jewish apocalypses (Jellinek, *Bet-ha-Midrash;* cp Bousset, 64 *ff.* 173 *ff.*). This body of tradition reached the west through a compilation (*De Antichristo*) by the monk Adso (Migne, *P. Lat.* 101 1291 *ff.*), based on the book of Methodius and on a Sibylline book, which last is to be found also (in a redacted form) in the works of Beda (Migne, 90 1183) and dates perhaps from the fourth century. Lastly, an isolated and very archaistic source is to be found also in the Apocalypse of Zephaniah (Stern, *ZA*, 1885).

7. He 'who letteth.' Subjoined is a brief summary of this tradition as it occurs, almost uniformly, in the sources that have been named.[1]

In the first place, the universally prevalent conviction is that the κατέχων (2 Thess. 2 7) is the Roman empire. This, we may be sure, was the view of Paul also: if he expected a Jewish false Messiah, then the one power left which could 'hinder' was the Roman empire (cp on this point 4 Esd. 4 1 *ff.*). The political *rôle* played by this idea in the history of Christianity may be seen in Tertullian (*Apol.* 32, *ad Scap.* 2) and Lactantius (*Inst. div.* 7 25).

8. Antichrist. Of equally universal prevalence is the conception of Antichrist, not as a Roman or foreign ruler, but as a false Messiah, who is to arise among the Jews themselves in Jerusalem. Almost universally (with the exceptions to be afterwards mentioned) it is predicted that he is to establish himself in the temple and lay claim to Messianic (and, so far, divine) honours. (Sometimes, as in *Ascens. Jes.* 46, Vict. in Apoc. 13 13, and in the Ethiopic Apocalypse of Peter, we read that he will set up his statue in the temple—doubtless a reminiscence of the Caligula episode.) After the destruction of Jerusalem, accordingly, the expectation that the Antichrist will rebuild the temple in Jerusalem becomes universal. He will show special favour to the Jews, will receive circumcision himself, and will compel others to do so. He will arise from the tribe of Dan (*q.v.*, § 9; Jewish haggada is at the root of this [cp *Testam. Dan* 5 *f.*: also the omission of Dan in Rev. 7 5 *ff.*, as to which see Iren. v. 30 2, perhaps also even 1 Ch. 6 61 [46] (see *SBOT*) 69 [54] 7 12]; see Schneckenburger-Böhmer, 412). If, hearing all this in mind, we once more turn to 2 Thess. 2 9 *ff.* Jn. 5 43 Rev. 11 3 *ff.*, it immediately becomes plain that any 'historical' or preterist interpretation of the Antichrist is out of the question. On the basis of a haggadic view of Dan. 11 43 78, there came into the tradition this further element that the Antichrist, at his first appearing, is to conquer the' kings of Egypt, Ethiopia, and Libya. Another invariable element of the tradition under consideration is the enumeration of the miracles to be wrought by the Antichrist, particularly celestial signs (Rev. 13 11 *f.*), and miracles of healing (although that of raising the dead is beyond his reach). Hereupon the Antichrist will achieve the dominion of the whole world, and gather round himself to his capital all peoples and vast armies (4 Esd. 13 1 *ff.* Apoc. Bar. 40 Rev. 11 9 *ff.*).

9. Conflict. Next, a great drought and famine will come upon the whole earth (differently and less clearly put in Rev. 11 6), and in these straits the Antichrist will order his servants (spoken of also as demons) to mark men with his mark (according to the Latin Homily of the pseudo-Ephraim, a serpent mark), so that only those who bear it shall be permitted to buy bread (Rev. 13 16 *f.*). Against the Antichrist come forward the two witnesses (almost unanimously taken to be Elijah and Enoch), who disclose his real character, so that many turn away from him (otherwise, and very obscure, what we read in Rev. 11 3 *ff.*). It is noteworthy that in many sources there is no mention of the resurrection of the two witnesses—doubtless an incident introduced for the first time by the author of Rev. 11. At the preaching of the witnesses a considerable company of Israel are converted and begin the opposition to the Antichrist (perhaps Rom. 9 20 is to be interpreted in this connection). The 144,000 who are sealed in Rev. 7 5 *ff.* certainly have their explanation here. The faithful now betake themselves to the wilderness or to the mountains (Mt. 24 16 *ff.*); but the days of Antichrist's reign of terror shall be shortened. The years shall become months, the months days, the days hours (Mt. 24 22). Then the Antichrist will send his armies in pursuit of the faithful who have fled into the wilderness; but there they shall be delivered by the angels of God or by the Messiah (Rev. 12 13 *ff.*), and the army of the Antichrist destroyed (cp the mysterious angelic battle outside the city, in Rev. 14 14 *ff.*, and, in connection with this, the appearance of the lamb with the 144,000 in Rev. 15 1 *ff.*).

10. Defeat of Antichrist. The Antichrist is finally slain, according to authorities, by the Messiah, with the breath of his mouth (Is. 11 4 2 Thess. 2 8—the same statement is found in late Jewish sources, such as Targ. Jon. on Is. 11 4 and others). Perhaps an older tradition may be traced in the view that the archangel Michael is to be the conqueror of the Antichrist (Dan. 12 1 Rev. 12 6, *Ass. Mos.* 10). Now is seen a mighty sign in heaven (Mt. 24 30)—the sign of the Son of Man—interpreted by later writers (cp already *Did.* 16 6, σημεῖον ἐκπετάσεως ἐν οὐρανῷ) as referring to the Cross, but originally, we may be sure, betokening the Divine Judge of the world (Bousset, 154). Then follows the coming of the Divine Messiah to judgment, amid mighty convulsions of nature (Mt. 24 29 *f.* Rev. 6 12 *ff.*). From the four corners of heaven desolating storms burst upon earth and cleanse it (Rev. 7 1 *ff.*), and before the divine advent descends a tempest of fire, which burns the earth down to its depths, and dries up the sea and the rivers (Rev. 21 1).

11. Coherence of tradition. At the very first glance it is plain that, in this tradition, we are dealing not with an artificial exegetical mosaic of the various passages of the New Testament (and the Old) which here come into account, but with an original body of tradition organically and inherently consistent; and 'that the separate eschatological fragments of this tradition in the NT become intelligible only when they are brought into their organic place in the scheme of the tradition as a whole, so that their essential consistency becomes manifest.

Origin *of the Tradition.*—Naturally' we turn, in the first instance, to the eschatological ideas of the OT.

12. OT eschatology. Schneckenburger will have it that the idea of the Antichrist comes from the prophecies concerning Gog and Magog in Ezek. (38 *f.*). That in every form of the tradition the prophecy concerning Gog and Magog occurs in close connection with the story of the Antichrist is indeed true to the extent that they are made to appear, sometimes after (Rev. 20 7 *f.*), and sometimes before, the time of his rule. Positive identification of Gog with Antichrist, however, does not occur till the seventh century, and even then only in Jewish sources. Many of the details of the traditions can be traced, as has been already said, to Jewish haggada. In this particular point Dan. 7 11 *f.* is approximated to most nearly; but even here there is a marked difference, and the originality of the view outlined above is conspicuous. In Daniel the disturber is a foreign power; but here the seducer, who personates God or simulates the Messiah, rises up from amid the people of God. 'Thus there has been an important development since Daniel. Perhaps, as was suggested in conversation to the present writer by Prof. Smend, the historical occasion for this advance was supplied by the experiences of Israel under the Maccabees and the Herods. In any case, we must note a parallel in Jewish Apocalyptic.

13. Belial. That ideas allied to those in our tradition were active among the Jews about the time of Christ is shown by 4 Esd. 5 1 *ff.* (56; regnabit quem non sperant), *Apoc.* Bar. 36-40, *Sibyll.* 3 63 *ff.* (2 167 *ff.*), *Test. Dan* 5, *Ass. Mos.* 8 *ff.*, and the (probably Jewish) nucleus of *Asc. Jes.* (3 23-4 13). Now, in this tradition, the constantly recurring name of the great enemy of the last times—a name already known to the apostle Paul (2 Cor. 6 15)—is Belial (Beliar). But, according to many passages of the Testaments, Belial is a spirit of the air, ruler of the evil spirits. According to Test. *Dan* 5, the Messiah will fight against him in the last days. The supporters of Belial are the children of Dan. In Sib. 3 63 *ff.* (probably dating from the time of Cleopatra), Belial is already presented in an aspect closely resembling that

[1] For the references in detail see Bousset, *Der Antichrist*, Gott. 1895.

of Antichrist (still more so in the *Ascensio*, which, however, has unquestionably undergone Christian revision). In the *Ascensio* the angel Sammael interchanges parts with Belial, and Sammael figures also in later Jewish tradition as the enemy of the last times[1] (on the origin of Belial, and on the various developments of meaning, see BELIAL). Suggestions of the same idea occur in Lk. 10 18 Jn. 12 31 (Col. 2 15). Here we would seem to have an aspect of the tradition that, in point of time and contents, comes a great deal nearer that of Antichrist (2 Cor. 6 15: 'and what concord hath Christ with Beliar?'), which is not of historical but of purely eschatological origin: the idea of a rebellion of an angelic power against God at the end of time. Perhaps

14. Dragon. it is out of this figure—behind which in turn stands the wilder figure of the dragon rising in rebellion against God in the last times, which Gunkel conjectures to have its origin in the Babylonian creation-myth (see CREATION, § 2 *f.*)—that, under the experiences of the Maccabean period, the humanised figure of a pseudo-Messiah came into existence. In this way we can explain also the superhuman traits in the picture, such as his declaring himself to be God (2 Thess. 2 4), and his sitting in the temple of God (cp the myth of the storming of heaven by the dragon in Rev. 12 1 *ff.*). These conjectures find further confirmation in the fact that, in later tradition, the ghostly-demonic element in the portrayal of Antichrist comes again more conspicuously to the front, and the Antichrist is even represented as a dragon who rebels against God (cp the writings of Ephraim Syrus, and Apoc. Zeph.).

Points of Contact with other Traditions.—One legend that comes into relation with that of Antichrist in many ways is that of Nero redivivus.

15. Nero redivivus. Not that the figure of Antichrist had its beginning in the story of Nero. Originally both legends had currency side by side. It was only after Nero's return at the head of the Parthians (at first conceived of in a purely human way—cp the nucleus of Rev. 17) had become indefinitely delayed, and after men had begun to expect the returning Nero only as a spirit from the under-world, that they gradually transferred to him some traits belonging to the Antichrist[2] (cp *Sib.* 3 61 *ff.*, where, in like manner, Belial is interpreted to mean one of the Cæsars; see APOCALYPTIC, § 95). Such an amalgamation of the two figures is already met with in Rev. 13 and 17 (in their present form). The old form of Antichrist, however, retains such vitality that in the end (Rev. 13 11 *ff.*) it appears as a second beast, servant of the first and on the same scene. A similar and (as far as its occasion is concerned) still more manifest doubling of Antichrist is seen in Commodian's *Carmen Apologeticum*, in Lactantius (as above), in Martin (see Sulpicius Severus, *Dial.* 214). and in the βιβλίον Κλήμεντος (Lagarde, *Reliq. juris eccl.* 80 *ff.*). There is a complete fusion in the *Ascensio Jesaiæ*, and in the commentary on the Apocalypse of Victorinus. This complicated figure of Nero redivivus took special hold on the Sibylline literature of the second century,[3] and here again, in the delineation of this, we meet once more with the old features of the dragon myth. A fusion between the Antichrist tradition and the Simon Magus legend has already been observed by Schneckenburger, and traced in a variety of points by the present writer. The same tradition comes into fusion with the later Alexander legend and the old German saga of the end of the world (Muspilli, *Edda*).

On this and other connected subjects see Bousset, *Der Antichrist*, in the English translation of which (1896) special attention has been bestowed on the index (see, *e.g.*, 'Simon Magus,' 'Alexander'). See also E. Wadstein, 'Die eschatologische Ideengruppe; Antichrist, Weltsabbath, Weltende und Weltgericht in ihrer christlichmittelalterlichen Gesammtentwickelung,' ZWT, 1895 and 1895. On the Armenian form of the Antichrist-legend see Conybeare, *Acad.*, 26th October 1895; and on a singular Mohammedan tradition see LYDDA at end.

ANTILIBANUS (ΑΝΤΙΛΙΒΑΝΟϹ [BA], om. א), Judith 1 7. See LEBANON.

ANTIMONY (פּוּךְ), Is. 54 11 RV mg., EV 'fair colours.' See PRINT.

ANTIOCH (ΑΝΤΙΟΧΕΙΑ [Ti. WH]). 1. in Pisidia; more correctly, 'Antioch towards Pisidia' (Ἀντιόχεια ἡ πρὸς Πισιδίᾳ), to distinguish it from the Antioch on the Meander (the form 'Pisidian Antioch,' Ἀντιόχεια ἡ Πισιδία [Ti. WH], Acts 13 14, arose to distinguish it from the more famous Antioch of Syria). It was really a Phrygian city; but in NT times it was of course included within the Roman province Galatia. Strabo (p. 577) accurately describes it as lying 'on a hill,' on the south side of the range now called Sultan Dagh, in Phrygia Parorea; but it was not until 1833 that Arundell found its ruins at *Yalobatch*. The town was founded about 300 B.C. by the Seleucid kings, and the transportation of 2000 Jewish families to the fortresses of Lydia and Phrygia, as recorded by Josephus *(Ant.* xii. 3), must in part refer to Antioch. By Augustus it was made a Roman colony (6 B.C.); hence its coins bear the legend Cæsarea. Antioch was adopted as the centre of military and civil administration in Southern Galatia, and from it radiated the roads to the colonies designed to check the unruly highlanders of Pisidia and Isauria. As an element in the pacification of this district, the privileges of the Jews were confirmed by the Emperors, and Paul found a large Jewish colony in the city. The Romanisation of this part of Galatia was in especially active progress during the reign of Claudius, 41–54 A.D. At the time of Paul's visit, therefore, Antioch was at the height of its importance. Besides its relations with Apamea (on the W.) and with Iconium, Lystra, and eastern Asia Minor, it must have had a commercial connection with the Pamphylian seaports, among them Attalia and Perga; and Paul must have reached Antioch by following this southern trade-route, which probably ran through Adada (*Kara Bavlo*, *Bavlo* being the modern pronunciation of the apostle's name). There was a large body of Jewish proselytes in Antioch, many of them women of position through whom the Jews were able to influence the magistrates against the apostles (Acts 13 50). The magistrates had summary jurisdiction over disturbers of the public peace, such as the apostles were alleged to be (cp *v.* 44, πᾶσα ἡ πόλις συνήχθη, and *v.* 45, ἰδόντες τοὺς ὄχλους); but the 'casting of them out of the borders' of the colony could not imply permanent banishment—at any rate in the case of Paul, who was a Roman citizen. Accordingly we find the latter returning to Antioch from Derbe (Acts 14 21) and perhaps revisiting the city at least twice (Acts 16 6 18 23, see GALATIA). If the trade of Antioch was concentrated in the hands of the Jews, we can the more easily understand Paul's first success here in Asia Minor: the new teaching did not conflict with any commercial interests of the gentile inhabitants, as it did at Ephesus and Philippi, while at the same time the Jewish proselytising had prepared the people for its reception. It is also not without significance that on the death of king Amyntas, some seventy years before Paul's visit, the ancient worship of 'Mēn' (Μὴν Ἀσκαῖος, Ἀρκαῖος Strabo, Ἀσκηνός coins) had been abolished, so that there was probably no gentile hierarchy in existence to oppose the apostles. Hence the effect of their preaching was more marked here than in any other case, except Corinth (Acts 13 44 48 *f.*). All the more strange is the subsequent unimportance of the South Galatian churches.

2. In Syria (1 and 2 Macc. AV ANTIOCHIA). This great city, the third metropolis of the Roman world,

1. City. the Queen of the East (ἡ καλή Athen. 175; orientis apex pulcher), and the residence of the imperial Legate of Syria, survives in *Anṭākīeh*,

a town of only 6000 inhabitants. It is situated at the point of junction of the ranges of Libănus and Taurus, on a fine site hard by the left bank of the Orontes, just where the river turns westwards to run between Mt. Pieria on the N. and Mt. Casium on the S., to the sea 16 m. distant. A little higher up the river Antigonia had been built in 307 B.C. by Antigonus; but seven years later Seleucus Nicator transferred its inhabitants to his new city of Antioch.

Strabo's meagre account (p. 750) is the foundation of our topographical knowledge of the city. Like the district in which it lay, Antioch was a τετράπολις, an agglomeration of four parts.

The first contained the population of Antigonia; the second the hulk of the citizens. The third part was the creation of Seleucus Callinīcus (246-226 B.C.), and the fourth, on Mt. Silpius, of Antiochus Epiphanes. Each part had its own wall, but in addition, the whole vast area, larger than that of Rome, was surrounded by huge walls running over the mountains and across the ravines. From Nīcātor's time dates the well-known statue 'the Fortune' (Τύχη) of Antioch, a work of the Sicyonian Eutychides, a pupil of Lysippus (Paus. vi. 2 7). The memory of it is preserved on the coins, and in a small marble statuette in the Vatican. The goddess, a graceful gentle figure, rests negligently on a rock; while the river, a vigorous youth, seems to swim out from under her feet.

Seleucus Nicator also embellished DAPHNE (Δάφνη [VA]), 5 m. distant from Antioch, but reckoned a suburb. It was a spot musical with fountains; its groves, crowded with temples, halls, and baths, were the seat of a cult of Apollo and Artemis.

Among its artistic treasures was a statue of **Apollo** Musagĕtes by the Athenian Bryaxis. The precincts of Daphnè were endowed with the right of asylum and naturally became the haunt of villany—of runaway slaves, debtors, and cut-throats (Tac. *Ann.* 3 60; Tiberius in 22 A.D. attempted to regulate this abuse in several cities): if we may trust the story of Onias in 2 Macc. 4 33, Daphne 'flung away the one rare chance of sheltering virtue.' The site is now called *Bēt el Mā*, the 'house of Water.' It retains no traces of its former magnificence.

From this suburb, which Roman wealth, Greek art, and Oriental licentiousness conspired to make unique even in the East, Antioch took its distinguishing name —ἡ ἐπὶ Δάφνῃ. In itself the title bore no reference to the pleasure pursuits of the suburb—as though insinuating that there the true life of the city was to be found: it was a genuine official title.

Accordingly we find it on coins (cp Ἀντιοχέων τῶν ἐπὶ Καλλιρόῃ; τῶν ἐν Μυγδονίᾳ; τῶν πρὸς τῷ Σάρῳ). Hence Pliny (*HN* 5 21 [18]) writes 'Antiochia Epidaphnes.' Tacitus (*Ann.* 2 83) transliterates the Greek, and calls the suburb itself 'Epidaphna.'

Holm has summed up in a striking sentence the historical position of Antioch under the Seleucid kings.

2. Character. Although close to the sea (ἀνάπλους αὐθημερόν Strabo, p. 751), it was yet no seaport; on the borders of the desert, it was yet something more than a centre for the caravan trade between the East and the West. The city reflected the character of the kingdom of which it was the capital, a kingdom which itself also was neither a genuine naval nor a genuine land power. Antioch was a Greek city, just as the Seleucid kingdom was an attempt to impose upon the Orient the political ideas and forms of Hellas. Yet, in the capital as in the kingdom at large, there was no true Hellenism; the commingling of Oriental and Western elements resulted in the perpetuation of the worst features of both races, and the moral worthlessness of the Syrian found in the brilliance and artistic temperament of the Greek merely the means of concealing the crudities of his own life. The characteristic failing of the Greek also was exhibited on a great scale. A third element, and that the one most important for biblical history, was provided by the Jews. The colony was in fact coeval with the city, for it dated from the time of Seleucus Nicator, who gave the Jews the same privileges as he gave the Greeks (Jos. *Ant.* xii. 3 1).[1] For this connection with the Syrian kings see 1 Macc. 11 42 *f.* Herod completed the marble-paved street which we can trace from the 'Gate of St. Paul' to the modern town (Jos. *Ant.* xvi. 53). Thus all the forms of the civilised life of the Empire found in Antioch some representative. In its agora, said Libanius, the customs of the world might be studied. In no city was pleasure more earnestly pursued. *Daphnici mores* were proverbial; the Orontes was synonymous with superstition and depravity (Juv. *Sat.* 3 62). Yet it would be of value to discover to what extent the lower and middle orders of the population were really affected by the luxury and *abandon* of which we hear so much; that is after all but one side of the city's life, and there is a temptation to exaggerate it. There was little real intellectual life; epigram and light prose were the most flourishing forms of literature. Cicero *(Pro Arch.* 3, § *4)* is exaggerating with his 'eruditissimis hominibus liberalissimisque studiis adfluenti.' Antioch is far less celebrated than Alexandria in the literature of the first and second centuries A.D. This intellectual attitude is a fact of some importance, in its relation to the first Christian teaching.

The mixture of Roman, Greek, and Jewish elements admirably adapted Antioch for the great part she played

3. Christianity. in the early history of Christianity. The city was the cradle of the church. There, as elsewhere, Judaism prepared the ground for the seed of the word (cp Chrys. *Hom.* xxv.). 'Nicolas, a proselyte of Antioch,' one of the first deacons (Acts 6 5), was only one of a 'vast multitude of Greeks' who in that city were attracted to the Jewish doctrine and ritual (Jos. *BJ* vii. 3 3; cp Acts 11 19-21). The ancient and honourable status of the Jews in Antioch gave to the infant church a firm and confident organisation. Very early the city became a centre on a level with Jerusalem in importance (Acts 11 22 26-30 13 1). The cosmopolitanism of its inhabitants inevitably reacted upon the Christians in the way of familiarising them with universalist ideas, and Antioch consequently became the centre of missionary labour. It was Paul's starting-point on his first journey with Barnabas (Acts 13 1-3), and thither he always returned with his report of work done (Acts 14 26 *f.* 15 30 18 22). It was at the instance of the church at Antioch that the council of Jerusalem sent the circular letter to the gentile Christians (Acts 15 23 Gal. 2 4-14), and, according to Acts 11 26 (on which see CHRISTIAN, beginning, and § 2 [end]), it was in Antioch that 'the disciples were called Christians first'—undoubtedly as a nickname. We know that the people of Antioch were noted for their scurrilous wit (Philost. *Vit.* 3 16 Zos. 3 11 4 41 Procop. *BP* 2 8). W. J. W.

ANTIOCHIA (ⲁⲛⲧⲓⲟⲭ[ⲉ]ⲓⲁ [AℵV]), 1 and 2 Macc. AV, RV ANTIOCH, 2.

ANTIOCHIANS (ⲁⲛⲧⲓⲟⲭⲉⲓⲥ [VA]), 2 Macc. 4 19 (-ⲭⲓⲁⲥ [A]), and in AV also *v.* 9 (-ⲭⲟⲛ [V]), where RV has '*citizens* of Antioch.' See ANTIOCH 2, § 2 n.

ANTIOCHIS (ⲁⲛⲧⲓⲟⲭ[ⲉ]ⲓⲥ [VA]), concubine of Antiochus IV. Epiphanes (2 Macc. 4 30).

ANTIOCHUS (ⲁⲛⲧⲓⲟⲭⲟⲥ [AℵV]; ⲁⲛⲧⲓⲱⲭⲟⲥ [ℵ* once, V* once, A once]). 1. Antiochus III., surnamed the Great, was the son of Seleucus Callinicus, and ascended the Syrian throne at the age of fifteen, on the death of his brother Seleucus Ceraunus. He is the earliest of the great SELEUCIDÆ (*q.v.*) mentioned in the Apocrypha, but Antiochus II. Theos and Antiochus I. Soter (his grandfather and great-grandfather respectively) are alluded to in Dan. 11 (see DANIEL, § 6). His reign (223-178 B.C.) embraced a series of wars against revolted provinces and neighbouring kingdoms, wars in the prosecution of which his disasters and successes were equally great. The events of his life are briefly alluded to in Dan. 11 10 *ff.*—notably his expedition in Asia Minor in 197 B.C. (cp *v.* 18) which, after varying fortune, ended in a crushing defeat at the hands of Scipio Africanus near Magnesia in 190 B.C. (cp *v.* 18). This was one of the exploits of the Romans which

[1] According to 2 Macc. 4 9 (cp also *v.* 19) Jason conferred on the people of Jerusalem the status of citizens of Antioch (ANTIOCHIANS) on which see *Th. T* 12 544 ('78).

Judas the Maccabee is said to have heard of (1 Macc. 8 1-8).

The account in its present form is not free from inaccuracies. Thus, the writer states that Antiochus, the 'great king of Asia,' had with him 120 elephants (*v.* 6, incep. αντιουτ [א*]); but according to Livy (37 39) there were only fifty-four. 'It is not unlikely that in the popular tradition the original number was exaggerated' (Camhr. Bible, *ad loc.*). Cp MACCABEES, FIRST, § 10.

One of the conditions of the humiliating peace imposed in **188** B.C. was that twenty hostages, including a son of the king (cp 1 Macc. 1 10 and below, 2), should be sent to reside in Rome. Antiochus the Great was killed in an attempt to plunder the temple at Elymais (**187** B.C.), and was succeeded by his son Seleucus IV. Philopator. See SELEUCIDÆ.

2. Antiochus IV. Epiphanes (Ἐπιφανής 'the illustrious' [cp 1 Macc. 1 10 where A -ειs], called in mockery Ἐπιμανής 'the madcap'), youngest son of no. 1. On his place as hostage (see above, 1) being taken by his nephew DEMETRIUS, he returned to the East, and—his elder brother, Seleucus IV., having meanwhile been murdered—seized the Syrian throne (175 B.C.), and soon became famous for his conquests in Cœle-Syria, Palestine, and Egypt (cp 1 Macc. 1 16 *ff.* 2 Macc. 5 1 *ff.*, and see Dan. 11 21 *ff.*). During his Egyptian campaign he twice took Jerusalem (1 Macc. 1 20 *ff.* 2 Macc. 5 11 *ff.*). In spite of the presence of a strong favourable Hellenistic party (see JASON, MENELAUS), Antiochus appears to have seen that he could never hope to subdue Judaea until he had rooted out the peculiar Jewish religion (see ISRAEL, § 69 *f.*). He accordingly promulgated a decree enjoining uniformity of worship throughout his dominions (1 Macc. 1 41 *ff.*), and even went so far as to endeavour to force upon the Jews the worship of heathen deities (see ABOMINATION, ii.). His persecuting policy was responsible for the rise of the ASSIDEANS, and stirred up the successful resistance of the Maccabees. His end (**164** B.C.) is variously described. According to 1 Macc. 6 1-16 he was visiting a rich and celebrated temple in Persia (see ELYMAIS), when tidings of the ill-success of his troops in Judaea, and remorse for his sacrilege at Jerusalem, caused his death—according to Polybius (31 2) at Tabæ in Persia.[1] The usually accepted reference to his end in 2 Macc. 1 10-17 is not very probable, see MACCABEES, SECOND, § 7. He is doubtless alluded to in Ps. 75 4 *f.*, and there are numerous references to his life and character in DANIEL (*q.v.*, §§ 1, 6, 8, 10, 18).

The post-Talmudic tract *Megillath Antiochus* is a legendary account, in Aramaic, of the persecutions in his reign, cp Schü. *GJV* 1 123 (see MACCABEES, SECOND, § 11). See SELEUCIDÆ.

3. Antiochus V. Eupator (Εὐπάτωρ), the young son of Antiochus IV. Epiphanes (see 2, above), was left under the care of LYSIAS, whilst the father conducted his wars in Persia (1 Macc. 3 32 *f.*). On the death of Epiphanes (**164** B.C.) Lysias obtained the regency, ousting his rival PHILIP, 5, and set up Epiphanes' son as king, giving him at the same time the surname Eupător (1 Macc. 6 14 *ff.*)—'on account of the virtues of his father' (Appian). Together they entered Judæa (see ISRAEL, § 75 beg.) and, encamping at Beth-Zacharias, besieged Bethsura (see BETH-ZUR). The Maccabæans were defeated and the famous ELEAZAR (*q.v.*, 7) was killed (1 Macc. 6 28 *ff.*).[2] The war was brought to an abrupt close, however, by the news that Philip had occupied Antioch, and a hasty peace was concluded restoring to the Jews the privileges they had enjoyed previous to the persecutions of Antiochus Epiphanes (cp ISRAEL, *l.c.*). In the following year (**162** B.C.) the king and his guardian were put away by DEMETRIUS [*q.v.*, 1] (1 Macc. 7 1 *ff.* 2 Macc. 14 1 *ff.*). See SELEUCIDÆ.

4. Antiochus VI.; surnamed THEOS (Θεός), son of Alexander Balas, spent his early youth as a ward of an Arabian (see IMALCUE). He was brought forward by Tryphon, a former follower of Balas, and set up as king in opposition to Demetrius Nicator (see DEMETRIUS, 2) who was rapidly becoming unpopular (1 Macc. 11 39 54; 145 B.C.). On his coronation he received the surnames 'Epiphanes' and 'Dionysus.' Henceforth he became a mere tool in the hands of Tryphon, who ultimately found an opportunity of slaying him (1 Macc. 13 31). See further TRYPHON, SELEUCIDÆ.

5. Antiochus VII. Sidētes (Σιδήτης),—*i.e.*, man of Sidè in Pamphylia,—called also Εὐσεβής (Jos. *Ant.* xiii. 8 2), was the son of Demetrius I. and younger brother of Demetrius II. Nicator. The capture of his brother by the Parthians gave Sidētes the opportunity of asserting his claim to the Syrian throne in opposition to the unpopular TRYPHON. To win over the Jews he wrote, from Rhodes, to Simon 'the chief priest and governor,' and by advantageous concessions, remission of royal debts, and the formal permission to coin money, attained his end (1 Macc. 15 1 *ff.*; αντιωχος [א* *v.* 1]). Tryphon was besieged at Dor (*v.* 25), and ultimately forced to flee to Orthosia (*v.* 37). The situation immediately changed. Antiochus felt his position secure, and sent Athenobius to Simon demanding Joppa, Gazara, the citadel of Jerusalem, and the arrears of tribute (28 *ff.*). The refusal of these demands brought about war, and CENDEBEUS was dispatched against the Jews (15 38 *ff.*). Sidetes appears no more in 1 Macc.; but in the time of John Hyrcanus (see MACCABEES, i. § 7) he came and besieged Jerusalem (133 B.C.), and five years later met his death whilst fighting the Parthians under Phraortes II. (Arsaces VII., **128** B.C.). See SELEUCIDÆ.

6. Father of NUMENIUS (1 Macc. 12 16 14 22).

ANTIPAS (ΑΝΤ[Ε]ΙΠΑϹ [Ti. WH], abbrev. from ἀντίπατρος, see Jos. *Ant.* xiv. 1 3; cp Cleopas from Κλεόπατρος). 1. See HERODIAN FAMILY, 2.

2. The 'faithful witness' of Pergamum named in Rev. 2 13. According to the *Acta Sanctorum* (Apr. 11) he was bishop of Pergamum, and suffered death (by the 'brazen bull') under Domitian.

ANTIPATER (ΑΝΤΙΠΑΤΡΟϹ [AKV]), son of Jason [3], an ambassador sent by the Jews to the Lacedæmonians (1 Macc. 12 16 14 22). See SPARTA. For the Antipater from whom Antipatris (see below) was named see HERODIAN FAMILY, 1.

ANTIPATRIS (ΑΝΤΙΠΑΤΡΙϹ [Ti. WH]) was founded by Herod the Great on 'the finest plain' of his kingdom—*i.e.*, Sharon—in memory of his father Antipater (Jos. *BJ* i. 21 9), but also, as the history of the town abundantly proves, for strategical reasons. The other details given by Josephus are, that it lay 'close to the mountains' (*BJ* i. 4 7) on the plain of Kaphar Saba (Καφαρσαβâ), fertile and well-watered, that a river encompassed the city, and a grove of very fine trees (*Ant.* xvi. 5 2). In another passage, probably from a different source, Josephus identifies it with Kaphar Saba (Χαβαρζαβâ ἣ νῦν Ἀντιπατρὶς καλεῖται), and tells how, to resist Antiochus on his march against the Arabians (*circa* **85** B.C.), Alexander Jannæus made a deep ditch and a wall, which however Antiochus destroyed, extending thence, a distance of **150** (?) stadia, to the sea at Joppa (*ib.* xiii. 15 1). During Roman times Antipatris was a station at or near the junction of the military roads from Lydda and from Jerusalem respectively to Caesarea, where the latter road issued from the hills. Thus Paul was brought by night from Jerusalem to Antipatris and thence, part of his escort returning, to Caesarea (Acts 23 31). The return of so much of Paul's escort is explained by the fact that, Antipatris being according to the Talmud (*Talm. Bab.*, *Gittin*, 76*a*) on the limits of Jewish soil, all danger of an attack by the threatened Jewish ambush (Acts 23 16 20 *ff.*) was now past. There, in **66** A.D., Cestius Gallus halted on his way to Lydda (*BJ* ii. 19 1), and to this point, on his subsequent retreat from Jerusalem, he was pursued by the Jews (*ib.* 9). There,

1. Allusions.

[1] His father, Antiochus III. the Great died whilst engaged in this same district upon a similar errand: Tradition may have confused the son with the father.

[2] 2 Macc. 13 21 ascribes their ill-success to treachery (see RHODOCUS).

too, in the same year, Vespasian halted on his march from Cæsarea to Lydda (*ib.* iv. 8 1).

2. Site. Antipatris is not marked in the *Tab. Peut.* The Bordeaux Pilgrim (333 A.D.) gives it as 10 R.m. from Lydda and 26 from Czesarea; the *Itin. Ant.* as 28 from Czesarea; and Eus. and Jer. in the *Onom.* as 6 S. from Galgulis (in all probability the present Jiljūliyeh). Schürer (*Hist.* 3 130) and others, following Rob. (*BR* 4 139 *f.*), identify it with the present Kefr Sābā, 23 R.m. (as the crow flies) from Cæsarea. But, as Kefr Sābā is no less than 17 R.m. from Lydda and 2 R.m. N. from Jiljūliyeh; as, besides, it has no ancient remains, nor any such wealth of water or encompassing river as Josephus describes, it is more probable that Antipatris lay farther S. on the upper waters of the 'Aujeh, which are about 29 R.m. from Czesarea, 4 S. of Jiljūliyeh, and about 11 N. of Lydda, in a district which better suits the data of Josephus. Here Dr. Sandreczky and Sir C. W. Wilson (*PEF Qu.St.*, 1874, p. 192 *f.*) have suggested the site of *Kal'at Rās el-'Ain*, at the very copious sources of the 'Aujeh, which they identify with the crusading castle of Mirabel (el-Mirr being a neighbouring place-name). They point out, too, that the valley of the 'Aujeh would be a more natural line for the great ditch of Alexander Jannæus than a line from Kefr Sābā to the sea. Although Neubauer (*Géog. du Talm.* 80 *ff.*) thinks that the Talmud distinguishes between Kefr Sābā and Antipatris, this is doubtful, for, while their names are given separately, both are defined as border towns —between Samaria, a heathen country, and Judaea. These are all the data for the question of position. Without excavation on the sites named, and the discovery of the rest of the Roman road—probably the road by which Paul was brought—traced by Eli Smith in 1843 from Gophna to the plain, but lost at the edge of the hills (*Biblioth. Sac.* 1 478 *ff.*), it is impossible for us to be certain where exactly Antipatris stood. We cannot expect to find many ruins on the site. Unlike other Herodian sites, it is not stated to have been embellished by great buildings; and the town did not afterwards develop. Buhl (*Pal.* 199) favours Rās el-'Ain.

In 333 the Bordeaux Pilgrim calls it a *mutatio*, or change-house, not a *civitas* like Lydda (the next 'change' he mentions —Betthar, 10 R.m. towards Cæsarea—is perhaps the present eṭ-Ṭireh, *PEF Mem.* 2 166). In 404 the *Peregr. S. Paulæ* calls it 'semirutum oppidulum.' In 451 it had a bishop (*Acts of the Coun. of Chalcedon*: cp *Descr. Parochiæ Jerusalem*, *circa* 460), and in 744 it still contained Christians. With their disappearance before the Arabs, the Greek ecclesiastical name would vanish, and has not been recovered (hut see the curious statement of a native in *PEF Mem.* 2 134 that the name of Kefr Sābā is Antifatrūs). The Crusaders wrdngly identified Antipatris with 'Arsūf, the ancient Apollonia. G. A. S.

ANTQNIA, see JERUSALEM.

ANTOTHIJAH, or rather RV ANTHOTHIJAH (עַנְתֹתִיָּה, עַנְתֹתִיָּה [Gi.], עַנְתֹתִיָּה [Bä.]; probably a feminine adjective formed from ANATHOTH [*q.v.*]), in genealogy of BENJAMIN (*q.v.*, § 9 ii. *β*), 1 Ch. 8 24† (ανωθαιθ [αναθωθια, A] και αθειν [𝔊^BA], αναθωθα [L]).

ANTQTHITE (עַנְּתוֹתִי), 1 Ch. 11 28 AV. See ANATHOTH, 1.

ANUB (עָנוּב; εννωνϯ [B], εγνωβ [A], ανωβ [L]; *ANOB*), a Judahite, descendant of Coz (RV Hakkoz) (1 Ch. 48). Probably to be identified with ANAB (We.).

ANUS (αννας [B]), 1 Esd. 9 48 AV = Neh. 87 HANAN, 4.

ANVIL (פַּעַם), Is. 41 7†. See METAL WORK.

APAME (απαμη [BA], -πη. [L]; ܦܐܡܐ; *APEME*), daughter of Bartacus and concubine of Darius (1 Esd. 4 29).

APAMEA (Jer. Talm. *Kil.* 9 32c אפמיא, but oftener אספמיא), mentioned in the Vg. text of Judith 3 14, apparently as a district ('pertransiens . . . omnem Apameam') in the line of march of Holofernes.

'Απαμήνη, one of the ten districts of N. Syria under Rome (Ptol. *Geogr.* v. 15 19), took its name from 'Απάμεια, a fortified town (named after Seleucus Nicator's Persian wife), built on a hill some six or more miles east of the Orontes, half-way between Emesa and Antioch, and now represented by important ruins under the village that occupies the site of the old citadel, now called *Kal'at el Mudīk*. See Strabo, p. 752; Ritter, *Erdkunde* 17, Abth. ii. 1075-86; E. Sachau, *Reise in Syrien u. Mesopot.* 71-82 (photographs and map); also reff. in Boettg. *Lex. Jos.*

APE (קוֹפִים, קֹפִים; πιθηκοι [BAL]; *simiæ*, 1 K. 10 22, λίθων τορευτῶν [BL], cp *v.* 11; 2 Ch. 9 21†). An animal mentioned among the rarities brought from Ophir by Solomon's fleet. The Heb. *ḳōph*, 'ape,' is evidently a loan-word,[1] and is usually connected with *kapi*,[2] the Sanscr. name of the ape; thus the home of the animal, though not necessarily the situation of Ophir, will be indicated. It is mentioned in each case, in MT (the phenomena of 𝔊 are here very peculiar), in connection with the peacocks (if the common theory is correct) imported by Solomon from OPHIR. Perhaps 'monkey' would be a more correct modern English rendering than 'ape,' which suggests the tailless *quadrumana*, while the animals of this order represented on the Assyrian and Egyptian inscriptions have tails. Just so, κῆβοι would have been a better Greek rendering than πίθηκοι (the LXX word), if Aristotle is correct in making the πίθηκοι tailless. Four Binds of monkeys are represented on the Assyrian monuments. Those on the black obelisk of Shalmaneser II. seem to belong to an Indian species; they appear in company with the Indian elephant and the Bactrian camel (Houghton, 'On the Mammalia of the Assyrian Sculptures,' TSBA 5 319 *f.* ['77]). Monkeys (*gad*) and baboons were much in request in Egypt. Queen Ḥa'tšepsut ('Hatasu,' 18th dynasty) received them among other rarities from the (African) land of Punt; see the picture of the native ambassadors leading specimens of the *Cynocephalus Hamadryas* and the *Cynocephalus Baduinus*.[3] Halévy, however (*REJ* 21 63 *f.*), would identify Solomon's קוֹפִים and תֻּכִּיִּים (see PEACOCKS) with the *tuku* and *kukupi* mentioned in the Amarna tablets in the requests of the Asiatic princes—*i.e.*, different sorts of vessels full of aromatic oil, etc.[4] Plutarch (*de Is. et Osir.* 81) gives an account of the sixteen ingredients of the Egyptian κῦφι.[5] N. M.—A. E. S.

APELLES (απελλης [Ti. WH], contracted from 'Απολλόδωρος) is saluted in Rom. 16 10, where he is called 'the approved (δόκιμος) in Christ,' an expression which seems to suggest that he had shown constancy as a confessor in time of trial. Nothing further is known of him. Weizsiicker suggests that his Christian activity may have been chiefly within the household of Aristobūlus also mentioned in *v.* 10 (*Apost.* Age 1 399).

In the list of the 'seventy apostles' which we owe to Pseudo-Dorothens, Apelles is represented as bishop of Heraclea; that of Pseudo-Hippolytus mentions Smyrna. According to the ὑπόμνημα of Peter and Paul by the Pseudo-Symeon Metaphrastes, he was consecrated bishop of Smyrna by Peter.

APHAEREMA (αφαιρεμα [ℵV[1]]), 1 Macc. 11 34 RV, AV APHEREMA.

APHARSACHITES (אֲפַרְסְכָיֵא [Bä.]; אֲפַר' [Gi.]; αφαρσαχαιοι [BA], but -σακκαιοι [B] in Ezra 5 6; -ρασθαχαιοι [L]; see also next article), a word used (Ezra 5 6 6 6†) apparently as the title of certain officers under Darius. Another form is APHARSATHCHITES; see Ezra 4 9, where the word is misunderstood (see EZRA, ii.

1 If it belongs to the original text: see EBONY, § 2 *b*.
2 Whence also κῆβος or κῆπος, and Eng. *ape*.
3 Edwards, *Pharaohs, Fellahs, and Explorers* 292. See also the apes and baboons on a wall-painting in a tomb, *El Bersheh* (Egypt. Explor. Fund), Pt. II., plate xi.; cp p. 29.
4 See Am. Tab. B 28 = Wi. 294, col. 2, 40; 1 kukupu ša . . . [ḳa]-du naktamišu, 'a *kukupu* . . . with its lid'; col. 3, 43 . . . kukubu šamni ṭābi, '. . . a kukubu of good oil'; B 5, 1, 25 (recto) šamni ša tabu aḫiya uširanni II *duk* kukupu, 'send me, my hrother, good oil, two vessels *kukupu*' (so Hal., not in Wi.). *Duk* or *tuk* (pl. *tukē*) is the ordinary ideogram for 'vessel, receptacle.'
5 The Assyriological notices are mostly due to Prof. Cheyne.

§ 10) and treated as the name of a tribe settled in Palestine by ASNAPPER. Its etymology is still very uncertain. See G. Hoffmann, *ZA* 2 54 *f.*; Marquart, *Fund.* 64; and Andreas in Marti, *Bibl.-aram. Gram.*, Glossary, p. 53".

APHARSATHCHITES, The (אֲפַרְסַתְכָיֵא [Sa.]; אֲפַרְסַתְכָיֵא [Gi.]; φαρεσθαχαιοι [B], αφαρσαθ· [A], αφαραστα̣χ· [L]), Ezra 4 9†. See APHARSACHITES.

APHARSITES (אֲפָרְסָיֵא [Bä. Gi.]; αφρασαιοι [B], αφαρσ· [A]; φαρασθαιοι [L]), mentioned in Ezra 4 9† as a tribe settled in Palestine by ASNAPPER. Various attempts at identification have been made (*Persians*, by Rawlinson, *Pulp. Corn.* ad loc., but see *KAT*(2) 376; *Parsua*, a Median tribe, by Del. *Par.* 327); but the word is best regarded as a scribe's error, related (some think) to אפרסכיא (EV APHARSACHITES, Ezra 5 6 6 6), or, more probably, miswritten for סָפְרַיָּא, 'scribes.' The last letter of טפסריא (MT טרפליא, see TARPELITES) was attached by dittography to the next word (Marquart, *Fund.* 64).

APHEK (אֲפֵק αφεκ [BAL]). It is not easy to determine how many places of this name are mentioned in the OT. Only one of them has been satisfactorily identified.

1. In Josh. 13 4 (ταφεκ [B], αφεκα [A], -κκ. [L]) Aphek appears as the limit of the Sidonian country, apparently as its northern limit towards the Giblites or Byblians. This Aphek, therefore, is commonly identified with Aphaca (now *Afḳa*), famous for its sanctuary of Astarte, which lies at the source of the river of Byblus, the Adonis or (as it is now called) Nahr Ibrāhīm; cp Lucian, *Dea Syria* 6-8.

2. The Aphek assigned in Josh. 19 30 to the tribe of Asher is mentioned in Judg. 1 31 (where the name is written אֲפִיק, APHIK, αφεκ [AL], ναει [B]) as one of the towns which the Canaanites were able to maintain against the invaders. Here also some suppose that Aphaca is meant; but it is difficult to believe that Asher ever attempted to extend so far north, and, as it appears from Josh. 17 11[1] that Asher had a theoretical claim to part of the plain of Sharon S. of Mt. Carmel as far at least as Dor, it is probable that Aphek in Sharon (no. 3) is meant.

3. In Josh. 12 18 (οφεκ [B]) we read, in the list of the kings smitten by Joshua, 'the king of Aphek, one; the king of Lasharon, one'; but it is better to emend the verse with the aid of 𝔊B (Ὀφὲκ τῆς Ἀρώκ) and read 'the king of Aphek in the (plain of) Sharon, one' (see Di. on the passage). This Aphek in Sharon, as Wellhausen has pointed out, is the city (*a*) from which the Syrians of Damascus made repeated attacks on Samaria, 1 K. 20 26 30 (αφεκα [BA], -κκ. [L]), 2 K. 13 17,[2] and (*b* and c) from which the Philistines assembled their forces for war with Israel before the battles of Gilboa (1 S. 29 1) and of Eben-ezer (1 S. 4 1; Jos. αμφεκα or αφεκα).

(*a*) As regards the Aphek of Kings: that it lay in a lowland plain is clear from 1 K. 20 23, and that the plain is that of Sharon follows from 2 K. 13 22 𝔊L, where we find the addition (undoubtedly genuine) 'and Hazael took the Philistine from his hand from the Western sea to Aphek.' Aphek therefore lay on the verge of Philistia—*i.e.*, in Sharon—and we must understand that, both in Benhadad's time and in the time of Hazael, the Syrians avoided the difficulties of a direct attack on the central mountain-land of Canaan by striking into the maritime plain south of Carmel and so securing the mastery of the fertile coast-land without having to besiege Samaria. Their route would, in fact, be the present great road from Damascus to Ramleh through Megiddo.[3] At Aphek, somewhere in the north of the Sharon Plain, they had a great military post from which they could direct their armies either against Samaria or against the Philistines (2 K. 12 17 [18]).

(*b*) As regards the Aphek of Samuel: it is clear that a point in the northern part of the Sharon Plain, on the road to Megiddo and the plain of Esdraelon, is appropriate to 1 S. 29 1. The mustering-place of the Philistines cannot have been in the heart of the Hebrew territory, least of all at such a place as el-Faḳūʿ on Mt. Gilboa (in the rear of Saul's army!) where it is absurdly placed by Conder and Armstrong. It is argued that the Philistines were at Shunem (1 S. 28 4) before they reached Aphek; but to argue thus is to forget that 1 S. 28 3-25, the story of Saul and the witch of Endor, is a distinct narrative, by a different hand, and that 29 1 originally followed directly on 28 1 *f.*

(c) Finally, the attack on central Israel which issued in the battle of Eben-ezer and the destruction of Shiloh (1 S. 4) would naturally be taken to have been made from the same Aphek, were it not that commentators have assumed that the position of Eben-ezer, and therefore of Aphek, is fixed somewhere near Mizpah by 1 S. 7 12. It is certainly safer, however, to distinguish the battle-field of Eben-ezer in 1 S. 4 1 from the stone Eben-ezer set up by Samuel many years later, than to assume the existence of two Apheks fitted to be the starting-point of a Philistine campaign (cp EBEN-EZER). And here also it is to be observed that chaps. 4 and 7 are derived from distinct documents, and that the historical value of the second is very insecure.

From what has been said it will appear without further argument that it is illegitimate to seek an Aphek in the region between Mt. Tabor and the Sea of Galilee, to which Eus. and Jer. give the name of Saron, or to place the Aphek of Kings at the caravan-station of Fīḳ in the mountains to the E. of the Sea of Galilee. This may be the Apheca near Hippus or Hippe of OS 91 24 and 219 72; but is not a biblical site. W. R. S.

The existence of an Aphek in Sharon is put beyond doubt by the following additional evidence. *First*, in the lists of Thotmes III. (*c.* 1600 B.C.) nos. 60-76 form a group by themselves; 62 is Joppa, 64 Lydda, 65 Ono. Then come 66 Apuḳn, 67 Suḳa, 68 Yḥm. At this last place, Thotmes had to decide which of three roads he should take over Carmel. Yhm must therefore have lain near the most southerly road—that is, somewhat south of the mouth of the Wādy 'Abu Nār—and may be the present Yemma by the high road along the edge of the Samarian Hills. Suḳa is doubtless the present Shuweikeh, 2 m. farther S. Apukn therefore lay between it and Ono. Maspero, it is true, identified Suḳa and Apuḳn with the Judæan Shocoh and Apheka of Josh. 15 48 53; but W. Max Muller (*As. u. Eur.* 161) has shown that the list contains nothing S. of Ajalon. The *n* of Apuḳn may be the common termination of place-names ־וֹן. Max Muller says it may also be read as *i*. *Secondly*, in the autumn of 66 A.D. Cestius Gallus, advancing on Jerusalem from Cæsarea, reached Antipatris, and 'sent before' a party to drive the Jews out of 'the tower of Aphek' (Πύργος Ἀφεκοῦ). After taking the tower he marched on Lydda (Jos. *BJ* ii. 19 1). This agrees with the data of Thotmes III. and places Aphek between the River 'Aujeh and Lydda. Here there is now no place-name which affords any help in the case, unless it be that of the village Fejjeh—*i.e.*, originally, Feggeh—about 9 m. NE. of Joppa (which, however, does not lie quite near enough to the E. limit of the plain to suit Lucian's text of 2 K. 13 22), and it ought not to be overlooked that in a list of mediæval Arab place-names quoted by Rohricht (*ZDPV*, 1896) there occur both Sair Fuka and Faḳin. *Again*, in a fragment of Esarhaddon (681-668 B.C.) a city Apku is described as 30 'kasbu-ḳaḳḳar' from Raphia on the Egyptian frontier. Schrader (*KAT*(2) 204), who translates kasbu-ḳaḳḳar by 'double leagues,' takes Apku to lie on

[1] On this passage see ASHER, § 3.
[2] See We. *CH* 254; cp *Hist.*, ET, 39 [but cp GASm. *HG* 350 401 *f.*].
[3] Cp the route of Al-Nābulusī, ed. Tuch.

the E.,of the lake of Gennesaret (*i.e.*, the present **Fik)** and the Aphek of 1 K. 20 26, etc. This, however, seems less likely to give the distance from Raphia of a place so situated than of an Aphek on the plain of Sharon. The 'Aujeh, it may be remarked, is 70 m. from Raphia. It ought not to be overlooked that the particularising of one Aphek as 'in Sharon' (Josh. 12 18, see above, 3) implies the existence of other Apheks in the land. G. A. S.

APHEKA (אֲפֵקָה, ⲁⲫⲁⲕⲁ [AL], ⲫⲁⲕⲟⲩⲁ [B]), an unidentified city in the mountain-land of Judah (Josh. 15 53†).

APHEREMA, RV APHÆREMA (ⲁⲫⲁⲓⲣⲉⲙⲁ *[K]*, ⲁⲫⲉⲣ. [VA] ܦܪܝܡ), 1 Macc. 11 34, probably a Græcised form of the city-name EPHRAIM (*q.v.*, ii.).

APHERRA (ⲁⲫⲉⲣⲣⲁ [BA]), a group of children of Solomon's servants (see NETHINIM) in the great post-exilic list (EZRA, ii. § 9, § 8 *c*), one of eight inserted in 1 Esd. 5 34 (om. L) after Pochereth-hazzebaim of || Ezra 2 57 = Neh. 7 59.

APHIAH (אֲפִיחַ ; ⲁⲫⲉⲕ [BL], -ⲫⲁⲭ [A*], -ⲫⲓⲭ [A?]), 1 S. 9 1†, according to MT, one of Saul's ancestors; but 'son of Aphiah, a Benjamite,' should probably be 'of Gibeah of Benjamin' (מגבע[ת] בן ימן). *So* virtually Wellhausen; but he did not notice that Aphiah (cp 𝔊 and note that $\kappa = y$, *e.g.*, in Reba Nu. 31 8) is a corruption of Gibeah. This was reserved for Marquart *(Fund.* 15). *T. K. C.*

APHIH (אֲפִיק), Judg. 1 31†. See APHEK, 2.

APHRAH, **HOUSE** OF, RV Beth-le-Aphrah (בֵּית לְעַפְרָה, ⲟⲓⲕⲟⲩ ⲕⲁⲧⲁⲅⲉⲗⲱⲧⲁ [BAQ]), Mic. 1 10†, the name of a town not identified with any certainty. The determination of the site of Beth-le-Aphrah cannot be separated from the larger qiiestion of the text of the whole passage, Mic. 1 10-15, which cannot be discussed here (see Taylor, *MT of Mic.*; Ryssel, *Untersuch.* on the Book of Mic. 26 *ff.*; We. *Kl. Proph.*; Wi. *AT Unters.* 185 *f.*, *AOF* 1 103). *So* much, however, is plain—the vocalisation cannot be trusted, especially in view of the paronomasia ('house of dust' RV mg.), and even the consonants were differently read by 𝔊. The older writers (*e.g.*, Winer, so now also Nowack) identified Aphrah with OPHRAH (*q.v.*); cp Pesh. 'the houses of Ophrah.' But the context seems to demand some place farther W. and S. Winckler, with his rather too ingenious emendation 'Bethel' (reading אֶל־עפר for לעפרה עפר *AOF*, *l.c.*), seeks to avoid this objection by reading 'Gilgal' for the historically impossible 'Gath,' and (with We.) 'Bekaim' (see BOCHIM) for the very questionable *bākō* (בָּכוֹ) in 1 10. Hitz. (*KGH*, *ad loc.*), followed by Mühlau in *HWB*[(2)], suggests a *'Afrā* that Yākūt (*Mo'jam el buldān*, *sub voc.*) mentions as 'a castle in Palestine near Jerusalem.' Ges.-Bu. suggests doubtfully *Betogabra* (Eleutheropolis, *Beit Jibrīn*), which, however, represents an Aram. בית גברא (Nestle in *ZDPV* 1 224 *f.*). Perhaps the name of the Wādy el-Ghafr running E. not far S. of Mirāsh may be an echo of Micah's Aphrah. So GASm. (*Twelve Proph.* 1 384), Che. (*JQR*, July **1898**). The ל in לעפרה seems to be a scribe's error (as if 'in the dust').

APHSES (הַפִּצֵּץ), 1 Ch. 24 15† **AV**, RV HAPPIZZEZ.

APIS (חַף ; ⲟ ⲁⲡⲓⲥ [BℵAQ], *ὁ π.* [Q* (superscr. a Q[1 fort])]; Egyptian *Ḥapi*), the black bull-god of Memphis (see **EGYPT**, § **14**). Though the name of this famous deity does not occur in EV, he is mentioned once in OT (Jer. 46 15 *a*). 𝔊 alone has preserved the true division of the words: for נִסְחַף, AV 'are swept away' (similarly RV Pesh. Vg.), we must read נָס חַף, 'hath fled Apis' (*ἔφυγεν ὁ Ἆπις*). Cp König, *Syntax* **210**, n. 1. For an analogous correction see Giesebrecht and Cornill *ad loc.* and cp CALF, GOLDEN, § 2.

APOCALYPSE, THE (**Book** OF REVELATION). According to the best Buthorities (ℵCA [in subscription] 28, 82, 93, 95; Ti. WH), the title runs *αποκαλυψις Ιωα[ν]νου*. Later MSS add *του θεολογου* (*Q* and many cursives), or *του αποστολου*, or *του αr. και ευαγγελιστου* (*P* vg. cod., Syr.).

1. Name, and place in NT.

In almost all MSS the Apocalypse now holds the last place in the NT. The stichonietry of Cod. Claromontanus (D, Paul) arranges as follows: Evang. Paul.. Cath. Apoc. Act. (see Greg. *Prol.* 3 136; cp also what is said about the Evangeliaria, 175 and 368). In the Syriac version of the Apocalypse which has been edited by Gwynn, the book was preceded by the Fourth Gospel. The hiatus in Cod. D was perhaps originally occupied by the Apocalypse and Johannine Epistles (Bonsset, *TLZ*, **1892**), thus giving the order Evang., Apoc., Epp. Joh., Acts. All this perhaps indicates that the Apocalypse and the other Johannine writings were originally handed down together. In point of fact, Tertullian actually speaks of an 'instrumentum Johannis,' which consisted of Apoc. and 1 Jn. (*Resurr.* 38, **39**; *Pud.* 19; *Fuga* 9; *Præscr.* 33). Cp Ronsch, *Das neue Test. Tertull.* **528**.

2. External evidence: canonicity.

The Boob seems to be presupposed in two places in the Ignatian epistles. (a) Ad *Eph.* 15 3 : *ἵνα ὦμεν αὐτοῦ ναοί* (KA read *λαοί* in Rev. 21 3) *καὶ αὐτὸς ᾖ ἐν ἡμῖν θεός*. (6) Ad *Philad.* 6 1 : *οὗτοι ἐμοὶ στῆλαί εἰσιν καὶ τάφοι νεκρῶν ἐφ' οἷς γέγραπται μόνον ὀνόματα ἀνθρώπων* (cp Rev. 3 12 *f.*, in the epistle to the church of Philadelphia]. Andrew of Caesarea, moreover, mentions Papias, amongst others, as bearing witness to the Apocalypse (*ταύτῃ προμαρτυρούντων τὸ ἀξιόπιστον*), and on Rev. 12 7 adduces (**32** 40 *ff.*, ed. Sylb.) two observations taken verbatim from Papias. That Eusebius does not mention the testimony of Papias is doubtless to be accounted for by the historian's unfriendly attitude towards the book. Irenæus appeals in support of the traditional number 666 to 'elders' who had actually seen John. (In all probability we could reduce this testimony of the elders to that of Papias alone: Harnack, *Chron.* der *altchristl. Lit.* 1 333 *ff.*). We find a writer so early as Justin asserting the book to be apostolical (*Dial.* 81 : *rap' ἡμῖν ἀνήρ τις ᾧ ὄνομα Ἰωάννης εἷς τῶν ἀποστόλων Χριστοῦ ἐν ἀποκ.*) and canonical (*Apol.* 1 28 : *ὡς ἐκ τῶν ἡμετέρων συγγραμμάτων μαθεῖν δύνασθε*). This early recognition of the Apocalypse as a canonical writing need not surprise us: the book itself puts forward a claim to this character (1 18 *ff.* 22 18).

3. 2nd Cent.

In the second half of the second century we find the Apocalypse widely recognised.

It is generally current *(a)* in Asia Minor, alike among Montanists, anti-Montanists (Apollonius; Euseb. HE **v.** 18 14), and mediating writers (Melito of Sardis; *ib.* iv. 26 2); and (*b*) in Gaul, both with Irenæus (*Adv. Hær.* ii. 22 3 *ff.* iii. 1 1 3 4 **xi.** 1 v. 30 1 3) and in the writing of the church of Lugdūnum and Vienna (in Eus. HE v.1 58). *(c)* In Africa, as already mentioned Tertullian knows of **an** *instrumentum Johannis* to which botd the Apocalypse and 1 Jn. belong; the *Acts of Perpetua and Felicitas* shows acquaintance with it (cp *cc. 4* and 12). (*d*) In Egypt the *Judicium Petri* seems to know the book (Hilgenf. *Nov. Test. extr. Can. Receptum* 101); *(e)* for Antioch, Bishop Theophilus (Eus. *HE* iv. 24 1) is our witness **Lo** the same effect; and (*f*) **for** Rome, the Muratorian Canon. (*g*) Clement of Alexandria cites the Apocalypse (*Pæd.* 2 108 119; *Strom.* 6 106), Origen is unaware of any reason for doubting its apostolic origin (*in Jos. Hom.* 6; cp Eus. *HE* vi. 25 9).

4. 3rd Cent.

The situation changes, however, in the third century. As early as in the second century Marcion had refused to recognise the book (Tert. *Adv. Marc.* 4 5), and the so-called sect of the Alogi attributed both the Apocalypse and the Fourth Gospel to Cerinthus (Epiph. *Hær.* 51, Philastr. *Hær.* 60 = Hippolytus; cp Iren. iii. 11 9)—probably on account of their own hostility to Montanism (after Irenaeus; Th. Zahn, *Kanons-gesch.* 1 239 *ff.*, Bousset, *Komm.* 16 *f.*).

This **opposition** by the Alogi was continued by the Roman presbyter Caius, who, in his dispute with the Montanist Proclus,

also attributed the work to Cerinthus (Eus. *HE* iii. 28 2). From the refutation of Caius by Hippolytus (κεφάλαια κατὰ Γαίου, Assem. *Bibl. Or.* iii. 1 15; fragments in Gwynn, *Hermath.* 6 397-418; cp also the writing catalogued in the inscription on the throne —ὑπὲρ τοῦ κατὰ Ἰωάννην εὐαγγελίου καὶ ἀποκαλύψεως) we learn that Caius directly took up and continued the criticism of the Alogi.

The criticism of Dionysius of Alexandria (Eus. *HE* vii. 25) was more moderate and more effective. He does not hold Cerinthus to have been the author of the Apocalypse, but conjectures that it must have been the work of some other John than the son of Zebedee, arguing from a comparison between the Apocalypse on the one hand and the Gospel and Epistles on the other as to style, language, and contents. The criticism of Dionysius was afterwards taken up by Eusebius, who was the first to provide a firm basis for the conjecture of Dionysius as to a second John by a reference to what Papias says of 'both' Johns (*HE* iii. 39) and inclines to class the Apocalypse with the spurious books, νοθοι (*HE* iii. 25 4).

Henceforward the view of Dionysius and Eusehius became the prevailing one in the Eastern Church.

6. Eastern Church. The book was recognised, indeed, by Methodius of Tyre (*Sympos.* 1 5 G 5 8 4 *ff.*) and Pamphilus (*Apol.*, ed. de la Rue 4 25 33), but on the other band unrecognised by Cyril (*Catech.* 4 33-36), Greg. of Nae. (*Carm.* 33), the Synod of Laodicea (Can. 64, see Zahn, *op. cit.* 2 197 *ff.*), the *Apostolical Constitutions* (Can. 85 [84]; Zahn, 2 191 *ff.*), the *Iambics* of Seleucus (Zahn, 2 217). The Apocalypse is not mentioned by Theodore of Mopsuestia, or by Chrysostom (cp the προθεωρία of the Synopsis of Chrysostom, Zahn, 2 230), or by Theodoret. In the *Stichometry* of Nicephorus manipulated in Jerusalem (*circa* 850; Zahn, 2 288 296 *f.*) it figures among the Antilegomena; in the list of the sixty canonical books it is not found, though it is again introduced into the *Synopsis* of Athanasius.

The unfavourable judgment of the Syrian church regarding it is very noteworthy.

6. Syrian Church. The *Doctrine of Addai* which, in the form in which we now have it, dates from about 400 A.D., recognises, as authoritative scriptore, nothing beyond the four gospels (Diatessaron), the Pauline Epistles, and Acts. From the Peshitta it is wholly absent. Whether Ephraim recognises the Apocalypse as canonical is, to say the least, doubtful. The Greek works that pass under his name, being of uncertain authenticity, cannot here be taken into account, and thus the evidence that he did appears to rest mainly on a single passage (*Opera*, Assem. 2 232, cp Rev. 5 1-3).[1] In any case, the noteworthy fact remains that Ephraim cites the Apocalypse but little, and develops his apocalyptical ideas on lines supplied by other writings. Besides, the Syrian Church did not look upon the book with favour? Jacob of Edessa (*ob.* 708) cites it (Ephraemi opera, ed. Assem. 1 192), and Bar Salib (*ob.* 1171), bishop of Mabug (Mabbōgh), comments on it (Gwynn, lxxxvii ci); but Bar-Hebræus (*ob.* 1286) holds it to be the work of Cerinthus or of the 'other' John (Assem. *Bibl. Or.* 3 15), and 'Ebed Ješu' (*ob.* 1318) omits it from his list of canonical scriptures. In an Armenian Canon also, by Mechitar of Aivirank (1290), the Apocalypse is reckoned among the Antilegomena.

7. Rest of East. Though the opposition to the Apocalypse was thus persistent in the Syrian Church, it gradually died away in the other Eastern provinces.

The book is acknowledged by Athanasius Didymus Cyr. Alex., Nilus Isidore of Pelusium (Egypt),[3] 'Gregory 'of Nyssa, Epipdanius of Salamis, and Johannes Damascenus. Andrew, archbishop of Czsarea in Cappadocia, wrote his commentary on it in the first half of the fifth century. He was not, however, followed in this until the ninth century, when Arethas, his successor in office, also undertook the task.

In the Western Church, on the other hand, the Apocalypse was accepted unanimously from the first.

8. West. Hippolytus (see above) defended and commented on it in a no longer extant work, and makes copious quotations from it in his Commentary on Daniel and in his *De Antichristo.*

Similarly, it is recognised by Lactantius (*Instit.* 2 2 7 10, epit. 42; cp 7 15 *ff.*), Hilary (*De Trin.* G 20 43), Ambrose (*De Virg.* 14, *De Spiritu* 3 20), Rufinus (*Exp. in Symb.* 37); on Novatus, Commodian, Arnobius, and others see Lardner, *Credibility of the Gospel History.*

Augustine (in *Evang.-Joh.* 1336, *Epist.* 118, *Civ. Dei* 20 7) insists on the identity of the author of the Gospel with the writer of the Apocalypse.

The book was acknowledged at the synods of Hippo (393) and Carthage (397). As early as the end of the third century it was commented on by Victorinus, bishop of Pettau (ob. 303 A.D.). He was followed by the Donatist Ticonius (before 380).

An exceptional position was taken up by Jerome, who, under eastern influence, relegated the Apocalypse to the second class of *scripturæ ecclesiasticæ* (*in Ps.* 149), as also afterwards by Philastrius, if it be indeed the case that the book was not mentioned in the Canon of his *De hæresibus* 87 *f.*

At a later date the capitulum Aquisgranense (*Corp. Jur. Germ.*, ed. Walter, ii. 177 *f.*, cap. 20), adopting the decision of the Synod of Laodicea, removed it from the Canon.

At the Reformation the view of Jerome was revived by Erasmus in his *Annotationes.* Luther's well-known

9. Since Reformation. adverse judgment, pronounced in his preface of 1522, rests more on a religious than on a scientific foundation. Subsequently he gradually modified his view in a sense more favourable to the book. In his translation, however, he indicated his unfavourable opinion so far at all events that he relegated James, Jude, Hebrews, and the Apocalypse to the end of the NT without pagination. The last edition of the NT in this form appeared in 1689. Carlstadt (*Libellus de canonicis scripturis*, 1520), falling baclc on the criticism of Eusehius, classed the Apocalypse among the seven Antilegomena. The opposition to its reception lasted down to the following century, and disappeared only after the introduction of John Gerhards cunningly devised distinction between canonical and deutero-canonical writings (*Loc. theol.* i. cap. 9, § 241). In the reformed churches the opposition disappeared much earlier—from the time of Calvin, indeed.

In the eighteenth century the question was again revived by Abauzit (*Discours hist. sur l'apoc.* (in *Œuvres diverses*, tom. i., 1770); Hermann Oeder (*Christlich freie Untersuch. üb. d. sogenannte Offenb. Joh.*, published by Semler, Halle, 1769), reverting to the view of Caius of Rome, attributed the book to Cerinthus. He was followed by Semler (*Freie Untersuch. des Canons* 7772, and in many controversial writings), and by Corrodi (*Gesch. des Chiliasmus*, 1781). The best defence was that of Hartwig (*Apologie der Apok.*, 1780-83). Cp also the successive editions of J. D. Michaelis, *Einl. in die göttlichen Schriften* from 1750 onwards.

Our sources for the text are the following:—

10. Text:[1] the material. A. *Greek MSS.*—(1) Uncials. It exists in NAC (3 9-5 14 7 14-17 8 5-9 16 10 10-11 3 16 13-18 2 19 5-22 21 being absent), also in P Porfirianus Chiovensis sæc. 9 Act. Cath. Paul. Apoc. (16 12-17 1 19 12-20 2 22 6-21 being absent), and Q (in Tischendorf, B), Vaticanus 2066 sæc. 8 (Apoc. only). (2) Cursives. Of these some seventy are more or less collated. Their readings can be learned from the editions and collations of Mill-Kuster (1710), Bengel (1734 *ff.*), Wetstein (1751-2), Matthæi (1782-88, tom. x.), Alter (1786-87), Birch (*Variæ Lectt. in Apok.*, 1800), Scholz ('30-36), Scrivener (*Codex Augiensis*, 1859; *Adversaria Critica*, '93), Tregelles ('57-72), Tischendorf (ed. octava major), Alford (*New Test.* vol. iv. ed. 2, 1885), Simcox (*J. Phil.* 22 285 *ff.*).

B. *Versions.*—(1) Latin.—A good deal is now known about these. The oldest stage is represented by h (Floriacensis), the Latin translation used by Primasius (Haussleiter, *Forschungen zur Gesch. des Kanons* iv.); the intermediate, by the Gigas Holmensis (ed. Belsheim '79). The best material for the Vulgate is brought together in Lachmann (*Nov. Test.*) and Tischendorf. (2) Syriac.—A valuable Syriac rendering (probably the Philoxeniana) has recently been edited by Gwynn (*op. cit.*).[2] The Syriac MSS hitherto known (see Gwynn, xiv. *ff.*) represent the text of Thomas of Harkel. (3) Importance also attaches to the still comparatively unexplored Coptic (see Goussen, *Stud. Theol.* i.) and Armenian versions.

C. *Church Fathers.*—There are copious citations in Origen, Hippolytus (especially in the *De Antichristo* and in the com-

[1] Gwynn (*The Apocalypse of St. John in a Syriac Version*, Dublin-London, 1897, p. ciii) cites also De Lamy, *Hymn.* 1 66—a passage which the present writer finds himself unable to accept as proof.

[2] Thomas of Harkel, it is true, included it in his translation, as probably also (according to the latest researches of Gwynn) did Philoxenus of Mabug (Mabbōgh).

[3] See Liicke, *Versuch einer vollständigen Einleitung in die Offenbarung Johannis* (2), Bonn, 1852.

[1] See F. Delitzsch *Handschriftliche Funde*, 1861; B. Weiss, 'Die Joh.-Apok.' in *Texte u. Untersuch.* 7 1 ('91); W. Bousset, 'Text-kritische Studien' in *Texte u. Untersuch.* 11 4 ('94); Gwynn, *The Apocalypse in a Syriac version*, 1897; on which see T. K. Abbot, 'Syriac version of Apocalypse,' *Hermathena*, 1897, pp. 27-35.

[2] See last note.

mentary on Daniel; see the new edition by Bonwetsch and Achelis), and Cyprian. The text used by Andrew of Cæsarea and Arethas in their commentaries has not as yet been fully established. The text of the lost commentary of Ticonius can best he made out from the excerpt from the commentary on the Pseudo-Augustinian Homilies.

In the attempt to classify this material, it is best to begin with the class which shows the latest text—namely,

11. Classification. (1) the Arethas class, so named because a text of this order was used by Arethas for his Commentary (hence also many cursives of this class are, strictly speaking, MSS of Arethas-Commentaries). To this class belong Q and about forty of the more or less known cursives. The material being so defective, separate groups within the class can hardly be distinguished.

Tentatively and under great reservation a few may here be suggested. (i.) 9, 13, 27, 93 are somewhat closely connected (cp *TLZ*, 1894, p. 658); (ii.) 2 8, (14), 140, 151, 29, 50, 97 (the last three very intimately related), 94; (iii.) 6, 11, 31, (47); (iv.) lastly, Q, 14, 92 show near affinities. The group formed by (v.) 7, 16, 39, 45, 69 represents the transition-stage between this class (1) and the next class (2).

The second class, which we can detach from the rest as having arisen out of a later redaction, is (2) the so-called 'Andrew' class—the class to which the text used by Andrew (see above, § 10 C) in his conimentary belonged. It falls into several clearly distinguishable subordinate groups.

(i.) The group consisting of 35, 68, 87, 121 stands almost entirely apart, presenting as it does many points of contact with the Arethas group, but often showing a very peculiar text. The following three groups, on the other hand, are very closely akin: (ii.) 1, 12, 36, 81, 152 (often with a very archaic Latinising substratum); (iii.) 28, 73, 79, 80, 99; (iv.) 10, 17, 37, 49, [72], 91, 96, [154], 161. Cod. P admits of being ranked with this class as a whole, but cannot be associated with any of the subordinate groups in particular.

Of all the known cursives there are only (3) four—[26], 38, 51, 95—which it has hitherto been found impossible to classify; they show an ancient text.

It is as vet difficult to detect the 'Western text'

12. 'Western Text.' (see TEXT) in the Apocalypse; but this will gradually become practicable as in recent years new sources have become accessible.

Witnesses to it, though only in part, are the uncial ℵ (with a very erratic and only partially ancient text), the text of Primasius (identical, according to Haussleiter's investigations, with Cyprian's text, and thus old African), the fragments of *h*, the Gigas Holmensis *g*, Ticonius (containing a later development of the text), and the Syriac version edited by Gwynn and designated Σ (the later version known as S shows a text almost everywhere corrected in accordance with the Arethas class, though in many places also it contains a text older than 2). To the same category belong also, in part, the group 1, 12, 36, 81, 152 (cp Gwynn, cxli.) and, finally, the Armenian version, which, unfortunately, is not yet sufficiently known (note the coincidence of 1, 12, 36, etc. with arm.; cp Bousset, *Komm.* 178). A further point worthy of notice is the close affinity of ℵ, *8* (S), and Origen; one might almost venture *to* constitute ℵΣOr. a distinct group in the Western Class (Bousset, 181; Gwynn, lv *ff.*).

Distinctly the best text is that presented by ACVg. The Vulgate furnishes us with good means of con-

13. Result. trolling the text of AC, especially where the two differ or where C is wanting. AVg., therefore, where C is wanting, often constitutes a stronger testimony than that of all the other witnesses together.

'I John am he that heard and saw these things' (22 8 RV; cp 1 4 9). Are we to identify this John with the

14. Professed author. apostle, the son of Zebedee? Within the book itself 21 14 might fairly he urged against this identification. The first to submit the question to thorough discussion was Dionysius of Alexandria (see above, § 4); in the result he attributed the book to another John. This theory of a second John, adopted also by Eusebius (HE iii. 39 1 *ff.*), was revived in the present century (Bleek, Ewald, de Wette, Liicke, Neander, Dusterdieck, etc.), the John of the Apocalypse being usually in this case identified with the 'Presbyter' of Ens. HE iii. 39 1 *ff.* Criticism advanced another step, however, and declared the whole tradition regarding the presence of John the Apostle (and Evangelist) in Asia Minor to have been due to a confusion between his name and that of the presbyter.

So Vogel, ***Der Evangelist Johannes***, 1801-4; Liitzelberger, ***Die kirchliche Tradition über den Apostel Johannes***, 1840; Keim, ***Gesch. Jesu von Nazara***, 1867, 1 161 *f.*; Scholten, *Der Ap. Johannes in Kleinasien*, 1872; Weiffenbach, *Das Papias-fragment*, 1874; Thoma, ***Dar Johannisev.***, 1882; and others. Against Scholten cp Hilgenfeld, *ZWT*, 1876-77, also Zahn, *St. Kr.* 1866, p. 649 *ff.*; *Acta Joannis* clv., Steitz, *St. Kr.*, 1868, p. 509 *ff.*, Herzog, ***RE*** 11 78 *ff.*

The question is difficult. The first remark to be made upon it is that the assumption that there were two Johns

15. Only one John in Asia Minor. in Asia Minor—the apostle and the presbyter—finds only slender support in ancient tradition. Whatever the interpretation we may put on the important testimony of Papias preserved by Eusebius (*HE* iii. 39 1 *ff.*), it is at least certain that Papias speaks not of two Johns in Asia Minor—the apostle and the presbyter—but of one John, whom we are to look for as a near neighbour of Papias in space and time. Of a second John the second century and the first half of the third know nothing; he is unknown to Irenæus and to those who disputed the claims of the Fourth Gospel, to the Alogi and to Caius, to Tertullian, to Clement, and to Origen. Not till the time of Dionysius of Alexandria is reached do we find any indication of the sort (Eus. *HE* vii. 25 16). Even Dionysius alleges no other evidence than that in his day two graves of 'John' were shown.

The inference he draws from this—that there must have been two Johns—is by no means a stringent one. It would not he less reasonable to suppose that in his day the precise burial-place of John was no longer known, or that the two μνήματα represented two distinct holy 'places' of John (so Jer. ***de vir. ill.*** 9: *duæ memoriæ*; Zahn, *Acta Jo.* clv). For this supposition, Eusebius has supplied a plausible basis by combining the statement of Papias about two Johns with the traditions 'mentioned by Dionysius about two graves of John at Ephesus.

If the assumption that there were two Johns in Asia Minor proves to be a baseless hypothesis—and its base-

16. Viz., the Presbyter. lessness is shown by the fact, among other things, that the 'John' of Asia Minor is so often spoken of without distinguishing phrase of any kind—the question which next arises is as to whether this John was the apostle or the presbyter. At this point the important testimony of Papias turns the scale in favour of the presbyter. For his contemporary and the authority whom he quotes is—next to Aristion—the 'presbyter' John (Eus. *HE* iii. 39 4); and Aristion and John are doubtless also to be identified with the πρεσβύτεροι whom, according to Eus. *HE* iii. 39 3, Papias could still directly interrogate. The evidence of 2 Jn. and 3 Jn., claiming as they do to be written by the πρεσβύτερος, points in the same direction. Moreover, as has already been pointed out (§ 14), the Apocalypse apparently does not profess to have been written by the apostle. On the other side, it is true, we already find Justin (*Dial.* 81; see above, § 2) asserting the apostolic authorship. It is, however, noticeable that Irenæus—for whom the Gospel, the Epistles, and the Apocalypse are all by one and the same author—speaks of John as an apostle only in indefinite expressions similar to those in Gal. 1 19, but elsewhere invariably designates him as 'disciple' (μαθητής); see Bousset, *op. cit.* 41 *f.* Further, Irenæus, who calls Papias a disciple of John, also speaks of Polycarp as his fellow disciple (Eus. *HE* iii. 39 1). If we refuse to suppose that Irenæus had already confounded the presbyter with the apostle, then the great teacher of Polycarp was also, according to Irenæus, the 'presbyter' John; for Papias was *a* disciple of the presbyter. In the Muratorian canon, further, John is called simply 'discipulus,' whereas Andrew is 'apostolus.' The testimony also of Polycrates in the letter to Victor (ap. Eus. *HE* v. 24 2 *ff.*) claims particular attention in this connection. Here, in a passage where everything turns upon the exact titles of the persons named, Polycrates designates

APOCALYPSE

as the *στοιχεῖα* of Asia Minor (1) the apostle Philip and his daughters; (2) John who lay on the bosom of the Lord, *μάρτυς καὶ διδάσκαλος*, who was buried in Ephesus, *ὃς ἐγενήθη ἱερεὺς τὸ πέταλον πεφορηκώς*; (3) the bishops Polycarp, Thraseas, Sagaris, Papirius, Melito. Polycrates thus designates, plainly with intention, the author of the Fourth Gospel also as teacher and witness, not as apostle. Indeed, the traditions relating to the Fourth Gospel become much more intelligible if we are able to assume that the witness (Jn. 19 35, *ἐκεῖνος οἶδεν*) is not the Galilæan apostle, the son of Zebedee, but another John, a Jerusalemite (Bousset, *Komm.* 43 *f.*). It may also be remarked that the statement of the Fourth Gospel—that the beloved disciple was 'known unto the high priest' (18 15)—harmonises well with the account of Polycrates, 'who became priest' (*ὃς ἱερεὺς ἐγενήθη*; cp further, H. Delff, *St. Kr.*, **1891**, and Harnack, *Chronol.* 1 456 *ff.*).

The inference from all this would seem to be that the (one) John of Asia Minor, who was the presbyter, was one who had seen Jesus indeed, hut not one of the number of the apostles. The John of the Apocalypse (cp the superscription of the Epistles) is thus the presbyter.

Whether the Apocalypse was really written by him is another question. In order to understand how the Apocalypse and the Fourth Gospel could both be attributed to the same disciple of the Lord, it is necessary to remove them both a little distance away from him. John is only the eye-witness, not the author of the Fourth Gospel: so, in like manner, in the Apocalypse we may have here and there a passage that can be traced to him, but the book as a whole is not from his pen. Gospel, Epistles, and Apocalypse all come from the same school. They show also at various points linguistic affinities (Bousset, *Komm.* 202 *ff.*). They had, moreover, at first the same history: they were, it would seem, the favourite writings of Montanism, and were all three alike rejected by the opponents of Montanism, the Alogi.

17. Real authorship.[1]

The earliest Greek fathers who in any measure attempted to interpret the Apocalypse were Irenæus, Hippolytus, and Methodius:

18. Interpretation: Greek and Latin.

Irenaeus, in *Adv. Hær.* 5; Hippolytus, in Comm. on Daniel in *ἀπόδειξις περὶ τοῦ ἀντιχρίστου*, in extant fragments of thd *κεφάλαια κατὰ Γαίου* and in a no longer extant commentary 'on the book itself; Methodius in *Symp.* 1 5 6 5 8 4 *ff.* Of continuous commentaries originating in the Greek Church we possess only those of Andrew (5th cent., ed. Sylburg) and of Arethas (yth cent., ed. Cramer).

The oldest Latin commentary, which contains mnch interesting and ancient material (for example, the interpretation of various passages ,referring to Nero), is that of Victorinus of Pettau (*oh.* 303). We possess it only in Jerome's redaction. Haussleiter is about to edit it in its original form. An exceedingly powerful influence was exercised also by the commentary of Ticonius.

This work is, unfortunately, no longer extant and has to be reconstructed, as far as the materials allow, from the pseudo-Augustinian *Homiliæ in Apoc.* (Migne, *Pat. Lat.* 35), the commentary of Primasius (*ob.* **586** ed. princ. Basel, 1544) and (mainly) the great compilations'of Beatus, written in 776 (*in Apocalypsim*, ed. Florez, 1770).[3]

In his commentary, written before 380 A.D., wholly from the Donatistic point of view, Ticonius consistently carries out the spiritualistic interpretation. In his explanation of the millennium passage (**20** 1 *ff.*) he was afterwards followed by Augustine (Rousset, *Komm.* 65). Down to the Middle Ages the exegesis of the book continued to follow that of Ticonius, if his Donatistic tendency be left out of account.

Apart from the works already named, mention must be made of those of Cassiodorus (*Complexiones in apocalypsin* ed. Scipio Maffey, Florence, 1721]), Beda (*06.* 735; *explanatio apocalypsis* in *Biblioth. Patr.* Cologne, vol. v.), and Ambrosius Ansbertus (*c.* 770: *in Apocalypsim libri x.*, *Bibl. Patr.*, Col., 9). Dependent, in turn, on Ansbertus are Alcuin (Migne, *Pat. Lat.* 100) and Haymo of Halberstadt [843] (Migne, 117), while Walafried Strabo's *Glossa ordinaria* (Migne, *Pat. Lat.* **114**) depends on Haymo. To the same class of interpretations belong the performances of Anselm of Laon (Migne, 162), Bruno of Aste (Migne, 165), Rupert of Deutz (Migne, 169), Richard of St. Victor (Migne, 196), Albertus Magnns (*Opera*, Lyons, 1651, tom. 12), a commentary, probably in reality of Waldensian origin, which is found, in two recensions, among the works of Thomas Aquinas (*Opera*, Parma, 1869; tom. 23 324 *ff.* 512 *ff.*), Hugh of St. Caro (1263; *Postilla*), Dionysius Carthusius (14th cent.). Thus the single commentary of Ticonius continued to dominate the whole interpretation of the Apocalypse until far down in the Middle Ages.

The next interpreter of the Apocalypse to attain wide influence was Joachim of Floris (soon after 1195; *Expositio . . . abbatis Joachim in Apoc.*, Venice, **1527**). With him the fantastic futurist (chiliastic) interpretation began to gain the upper hand. over the formerly prevalent spiritualising view. He was at the same time the originator of a 'recapitulation theory,' which he carried out into the minutest details. As 'the Age of the Spirit,' associated with a mendicant order that was to appear, occupied a central place in the prophecies of Joachim, he naturally became the prophet of the 'opposition' Franciscans, and his works were accepted by them as sacred. It was in these circles accordingly that his immediate followers in the interpretation of the Apocalypse arose (Peter Johannes Olivæ, Ubertino de Casale, Seraphinus de Fermo, Annius Viterbiensis, Petrus Galatinus): but his influence spread very widely in the course of succeeding centuries, and a continuous chain of many links connects the name of Joachim with that of Cocceius, who, in virtue of his *Cogitationes de apoc. S. Joannis* (Leyden, 1605), is usually taken as the typical representative of the modern 'recapitulation theory.'

19. Joachim.

Among the precursors of the Reformation the anti-Roman and anti-papal interpretation began to gain ground, although the only methodical exposition of this view that can be named is the commentary (by John Purvey?), emanating from Wycliffite[1] circles and written in 1390, which was afterwards published by Luther (*Commentarius in Apoc. ante centum annos editus*, 1530).

20. Reformation.

The founder of a consistently elaborated universal-historical interpretation was Nicolaus de Lyra (1329, in the *Postils*, which have been often printed). He is followed by certain Catholic interpreters. and, in method at least, by Luther. who in his preface of 1534 (Walch., 11) gives, in the space of a few pages, a clever but fantastic interpretation of the entire book, in which, as might be expected, the anti-papal interest holds a central place. Luther's view continued to dominate the interpretation of the Apocalypse within the Lutheran church.

21. Universal-historical method.

It prevailed from the time of Lucas Osiander (*Bibliorum sacrorum*, pars **3**) down to that of Jo. Gerhard (*Annot. in Apoc. Joh.*, Jena, 1643) and Abr. Calovius (*Biblia Nov. Test. Illustr.*, tom. **2** Frankfort, 1672—a learned work with valuable introductory material and persistent polemic against Hugo Grotius; for a list of the commentaries dependent on Luther see Bousset, *Komm.* 94). None of the works mentioned was of any value for the real interpretation of the book: the Apocalypse and its interpretatiou, so far as the Lutheran Church in Germany is concerned, became merely the arena for anti-Catholic polemics.

Within this period the number of works produced in Germany and Switzerland on this subject without dependence on the dominant Lutheran view was very small.

Among them the *Diligens atque erudita enarratio libri Apoc. Joh.*, 1547, of Theodor Bibliander is worthy of notice; in it we can discern in the treatment **of** chaps. 12 and **13** the

[1] Cp also below, §§ 28 and 34.

beginnings of an interpretation looking to contemporary conditions. Bullinger (*Predigten*, 1557) and Junius (*Apoc. Joh. Illustrata*, 1591) have a good deal in common with Bibliander.

Wildest and most fantastic of all are the English commentaries of this period.

Among them may be named Napier of Merchiston, the inventor of logarithms (*A Plain Discovery of the whole Revelation of Saint John*, 1593), Thomas Brightman (*Apocalypsis Apocalypseos*, Frankfort, 1609), Joseph Mede (*Clavis apocalyptica*, 1627), and Sir Isaac Newton (*Observations upon the Prophecies of Daniel and the Apocalypse of St. John*, 1732—dependent upon Mede).

22. Scientific.

The history of a strictly scientific interpretation of the Apocalypse, on the other hand, must be held to begin with the learned commentaries of French and Spanish Catholic theologians. They meet the Protestant polemic with conspicuous and indeed often astounding erudition, and, going back to the point of view of the earlier Church fathers, lay the foundations of a cautious and for the most part purely eschatological interpretation.

In this connection the works of Franciscus Ribeira (1578), Blasius Viegas (1601? cp also Bellarminus, *De Summo Pontifice*, lib. tert. De Antichristo), Benedictus Pereyra (1606?), and Cornelius a Lapide (1626) are well worthy of mention.

Conspicuous above them all is the *Vestigatio arcani sensus in Apocalypsi* of Ludovicus ab Alcazar. That writer was the first to carry out consistently the idea that the Apocalypse in its earlier part is directed against Judaism, and in its second against Paganism, so that in chaps. 12 *f.* we read of the first persecution of the Christians in the Roman Empire, and in ch. 19 of the final conversion of that Empire. He thus presents us with the first serious attempt to arrive at a historical and psychological understanding of the book.

The idea worked out by Alcazar had already been expressed by Hentenius in the preface to his edition of Arethas (*Œcumenii Commentar.*, ed. Moreiius et Hentenius 2), and by Salmeron (*Opera*, 12, Cologne 1614 'In sacram Jo. Apoc. præludia'). It ought to be added here that the explanation of the wounded head as referring to Nero Redivivus is found (for the first time since Victorinus) in the commentary of the Jesuit Juan Mariana. It was from the Jesuits that Protestant science first learned how to work this field.

Grotius (*Annot. ad NT*, Paris, 1664), who is so often spoken of as the founder of scientific exegesis, is, in his remarks on the Apocalypse at any rate, entirely dependent on Alcazar, whose interpretation, indeed, he has not improved by the details assuming references to universal history and contemporary events which he has introduced into it.

Grotius in turn was followed by Hammond (cp the Latin editions of Clericus tom. 1, Amsterdam 1698, and Clericus's notes to Hammond), Bossuet (1688) and Hervæus (1684). In Holland and Germany the fantastic school of interpretation continued to flourish for some time longer, prominent representatives being, in Holland, Vitringa, with his profoundly learned ἀνάκρισις ἀποκαλύψεως (1705; dependent on Mede), and his many followers, and in Germany, Bengel, with his commentary (1740-46-58) and sixty practical discourses on the Apocalypse. Much greater sobriety is shown by Joh. Marck in his *In Apoc. Comm.* 1699, with its copious exegetical material and valuable introduction; also by a group of eschatological interpreters in which are included Eleonora Peters (1696), Antonius Driessen (1717), and Joachim Lange (*Apokalyptisches Licht u. Recht*, 1730).

23. Since 18th century.

In the eighteenth century, although Aubert de Verse (*La clef de l'apocalypse*, 1703) followed the lines laid down by Grotius, Hammond, and Bossuet, the interpretation founded on allusions to contemporary events gained the ascendency, and in a very narrow form. At this period it took for the most part the very unfortunate course of endeavouring to treat the whole of the Apocalypse, after the analogy of Mt. 24, as a prophecy of the destruction of Jerusalem.

In this category must be placed the expositions of Abauzit (*Essai sur l'apoc.*, 1733), Harduin (1741), Wetstein (*Libellus ad crisin atque interpretationem NT* ed. Semler, 1766), Harenberg (1759), Hartwig (cp § 9), and, finally, Ziillig (1834).

On the other hand, we find much that is rightly said in Semler's notes to Wetstein in Corrodi's *Gesch. des Chiliasmus*. And a return was made to the sounder general principles of Alcazar by Herrenschneider (*Inaugural diss.*, Strassburg, 1786) and by Eichhorn (*Commentarius*, 1791). Even those shreds of the interpretation that looks to universal history, which had still persisted in showing themselves in Alcazar's work, were now stripped away, and thus a provisional resting-place was reached.

This stage is seen in the works of Bleek (*Theol. Ztschr.* 2, Berlin, 1820, *Vorlesungen über die Apok.* published by Hossbach in 1862), Ewald (*Comm.* 1828, *Die Johann. Schriften*, 2, 1862), De Wette (*Kurze Erklärung*, 1848-54-62), Lucke (*Versuch einer vollständigen Einleitung in die Offenbarung*, 1832, 2nd ed. 1852), Volkmar ('62), and also, for the most part, Diisterdieck ('59-87).

In all these works the interpretation from contemporary history is consistently carried out. All set forth from the decisive observation that in chap. 11 the preservation of the temple is predicted, and all, accordingly, date the book from before 70 A.D. Further, they all rightly recognise that the main drift of the Apocalypse is directed against Rome; all, too (except Diisterdieck), recognise Nero Redivivus in the wounded head. In particular, since the discovery, independently arrived at by Fritzsche, Benary, and Reuss, that the number 666 is intended for קסר נרון, the reference to Nero has become the *rocher de bronce* of all exegesis of the Apocalypse.

In passing, mention may he made of some works which, although following obsolete exegetical methods, are not without a scientific value: Hengstenberg ('49-'51-'61), Ehrard ('53), Elliot (*Horæ Apocalypticæ*, 1851; univ.-hist.), Auherlen ('54-'74), Christian ('61), Luthardt ('61), Alford (New Testament, 4 2), Kliefoth ('74), Beck (*Erkl. von Offenb.* i.-xii.; eschatol.) and Kiibel (in Strack-Zöckler's *HK*. 1888: this takes a mediating course between the standpoint; of contemporary history and eschatology). See also Zahn, 'Apokalyptische Studien,' in *ZKWL*, 1885-86.

24. Question of unity.

The interpretation of the Apocalypse entered on a new phase[1] as soon as doubts arose regarding the unity of the work and the method of literary criticism to be applied. The conjecture, which had been hazarded more than once,[2] that the Apocalypse was really a composite work was again taken up independently (1) by Daniel Volter. at the suggestion of Weizsäcker, whose pupil he was.

25. Redaction hypothesis.

The particular hypothesis put forth by Völter[3] as to the composition of the Apocalypse may for convenience be called the redaction hypothesis (*Ueberarbeitungs-Hypothese*).

He assumed in his first sketch, which he has not substantially modified, a fundamental text (*Grundschrift*) consisting (apart from single verses) of 1 1-4 4-6 7 1-8 8 *f.* 14 1-7 18 19 1-4 14 14-20 19 5-10, dating from the sixties, and an appendix 10 1-11 13 17, dating from 68-70 A.D. This underwent three (or rather four) redactions, of which the latest was in 140 A.D.—or, at all events, later than 130.

The work of Volter is based on a few happy observations. For example, he saw that 14 14-20 really forms the close of an apocalypse, recognised the divergence between 7 1-8 and 7 9-17, the true character of 10 1-11 13,—and so forth. Nevertheless, broadly, Volter's performance gave the student an impression of excessive arbitrariness, and was rejected on almost every hand.

Against the first edition see Harnack, TLZ, 1882, Dec.; Hilgenfeld, *ZWT*, 1882; Warfield, *Presb. Rev.* 1884, p. 228; against the second edition, Jülicher, *GGA*, 1886, pp. 25-38; Zabn, *ZKWL*, 1886.

The question was next taken up from an entirely different side (2) by E. Vischer ('Die Offenb. Joh. eine judische Schrift in christlicher Bearbeitung,' in *Texte u. Unters.*, 1886. 2nd ed. 1895); the result has been a lively and fruitful discussion. Vischer believed himself to have discovered that the ruling chapters (11 *f.*) of the Apocalypse can be understood only on the as-

1 In connection with what follows see Holtzmann, *JPT*, 1891; Raldensperger, *Z. f. Theol. u. Kirche*, 1894; A. Meyer, Theol. *Rundschau*, 1897, Hefte 2-3.

2 Grotius, Hammond, Vogel (Comm. vii. *De Apoc. joh.* 1811-1816), Bleek (*Berl. theol. Ztschr.* 2 240 *f.*; he abandoned his view in *Beitr. z. Evang.-Kritik*, 1846, p. 81; *St. Kr.* 1855, p. 220 *ff.*).

3 *Die Entsteh. der Apok.*, 1882, 2nd ed. 1885; Th. T, 1891, pp. 259 *ff.* 608 *ff.*; *Prot. KZ*, 1886, p. 32 *f.*; *Das Problem der Apoc.*, 1893.

APOCALYPSE

sumption of a Jewish origin. As he nevertheless continued to be convinced of the essential unity of the book, he inferred that in the form in which we now have it it is *a* ***Christian*** *redaction of a Jewish writing.* To the Christian redactor, besides isolated expressions, he attributed the following passages : 1-3 5 9-14 7 9-17 12 11 13 9 *f.* 14 1-5 12 13 15 3 16 15 17 14 19 9-10 13*b* 20 4-6 21 5*b*-8 22 6-21.

Vischer's able treatise found wide acceptance. Among those who signified their acceptance of his main thesis were Iselin (*Theol. Z. aus der Schweitz*, 1887 ; 'Apocalyptische Studien') ; an anonymous writer in *ZATW*, 1886, pp. 167-71 ; Overbeck in ***TLZ,*** 1887, p. 28 *f.* ; Ménégoz in *Rev. de théol. et phil.* 1887, p. 161 ; Krüger in GGA, 1887, pp. 26-35 ; Simcox in *Expositor*, 1887, p. 425 *f.* On the other hand, Völter (*Die Offenb. Joh. keine ursprüngl. jüd. Apok.*, 1886), Beyschlag (*St. Kr.* 1888), and Hilgenfeld (*ZWT*, 1890) declared themselves against it.

Athough it must be cordially acknowledged that to Vischer belongs the honour of having first raised the question in its entirety, it must be said that he was not successful in his attempt to solve it. He has neither proved the Jewish character of chap. 11 *f.* nor justified his fundamental thesis regarding the unity of the book. We shall be doing him no injustice if we classify him among those who uphold the 'redaction' hypothesis.

26. Sources hypothesis.

The earliest exponent of the 'sources' hypothesis (***Que&%-Hypothese***), which has lately come into competition with that of redaction, was Weyland, who wrote almost contemporaneously with Vischer (*Th. T*, 1886, pp. 454-470 ; and *Omwerking* ***en*** *Compilatiehypothesen toegepast op* ***de*** *Apocal. van J.*, 1888). Weyland finds in the Apocalypse *two* Jewish sources (א and ב) which have been worked over by a Christian redactor.

א corresponds, roughly, to Volter's primary document ; ב to the first and second of Völter's redactors (in Völter's Appendix א and ב are separated). Weyland's Christian redactor corresponds in a general **way** with Vischer's redactor. In 1894 Rauch (*Die Offenb. des/.*) signified his adherence to Weyland.

27. Objections.

Against both the hypotheses we have just described serious and far-reaching objections present themselves. Against the 'sources' hypothesis must be urged, in substance, the linguistic unity of the book (see below, § 34); against the redaction theory it has to be observed *(a)* that the fundamental document made out by Volter and his followers (see above, § 25) has no special character of its own, inasmuch as all the really living and concrete passages occurring within it are attributed to the redactor ; *(b)* that the disappearance of every trace of these numerous later redactions is remarkable.

28. Fragment hypothesis.

From such considerations the necessity for **a** third way became apparent. This third way was first pointed out by Weizsäcker in his *Apostolic* ***Age.*** He rightly discerned in the Apocalyptist's thrice repeated number of seven the fixed plan of an author who wrote the Apocalypse as **a** whole, and gave to his work the character of **a** literary unity. Into this literary unity certain interpolations intrude with disturbing effect (7 1-8 9-17 11 1-13 12 1-11 12-17 **13** 17). Thus Weizsacker arrived at his fragment hypothesis. According to him the Apocalypse is **a** literary unity proceeding from a single author, into which, however, apocalyptic fragments of various date have been introduced by the author himself. In the opinion of the present writer these are the lines along which the true solution of the problem is to be sought. All later investigators in this field have followed one or other of the three hypotheses just enumerated.

Oscar Holtzrnann (*GVI* 2 658-664) assumes a Jewish ground**work** into which again a still older source (**13** 14 6-13) has been worked in a Christian revision. Pfleiderer (*Urchristenthum*, 1887, pp. 318-56) steers an eclectic course ; Sabatier (*Les origines littéraires de l'apocalypse*, 1887) and Schoen (*L'origine de l'apoc.* 1887) re**present a c**ombination of Weizsacker and Vischer (regarding the Apocalypse as the work of **a** Christian author who has embodied Jewish fragments in his book).

29. Spitta.

A thoroughly elaborated 'sources' theory is that of Spitta (*Offenb. Joh.*, 1884). **In** diametrical opposition to Weizsäcker, he claims to see, in the thrice repeated series of seven, three sources.

These are *(a)* the seal source or Christian primitive Apocalypse U (U—Urapokalypse), written soon after 60 A.D. (practically, apart from the specifically Christian interpolations of the redactor, chaps. 1-6 and 7 9-17 8 1 19 9 10 22 8-21); *(b)* the trumpet source J(1), a Jewish writing (J=Jüdisch) of the reign of Caligula 7 1-8 8 9 10 1-7 11 15 12 13 14 1-11 16 13-20 19 11-20 20 1-15 21 1-8) ; *c)* the vials source J(2), from the time of Pompey (containing, approximately, the remainder of the hook).

These three have been worked together into a collected whole by a Christian redactor. (The additions assigned to him by Spitta are of about the same extent as those assigned to him by Vischer.)

The sources theory was next carried to the utmost by P. Schmidt (*Anmerkungen über* ***die*** *Comp.* ***der*** *Offenb. Joh.*, 1891).

Erbes (*Die Offenb. Joh.*, 1891) in his separation of the literary sources agrees in the main with O. Holtzmann, but also maintains with Volter (whose hypothesis he simplifies) the thoroughly Christian character of the whole book. Bruston (*Lés origines de l'apocalypse*, **1888)** pursues a path of his own. Ménégoz (*Annales de bibliogr. théol. 1* ['88] pp. 41-45) assumed two Jewish apocalypses and a Christian redactor.

The unity of the book is defended by certain scholars :

Not only by the critics of Vischer mentioned above, but also *by* B. Weiss (*Einl.*, and *Texte u. Untersuch. 8* 1891), Bovon (*Revue* de *théol. et phil.*, 1887, pp. 329-62), Hirscht (*Die Apoc. u. ihre neueste Kritik*, 1895), and Blom (Th. T, 1883-84). An expectant attitude is taken by H Holtzmann (*Einl.*, 1892 ; *Hand-komm.*, 1893).

30. Gunkel.

Finally, altogether new lines of investigation were opened up by Gunkel in his *Schöpf. u. Chaos* ('94). He controverted sharply, and sometimes perhaps not altogether fairly, both the current methods of interpreting the Apocalypse (that which looks to contemporary history for a clue, and that which adheres to literary critical methods), and proposed to substitute for them, or at least to co-ordinate with them, a history of apocalyptic tradition. He insisted with emphasis upon the thesis that the (one) Apocalyptist was not himself the creator of his own representations ; that his prophecies were only links in a long chain of tradition. In his investigation of this apocalyptic tradition he greatly enlarged the scope of the usual question 'Jewish or Christian?' by his endeavours to prove for chap. 12 a Babylonian origin, and in other places also (see below, § 40) to trace Babylonian influences in the book. Even if we grant that Gunkel has often overshot the mark,—as, for example, when he refuses to recognise Nero in the beast and its number —it is undeniable that his book marks the beginning of a new epoch in the interpretation of the Apocalypse.

31. Bousset.

Stimulated by Gunkel, and accepting some of his results, Bousset (***Der Antichrist in der*** *Ueberlieferung des Judenthums, des neuen Testaments,* ***und der*** *neuen Kirche*, 1895) proceeded to illustrate Gunkel's method by applying it to a definite concrete example, investigating the entire tradition regarding Antichrist, and endeavouring to show that in this instance a stream of essentially uniform tradition can be traced from New Testament times right through the Middle Ages and beyond them. In his view the Apocalypse can be shown to be dependent in **a** series of passages, particularly in chap. 11, on this already ancient tradition regarding Antichrist.

This view has been controverted by Erhes (*Theologische Arbeiten* **ars** *dem rheinischen wissenschaftlichen Prediger-verein gewandt*, Neue Folge, 1, Freiburg, i. B., 1897), who as against it, argues for the contemporary-history method in' its most perverse form.

Finally, in the *Kritisch-exegetische Kommentar* ('96), Bousset has sought to bring to **a** focus the result of the labours of previous workers. In his method of interpretation he follows Weizsacker (fragment hypothesis), and therefore gives a continuous commentary, describing the character of each particular fragment in its own place. In his exegesis he has given special attention to

the indications of Gunkel, and to the result of his own researches on the subject of Antichrist.

To sum up the result of the labours of the last fifteen years upon the Apocalypse. It seems to be settled that the Apocalypse can no longer be regarded as a literary unity.

32. Results.

Against such a view criticism finds irresistible considerations.

Among these is the incongruity between 7 1-8 and 7 9-17, as also that between 7 1-8 and 6 12 *ff.*, the two explanations of the 144,000 in 7 1 *ff.* and 14 1 *ff.*, the interruption of the connection caused by 10-11 13, the peculiar new beginning made in 12 1, the singular character of chap. 12, the *doublette* presented by chaps. 13 and 17, the fact that in 14 14-20 a last judgment is depicted, whilst that involved in 13 does not arrive till 19 11 *ff.*; the observation that in chap. 17 two representations of the beast and his associates are given alongside each other (see below, §45); and the isolated character of chaps. 17 and 18, 21 9-22 5.

Further, the chapters do not represent the same religious level. Chap. 7 1-8 (cp 20 7-9), with its particularistic character, is out of harmony both with chaps. 1-3 and with 7 9-17; in 11 1 *f.* the preservation of the temple is expected, whilst in 21 22 the new Jerusalem is to have none.

Moreover, different parts of the book require different dates: chap. 11 1-2 must have been written before 70 A.D., chap. 17 probably when Vespasian had already been emperor for some time; whilst the writing, as a whole, cannot, at the earliest, have been finished before the time of Domitian.

This result holds good notwithstanding Gunkel's warning against the overhasty efforts of criticism. That a variety of sources and older traditions have been worked over in the Apocalypse will not be denied even by the student who holds that it is no longer possible to reconstruct the sources.

It may seem doubtful whether a general character, date, and aim can be assigned to the Apocalypse; for, as has been seen, the work is not a literary unity. Still, if there be good ground for the critical conclusion indicated above, that the Apocalyptist is himself an independent writer who has simply introduced various fragments into his *corpus apocalypticum* (Weizsacker, Schon, Sabatier, Bousset), a relative unity has already been proved for the Apocalypse. This conclusion is confirmed, step by step, when the details of the book are examined.

33. Relative unity of structure.

The relative unity is shown (1) in the artificial structure of the whole.

Four separate times do groups of seven occur (epistles, seals, trumpets, vials); within these groups the prevailing distribution is into 4+3. The delineations of judgment and its horrors are regularly followed by pictures of joy and heavenly bliss; cp 7 11 14-19 14 1-5 15 1-4 19 1-10. Everywhere artificial connections are employed in order to bind the separate parts together into one whole: cp, for example, 1 20 and 4 1, 5 4 and 14 10 5-7 11 11 13; also 19 2 14 6 8 9-11 16 5-12 *ff.*; also 18 19 7 8 2 12.

(2) Further, the relative unity is shown clearly in the uniformity of the language throughout.

34. Of language and style.

The following are the more important facts.[1] Throughout the entire book are found **(a)** strongly marked grammatical irregularities—anacolutha and impossible constructions (*e.g.*, 1 5 *f.* 12 7), and confusions of case, especially with following participles (1 4 10 2 18 [see the reading of ℵ] 20 8 12 5 11 *f.* 6 1 7 4 9 *ff.* 8 9 9 14 10 8 11 1 14 6 12 14 16 12 17 4 8 18 12 *f.* 19 6 20 2 21 27 [reading of ℵ]). In 1 13 and 14 14 (to take only one instance) the reading ὅμοιον υἱὸν ἀνθρώπου cannot have been due to two separate persons.

(*b*) Hebraisms, especially the repetition of the demonstrative pronoun in the relative clause (3 8 7 2 9 13 8 12 20 8, cp 12 6 14 17 9, also 2 7 17 26 3 12 21 6 4 21 6), and the Hebraistic καί (3 20 10 7 14 9 *f.*).

(*c*) The *constructio ad sensum* is specially frequent (*e.g.*, 4 1 7 *f.* 5 6 12 *f.* 7 4 9 3 *ff.* 13 11 4 15 13 14 14 3 17 3 11 16 19 4 14); sometimes involving a plural predicate after a neuter plural subject (3 2 4 4 5 8 9 5 14 9 20 11 2 13 18 15 4 16 14 18 3 23 21 24). Less clearly attested is the simple ungrammatical confusion of gender (9 7 14 19 19 20 21 14 22 2, see the MSS.).

(d) Various other systematic peculiarities of idiom. For example, **προσκυνεῖν** governs the dative when the object is **θεός** (4 10 7 11 11 16 19 4 22 9, cp 14 7) or **δράκων** (13 4), whilst, on the other hand, we have **προσκ. τὸ θηρίον, τὴν εἰκόνα**, 13 [4] 8 12 15 14 9 11 [19 20] 20 4 (in 16 2 also we should read **τὴν εἰκόνα** according to the readings of ℵ, which are wrongly given in the printed editions). The instrumental dative is extremely rare in the Apocalypse; its place is often taken by the construction with Hebraistic ἐν, or even (but rarely) with **διά** and the accusative (4 11 12 11 13 14). The vocative is rarely used (twice only: **κύριε**, 11 17; **οὐρανέ**, 18 20). After a neuter plural the predicate is usually also plural (1 19 8 11 15 4 16 20 [18 14] 20 12 21 4). The Apocalyptist, except in a very few cases, construes **ὁ καθήμενος ἐπί** with the accusative, τὸν καθήμενον ἐπί with the accusative, τοῦ **καθημένου** ἐπί with the genitive, τῷ **καθημένῳ** ἐπί with the dative; he writes ἐπὶ **τὸ** μέτωπον, but ἐπὶ **τῶν μετώπων** (exception in 14 9), and **ἐπὶ τὴν κεφαλήν** invariably (except in 12 1). He construes either **ἐπὶ τῆς** γῆς or εἰς **τὴν** γῆν (14 16, ἐπὶ **τὴν** γῆν) ἐπὶ **τῆς** θαλάσσης or **εἰς τὴν θάλασσαν**. He invariably construes **γράφειν, ἱστάναι ἐπί** with accusative (14 1 **γεγρ. ἐπὶ τῶν μετώπων** and 10 5 **ἱστάναι** ἐπὶ **τῆς** γῆς are no exceptions but only confirmations of other rules). Noteworthy, also, is the constant vacillation in tense between present and future, and, in descriptions, between present and aorist. The Apocalyptist uses the infinitive almost invariably in the aorist. Exceptions occur in the case of **βλέπειν**, of which he apparently never makes an aorist, also in 11 6 13 13 (?). On the other hand, following the rule that is customary elsewhere, he construes **μέλλειν** almost always with the present infinitive. The copula is often wanting, particularly in relative sentences (14 2 13 5 13 9 11 20 10). A change in the use of subjunctive and indicative is made only after ἵνα (ὅπως does not occur at all), but here also a certain regularity prevails. A quite extraordinary use of ἵνα occurs in 12 14 and 14 13 (cp Jn. 8 56 9 2 11 15). In its use of particles the book displays an oppressive monotony: **καί** is predominant everywhere; only in the epistles to the seven churches is the style somewhat livelier.

The arrangement of the words is markedly Hebraistic. In choice of words it is remarkably *so*. The following characteristic phrases and turns of expression may be noted:—λόγος **τοῦ θεοῦ καὶ μαρτυρία Ἰησοῦ; ὁ** κύριος **ὁ** θεὸς **ὁ** παντοκράτωρ; **οἶνος τοῦ θυμοῦ τῆς ὀργῆς; ζῶν** εἰς **τοὺς** αἰῶνας τῶν αἰώνων; λίμνη **τοῦ πυρὸς καὶ θείου; φυλαὶ** γλῶσσαι λαοὶ **ἔθνη; βίβλος** τῆς ζωῆς; βρονταὶ φωναὶ **ἀστραπαὶ** σεισμός; πηγαὶ ὑδάτων; **ὁ ὢν καὶ ὁ ἦν καὶ ὁ ἐρχόμενος**; λαλεῖν and **ἀκολουθεῖν** μετά; ὄνομα **αὐτῷ; μετὰ ταῦτα**; ἀληθινός; δοῦλος (in a pregnant sense), **μαρτυρία, μαρτυρεῖν**; δεικνύειν; **νικᾶν**; σφάττειν; σκηνοῦν; **τηρεῖν τὰς** ἐντολάς. Compare, further, the enumerations in 6 15 11 18 13 16 19 5 18 20 12 (the formula **μικροὶ** καὶ μεγάλοι); the beatitudes (**μακάριος**; 1 3 14 13 16 15 19 9 20 6 22 7 14); the doxologies (1 6 4 11 5 9 12 *f.* 7 12 15 3 19 1 6); the formulæ introduced with ὧδε (13 10 18 14 12 17 9); ἦλθεν ἡ ἡμέρα (ὀργή, ὥρα etc.; 6 17 11 18 14 7 15 18 10 19 7).

The general style of the Apocalypse is monotonously diffuse: article and preposition are almost always repeated when there are more substantives than one, as also is the governing word before the governed. Whole clauses are gone back upon and repeated in the negative: Hebrew parallelism is not uncommon.

35. Date.

We are now at last able to form a tolerably clear conception of the personality, the time, the circumstances, and the literary aims of the apocalyptist who planned the Apocalypse, as a whole, in the form in which we now have it.

(*a*) The Apocalyptist writes at a time in which violent persecutions have already broken out—indeed they are beginning to become, so to say, epidemic.

Of the seven churches, four—Ephesus, Pergamum, Smyrna, Philadelphia—are passing through such times of trial. The martyrs already form a distinct class in the general body of believers. They are destined to have part in the first resurrection—before the thousand-years reign begins (20 4 *ff.* cp 7 9 *ff.*). The seer beholds them under the altar (6 9 *ff.*). All through the book this time of struggle is kept in mind (13 1 14 9 *ff.* 15 1 *ff.* 16 6 17 6 18 20-24).

(*b*) The Apocalyptist predicts a still mightier and more strenuous struggle.

In this struggle the predestinated number of martyrs is to be fulfilled (6 9 *ff.*). Philadelphia is to be preserved in this last great tribulation (3 10; cp the μεγάλη θλίψις of 7 14). This time is not far off: the martyrs who have already suffered are hidden endure only a little longer (6 11). Therefore, 'Blessed are they that die in the Lord from henceforth' (ἀπ' ἄρτι; 14 13).

(*c*) This struggle turns, and will in the future turn, upon the worship of the beast. That this beast is in one sense or another the Roman Empire, or connected with it, is admitted on all hands. It is important, however, to consider the grounds on which the Apocalypse opposes Rome. Rome's horrible deed is not, as might perhaps be guessed, the destruction of Jerusalem, nor yet—in the first instance, at least—the Neronian persecution, but the worship of the beast—*i.e.*, Cæsar worship (cp 13 14 9 *ff.* 15 2 *ff.* 16 5 *ff.* 10 17 6 19 11 *ff.* 20 4-6; cp Mommsen, *Röm. Gesch.* 5 520 n.).—What the

[1] A justification of these results in detail will be found in the Author's Commentary on this book (Introd. pp. 183-208). In some cases, where the reading adopted is less strongly attested, the citations are in brackets.

book predicts is the great conflict about to break out all over the world between Christianity on the one hand and the Roman Empire (with the Roman state religion, the worship of the emperors) on the other (cp ANTICHRIST, § 7).

(d) This great battle will begin with the return of Nero Redivivus.

In common with the rest of the men of his day, the Apocalyptist shares the popular expectation of the coming again of that emperor. Nero is (13 3 12 14) the head that was wounded to death and afterwards healed. He is only 'as it were' (ὡς) slain, like the lamb (5 6). For as the latter continues to live on in heaven, so does Nero prolong a shadowy existence in hell. Out of the abyss (17 8) he will again return, and as Roman Emperor demand adoration. Then will be the days of the great future struggle. Hence the name of the beast is 666—*i.e.*, נרון קסר (cp ANTICHRIST, § 15).

(e) Thus the date of the Apocalypse admits of being approximately determined. The end of the first century is already sufficiently indicated by the fact that the Apocalyptist expects the return of Nero from hell (Th. Zahn, 'Apocal. Stud.' in *ZKWL*, 1885, pp. 561-76, 1886, pp. 337-52 393-405; see below, § 45). The following consideration points to the same inference. Behind the Apocalyptist in point of time there already lies a great persecution. He himself is again living in limes of persecution, and is expecting worse to come. Inasmuch as the former persecution must be assumed to be the Neronian, we are compelled to carry the Apocalypse down to the later period of Domitian. When we do so the fact that 11 1 *ff.* points to a time before the destruction of Jerusalem need not cause us any misgiving: doubtless the passage comes from an earlier source. On the other side we should be able to fix an inferior limit for the date, could it be shown that the epistles were already known to Ignatius (see above, § 2). The date thus indicated—the close of the first century—was in point of fact the date at which, it would seem, the general persecutions of the Christians, turning substantially on the rendering of divine honour to the emperor, first broke out (see CHRISTIAN, § 6). The Apocalypse, as we now have it, presupposes conditions very similar to those which we meet in the well-known correspondence between Pliny and Trajan. In this it is not implied that the Apocalypse could not have been written some ten years or more earlier.

In the conclusion just indicated we find ourselves in agreement with the best attested tradition as to the date of the writing of the Apocalypse.

According to Irenaeus (v. 30 2; cp *v.* 20 7), the Apocalypse was 'seen' at the close of Domitian's reign at Patmos, and therefore, of course, to say the least, not written earlier (cp Vict. Pettau. *Comm.* on Apoc. 10 11; Eus. *HE* iii. 18 1-3; Jer. De *vir. illus.* 9; Snlp. Sev. *Chron.* 2 31). A different tradition is met with, it is true—perhaps in Tertullian, who (*De præscr. Her.* 36) mentions the martyrdom of John (by boiling oil—a death from which he was miraculously delivered), and his subsequent banishment, in connection with the martyrdoms of Peter and Paul (but see, on the other hand, *Scorpiace* 15). It is certain that at all events Jerome (*Adv. Jovin.* 1 26 [2 16]) understood Tertullian as assigning this martyrdom and banishment of John to the reign of Nero (cp Eus. *Dem. Evang.* 3; the superscription of the Syriac translation of the Apocalypse edited by Ludovicus de Dieu; the Gnostic *Acts of John;* Theophylact [who gives the date as thirty-two years after the Ascension; cp the notes of some of the Greek cursives of the Fourth Gospel: thirty years after the Ascension, under Domitian (!); Erbes, 481). Finally, Epiphanins (*Hær.* 51 12 33) will have it that the hook was written under Claudius. The same statement occurs in the Commentary of Apringius (upon whom see Bousset, *GGN*, 1895, p. 2), whence it found its way into that of Beatus (ed. Florez, 33).

The Apocalypse is distinguished from the apocalyptic literature of Judaism from the time of the book of Daniel onwards by the high prophetic consciousness which it displays.

36. Personality of Apocalyptist.

The Apocalyptist as he stands at one of the turning-points of the world's history looks with a clear eye into the future and feels himself to be a prophet. He is a Christian of an especial type. For the prophets are servants of God in a peculiar sense (1 1 10 7 11 18 *22 6* [cp 15 3]): they are the fellow-servants of the angels (22 9); other Christians are so only in so far as they follow the revelation of the prophets (22 9). God is master of the spirits of the prophets (22 6 cp 17 17 19 10). Hence the author directly claims for his work the rank of a sacred book. It is intended from the first to be publicly read (1 3); those who hear it and obey what is written therein are blessed (1 3 22 7), and whosoever adds to or takes away from it falls under the most grievous curse (22 18 *f.*). The frequent mention of the prophets along with the saints (*i.e.*, Christians in general)—see 11 18 16 6 18 20 24—is a proof, not, as many critics have supposed, of the Jewish, but of the Christian, origin of the related passages. The Apocalypse in this respect was the forerunner of Montanism, and it is no matter for surprise that it was specially valued in Montanistic circles. It is also noteworthy that the Apocalyptist speaks to his own age and time. Whilst Daniel is represented as receiving, at the close of his vision, the command to seal the book for long, here in sharp contrast we read (22 10) 'Seal not up the words of the prophecy.' The Apocalyptist seems to have been a Jewish Christian of universalistic sympathies. For him the name of Jew is a name of honour (2 9 3 9); he seems to uphold a certain prerogative for the Jewish people (7 1-8 11 1-13 20 7 *f.*). He shows himself intimately familiar with the language of the OT.

Into the apocalyptic unity thus defined, isolated fragments have been introduced in a manner which can still be more or less clearly detected. Of these the more important at least must now be discussed, and some detailed account of the more noteworthy results of criticism given.

37. Details of criticism.

Of recent critics the majority (Vischer, Volter, Weyland, Pfleiderer, O. Holtzmann, Schmidt) regard the epistles to the seven churches (chaps. 1-3) as having been originally separate from the rest of the book and as having been prefixed only after the Apocalypse had in other respects assumed its present form; but Spitta has shown good grounds for believing that chaps. 1-3 and 4-6 ought not to be separated, and (as against Vischer and others) has established for the whole of chaps. 4-6 that Christian character which unquestionably belongs to 5 6 *ff.* Thus Spitta takes chaps. 1-6 as a single original document (Christian primitive apocalypse= **U**).

38. Chaps. 1-6.

He seeks to prove this by pointing **out** that there is a definite close at the end of 6, and a fresh beginning of a new apocalypse in 7 1 (so also P. Schmidt). But the sixth seal (6 12 *ff.*) does not represent the final catastrophe; it only pictures a great earthquake in the typical apocalyptic manner. In **6 15 *ff.*** the end is still to come, and if, with Spitta, we pass on to 7 9-17 immediately after 6 17, any representation of the end of all things has completely disappeared from our reconstructed Apocalypse. In any case, it is impossible that one should fail to recognise an interpolated fragment in the short passage (6 9-11) relating to the fifth seal. We have an exact parallel to it in 4 Esd. **4 35** (cp also Æthiop. ***Enoch* 47**). And the tradition of 4 Esd. must be regarded as the original one. It speaks quite generally of a predestined number of the righteous which has to be fulfilled before the coming of the end, whilst in the Apocalypse the conception is applied to the predestined number of the martyrs—a modification which can be explained very easily from his general position (see above, § 35).

Spitta's view that 7 1-8 constitutes a fresh beginning, which has nothing to do with the preceding chapters, is certainly correct; but neither has the passage anything to do with that which follows it (7 9-17); as to this practically all critics are agreed. These facts, however, will not justify us in attributing 7 9-17 to the redactor (as do Volter, Vischer, Pfleiderer and Schmidt), nor yet in carrying out a system of deletions in chap. 7 (as do Erbes, Weyl., Rauch) until the two disparate sections have been brought into harmony. Our proper course is to recognise (cp also Spitta) in 7 1-8 an interpolated fragment—probably Jewish.

39. Chap. 7 1-8.

The sudden mention of the four winds, which are held by the angels and are nowhere in the succeeding narrative let loose, points to this conclusion, as also does the introduction of the 144,000 Israelites of the twelve tribes—a number which in **14 1 *ff.*** is interpreted in a sense inconsistent with the original intention.

Bousset has hazarded the conjecture that here we have a fragment of the Antichrist legend.

The next passage which presents special difficulties is 11 1-13. Here all critics are agreed in recognising a fragment interpolated between the sixth trumpet and the seventh (cp 9 11 and 11 14).

40. Chap. 11 1-13. Further, almost all critics agree in regarding chap. 10 as an introductory chapter connected with this fragment. On closer examination it is found, moreover, that 11 1-13 really consists of two smaller fragments: *(a)* 11 1 *f.*, a prediction of the preservation of the temple, written before the destruction of Jerusalem, and presenting points of contact with Lk. 21 24; *(b)* the prophecy relating to the beast and the two witnesses (11 3-13). This latter piece is of an extremely fragmentary and enigmatical character.

Certain matters are introduced without any preparation: the two witnesses, the beast from the abyss, the war of the beast with the witnesses, the peoples and tribes rejoicing over the death of these last. All these are *disjecta membra* which point to some larger connection.

In this passage, too, Bousset has sought to show that we have a fragment from the Antichrist legend.

In accordance with Jewish and primitive Christian anticipation the Antichrist is destined to appear as a God-defying ruler in Jerusalem, to lead the people astray and tyrannise over them, and to gather together a great army from all nations. Against him will arise the two prophets Elijah and Enoch, and Israelites to a definite number (7 1-8?) will he converted. A great famine and drought will come. Then Antichrist will put to death the two witnesses, and the end will draw near. It is evident that here we have a coherent tradition, of which some fragments are preserved in chap. 11.

Chap. 12 is the most difficult in the book. It also falls into two sections, 12 1-12 and 12 13-17, and betrays itself as a foreign intrusion both by its unfamiliar character and by its strange and bizarre representations.

41. Chap. 12 1-10.

A. Dietrich (Abraxas) was the first who sought to trace in the chapter an adaptation of the myth of the birth of Apollo: he held the pregnant fugitive woman to he Leto, the dragon was the Python, the child (who in the original legend himself slew the Python, Michael being a later introduction) was Apollo. The water which in the Greek myth figured as a protecting power has here become auxiliary to the dragon.

Recently Gunkel, in his *Schöpfung u. Chaos*, has directed special attention to this chapter, and shown that an adequate understanding of it could be arrived at neither on the assumption of a Christian nor on that of a Jewish origin (Vischer, Weyland, Spitta)—that on either hypothesis there remains an intractable residuum, bearing a mythological character. Here, accordingly, as elsewhere in the Apocalypse (cp the seven angels, stars, candlesticks, torches [EV 'lamps'], eyes, pp. 294-302; the twenty-four elders, 302-8; Armageddon, 263-66, and p. 325 n. 2; the number $3\frac{1}{2}$, pp. 266-70; also chaps. 13 and 17, 379 *ff.*), he found elements taken from Babylonian mythology, and in particular the myth of the birth of the sun-god Marduk and of the persecution of Marduk by the dragon Tiâmat. The difficulty in this construction of Gunkel's is that down to the present date it has been impossible to find in the Babylonian mythology any trace of the myth of the birth and persecution of the youthful sun-god. Bousset (*Apok.* 410 *f.*), however, has called attention to parallels with one chapter in Egyptian mythology (the myth of the birth of Horus).

In the result, there seems much probability in the supposition that chap. 12 embodies a myth of the birth of the sun-god and the persecution of the young child by the dragon, the deity of winter and of night. The Apocalyptist has changed the sun-god, however, into the παῖς Ἰησοῦς Χριστός, the persecutor into the devil, and the deliverance of the child into the resurrection (observe the inconcinnity of this adaptation). In this treatment of the material laid to his hand, he was not able to give full significance to the flight of the woman, which is so prominent a feature in the original myth. This is accordingly only briefly touched on in 12 6; but it receives copious and special treatment in the second half of the chapter (*vv.* 13-17). Hence the incongruity between 12 1 *ff.* and 12 13 *ff.* which Weizsacker pointed out.

What historical occurrence is intended by the flight of the woman in 12 13-17 is not quite clear. Usually the flight is taken as referring to circumstances connected with the destruction of Jerusalem—either to the destruction and (in a sense) the deliverance of Judaism, or, better, to the flight of the primitive Christian Church.

42. Chap. 12 13-17.

Erbes, who seeks to explain ch. 13 as referring to the Caligula period (see below), interprets the flight and deliverance of the woman in connection with the first persecution of Christians at Jerusalem, strangely taking *v.* 17, 'the remnant of her seed who hold the testimony of Jesus,' as pointing to the Jews (!) at the time of the Caligula persecution. Spitta actually takes the persecution of the woman as representing an occurrence in heaven. 'The remnant of the seed of the woman' represents, he thinks, the actual Israel as contrasted with the ideal pre-existent Jerusalem (Israel ?). Others (Vischer) interpret the remnant as meaning believers as distinguished from the Messiah.

Chap. 13 also contains two passages of a peculiar character—those describing the first beast and the second. O Holtzmann, Spitta, and Erbes were agreed in recognising here a Jewish (Holtzm., Sp.) or a Christian (Erb.) source dating from the time of Caligula.

43. Chap. 13: the first beast. Independently of each other, they all (as had already been done by Th. Zahn) accepted the number 616 which is given in some MSS (C. 11 Ticonius), instead of 666, and interpreted it as meaning Γάϊος Καῖσαρ. The beast demanding worship, whose image (εἰκών) is repeatedly spoken of, is, on this view, the half-mad tyrant Caius Caligula, who in 39 A.D. ordered his procurator, Petronius, to set up his statue in the temple at Jerusalem. Parallels to this prophecy belonging to the same date were found in Mt. 24 ('abomination of desolation') and in 2 Thess. 2. The 'wound' (πληγή) of the beast was interpreted by Spitta as meaning the sickness which befel Caligula towards the beginning of his reign. These conjectures are by no means impossible; but if they are accepted, certain important particulars in the chapter must be deleted—in particular, references to the wounded head of the beast. This and the number 666 (נרון קסר) show distinctly that (in its present form) the chapter was intended to be understood of the return of Nero Redivivus. Whether an older source dating from Caligula's time has here been worked over remains doubtful.

As compared with this interpretation, the view which takes the wounded head to be Julius Caesar (Gunkel, Bruston) has little to he said for it—since the number 666 in that case remains unexplained; nor can we reasonably interpret the death-wound to mean the interregnum of Galba-Otho-Vitellius, or refer the number to the Roman empire (Λατεῖνος, Düsterdieck; קיסר רומים, Ewald).

Still greater has been the perplexity of interpreters over the second beast. All attempts to make it out to be some definite personality have hitherto been unsuccessful. Bousset (*Comm. ad loc.*) upholds the view that it is in reality a modification of the older conception of Antichrist, who is here represented as serving the first beast, the Roman emperor, and perhaps is to be interpreted as signifying the Roman provincial priesthood, the active agency in promoting the worship of the emperor.

44. The second beast.

The objection usually urged against referring the passage to Nero—that the beast whose number is 666 cannot mean Nero the man; that it must mean the Roman empire—is not valid. To the Apocalyptist Nero Redivivus is at the same time the incarnation of all that is dreadful in the Roman empire. The number of the beast is the number of a man: cp 17 11, 'and the beast . . . is himself also an eighth' (καὶ αὐτὸς ὄγδοός ἐστιν).

Chap. 17 is intimately connected with chap. 13, and this duplicate treatment of the same subjects is in itself proof sufficient that the Apocalyptist had before him older prophecies, which he has worked over more than once. In this chapter also the reference to the returning Nero is clear. Since Eichhorn, however, it has further been recognised on all hands (cp De Wette, Bleek, Liicke), and with justice, that the kings with whom the beast returns for the destruction of Rome are

45. Chap. 17.

the Parthians, whose satraps might already be regarded as independent kings (Mommsen, *Röm. Kaisergesch.* **5521**). Thus our present chapter also comes into a larger historical connection. As early as the year 69 A.D. a pseudo-Nero had raised commotions in Asia Minor and Greece (Tac. *Hist.* 2 8 *f.*; Dio Cassius, 64 9; Zonaras, 11 15); in the reign of Titus a second pseudo-Nero showed himself on the Euphrates (Zonaras, 11 18) and was acknowledged by the Parthian King Artabānus (Mommsen, 5521). About 88 A.D. a third pseudo-Nero again made his appearance, also among the Parthians, and threatened the Roman empire (Suet. *Nero*, 50; Tac. *Hist.* 1 2). In this form we find the same expectation also in the fourth Sibylline book, written shortly after 79 A.D. (*Sibyll.* 4 119 *ff.* 137 *ff.*), and in theoldest portion of the fifth book, written about 74 A.D. (5 143 *ff.* 361 *ff.*); in the last passage it is associated with a denunciation of Babylon and a prophecy of the rebuilding of Jerusalem (Rev. 18 21); cp Zahn's exhaustive researches (as above, § 35). By both time and place our chapter (perhaps associated with the threatening utterance against Rome and the prophecy of a new Jerusalem) belongs to the same circle of expectations and predictions. It was doubtless written in Asia Minor; but the exact date is disputed.

According *to* 17 10 the Apocalyptist represents himself as writing under the sixth emperor, five having died and a seventh having yet to come, to be succeeded by the eighth, who is to be one of the seven (Nero). In reckoning, it is possible to begin either with Julius Caesar or with Augnstus, to count or not to count the interregnum of Galba-Otho-Vitellius, and finally to ask whether the passage was really written under the sixth emperor, and not, rather, as a *vaticinium ex eventu* under the seventh or eighth. Thus interpreters have taken) the sixth emperor to be now Nero (so all who hold the Apocalypse to have been written before 70 A.D.; also Völter), now Vespasian, and, conformably, take the chapter to have been written now under the last-named emperor, now under Titus (the seventh; Weyland) or Domitian, who is then taken, on rationalising lines, as Nero Redivivus (Erbes).

The parallels cited above appear to render the reign of Vespasian the most probable date. The writer—probably a Christian—expected after Vespasian a short reign for his successor also. The tradition was that seven Roman emperors were destined to reign. Thereafter Nero was to come back with the Parthians, and, in alliance with these, to take vengeance on Rome, the bloody persecutor of the Christians (17 6; 'with the blood of the saints'; the words 'with the blood of the martyrs of Jesus' appear to be a gloss). The denunciation of Rome (chap. 18)connects itself very well with this prophecy (see *Sibyll.* 5).

It is further to be noted that chap. 17 has already, in the form in which we now have it, undergone redaction.

On the one hand, Nero is simply the eighth ruler who was one of the seven; on the other, he is the beast who comes up from the abyss. On the one hand, he wages war along with the Parthians against Rome, on the other, he wages war along with the kings of the earth against the lamb. In this redacted form (17 8 12-14 or 15; cp also Volter) Nero is designated as the dread spectre of the time of the end who comes back from hell. Now, we find the same expectation in chap. 13, where Nero is plainly represented as dead (ὡς ἐσφαγμένεν, 'as though it had been smitten unto death') and as counterpart (Wiederspiel) of the lamb that bad been slain and is to come again. This mode of representing Nero probably comes from the latest redactor. Parallels to it can be found in the later portions of the fifth book of the Sibyllines (33 *f.* 215-26), and in the eighth book (1-215).

The legend of Nero Redivivus first arose towards the end of the century, a full generation after Nero's death, when he could no longer well be supposed to be still alive among the Parthians (cp Zahn, as above). Its reception into the Apocalypse supplies one of the elements for determining the date of the book.

Chap. 16 12 *ff.* (the sixth and seventh vials) also must have originally belonged to chap. 17. In this passage the angel poursout his vial upon the Euphrates, 'that the way may be made ready for the kings from the east' (cp 9 13 *ff.*, with its reference to the angels hound and loosed at the Euphrates; on which, see Iselin in *Theol. Z. aus der Schweiz*, 1887, as above, § 25).

46. Various fragments.

The representation of the gathering of the kings at Armageddon (Har-Magedon) in this passage is noteworthy; it is not very intelligible, as we read of no mountain of Megiddo, but only of a plain (but see ARMAGEDDON). It recalls the ancient accounts of battles of the gods upon the mountains (Gunkel, *Schöpf.* 263 8 389 n. 2).

Chap. 14 14-20 also appears to be an ancient fragment. It thus early sets forth a final judgment by the Son of Man. The passage, however, is so very fragmentary that it is hardly possible for us to make out what its original character may have been (cp the expression 'without the city' in 14 20). Bousset has sought to explain it by reference to the Antichrist legend.

Fragments of older date seem to have been introduced into the account of the chaining of the dragon, the millennium, the irruption of Gog and Magog (20 1-10; cp 20 9, παρεμβολὴ τῶν ἁγίων, πόλις ἠγαπημένη, and Æthiop. *Enoch* 56, *Sibyll.* 3 319-322). The description of the binding and loosing of Satan recalls the Persian legend of the chaining of the dragon Azi Dahak on Mt. Demavend. Finally, a continuous piece—perhaps of Jewish origin (see 21 24 26 22 2)—lies before us in the description of the new Jerusalem, 21 9-22 5.

We ought to compare **Tob.** 13 16 *ff.*, Ps. Salom. 17 23 *ff.*, *Sibyll.* 5 247-85, 414-33, and the Hebrew *Apocalypse of Elijah*, edited by M. Buttenwieser, 65-67. In this last-named Jewish source also we find the new Jerusalem coming down from heaven.

To summarise the results of the foregoing analysis: With the conclusion of the epistles to the seven churches (chaps. 1-3)the Apocalypse, properly so called, begins. Here the first six seals succeed one another uninterruptedly, till the interpolated fragment in 7 1-8 is reached. As a pendant to this Fragment, with its distinctly Jewish character, the Apocalyptist proleptically introduces in 7 9-17 a picture of the blessedness of believers from every nation who have come out of the great tribulation. Now follow the seventh seal and, arising out of this, the seven trumpets (chaps. 8-11). Between the sixth and the seventh trumpet the passage 10 1-11 13 has been interpolated. In chap. 10 the Apocalyptist indicates to some extent what the 'disposition' of the remainder of the book is to be (cp 10 11). It is to be observed that in chaps. 9 *ff.*, in addition to the distribution under seven trumpets, the Apocalyptist has attempted a second under three woes. The first woe answers to the fifth trumpet; the second, the mention of which might have been expected after the sixth trumpet, does not come up until 11 14, after the great interpolation has been reached. The third great woe (which is not expressly named by the Apocalyptist) is doubtless indicated in 1212. It is hardly likely that we have here a redaction from an older source. Before, then, he comes to the culmination of his prophecy, in chap. 13, the Apocalyptist casts his glance backwards in chap. 12. Borrowing the imagery of an ancient sun-myth, he depicts the birth, persecution, and rescue of the Saviour, and afterwards the persecution of the Church. In chap. 13 he goes on to foretell the coming final struggle, the last great and decisive battle between the faithful ones and the beast who demands adoration. For him the supreme crisis of this struggle still lies in the future, when Nero Redivivus is to appear. In the bright picture which he prophetically introduces at 14 5 by way of contrast to chap. 13, he adapts and modifies 7 1-8. 14 6-13 is intended to effect the transition to what follows. 14 14-20 is a smaller interpolated fragment. The great finale remains. The Apocalyptist still had to work in the prophecies contained in chap. 17 *f.*; by way of introduction to these, chap. 15 *f. are* given. Then follows, after an intermediate passage (19 1-10), the picture of the final judgment (19 11-21 8); after which we have a new fragment, 21 9-22 5, followed by the close.

47. Summary.

Literature.—The literature of the subject has been indicated in the course of the article. W. B.

APOCALYPTIC LITERATURE

CONTENTS

INTRODUCTORY: The objects and nature of apocalyptic literature (§§ 1-4).

1. Synopsis of Article. I. APOCALYPSE OF BARUCH 1.—A composite work derived from at least five authors, written mainly in Palestine, if not in Jerusalem, by Pharisees *circ.* A.D. 50-90. Preserved only in Syriac (§§ 5-17).

11. Ethiopic BOOK OF ENOCH.—Written originally in Hebrew or Aramaic by at least five Assidean authors (200-64 B.C.) in Palestine. Part I. chaps. 1-36 earlier than 170 B.C. Part 11. chaps. 83-00, 166-161 B.C. Part 111. chaps. 61-104, 134-95 B.C. Part IV. (the Similitudes) chaps 37-70, 94-64 B.C. Part V. (the Book of Celestial Physics) chaps. 72-78, 82, 79. Part VI. (Fragments of a lost Apocalypse of Noah) (§§ 18-32).[2]

III. Slavonic BOOK OF ENOCH, or THE BOOK OF THE SECRETS OF ENOCH.—Written by an Alexandrian Jew, mainly from pre-existing materials, about A.D. 1-50. Eclectic in character; preserved only in Slavonic (§§ 33-41).

IV. ASCENSION OF ISAIAH. —A composite work, written originally in Greek, partly by Jewish, partly by Christian authors, A.D. 1-100. Preserved in Ethiopic and partially in Latin (§§ 42-47).

V. BOOK OF JUBILEES.—Written originally in Hebrew by a Palestinian Jew a Pharisee of the Pharisees, probably 40-10 B.C. Preserved in Ethiopic and partially in Hebrew, Syriac, Greek, Latin, and Slavonic (§§ 48-58).

VI. ASSUMPTION OF MOSES.—Written in Palestine, in Hebrew, 7-30 A.D., by a Pharisee. Preserved only in Latin (§§ 59-67).

VII. TESTAMENTS OF THE XII. PATRIARCHS.—A composite work written originally in Hebrew by two Jewish authors representing respectively the legalistic and the apocalyptic sides of Pharisaism, 130 B.C.-10 A.D., and interpolated by a succession of Christian writers from the close of the 1st century down to the 4th century A.D. Preserved in Greek, Armenian, and Slavonic versions (§§ 68-76).

VIII. PSALMS OF SOLOMON.—Written originally in Hebrew, possibly in Jerusalem, by two or more Pharisees, 70-40 B.C. (§§ 77-85).

IX. SIBYLLINE ORACLES.—Written in Greek hexameters by Jewish and Christian authors mainly by the latter—the earliest portions belonging to the znd'century B.C., the latest not earlier than the 3rd century A.D. (§§ 86-98).

INTRODUCTORY.—The object of apocalyptic literature in general was to solve the difficulties connected with **2. Problem.** a belief in God's righteousness and the suffering condition of his servants on earth. The righteousness of God postulated the temporal prosperity of the righteous, and this postulate was accepted and enforced by the Law. But while the continuous exposition of the Law in the post-exilic period confirmed the people in their monotheistic faith and intensified their hostility to heathenism, their expectations of material well-being, which likewise the Law had fostered, were repeatedly falsified, and a grave contradiction thus emerged between the old prophetic ideals and the actual experience of the nation between the promises of God and the bondage and persecution which the people had daily to endure at the hands of their pagan oppressors. The difficulties arising from this conflict between promise and experience might be shortly resolved into two, which deal respectively with the position (1) of the righteous as a community and (2) of the righteous man as an individual.

The OT prophets had concerned themselves chiefly with the former, and pointed in the main to the restoration (or 'resurrection') of Israel as a nation, and to Israel's ultimate possessisn of the earth as a reward of righteousness. Later, with the growing claims of the individual, and the acknowledgment of these in the religious and intellectual life, the second problem pressed itself irresistibly on the notice of religious thinkers, and made it impossible for any conception of the divine rule and righteousness which did not render adequate satisfaction to the claims of the righteous individual to gain acceptance. Thus, in order to justify the righteousness of God, there was postulated not only the resurrection of the righteous nation but also the resurrection of the righteous individual. Apocalyptic literature, therefore, strove to show that, in respect alike of the nation and of the individual, the righteousness of God would be fully vindicated; and, in order to justify its contention, it sketched in outline the history of the world and of mankind, the origin of evil and its course, and the final consummation of all things; and thus, in fact, it presented a Semitic philosophy of religion (cp CHRONOLOGY OF OT, § 1). The righteous as a nation should yet possess the earth either in an eternal or in a temporary Messianic kingdom, and the destiny of the righteous individual should finally be determined according to his works. For, though he might perish untimely amid the world's disorders, he would not fail to attain through the resurrection the recompense that was his due in the Messianic kingdom, or in heaven itself. The conceptions as to the duration and character of the risen life vary with each writer.

The writings that are treated of in the rest of this article, however, deal not only with the Messianic expectations but also with the exposition and application of the Law to the numberless circumstances of life. As Schiirer has rightly observed, the two subjects with which Jewish thought and enthusiasm were concerned were the Law and the Messianic kingdom. These were, in fact, parallel developments of Pharisaism. As we have the former—its legalistic side—represented in the ***Book of Jubilees***, so we have the latter—its apocalyptic and mystical side —set forth in the ***Book of Enoch***. ***The Testaments of the Twelve Patriarchs*** give expression to both sides of Pharisaism; but this book, as we shall see in the sequel, is really a composite work and springs from authors of different schools. The rest of the books here discussed belong mainly to the apocalyptic side of Pharisaism.

It is a characteristic of apocalyptic as distinguished from prophecy that the former trusts to the written, the **3. Method.** latter to the spoken, word. This is due largely to the fact that the prophet addresses himself chiefly to the present and its concerns, and that, when he fixes his gaze on the future, his prophecy springs naturally from the circumstances of the present. The apocalyptic writer, on the other hand, almost wholly despairs of the present; his main interests are supramundane. He entertains no hope of arousing his contemporaries to faith and duty by direct and personal appeals. His pessimism and want of faith in the present thus naturally lead him to pseudonymous authorship, and so he approaches his countrymen with a writing which purports to be the work of some great figure in their history, such as Enoch, Moses, Daniel, or Baruch. The standpoint thus assumed is as skilfully preserved as the historical knowledge and conditions of the pseudonymous author admit, and the future of Israel is 'foretold' in a form enigmatical indeed

[1] On other Apocalypses of Baruch. *see* below, APOCRYPHA § 20.
[2] On chaps. 71 80 *f.*, see § 30 *f.*

but generally intelligible. All precision ceases, however, when we come to the real author's own time: his predictions, thenceforward, are mere products of the religious imagination, and vary with each writer. In nearly every case, we should add, these books claim to be supernatural revelations given to the men by whose names they are designated.

It will not be amiss here to notice the gross misapprehension under which Jost, Graetz, and other Jewish writers laboured when they pronounced this literature to be destitute of value for the history of Jewish religion.

4. Historical value.

To such statements it is a sufficient answer that from 200 B.C. to 70 A.D. the religious and political ideals that really shaped the history of Judaism found their expression in this literature. It is not in the discussions and logomachies of the Rabbinical schools that we are to look for the influences and aims that called forth some of the noblest patriotism and self-sacrifice the world has ever witnessed, and educated the nation for the destinies that waited it in the first century of our era, but in the apocalyptic and pseudepigraphic books which, beginning with Daniel, had a large share in preparing the most religious and ardent minds of Galilee and Judæa either to pass over into Christianity, or else to hurl themselves in fruitless efforts against the invincible might of Rome, and thereby all but annihilate their country and name. Still it is true that the work of the scribes and the exposition of the schools had opened the way for this new religious and literary development. The eschatological element, moreover, which later attained its full growth in such pseudepigraphical writings as Daniel, Enoch, Noah, etc., had already strongly asserted itself in later prophets such as Is. 24-27, Joel, Zech. 12-14. Not only the beginnings, therefore, but also a well-defined and developed type of this literature had already established itself in the OT. Its further developments were moulded, as we have pointed out above, by the necessities of the thought and by the historical exigencies of the time.

Cp Smend's introductory essay on Jewish apocalyptic, *ZATW* **5** 222-250 ('85); Schürer, *Hist.* **5** 44 *ff.*; Hilgenfeld, ***Die jüd. Apokalyptik in ihrer geschichtlichen Entwickelung***, 1857 (Einl.).

I. THE APOCALYPSE OF BARUCH.—The Apocalypse of Baruch was for the first time made known to the modern world through a Latin version of Ceriani in 1866 (*Mon. Sacr.* i. 2 73-98). This version was made from a Syriac MS of the sixth century, the text of which was also in due course published by the same scholar, in ordinary type in **1871**, and in a photo-lithographic facsimile in 1883.

5. The Syriac Baruch.

An examination of the Syriac version makes it clear that this version is a translation from the Greek. It occasionally transliterates Greek words, and the text is at times explicable only on the supposition that the wrong alternatives of two possible meanings of certain Greek words have been followed by the translator.

6. A translation from Greek.

Even before Ceriani's publication, however, we had some knowledge of the Apocalypse of Baruch; for chaps. 78-86, which contain Baruch's Epistle to the nine tribes and a half that were in captivity, had already appeared in Syriac and Latin, in the London and the Paris Polyglots, in Syriac alone in Lagarde's *Lib. Vet. Test. Apoc. Syr.* **1861**, in Latin alone in Fabricius's *Cod. Pseudep. Vet. Test.*, and in English in Whiston's *Authentic Records.* Ceriani's Latin version was republished in Fritzsche's *Lib. Apoc. Vet. Test.* ('71) in a slightly emended form; but, as the Syriac text was still inaccessible, Fritzsche's emendations are only guesses more or less fortunate—generally less.

We have just remarked that the Syriac version is a translation from the Greek. We shall now enumerate the reasons from which it appears that the Greek was in turn translated from a Hebrew original.

7. The original Hebrew.

(i.) The quotations from, or unconscious reproductions of, the OT agree in all cases but one with the Massoretic text against 𝔊. (ii.) Hebrew idioms survive in the Syriac text. Thus there are many instances of the familiar Hebrew idiom of the infinitive absolute combined with the finite verb, and many breaches of Syriac grammar in the Syriac text are probably to be explained as survivals of Hebrew order and Hebrew syntax. (iii.) Unintelligible expressions in the Syriac can be explained and the text restored by retranslation into Hebrew. Thus, among many others, the passages 21 9, 11, 12, 24 2 and 62 7 can be restored by retranslation into Greek and thence into Hebrew. The Syriac in these verses is the stock rendering of δικαιοῦσθαι and this in turn of צדק; but צדק also=δίκαιος εἶναι, and this is the meaning required in the above passages, where the Greek translator erroneously adopted the commoner rendering. (iv.) Many *paronomasiæ* discover themselves on retranslation into Hebrew. See Charles, *Apoc. Bar.* 44-53.

The final editor of this work assumes for literary purposes the person of Baruch, the son of Neriah. The scene is laid in the neighbourhood of Jerusalem; the supposed time is the period immediately preceding and subsequent to the capture of the city by the Chaldæans.

8. Contents.

Baruch, who begins by declaring that the word of the Lord came to him in the twenty-fifth year of Jeconiah,[1] speaks throughout in the first person. If we exclude the letter to the tribes in the captivity (chaps. 78-87), the work naturally divides itself into seven sections, separated from one another in all but one instance (*i.e.* after 35) by fasts which are, save at the end of the first section, of seven days' duration. The omission of a fast after chap. 35 may have been due either to an original oversight of the final editor or to the carelessness of a copyist.

That the text requires the insertion of such a fast is to be concluded on the following grounds:—According to the scheme of the final editor events proceed in each section in a certain order (see Charles, *Apoc. Bar.* 9, 36, 61). Thus first we find a fast, then generally a prayer, then a divine message or disclosure, and finally an announcement of this to an individual or to the people. Thus in the fifth section, 21-34, we have a seven-days' fast (21 1), a prayer (21 4-26), a revelation (22-30), and an address to the people (21 24). Then another seven-days' fast should ensue at the beginning of the sixth section (36-46). With the exception of this omission events follow in this section as in the others.

These sections are very unequal in length—1-5 6 5 7-8 9-12 4 12 5-20 21-35 36-46 47-77—a fact that, though it does not in itself make against unity of authorship, confirms the grounds afterwards to be adduced for regarding the work as composite.

1. The first section (1-5 6) opens with God's revelation to Baruch regarding the coming destruction of Jerusalem. But a time of prosperity should return.

2. According to the next section (5 7-9 1) Baruch fasts until the evening, and the Chaldæans encompass Jerusalem next day. In a vision Baruch sees the sacred vessels removed from the temple by angels and hidden in the earth till the last times. The angels next overthrow the walls, the enemy are admitted and the people carried away captive to Babylon.

3. In the third section (9 2-12 4), Baruch fasts seven days, and receives a divine command to tell Jeremiah to go to Babylon; but Baruch himself is to remain at Jerusalem to receive God's revelations regarding the future. Baruch bewails Jerusalem and the lot of the survivors. 'Would that thou hadst ears, O earth, and that thou hadst a heart, O dust, that ye might go and announce in Sheol and say to the dead: "Blessed are ye more than we who live."'

4. In the fourth section (12 5-20), Baruch fasts for seven days, and is told by God that he will be preserved till the end of time in order to bear testimony against the nations that oppressed Zion. When Baruch complains of the prosperity of the wicked and the calamities of the righteous, God answers that the future world is made on account of the righteous—that the blessings of life are to be reckoned not by its length but by its quality and its end. Baruch is hidden not to publish this revelation (20 3).

5. In the fifth section (21 1-35), Baruch fasts as usual, seven days. He deplores the bitterness of life, and supplicates God to bring about the promised end. God reminds him of his ignorance, and declares that the end, though close at hand, cannot arrive till the predestined number of men be fulfilled, and again, in answer to Baruch's question respecting the nature and the duration of the judgment of the ungodly, describes the coming time of tribulation, which will be divided into twelve parts. At its close the Messiah will be revealed. Baruch summons a meeting of the elders in the valley of Kedron, and announces to them the future glory of Zion.

6. The sixth section (36-46) should begin with the missing fast of seven days. Shortly after, he has a vision of a cedar and a vine

[1] We may observe here that Jeconiah reigned only three months, and was carried captive to Babylon eleven years before the fall of Jerusalem.

which symbolise the Roman power and the triumph of the Messiah. When Baruch asks who shall share in the future blessedness, God answers : 'To those who have believed there will be the blessedness that was spoken of aforetime.' Baruch then (44-47) calls together his first-born son and seven of the elders, tells them of his approaching end, and exhorts them to keep the law, for 'a wise man will not he wanting to Israel, nor a son of the law to the race of Jacob.'

7. After a fast of seven days, Baruch in the seventh section (47-77) prays for Israel. The revelations that ensue tell of the coming tribulation. Baruch bewails the evil effects of Adam's fall. In answer to his request, he is instructed as to the nature of the resurrection bodies. Then, in a new *vision* (53-74), he *sees* a cloud ascending from the sea and covering the whole earth. There was lightning about its summit, and soon it began to discharge first black waters and then clear, and again hlack waters and then clear, and so on till there had been six black waters and six clear. At last it rained black waters, darker than had been all that were before. Thereupon, the lightning on the summit of the cloud flashed forth and healed the earth where the last waters had fallen, and twelve streams came up from the sea and became subject to that lightning. In the following chapters the vision is interpreted. The cloud is the world, and the twelve successive discharges of black waters and clear waters symbolise six evil periods and six good periods of the world's history. The eleventh period, symbolised by the hlack waters, pointed to the supposed present tribulation of Jerusalem. The rest of the interpretation follows in the future tense. The twelfth clear waters point to the renewed prosperity of Israel and the rebuilding of Jerusalem. The last hlack waters that were to flow pointed to troubles, earthquakes, and wars over the whole earth. Such as survived these were to fall by the hands of the Messiah. These blackest of all the waters were to be followed by clear waters, which symbolized the blessedness of the Messianic times. This Messianic period should form the boundary line between corruption and incorruption. 'That time is the consummation of that which is corruptible, and the beginning of that which is incorruptible.' Baruch thanks God for the revelation vouchsafed. He is then informed of his coming departure from the earth, hut is hidden first to go and instruct the people. He admonishes them to be faithful (chap. 77), and at their request sends two epistles, one to their brethren in Babylon ('the two and a half tribes') and the other to the tribes ('nine and a half') beyond the Euphrates. The latter is given in chaps. 78-87. It is probable that the lost letter to the two tribes and a half is identical with, or is the source of, the Greek Baruch 3 9-4 29. See Charles, *Apoc. Bar.* 65-67.

9. Kabisch's theory of sources. From the discovery of the Apocalypse of Baruch in 1866 till 1891, it was regarded by scholars as the work of one author. In the latter year, Kabisch, in an article entitled 'Die Quellen der Apocalypse Baruchs' (*JPT*, 1891, pp. 66-IO^), showed beyond the possibility of question that the work was composite and derived from at least three or four authors.

Thus be distinguishes 1-24 1, 30 2-34, 41-52, and 75-67 as the groundwork written after 70 A.D., since these chapters imply the destruction of the temple. He further observes that these parts are marked by a despair which no longer looked for peace and happiness in this world, but fixed its regards on the world of incorruption. In the other pieces of the book there is a strong faith in Israel's ultimate triumph here, and an optimism which looks for the consummation of Messianic bliss in this life; and, as Kahiscb rightly remarks, the temple is still standing. These other sections, however, are the work not of one writer but of three, being constituted as follows : a short Apoc. 24 3-29, the Vine and Cedar Vision *3G-40*, and the Cloud Vision 53-74 : 30 1 32 2-4, 35 are due to the final editor.

10. Present writer's results. This theory is certainly in the right direction. It is open, however, to unanswerable objections. There is no unity in the so-called groundwork. When submitted to a detailed criticism, it exhibits a mass of conflicting conceptions and statements. The results of such a criticism may be stated briefly as follows (for the details see Charles, *Apoc. Bur.* 53-67). 1-26 31-35 41-52 75-87 were written after the fall of Jerusalem, and were derived from three or possibly four authors, B_1, B_2, B_3, and possibly S.

B_1=1-9 1 43-44 7 45 *f.* 77-82 84 86 *f.*, written by a Pharisee who expected Jerusalem to he rebuilt and the dispersion to he brought hack from exile.

B_2=9-12 13-25 30 2-35 41 *f.* 44 8-15 47-52 75 *f.* 63, also by a Pharisee who looked for no national restoration, hut only for the recompense of the righteous in heaven.

B_3=85, written by a Jew in exile.

S.=10 6-12 4, possibly by a Sadducee, hut perhaps to be assigned to B_2.

The rest of the book was written before the fall of Jerusalem. It consists of an Apocalypse 27-30 1 (=A_1) and the two Visions 36-40 (=A_2) and 53-74[1] (=A_3 already mentioned. All these different elements were combined by the final editor, to whom we owe also *42-6 26* 28 4 *f.* 32 2-4 and possibly some other additions.

11. Critical criteria. Jewish religious thought busied itself, as already observed, mainly with two subjects, the Messianic hope and the Law ; and in proportion as the one became more prominent the other fell into the background. Now, the chapters written before 70 A.D. arc mainly Messianic.

Chaps. 27-30 1 (A_1) and 36-40 (A_2) take account of the Lam only indirectly, whereas in those written after that date the whole thought and hopes of the writers centre in the Law as their present mainstay and their source of future bliss. In chaps. 53-74 (A_3) again, the Messianic hope and the Law are equally emphasized: This writing marks the fusion of early Rabbinism and the popular Messianic expectation. (*See* Charles, *op. cit.*)

In the sections B_1 and B_2, on the other hand, written *after* the fall of Jerusalem, we have two distinct outlooks as to the future. In B_1 the writer is still hopeful as to the future of Jerusalem.

It is delivered into the hands of its enemies indeed, but only for a time (4 1 6 9). The consolation of Zion should yet be accomplished (44 7 81 1 4), and the ten tribes brought hack from their captivity (78 7 84 10). Moreover the retribution of the Gentiles was close at hand (82 2-9), and'in due time would arrive the judgment, in which God's justice and truth should exact their mighty due (859).

In B_2, on the other hand (and if possible still more in B_3=chap. 85), the writer is full of irremediable despair as to the earthly fortunes of Zion and its people in this world (10 6-11).

Destruction awaits this world of corruption (21 19 31 5). The righteous have nought to look for save the new world (44 12), the world that dies not (51 3), the world of incorruption (85 5). Only in the world to come will every man he recompensed in the resurrection according to his works (50 *f.*), when the wicked shall go into torment and the righteous shall be made like unto the angels.

In the sections written before the fall of Jerusalem, the Messianic element, which was wanting in B_1, B_2, and B_3, is predominant. The three Apocalypses *27-30* (A_1) *36-40* (A_2) 53-74 (A_3) have many features in common—such as an optimistic outlook as to Israel's earthly prosperity, the earthly rule of the Messiah till the close of this world, and the material blessings of his kingdom. There are, however, good grounds for regarding them as of different authorship. The Messianic reign is to close with the final judgment. On the Eschatology of the book see, further, ESCHATOLOGY, § 78.

12. Authorship. All the elements of this book are distinctly Jewish. Its authors, as already observed, were Pharisees, full of confidence in the future glories of their nation, either in this world or in the nest, notwithstanding their present humiliations. They entertain the most lofty conceptions as to the divine election and the absolute pre-eminence of their race.

It was on Israel's account that not only the present world (14 19) but also the coming world (15 7) was created. Israel is God's chosen people whose like is not on earth (48 20); the perpetual felicity of Israel lay in the fact that they had not mingled with the nations (4623). The one law which they had received from the one God (48 24) could help and justify them (51 3); for so far as they kept its ordinances they could not fall (48 22) : their works would save them (*14* 12 51 7 63 3). In due time also all nations should serve Israel; but such of them as had injured Israel should be given to the sword (72 6). The carnal sensuous nature of the Messiah and his kingdom (29-30 39 7-40 72-74) is essentially Pharisaic. There was to he a general resurrection (42 8 *f.* 2) ; hut apparently only Israel should be saved (51 4).

[1] It is possible to determine approximately the earlier limit of the composition of A_3 by means of what we might call the Enochic canon. This is : *No early Jewish book which extols Enoch could have been written after 50 A.D., and the attribution of Enoch's words and achievements in a Jewish work to other O T heroes is a sign that it was written after the Pauline preaching of Christianity.* This hostility to Enoch from 50 A.D. onwards (cp Enoch) is to he traced to Enoch's acceptance among the Christians as a Messianic prophet. For the grounds and illustrations of this canon see Charles, *Apoc. Bar.* 21-22, 101. Now, in 59 5-11 of this Apocalypse many of Enoch's functions and revelations are assigned to Moses. Hence A_3 was written after 53 A.D.

The affinities of Apoc. Bar. with 4 Esdras are so striking and so many that Ewald ascribed the two books to the same author. Though this view has not been accepted in later criticism, it will not be amiss to draw attention to these affinities. (1) The main features of the two books are similar. They have one and the same object—to deplore Israel's present calamities and awaken hope in the coming glories, temporal or spiritual, of their race.

13. Affinity with 4 Esd.

In both the speaker is a notable figure of the time of the Babylonian captivity. In both there is a sevenfold division of the work, and an interval (as a rule, of seven days) between each two divisions; and, whereas in the one Ezra devotes forty days to the restoration of the scriptures, in the other Baruch is bidden to spend forty days in admonishing Israel before his departure from the earth.

(2) They have many doctrinal peculiarities in common.

According to both, man is saved by his works (4 Esd. 7 77 8 33 9 7, *Ap. Bar.* 2 2 14 12 etc.); the world was created in behalf of Israel (4 Esd. 6 55 7 11 9 13, *Ap. Bar.* 14 19 15 7 etc.); man came not into the world of his own will (4 Esd. 8 5, *Ap. Bar.* 14 11 48 15); a predetermined number of men must be attained before the end (4 Esd. 4 36 *f.*, *Ap. Bar.* 23 4 5); God will visit his creation (4 Esd. 5 56 6 18 9 2, *Ap. Bar.* 20 2 24 4); Adam's sin was the cause of physical death (4 Esd. 3 7, *Ap. Bar.* 23 4); the souls of the good are kept safe in treasuries till the resurrection (4 Esd. 4 35-37 7 32 80 95, *Ap. Bar.* 30 2).

This list might have been indefinitely added to. On the other hand, there are clear points of divergence. In Esdras the Messianic reign is limited to 400 years (7 28 *f.*), whereas in Baruch this period is quite indeterminate. Again, in the former (7 29) the Messiah is to die, and the Messianic reign is to close with the death of all living things; whereas in the latter, according to 30, the Messiah is to return in glory to heaven, at the close of his reign, and, according to 73 *f.*, this reign is to be eternal, though it is to belong partly to this world and partly to the next.

14. Divergence from 4 Esd.

Again, in Esdras the writer urges that God's people should be punished by God's own hands and not by the hands of their enemies (5 29 *f.*), for these have overthrown the altar and destroyed the temple, and made the holy place a desolation (10 21 *f.*). In Earnch it is described at length how the holy vessels were removed by angels and the walls of Jerusalem demolished by the same agency before the enemy drew nigh (6-8).

On the question of original sin likewise these two hooks are at variance. Whilst in Esdras the entire stream of physical and ethical death is traced to Adam (3.7 21 *f.* 4 30 7 48), and the guilt of his descendants minimised at the cost of their first parent (yet see 8 55-61), Baruch derives physical death indeed from Adam's transgression (17 3 23 4 54 15), but as to ethical death declares that "each man is the Adam of his own soul" (54 19; yet see 48 42).

It will be clear from the facts set forth above that the relations of these two apocalypses constitute a complex problem. If we attempt to deal with this problem on the supposition that each book is derived from a single author, no solution is possible; and the barrenness of criticism hitherto in this direction is due to this supposition of their unity. When, however, we come perforce to recognise their composite nature, we enter at the same time on the road that leads to the desired goal. For a provisional study of the relations between the various constituents of this apocalypse and 4 Esdras, the reader can consult Charles, *Apoc. Bar.* 67-76. The results of this study tend to show that, whilst some of the constituents of 4 Esdras are older than the latest of Baruch, other constituents of Baruch are decidedly older than the remaining ones of 4 Esdras.

15. Real relation.

The points of contact between this apocalypse and the NT are many; but they are for the most part insufficient to establish a relation of dependence on either side. The thoughts and expressions in questions are explicable from pre-existing literature or as commonplaces of the time.

16. Relation to NT.

Such, among many others, are Mt. 3 16, *Ap. Bar.* 22 1, Mt. 26 24, *Ap. Bar.* 10 6, Lk. 21 28, *Ap. Bar.* 23 7, Rom. 8 18, *Ap. Bar.* 15 8.

The following passages are of a different nature and postulate the dependence of our apocalypse on the NT, or possibly, in one or two of the instances, of both on a common source.

With Mt. 16 26, 'For what shall a man he profited, if he shall gain the whole world and forfeit his soul? or what shall a man give in exchange for his soul?' cp *Ap. Bar.* 51 15, 'For what then have men lost their life, or for what have those who were on the earth exchanged their soul?' Also with 1 Cor. 15 19, 'If in this life only we have hoped in Christ, we are of all men most miserable,' cp *Apoc. Bar.* 21 13, 'For if there were this life only. . . nothing could he more bitter than this.' Also with 1 Cor. 16 35, 'How are the dead raised and with what manner of body do they come?' cp 49 2, 'In what shape will those live who live in that day?' Cp also Lk 14 2 with *Ap. Bar.* 54 10, Jas. 1 2 with 52 6, and Rev. 4 6 with 51 2.

As the Apocalypse of Baruch was written between 50 and 100 A.D. it furnishes us with the historical setting and background of many of the NT problems, and thereby enables us to estimate the contributions made in this respect by Christian thought. Thus, whereas, from 49 2-51, we see that the Pauline doctrine of the resurrection in 1 Cor. 15 35-50 was not an innovation but a developed and more spiritual exposition of ideas already current in Judaism, it is clear, on the other hand, from the teaching of this book on Works and Justification, Forgiveness and Original Sin and Freewill (*see* Charles, *op. cit.* pp. 80-85), what a crying need there was for the Pauline dialectic, and what an immense gulf lay herein between Christian and Rabbinic teaching. No ancient book is so valuable in attesting the Jewish doctrine of that period.

17. Value.

Bibliography.—In addition to the works already mentioned, the reader may consult Langen, *De Apoc. Bar. comm.* ('67); Ew. *GGA* ('67), 1706-17, 1720; *Hist. of Israel*, 8 57-61; Drummond, *The Jewish Messiah* ('77), 117-132; Kneucker, *Das Buch Bar.* ('79), 190-198; Di. 'Pseudep.' in *PRE*(2), 12 356-358; Deane, *Pseudep.* ('91), 130-162.

II. THE BOOK OF ENOCH.—By the exegesis of later times, the statement that Enoch walked with God (Gen. 5 24; see ENOCH) was taken to mean that he enjoyed superhuman privileges of intercourse with God, and in this intercourse received revelations as to the nature of the heavens and the earth, the present lot and the destinies of men and angels. It was natural, therefore, that an apocalyptic literature should seek the shelter and authority of his name in ages when such literature became current. In the *Book of Enoch* preserved in Ethiopic we have large fragments of this literature proceeding from a variety of Jewish writers in Palestine; and in the *Book of the Secrets of Enoch* preserved in Slavonic we have further portions of it, written originally by Hellenistic Jews in Egypt. To the latter book we shall return.

18. Jewish view of Enoch.

The Book of Enoch as translated into Ethiopic belongs to the last two centuries B.C. All the writers of the NT were familiar with it and were more or less influenced by it in thought and diction. It is quoted as a genuine production in the Epistle of Jude (14 *f.*) and as Scripture in that of Barnabas (*Ep.* 4 3 16 5). The authors of the *Secrets of Enoch*, *Jubilees*, *Test. xii. Patr.*, *Apoc. Bar.* and 4 Esd. laid it under contribution. With the earlier Fathers and Apologists it had all the weight of a canonical book; but towards the close of the third and the beginning of the fourth centuries it began to be discredited, and finally it fell under the ban of the Church. The latest references to it are to be found in Syncellus and Cedrenus, who have preserved large fragments of the Greek version. The book was then lost sight of till 1773, when two MSS of the Ethiopic version were discovered by Bruce. From one of these MSS Lawrence made the first modern translation of Enoch in 1821.

19. Book of Enoch: its fortunes.

Enoch was originally written in Heb. or Aram., not in Greek. On this question the chief Apocalyptic scholars are practically agreed.

20. Language.

In the case of chaps. 1-32 this view is established beyond the reach of controversy; for in 10 9 19 1 88 27 2 28 1 29 1 31 1 of the Greek version we find that the translator transliterated Heb. or

Aram. words that were unintelligible to him. The same view as to the remaining chapters has been amply proved in the *Journ. As.* ('67) 352-395 by Halévy, who regards the entire work as derived from a Hebrew original. See also Charles, *Book of Enoch*, 21-22, 325. Recently some Dutch and German scholars have argued for an Aram. original on the ground that three Aram. forms have been preserved in the Gizeh Greek fragment—viz. φουκα in 18 8, μανδοβαρα in 28 1, and βαβδηρα in 29 1. The first is, it is true, an Aram. form of פּוּךְ and the two latter of מִדְבָּר. This argument, however, is inconclusive. We find ακανα in 2 K. 14 9*b* [BA*] as a transliteration of חוֹחַ, and Αινα in Neh. 2 14 [BℵA] as a transliteration of עַיִן; and there are other instances of the same peculiarity in 𝔊. Hence the presence of such Aramaisms in a text is not sufficient in itself to establish an Aram. original.

The Heb. original was translated into Greek, and from Greek into Ethiopic and Latin. Of the Greek version chaps. 6-9 4 8 4-10 14 15 8-16 1 have come down to us through Syncellus (*circ.* 800 A.D.), and 89 42-49 through a Vatican MS.; but the most important fragment of this version—the Gizeh Greek fragment—was discovered only a few years ago by the Mission Archéologique Française at Cairo, and published in 1892.

21. Versions —Greek.

M. Lod's critical edition of this fragment, accompanied by a translation, appeared almost simultaneously, and next year it was edited by the present writer, with an exhaustive comparison of the Greek and Ethiopic versions of 1-32, as an Appendix to his work on *Enoch*. The other Greek fragments will be found in the same work. The Gizeh fragment was edited also by Dillmann (*SBAW* ['92], li.-liii. 1039-1054, 1079-1092). The fragments of the Greek Enoch with a critical apparatus are to be published in the 2nd edition of vol. iii. of Swete's Cambridge LXX.

The Latin version is wholly lost—with the exception of 1 9, which is found in a treatise of the Pseudo-Cyprian entitled *Ad Novatianum* (see Zahn's *Gesch. d. NTlichen Kanons*, 2 797-801), and 106 1-18, which owes its discovery to Mr. James, in an eighth-century MS in the British Museum. This fragment is critically edited in Charles's *Book of Enoch*, 372-375, James, *Apocrypha Anecdota*, 146-150.

22. Latin.

The Ethiopic version alone preserves the entire text, and that in a more ancient and trustworthy form than the other versions. It has fewer additions, fewer omissions, and fewer and less serious corruptions.

23. Ethiopic.

I. *The Ethiopic MSS.*—The Ethiopic MSS are comparatively many. There are about twenty scattered throughout the libraries of Europe, half of them are found in the British Museum. The best of all the known MSS is undoubtedly that designated *Orient. 485* in the British Museum.

II. *Editions of the Ethiopic Text.*—Only two editions have appeared—that of Lawrence in 1838 from one MS and that of Dillmann in 1851 from five MSS. Unhappily, these MSS were late and corrupt. The present writer hopes to issue a text based on the incomparably better MSS now accessible to scholars. Such a text is actually presupposed in his Translation and Commentary of 1893.

III. *Translations and Commentaries.*—Translations accompanied by Commentaries have been issued by Lawrence ('21), Hoffmann ('33-'38), Dillmann ('53), Schodde ('52), and Charles ('93). Of Dillmann's and Schodde's Translations the reader will find a short review in Charles (6-9).

IV. *Critical Inquiries.*—Some account of these will be found in Schürer, *Hist.* 70-73, and in Charles's *Book of Enoch*, 9-21 309-311. Of the many works on this book the following deserve special mention here. Lücke, *Einl. in d. Offenb. des Joh.*(2) ('52); Ew. *Abhandl. üb. d. äth. Buches Henokh Entstehung, Sinn, und Zusammensetzung* ('55); Köstlin, 'Ueb. die Entsteh. d. B. Henoch' (*Theol. Jahrb.* 1856, pp. 240-279 370-386); Hilgenfeld, *Die jüd. Apokalyptik* ('57), 91-184; Gebhardt, 'Die 70 Hirten des Buches Henoch und ihre Deutungen' (Merx's *Archiv f. wissenschaftl. Erforschung des A T*, 1872, vol. ii. Heft 2 163-246); Drummond, *The Jewish Messiah* ('87), 17-73; Lipsius in Smith and Wace's *Dict. of Chr. Biogr.* ('80), 2 124-128; Schürer, *Hist.* 5 54-73; Lawlor, *Journ. Phil.* vol. xxv. pp. 164-225 ['97].

The Book of Enoch is a fragmentary survival of an entire literature that once circulated under his name. To this fact the plurality of books assigned to Enoch from the first may in some sense point: as. for instance, the expression 'books' in 104 12; *Test. xii. Putr.* Jud. 18; Origen, *c. Celsum*, 554, and elsewhere. Of this literature five distinct fragments have been preserved in the five books into which the Book of Enoch is divided (1-36 17-71 72-82 83-90 91-108). These books were originally separate treatises; in later times they were collected and edited, but were much mutilated in the course of redaction and incorporation into a single work. In addition to this Enoch literature, the final editor of the book made use of a lost apocalypse, the Book of Noah mentioned in Jubilees 10 13 21 10), from which he drew 6-11 (?) 17-19 39 1 2*a* 41 3-8 43 f. 54 7 55 2 59 f. 65-69 25 106 *f.* Another fragment of the Book of Noah has been embodied in the Book of Jubilees (see below, § 57).

24. Compositeness.

We have already remarked that in the five books into which the whole work is divided we have the writings of five different authors. Before we proceed to give some of the grounds for this statement, we shall give in merest outline the different constituents found in the work by the chief scholars who have studied the subject.

25. Criticism.

Lücke in his *Einl.* (see above, § 23) regards the book as consisting of two parts. The first part embraces 1-36 72-105, written at the beginning of the Maccabean revolt, or, according to his later view, in the reign of John Hyrcanus: the second consists of the Similitudes (36-71), and was written in the early days of Herod the Great. In the latter, however, there are some interpolations. Hofmann (J. Chr. K.) ascribes the entire work to a Christian author of the second century. In this view he was followed later by Weisse and Philippi. Hofmann deserves mention in this connection on the ground of his having been the first to give the correct interpretation of the seventy shepherds in 89 *f.* Ew. in his *Abhandl.* (see above, § 23) gives the following scheme:—Book I. (37-71) *circa* 144 B.C.; Book II. (1-16 81 1-4 84 91-105) *circa* 135 B.C.; Book III. (20-36 72-90 106 *f.*) *circa* 128 B.C., 108 later. Book IV., the Book of Noah (6 3-8 8 1-3 9 7 10 1-3 11 22*b* 17-19 54 7-55 2 60 1-10 24 25 64-69 16), somewhat later than the preceding. Köstlin in his essay (see above, § 23), a contribution of great worth, arrives at the following analysis: the groundwork (1-16 21-36 72-105) *circa* 110 B.C.: the Similitudes (37-71 and 17-19) before 64 B.C.; Noachic Fragments (54 7-55 2 60 65-69 25, possibly also 20 82 9-20 106 *f.*). 108 is an Essene addition. Hilgenfeld (*op. cit.*) regards the groundwork, consisting of 1-10 20-36 72-105, as written before 98 B.C., and the remaining chapters as coming from the hand of a Christian Gnostic after the time of Saturninus. The interesting study of Tideman (*ThT.* [1875] 261-296), and the works of Lipsius, Schürer, Drummond, enumerated above (§ 23), and Schodde (*The Book of Enoch*, 1882) can only be mentioned here. As Dillmann changed his mind three times, and in each instance for the better, it will be enough to give his final analysis. The groundwork (1-36 72-105) in the time of John Hyrcanus; the Similitudes and 17-19, before 64 B.C.; the Noachic fragments (6 3-8 8 1-3 9 7 10 1 11 20 39 1 2*a* 54 7-55 2 60 65-69 25 106 *f.*); 108 from a later hand.

We shall now proceed to discuss this question directly, and endeavour to carry the criticism of the book one further stage towards finality.

26. Results.

Disregarding the interpolations from the Book of Noah already mentioned as well as the closing chapter, we find that all critics are agreed in ascribing the Similitudes (37-70) to an authorship different from the rest. The remaining chapters (1-36 72-104) have been regarded by all critics except Ewald and Lipsius as proceeding from one and the same author; but these scholars, while differing from each other, have not persuaded any one but themselves as to the justness of their respective analyses. In their contention, however, as to the compositeness of these chapters they were undoubtedly right. This question has been gone into at length in Charles's *Book of Enoch*, 55 *f.*, 187-189, 220 *f.*, 260-263, where grounds are given for believing that sections 1-36, 72-82, 83-90, and 91-104 are writings distinct as to authorship, system of thought, and date. We must now proceed to sketch briefly the various independent writings contained in the entire work, assigning to each its most probable date.

Part I., consisting of chaps. 1-36 (for the Noachic interpolations, see § 24), was written at latest before 170 B.C., and mainly from the prophetic standpoint of such chapters as Is. 65. This is, undoubtedly, the oldest part of the book, being anterior to 72-82, 83-90, 91-104, as it is used by the writers of these sections.

27. Chaps. 1-36.

As 83-90 was written not later than 161 B.C., 1-36 must be some years earlier, and, as there is no allusion to the massacres

of Antiochus Epiphanes, the above date, **170**, is the latest reasonable limit for its composition.

This book—*i.e.*, 1-36—is the oldest piece of Jewish literature that teaches the general resurrection of Israel, describes Sheol according to the conception that prevails in the NT as opposed to that of the OT, or represents Gehenna as a final place of punishment (cp ESCHATOLOGY, § *63*). The problem of the author is to justify the ways of God to men.

The righteous will not suffer always (1 1). Sin is the cause of this suffering, and the sin of man is due to the lust of the angels—the Watchers (9 6 9 10 10 8). Hence the Watchers, their companions, and their children, will be destroyed (10 4-10 12). Their destruction will form the prelude to the first world-judgment, of which the Deluge will form the completion (10 1-3). Sin still prevailed after the Deluge: however, through the influence of the evil spirits that went forth from the slaughtered children of the Watchers and the daughters of men (16 1). These act with impunity till the final judgment. In the meantime character finds its recompense in some measure immediately after death (22). In the last judgment the Watchers, the demons, and all classes of Israelites with one exception, will receive their final award (1 9 22 13). This judgment is preceded by a general resurrection of Israel (22). The wicked are cast into Gehenna (27 2); the earth is cleansed from sin (10 20-22); the Messianic kingdom is established, with Jerusalem as a centre (25 5); and God abides with men (25 3). The Gentiles are converted (10 21). The righteous eat of the tree of life (25 4-6) and thereby enjoy patriarchal lives (5 9). As to what befalls the righteous after the second death there is no hint in this fragmentary section.

28. Chaps. 83-90. Part II., consisting of 83-90, was written between 166 and 161 B.C., mainly from the same standpoint as Daniel. On a variety of grounds, we are obliged to discriminate this section from the preceding.

It will be enough to mention that, whereas in this there is a Messiah, in the preceding there was none; in this the life of the righteous is apparently unending, in the other it was finite; in this the scene of the kingdom is the New Jerusalem set up by God himself, in the other it was Jerusalem and the entire earth unchanged though purified. Finally, the picture in 83-90 is developed and spiritual, whilst that in 1-30 was naïve, primitive, and sensuous.

The date assigned above is not difficult to fix.

The Ḥasidim (see ASSIDEANS), symbolised by the lambs that are born to the white sheep (90 6), are already an organised party in the Maccabean revolt. The lambs that become horned are the Maccabean family, and the great horn who is still warring while the author of the section is writing is Judas the Maccabee (90 9), who died in 161 B.C.

Chapters 83-90 recount two visions: 83 *f.*, dealing with the first world-judgment; 85-90, dealing with the entire history of the world till the final judgment. In the second vision the author considers the question of Israel's unmerited suffering.

Israel has indeed sinned; but the punishment immeasurably transcends its guilt. These undue severities, the author shows, have not come from the hand of God; they are the doing of the seventy shepherds into whose care God committed Israel (89 59). These shepherds or angels have proved faithless to their trust; but not with impunity. An account has been taken of all their deeds (89 61-64), and for them and for their victims there is laid up a due recompense (90 33). Moreover, when the outlook is darkest, a league of the righteous is organised in Israel (90 6). In it there will arise a family from which will come forth the deliverer of Israel, Judas the Maccabee (90 9-16). Every effort of the Gentiles to destroy him will prove vain, and God's appearance in person to judge will be the signal for their destruction. The apostates will be cast into Gehenna, and the wicked angels into an abyss of fire (90 20-25). God himself will set up the New Jerusalem (90 28 *29*); the surviving Gentiles will be converted and serve Israel (90 30); the righteous dead will be raised to take part in the kingdom; and finally the Messiah will appear among them (90 37). The Messianic kingdom lasts on earth for ever, and its members enjoy everlasting blessedness.

It will be observed that this is the earliest appearance of the Messiah in non-canonical literature (see MESSIAH, § 5; ESCHATOLOGY, § *60*). He has, however, no rôle to play: he has not as yet vindicated for himself a place in the apocalyptic doctrine of the last things.

29. Chaps. 91-104. Part III., consisting of 91-104, was written between 134 and 95 B.C. The well-defined opposition of the Pharisees and the Sadducees depicted in this section cannot have been earlier than the breach between John Hyrcanus and the Pharisees (see ISRAEL, § 78; SCRIBES, § 18); hence **not** earlier than 134 B.C. On the other hand, it cannot have been later than 95 B.C., as the merely passing reference to persecution in 103 15 could hardly be interpreted of Jannæus after his savage massacres of the Pharisees in 95 B.C., which won for him the title, 'the slayer of the pious.'

This section was originally, like **83-90**, an independent writing. In adapting it to its present environment, the redactor of the entire work broke up its original arrangement. In order to recover this we must read it in the following order:—92 91 1-10 93 1-10 91 12-19 94-104. On a variety of grounds (see Charles *Book of Enoch*, 260-263), we must attribute this work to quite another author than that of either of the preceding sections.

In passing from 83-90 to 91-104 we enter on a world of new conceptions (cp ESCHATOLOGY, § 64 *f.*). In all previous apocalyptic writings the resurrection and the final judgment have been the prelude to an everlasting Messianic kingdom; whereas in the present writing these great events are relegated to the close of the Messianic kingdom, and not till then do the righteous enter on their reward. This kingdom is temporary (91 12-15); there is no Messiah; the righteous with God's help vindicate their just cause and destroy their oppressors. On the close of the kingdom follow the final judgment (91 15) and the risen spiritual life of blessedness in a new heaven (91 10 92 3). In this view of the future the centre of interest has obviously passed from the material world to the spiritual, and the Messianic kingdom is no longer the goal of the hopes of the righteous. Their faith finds its satisfaction only in a blessed immortality in heaven itself. This immortality is an immortality of the soul only (103 3-4). As for the wicked, they will descend into the pain of Sheol and abide there everlastingly (98 3 10 104 7 8). Here (103 7) Sheōl appears as Hell for possibly the first time.

30. Similitudes; chaps. 37-70. Part IV. The Similitudes, consisting of 37-70, were written between 94 and 79 B.C., or between 70 and 64 B.C.

'The kings and the mighty,' so often denounced, are the later Maccabean princes and their Sadducean supporters: the later Maccabean princes, for the blood of the righteous was not shed (as the writer complains, 47 1 2 4) before 95 B.C.; not the Herods, for the Sadducees were not allies of the Herods; and Rome was not as yet known to the writer as one of the great world-powers. This last fact necessitates an earlier date than **64** B.C., when Rome interposed authoritatively in the affairs of Judæa.

In his attempt to solve the problem of the suffering of the righteous, the author of the Similitudes has no interest save for the moral and spiritual world. His view, too, is strongly apocalyptic, and follows closely in the wake of Daniel.

The origin of sin is traced one stage farther back than in 1-38. The first authors of sin were the Satans (40 7). The Watchers fell through becoming subject to these and leading mankind astray (54 6). Though the Watchers were forthwith confined in a deep abyss, sin still flourishes in the world and sinners deny the name of the Lord of Spirits (38 2) and of his Anointed (48 10), and the kings and the mighty oppress the children of God (62 11). Suddenly there will appear the Head of Days, and with him the Son of Man (46 2 3 4 48 2), to execute judgment upon all alike. To this end there will be a resurrection of all Israel (51 1 61 5), and all judgment will be committed to the Son of Man (41 9 69 27), who will judge all according to their deeds (41 1). Sin and wrong-doing will be banished from the earth (49 2), and heaven and earth be transformed (45 4 5), and the righteous will have their mansions in Paradise (39 6 41 2). The Elect One will dwell among them (45 4); they will be clad in garments of life (62 15 16), become angels in heaven (51 4), and continue to grow in knowledge and righteousness (58 5).

It will be observed that the Messianic doctrine in this section is unique, not only as regards the other sections of Enoch but also in Jewish literature as a whole (see, further, ESCHATOLOGY, § *66*).

The Messiah exists from the beginning (*46 2*); he sits on the throne of God (45 3 47 3), and possesses universal dominion (62 6); and all judgment is committed unto him (69 27). If we turn to the other sections we find that in **1-36** and 91-104 there is no Messiah at all; whilst in 83-90 the Messiah is evidently human, and has no real rôle to play in the doctrine of the last things.

If the reader will turn to the list of Noachic interpolations (see above, § *24*) he will find that many of them are to be found in this section.

They have as a rule been drawn from an already existing Apocalypse of Noah, and adapted by an editor to their present contexts in Enoch. This he does by borrowing from the Similitudes characteristic terms, such as 'Lord of Spirits,' 'Head of Days,' 'Sou of Man,' to which, however, either through ignorance or of set intention, he generally gives a new connotation.

Chapter 71 does not belong to the Similitudes. It shows the same misuse of characteristic phrases as the interpolations just referred to (see Charles, *Book of Enoch*, 183 *f.*).

Part V., the Book of Celestial Physics, consists of 72-78 82 79. This, like the preceding sections, is a work of independent authorship. There are no means of determining its date.

31. Celestial Physics (chaps. 72-78, 82, 79).

It has suffered from both disarrangements and interpolations at the hands of the editor of the whole work. In the first place, 80 *f.* is a manifest intrusion written from a standpoint quite different from that of the rest. In the next place 82 does not stand in its original position. The opening word; of 79 in fact presuppose 82 as already read. We have found a similar dislocation of the text in Part III.

Part VI., the Noachian and other interpolations. These have been enumerated above (§ 24).

32. Influence of Enoch.

The influence of Enoch on Jewish literature (to exclude for the moment the NT) is seen in *Jubilees* (written about the beginning of the Christian era), in the Slavonic *Enoch* (1-50 A.D.), *Test. xii. Putr.*, *Apoc. Bur.*, and in 4 Esdras.

In Jewish apocalyptic before 40 A.D. Enoch was the chief figure next to Daniel ; but his acceptance by the Christians as a Messianic prophet led to his rejection by the Jews. See note on § 10.

In patristic literature, Enoch is twice cited as Scripture in Ep. Barn. (43 165). It is also quoted with approval, though not always by name, by Justin Martyr, Iren. and Athenag., Tert., Clem. Alex., Orig., Anatolius. Thenceforward it is mentioned with disapproval by Hilary, Chrys., Jer., August., and finally condemned in explicit terms in the *Const. Ap.* 6 16.

Far more important than its influence on Jewish literature, was its influence on N T diction (*a*) and doctrine (*b*).

(*a*) We shall here draw attention only to the indubitable instances. Enoch is quoted directly in Jude 14 *f.* Phrases, clauses, or thoughts derived from it, or of closest kin with it, are found in Jude 4 13 *f.*; Rev.27 3 10 4 6 6 10 9 1 14 20 20 13; Rom. 8 38 9 5; Eph. 1 21; Heb. 11 5; Acts 3 14; Jn. 5 22 27; Lk. 9 35 16 9 23 35; Mt. 19 28 25 41 26 24.

(*b*) The doctrines in Enoch that had a share in moulding the analogous N T doctrines, or formed a necessary link in the development of doctrine from the OT to the NT, are those concerning the Messianic kingdom and the Messiah, Shed and the resurrection, and demonology, on which reference must be made to the separate articles on these heads and to ESCHATOLOGY. We here content ourselves with remwking, as regards the doctrine of the Messiah, that four titles, afterwards reproduced in the New Testament, are first applied to the personal Messiah in the Similitudes. These titles are 'Christ' or 'the Anointed One,' 'the Righteous One,' 'the Elect One,' and 'the Son of Man.' The first title, found repeatedly in earlier writings but always in reference to actual contemporary kings or priests, is now for the first time (48 10 52 4) applied to the ideal Messianic king that is to come. It is here associated with supernatural attributes. The second and the third of these titles, found first in Enoch, have passed over into the NT—the former occurring in Acts 3 14 7 52 22 14, the latter in Lk. 9 35 23 35. The last title, that of 'the Son of Man,' is historically the source of the New Testament designation. To the latter it contributes some of its most characteristic contents (see Charles, *Book of Enoch*, 312-317).

III. THE BOOK OF THE SECRETS OF ENOCH.—This book has, as far as is yet known, been preserved only in Slavonic. For the sake of convenience we shall call it 'the Slavonic Enoch,' in contradistinction to the older book, which for the same reason we shall designate 'the Ethiopic Enoch.'

33. Secrets of Enoch: its fortunes.

This new fragment of the Enochic literature has only recently come to light through certain MSS, some of which were found in Russia and some in Servia. Although the very knowledge of such a book was lost for probably twelve hundred years, the book was much used by both Christians and heretics in the early centuries.

Citations appear from it, though without acknowledgment, in the *Book of Adam and Eve*, *Apoc. Moses* and *Pan2* (400-500 A.D.), *Sibylline Oracles*, *Asc. Zsa.* and *Ep. of Bar.* (70-90 A.D.). It is quoted hy name in the apocalyptic portions of the *Test. of the xii. Patr.* (*circa* 1 A.D.). It was referred to by Orig. and probably by Clem. Alex and was used by Iren. Some phrases of the N T may be derive2 from it.

34. The Slavonic MSS.

There are five Slavonic MSS : in two of them the complete text is found, while the remaining three supply ouiy a shortened and incomplete redaction. For the edition published by the present writer the two best of the above MSS (A and B) were translated and put at the service of the editor by Mr. Morfill. The editor had at his disposal also Mr. Morfill's translation of Prof. Sokolov'stext, which is founded on these and other MSS. In 1896 Prof. Bonwetsch published his *Das Slavische Henochbuch*, in which he gives a German translation of the MSS A and B side by side, preceded bv a short introduction.

35. Language. (*a*) The main part of the 'Slavonic Enoch' was written in Greek.

This is clear from such statements as (1) 30 13, 'And I gave him a name (*i.e.*, Adam) from the four substances : the East, the West, the North, and the South.' Adam's name is thus derived from the initial letters of the Greek names of the four quarters—ἀνατολή, δύσις, ἄρκτος, μεσημβρία. This derivation was first elaborated in Greek : it is impossible in the Semitic languages. (2) The writer follows the chronology of 𝔊. (3) In 50 4 he reproduces the 𝔊 text of Dt. 32 35 against the Hebrew. (4) He constantly uses Ecclesiasticus, which was current chiefly in Egypt.

(*b*) Certain portions were based on Hebrew originals. Such a hypothesis is necessary to account for the quotations from it or references to it which appear in the *Test. xii. Putr.* The fact that the latter work was written in Hebrew obliges us to conclude that its author drew upon Hebrew originals in quotations and references.

36. Place. The book was written in Egypt.

This is deducible from the following facts :—(1) The variety of speculations which it holds in common with Philo and other Hellenistic writers : thus souls were created before the foundation of the world, 23 5 (cp Philo, *De Somno*, 1 22 ; Wisd. 8 19 20). Again, man bad seven natures, 30 9 (cp Philo, *De Mundi Op.* 40). (2) The whole Messianic teaching of the OT does not find a single echo in the work of this Hellenised Israelite of Egypt, although he shows familiarity with most of its books. (3) Such monstrous creatures as appear in chap. 12 are natural products of the Egyptian imagination. (4) The syncretistic character of the creation narrative in 25 *f.* betrays Egyptian elements.

37. Relation to other works.

Materials originally derived from this hook are discoverable in Joel and Cedrenus (1050-1200 A.D.), though in these authors the materials are assigned to other names. Two passages of the *Book of Adam and Eve* (see APOCRYPHA, § 10) in 16 and 8 are all but quotations from 29 4 *f.* and 31 2 of our hook. Again in the *Apoc. Moses*, 19 (ed. Tisch. 1866), we have a further development of 14 2-4 of our text, just as in *Apoc. Paul.* 64 οὗτός ἐστιν ὁ παράδεισος, ἔνθα . . δένδρον . . ἐν ᾧ ἐπανεπαύετο τὸ πνεῦμα τὸ ἅγιον is a Christian adaptation of 8 3, 'And in the midst (of Paradise is) the tree of life—on which God rests when he comes into Paradise.' The section on the derivation of Adam's name in the anonymous *De Montibus Sina et Sion*, 4, is to be traced ultimately to 30 13, and Augustine's speculation, *De Civ.* xxii. 30 5, on the eighth eternal day to 33 2.

Still earlier we find almost a verbal reproduction of 50 5-51 1 in the Sibylline Oracles 2 75. In Irenæus, *Contra Hær.* v. 28 3, the Jewish speculatioh of 33 1 *f.* is reproduced, and possibly in Origen (see Lommatzsch ed., vol. xxi. 55). However this may be, there is no donbt as to the direct reference to 24-30 33 8 in the *De Princip.* i. 3 2 : 'Nam et in eo libello . . . quem Hermas conscripsit, ita refertnr : Primo omnium crede, quia unus est Deus, qui esse fecit omnia . . . sed et in Enoch libro his similia describuntur.' There are good grounds for believing that in a still earlier period (50-100 A.D.) the writers of *Asc. Isa.* 8 16 and of *Apoc. Bar.* 4 3 were acquainted with 19 1 and 31 2 of this book respectively. In *Ep. Barn.* 15 5-8 and probably in 18 1 the thought and diction are dependent on 32 2-33 and 30 15.

In the NT the similarity of matter and language is sufficiently great to establish a close connection if not a literary dependence.

With Mt. 5 5, 'Blessed are the peacemakers,' cp 52 11, 'Blessed is he who establishes peace' ; with Mt. 5 34 35 37, 'Swear not at all,' etc., cp 49 1 'I will not swear by a single oath, neither by heaven, nor by earth, nor by any other creature which God made. . . . If there is no truth in men, let them swear by a word,

yea, yea, or **nay,** nay.' Again, with Mt. 7 20 and 25 34, cp **42** 14 and **9** 1; with Jn. 14 2 cp 61 2; with Eph. 4 25 cp 42 12; with Rev. 9 1 and 10 5 *f.* cp **42** 1 and **05** 7. Still earlier we find this hook not only used but quoted by name in the *Test.* Dun 5, where the statement τῶν πνευμάτων τῆς πλάνης· ἀνέγνων γὰρ ἐν βίβλῳ Ἐνὼχ τοῦ δικαίου, ὅτι ὁ ἄρχων ὑμῶν ἐστιν ὁ Σατανᾶς is drawn from **183**, 'These are the Grigori (*i.e.* Ἐγρήγοροι) who with their prince Satanail rejected the holy Lord.' Finally, the references to Enoch in *Test. Naph.* 4, *Test. Sim.* 5, *Test. Benj.* 9, are adaptations of **34** 2-3.

38. Date. The question as to the date has, to a large extent, been determined already. The portions which have a Hebrew background are at latest pre-Christian.

This follows from the fact of their quotation in the *Test. xii. Patr.* Turning to the rest of the book, we find that the *terminus a quo* is determined by the fact that it frequently uses *Ecclus.* (cp **43** 2 *f.* **47** 5 **52** 8 **61** 2 4, etc.; see the writer's edition of the Slavonic Enoch). The Ethiopic Enoch, further, is continually presupposed to be in the background. Its phraseology and conceptions are reproduced (**7** 4f: **33** 4 9 *f.* **35** 2, etc.). At times its views are put forward in a developed form (**8** 1 5 *f.* **40 13 64** 5), and occasionally divergent conceptions are enunciated (16 **7** 18 4). Finally, explanations are claimed to have been given by this writer which, as a matter of fact, are to be found not in his writings but in the *Eth. En.* (see **40** 5 *f.* 8 *f.*). It is possible that the Book of Wisdom also was used by our author; see 65 4.

Since, therefore, Ecclus., the *Eth. Enoch,* and Wisdom (7) were used by this author, his work cannot have been earlier than 30 B.C.

The terminus *ad quem* must be set down as earlier than 70 A.D. For (1) the temple is still standing. (2) This book was known and used by the writers of *Ep. Barn.* and *Asc. Isa.*, and probably by some of the writers of the NT. We may with reasonable certainty, therefore, assign the composition of the book *in Creek* to the period 50 A.D. The author is thus a contemporary of Philo, with whom, accordingly, we find that he holds many speculations in common, Much of the book, however, goes back to a Hebrew background of an earlier date.

39. Authorship. The author was thus an orthodox Hellenistic Jew who lived in Egypt. He believed in the value of sacrifices (42 6 59 1 66 2)—though he is careful to enforce enlightened views with regard to them (45 3 *f.* 61 4 *f.*)—in the law (52 8 *f.*), and in a blessed immortality (50 2 65 6 8 *f.*), in which the righteous will wear 'the raiment of Gods glory' (**22** 8). In questions affecting the origin of the earth, of sin, and of death, he allows himself the most unrestricted freedom and borrows from every quarter. Thus Platonic (**30** 16), Egyptian (25 2), and Zend (58 4-6) elements are incorporated in his system. The result is highly syncretistic.

40. Contents. The book opens with a short account of Enoch as 'a very wise man' whom God loved and received so that he should see the heavenly abodes, the kingdoms of the wise, great, and never-changing God.' In chap. 1 two angels appear to Enoch and bid him make ready to ascend with them into heaven. In chap. 2 he admonishes his sons and directs them not to seek for him till he is brought hack to them. Thereupon (*3-G*) he is carried up through the air into the first heaven, where he beholds a great sea, and the elders the rulers of the orders of the stars and the treasuries of the show and ice and clouds and dew, 'and the angels who guard them. Thence the angels bear him to the second heaven (7), where he sees the angels who had rebelled against God, imprisoned and suffering torments. These angels ask Enoch to intercede for them. Next, he ascends to the third heaven (8), where is Paradise, with all manner of beautiful fruits and 'the tree of life on which God rests when he comes into the garden,' and the four streams of honey milk, oil, and wine, that water the garden, and go down to the Paradise of Eden, between corruptibility and incorruptibility. The angels inform Enoch that 'this place is prepared as an eternal inheritance' for those 'who turn their eyes from unrighteousness and accomplish a righteous judgment, and give bread to the huhpry and clothe the naked, and raise the fallen . . . and walk without blame before the face of the Lord.' Enoch is then taken to the northern region of this heaven (10), and shown 'a very terrible place' of 'savage darkness and impenetrable gloom, with 'fire on all sides, cold, and ice.' He is told that 'this place is prepared as an eternal inheritance' for those 'who commit evil deeds on earth, sodomy, witchcraft' . . . who oppress the poor, who are guilty of 'stealing, lying, envy, evil thoughts, fornication, murder,' who 'worship gods without life.' Thence Enoch is conducted to the fourth heaven, where he is shown the courses of the sun and moon (11), and the phœnixes, and the chalkadri? (12; cp COCKATRICE) and the eastern and western gates of the sun (13-16), and 'an aimed host serving the Lord with cymbals and organs' (17).

In 18 he is taken up to the fifth heaven, where he sees the Watchers who had rebelled; their brethren were already confined in torment in the second heaven. Then he passes to the sixth heaven (19), where are the angels who regulate all the powers of nature and the courses of the stars, and write down the deeds of men. Finally, he is raised to the seventh heaven (20 *f.*), where he sees God sitting on his throne, and the heavenly hosts in their ten orders on the steps of the throne, and the Seraphim singing the trisagion. He falls down and worships (22). At God's command, Michael takes from him his earthly robe, anoints him with the holy oil, and clothes him with the raiment of God's glory. Thus Enoch becomes like one of the glorious ones. Under the instruction of Vretil (chap. 23), he writes *366* books, in thirty days and thirty nights, about things in heaven and earth, and about the souls of men created from eternity, and their future dwelling-places.

In 24-26 God makes known to Enoch how he created the invisible out of the visible; how he commanded Adoil (possibly a corruption of Uriel, regarded as=light of God), and Arkhas (possibly from ארץ or Aram. ארקא=earth), to come forth and burst asunder; and so the light on high and the world below were produced. And God divided the light and the darkness (27), and made the seven heavens, and caused the waters under the heaven to be gathered into one place, and made the earth from the waters (28). Such were the creations of the first day. And on the second day God created the heavenly hosts (29 1-3). And one of the archangels (Satanail) rebelled, and God cast him down (29 4 *f.*) from the heights. On the third day (30 1 2) God caused the earth to produce trees and herbs, and planted Paradise. On the fourth (30 3-6), he ordered great lights to be in the various circles of the heavens—Saturn, Venus, Mars, the Sun, Jupiter Mercury the Moon. On the fifth (30 7-18), he created the hsh of the'sea, and the fowl of heaven, and every thing that moveth on the earth, and on the sixth he made man from seven substances, and called him Adam, and showed him the two ways. While Adam was in Paradise he could see the angels in heaven (31); but Satan envied him and deceived Eve. And God established the eighth day (33 1-2), at the beginning of which time should be no more. The corruption of the earth and the deluge are then foretold, and the preservation of Noah *(35)*. God bids Enoch return to the earth for thirty days and teach his sons during that time (36-38). Enoch admonishes and instructs his sons, tells them what he has seen, and gives utterance to nine beatitudes (39-42). He 'impresses on them the incomparable dignity of goodness—'none is greater than he who fears God' (43). They are not to revile the person of man, but to present their offerings; yet they must not value these unduly, but consider the heart from which they spring (44-46). Enoch gives his hooks to his sons (47); instructs them not to swear (49); and bids them in meekness accomplish the number of their days, and be open-handed to those in need (50 *f.*). Again he enunciates seven beatitudes and the woes with which they are contrasted (52). The departed saints, he says, do not intercede for the living (53). At the close of the appointed time (55-59) Enoch again addresses his *sons.* He declares that no soul shall perish till the final judgment, and that the souls of beasts will then bring charges against the men who ill-treated them. Further instruction follows, as to sacrifice and man's duty to the needy, and warning against contempt and lying (60-63). The people assemble in Achuzan to take leave of Enoch, who addresses them on various topics and exhorts them to faithfulness. He is then carried up to the highest heaven. His sons build an altar in Achuzan and hold high festival, rejoicing and praising God (64-68).

41. Value. The value of the book, in elucidating contemporary and subsequent religious thought, may be exemplified by the fresh evidence it contributes on the following beliefs :—

1. *The millennium.*—This Jewish conception is first found in 32 2-33 2. From this its origin is clear. The account in Genesis of the first week of creation came in pre-Christian times to be regarded not only as a history of the past, but also as a sketch of the future of the world. Thus, as the world was created in six days, its history was to last 6000 years; for 1000 years with God are as one day (Ps. 90 4; Jub. 4 30; 2 Pet. 3 8); and as God rested on the seventh day, so at the close of 6000 years there should be a rest of 1000 years—Le., the millennium.

2. *The sewn heavens.*—The detailed account of the seven heavens in this book has served to explain difficulties in the NT conceptions of the heavens, and has shown beyond the reach of controversy that the sevenfold division of the heavens was believed by Paul, by the author of Hebrews, and probably by the author of Revelation. On the Secrets of Enoch see also ESCHATOLOGY, § 75.

IV. THE ASCENSION OF ISAIAH.—This apocryph has come down to us in its entirety only in the Ethiopic version. It is a composite work, as we shall see; and two, if not three, of its constituents existed independently before their incorporation in the present work. Of these the oldest is undoubtedly 2 1 3 12 and 5 1 6-14, which contains an account of the martyrdom of Isaiah (cp ISAIAH, i. § 1, end). From this section, which is of Jewish authorship, seem to have been derived such statements as : 'they were sawn asunder, they were tempted, ... they went about in sheepskins . . . being destitute . . . wandering in deserts and mountains' (Heb. 11 37 *f.*; Cp 2 10-12 5 1 6).

42. Ascens. Isa.; its fortunes.

The next probable reference is in Justin Martyr (*c. Tryph.* 120), where he says : 'ye sawed (Isaiah) in twain with a wooden saw.' So we find it in 5 1. In Tertul. (*De patientia*, 14) the reference is unmistakable, while in Origen the book or its matter is discussed : it is there called ἀπόκρυφον Ησαΐου, or simply ἀπόκρυφον (*Ep. ad Africanum*, 9, *Ad Matt.* 13 57 23 37, *In Jesaiam homil.* 1 5). The first reference to the second part (6-11) is in Epiph. (*Haer.* 40 and 67 3), where we are told that certain heretics made use of this work, which he calls τὸ ἀναβατικὸν Ἠσαΐου, to support their opinions. Jerome speaks of an *Ascensio Isaiæ*, and in the list of the Canon edited by Montfaucon and others it is called Ἠσαΐου ὅρασις.

The various constituents of the book were written originally in Greek. Thus. in 4 19 21 68 𝔊 is followed where it differs from- the Hebrew. Of the Greek the greater part has come down to us in a MS found in the National Library in Paris, and edited by Gebhardt in Hilgenfeld's *Zeitschrift* (1878)—though it is not the original work, but a free recast and rearrangement of it (see below).

43. Language.

Translations from the Greek were made into Latin, Ethiopic, and Slavonic. Of the *Latin* version, 6-11 were extant in the sixteenth century and were printed at Venice in 1522, but had long been lost to view when Gieseler re-edited them in 1832. Two other fragments, 2 14-3 13 and 71-19, were discovered and published in 1828 by Mai, though that editor was not aware that they belonged to this apocryph. Happily, as remarked above, the entire work has been preserved in *Ethiopic*, and on the whole faithfully, as we can infer from the Greek and the Latin fragments.

44. Versions.

The sources of its corruptions are often ately recognisable by retranslation into Greek. Thus in 9 35 the Ethiopic = 'qui se ad te advertit,' the Latin 'præ The original of both is ἐπιτρέπων, as we find in the Greek; hut the Ethiopic translator has followed an inappropriate meaning. That followed by the Latin translator is admissible ; but the context requires the ordinary sense of ἐπιτρέπων = 'permitting.'

The Ethiopic version was first edited by Laurence in 1819 from one MS, and afterwards in 1877 by Dillmann from three MSS. To the latter edition are appended the Latin fragments. Next year, as we have already noticed,' Gebhardt edited the Greek text. Although a free recast of our apocryph, it is very valuable for critical purposes, and in many respects confirms the critical acumen of Dillmann. Still there is need of a work which will give a text emended and corrected with the help of this Greek MS as well as of 'the Slavonic version and will deal more exhaustively with the different elements from which the apocryph is composed. This need Charles has tried to meet in his forthcoming work, *The Ascension of Isaiah.*

Ewald was the first to recognise the composite structure of this book, finding in it the works of three distinct authors. Subsequent criticisms, however, have only in part confirmed his analysis, and the best work as yet done in this direction is that of Dillmann. Dillmann's hypothesis is as follows :—There were originally two independent works : one, an account of the martyrdom of Isaiah (2 1-3 12 5 2-14), of Jewish origin; the other, the vision of Isaiah (6-11 1 23-40), of Christian authorship. These two works were next combined into one volume by a Christian, who supplied them with a prologue and an epilogue (1 1 *f.* 46-13 11 42 *f.*). Finally, when the book had assumed this shape, another editor inserted 1 3 4*a* 3 13-5 1 15 *f.* 11 2-22 41. This will do as a provisional hypothesis, but it is not final; and Gebhardt, Schürer, and Deane are wrong in saying that it is borne out by external testimony, averring that in the Greek work there is no trace of the sections 3 13-5 1 11 2-22. By a minute examination of the Greek certain phrases which imply the author's acquaintance with 3 13 17 4 8 11 19 are discoverable (see Charles, *op. cit.*). Thus the final editing was completed before the composition of the Greek legend. Further, since 3 13 is found in one of the Latin fragments published by Mai, this section (*i.e.*, 3 13-5 1) was already present before the Latin version was made. Too much stress must not be laid on the fact that 11 2-22 is represented in the Latin version by only a few lines; for it is characteristic of this version to abridge the text it is rendering.

45. Compositeness.

The following is an outline of the contents of the book.

In the twenty-sixth year of his reign Hezekiah summons Manasseh in order to entrust to him certain writings touching the future (1 1-6). Isaiah foretells to Hezekiah his martyrdom at the hands of Manasseh (1 7-73). On the death of Hezekiah, Manasseh abandons the service of God for that of Satan ; and thus, owing to the evils perpetrated in Jerusalem, Isaiah and other prophets withdraw into the wilderness (2). Thereupon Balkira, a Samaritan, accuses Isaiah and the prophets of prophesying evil things against the king and the people. As Berial has gained possession of the king's heart, the king sends and seizes Isaiah (3 1-12). There is a sudden break in the narrative here (the conclusion of the martyrdom of Isaiah follows in 5 2-14), to explain the reason of Berial's anger—viz., Isaiah's vision and the revelation in which he laid hare the future rule and destruction of Sammael, as well as the corning redemption by Christ. In fact, we have the history of the Christian Church summarised briefly from the coming of Christ to the Neronic persecution and the last judgment (3 13-5 1). In this short apocalypse we have the account of an eye-witness of the condition of the early Church, 50-80 A.D. Church organisation is still in its infancy; the rulers are called presbyters and pastors; bishops are nowhere mentioned. There are disputes about the second advent ; prophecy has not yet disappeared ; the vice and greed of the Christian teachers are unsparingly dealt with. The writer feels that the end is at hand. On 5 2-14, see above.

46. Contents.

With 6 begins the vision which Isaiah saw in the twentieth year of the reign of Hezekiah, he discloses it to the king and to Josah his son. In this vision Isaiah is conducted by an angel through the firmament and the six lower heavens and is shown the chief wonders in each (7 *f.*). Next he is raised to the seventh heaven, where he sees all the righteous from Adam downwards. He is then told of the coming advent of the Beloved into the world, and of his crucifixion and resurrection. Finally, he sees the Beloved in the form of an angel, and likewise the Holy Spirit in the same form, and 'the Great Glory'—*i.e.*, God—worshipped by the Beloved and the Spirit (9). In 10, Isaiah hears God commissioning his Son to descend into the world, and thereupon follows an account of this descent. In the concluding chapter are revealed the birth of Jesus and the history of his life on earth down *to* his crucifixion and resurrection and ascension through the seven heavens to his seat at the right hand of God.

The Martyrdom of Isaiah proper (2-3 12 5 2-14), which is of Jewish authorship, was written some time in the first century of our era ; the Vision (6-11) probably about its close ; and the apocalyptic section (3 13-5 1) *circa* 50-80 A.D.

47. Date.

For additional bibliography on this book, see Schürer, *Hist.* 5 145-146 ; Charles, *The Ascension of Isaiah.*

V. THE BOOK OF JUBILEES.—The Book of Jubilees, which is really a haggadic commentary on Genesis, is. important as being the chief monument (practically the sole monument) of legalistic Pharisaism belonging to the century immediately preceding the Christian era. Just as we have the other side of Pharisaism, its apocalyptic and mystical side, represented in the Book of Enoch, so here we have its natural complement in the hard and inexorable legalism to whose yoke, according to the author, creation was subject from the beginning and must be subject for evermore.

48. Book of Jubilees; its value.

Jubilees is not only indispensable to students of the NT and of the history of the Pharisaic movement : it is likewise of first-class importance as a witness to the readings of the Hebrew text of Genesis about the

beginning of the Christian era. In this respect it comes next in worth to 𝔊 and the Samaritan text, and presents us with much earlier readings than are to be found in the Syr. or Lat. versions, or in Targ. Onk. In the matter of determining the respective values of the Samaritan, 𝔊, and Massoretic chronologies its evidence will be practically of decisive weight.

This hook has been variously named at different stages of its career. Its original name seems to have been 'Jubilees,' and not the 'Book of Jubilees.' So we find it in the Syriac fragment, and likewise in Epiphanius, where it is designated τὰ Ἰωβηλαῖα or οἱ Ἰωβηλαῖοι.

49. Name.

It is also called ἡ λεπτὴ Γένεσις in Epiphanius, Syncellus, and others—a title pointing back to בראשית זוטא. This name was given to it not because of its smaller bulk—for it is greater than that of the canonical Genesis—but on the ground of its inferior authority. Other variations of this title are Μικρογένεσις and τὰ λεπτὰ Γενέσεως. In the Abyssinian Church it is named the 'Book of the Division,' from the first words of the inscription at the beginning, and we find still other designations. Thus, in the decree of Gelasius, according to Rönsch's emendation, we find 'Liber de filiabus Adæ, hoc est Leptogenesis.' This name, as Ceriani observed, was given to the book because it contains the names of all the Patriarchs' wives and assigns them a prominent rôle in the course of events—a view that is confirmed by the Syriac fragment. Again, it seems to be identified by Syncellus with 'the so-called Life of Adam'—ὁ λεγόμενος βίος Ἀδάμ;—for he cites as from that book three passages that occur in Jubilees. This *Life of Adam* may have been identical with a part of Jubilees, or a later enlargement of a portion of it. Jubilees is once described as the 'Testament of Moses,' and once as the 'Apocalypse of Moses,' but only by very late writers.

Such being the origin of Jubilees and the conditions under which it was produced, it was naturally written in the sacred language of Palestine. Of this we have direct testimony in Jer. *Ep.* 78, *ad Fabiolam, mansione* **18**, where he discusses a Hebrew word for which he could cite no authority save that of this hook. The entire cast and the idiom of the book confirm the statement of Jerome.

50. Language.

We have further testimony to the same effect in the title of the Syriac fragment, in which the present hook is designated 'The Hebrew Book called Jubilees.' It is, further, impossible to deal with the textual corruptions unless we deal with them on this presupposition. In the case of many of these it is only necessary to retranslate them into Hebrew in order to discover the original misconception or misreading of the Greek translator. Some interesting transliterations of Hebrew words, moreover, still survive in the text.

Finally, fragments of the Hebrew original have come down to us embedded in the Midrashim. In these at times an entire sentence survives, preserving not only the words, hut even their original order, as we can infer from the evidence of the versions.

There were probably four versions of Jubilees—Greek, Syriac, Ethiopic, and Latin. The first two were made from the original Hebrew. Of the *Greek* only some fragments have come down to us in Epiphanius and through such annalists as Syncellus and Cedrenns. Of the *Syriac* only a small fragment, containing the names of the Patriarchs' wives and a few other facts, survives.

51. Versions.

The Ethiopic and the Latin versions were made from the Greek version, not from the original text. The former survives almost in its entirety, and from an exhaustive comparison of the best attainable text with all existing materials we find that it is most accurate and trustworthy. It is, indeed, as a rule, servilely literal.

52. Ethiopic.

It has, of course suffered from the corruptions naturally incidental to transmission through MSS; but it is singularly free from the glosses and corrections of unscrupulous scribes, though the temptation to bring it into accord with the Ethiopic version of Genesis must have been great. Only in about a dozen instances did the temptation prove too great, with the result that changes were introduced into the text in subservience to that version.

Of the Latin version (made, as we have seen, from the Greek) more than a fourth has been preserved.

53. Latin.

First published in 1861 by Ceriani (*Mon. sacra et prof.* tom. I fasc. I, pp. 15-62), it was next edited with great learning' by Ronsch in 1874 (*Das Buch der Jub. unt. Beifüg. d. revidirten Textes der . . . lat. Fragmente*). Rönsch emended the text in many passages; but as he was not aware that it had been corrected in conformity both with 𝔊 and with the Vg., and as further, he had only a late representative' of the Ethiopic version before him, his work is defective and far from final. A critically revised text of these fragments is given in Charles's edition of the Ethiopic text.

The Ethiopic MSS of which there are four, belong respectively to the National Library in Paris (A), the British Museum (B), the University Library in Tübingen (C), and to M. d'Abbadie (D). B is by far the most valuable; next in value comes A; C and D are late and very corrupt. In addition to these MSS, however, there is a vast wealth of materials for the criticism and reconstruction of the text in the Mas. and Sam. Texts, and in the Gr., Syr., Aram., and Lat. ,versions of Genesis; in the fragments of the Greek, Syriac, and Latin versions of Jubilees mentioned above; and in abundant other documents of a less directly serviceable nature. (a) *The Ethiopic Text* has been edited twice—first by Di. in 1859 from two MSS (C, D), and next, by the present writer from A, B, C, D.[1] Though Di. made no use of the critical materials just enumerated in the formation of his text, and it was, accordingly, in no sense a critical edition, it was a great boon to scholars at the time. (b) Three *translations* have appeared: the first by Di. in 1850 from one MS (*i.e.*, C); the second by Schodde (*Bibl. Sacra*, 1885) from Di.'s edition of the text, and the third by the present writer (*JQR*, 1894, 1895) from the text published in 1895 referred to above.

64. Text of Jubilees.

Jubilees cannot have been written later than 70 A.D.; for the temple is throughout supposed to he standing. As the hook repeatedly uses Enoch (1-36 72-104), it cannot have been written much before 60 B.C. Though there is some evidence that would place it nearer the earlier than the later date, we shall leave the date undefined for the present.

55. Date.

The author was a Palestinian Jew and a Pharisee.

56. Author.

Frankel's view (*MGWJ*, 1856, pp. 311-316, 380-400) that it was written by a Hellenistic Jew belonging to Egypt is rendered untenable by the fact that it was written originally in Hebrew. Nor can the writer have been a Samaritan, as Beer supposes (*Das Buch der Jub.*, 1856; *Noch ein Wort üb. d. Buch der Jub.*, 1857); for, whereas the text agrees in turn with MT, 𝔊, Syr. Vg., with Onkelos, and even with the Ar. against all the rest, it never, strange to say, agrees thus with the Samaritan. This evidence is conclusive in itself; but we might further observe that, in speaking of the four places most favoured of God in all the earth, the author enumerates Eden, Sinai, Zion, and the mountain in the East, but not Gerizim. Again, that he is not a Sadducee is proved by the fact that be believes in angels and in the immortality of the soul. Nor, finally, was he an Essene; for, though some characteristics (a highly-developed angelology, the doctrine of the immortality of the soul without the resurrection of the body, the exaggerated reverence for the Sabbath and the number seven) would seem to argue an Essene origin, such an origin is absolutely precluded by the enforcement of animal sacrifice and the absolute silence as to the washings and purifications that were of such importance among the Essenes. Thus, though in some legal questions of less moment (Beer, *Das Buch der Jub.*) the author's views are at variance with traditional Pharisaism, in all essentials he is emphatically a Pharisee of the Pharisees.

That Palestine was the home of the author is deducible in the first instance from the language in which he wrote. A Hellenistic Jew would not have written in Hebrew. Again (not to press other details), the duty of absolute separation from the heathen, which is repeatedly enforced, would have been impossible of fulfilment for any Jew outside Palestine.

There are several lacunae in the hook; but as far as evidence is forthcoming, these seem to be slight. It appears, on the other hand, to be free from interpolations.

57. Integrity.

A curious phenomenon, however, presents itself in chap. 7. Verses 20-39 seem to be an extract from the Book or Apocalypse of Noah, beginning in an indirect form with *v.* 20 and changing into the direct with *v.* 26, whence to the end Noah admonishes his sons in the first person. These verses are similar to the Noachic interpolations in the Book of Enoch (see above, § 24).

The contents of Jubilees may he briefly described as a haggadic commentary on the biblical text, from the creation of the world to the 'institution of the Passover, in the spirit, and from the point of view. of later Judaism. Its aim is to prove the everlasting validity of the law. The work assumes the form of a revelation to Moses, made on Mt. Sinai by the 'angel of the presence' in the first year

58. Contents and character.

1 *The Eth. Vers. of the Heb. Book of Jubilees*, ed. from four MSS. R. H. Charles, M.A., 1895. Clar. Press, Oxford.

of the Exodus. The author thereby seeks to secure a divine sanction for the additions he makes to the biblical narrative. Among these the most important novelty is his chronological system.

In this system the basis of reckoning is the jubilee period of forty-nine years. This jubilee period is subdivided into seven year-weeks of seven years each. Hence, in order to date any event exactly, the author determines it **as** occurring on **a** certain day of a certain month of a certain year in a certain year-week of **a** certain jubilee period. Fifty of these jubilee periods are assumed **as** the interval between the creation and the entrance of the Israelites into Canaan. His year strangely consists of fifty-two weeks (*i.e.*, 364 days), and, in opposition to the Pharisaism of his time he **claims** that the year should be regulated by the movement; of the sun without reference to those of the moon. The dates assigned to the various events, though presenting many difficulties, favour in the main the Samaritan chronology.

Another object of the author is to carry the Jewish cultns back into the patriarchal or even pre-Adamite period.

Thus we are given to understand that the angels observed the rite of circumcision; while, as regards the great annual festivals, the Feast of Weeks was observed by Noah and Abram, the Feast of Tabernacles was first celebrated by Abram about the time of the birth of **Isaac,** and the Day of Atonement was established by Jacob in memory **of** the loss of Joseph. Again, the law regarding the purification of women after childbirth (Lev. **12)** is traced to the fact that Adam was created in the first week and Eve in the second ; to this is due the command ' Seven days for a man-child and two weeks for **a** maid-child.

Certain variations from the prescribed ritual are observable in relation to the festivals. Thus, the injunction of fasting on the Day of Atonement and the exclusion of the uncircumcised from the Passover are omitted; while in the case of the Feast of Tabernacles there is no reference to the custom of drawing water from the pool of Siloam and pouring it out upon the ,altar. Though in the last instance the author agrees with the Sadducees, **it** must he admitted that the practice was **a** Pharisaic innovation and that the Sadducees had the law on their side.

Another notable characteristic of the work is the increased rigonr of many of the Levitical ordinances.

Thus, the man who eats blood is to be utterly destroyed, and the father who gives his daughter, or the brother who gives his sister, in marriage to a heathen is to he stoned to death, and the woman to he burned. Death is to he the universal penalty for breaking the Sabbath ; and the Sabbath is broken by buying or selling, by lighting a fire, by drawing water, by talking of an intended journey, or by lying with one's wife.

Another no less interesting characteristic is the care either to leave unrecorded or to palliate the faults of the Patriarchs as well as to multiply their virtues.

Thus, from the first they were scrupulous observers of the ritual and ceremonial law before its authoritative promulgation on Sinai. There is no mention made of Abram's deceit at the court of Pharaoh; Jacob's answer to Isaac's question 'Art thou my very son Esau?' is cleared from verbal falsehood by representing him **as** answering ' I am thy son. This quibble is found likewise in the Talmud, and may therefore have been **a** stock interpretation of Jewish exegesis. Again, whereas in Genesis Levi is cursed for his share in the destruction of Shechem, in Jubilees he is highly honoured for the same action and his posterity elected to an everlasting priesthood. We find the same view taken by Philo (De *Ebrietate*, **23**).

Akin to the aim just described is the attempt to justify from the standpoint of a later age the severities practised by Israel in their conquest of Canaan.

It is **a** Jewish prototype of Ronsseau's Social Contract. Thus it is represented that in the presence of an angel, Noah divided the earth by lot ambngst his three sons, and bound them and their successors by the most sacred oaths to observe the arrangement. Destruction was invoked on the head of him who transgressed it. According to the sequel, Canaan seized upon Shem's inheritance ; and thus our author justifies the extermination of his descendants by Israel.

As has already been pointed out, though the immortality of the soul is taught, there is no resurrection of the body. In the restored theocracy that is foreshadowed there may be a Messiah. See, further, ESCHATOLOGY, **§ *72*.**

For the literature of this hook see Rönsch, *Das Buch der Jub.* 422-439 ; Schurer in *loc.* ; Charles, The *Book of Jubilees.*

VI. THE ASSUMPTION OF MOSES.—Of this book, which from the twelfth century was regarded as lost, a large fragment was rediscovered by Ceriani in the Ambrosian Library in Milan and published by him in 1861 (*Mon.* tom. i. fasc. i. pp. 55-64). This fragment was part of an old Latin version;' and is written on a palimpsest of the sixth century—the same MS that contains the Latin version of Jubilees—which originally belonged to the monastery of Bobbio.

59. Assumpt. Mos.: its fortunes.

Before this discovery, however, we were, from various sources, in some degree acquainted with the contents of the book.

Thus, the account of the strife between the archangel Michael and Satan about the body of Moses was drawn as we know (Origen, ***De Princip.* 3 21),** from the apocryphal 'hook entitled the *Ascensio Mosis—i.e.*, **ἀνάληψις Μωυσέως.** Many other writers testify to the existence of this apocryph. Besides the reference already noticed in Origen, there are other references or citations in Clem. Alex. (***Strom.* 123 153 615 132);** in Origen (***In Josuam homil.*** 2 1), Didymus Alex. ***(Zn ep.*** *Jud. enarrat.* in Gallandi, *Biblioth.* ***Patr.*** **G 307),** in Evodius, Apollinaris, the Stichometries, and in the ***Acta*** *Synodi Nicænæ*, 2 18. This last reference must he given in full as the passage quoted is found in Ceriani's fragment,—Μέλλων ὁ προφήτης Μωυσῆς ἐξιέναι τοῦ βίου, ὡς γέγραπται ἐν βίβλῳ Ἀναλήψεως Μωυσέως, προσκαλεσάμενος Ἰησοῦν υἱὸν Ναυὴ καὶ διαλεγόμενος πρὸς αὐτὸν ἔφη· καὶ προεθεάσατό με ὁ θεὸς πρὸ καταβολῆς κόσμου εἶναί με τῆς διαθήκης αὐτοῦ μεσίτην. The words quoted are thus rendered in the Latin fragment (1 14) : Itaque excogitavit et invenit me, **qui** ah initio orbis terrarum præparatus sum, **ut** sim arbiter testamenti illius. The rest of the quotations are in the main from the part of this book which is lost.

Of the derivation of our Latin text from the Greek there can be no question. Thus Greek words are transliterated ; as *chedrio* from *κεδρόω* 1 17, *heremus* from ἐρῆμος 3 11, *clibsis* from θλῖψις 37, and *acrobistia* from ἀκροβυστία **83.** Again, we are not infrequently obliged to adopt not the Latin text but the Greek it presupposes, which has been misrendered by the translator. Thus 'ab oriente usque ad occidentem,' which means 'from the east to the west,' is derived from ἀφ' ἡλίου ἀνατέλλοντος μέχρι δυομένου, which means also ' from sunrise to sunset '—the meaning required by our context. For similar instances see 11 11 **18.**' Finally, retranslation into Greek makes it evident that in the case of some corruptions in the Latin the error arose through the confusion of different though similar forms of words : cp 2 7 3 4 **5** 6 11 16. In **4** 1 we have the Greek article rendered by *hic.*

60. Latin based on Greek.

The derivation of our text from a Semitic original was stoutly denied by Volkmar, Hilgenfeld, and others. This position, however, can no longer be persevered in. A Semitic original must now be conceded. It remains a matter of debate whether the balance of evidence is in favour of an Aramaic or of a Hebrew source. Rosenthal decides for the latter ; Schmidt-Merx, Colani, and Carrihe for the former. Notwithstanding all that has been advanced by these three scholars, however, in support of their contention, the evidence points decidedly in the direction of a Hebrew original.

61. Hebrew original.

Rosenthal restores three or four passages by means of retranslation into Hebrew. In Charles's *Assumption of Moses* **(1897)** the necessity of such an hypothesis is shown alike in the Hebrew character of the Latin version and in the possibility of removing most of its corruptions by means of retranslation into Hebrew. Thus in 6 3 6 we must follow the Hebrew presupposed by the Latin , next, in **G 4** there is a play upon words possible only in the Hebrew . **again,** there are Hebrew phrases and constructions reproduced in 1 18 2 4 **7 3 3 12 G 1** 10 2. Finally, it is only through retranslation into Hebrew that we can understand the text or get rid of its corruptions in 4 9 5 5 10 9 10 16 12 **7.**

Schurer has already pointed out ***(Hist.*** 3 *82)* that the Latin version we possess is in reality a 'Testament of Moses,' although quoted in the Acts of the Council of Nicæa as the Ἀνάληψις Μωυσέως, and has conjectured that 'these designations were the titles of two separate divisions of one and the same work, the first of which has been preserved, whereas the quotations in the Fathers almost all belong to the second.' The present writer's studies tend in some degree to support this conjecture.

62. Real name Test. Moses.

Thus in the Latin version (1 15 and **10 14)** Moses speaks of his death **as** an ordinary one, and the same fact undoubtedly was stated in 10 12 before it was interpolated by the editor who joined the 'Testament' and the 'Assumption of Moses' into one look. Thus in **10 12** the text is : 'ernnt enim a morte—receptione—m(ea) usque ad adventum Illius tempora CCL.' Schmidt-Merx omit morte,' and Hilgenfeld omits 'receptione,' these critics failing to see that 'receptione' was introduced by the final

editor into the text of the 'Testament' which recounted nothing of Moses' Assumption, in order to prepare, the reader for the main subject of the added work, the Assumption of Moses.'

Schürer apparently assumes that both the 'Testament' and the 'Assumption' were from one and the same author; but the facts stated above are against this supposition. The Latin fragment is the Διαθήκη Μωυσέως mentioned in the Stichometry of Nicephorus. It is there said to consist of 1100 lines. Of these about half have survived. Some writers have sought to identify this 'Testament' with the Book of Jubilees. This is impossible. Since 4300 lines are assigned to Genesis in Nicephorus' Stichometry, this 'Testament of Moses' would have above 5000 or 6000 if it were the Book of Jubilees, for the latter is much longer than Genesis.

About one-half of the original Testament has been preserved by our Latin Version.[1] It is possible that the latter half dealt with certain revelations about

63. Lost portion. creation made by Moses, and that it closed with his disappearance in a cloud, so that his death was hid from human sight.

We make this conjecture on the ground of the following statement in an old Catena on the Pentateuch (Fabric. *Cod. Pseud. V.T.* ii. 121-122). 'Est quidem in apocrypho mysticoque codice legere, ubi *de creatis rebus subtilius agitur, nubem lucidam*, quo tempore mortuus est Moses, locum sepulchri complexam oculos circumstantium perstrinxisse ita, ut nullus neque morientem legislatorem neque locum videre potuerit, ubi cadaver conderetur.' On the 'bright cloud' see also Jos. *Ant.* iv. 8 *49.*

On the question of the date of the Assumption of Moses the opinions of critics oscillate between the

64. Date. death of Herod the Great and the death of Bar-Cochba. The later date is impossible. Ewald, Wieseler, Drummond, Dillmann, and Schiirer assign it to the first decade after Herod's death; Hilgenfeld assigns it to 44-45 A.D.; Merx to 54-64 A.D., and so also Fritzsche; Baldensperger to 50-70 A.D. On various grounds all these determinations are unsatisfactory. The real date appears to lie between 4 B.C. and 30 A.D. It cannot be later than **30 A.D.** 'Towards the close of chap. **6** it is stated that the sons of Herod should reign for a shorterperiod (*breviora tempora*) than their father—a statement that could have been made only while they were still living, since it is true of Archelaus alone; for Antipas reigned forty-three years, Philip thirty-seven, and Herod himself only thirty-four. The book must, therefore, have been written at the latest less than thirty-four years after Herods death (4 B.C.)—*i.e.*, earlier, at all events, than 30 A.D. The limits may, however, be defined more closely; for the prediction that Herods sons should rule for shorter periods than their father, may owe its origin to the general expectation that the sons of such a wicked king could not long preserve their authority, but still more to the actual deposition of Archelaus in 6 A.D.—an event that would naturally be construed by our author in the light of **a** divine judgment and suggest to him the prediction that appears in the text as to the impending fate of Philip and Antipas. Hence the earliest limit of composition is **7 A.D.**

As for the author, he was not **a** Sadducee; for according to chap. 10 he looks forward to the establish-

65. Author. ment of the Messianickingdom by God in person. Nor is it possible, with Wieseler and Schurer, to regard him as a Zealot; for (1) there is not a single incentive held forth to encourage men to take arms in behalf of the theocracy; (2) the actual advent of the kingdom is brought about, not by any action of the righteous in Israel, but by the archangel Michael (10 1-2) and God himself (10 3-7); **(3)** the author's ideal of duty as regards preparation for the Messianic kingdom is that depicted in 9—*i.e.*, absolute obedienceto the law andnon-resistance. The faithful Israelite was quietly to do his duty and await God's will. The writer, accordingly, glorifies the old ideals cherished and pursued by the Ḥasid and Early Pharisaic party, which the Pharisaism of the first century B.C. had begun to disown in favour of a more active rôle in the life of the nation. See § 81. God would in his own good time interpose in person (10); at all events, he would avenge the death of his servants *(97)*. Our author pours the most scathing invective on his religious and political opponents, the Sadducees, whom in 7 he describes in terms that frequently recall the anti-Sadducean Pss. of Solomon. (Through some inexplicable misapprehension, Schurer and others have regarded this chapter as a description of the Pharisees.) The author, therefore, was a Pharisee, and a Pharisee who was the antithesis of the Zealot exactly in those respects in which Pharisaism differed from Zealotism. His book was designed as a protection against the growing secularisation of the Pharisaic party through its adoption of political ideals and popular Messianic beliefs. To guard against the possible suggestion of an Essene author, we may remark that such a derivation is absolutely precluded by the recognition of animal sacrifices, by the declaration of the speedy coming of the Messianic or Theocratic kingdom, and by the strong sense of national life, unity, and triumph. See Charles's *The Assumption of Moses,* pp. 51-54; and cp ESCHATOLOGY, § 73.

The following is ah outline of the contents of **Ass.** Moses 1 1-9: Introduction. 10-17 Moses tells Joshua that he is about to die, and commits certain books of prophecies to his

***66.* Contents.** safe keeping. In 2 *f.* the subsequent history of Israel down to the captivity is briefly but clearly outlined. In their captivity the tribes remember that all that had befallen them had already been foretold by Moses. In **4,** owing to the prayers of one who is over them (Daniel), God will take pity on them and raise up a king (Cyrus) who will restore some fragments of their tribes to their own land. These will mourn because of their inability to sacrifice to the God of their fathers. Judgment *(5 1)* will overtake their oppressors (the Seleucid kings). Yet they themselves (the Sadducees and the Hasids) will he divided as to what is true, and the altar and temple will he defiled by men who are not priests (as Menelaus, who was a Benjamite), but slaves born of slaves (5 2-4) (the paganising high-priests who were nominees of the Seleucidæ), and many of them (the Sadducean priesthood and aristocracy), moreover, will be respecters of persons and unjust, and their country **will** he filled with unrighteousness **(5** 5-6). Then **(8** 1-5) a fresh vengeance will alight upon them, in which the king of kings (Antiochus) will crucify those who confess to their circumcision, and force them to bear on their slioulders impure idols, and to blaspheme the word. **A** man of the tribe of Levi (9 1-7), whose name is Taxo (*i.e.*, Eleazar [2 Mac. 6 19]; for, as Burkitt has discovered, Taxo is a mistake for Taxoc=ταξωκ=תכסוק uhich by gemetria=אלעזר), will say to his seven sons: 'Let us fast three days, and on the fourth let us go into a cave which is in the field and die, rather than transgress the commands of the God of our fathers. In 6 1-7 we are told of the assumption of royal power by the Maccabees, and of Herod as their successor who is to reign for thirty-four years. **He** will beget sons who will reign as his successors, but for shorter periods. Tden follows (6 8 *f.*) the capture of Jerusalem by a king of the west (Varus). Soon after, Judæa becomes a Roman province. The author next launches out into a scathing denunciation of the Sadducees, of whose injustice, greed, and gluttony we have an account in 7. Thereupon **(10** 1-10) the times are fulfilled, and God appears to judge the enemies of Israel **(10).** Moses is then represented as exhorting Joshua to guard these words and this book (10 11). When Joshua deplores his inability to lead Israel (11), Moses bids him not to depreciate himself and not to despair of the future of his people (12). Here the fragment ends.

67. Bibliography.

Ceriani, *Mon. Sacr.* vol. i. fasc. 1 (1861); Hilgenfeld, *Messias Judæorum* (1869), 435-468, cp *Prol.* 70-76, and *Clem. Rom. Epist.*[2] (1876), 107-135; Volkmar, *Mose Prophetie und Himmelfahrt* (1867); Schmidt and Merx (*Archiv f. wiss. Erforschung des ATs*, I. ii. 111-152, *1868);* Fritzsche, *Libri Apoc. VT* (1871), 700-730; cp Prol. *32-36*; Drummond, *The Jewish Messiah* (1877), *74-84*; Baldensperger, *Das Selbstbewusstsein Jesu* (1888), 23-31, 114-118; Deane, *Pseudepigr.* (1891), 95-130; Schiirer, *Hist.* 5 73-83; Charles, *The Ass. of Mos.* (1897). For complete bibliography, see the two works **last** mentioned.

[1] It is to be remarked that we have in this Latin Fragment a clear instance of dislocation of the text. The perception of this fact removes some of the main difficulties in the way of interpretation. In order to recover the original order, we have to restore 8 *f.* to their original position, before 6. For the grounds of this restoration of the text, see the present writer's edition of the hook.

VII. THE TESTAMENTS OF THE XII. PATRIARCHS.—The earliest reference to this book by name is in Origen in his *Hom. in Josuam*, 156 (Ed. Lommatzsch 11143): 'in aliquo quodam libello qui appellatur testamentum duodecim patriarcharnm, quamvis non habeatur in canone, talem tamen quendam sensum invenimus, quod per singulos peccantes singuli Satanæ intelligi debeant' (cp Reuben 3). It is possible, indeed, that in the preceding century the ideas of *Fragment* 17 in Stieren's edition of Irenæus (1836-837) are derived from this book—*ἐξ ὧν* 6 *Χριστὸς προετυπώθη καὶ ἐπεγνώσθη καὶ ἐγεννήθη· ἐν μὲν γὰρ τῷ Ἰωσὴφ προετυπώθη· ἐκ δὲ τοῦ Λευὶ καὶ τοῦ Ἰούδα τὸ κατὰ σάρκα, ὡς βασιλεὺς καὶ ἱερεὺς ἐγεννήθη· διὰ δὲ τοῦ Συμεὼν ἐν τῷ ναῷ ἐπεγνώσθη . . . διὰ δὲ τοῦ Βενιαμίν, τοῦ Παύλου, εἰς πάντα τὸν κόσμον κηρυχθεὶς ἐδοξάσθη*. This conjunction of Simeon and Levi is found in Sim. 7; Lev. 2 8; Dan 5; Gad 8; Jos. 19; Benj. 11. Since, however, it is now demonstrable that the Christian elements in the Testaments are due to interpolation, it is not possible at the present stage of criticism to determine the relative chronology of these elements and the writings of Irenæus.

68. Test. xii. Patr.; its fortunes.

The passages in Tertullian *Adv. Marc.* 5 1, *Scorpiace* 13 which most critics from Grabe onwards have regarded as based on Benj. 11, are due, as Schiirer has already recognised, simply to the patristic interpretation of Gen. 4927. This eleventh chap. of Benj., which contains the striking account of Paul, is not found in the Armenian version, and is for the most part wanting in the Greek MS R. On these and on other grounds we may safely regard it as one of the latest of the Christian interpolations.

There is possibly an allusion to this book in the contemptuous words of Jerome, *Adv. Vigilant.* 6. The Testaments are next mentioned in the Stichometry of Nicephorus, in the *Synopsis Athanasii* as well as in the anonymous list of books edited by Montfaucon, Petra, and others. In these lists the book is simply called *Πατριάρχαι*. After this date the Testaments are lost to knowledge till their reappearance in the thirteenth century, when Robert Grosseteste, Bishop of Lincoln, translated them from Greek into Latin. The MS from which the translation was made is the tenth century Cambridge MS of this book (Sinker). This Latin version was the parent of almost all the European versions.

69. Title.

The work consists, as its present title indicates, of the dying commands of the twelve sons of Jacob to their children. Each Testament deals with a fresh and special side of the ethical life, with some virtue or vice which finds apt illustration in the life of the particular patriarch. Thus, according to the titles in Sinker's text, Simeon deals with the vice of envy, Zebulun with compassion and mercy, Dan with anger and lying, Gad with hatred, Joseph with chastity, and Benjamin with a pure mind. These titles are appropriate; but in manuscripts O and R all mention of the virtues and vices is omitted; in P they are generally wanting, and when they are given they differ in all but two instances from Sinker's text, while in the Armenian version they are wanting in Simeon, Issachar, Zebulun, and Benjamin; for 'concerning chastity' in the title of the Test. Joseph we have 'concerning envy'; they differ in the case of Levi, Gad, and Asher; only in the case of Judah do they give a divided support to the Cambridge MS, which Sinker follows. We may, therefore, regard the title of each Testament as originally consisting of the word *Διαθήκη*, followed by the name of the patriarch to whom it was attributed. It is possible, moreover, that the title was originally still shorter—*i.e.*, as we find it in the Oxford MS, merely the name of the patriarch. The fact that in the Stichometry of Nicephorus and in the Synopsis Athanasii, as well as in the anonymous list of books edited by Montfaucon, Petra, and others, this book as a whole is designated simply *Πατριάρχαι* points in the same direction; and this evidence is the more weighty since the adjoining books in these lists have their full titles given. This supposition receives further support from the initial words of the Testaments themselves. In the case of seven of the Testaments the contents are simply described as the *λόγοι* of the Patriarchs, which they spake or ordained (*λαλεῖν, εἰπεῖν*, or *διατίθεσθαι*) before they died. It is only in the case of the remaining five that each is described as a *διαθήκη* which the patriarch spake, enjoined, or ordained (*λαλεῖν, εἰπεῖν, ἐντέλλεσθαι, διατίθεσθαι*). It is probable, therefore, that the original title of the entire book was 'The Twelve Patriarchs.'

70. Contents.

In the next place, it is noteworthy that in each of the Testaments three elements are distinguishable. (1) In each instance the patriarch gives a brief or detailed account of his life, in which his particular virtues or vices are vigorously emphnsised. The biblical notices of his life are expanded and enriched after the manner of haggadic Midrash. In a few instances their place is taken by materials that conflict directly with the biblical narrative. (2) The patriarch next proceeds to press upon his children a series of exhortations based upon and naturally suggested by the virtues or the vices conspicuous in his own career; they are to imitate the one and to shun the other. (3) Finally, the patriarch gives utterance to certain predictions which bear upon the future of his descendants, and the evils of overthrow and captivity which they will entail upon themselves by their sins and apostasies, and their breach with the tribes of Levi and Judah. These predictions are generally *(a)* of purely Jewish authorship; but many are *(b)* distinctively Christian.

71. Compositeness.

To account for the difficulties which confront us in this work, Grabe (*Spicileg. Patrum*[2] [1714], 1 129-144 335-374), was the first to suggest that the book was written by a Jew and subsequently interpolated by a Christian. This hypothesis was for the time so successfully combated by Corrodi (*Krit. Gesch. des Chiliasmus*, 2 101-110) that most subsequent writers, such as Nitzsch, Liicke, Ritschl, Vorstman, Hilgenfeld, Dillmann, and Sinker, have practically ignored the question of the integrity of the book and confined themselves mainly to the discussion of the religious and national affinities of the author.

Nitzsch (*De Test. xii. Patriarch. libro VT pseud.*, Wittenberg, 1810) describes the author as a Jewish Christian of Alexandria who had imbibed many of the Essene doctrines that were then current. Ritschl (*Entsteh. der altkathol. Kirche.* 1. Aufl. 322 *ff.*) assigns the book to a Gentile Christian, appealing principally to Benj. 11 (a chapter really due to Christian interpolation: see § 68). Ritschl's view was vigorously assailed by Kayser ('Die Test. d. Zwölf Patr.' in Reuss and Cunitz's *Beitr. zu den theol. Wissenschaften* [1851], 107-140), who on several grounds derives the hook from Ebionitic circles, reviving on a large scale Grabe's theory of interpolation in order to arrive at this result. Kayser's treatise was in turn examined by Vorstman (*De Test. xii. Patriarcharum origine et pretio*, 1857), who, after a detailed criticism of Kayser's arguments, concluded that the Testaments present no trace of Ehionism, but were the work of a Gentile Christian. Hardly had Vorstman thus vindicated the view of Ritschl when a second edition of this scholar's work (see above) appeared, in which his former contention (pp. 172-177) was abandoned as impossible, and the theory of a Nazarene authorship was advocated. Ritschl's first view: however, has received the continued support of Hilgenfeld (*ZWT* [1858], 395 *ff.* [1871] 302 *ff.*), whilst Langen (*Das Judenthum in Pal. zur Zeit Christi*, 140-157) and Sinker (*The Test. xii. Patr.* [1869], 16-34; art. 'Test. xii. Patr.' in Smith's *Dictionary of Christian Biography*, 4 865-874) hold fast to the theory of a Jewish Christian authorship.

If there were no other methods of determining the questions of authorship and date than those pursued by Nitzsch and his successors, finality or even progress in such matters would be a sheer impossibility. To Schnapp (*Die Test. der xii. Patr. untersucht*, Halle, 1884), however, is due the credit of lifting the criticism of this book out of the arena of fruitless logomachies by returning to Grabe's hypothesis of Christian interpolation of an originally Jewish work. Schnapp's theory is that in its original form the book consisted of biographical details respecting each of the patriarchs and of exhortations suggested by these details. Thus the work com-

prised only two of the three elements mentioned in the preceding section (§ 70). Subsequently, however, the book was worked over by a Jewish writer, who inserted, generally towards the end of each Testament, sections dealing with the future fortunes of the tribes and other matter of an apocalyptic nature. Finally, at a later period still, the book thus enlarged was revised by a Christian, who in some passages merely modified the text by slight changes, but in others made large interpolations. Thus we have three writers concerned in the Testaments: the original Jewish author, the Jewish interpolator, and the Christian interpolator. It is not difficult to prove that in the main this theory is true.

Thus in the Testament of Joseph we have two partially conflicting accounts derived from different authors—*i.e.*, 1-10*a*, and 106-18. As early as **1869**, indeed Sinker suggested a composite authorship as the solution of 'certain difficulties in the narrative, but he made no attempt to verify this hypothesis, and so it was reserved for Schnapp to establish beyond question the dual origin of this Testament and the other Testaments. The same compositeness is observable on a smaller scale in Benj. **2**, where 2*b* conflicts with 2n and with every other reference to the same subject in the rest of the Testaments. Again, in Levi 2 ὡς δὲ ἐποιμαίνομεν . . . 6 ἐν τῇ καρδίᾳ μου we have **a** large addition which conflicts with the words before and after. Levi 8 *f.* ἤλθομεν εἰς Βεθήλ is open to the same criticism. Again, in Dan 5, in adjoining sentences, Levi is commended as the guide and stay of Israel and denounced as the leader in Israel's apostasy. It is needless to multiply such instances further. The presence of additions to the list from a Jewish interpolator is unquestionable.[1]

It is, however, no less certain that all the Christian passages have been inserted in the text not, as Schnapp supposed, by a single Christian interpolator, but by a succession of such interpolators.

The grounds for this conclusion will he found in Conyheare's valuahle article 'On the Jewish authorship of the Twelve Patriarchs' (*JQR* ['93], **375-398**). By collating the Armenian version with the Greek text of Sinker, this scholar has shown that most of the Christian passages in the latter are not to he found in the former. Thus when the Greek MS used in making the Armenian version was written, the process of Christian interpolation had advanced only a short way in the direction in which later it progressed so far. In the Armenian version we have thus a striking confirmation of the critical sagacity of the scholars who saw in the Testaments a Jewish work interpolated later from Christian sources. With the fresh materials at our disposal, there is **a** splendid opportunity for a critical edition of the text, and **a** scientific edition of the work in which the various elements will he duly discriminated, their dates as far as possible determined, and their hearing on history elucidated.

We have now arrived at a stage when we are in a position to consider the question of the original language of the Testaments. Apart from Grabe, no notable critic has advocated a Hebrew or Aramaic original. This is only what might be expected, since nearly all the students of this book believed in its integrity and Christian authorship. However, now that by means of external and internal evidence we have come to see that the book was originally Jewish, the question as to its original language can no longer be evaded. On two grounds the present writer is inclined to advocate a Hebrew original. Space does not suffice for dealing with the first here. Let it merely be observed that fragments have been found in the Testaments which are not explicable on the assumption of a date later than 100 B.C. This and other kindred questions will be dealt with at length in the present writer's forthcoming edition of the Testaments. The second reason for supposing a Semitic origin is to be found in the language. Dr. Gaster ('The Hebrew text of one of the 'Test. xii. Patr.' *PSBA*, Dec. 1893, Feb. 1894) gives some evidence which points in this direction.

72. Language.

In the article just referred to, indeed, he publishes what he claims to he the 'actual Hebrew text of the Testament of Naphtali' entitled צוואת נפתלי. 'In this text,' he writes, 'we have undoubtedly the original version of the Testament, free from any interpolation.' He adds: 'The Greek counterpart of the Hebrew makes no sense and has no meaning at all: while the Hebrew is rounded off and complete, and perfectly clear. It is not necessary to traverse these statements at any length

[1] Most of Schnapp's conclusions have been accepted by Schürer (Hist. 5 **114-124**).

First of all, the style of the Hebrew is not earlier, as Dr. Neubauer informs us, than the 7th or the 8th century A.D. In the next place, even if it were early, it can lay no claim to being the original of the Greek 'Testament. All that could he urged is that the two texts possess some material in common. Their aim and their spirit are as antagonistic as possible. This Hebrew Naphtali, in fact is a strong polemic against Joseph, whereas in the Greek Test.' xii. Patr. as well as in Jubilees, Joseph is universally extolled for his goodness and virtue, and the various patriarchs are punished in proportion as they are hostile to Joseph. By the name of Joseph in this polemical treatise we are probably to understand the ten tribes and their successors the Samaritans. Though this treatise was probably composed long after the Christian era, it is based on old materials, some of which are common to it and the Greek Test. Naph.; and thus Gaster is probably right in observing that in chap. 6 the text must he corrupt where the ship that comes sailing by is said to he μεστὸν ταριχῶν, ἐκτὸς ναυτῶν καὶ κυβερνήτου. The μεστὸν ταρίχων—'full of salt fish'—cannot he correct. It was probably due to **a** corrupt dittography of בְלֹא מֶלַח, as מלא מֶלַח, for in the Hehrew 'Testament' the text runs והנה אנייה הולכת בלב ים בלא מלח ובלא איש.

Subjoined are some of the arguments for a Hebrew original.

(1) Hebrew constructions and expressions are frequent. Thus, συνιὼν ἐν τῷ νόμῳ (Reub. 3)= בָן בתורה; ἐναυ τῷ ἐξελέξατο (6)= בחר ב; πάντας αὐτούς (Jud. 1)=כֻלָּם, βαρύς (*ib.*)=large—*i.e.*, כבד; βέθ (9) transliteration of בת: ποιεῖν μετ' αὐτοῦ κρίσιν (Joseph. 12)=עשה משפט עם, etc. (2) Paronomasiæ, which are lost in the Greek hut can be restored by retranslation into Hebrew, are frequent. Thus in Sim. 2 ἡ μήτηρ μου ἐκάλεσέ με Συμεῶνα ὅτι ἤκουσε κύριος τῆς δεήσεως αὐτῆς=ותקרא אמי את שמי שמעון כי שמע אל תפלתה. In Levi 11 ἐκάλεσε τὸ ὄνομα αὐτοῦ Γηρσάμ. ὅτι ἐν τῇ γῇ ἡμῶν πάροικοι ἦμεν=ותקרא את שמו גרשם כי גרים היינו בארצנו; ἐκάλεσεν αὐτὸν Μεραρὶ ὅ ἐστι πικρία μου=ותקרא את שמו מררי הוא מררי; Ἰωχαβέδ . . . ἐτέχθη ἐν Αἰγύπτῳ· ἔνδοξος γὰρ ἤμην=יכבד נולדה במ׳ כי נכבד אני. In Zab. 1 ἐγώ εἰμι Ζαβουλών, δόσις ἀγαθὴ τοῖς γονεῦσί μου=זבולן הוא זבד טוב. In Naph. 1 ἐν πανουργίᾳ ἐποίησε Ῥαχὴλ . . . διὰ τοῦτο ἐκλήθην Νεφθαλείμ=נפתלה רחל . . . לכן נקראתי נפתלי. In the closing words of this same chapter we have two paronomasiæ on the name Bilhah. ἔτεκε τὴν Βάλλαν, λέγων· καινόσπουδός μου ἡ θυγάτηρ· εὐθὺς γὰρ τεχθεῖσα ἔσπευδε θηλάζειν=ילד את־בלהה לאמר בהלה בתולתי כי . . . בהלה לינק. In Issach. i. διὰ τὸν μισθὸν ἐκλήθην Ἰσάχαρ=בשכר נקראתי יששכר. The Hebraisms given in no. 1 might occur it is true, in an Hellenistic Greek original; hut it is otherwisd with regard to the 'linguistic' phenomena just dealt with. These undoubtedly postulate **a** Hebrew original. (3) A third and final argument enforces the same postulate. There are certain passages, obscure or unintelligible in the Greek, which become clear on retranslation into Hebrew. Thus in Zab. **4** ἔβαλον ἐσθίειν is unintelligible Greek. This is the text of C and **O**. R and P correct the text, the former giving ἐκάθισαν ἐσθίειν, and the latter ἤρξαντο ἐσθίειν, both of which yield an excellent sense. They are, however, merely late emendations, and we must therefore start from the best attested text ἔβαλον ἐσθίειν=ישימו לאכל='they served up food.' It is possible, indeed, that the idea of R is right, and that ישימו is corrupt for ישבו. Hence 'they sat down to eat.' In Gad **4** it is obvious from the contrast instituted between ὀλιγοψυχία and μακροθυμία that we must take the former not in its natural meaning as 'faintheartedness' but as 'impatience.' Hence we have here **a** mistranslation of קצר רוח. Exactly the same contrast appears in Prov. 25 15, and the same false rendering in 𝔊. Again, in Gad 7, ἀφαιρεῖται αὐτὰ & κακοῖς must mean 'He taketh them (*i.e.*, riches) away from the wicked,' or 'when [*men*] are wicked." Thus ἐν κακοῖς seems due to confusing ברשעים and מרשעים, and should be ἐν κακοῖς.

Before leaving the question of a Hebrew original it will be well to notice some of the arguments advanced by Mr. Sinker in favour of the original being Greek.

(1) He urges that the very title αἱ διαθῆκαι κ.τ.λ. is against the hypothesis of a Hebrew original. But it is probable that the title was merely οἱ ιβ' πατριάρχαι; sees **69**, end. (2) He argues that such paronomasiæ as ἀθετεῖν, νουθετεῖν (Benj. **4**); ἀναίρεσις, ἀφαίρεσις (Judah 23); ἐν τάξει, ἄτακτον; and τάξις, ἀταξία (Nap. 2 3) imply a Greek original. As regards the first pair, they are late interpolations, since the passage in which they occur is wanting in the Armenian version and in **O R**. As regards the second pair, P reads ἀναίρεσις in both cases, R omits ἀφαίρεσις, and the Armenian version omits ἀναίρεσις. It is probable, therefore, that there was no paronomasia in the early Greek version. There is no weight attaching to the other paronomasiae cited. **(3)** Again, Mr. Sinker speaks of the use of certain philosophical terms as favouring a Greek original. But these are found also in 𝔊. **(4)** Again, the use of 𝔊 in Judah **24**, which he presses in favour of a Greek original, is no longer a valid argument, since we find from the Armenian version that the passage in which it occurs is a Christian interpolation.

We may, therefore, reasonably conclude that the groundwork of the Testaments was originally written

in Hebrew. The additions of the Jewish interpolator were, as far as I have examined them, in the same language. Christian interpolations were introduced at the close of the first century of the Christian era, and some probably as late as the third or the fourth.

73. Versions. The earliest versions were the Greek, the Syriac, and the Armenian. Of the *Syriac* version only **a** fragment survives, preserved in the British Museum *(Cat. of **Syriac** MSS* Cod. 86180). Of the *Armenian* version six MSS, varying in date from 1220 to 1656, are in Venice (in the Library of the Mechitarists of San Lazzaro); one, of 1388, in Vienna; another, of the fourteenth century: in the library of Lord de la Zouche; and **a** ninth, in the possession of the British and Foreign Bible Society. An edition of the Armenian version by the Mechitarist Fathers is soon to issue from the press. No trace has as yet been discovered of **a** ***Latin*** version anterior to that of Grosseteste in the thirteenth century. This version and the later European versions are of no critical worth. There is also an old *Slavonic* version published by Tichonrawow in the *Denkm.* ***der altruss. Apocri. Lit.***, St. Petersburg, 1863.

74. The Greek MSS. Four[1] of these MSS have already been made known to the public: the Cambridge MS of the tenth century, and the Oxford MS of the fourteenth, through Sinker's edition of the Greek text, the Vatican MS of the thirteenth and the Patmps MS of the sixteenth through the Appendix he published in 1879. These four MSS are designated by their editor respectively as C O R P, and this notation has been followed in the present article.

75. Date. It has already been observed that the process of Christian interpolation probably extended from the close of the first century A.D. to the fourth. As regards the apocalyptic sections (see ESCHATOLOGY, § 61), which are due to a Jewish interpolator, we have no means at present of determining their date with any exactness. Some of them are the oldest portions in the book, and were probably written in the second century B.C.; but some of them are very much later, since they contain citations from the Ethiopic and the Slavonic Enoch. As far as the present writer has examined them, he is inclined to regard them as all springing from a Hebrew original. The date, therefore, of these interpolations may possibly extend from the second century B.C. to 30 **A.D.** It may be added, partly on the evidence of the Armenian version and partly from the context, that it is clear that in Levi 15, Judith 23, and Dan 5, there are no references to the Roman destruction of the temple in 70 A.D. The groundwork may have been written about the beginning of the Christian era. We can hardly suppose it to be based upon Jubilees, for it never mentions it; yet, since it possesses in common with it a vast mass of biographical details as well as the same chronological system, it is natural to regard both works as almost contemporary and as emanating from the same school of thought.

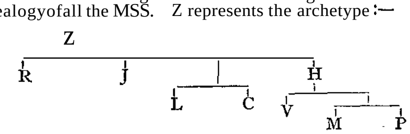
76. Christology. No attempt has been made to give a systematic statement of the Christology, since the passages relating to this subject are derived-not from one writer or period, but from a variety of scribes and times. The value, therefore, of the Christological portions in this book is slight.

77. Pss. Sol.; its fortunes. VIII. THE PSALMS OF SOLOMON.—Very little is known of the early history of these psalms. Only six direct and undoubted references to them are found in early literature.

Four of these occur in catalogues of canonical and uncanonical books—viz., in the *Synopsis Athanasii*, the Stichometry of Nicephorus, the 'Sixty Books,' and the table of contents in the Alexandrian MS. The fifth reference is found in the fifty-ninth canon of the Council of Laodicea, which ordains ὅτι οὐ δεῖ ἰδιωτικοὺς ψαλμοὺς λέγεσθαι ἐν τῇ ἐκκλησίᾳ, οὐδὲ ἀκανόνιστα βιβλία, ἀλλὰ μόνα τὰ κανονικὰ τῆς παλαιᾶς καὶ καινῆς διαθήκης. The sixth belongs to the twelfth century, and consists merely of **a** note on this canon. With doubtful references we have here no concern.

[1] Mr. Sinker has since discovered two other Greek MSS; and these six MSS, with the other versions, he is using as the foundation of **a** new Greek Text which, we hope, will see the light soon.

It is obvious, therefore, that the book never attained a large circulation. On the other hand, as Ryle and James point out, 'where it was read' it was 'read with respect'; for 'it is the solitary instance of an OT book which, from being merely ἀντιλεγόμενον, became ἀπόκρυφον.' As belonging to the former it appears in the first two lists above mentioned; as an ἀπόκρυφον it is enrolled in the 'Sixty Books.'



78. Extent. It is notable in the next place that, whereas these psalms are designated in the first two lists as ψαλμοὶ καὶ ᾠδὴ (Fabricius ᾠδαὶ) Σολομῶντος and ψαλμοὶ καὶ ᾠδαὶ (*varia lectio*-ὴ)[1] Σολομῶντος, στίχοι, ͵βρ', in the next two they are described simply as ψαλμοὶ Σολομῶντος, with the addition of ιή in the case of A. The book, therefore, circulated as early as the fifth century in two forms: one consisting simply of the eighteen 'Psalms of Solomon,' the other of these together with certain Odes. The first form is the older. The second probably originated in an attempt to supplement a defective edition of the first by certain odes or songs, partly of Jewish, partly of Christian, authorship, that were current under Solomon's name. For if we accept the number of στίχοι assigned to the psalms in the MSS (*i.e.*, 1000), we must regard the present psalms as deficient to the extent of 300. On the other hand, as the Stichometry of Nicephorus assigns 2100 στίχοι to the psalms and the odes combined, the odes themselves must have been about the same length as the psalms. Of the odes only five have been preserved. These are edited in an appendix to the edition of Ryle and James.

79. Text. Up to the present, five MSS of this book have been found: but of these the Augsburg MS has long been lost, though we possess **a** record of its readings in de la Cerda's edition, which was based upon it. The second codex is that of Vienna (=V). This MS was collated by Haupt for Hilgenfeld's two editions (*ZWTh.* [1868], 133-168 and *Messias Judæorum*, 1869, pp. xi-xviii 1-33); but the collation has been recently shown to be most inaccurate. The next edition is that of Geiger, ***Der Psalt. Salomo's herausg. u. erkl.*** (1871), based on the same critical materials as Hilgenfeld's. Though agreeing with Hilgenfeld as to the date and situation, Geiger maintains, in opposition to him, the Hebrew original. Fritzsche's edition was published in the same year (*Libri apoc.* ***VT*** *græce*, 569-89); and that of Pick in 1883 (*Presb. Rev.* 775-813). The third codex is the Copenhagen one (=H), to which attention was first called hy Graux in the ***Rev.*** *Crit.* (1877) 291-293. The Moscow (=M) and Paris (=P) MSS were discovered and collated hy Gebhardt. All these authorities have been used in the edition of Ryle and James (ψαλμοὶ **Σολομῶντος, *The Psalms of the Pharisees*, 1891).** In this edition, eminent alike for its learning and for its critical insight, the reader will find everything worth knowing on the subject.[2] For the remaining literature on these psalms we mnst refer the student to this **work** (*Introd.* 13-21), and to Schür. ***(in loc.)***; but we must not forget two of the most fruitful studies that have yet been made—namely, an article by Movers in Herder's *Kirchen-* ***Lexicon*** (1847), and an Appendix to We.'s ***Die Phar. u. Sadd.*** (1874), which contains the translation with notes.

The date must be determined by the references to

[1] Ryle and James make it clear that in both cases 'we should read the plural, against the best MSS.'

[2] Since the above account was written two new editions of the text have appeared. The first is that of Swete ***(The OT in Greek,*** 3765-787). This editor has made a valuable contribution to the criticism of the text by means of a hitherto uncollated MS (which Gehhardt designates R) belonging to the Vatican. According to Gehhardt, however, his collation of this MS is deficient in point of accuracy. The second edition is that of **O.** von Gehhardt (ψαλμοὶ Σαλομῶντος—*Die Psalmen Salomonis zum ersten* ***Male*** *mit Benutzung d.* ***A****thoshandschriften und* ***d. Cod. Casanatensis,*** Leipzig, 1895). In the formation of his text Gebhardt has used the MSS **C** H J L R. Of these only H (the Copenhagen MS) was used by Ryle and James, and H R by Swete. Hence C J **I**, are here used for the first time. These are respectively the Codd. Iberiticus, Laura-Klostu, and Casanatensis. The remaining MSS, M P **V,** Gebhardt regards as not deserving consideration. He gives the following genealogy of all the MSS. Z represents the archetype:—

contemporary events; and, as these are many and varied, there will be little difficultyin assigning a definite period to the activities of the authors.

80. Date.

The book opens with the alarms of war (1 2, 8 1) in the midst of a period of great material prosperity (1 3 *f.* 8 7); but the prosperity is only seeming : from their ruler to the vilest of the people they are altogether sinful (17 21 *f.*). The king, too, belongs to the family that has usurped the throne of David (17 6-8). A righteous judgment, however, speedily comes upon them. A hostile army advances against them, led by a 'mighty striker,' who came from the ends of the earth (8 16). The princes of the land go forth to meet him with joy, and greet him with the words 'Blessed is thy path ; come ye, enter in with peace' (8 18). When) he has established himself within the city he seizes its strongholds (8 21); he casts down its fenced walls with the battering ram (2 1). Then the Gentiles tread Jerusalem under foot (2 20) ; yea, they pollute even the altar with their presence (2 2). Its princes and wise counsellors are put to the sword, and the blood of its inhabitants flows like water (8 23); its sons and daughters are carried away captive *to* the West (8 24 17 14) to serve in bondage (2 6), and its princes to grace the triumph of their conqueror (17 14). But the dragon who has conquered Jerusalem (2 29), aimed at lordship of land and sea, and thought himself to be more than man, at last meets with shameful death on the shores of Egypt, and there is none to bury him (2 30 *f.*).

There can be little doubt now as to the interpretation of these facts. The family that had usurped the throne of David are the Asmonæans, who, since 105 B.C., had assumed the regal name. The 'mighty striker' who comes 'from the ends of the earth' is Pompey. The princes who welcomed his approach are Aristobūlus 11. and Hyrcanus, II. When the followers of the latter opened the gates to Pompey, the party of Aristobulus shut themselves up within the temple, where they were besieged by Pompey and their defences battered down with battering-rams. The massacre that follows, and the carrying away captive *to the West* of princes and people, agree only with the capture of Jerusalem by Pompey. Finally, the circumstances attending the death of the conqueror on the shores of Egypt recall the death of Pompey in a mahner that cannot be misconceived.

We conclude, therefore, that the second psalm was written very, soon after the death of Pompey in 48 B. C., and that 1, 8, 17 were composed between 63 and 48, as they presuppose Pompey's capture of Jerusalem but show no knowledge of his death. Psalms 5, 7, 9, 13, and 15 seem, to allude to the same sequence of events as 1, 8, and 17, and therefore to belong to the same period. In 4 and 12, on the other hand, 'the sinners' are denounced ; but as yet no visitation by the Gentiles is spoken of, nor any interposition of the Gentiles in Jewish affairs foretold. Hence these psalms are probably anterior to 64 B.C. Psalms 3, 4, 11, 14, and 16 betray no distinctly historical colouring ; but there is nothing in them which requires us to assume different authorship and date from those of the other psalms. We may, therefore, with Ryle and James, safely assign 70-40 B.C. as the limits within which the psalms were written.

It may he added that Movers, Del. and Keim have identified the invader of Palestine with Herod ; but this is impossible on many grounds ; and just as many difficulties are against Ew.'s identification of this personage with Antiochus Epiphanes. In fact, all modern critics support the view advocated above.

81. Authorship.

The authors were clearly Pharisees. Thus they divide their countrymen into 'righteous' (*δίκαιοι*; 2 38 *f.* 33-5 7 *f.* 14 49 etc.) and 'sinners' (*ἁμαρτωλοί*; 238 3 13 49 13 5 6 7 10), 'saints' (*ὅσιοι*; 3 10 47 840 etc.) and 'transgressors' (*παράνομοι*; 4 11 13212 7 12 1-4 17 27), of whom the former were the Pharisees and the latter the Sadducees. They assail the 'sinners' for having usurped the throne of David (17 5 8) and laid violent hands on the high-priesthood (176). This assault on the Asmonæan house evidently emanates from a Pharisee.

The authors further denounce the priests for polluting the holy things by their uncleanness and their neglect of the true observances (2 3 5 8 13 26), and likewise for outdoing the heathen in their abominations (18 8 9). Their attitude, moreover, to the law, their conception of the theocracy, their ideal of the bearing of a righteous man in the case of Gentile oppression, all alike mark them out as belonging to the Pharisaic school. To the same school appertains the doctrine taught regarding future retribution and the Messiah. In regard to the last, Ryle and James observe with justice that the Messianic conception in these psalms 'marks the revolution which had passed over Pharisaic thought since the time, not a century before, when Israel's mission in the world was identified only with the fulfilment and dissemination of the law. . . . The heroic deeds of Judas Maccabæus and his brothers had rekindled the ardour of the people for a Jewish dynasty and a Jewish kingdom ; and the Pharisaic supporters of a theocracy were powerless so long as their teaching showed no sympathy with this patriotic enthusiasm.' **But** as it was hopeless to look for Israel's redemption to the helpless and hated later Asmonaeans, so it is just at this crisis that the author of these psalms 'combines the recognition of the failure of the Asmonæan house with the popular enthusiasm for a Jewish monarchy' (p. 57). Thus the Pharisees 'appealed to the patriotic feelings of those who had no power to appreciate the abstract beauty of the old legalism. By its hope for a "son of David" it proclaimed the downfall of the Levitical Asmonaan house. By its ideal reign of "wisdom and righteousness," it asserted the fundamental Pharisaic position that the law was supreme. Thus 'the Messianic representation of our seventeenth psalm marks the stage at which Pharisaic thought passed beyond the narrow limits of its earlier teaching, and availed itself of the popular aspiration for an earthly kingdom.' This step, however, 'entailed upon the theocratic party no policy beyond the exercise of patience till God should raise up the king, and until then the minute observance of this law' (p. 58). Against the attitude adopted by the writers of this book the *Assumption of Moses* is a protest from beginning to end (see above, § 65).

We give below (§ 85) some grounds for assuming that pss. 1-16 and 17-18 are due to different writers.

82. Place.

As the main interests of the psalms centre in Jerusalem, the writer probably lived in that city.

It is 'the City of the Sanctuary' (84); in it shall the song of triumph be sung when God brings hack its children from the east and from the west (11 1-3). Though Jerusalem has now been trodden under foot by the Gentiles (2 2), the Messiah will cleanse it from all such pollution (17 25 33), and thither all the nations of the earth will go up to see the Messiah's glory (17 34). The psalmist's indictment of the Sadducean members of the Sanhedrim (4 1), and his account of their vices and ahominations, are best understood as coming from a contemporary inhabitant of Jerusalem. To the writer of psalms 2, 8, and 17 that city is the centre of all the world, and the history of other nations or world-empires is of moment only in as far as it connects itself with 'the Holy City.'

83. Language.

The circumstances connected with these psalms point undoubtedly to a Hebrew original—*i.e.*, their composition, *circa* 70-40 B.C., by a Pharisee residing in Jerusalem :—and. notwithstanding Hilgenfeld's strong advocacy of 'a Greek original, all modern scholars admit that the psalms were composed in Hebrew.

This fact was first established by Geiger in opposition to Hilgenfeld's view. It has further been substantiated by Ryle and James with a fulness and insight that cannot fail to win conviction (*Introd.* pp. 77-87). As for the Greek translation, we may provisionally accept the date assigned by the editors just named, who, by a hypothetical train of reasoning, show that it 'is not later than the middle of the first century A.D.'

84. Greek version.

85. Eschatology.

We will now sketch in a few words some of the teaching of these psalms regarding the Messiah and the resurrection. First, in regard to the Messiah, the writer of psalm 17 returns to the conception of the prophets and describes him as 'the son of David' (17 23). He calls him also 'the Anointed One' (v.36, cp 18 6 8)—a title that had been applied a few years before to the ideal Messianic king in association with supernatural attributes (Enoch 48 10 52 4). Here, however, the Messiah is a man and nothing more,

He is to be raised up by God himself (17 23, cp 18 6). He is to destroy the supremacy of the Gentiles (the Romans) and drive them forth from the borders of Israel (17 25 27 31). The 'proud sinners' (the Sadducees) will be expelled from the heritage of God which they had unlawfully seized (*vv.* 26 *f.* 41 51). The Messiah will purge Jerusalem from all impurity and make it his capital (*vv.* 33 35) ; he will bring hack *to* Palestine the dispersed tribes (*vv.* 28 34 50); the Gentiles will become tributary and he converted *to* the faith of Israel (*vv.* 31 *f.* 34). He shall himself be free from sin (*v.* 41), and all his people will he holy (*u.* 36). Further, he will not conquer by force of arms (*v.* 37), but will smite the earth with the word of his mouth (*v.* 39). Finally, his rule is temporary (*v.* 42): 'He shall not faint all his days.' Only the surviving righteous share in his kingdom (17 50) ; the departed righteous are not raised *to* participate in it.

As these hopes of the Messiah are confined to pss. 17 *f.*, and as not even the remotest hint of such hopes can be discovered in the preceeding sixteen psalms, it appears necessary to assume for them a difference of authorship.

In these, we should observe, there is not a hint that redress for present evils is to be looked for from the Messiah. In every instance the Psalmist expresses his faith that wrong will be set right either by God's present judgments, by which his righteousness is or shall be justified (2 36 4 9 8 7 9 3), or by his final judgment of the world, when the righteous shall rise to eternal life (3 16 14 6), and hell and destruction and darkness shall be the heritage of transgressors (14 6 15 14). This final judgment is spoken of as a 'visitation' of God upon the righteous and the wicked (3 14-16 15 14 *f.*); it is likewise called in respect of the righteous 'the day of mercy for the righteous' (14 6 18 6), whereas in respect of the wicked it is named 'the day of the judgment of the Lord' (15 13).

Since there is in pss. 1-16 only a resurrection of the righteous, Sheol was conceived as the perpetual abode of the wicked, 16 2. Into Sheol, thus conceived as hell, the wicked enter immediately on death (16 2 compared with 14 6 15 11): The intermediate abode of the righteous is probably to be regarded as the 'treasuries' to which we find the first reference in Eth. En. 100 5. See also ESCHATOLOGY, § 67.

IX. THE SIBYLLINE ORACLES. — The Sibylline literature belongs to a class of productions highly characteristic of Hellenistic Judaism.

86. Propagandist Literature.

'These,' as Schürer aptly remarks, 'were Jewish works under a heathen mask.' However divergent the outward form assumed, they all exhibited one characteristic in common: they addressed themselves to heathen readers, under cloak of some name that was influential in the heathen world, and in the form most natural to their alleged origin. Indirectly or directly, their aim was the propagation of Judaism among the Gentiles. Whilst the works ascribed to Hecatæus and Aristeas belong to the former category (indirect propaganda), the Sibyllines are distinctly of the latter.

The Sibyl was regarded in the ancient world as an inspired prophetess. She belonged to no prophetic order or priestly caste, but held a position free and uncontrolled as a superhumanly gifted organ of the will and counsels of the gods.

87. Sibyls.

The number of such Sibyls is variously stated at different times. Heraclitus in Plutarch (*De Pythiæ orac.* 6), Aristophanes (*Pax*, 1095), and Plato (*Phædr.* 22), speak of only one. Tacitus (*Ann.* 6 12) is doubtful whether there were more than one. Pausanias (*Descr. Græc.* 10 12) mentions four, while Varro (in Lactantius *Div. Instit.* 1 6) specifies ten. For further information on this subject the reader should consult Alexandre, *Orac. Sibyl.* (1st ed.), 1856, 2 1-101, Maass, *de Sibyllarum Indicibus* (1879), and the arts. on the subject in Smith's *Dict. of Gr. and Rom. Biogr.*, and the *Ency. Brit.* (9).

Written accounts of the oracles delivered by the Sibyls obtained in Greece and Asia Minor only a private circulation. Still though they were not preserved by the State or publicly consulted, we must not underrate their importance in the life and thought of the Eastern classical world. In Rome, however, they acquired quite a unique position. It is not necessary to treat here of the very ancient collection of these oracles, said to have been purchased by King Tarquin, or to record the frequent occasions on which they were consulted by the state before their destruction in the fire that consumed the Capitol in B.C. 83. (Alexandre [2 198] has traced sixty such occasions.) Their place was soon afterwards taken (75 B.C.) by a collection, amounting in all to about 1000 verses, made in Greece, Asia Minor, Africa, and Italy, by order of the Senate. (After being revised under Augustus, it seems finally to have been burnt by the order of Stilicho in 404 A.D.)

88. Sibylline Oracles.

Inasmuch as such oracles enjoyed high authority and a wide circulation in the East,—inasmuch, likewise, as they were anonymous in origin, free from authoritative revision, and capable of modification or enlargement at pleasure by those in whose hands they were for the time being,—they offered to the missionary spirit of Hellenistic Judaism a form of literature which would readily admit the disguised expression of its highest beliefs, and at the same time procure for them a hearing in Gentile circles. It is not unlikely, too, that the prolonged search of Roman officials for Sibylline oracles in the East may have further stimulated the inventive faculties of the Alexandrian Jews, and led to the composition of many of the verses in our present collection. In this method of propaganda the Christians proved themselves later to be apt pupils of the Jews. So common, indeed, had become in early Christian times the invention of such oracles that Celsus (Orig. *contr. Cels.* 5 61) terms Christians Σιβυλλισταί, believers in sibyls, or sibyl-mongers.

This charge of Celsus was not unmerited; for with the exception of a citation about the tower of Babel made by Alexander Polyhistor, 80-40 B.C. (see Eus. *Chron.* 1 23), and found likewise in Josephus (*Ant.* 1 4 3), it is to Christian writers that we are indebted, not only for all other references, but also for the preservation of the entire collection that has come down to us.

Hermas (*Vis.* 2 4) mentions the Sibyl, but not her verses; but quotations are frequent in Clement Alex. and Lactantius. A collection of the Patristic quotations from the Sibyllines will be found in Struve (*Fragmenta librorum Sibyllinorum quæ apud Lactantium reperiuntur*: 1817), in Vervorst (*De Carminibus Sibyllinis apud sanctos Patres disceptatio*, Paris, 1844), in Besançon (*De l'emploi que les Pères de l'église ont fait des oracles sibyllins*: Montauban, 1851), and in Alexandre (2 254-311).

The Sibylline Oracles, as we now have them, are a chaotic medley. They consist of twelve books—there were originally fourteen—of various authorship, date, and religious conception.

89. Surviving collection.

This arrangement, which is due to an unknown editor of the sixth century (Alexandre), does not in itself determine identity of authorship, or of time, or of religious belief; for many of the books are merely arbitrary groupings of unrelated fragments. As the editor, moreover, was guided by caprice as often as by any discernible principle of editing, it is not strange that the same passage frequently recurs in different contexts.

90. Editions.

The first printed edition of these Oracles was published at Basel, in 1545, from an Augsburg (now a Munich) MS, and consisted of eight books. A metrical Latin translation of these books by Sebastian Castalio appeared in the following year, and an emended Greek text from the same scholar in 1555. The most valuable of the early editions is that of Opsopœus (*i.e.*, Koch), Paris, 1599, in which fresh MS evidence is brought to bear upon the text. These were followed by that of Gallæus, Amsterdam, 1689; but his work is of no critical worth. These eight Sibylline books were likewise reprinted in Gallandi's *Bibliotheca Vett. Patr.* (Venice 1788). Book 14 was first edited by Mai in 1817 from a Milan MS and Books 11-14 from two Vatican MSS in 1828 by the same scholar. Books 9 and 10 have not been recovered. All these editions have been superseded by the first edition of Alexandre's *Oracula Sibyllina* (2 vols. Paris, 1841-1856), and his second edition of 1869, in which the valuable excursuses of the first are omitted; and by the edition of Friedlieb (Leipzig, 1852). The latter has a useful introduction, and is accompanied by a translation into German hexameters; but the text is untrustworthy.

By far the best text that has yet appeared is that of Rzach, *Oracula Sibyllina* (Vienna, 1891). For the formation of this text fourteen MSS have been used; the text has been further emended by an exhaustive collation of quotations in the Fathers. Our citations will be made from this text.

For further literature on the subject, see Alexandre's work (1st ed. 2 71-82; 2nd ed. 418-419); Schürer (*Hist.* 5 288-292). English readers will find the subject well treated in the work of Schürer just mentioned; *Edinb. Rev.* (July 1877, pp. 31-67); and Deane (*Pseudepigr.* 1891, pp. 276-344).

The relation of the Jewish and the Christian Sibyllines to the ancient heathen ones it is practically impossible to determine.

91. Rel. to heathen Sibyl.

1. They assumed, of course, the outward form of the older Oracles, being written in Homeric hexameter verse; but they transgress every rule of prosody. Short syllables are lengthened through the in-

fluence of the accent, or even without it, owing to the exigencies of the verse; and long syllables are likewise shortened.

For peculiarities of metre and syntax, see Alexandre, *Excursus*, 7. It must be acknowledged, however, that many of these disappear in the better text of Rzach. Of acrostic verses, which, according to Dionys. Hal. (462) and Cicero (*De Div.* 2 54), was the form of the most ancient Sibyllines, only one specimen is still preserved—viz., in 8 217-250, the initials of which are ΙΗΣΟΥΣ ΧΡΕΙΣΤΟΣ ΘΕΟΥ ΥΙΟΣ ΣΩΤΗΡ ΣΤΑΥΡΟΣ. It should be observed, further, that without the last word[1] the initials of the title compose the word ΙΧΘΥΣ—'a fish'—a frequent symbol of the Christian faith on early monuments.

2. As regards the matter, it is more than probable that the later Sibyls used much of the older material lying ready to hand.

Thus, in 3 414-418 (the passage about Helen), 'the Erinnys from Sparta,' is from a heathen source; so likewise the punning couplet in 4 99-100, which frequently recurs:

καὶ Σάμον ἄμμος ἅπασαν ὑπ' ἠιόνεσσι καλύψει
Δῆλος δ' οὐκ ἔτι δῆλος, ἄδηλα δὲ πάντα τὰ Δήλου.

Another notable instance is 8 361, where a line from an ancient Delphic oracle is given verbatim. See Herod. 147.

We must turn from such questions to discuss the various elements of which the work is composed.

92. Composite character. These, as we have already observed, are both Jewish and Christian, and the latter largely preponderate. Owing, however, to the character of the work, it is not always possible to distinguish between the two. It is therefore only on some of the smaller portions that we can arrive at anycertainty. Much is of a neutral character, and, as far therefore as internal evidence goes, may equally well have proceeded from either class of writers. There is a great lack of external evidence. We shall now deal with the various elements of the work in their chronological order as far as that is possible. Our space does not admit of an analysis of all the books; we shall, however, give a short survey of the more important.

The first and oldest part is 397-829[2] and probably the Prooemium. The latter is not found in our MSS; it

93. Prooemium. is taken from the *Ad Autolycum* of Theophilus (180 A.D.). It consists of two fragments, of thirty-five and forty-nine lines respectively. Rzach (pp. 232-238) and Alexandre link them together by another short fragment of three lines. On very inadequate grounds the latter editor assigns them to Christian authorship; but they contain nothing of

94. 3 97-829. an essentially Christian cast (on their contents, see ESCHATOLOGY, § 58). With regard to 3 97-829 opinions are conflicting. Bleek regards verses 97-807—with the exception of 3 350-380, a later Christian interpolation—as the work of an Alexandrian Jew, 170-160 B.C.; Hilgenfeld thinks that the whole of 97-817 was written about 140 B.C.; Ewald brings down the date to 124 B.C. Alexandre assigns 3 97-294, 489-828, to 168, but 295-488 to the age of the Antonines. The strongest evidence in favour of Alesandre's view is to be found in the difficulty of interpreting adequately such passages as 3 464-473 as applying to the civil war and the dissensions of Marius and Sulla (Friedlieb, p. 33).

3 97-818 falls naturally into three groups: (*a*) 97-294; (*b*) 295-488; (*c*) 489-818.[3] The first (*a*) opens abruptly with the building and the destruction of Babel (97-104). Then the earth is peopled and its rule is divided between Cronos, Titan, and Japetos (106-110). In the strife that subsequently arose between the Cronides and the Titans these races were destroyed, and there arose in succession the great kingdoms of the earth—those of Egypt, Persia, Media, Ethiopia, Assyria, Macedonia, again of Egypt, and of Rome (118-161). This closes the retrospect of the Sibyl; now begins her prophecy (162-166). First, she predicts the rise of the Jewish (under Solomon), the Macedonian, and the Roman kingdoms; during the reign of the seventh king of Egypt, of Hellenic race, the people of God will again become powerful (167-195). Then are recounted the judgments of God on the kingdoms of the world and on the Jews (196-212). Next the Sibyl takes as her theme the praise of the Jewish nation: their virtues, and the salient points in their history from their departure from Egypt down to Cyrns (218-294). The second group (*b*) is mainly concerned with judgments against Babylon, Egypt, Gog and Magog, Libya (295-333), and likewise against individual cities (341-366). Then follows the promise of Messianic prosperity and peace (367-380), and this group closes with oracles regarding Antiochns Epiphanes and his successors, and various countries, towns, and islands (381-488). In 419-432 we have the celebrated diatribe against Homer. The third group (*c*) openswith oracles against Phcenicia, Crete, Thrace, Gog and Magog and the Hellenes (489-572). Then Israel is praised for its worship of the true God (573-600). Thereupou ensues a second prophecy of judgment and a call to conversion, and an account of the evils that were to befall the ungodly (601-651). Then the Sibyl foretells the coming of the Messianic king, who would take vengeance on his adversaries; next comes a detailed account of the period of Messianic prosperity (652-731), and, finally, the signs that are to herald the end of all things (796-808). The Sibyl declares that she is neither the Erythrxan Sibyl nor yet the Cumxan (809-818).

3. Though it is obvious from the above epitome that 3 97-818 is not a single and homogeneous composition but rather an aggregate of separate oracles, we are safe [with Schiirer) in regarding the three groups as derived in the main from one author, and as dating from the same period, the reign of the seventh Ptolemy, which is referred to in all three groups (192-193, 316-318, 608-610).

Ptolemy VII. Physcon reigned first in conjunction with his brother Ptolemy VI. Philometor (170-164 B.C.). He was then banished, but recovered the throne in 145 and reigned as sole king till 117 B.C. That the composition dates from the latter period is clear (520-572) from the prophecy of the complete subjugation of all Hellas. As Hilgenfeld, Schurer, and Drnmmond point out, this cannot have been written before the fall of Corinth (146 B.C.). The doom of Corinth is actually referred to (487), and possibly that of Carthage (492-503). Verses 388-400, which deal with the Seleucid kings, were written (according to Hilgenfeld's interpretation) about 140 B.C. Therefore, since the author represents the Messianic kingdom as beginning during the reign of Ptolemy Physcon, we may safely take 97-818 to have been written in the second half of the second century B.C. The Procemium, with which we have already dealt (see above § 93), most probably formed the introduction to these verses, and Schiirer adduces external evidence from Lactantins (iv. 6 5) to that effect.

Before proceeding to discuss 31-96, we should add that Friedlieb and others reject 819-828 as a later addition, as these verses are at variance with 809-811.

With regard, however, to 3 1-92 all previous critics seem to have gone wrong in connecting 63-92 with the

95. 3 1-92. preceding verses. In 63-92 the end of all things is to come during the sway of Rome over the world (75-80). In 1-62, on the other hand, only the partial judgments that are to take effect on the coming of the Messianic king in 49 *f.* are reconnted. The Sibyl then promises in 61 *f.* to enumerate the cities that are to suffer; but here the account breaks off, and not a word more is said in 63-92 in fulfilment of her promise. Hence these two sections are of different authorship. 63-92 is certainly late and Christian. On 3 1-62, see also ESCHATOLOGY, § 68.

In 63-74 we have a reproduction of the myth concerning Nero, according to which Beliar was to return in the form of that emperor and work many mighty signs. This idea recurs in 2 167-170 (a distinctly Christian product), and in the Asc. Isa. 3 13-5 1 (cp ANTICHRIST, § 15).

As regards 3 1-62, it may be derived from one author, and *v.* 52 may refer to the triumvirate of Antony, Octavius, and Lepidus. In that case this section was written before 31 B.C.

Book 4 is, with Friedlieb, Ewald, Hilgenfeld, Alexandre, and Schiirer, to he regarded as of Jewish authorship, and was

96. Book 4. written about 80 A.D. or somewhat later. This date is determined by two allusions: the destruction of Jerusalem (70 A.D.) in 115-127, and the eruption of Vesuvins (79 A.D.) in 130-136. The latter was to be the immediate precursor of the vengeance that was to be wreaked on Rome by Nero, returning with many myriads from the East (137-139). There are no grounds for assigning this hook, with Ew. and Hilgenfeld, to Essene authorship; for, with the exception of the reference to ablutions in 163-165, there is no mention of anything characteristic of the Essenes, and the words in question are most naturally taken as referring to proselyte baptism (Schiirer). The teaching enforced in 179-192 shows that the author cannot have been a Jew of Alexandria, hut probably belonged to Palestine; for the eschatology is very naïve. From the bones and ashes of men's bodies God

[1] A Latin rendering with the last seven verses omitted is given in Augustine's *De Civ.* 18 23.

[2] Where Friedlieb and Alexandre give 828, Rzach gives 829 verses.

[3] In the detailed analysis that follows, certain verses, unimportant for the present purpose, are (for the sake of brevity) left unaccounted for.

will fashion anew the bodies in which they will rise to judgment. The judgment will then proceed according to their deeds. The wicked will again die, but the righteous live again on earth. This recalls Enoch **1-36**.

Book **5** professes to be the work of an Egyptian Sibyl, the sister of Isis (*v.* 53). It is mainly Jewish ; hut there may be Christian elements. There is **a** marked absence

97. Book *6*. of ideas characteristic of Judaism or Christianity, and also of internal connection. Friedlieb attributes the book to an Egyptian Jew in the time of Hadrian; Alexandre to **a** Christian Jew of Alexandria in the age of the Autonines. The first fifty-one lines are in effect a chronological oracle ending with Hadrian. As the rest of the hook deals with Egyptian affairs, it is probably of different authorship and date, and we may, with Ewald, Hilgenfeld, and Schiirer, accept **80** A.D. as an approximate date for 52-531. Some passages are decidedly Jewish : *vv.* 260-285 (announcement of woes upon the idolatrous Gentiles, but of blessing on Israel), *vv.* 397-413 (the destruction of the temple in Jerusalem), *vv.* 414-433, 492-511 (the building of **a** new temple in Egypt which is to take the place of that already destroyed at Leontopolis); there are others also. The one passage that seems to be certainly Christian is 256-259 :

εἷς δέ τις ἵξεται αὖτις ἀπ' αἰθέρος ἔξοχος ἀνήρ,
οὗ παλάμας ἥπλωσεν ἐπὶ ξύλου ἀγλαοκάρπου
Ἑβραίων ὄχ' ἄριστος, ὃς ἠέλιόν ποτε στῆσεν
φωνήσας ῥήσει re καλῇ καὶ χείλεσιν ἁγνοῖς.

Book 6 is the work of a' Gnostic (?) Christian. Jesus, the natural son of Joseph, is united with Christ at baptism. The

98. Books 6-8 11-14 1 *f.* hook describes certain incidents at the baptism somewhat after the manner of the apocryphal gospels. Book 7 is of like authorship and is not earlier than the third (see above, § 91, 1) century A.D. Book 8, in which the famous acrostic occurs, is of Christian origin but of divided authorship. 1-429 belongs to the second century; 430-501 to the third. As to Books **1** *f.* and **11-14**, there is **a** great variety of opinion. Alexandre assigns the former to **a** Christian author of the third century, and the latter to an Alexandrian Jew of about the year 267. Friedlieb places 1 *f.* at the close of the second century ; **11-14** he ascribes to Jewish writers of the second and the third centuries A.D. respectively ; 12 *f.* to Christian writers of the third century.

Some of these judgments are simply hypotheses ; there is still room for indefinite study on these questions. R. H. C.

APOCRYPHA

CONTENTS

It is proposed in the present article to give, in the first place, a general survey of the very miscellaneous

1. Aim of article. collection of hooks known as 'the Apocrypha' (details being reserved for special articles), and then to proceed to an enumeration and classification of the larger literature which lies beyond the limits of that collection. Fuller treatment of the subdivision 'Apocalyptic,' however, will he reserved for **a** special article (see above, APOCALYPTIC), where will he found an account of the following nine works :—Apoc. of Baruch, Ethiopic Book of Enoch, Slavonic Book of Enoch, Ascension of Isaiah, Jubilees, Assumption of Moses, Test. xii. Patr., Psalms of Solomon, Sibylline Oracles. The later Christian literature will be excluded, only those writings being considered which contain portions assignable, at latest, to the early years of the second century.

The name Apocrypha (nom. pl. nent. of **Gk.** adj. *ἀπόκρυφος, hidden)* is used to denote **a** large body of

2. Name. Jewish and Christian literature, consisting of writings which either their authors or their admirers have sought to include among canonical scriptures, but which have ultimately failed to secure such *a* position in the estimation of the Church at large.

This special usage of the word is derived from the practice common among sects, religious or philosophic, of embodying their special tenets or formulae in books withheld from public use, and communicated to an inner circle of believers. Such books, generally bearing the name of some patriarch, prophet, or apostle, were called by their possessors apocryphal, the designation implying that they were hidden from the outer world, and even from the ordinary members of the sect itself; in such cases the epithet apocryphal was used in **a** laudatory sense. Since, however, the hooks were forgeries, the epithet gradually came to take colour from that fact, and in process of time it was employed to indicate otber writings that had been forged. In the common parlance bf to-day, it denotes any story or document which is false or spurious.

One of the earliest instances—and certainly **a** typical instance—of the use of the word ***apocryphal*** in its laudatory sense, occurs in a magical book of Moses edited from a Leyden papyrus of the third or fourth century by Leeman and by Dieterich (*Abraxas*, 109). The book may be as old as the first century A.D. Its title is Μωϋσέως ἱερὰ βίβλος ἀπόκρυφος ἐπικαλουμένη ὀγδόη ἢ ἁγία, 'A Holy and Secret Book of Moses, called the Eighth, or the Holy.' For the earliest use of the word *in malam partem*, on the other hand, we have to turn probably to Cyril of Alexandria (348 A.D.) ; and for **a** more frequent and clear employment of the adjective in **a** disparaging sense to Jerome, whose constant use of it is probably responsible for odr employment of it at the present day as the equivalent of 'non-canonical.'

Finally the name Apocrypha has come to be applied, and is now applied, by the reformed communions to a particular collection of writings. While some of these are genuine and authentic treatises, others legendary histories, and the rest apocryphal in the disparaging sense of hearing names to which they have no right, all come under the definition proposed above, for each of them has at one time or another been treated as canonical.[1]

I. The Apocrypha Proper.

3. Apocrypha proper : classification. This collection of books may he classified in several ways. We might classify them critically thus :—

1. ***Additions to canonical books :—***
   - 1 Esdras (interpolated form of Ezra) : see below, § 4, ii.
   - Additions to Esther : see below, § 5, 1.
   - Additions to Daniel : see below, § 5, 2.
   - Prayer of Manasses : see below, § 6, 3.
2. ***Pseudepigraphical writings :—***
   - **4** Esdras : see below, § 7.
   - Wisdom of Solomon : see below, §8, 2.
   - Baruch : see below, § 6, 1.
   - Epistle of Jeremy : see below, § 6, 2.
3. ***Legendary or Haggadic writings :—***
   - Tobit : see below, § 5, 3.
   - Judith : see below, § 5, 4.
4. ***Genuine and authentic treatises :—***
   - Ecclesiasticus : see below, § 8, 1.
   - 1, 2 Maccabees : see below, § 4, i.

Probably the most natnral and convenient division

[1] It does not seem necessary to devote space here to commenting upon the use of the word Deutero-canonical, as applied to these hooks by the Church of Rome ; for it is expressly said by the authorities of that Church that no distinction of authority **is** implied in the term.

will be one depending upon the kind of literature which each book represents, as thus :—

I. Narrative : *(a)* Historical ; *(b)* Legendary (or Haggadic).
II. *(a)* Prophetical ; or *(b)* Apocalyptic.
III. Didactic.

I. *(a)* HISTORICAL. i. The *Books of Maccabees*. 1 *Maccabees*.—An important and generally trustworthy history, extant in Greek. It was translated from a Hebrew original, which survived as late as the time of Jerome. On this and the following see MACCABEES, BOOKS OF.

4. Historical.

2 *Maccabees*.—Extant in Greek; an abridgment of a work in five books by Jason of Cyrene (see 2 23). Prefixed to it are two letters, from the Jews of Jerusalem to the Jews of Egypt, commonly held to be spurious (see, however, MACCABEES, SECOND, § 7).

3 Maccabees.—Greek. A fragmentary history of an attempted massacre of the Jews under Ptolemy Philopator, and of their miraculous deliverance. This book and the following are not included by the Roman Church in its Canon, and do not appear in the Vg. though found in 𝔊.

4 *Maccabees*.—Greek. A philosophical discourse, illustrating the triumph of Reason over Matter, by the story of the martyrdom of Eleazar, and of the 'Seven Maccabees' and their mother. The work was traditionally attributed to Josephus. An edition of the Syriac version with kindred documents, prepared by the late Prof. Bensly, has been printed under the supervision of W. E. Barnes.

ii. 1 *Esdras*.[1]—Greek. A recasting of the canonical Ezra, to which is added the legendary tale of the Dispute of the Three Courtiers (known to Josephus). This book appears in Vg. as an appendix to the NT; but no authority is attributed to it by the Church of Rome. See ESDRAS, BOOKS OF, First and Second.

(*b*) LEGENDARY. 1. *Additions to Esther*.—Greek. They consist of a number of letters, prayers, visions, and the like, which are found intercalated into the canonical book of Esther in 𝔊. See ESTHER, § 10.

5. Legendary.

2. Additions *to* Daniel.—Greek. These are three in number :—

(i.) The Story of Susanna, prefixed to the book.
(ii.) The Song of the Three Children, inserted in ch. 3.
(iii.) The Story of Bel and the Dragon, following ch. 12 and attributed to Habakkuk.

They are found both in the 𝔊 Version and in that of Theodotion. What is said to be the Hebrew original of part of the Song of the Three Children has been recently found by Dr. M. Gaster in the Chronicle of Jerahmeel, and printed by him in *TSBA*, 1894. Cp DANIEL, § 5.

3. Tobit.—Greek and 'Chaldee.' A romantic narrative of the period of the Captivity, written not later than the first century A.D. at latest, and perhaps in Egypt. The book has a literary connection with the story of Aḥiḳar (see ACHIACHARUS). The date cannot at present be considered at all certain. The 'Chaldee' or Aramaic version (on the name see ARAMAIC, § 4, end), published by Dr. Neubauer in 1878, is probably not the earliest form of the book. Of the Greek there are three recensions, and there are three old Latin recensions besides Jerome's Vg. version. There are also two Hebrew texts, one derived from 𝔊, and the other from the Aramaic. Dr. Gaster has printed some fresh Hebrew texts of the story in *TSBA*, 1896. See TOBIT.

4. *Judith*.—Greek. A romance which, in its present form, may date from the first century B.C. It tells the story of the deliverance of the city Bethulia from the Assyrians under Holofernes, through the bravery of Judith, a Hebrew widow. No miraculous element appears in the story. See JUDITH.

[1] So called in EV and 𝔊 (*e.g.* Swete [B]). In 𝔊A (subscr.) it is called ὁ ἱερεύς ; in Lag.'s Luc. it is Ἔζδρας Β', and in Vg. it is 3 Esdras.

APOCRYPHA

II. *(a)* PROPHETICAL. 1. *Baruch*.—Greek. A pseudepigraphical book (*i.e.* one written under a false name), ascribed to Baruch son of Neriah, amanuensis of Jeremiah. It consists of two parts : (1) 1-38, which may date from the times of the Persian supremacy, possibly has a Hebrew original, and certainly shows close affinities with Dan. 9 ; (2) 39-59 (end), originally written in Greek, probably after 70 A.D. ; chap. 5 is modelled on the 11th Psalm of Solomon. Edited most fully by Kneucker. Appended to this book is—

6. Prophetical.

2. *The Epistle of Jeremy* (Baruch 6 in our Apocrypha).—Greek, also pseudepigraphic, purporting to be a letter of Jeremiah addressed to the Jews at Babylon, inveighing against the worship of idols.

3. *The* Prayer *of* Manasses.—Greek. This is attributed to Manasseh, king of Judah, when in prison. It is very likely an extract from a legendary history of Manasseh, of which other portions appear to be quoted (in connection with the prayer) in the *Apostolical* Constitutions (2 22) ; or possibly it was written with a view to insertion into the text of 2 Chron. 33. It is not in the Roman canon, but is appended thereto.

(*b*) APOCALYPTIC.—Of this large and important class of writings only one specimen is contained in our Apocrypha, namely :—

7. Apocalyptic.

4 *Esdras*.[1]—Latin, Syriac, Arabic, Ethiopic, and Armenian. The original Greek is lost. Only chaps. 3-14 appear in any Version save the Latin; chaps. 1 *f.* 15 *f.* are later accretions, probably of two different dates, 1 *f.* being perhaps of second century, and 15 *f.* of third century; 3-14 are a Jewish apocalypse, probably written about 97 A.D. ; 1 *f.* are Christian, 15 *f.* most likely Jewish. Rejected by the Roman Church, it is printed as an appendix to the Vg. See ESDRAS, BOOKS OF and APOCALYPTIC LITERATURE, §§ 13-15.

III. DIDACTIC. 1. Wisdom *of Jesus the Son of Sirach*, commonly *called Ecclesiasticus*.—Greek, avowedly translated from the Hebrew of which a considerable portion has lately been recovered. A genuine authentic treatise, in parts of high literary excellence. The author was a Palestinian Jew of the second century B.C. See ECCLESIASTICUS.

8. Didactic.

2. *Wisdom of* Solomon.—Greek. Written under the name of Solomon, perhaps by Philo (according to an early tradition), certainly by a Jew of Alexandria in the first century. It is of great merit in parts ; but the tone deteriorates towards the end. The book seems, moreover, to be incomplete. See WISDOM, BOOK OF.

II. Other Apocryphal Literature.

Our survey of the remaining literature is a much more difficult matter. The idea of classifying the books upon chronological principles must be set aside at once as impracticable; the data are in a majority of cases far too vague. The simplest division that can be made is between those books which have to do with the OT and those which associate themselves with the New. Within those the classification will be made, as in the case of the apocrypha already described, according to kinds of literature represented ; writings which unite more than one element will be arranged according to their most prominent feature. In the case of the OT literature, slightly modifying our previous classification, we can include all the documents we possess under the following headings :—i. Legendary or Haggadic Narratives. ii. Prophetical and Apocalyptic books. iii. Poetical. iv. Didactic.

9. Other literature.

[1] Called 2 Esdras in EV but oftener, as here, 4 Esdras—Le., 4th after 1st Esdras, the Heb. Ezra, and Nehemiah. It is called 3 Esd. when Ezra-Neh. are counted one book, as in 𝔊. In an Amiens MS chaps. 1 *f.* 3-14 15 *f.* are called 3rd, 4th, and 5th Esd. respectively.

A. *OLD TESTAMENT* (§§ 10-25).

I. LEGENDARY OR HAGGADIC NARRATIVES (§§ 10-18).

10. Adam and Eve, etc.

1. *Testament* (or *Apocalypse*, or *Penitence*) *of Adam*: *Book of the Conflict of Adam* and Eve. — Extant partially in Greek, Latin, Syriac, Arabic, Ethiopic [and Coptic]

These versions represent variously developed forms or fragments of a Jewish romance dealing with the life of Adam and Eve after the Fall, and with their death and burial. We no longer possess the romance in its original form.

The remains of it must be sought in the following documents :—
(*a*) Greek *Apocalypse of Muses*, more properly Διήγησις περὶ Ἀδὰμ καὶ Εὔας. Edited by Tischendorf (*Apocalypses Apocryphæ*, 1866) and, in a fragmentary text, from the best MS, by Ceriani (*Monumenta sacra et profana*, 521). It is principally concerned with the death of Adam and Eve, and includes an important narrative of the Fall. It is essentially Jewish.
(β) Latin Vita *Adæ et Evæ*: extant in many MSS, printed by Wilh. Meyer in *Abh. d. Münch.* Akad., Philos-philol. Kl. 14, 1878. It covers the same ground as (*a*) and introduces elements which occur in (γ) and (δ).
(γ) Arabic and Ethiopic Book *of Adam and Eve* or *Conflict of Adam and Eve*. A long romance, Christianized throughout, dealing with the sufferings and temptations of Adam and Eve after the Fall. The history is continued to the birth of Christ, and has close affinities with the Cave *of Treasures* (ed. Bezold ; *Schatzhöhle*). It is derived in large part from the lost Jewish romance. First translated by Dillmann (*Das Christl. Adambuch des Morgenlandes*, 1853): Ethiopic text by Trnmpp in *Abh. d. Münch.* Akad. 15, 1879-81 : English Version by S. C. Malan (Book *of Adam* and *Eve*, 1882). *See too* the article 'Adam, Books of,' by Hort, in Dict. *Christ. Biogr*.
(6) Greek, Syriac, and Arabic fragments of the *Testament of* Adam. Prophetic and apocalyptic in character ; some are extracts from the old romance in its original form; others are Christianized. Edited by Renan in *Journ. As.* (1853, pp. 427-471) ; the Greek by M. R. James (*Apocrypha* Anecdota : *Texts and Studies*, ii. 3 138).
(ε) Coptic. A leaf from a Moses-Adam apocalypse, gnosticized. Edited by Scbinidt and Harnack in *Sitzungsber. d.* k. *pr. Akad. d. Wiss.*, 1891, p. 1045. It is now recognised by Harnack to be part of the late Coptic *Apocalypse of Bartholomew*.

2. *Book of Jubilees*, *Little Genesis* (*Leptogenesis*), *Apocalypse* (or *Testament*) *of Moses*. — A 'haggadic commentary upon Genesis.' The hook is in the form of a revelation made to Moses on Mount Sinai by the angel of the Presence. Hence it has been called the *Apocalypse of Moses*. The' narrative communicated hy the angel begins with the Creation, and extends to the giving of the law, and the whole time is reckoned in periods of Jubilees : hence the name *Book of Jubilees*. The events narrated in Genesis are for the most part sketched slightly with the addition of details of a legendary character : hence the name *Leptogenesis*, 'a detailed treatment of Genesis' (see, however, ESCHATOLOGY, ~~~). These details include the names of the wives of the patriarchs, the wars of Jacob and Esau, the last words of Abraham and Isaac. Much of the legendary element in *Test. xii. Patr.* (see below) is derived from this book : see APOCALYPTIC, §§ 48-58.

3. *Testaments of the Three Patriarchs* (Abraham, Isaac, and Jacob). — Referred to in the *Apost. Const.* (6 16).

11. Patriarchs.

Books under these names, combining the legendary, apocalyptic, and didactic elements Christianized, are found in Greek, Slavonic, and Roumanian (*Testament* [or *Apocalypse*] of *Abraham*), and in Arabic and Ethiopic (*Testaments of Abmham, Isaac, and Jacob*). They narrate the circumstances attending the deaths of the three patriarchs. Their early date is maintained by the present writer (one is quoted hy Origen), but is not universally allowed. Dr. Kohler (*JQR*, 1895) assigns an Essene origin to the *Test. of Abraham*.

Edited by M. R. James ('Test. of Abraham': *Texts and Studies*, 22) and by Dr. Gaster ('Roumanian version of Apoc. of Abraham,' PSBA, 1887). The Greek version is printed from one MS by Vassiliev (*Anecdota Græco-Byzantina*, 1893).

4. *Apocalypse of Abraham*.—Slavonic, from Greek. An interesting Jewish hook with Christian insertions. The first part is haggadic, and gives the story of Abraham's conversion : the second is an expansion of the rision narrated in Gen. 15 : edited by N. Bonwetsch in *Studien zur Geschichte d. Theologie u. Kirche*, 1897.

5. *Testaments of the Twelve Patriarchs* — A hook combining the three elements of legendary, apocalyptic and didactic matter in twelve sections, each of which gives the last dying speech of one of the sons of Jacob ; see APOCALYPTIC, §§ 68-76.

6. *Life* (or *Confession*) of *Aseneth*. —A Jewish legend of early date; Christianized. Extant in Greek and Syriac (and Latin). It is connected with the *Test. xii. Patr.*, and narrates the circumstances attending the marriage of Aseneth with Joseph. There is much beauty in the story. The Latin version was, according to the present writer's belief, made by or for Grosseteste, at the same time as that of the *Testaments*.

12. Aseneth.

The Greek and Latin are edited by P. Batiffol, *Studia Patristica*, 1889. The Syriac will be found in Land, *Anecd. Syr.*, and Oppenheim, *Fabula Josephi et Asenethæ*, 1886. *See* Hort's article in Dict. *Chr. Biogr.*

7. *Testament of Job*. —A Midrash on Job, containing a mythical story of his life, Christianized to a very limited extent. It is ascribed to his brother Νηρεύς (Nahor). Job's wife is called Sitis. Elihu is represented as inspired by Satan. The story is worth reading.

13. Job.

It exists in Greek and seems to be quoted in the *Apoc. Paul.* Printed from a Vatican MS by Mai (*Script. Vet. Nov. Coll.* 7 180) ; a French translation in Migne's *Dict. des Apocryphes* ; edited last from two MSS by M. R. James, *Apocrypha Anecdota*, ii. 1897.

8. *Testament of Solomon*. — Greek. Practically a magical hook, though interspersed with large haggadic sections. It is mainly Jewish, though Christian touches have been introduced. It narrates the circumstances under which Solomon attained power over the world of spirits, details his interviews with the demons, arid ends with an account of his fall and loss of power.

14. Solomon, etc.

Ed. first by F. F. Fleck in *Wissenschaftl. Reise*; reprinted in Migne's *Cedrenus*, vol. ii. as an appendix to Psellus's writings. A German translahon by Bornemann in Illgen's *Z. f. Kirchengesch.*, 1843.

9. *Contradictio Salomonis*. —A work under this name is condemned in the "Gelasian" Decree *de recipiendis et non recipiendis libris*. It was in all likelihood an account of Solomon's contest in wisdom with Hiram, and was the groundwork of the romance still extant in many forms and under many names—*e.g.*, Dialogue of Solomon and Saturn (Anglo-Saxon), Solomon and Kitovras (*i.e.* Kentauros, Slavonic), Solomon and Marcolph (Latin, etc.). Josephns mentions the Hiram-legend.

See on all these books J. M. Kemble's Introduction to the *Anglo-Saxon Dialogue of Solomon and Saturn*, Ælfric Society, 1843, and compare ACHIACHARUS.

10. *Ascension of Isaiah*. — Partly haggadic, but chiefly important as an apocalypse — under which heading it will be treated. See APOCALYPTIC, §§ 42-47.

11. Pseudo-Philo's *Liber antiquitatum Biblicarum*. — Latin, from Greek, and that from Hebrew. Printed thrice in the 16th century (in 1527, in 1550, and in 1599), this book had practically escaped the knowledge of all modern scholars (except Cardinal Pitra) until Mr. Leopold Cobn reintroduced it to the world in an article in the *Jewish Quarterly Review*, 1898. It is a haggadic summary of Bible history from Adam to the death of Saul, full of most interesting visions, prophecies, and legends.

15. Pseudo-Philo.

The Latin version, the only form in which the book is known, very much resembles the version of 4 Esd. Four fragments published by the present writer (Prayer of Moses, Vision of Kenaz, Lament of Seila, and Song of David = *Apoc. Anecd.* i.) tnrn out to be extracts from this work of Pseudo-Philo. It is apparently pre-Christian and merits careful studv.

12. *Book of Jasher*. —A haggadic commentary updn the Hexateuch, containing ancient elements, hut preserved in a mediæval form. There is a French translation by Drach in Migne's *Dict. des Apocryphes*, vol. ii.

16. Jasher.

13. *Book of Noah.*—Haggadic and apocalyptic fragments of this work are incorporated in the Book of Enoch;

17. Noah. there is also a Hebrew Midrash under this name printed by Jellinek in *Bet-ha-Midrasch,* 3 155, partly based on the *Book of Jubilees.* See Ronsch and Charles, and cp. APOCALYPTIC, §§ 24, 57.

14. *Book of Lamech.*—The title 'Lamech' occurs in Greek lists of apocryphal' books. A story of Lamech

18. Lost Books. which is found separately in Slavonic may or may not be identical with this. There can be little doubt that the old bsok treated (as the Slavonic one does) of the accidental slaying of Cain by Lamech.

15. *Book of Og.*—In the Gelasian Decree a book is mentioned as 'The Book of Og the giant, whom the heretics feign to have fought with a dragon after the Flood.' It was, according to the present writer's belief, identical with a hook Πραγματεία τῶν Γιγάντων or *Treatise of the Giants,* which is mentioned in a list of Manichæan apocrypha by Timotheus of Constantinople (Fabricius, *Cod. apoc. NT* 1 139). It was no doubt a Jewish haggada, containing, to judge from the title, some stirring incidents. Possibly it may have given a Jewish form of the ancient Dragon-myth of Babylonia, on which see Gunkel (*Schöpf.*).

16. *Penitence of Jannes and Mambres.*—Mentioned also in the Gelasian Decree, and perhaps, like the *Pœnitentia Cypriani*, a confession of the wicked magical arts of the two Egyptian wizards. See an article by Iselin in Hilgenfeld's *ZWT,* 1894. There is a fragment (in Latin and Anglo-Saxon) apparently belonging to this book in the Cotton MS Tib. B.V. ; but it has not yet been printed.

17. *Esther.*—Origen on Romans (9 2 : p. 646) has the following passage, which clearly refers to a romance about Esther : 'We have found it written in a certain book of an apocryphal nature (*secretiore*) that there is an angel of grace who takes his name from grace. 'For he is called Ananehel (5 1 Anahel), which being interpreted means *the* grace *of God.* Now in this writing it was said that this angel was sent by the Lord to Esther to give her grace in the sight of the king.'

There are, besides, many haggadic histories—*e.g.*, of David, Jonah, the Captivity, and (see *Rev. Sém.* 1898) the Rechabites—in Syriac, Carshunic, Arabic, and Ethiopic, which are still unpublished; they are to be found in MS at Paris and elsewhere.

See Zotenberg's *Cat. des MSS Syriaques* and *Cat. des MSS Éthiopiques de la Bibliothèque Nationale*, and Wright's Catalogues of Ethiopic and of Syriac MSS in the British Museum. Much Slavonic apocryphal literature also remains unknown to critics, though most of it has been printed. See Kozak's list of Slavonic apocryphal literature in *JPT* xviii., and Bonwetsch in Harnack's *Altchristl. Lit.* 902-917.

II. APOCALYPTIC. **1.** *Book of Enoch;* and **2.**

19. Apocalyptic: Enoch, etc. *Secrets of Enoch.*—See APOCALYPTIC, 18-32 and 33-41 respectively.

3. *Sibylline Oracles.*—Greek hexameter verse, in fourteen books of various dates. See APOCALYPTIC, §§ 86-98.

4. *Assumption of Moses.*—Quoted in the epistle of Jude, as well as by later Christian writers; extant in Latin, incomplete. See APOCALYPTIC, §§ 59-67.

5. *Apocalypse of Baruch.*—A long and important apocalypse, closely resembling 4 Esdras in style and

20. Baruch, Jeremiah, etc. thought. See APOCALYPTIC, §§ 5-17, and also below under *Zoroaster* (§ 23, no. 15).

6. Other *Apocalypses of Baruch (a),(b),(c).*—As far as is known at present (*a*) is contained in only a single Greek MS (Brit. Mus. Add. 10,073) : edited by M. R. James, *Apocr. Anecd.* ii., with a translation of the Slavonic version by W. R. Morfill : Bonwetsch also has published a German translation of the Slavonic. The Greek text has two Christian passages. In the main it may very well be Jewish and of early date. It contains revelations about the course of the sun and noon, the history of the Tower of Babel, the Vine Christian), and the offering of the prayers of men to God by Michael: (c) An Ethiopic *Apocalypse of Baruch,* preserved in a British Museum MS (118 in Dillmann's *Catalogue*) is apparently the production, in part at least, of an Abyssinian Christian. This, or another, is mentioned in Wright's *Catalogue* (No. 27, 6, etc.). A quotation from Baruch not found in any existing book of his, is in the *Altercatio Simonis et Theophili* (*Text eu. Unters.* 1 3), and a larger one in some MSS of Cypriani's *Testimonia*, 3 29. It is noticed by Dr. J. Rendel Harris in *The Rest of the Words of Baruch,* p. 10.

7. *Reliqua verborum Baruchi (The rest of the words of Baruch),* or *Paralipomena Jeremiæ.*—Greek and Ethiopic. There is hardly anything really apocalyptic in this book, which is a Christian appendix to the *Apocalypse of Baruch,* haggadic in character. It narrates the destruction of Jerusalem by Nebuchadrezzar, the miraculous rescue of Ebed-melech, and the martyrdom of Jeremiah.

Printed first in Ethiopic by Di. (*Chrestomathia Æthiopica*), in Greek by Ceriani (*Mon. sacr. et prof.*), and lastly in Greek by Dr. J. Rendel Harris (*Rest of the Words of Baruch,* 1889). Harris regards it as an *eirenicon* addressed by the church of Jerusalem to the synagogue after the Bar-Cochba rebellion. It was often printed in variously abridged forms in the Greek *Menæa.*

8. A short *Prophecy of Jeremiah* is uniformly attached to the *Epistle of Jeremiah* in Ethiopic MSS of the Old Testament. It consists of only a few lines, and is written to justify the quotation from 'Jeremy the prophet' in Mt. 27 9. It is addressed to Pashur. Jerome had seen a Hebrew volume in which a similar passage occurred. Dillmann printed it in his *Chrestomathia Æthiopica,* 1866 (p. viii n. 2).

9. *Ascension of Isaiah.*—See APOCALYPTIC, §§ 42-47.

10. *Apocalypse of Elias,* and

11. *Apocalypse of Zephaniah.*

The first of these was supposed to be the source of Paul's quotation in 1 Cor. 2 9, 'Eye hath not seen,' etc.

21. Elias, Zephaniah, etc. The second is quoted by Clement of Alexandria. They both survive in two dialects of Coptic. Fragments of 10 and 11 were published by Bouriant in the *Mémoires de la Mission archéologique au Caire.* Stern translated them into German in *ZÄ*, 1886. The whole, with additional fragments, has been edited by Steindorff in Harnack and Gebhardt's *Texte u. Untersuch.* The Apocalypse of Elias is fairly complete : the editor assigns only one leaf to the Apocalypse of Zephaniah and a large fragment to an unknown Apocalypse. It is the present writer's belief that this last is from an Apocalypse of Zephaniah. Both are seemingly Christianized forms of Jewish books, containing sections descriptive of heaven and hell, and prophecies of Antichrist, and his conflict with Tabitha and the two witnesses. There is an Apocalypse of Elias in Hebrew and one was printed in Jellinek's *Bet-ha-Midrasch* and edited in 1897 by Buttenwieser. A passage from a Gnostic Vision of Elias is quoted by Epiphanius (*Her.* 26 13).

12. *A Revelation of Moses,* containing a visit to the unseen world, has been translated from Hebrew by Dr. Gaster (*JRAS,* 1893).

13. *An Apocalypse of Esdras,* extant in Syriac, edited by Baethgen from a late MS, and published

22. Esdras, etc. with a translation in *ZATW* (6 199-210 ['86]), is by some thought to be an old Jewish apocalypse which was remodelled in Mohammedan times. There is an Ethiopic *Apoc. of Esd.* in the British Museum (see Wright's *Catalogue*).

14. The same remark applies to a Persian *History of Daniel* edited and translated by Zotenberg in Merx's *Archiv* (1 386), which in its present form is certainly mediæval. The Armenian, the Coptic, and the Greek Visions of Daniel,[1] which are printed respectively by

[1] It may be noticed in this connection that in 𝔊A of Theodotion's Daniel the whole book is divided into twelve Visions (ὁράσεις).

Kalemkiar, by Woide, by Klostermann, and by Vassiliev (*Anecdota Græco-Byzantina*, 1893), are also very late, but contain ancient elements. See on these books W. Bousset's recent work, ***Der** Antichrist*, and compare ANTICHRIST. It is thought by Zahn that Hippolytus commented upon the apocryphal Apocalypse of Daniel as well as on the canonical Apocalypse (*Forschungen*, 5_{120}).

15. *Books of Zoroaster.*—Zoroaster, as we learn from the Clementines (*Recogn.* 1_{29}; *Hom.* **94**). was identified with Ham. son of Noah; and mystical prophecies; most likely of Jewish origin, were current under both names. Clement of Alexandria quotes a prophecy of Ham (*Strom.* **6642**); and there are oracles of Zoroaster in Greek verse (with commentaries by Gemistius Pletho and Michael Psellus) printed, *e.g.*, in Opsopœus's *Sibyllina*, 1607. Zoroaster was also identified by Eastern scholars with Baruch. Solomon of Bassora in the Book of the Bee cites a prophecy of his concerning the Star of the Epiphany (ed. Budge, *circa* 37). The prophecy is, of course, Christian.

23. Lost Apocalypses.

16. *Books* of Seth.—The Sethians possessed writings called Books of Seth and others under the name of the *Allogeneis* (ἀλλογενεῖς), a term which meant the sons of Seth. Hippolytus (*Ref. Her.*) quotes much from a Sethian hook. *Pseudepigrapha* of this kind, however, to which might be aclded the prophecies of Parchor (Clem. Alex.), the Gospel of Eve (Epiphanius), and. Justin the Gnostic's Book of Baruch (Hippolytus, *Ref. Hær.* 5). are hardly to be reckoned among apocryphal literature, since there seems to have been in them little or no attempt at verisimilitude of attribution.

17. ***Prayer of*** Joseph.—Quoted by Origen and Procopius (*in Genesim*). It represented Jacob as an incarnation of a pre-existent angel Israel; in the fragments we possess, Jacob is the speaker. The book extended to 1100 στίχοι, being of about the same length as the Wisdom of Solomon.

18. *Eldad and Medad.*—A prophecy attributed to these two elders (for whom see Nu. 11) is quoted in the Shepherd of Hermas (**Vis** 2_{34}). It consisted of 400 στίχοι (about twice the length of the Song of Solomon).

III. POETICAL. 1. *Psalms of Solomon.*—Greek, from Hebrew (lost). A collection of eighteen (or nineteen) Psalms. See APOCALYPTIC, §§ 77-85.

24. Poetical.

2. *Additions to the Psalter.*—(*a*) Ps. 151, on David's victory over Goliath, is appended to the 𝕲 Version of the Psalter. It is a very simple composition, of some merit. (6) Three apocryphal psalms in Syriac, edited by W. Wright (*PSBA*, 1887, p. 257), viz. a prayer of Hezekiah, a psalm on the Return, and two thanksgivings by David on his victory over the lion and the 'wolf.' They are probably Jewish, and of considerable antiquity.

3. *A Lamentation of Job's Wife*, inserted in the 𝕲 text of Job 2, is closely connected with the Testament of Job.

IV. DIDACTIC.—The three main members of this class, the Wisdom of Solomon, Baruch, and the Epistle of Jeremy, have been already noticed (§ 8, 2; § 6, 1; and § 6, 2 respectively). ***The** Testaments of the Twelve Patriarchs* (see APOCALYPTIC, §§ 68-76) have a large didactic element. Besides these there is little to note, save perhaps certain

25. Didactic.

Magical Books of Moses.—Extant in Greek papyri found in Egypt; they have been printed by Leemans and Dieterich (in *Abraxas*). They are not purely Jewish; Jewish names are employed, but there is a large Orphic element. The story of Achiacharus (see ACHIACHAKUS) also ought to he mentioned in this place.

Besides the many extant books and titles, there were probably others of which we know nothing; yet it is the belief of the present writer that many more apocalypses at least have been postulated by recent criticism (*e.g.*, Spitta on the Johannine Apocalypse, and Kabisch on the apocalypses of Esdras and of Baruch) than the probabilities of the case will warrant.

B. *NEW TESTAMENT* (§§ 26-31).

Under this head only a few of the most prominent NT apocrypha can be mentioned; much of the literature is excluded by its late date.

I. GOSPELS.[1] 1. *Gospel according to **the** Hebrews.*—The relation of this book to the canonical Gospel of Matthew cannot be discussed here (see GOSPELS). The facts known about the book are that it was in Aramaic, that Jerome translated it into Greek and into Latin, and that in his time it was in use among the 'Nazarenes' of Syria. Jerome's versions have perished; but he repeatedly quotes from the Latin one. The fragments preserved hy him, by Origen and Eusebius, and by Codex Tischendorf III. of ninth century (566 in Gregory) number about twenty-two. They will be found in Hilgenfeld's *NT **extra** Canonem receptum*, **4**, in the monographs of Nicholson, and Handmann (*Texte u. Unters.*), in Westcott's *Introd. to the Study of **the** Gospels*, and in Zahn's *Gesch. des NTlichen Kanons*, **22**, etc. The fragments quoted contain additions both to the narrative and to the sayings of Jesus. Some of the sayings differ only in form from similar sayings in the canonical gospels; others are independent. The account of the baptism is distinctly Ebionitic. The longest continuous passage describes the appearance of Jesus to James the Just after the resurrection.

26. Gospels, fragmentary or lost.

2. *Gospel of the Ebionites* or *Gospel* of ***the Twelve.***, Epiphanius is the only writer who has preserved us any fragments of this gospel (*adv. Hær.* 30), and from these it is plain that the book was a 'tendency-writing' put into the mouths of the Twelve Apostles (who describe their call, using the first person), and related to the *Greek* Matthew. It was naturally strongly Ebionitic, and it began with the baptism.

3. *Gospel **according to** the Egyptians.*—Probably the earliest Gnostic gospel. A passage is quoted by Clement of Alexandria, who tells us that one Julius Cassianus, a Docetic teacher, used the same words; they also appear in the so-called second epistle of Clement (of Rome). The passage quoted is Encratite in its bearing.

4. *Gospel according to* Peter.—Of this book we have knowledge from the following sources:—(1) A fragment of a letter of Serapion, Bishop of Antioch (A.D. 190-203), addressed to the church of Rhossus, condemning the gospel (after perusal) as Docetic (Eus. *HE* **612**). (2) A statement by Origen (*In Matth.* tom. 17_{10}) that the hook represented the brethren of Jesns as sons of Joseph by a former marriage. (3) A long and important fragment, containing an account of the Passion and Resurrection, found by the French Archaeological Mission in a tomb at Akhmim in 1885, published first in their *Mémoires* (1892), and repeatedly since then. Among German editions must be mentioned those of Harnack, of Schubert, and of Zahn; among English ones, those of Robinson and of Swete. The literature is very considerable. The conclusions upon which critics seem agreed at this moment are: that the fragment is Docetic and anti-Jewish, though saturated with allusions to the Old Testament; and that it shows a knowledge of all four canonical gospels. Its use by Justin Martyr is held probable by most, but denied by Swete (p. xxxivf.).

5. ***The** Fayûm gospel-fragment.*—Contained in a tiny fragment of papyrus among the Rainer papyri at Vienna; discovered by Bickell. It gives the words of Christ to Peter at the Last Supper in a form which diverges largely by omissions from any in the canonical gospels. Hort contended for the view that it was a fragment of a patristic homily and merely a loose quotation. Ed. Harnack, *Texte u. Unters.* 5_4, etc.

6. The Login.—This is the name given by the first editors, Grenfell and Hunt, to the contents of a

[1] On these *see* **also** GOSPELS (index).

single leaf of a papyrus book found by them at Oxyrhynchus. It contains a small number of sayings of Jesus which in part agree with sayings contained in the canonical gospels and in part differ from them. Harnack believes them to be extracted from the Gospel according to the Egyptians; but it is as yet not possible to express a final opinion on their character.

7. *Gospel of* Matthias.—Probably identical with the *Traditions of* Matthias, from which we have quotations. It was most likely a Basilidian work, for the Basilidians professed to regard Matthias as their special authority among the apostles. See Zahn, *Gesch. d. NT* Kanons, ii. 2 751.

8. Γέννα Μαρίας (the Descent of Mary), quoted by Epiphanius (*Hær.* 26 12), was a Gnostic anti-Jewish romance representing Zacharias as having been killed by the Jews because he had seen the God of the Jews in the temple in the form of an ass.

9. Zacharias, *the father of John Baptist.*—A. Berendts in *Studien zur Zacharias-apokryphen u. Zach.-legende* gives a translation of a Slavonic legend of Zacharias which may be taken from an early book, subsequently incorporated into the *Book of James*.

Almost every one of the apostles had a gospel fathered upon him by one early sect or another, if we may judge from the list of books condemned in the so-called Gelasian Decree, and from other patristic allusions.

Of a gospel of Philip we have fragments, descriptive of the progress of the soul through the next world, showing it to have been a Gnostic composition; it was probably very much like the *Pistis* Sophia (a long Gnostic treatise in Coptic), in which Philip plays a prominent *rôle*. The Questions of Mary (Great and Little) was the title of two Gnostic books of the most revolting type, quoted by Epiphanius (*Hær.* **268**).

A Coptic papyrus volume recently acquired by Berlin contains texts as yet unpublished of two Gnostic books connected with the names of the Virgin and John, and also a portion of some early Acts of Peter.

For the most part, however, these heretical pseudepigrapha, where we know anything of their contents, must be

27. Extant Gospels. assigned to a period later than that contemplated by our present scope. Of extant apocryphal gospels two must be mentioned.

1. *Book of James*, commonly called *Protevangelium* (this name being due to Guillaume Postel, who first noticed the book, in the sixteenth century).—Extant in Greek, Syriac, Coptic, etc. A narrative extending from the Conception of the Virgin to the death of Zacharias. The James meant is perhaps James the Just. In one place, where Joseph is speaking, the narrative suddenly adopts the first person. Origen, and perhaps Justin, knew the book. A Hebrew original has been postulated for it. It is undoubtedly very ancient, and may possibly fall within the first century. From it we ultimately derive the traditional names of the Virgin's parents, Joachim and Anne. The work has been edited by Tischendorf (*Evangelia Apocrypha*).

2. Acts *of Pilate*, often called the Gospel *of Nicodemus.*—Greek, Latin, Coptic, etc. In two parts: (1) an account of the Passion and Resurrection; (2) a narrative of the Descent into Hell. Part I. may be alluded to by Justin Martyr, who more than once appeals to Acts of Christ's Passion. It is possible, however, that he may be referring to another apocryphal document which exists in many forms—the *Anaphora Pilati* or official Report of Pilate to Tiberius. In any case, the Acta *Pilati* (Part I.) in some form probably date from early in the second century. Edited by Tischendorf (*l.c.*); see also Lipsius, ***Die Pilatusakten***, and Schubert on the Gospel of Peter.

II. ACTS. 1. *Ascents of James* (Ἀναβαθμοὶ Ἰακώβου), only mentioned by Epiphanius (***Hær.*** 30).—An Ebionite

28. Acts. and anti-Pauline book of which we most likely have an abstract in the end of the first book of the *Clementine* Recognitions. It contained addresses delivered by James the Just in the Temple. See Lightfoot, Galatians, 330, 367.

2. Acts *of Paul and* Thecla.—Greek, Syriac, etc. Tertullian tells us that this romance was composed in honour of Paul by a presbyter of Asia, who afterwards confessed the forgery (***De Baptismo***, 17); and Jerome, quoting Tertullian (probably from the Greek text of the same treatise), adds the detail that the exposure took place in the presence of John. In the present writer's opinion, this may be a false reading: 'apud Iconium' may have been corrupted into 'apud Johannem.' Undoubtedly the romance is the earliest of the kind which we possess. It details the adventures and trials of a virgin, Thecla of Iconium, who was converted by Paul. Ed. Lipsius (Acta Petri et *Pauli*). Professor Ramsay contends for the historical accuracy of much of the local detail. It is now clear that this episode formed part of the *Acts of Paul* which has just been discovered by Carl Schmidt in a fragmentary form in Coptic. Until the text is published, however, little can be said.

The Acts of Paul, Peter, John, Thomas, Andrew, and Philip have all survived in part. They may be referred to some time in the second century. The author of all of them, save the first and last, was most likely one Leucius. The Passions and Acts of the remaining apostles are all later.

III. EPISTLES. 1. The *Abgarus* Letters.—A letter from Abgar Uchama, king of Edessa, to our Lord,

29. Epistles. begging him to visit Edessa and take up his abode there, and an answer from our Lord, promising to send an apostle to Abgarus, are given by Eusebius (***HE*** 1 13), who translates them from Syriac, and derives them from the archives of Edessa. They are very early, and are intimately connected with the legend of the apostolate of Addai or Thaddæus at Edessa. A fragment of a fourth-century papyrus text of the letters (which are very short) is in the Bodleian. They are found also in Syriac.

2. ***Epistle of*** Paul *to* the *Laodiceans.*—Latin. It was founded upon Col. **416**, and is a short cento of Pauline phrases. An Epistle to the Laodiceans is mentioned in the Muratorian Canon. See Lightfoot's Colossians, 347 *ff.*, and Zahn, *Gesch. d. NT Kan.* ii. 2 566; also COLOSSIANS AND EPHESIANS, § 14.

3. *Epistle of* Paul ***to the*** Alexandrines.—Also mentioned in the Muratorian Canon, and nowhere else. Zahn (*l.c.* 58) has printed, from the Bobbio Sacramentary and Lectionary, a lesson purporting to be taken from the Epistle to the Colossians, which he assigns to the Epistle to the Alexandrines, or to some similar Pauline apocryph.

4. *Third Epistle of Paul to* the Corinthians *(and* letter from *Corinth to* Paul).—Armenian and Latin (and Coptic). These are now known to have formed part of the Acta *Pauli*.

There are but few other spurious epistles, and these are all of a distinctly later character.

IV. APOCALYPSES. 1. Apocalypse *of* Peter.—Greek. Quoted by Clement of Alexandria and by the heathen

30. Apocalypses. antagonist of Macarius Magnes (who is possibly Porphyry), and mentioned in the Muratorian Canon. We have now a considerable fragment of it, which was discovered in the same MS as was the excerpt from the Gospel of Peter (see § **26** no. **4**). This contains the end of a prophecy of Jesus about the last times, and a vision of the state of the blessed, followed by a much longer description of the torments of various classes of sinners. It was probably written rather early in the second century, and has had an enormous influence on later Christian visions of heaven and hell. Dieterich, in his *Nekyia*, has pointed out the strong influence which the Orphic literature has had on the writer. A trace of the influence of this apocalypse on Latin documents has been recently pointed out by Harnack in the Pseudo-Cyprianic tract *De Laude Martyrii*, and earlier by Robinson in the

Passion of St. Perpetua, and there is a possible trace in the earlier tract ***De** Aleatoribus*. The Arabic and the Ethiopic *Revelation of* ***Peter*** or *Books of Clement* (see an article by Bratke in Hilgenfelds *Zeitschr.*, **1893**) seem *not* **to** contain the old book embedded in them; but as yet they are not very well known. Ed. Dieterich, Harnack, James.

2. *Prophecy of* **Hystaspes.**—Lost. There are quotations from it in the *Preaching of Paul* (quoted by Clem. Alex.), in Justin Martyr (*Apol.* 1 20 44), and in Lactantius (*Diu. Inst.* 7 15 18). In every case it is coupled with the Sibylline Oracles, with which it is clearly to be associated, as a Christian forgery in pagan form. Ammianus Marcellinus (236) calls Hystaspes a 'very wise king, father of Darius,' Lactantius, 'a very ancient king of the Medes, who has handed down to posterity a most wonderful dream as interpreted by a prophesying boy (sub interpretatione vaticinantis pueri).' The same author represents Hystaspes as saying that the Roman name was to be wiped out, and, further, that in the last days the righteous would cry to God and God would hear them. Justin says that he prophesied the destruction of all things by fire, and the quotation in Clement makes him declare that the kings of the earth should hate and persecute the Son of God—the Christ—and his followers. It is this last passage which fixes the book as Christian rather than Jewish.

V. DIDACTIC. 1. *Teaching of the Apostles* (Didachè).—Greek. The literature of this manual of ethics and church discipline is enbrmous, and the history of its various forms cannot be attempted here. It was discovered by Philotheos Bryennios in a MS of **1056** at Constantinople, and printed first in the year **1883**. It consists of two distinct parts: the first an ethical manual which may be founded on a Jewish document, and reappears in the Epistle of Barnabas; the second relating to church matters, containing disciplinary rules and liturgical *formulæ*. Opinions as to its date differ widely. Harnack would assign it in its present form (which is probably not primitive) to 130-160. It forms the groundwork of the 7th Book of the Apostolic Constitutions.

31. Didactic.

2. *Preaching of* ***Peter.***—Apparently an orthodox second-century book, of which Heracleon and Clem. Alex. have preserved important fragments containing warnings against Judaism and polytheism, and words of Jesus to the apostles. Another set of fragments, which there is no sufficient reason for repudiating, contains a lament of Peter for his denial, and various ethical maxims. There are strong similarities between the first set of fragments and the *Apology of Aristides*. Dobschutz (in a monograph in *Texte u. Unters.*) rejects the second set. The relation of the book (*a*) to a supposed *Preaching* **f Paul,** the existence of which is very doubtful, and (*b*) to the Pseudo-Clementhe literature, is by no means clear. A Syriac *Preaching of Simon Cephas*, published by Cureton, has none of the matter appearing in the quotations from the Greek book.

32. Bibliography. For the books noticed above, and the later documents not named (which are many), the student must consult:—

J. **A.** Fabricius, **Codex** *Pseudepig. Vet. Test.* Hamburg, 1713 and 1723; **Codex** *Apocryphus NT*, *ib.* 1719, 1743 (ed. 2); **O. AT*; Wace add Salmon, ***Speaker's*** *Comm.*, *Apocrypha*; **J. C.** Thilo, **Codex** *Apocryphus Novi Testamenti*; Tischendorf, *Evangg. Apocr.* (ed. z, 1876); *Acta Ap. Apocr.*; *Apoc. Apocr.*; Lipsius, ***Die*** *Apokr.*, *Apostelgeschichten, u. Apostellegenden*; Migne, *Dict.* **des** *Apocr.*; James; *Apocrypha Anecdota*, i. ii.; Vassiliev, *Anecdota Græco-Byzantina*; Lipsius and M. Bonnet, *Acta Apostolorum Apocr.* i. ii.

Editions of individual writings have been specified under their proper headings. **M. R.** J.

APOLLONIA (ἀπολλωνια [Ti. WH]). A town on the Egnatian Road, in that part of Macedonia which had the name Mygdonia and lay between the rivers Strymon and Axius. It was near Lake Bolbe (*Betschik Göl*); but its exact site is not yet known. From the *Itin.* ***Ant.*** we learn that it was 30 R. m. from Amphipolis, and **37** from Thessalonica. Leake places it to the S. of the lake, at the modern village *Polina*; and this is probably right, though others are inclined to look for it more to the W. at the post-station of Klisali, which is seven hours from Thessalonica. Apollonia was at any rate on the main road between Amphipolis and Thessalonica by the Aulon, or pass of Arethusa. Paul and Silas, therefore, 'passed through' the town on their way to Thessalonica (Acts 17 1).† **W.** J. W.

APOLLONIUS (ἀπολλωνιος [VA]; APOLLONIUS; ܐܦܠܘܢܝܘܣ).

1. (Son) of THRASEAS [*q.v.*]; the governor of Cœlesyria and Phœnicia who, according to 2 Macc. (3 5-4 4), induced Seleucus IV. to plunder the rich temple treasury of Jerusalem (see HELIODORUS). He may possibly be the same as—

2. The governor of Cœlesyria under Alexander Balas, who came to the help of Alexander's rival, Demetrius II. (Nikător), who made him chief of the army. This is more explicable if, as in Polyb. xxxi. 21 2, Apollonius was the foster-brother (*σύντροφος*) of Demetrius I. He was besieged at Joppa, and was entirely defeated by Jonathan near Azotus (Xshdod) in 147 B.C. (1 Macc. 10 69 *ff.*). Jos. (*Ant.* xiii. **4 3**) calls him Δαός (or rather Ταός, Niese)—*i.e.*, one of the Dai (the classical Dahæ) on the E. of the Caspian Sea—and erroneously represents him as fighting on the side of Alexander Balas.

3. General of Samaria, one of the officers of Antiochus Epiphanes, beaten and slain by Judas the Maccabee, 166 **B.** C. (1 Macc. 3 10 *ff.*). He is probably the chief tax-commissioner (*ἄρχων φορολογίας*), who previously (168-167 **B.** C.) had been sent to hellenise Jerusalem, and by taking advantage of the sabbath had routed the Jews and occupied a fort there (1 Macc. 1 29 *ff.* 2 Macc. 5 24 *ff.*). He may perhaps be identified with—

4. The son of Menestheus sent by Antiochus Epiphanes to congratulate Ptolemy **VI.** Philometor on his accession (διὰ τὰ πρωτοκλήσια: 2 Macc. 4 21).

5. Son of GENNEUS (ὁ τοῦ Γενναίου); a Syrian general under Antiochus V. Eupător (2 Macc. 12 2).

APOLLOPHANES (ἀπολλοφανης [VA]; Syr. has ܐܦܠܘܢܝܣ, Apollonius?), a Syrian slain by the men of Judas the Maccabee (2 Macc. 10 37).

APOLLOS (ἀπολλως[1] [Ti. WH]), according to 1 Cor., our most important source, was a missionary and teacher who continued Paul's work in Corinth after the first visit of the latter (3 6), and was afterwards his companion in Ephesus, though not perhaps at the time the Epistle was being written (see ἦν in 16 12). Shortly before the writing of the First Epistle ***four*** parties had arisen in Corinth (1 10-12), one of which claimed to be 'of Paul,' and another 'of Apollos'; it argues, therefore, delicacy of feeling in Apollos that he did not comply with Paul's invitation to revisit Corinth again. The invitation itself, on the other hand, makes it plain that there were no very fundamental differences between the two men, least of all as to doctrine. Yet neither is it conceivable that the party-division turned npon nothing more than the personal attachment of their individual converts to the two men respectively. On that supposition there would be nothing so blameworthy about it; and it would be impossible to explain the existence, alongside of them, of the party of Christ, and still more of that of Peter. Our earliest authority for Peter's ever having been in Corinth at all is Dionysius, bishop of Corinth about **170** (Eus. HE ii. 25 8), who, contrary to all the known facts of history, will have it that Peter

1. In 1 Cor.

[1] By contraction, or rather abbreviation, like **Ζηνᾶς** from **Ζηνόδωρος**, **'Αμύνας** from **'Αμύνανδρος**, and **so** on (cp **NAMES**, § 86, end). The fuller form is more probably **'Απολλώνιος** than **'Απολλόδωρος**, of which the usual contractions were **'Απολλᾶς**, **'Απελλᾶς**, or **'Απελλῆς**. The reading 'Απολλώνιος is actually given by D in Acts 18 24. By analogy the accentuation **'Απολλῶς** ought to be preferred to the currently adopted **'Απολλώς.**

came both to Corinth and to Italy simultaneously with Paul. Thus the formation of an Apollos party, as distinguished from the party of Paul, can have been due only to the individuality and manner of teaching of Apollos. Paul finds it necessary to defend himself against the charge that 'wisdom' is absent from his teaching. His answer (1 17-34) is that in substance 'wisdom' is really contained in the simple preaching of the Cross, hut that in form he offers it only to Christians of mature growth, and (this not being the Corinthians' case) that he has purposely kept it in the background in his dealings with them. The teachers who offered' 'wisdom,' and thus excelled Paul in the eyes of many of the Corinthians, however, were assuredly not the Judaisers among whom the parties of Christ and of Peter found their supporters. Apollos, therefore, must he meant. Paul actually says that on the foundation laid by himself in Ccrinth, besides the gold, silver, and precious stones, wood, hay, and stubble have been built (3 12). But the energy with which he pronounces his judgment in 1 19 *f.* 29 25 can be explained only by the fact that the adherents of Apollos overvalued their teacher and subordinated substance to form.

2. In Acts.

With this agrees the notice in Acts **1824-28** (our secondary source; see ACTS),[1] that Apollos was an eloquent man, mighty in the Scriptures, and an Alexandrian Jew. We may accordingly assume that the distinguishing quality in Apollos' teaching of 'wisdom' showed itself in an allegorising interpretation of the OT, such as we see in Philo or in the Epistle of Barnabas. But the fact that he was a Christian and taught the doctrine of Jesus 'exactly' (ἀκριβῶς : 18 25*a b*) contradicts the statements (on the one hand) that he knew only the baptism of John (18 25*c*) and (on the other) that he had to be instructed more perfectly in Christianity by Priscilla and Aquila (18 26*b c*). Whilst, therefore, it is possiblefor us to regard 18 24 25*a b* as derived from a written source which the compiler had before him, 18 25*c* 26*b c* would seem to be later accretions. The effect of these last expressions (even if they are traditional) is to represent Apollos as subordinate to Paul; for, according to 19 1-7, the rest of the disciples of John must receive the gift of the Holy Ghost for the first time at the hands of Paul. As to the rest, the fact that in 19 1-3 mention is made of these as of something new goes to show that originally in 18 25 there was no reference to a disciple of John. Further, Acts 18 28 is not easily reconcilable with what is said in 1 Cor. *36* : that the mission of Apollos was directed to the same persons as that of Paul, and that the church of Corinth consisted almost entirely of Gentile Christians (1 Cor. 12 2 compared with 7 18). In that case Acts 18 26*a* may he attributed to the same author to whom 18 28 (and 18 25*c* **266** *c* ?) must be ascribed.

Of the most recent attempts to deny the existence of the contradictions indicated above none can he pronounced successful. Blass (*Exp. Times*, 7, 1895-96, pp. 241 *ff.*, **564,** and *Philology of the Gospels*, **1898,** p. 30 *f.*) supposes Apollos to have derived his knowledge of Christianity from a book where, as in the second canonical gospel, the baptismal precept was wanting. Arthur Wright (*Exp. Times*, **9,** 1897-98, pp. **8-12,** 437 *f.*) replies, with reason (as it seems tn us), that such use of a hook could not have been intended by the word κατηχεῖσθαι. It is only of ἀκούειν that Blass has heen able to show that in some few cases it is practicnlly equivalent to 'learning by reading' (see the examples, in Stephanus, *Thes.* I., Paris, **1831,** p. 1268 A and B. They are not, however, all of them quite certain. Nor is Jn. **1234** a case in point; the meaning is 'Our teachers have read in the law, and have told us hy word of mouth that the Christ abideth for ever'). No single instance can be adduced in which κατηχεῖσθαι denotes acquisition of knowledge without intervention of a teacher. In particular, in Rom. 2 17 *f.* the meaning is, 'thou bearest the name of a Jew and . . . provest the things that differ, being instructed out of the law' [by frequenting the synagogue, or the instruction of the scribes]; and even in those cases where ἀκούειν has practically the sense of 'read,' the underlying idea is always that the book is read not by the 'hearer' himself, hut by some other person as, for example a slave, so that the primary sense of the word' has never entirdly disappeared. In the case of Apollos, however, the idea that he ised a Christian hook, not however reading it himself hut getting t read to him by some other person, is too far-fetched to he brought into requisition here. To the suggestion (referred to by Blass, **Acta** *Apostolorum, ed. philol.* 1895, ***ad*** *loc.*) that Apollos may have heen orally instructed **by** a man whose knowledge of Christianity in its turn was limited to the contents of a book from which the baptismal command **was** absent, it has to be replied that the supposition is irreconcilable with the ἀκριβῶς of Acts 17 25.[1] Wright himself, however, contributes nothing new to the solution of the question except the emendation of ἐλάλει into ἀπελάλει (so **D),** the verb being then taken as meaning 'to repeat by rote' or at least 'to glibly recite. Even if such a meaning could he established for the word, it would not nearly suffice to remove the difficulties of the passage. Lastly, Baldensperger (*Der Prolog des* **4** *Evangeliums*, **1868,** pp. 93-99) is constrained to take refuge in the view that what Apollos taught ἀκριβῶς consisted only of Messianic matters as enumerated in such passages as Heb. 6 1 *f.*; that the editor of the source of Acts here employed says τὰ περὶ του Ἰησοῦ only from a point of view of his own, meaning all the while not the historical Jesus but simply the Messiah in the larger sense, in whose coming the disciples of John also believed. If this be so. he could not possibly havd expressed his meaning in a **less** appropriate and more misleading way.

1 The reference to Acts **1824-28** occurs in § 11.

3. Other points.

Tit. 3 13, the' onlv other NT passage in which Apollos is named, cannot he used as a historical source; and there is no ground for the conjecture that what constituted the difference between Apollos and Paul lay in the value attached by the former to the administration of baptism with his own hands (1 Cor. 1 13-17), and that thereby he gave an impulse to the practice of baptism for the dead (1 Cor. 15 29). Paul, indeed, regards the church of Corinth, although he has personally baptized hardly any of its members, as wholly his own (1 Cor. 4 15 and often). On the other hand, the hypothesis put forward by Luther (as having already been suggested somewhere) that Apollos wrote the Epistle to the Hebrews is, at all events, preferable to any other that ventures to condescend on a name.

In the lists of 'the Seventy' (Lk. 10 1), dating from the fifth and sixth centuries, Apollos is enumerated, and has the diocese of Caesarea assigned to him (*Chron. Pasc.* Bonn ed., i. **442, ii. 126).** **P. W. S.**

APOLLYON (ΑΠΟΛΛΥΩΝ [Ti. WH], Rev. 9 11. See ABADDON.

1. 'The Twelve.'

APOSTLE (ΑΠΟΣΤΟΛΟΣ, 'a messenger')[2] **was** the title conferred by Jesus on the twelve disciples whom he sent forth, on a certain occasion, to preach and heal the sick. In the earliest Gospel tradition the disciples appear to be spoken of as apostles only in reference to this special mission **(Mk. 314** [ℵB] = Lk. 6 13, cp Mt. 10 2; and Mk. 6 **30** = Lk. 9 10); but the name soon became a customary designation, and is so employed in Lk. **(17** 5 **24** 10) and Acts (1 2, etc.). The number twelve was symbolical, corresponding to the twelve tribes of Israel; and when Judas fell from his 'apostolate' (Acts **125**) the number was restored by the election of Matthias.[3] It is used in this symbolical and representative sense in Rev,. 21 14.

Lists of the Twelve.—In the four lists (Mt. **10 2** Mk. **3** 16 Lk. **6** 14 Acts **1 13)** the names fall into three groups of four names, the first name in each group being constant, while the order of the rest changes. Thus :—

I.	Mk.	Peter	James	John	Andrew.
	Mt. Lk.	Peter	Andrew	James	John.
	Acts	Peter	John	James	Andrew.
II.	Mk. Lk.	Philip	Bartholomew	Matthew	Thomas.
	Mt.	Philip	Bartholomew	Thomas	Matthew.
	Acts	Philip	Thomas	Bartholomew	Matthew.
III.	Mk. Mt.	James of Alphæus	Thaddaeus	Simon the Cananaean	Judas Iscariot.
	Lk. (Acts)	James of Alphaeus	Simon Zelotes	Judas of James	Judas Iscariot.

Mark's order of the first group recurs in Mk. 13 3. It puts first the three who were selected **as** witnesses of the raising of Jairus's daughter (Mk. 5 37), of the Transfiguration (9 2), and of the Agony **(14 33).** Their importance is further marked by surnames given by Jesus, Peter (= Cephas) and Boanerges. Mt. and Lk.

1 Blass now *(Phi.? of Gospels)* expressly rejects the idea.

2 ἀπόστολος, **a** stronger word than ἄγγελος, properly denotes not a mere messenger, hut rather the delegate of the person who sends him. It seems to have heen used among the Jews of the fourth century A.D., of persons sent on a mission of responsibility, especially for the collection of moneys for religious purposes.

3 On this subject, see MATTHIAS, 1.

drop the Aramaic surname Boanerges, and class the' brothers together ('Peter and Andrew his brother'). In Acts the order is accounted for by the prominence of Peter and John in the opening chapters. This seems to have had a reflex action on the writer's mind, for in Lk. 8_{51} 9_{28} we have 'Peter and John and James' though where Peter is not mentioned we have 'James and John,' 954.

The original signification of the term (delegate or missionary) is recalled by its application to Barnabas and Saul (Acts $14_{4\ 14}$), who had been selected under the direct guidance of the Spirit from among the prophets and teachers of the church of Antioch and sent forth on a missionary enterprise. Paul in his epistles defends his claim to he an apostle in the highest sense, as one directly commissioned by God; and in this connection he emphasises his personal acquaintance with the risen Christ (Gal. 1_1 2 Cor. 11_5 1 Cor. 9_1: 'Am I not an apostle, have I not seen Jesus our Lord?'). As 'apostle of the Gentiles' (Rom. 11_{13}) he received full recognition from the chief apostles in Jerusalem (Gal. 2_{7-9}).

2. Paul.

The stress laid by Paul on his own apostolate, as 'not a whit behind' that of the Twelve, was probably a main factor in the subsequent restriction of the title to the original apostles and himself. In the NT, however, it is certainly applied to Barnabas, as we have seen, and almost certainly to Silvanus (1 Thess. 2_6), Andronicus, and Junias (Rom. 16_7)—apart from its more limited reference in the case of the 'apostles of the churches' (2 Cor. 8_{23}) and Epaphroditus (Phil. 2_{25} 'your apostle'). Moreover. we see it claimed in the church of Ephesus by certain persons to whom it is clcnied only after they have been tested and 'found false' (Rev. 2_2).

3. Others.

Rules for deciding the validity of such claims are given in the early manual called *The Teaching of the* Apostles. This book, which shows ns a primitive type of Church life existing in the locality in which it was written confirms the view suggested by the NT of the extension of thk title of apostle beyond the limits of the Twelve and Paul. Apostles are here spoken of as teachers essentially itinerant; ranking above the prophets who may or may not be settled in one place, and in no specified relation to the bishops and deacons who are responsible for the ordinary local administration of the community. Even as the first apostles were sent forth 'without purse or scrip,' so these, 'according to the ordinance of the gospel,' move from place to place, and are not to remain in a settled church more than two days, nor to receive money or more than a day's rations. These wandering missionaries are referred to by Eusebius as 'holding the first rank of the succession of the apostles' (*HE* 3 37 5_{10}; he avoids the actual designation 'apostle,' perhaps in deference to later usage); and the strict regulations in the *Teaching* prove that there was danger lest the frequency of their visits should become burdensome to settled churches.

It is interesting to observe that the tradition of the application of the title to missionaries survives at the present day in the East. Among the Greeks the word for a missionary is ἱεραπόστολος, and the delegates of the Archbishop of Canterbury's mission to the Nestorians are regularly called apostles by the Syrians of Urmi.

Having thus clearly established the wider use of the term 'apostle,' we must return and consider the uniqueness of the position occupied by the Twelve and Paul, to whom par *excellence* the title belongs. The distinction of their office which first comes under notice is that they were witnesses of the Resurrection. This is emphasised at the election of the new apostle in Acts 1_{21} *f.* 'Of the men which have companied with us all the time that the Lord Jesus went in and out among us, one of these must with us be a witness of his resurrection.' Their personal discipleship to Jesus, however, and the special training which he had bestowed upon them, had fitted them to be not only the preachers of faith and repentance to the multitudes, but also the authoritative instructor: of the 'brethren' (cp Acts 2_{42} 'the apostles' doctrine'). Their commission was derived directly from Christ, even as his was from the Father (Jn. 20_{21}, and cp 1 Clem. 45: 'Christ then is from God, and the apostles from Christ'). In performing cures they lay stress upon the fact that they are his representatives; their acts are in fact his (cp especially Acts 3_{16} 934). Certain functions are in the first instance

4. Apostolate.

xercised exclusively by the apostles: as the laying on f hands, to convey the Pentecostal gift to the baptized, and the appointment of local officers in the hurch. In the earliest stage, too, the contributions of vealthy believers are laid 'at the apostles' feet'; though t a later time it is 'the presbyters' who receive the offerngs made for 'the brethren in Judaea' (Acts 4_{34} *f.* 11_{30}).

The authority implied in their commission is nowhere ormally defined; but on two important occasions we re permitted to observe the niethod of its exercise. Thus, in the appointment of the Seven the apostles call n the whole body of believers to elect, and thereupon hemselves appoint the chosen persons to their work by solemn ordination. Again, when the question of the bligation of Gentile believers to observe the Mosaic itual arises in Antioch, it is referred to 'the apostles nd elders' in Jerusalem (see COUNCIL, ii.), and a letter s written in their joint names ('the apostles and elder brethren'). This letter is couched in terms of authoriative advice rather than of direct command; and the uthority which it implies, with regard to the distant ommunities whose interests are involved, is moral ather than formal.

In the churches of Paul's foundation we find that postle acting with a consciousness of the fullest uthority, in appointing presbyters, conveying the gift f the Spirit, and settling all kinds of controverted uestions (Acts 14_{23} 196 1 Cor. 7_{17}). His relation to he Twelve is marked by a firm sense of independence ogether with an earnest desire for concerted action. n the case of Timothy at Ephesus and of Titus in Crete we see him delegating for a time during his own bsence his apostolic authority.

For the relation of the apostolate to other forms of he Christian ministry, *see* CHURCH, § 12.

Literature. Bishop Lightfoot's note 'on the name and office of an Apostle' (Comm. on Gal. 5th ed. 92-101) had, even before the recovery of the *Teaching*, destroyed the fiction of the limitation of the term in the first ge. It needs now to he supplemented by Harnack's important iscussion, *Lehre der Apostel*, 93-118. The whole subject as been freshly and vigorously treated by Hort in Ecclesia *passim*). J. A. R.

APOTHECARY (רֹקֵחַ **Ex.** $30_{25\ 35}$, רֹקֵחַ Eccl. 10_1). The Heb. word means 'perfumer.' See CONFECTION, PERFUME. 𝔊's term is μυρεψός, the medical or magical aspects (*see* φαρμακια, -κευειν, -κον in 𝔊) of whose trade may be seen in Ecclus. **388**, where his skill in compounding the medicines (*v.* 4 φαρμακα, *medicamenta*) that the Lord created out of the earth is referred to. In Neh. 38 is mentioned a guild of perfumers, one of the 'sons' or members of which was Hananiah (the idiom is effaced in RV, and misrepresented in AV, which gives 'son of one of the apothecaries').

APPAIM (אַפַּיִם, εφραιμ [B]; αφφ. [A]; ωφειμ [L]), a Jerahmeelite (1 Ch. 2_{30} *f.*).

APPARITION (φαντασμα), Mt. 14_{26} RV. See DIVINATION, § 3 (3), SOUL.

APPEAL. On inferior and superior courts, or what might be called courts of review or of appellate jurisdiction in the Hebrew commonwealth, see GOVERNMENT, §§ 19, 31, and LAW AND JUSTICE, § 16. As regards Roman criminal procedure,—the appeal of Paul to Cæsar is best understood from the narrative of Festus to Agrippa (Acts 25_{14-21}). Accused by his compatriots in 'certain questions of their own superstition,' and asked whether he was willing to go to Jerusalem and there be judged, he had 'appealed' (ἐπικαλεσαμένου) to be reserved for the hearing (διάγνωσιν, *cognitionem*) of Caesar. The apostle as a Roman citizen was well within his rights when he invoked the authority of the emperor and thereby virtually declined the jurisdiction alike of the Jewish courts and of the Roman procurator; and his reasons for choosing to do so are not far to seek.—Under the republican procedure every Roman citizen had the right of *provocatio*

ad populum. From the time of Augustus the populus ceased to exercise sovereign criminal jurisdiction ; the .emperor himself took cognisance of criminal cases as a court of first instance, having co-ordinate jurisdiction with the senate. —The *quæstio* procedure continued as before to be the ordinary mode of trial.

APPHIA (απφια [Ti. WH], etc., *APPIA*, etc. Cp especially Lightf. Col. *and Philem.* **372** *ff.*), probably the wife of Philemon (Philem. 2),

APPHUS (cαφφουc [A]; cαπφ. [ℵV]), 1 Macc. 25. See JONATHAN, **18**, **MACCABEES**, § 5.

APPII FORUM, RV ' Market of Appius' (αππιου φορου [Ti. WH] ; modern ***Foro Appio***), a well-known halting-place on the *Via Appia*, where Paul was met by brethren from Rome (Acts **28** 15). The distance from Rome is given in the *Ztin. Anton.* **(107)** as **43** R. m. (and so perhaps *It. Hier.*—*e.g.*, Migne, *PL.* **8794**, but in other edd. [611 *f.*] as **37).**

For inscription on XLIII milestone, found near Foro Appio, see *CIL* x. pt. i. **686.** The road leading to Appii Forum from the south through the district of the Pontine Marshes was often abandoned in favour of **a** journey by boat (cp Horace, *Sat.* i. **5 1-26,** where Appii Forum is described (*l.* **4)** as being 'Differtum nautis, caoponibus atque malignis.' See also THREE TAVERNS.

APPLE (תַּפּוּחַ; Pr. **2511** Cant. 2 3 5 7 8 [9] 8 5 Joel 1 12†, see also FRUIT, § 12), by some understood as a generic name including various fruits, and by others supposed to mean not the apple but the quince, citron, or apricot.

1. Name.

The origin of the Hebrew name is not quite certain ; but there seems no sufficient reason for rejecting the ,accepted derivation from נפח, to breathe ;[1] the name thus alludes to the perfume of the fruit. תפוח in post-biblical Hebrew, and the corresponding word *tuffāḥ*[2] in Arabic, ordinarily denote the 'apple'; and this rendering is, so far, supported by the ancient versions—Greek, Syriac, Arabic, Latin, and the Targum. It must be admitted, however, that all the words used—*μῆλον*, *ḥazzōrā*,[3] חזור, *tuffāḥ*, *malum* (s. pornurn)—are capable, with or without the addition of an epithet, of being applied to other fruits ; *μῆλον*, indeed, originally meant 'large tree,' or fruit in general, and only gradually became confined to the apple;[4] cp the very wide use of *pomum*, *poma* in Latin. Still, an examination of the biblical passages where תפוח occurs seems to show that some particular fruit is intended ; and the question must be answered by considering (1) which kind of fruit possesses in the highest .degree the qualities of beauty of colour and form, of fragrance, and of efficacy in overcoming the feeling of sickness ; and (2) which fruit-tree was most likely, under the conditions of climate and of botanical history, to he found abundant in Palestine during biblical times. [Though all the six occurrences of תפוח are possibly, not to say certainly, post-exilic, the antiquity of the cultivation of the tree (or class of trees?) in Palestine is proved by the place-names Tappuah and Beth-Tappuah.]

2. Identification.

The following identifications have been proposed :—(1) apricot (Tristram, *FFP* 294) ; (2) apple (especially WRS, *J. Phil.* 13 65 *f.*) ; (3) citron or orange (Del. *Comm.* ***on Prov.***); (4) quince (Houghton, *PSBA* 12 42-48 [1889-90]).

[1] It seems doubtful whether there was, **as** postulated by Löw ***(Arum. Pflanzennamen,*** **156)** and Houghton *(PSBA* 12 47 [1889-90]), any word תפח to swell, even in Rabbinic Hebrew. It is at all events unknown to biblical Hebrew, to Syriac, and to Arabic. See, further, Lag. *Uebers.* 111, 129 ; and **F.** Hommel, *Aufsätze u. Abhandl.* 107, and in *ZDMG* **44546 ('90).**

[2] This must be **a** loan-word in Arabic (Frankel, ***Arum.*** *Fremdw.* 140), probably from Aramaic, though no trace of it has yet been found in Syriac.

[3] Lag. is inclined to derive this, the Aramaic equivalent of תפוח, from the Armenian word for apple (*ḥntsor*) and thus prove that the fruit came to Semite lands from Armenia (*Uebers. ll. cc.*); but Hommel shows the probability of the word being genuinely Semite, connecting it with an Arabic root *ḥanaza* (*Aufsätze u. Abhandl.* 107).

[4] Hehn and Stallybrass, *Wanderings of Plants* ***and Animals,*** **499.**

1. With regard to the first of these—the apricot (*Prunus Armeniaca*, L.)—it is to be remarked that it is not mentioned by Theophrastus, and does not appear to have been known to the Greeks or the Romans before the commencement of the Christian era (DeC. *Orig.*(2) **171).**

Its original home was **E.** Asia (probably China), whence it gradually spread westward to Armenia (*μῆλον Ἀρμενιακόν*, *malum armeniacum*); hut Tristram is certainly wrong in saying ***(Nut.*** *Hist.* **335)** that it is ***native*** there.

The present abundance of the' apricot in Palestine is almost certainly post-biblical.

2. The apple—*Pyrus Malus*, L.—is found without doubt in a wild state in Northern Asia Minor, especially about Trebizond, and occasionally forms small woods.

It extends eastwards to Transcaucasia, and apparently to Persia (cp Boissier, *Fl. Orient.* **2656).** Sir Joseph Hooker says that it is 'apparently wild' in NW. Himalaya and W. Thibet, but that everywhere **else** in India it is cultivated (*Fl. Brit. Ind.* **2373).** De Candolle (*Orig.* 180) thinks the apple was indigenous and cultivated in Europe in prehistoric times ; but Boissier (*l.c.*) restricts its natural occurrence to Macedonia and Eubcea.

In any case the original apple clearly required a cool climate. Under cultivation. there have been obtained varieties which will tolerate and even 'require a warmer one ;[1] but these are notoriously modern inventions, and it is absurd to take account of them in considering the ancient history of the fruit. In truth the original apple —and the apple of biblical times was presumably somewhat similar—cannot have been very attractive : it was in fact a 'crab' only about an inch in diameter.

Sir Joseph Hooker says (from his own knowledge) 'Palestine is too hot for apples.' With this agrees Tristram's account :

'Though the apple is cultivated with success in the higher parts of Lebanon, out of the boundaries of the Holy Land, yet it barely exists in the country itself. There are, indeed, **a** few trees in the gardens of Jaffa ; but they do not thrive, and have a wretched, woolly fruit. Perhaps there may be some at 'Askalān. What English and American writers have called the "apple," however, is really the quince. **The** climate is far ***too*** hot for our apple tree' (*NHB* 334 *f.*).

As there is no evidence of the apple ever having been found native in Syria, those who render *tappūaḥ* 'apple' have to show (1) that it was introduced from without (Pontus), and (2) that it became established when introduced. Both propositions are improbable. What is said above of the introduction of a few modern sorts into Syrian gardens is true ;[2] but it is impossible to infer from this fact that the biblical *tappūaḥ* was the apple.

The strongest argument for the apple is that *tuffāḥ* is used in modern Arabic for this fruit ; but, as we have seen above, the word may have wider significance, and it is exceedingly probable that in such passages as those quoted by Robertson Smith in an article (*Journ. Phil.* 65 *f.*) which, though short, appeared to him (prematurely?) to be almost decisive, it is really the quince that is meant. Even if 'apple' be the usual modern meaning of *tuffāḥ*, it **is** far from uncommon in botanical history for a name to pass from one to another of two plants so nearly allied as the quince and the apple.

[J. Neil *(Pal* Explored, '82, p. **186)** differs widely from Prof. G. Post of Beyrout (Hastings, *DB*, 'Apple'), who argues that the apple as grown in Palestine and Syria to-day alone fulfils all the conditions of the *tappuaḥ.*

Post remarks, 'almost **all** the apples of Syria and Palestine are sweet (Cant. **2** 3). To European and American palates they seem insipid. But they have the delicious aroma of the better kinds. . . . Sick persons almost invariably ask the doctor if they may have an apple; and if he objects they urge their case with the plea that they only want it to smell.' This being so, it is needless to conjecture that 'such an epicure as Solomon would have had many of the choicest kinds,' for, according to Post, the ordinary and (to **us)** disappointing Syrian apple can still, without poetic idealisation, he referred to in the language of Canticles. But was Canticles written for Syria?]

3. No citrus (orange or citron) will do.

The citron has its home in the sub-Himalayan tract of **N.**

[1] Thus the best American apples succeed in Great Britain only under glass.

[2] Similarly, in the Deccan four sorts of **apples are** now found ; but these **are all** introduced, two from England and two from Persia.

India. Thence it spread W. through Mesopotamia and Media, hence its current botanical name, *Citrus mēdica*, L.[1] It is first mentioned by Theophrastus (τὸ μῆλον τὸ μηδικὸν ἢ τὸ περσικόν; *Hist.* iv. 4 2); but he says that it is not eaten (οὐκ ἐσθίεται). It was probably, therefore, not much developed by cultivation.

The Romans did not know the citron. Their citron wood was the wood of *Callitris quadrivalvis*, Vent., from N. Africa. The true citron was probably not introduced into Italy till the third or fourth century A. D.

[The claims of the citron[2] (to be the *tappuaḥ*) are so exceedipgly slight that its introduction into Palestine is chiefly interesting in connection with the Feast of Tabernacles, at which, in the time of Jos., it was carried by the Jews (a custom which is continued to the present day: see 'The Citron of Commerce,' *Kew Bulletin*, June 1894). It was introduced at any rate during the period of their relations with Media and Persia, and we find it depicted upon Jewish coins (see Stade, *GVI* 2, facing p. 406).

The statement of Jos. (*Ant.* xiii. 135) is, that according to the law of the Feast of Tabernacles branches of the palm and citron tree (θύρσους τῶν φοινίκων καὶ κιτρίων) were to be borne hyevery one: elsewhere (*ib.* iii. 104) he specifies the myrtle, the willow, and boughs of palm-tree and of pome-citron (μῆλος τῆς περσέας). The Talmudic law particularly ordained that the fruit should he held in the left hand, and the branches (or לולב) in the right.[3] The priestly law, on the other hand, has not the precision which the translators and exegetes of a later age gave to it. In Lev. 23 39 *ff.* (H), among the requirements for the feast of ingathering, stands the 'fruit of goodly trees,' or (better) 'goodly tree-fruit' (פרי עץ הדר; cp 𝔊BAL, καρπὸν ξύλου ὡραῖον), which Targ., Pesh., and ancient Jewish tradition identified with the orange or citron.[4] This identification is open to question, and the expression may he connected preferably with the 'fair honghs' mentioned in the account of the Feast of Tabernacles, 2 Macc. 10 6 *ff.* (κλάδους ὡραίους; *ramos virides*; Pesh. om.). Nor is the citron specifically mentioned in the somewhat fuller and less vague list in Neh. 8 15 (the Pesh. apparently renders 'palm-trees' by 'citrons'), although commentators found an allusion to it in the עץ שמן, the fat *or* oily tree (AV 'pine,' RV 'wild-olive').]

The orange was unknown to the Greeks and Romans. It was introduced into Mediterranean countries by the Arabs about the ninth century.

4. Whereas the development of the modern apple is most probably to be attributed to the northern races, the quince (*Pyrus Cydonia*, L. = *Cydonia Vulgaris*, Pers.) is a fruit characteristic of the Mediterranean basin and requires a warm temperate climate. A native of W. Asia, it extended to the Taurus, and thence spread through all Mediterranean countries.[5] The best sort came from Crete; hence μῆλον κυδώνιον and *Malum cotoneum*, and the various European names (*Codogno*, Ital.; *Coing*, Fr.; and *Quince*, Engl.). Hehn (*Kc.* 185) says: 'The golden apples of the Hesperides and of Atalanta were idealised quinces . . . Its colour, like that of the pomegranate, made a lively impression.' This would well accord with the reference in Prov. 25 11; whilst the well-known aroma of the quince (much stronger than that of the apple) would explain Cant. 2 5 7 8 [9]. It is true that the taste of the fruit, unsweetened, is harsh and bitter, and there is hence some difficulty in reconciling our theory with Cant. 2 3; but something must be there allowed for the idealisation of the picture, and undoubtedly the fruit could be prepared in such a way as to have a delicious taste. Moreover the whole classical history of the fruit is saturated with erotic suggestion, and this falls in with the repeated mention of it in Canticles. N. M.—W. T. T.-D.

[1] Sir Joseph D. Hooker (*Fl. Brit. Ind.* 1 514) gives its range as Garwhal to Sikkim.

[2] אתרוג, from Pers. *turunj*. For the various traditions connected with it cp Levy, s.v. See Löw, 46.

[3] The Daphnephoria as depicted by Leighton is a familiar and popular illustration of this custom.

[4] Rashi referred to the annual beauty of the tree, and the Talmud supposed that הדר = הידר—*i.e.*, Glop—an allusion to the fact that the citron grows beside all waters (cp Field, *Hexapla*, *ad loc.*). See De Candolle (*Orig.*(2) 143 *f.*), who quotes Risso to show that the citron was not recognised by the translators of 𝔊. If חוור is really a genuine (and ancient) Semitic word (cp above, § 1, n. 3), it is tempting to read it here instead of הדר.

[5] De Candolle, 189, says: 'Avant l'époque de la guerre de Troie.'

APRONS. For חֲגֹרוֹת, the (fig-leaf) coverings of Gen. 3 7 (AV mg. 'things to gird about,' RV mg. 'girdles'; 𝔊BAL περιζώματα), see GIRDLE, 2. For מִטְפַּחַת (Ruth 3 15 AV mg.) see MANTLE, § 2, no. 3. The σιμικινθια [Ti. WH] of Acts 19 12† (used for healing purposes) are the *semicinctia* or aprons worn by servants and artisans.

AQUILA (ακυλας [Ti. WH]) is the Latin name by which alone we know one of the Jewish companions of Paul. A Jew, native of Pontus, he had removed to Rome and there carried on his calling as tent-maker; probably it was also in Rome that he married his wife Prisca or Priscilla, whose name is always associated with his—most commonly indeed placed before it. The banishment of the Jews from Rome by Claudius (*circa* A.D. 49) led to the settlement of Aquila and his wife in Corinth (Acts 18 2). Here, presumably, their acquaintance with Paul began and they were converted to Christianity. It was with them that the apostle, also a tent-maker, lodged on his first visit to Corinth. (Afterwards, looking back upon his relations with them at this time [Rom. 16 3] he applies to them the words: 'fellow-workers in Christ Jesus, who, for my life, laid down their own necks; unto whom not only I give thanks, but also all the churches of the Gentiles.') From Corinth Aquila and Priscilla accompanied Paul to Ephesus (Acts 18 18), and here they remained behind while he went on to Jerusalem. At this time Apollos (*q.v.*) arrived in Ephesus, and the zealous pair undertook to 'expound unto him the way of God more perfectly' (*v.* 26). Writing to the Corinthian Church after his return to Ephesus, Paul encloses the message: 'Aquila and Prisca salute you much in the Lord, with the church that is in their house' (1 Cor. 16 19). What is meant by this church is not quite clear; but the expression shows that they must have held a somewhat prominent and perhaps official position in the Ephesian community. That Ephesus continued (or was supposed to have continued) to be their home long after Paul left it is shown by the salutation addressed to them in 2 Tim. 4 19. That they are saluted in Rom. 16 3 shows (on the assumption that Rom. 16 3-20 is an integral part of the epistle in which it now occurs; see ROMANS) that at some period they must have returned to Rome for at least a season; but the occurrence of their names here is one of the facts that are held to make it probable that the salutations of Rom. 16 3-20 really belong to an Ephesian epistle.

Ecclesiastical tradition has little to say of either Aquila or Priscilla; in some late forms of the legend of Luke, Aquila and Priscus are represented as having been the disciples and lifelong companions of that evangelist, and as having had his Gospel entrusted to them by him. They are enumerated in the lists of the 'Seventy' (Lk. 10), dating from the fifth or sixth century, Priscas being sometimes read for Prisca. See Lipsius, *Apokr. Ap.-gesch.* i. 203 *ff.* 399 ii. 2 367.

AR, AR OF MOAB, is mentioned in the two ancient songs which celebrate Israel's passage across Moab:—Nu. 21 15, 'the slope of the valley that stretches to the seat' or site 'of Ar' (עָר, ηρ [BAL]); *v.* 28, a 'fire hath devoured Ar of Moab (עָר מוֹאָב; Μωαβ [L]; ἕως M. [BA],—*i.e.*, עד מ׳; so Sam. and some Heb. MSS) and consumed the high places of Arnon.' This 'Ar Moab is usually taken to be the same as the 'Ir Moab, 'city of Moab' (עיר מואב; πόλιν Μωαβ [BAL]), 'which is on the border of Arnon at the utmost part of the border' (Nu. 22 36), where Barak met Balaam when he came to Moab from the E.; and indeed עָר in those ancient songs may be the primitive spelling of עִיר. It is also the 'Ar Moab of Is. 15 1 (ἡ Μωαβεῖτις [BℵAQΓ]), there parallel to Kir Moab, another chief fortress of the country, the present Kerak. It may also be 'the city (עיר) in the midst of the valley'—*i.e.*, of Arnon (Deut. 2 36 Josh. 13 9 16 and 2 S. 24 5). In harmony with these passages, it is called the 'border of Moab' in Deut. 2 18 (𝔊AFL Αροηρ); but in *vv.* 9 (Αροηρ [A?(sup ras) FL]) and 29 (Αροηρ [BFL]; Αροηλ [A]) of the same chapter it seems

to mean a district rather than a town, and in this connection it is interesting that @* renders *'Ar Moab* in Is. 15 by Moabitis. Our present knowledge of the topography of Moab does not enable us to identify the site of 'Ar, the city.

We may he sure it was not the modern Rabba (so the *PEF* map), the Areopolis which in the fourth century of our era was the capital of Moab. Others have suggested the Meḥātet el-Ḥaj on the left hank of the Arnon opposite Aroer (see Burckhardt, ***Syr.*** 374).

More probably (cp Nu. 2236) it lay at the E. end of one or other of the Arnon valleys.

There Langer (***Reisebericht***, xvi.) has proposed Lejūn (Legio ?) described by Doughty *(Arab. Deserta*, 1 20) as a 'four-square, limestone-built, walled town in ruins, the walls and corner towers of dry block-building, at the midst of every wall a gate.' G. A. S.

ARA (אֲרָא ; αρα [BA] -αι [L]), in **a** genealogy of ASHER (*q.v.*, i. § **4),** I Ch. 7 38†. Perhaps ארא should he pronounced אֻרָא (Ura) for אוּרִיָּהוּ (Uriah). See ULLA.

ARAB (אֲרָב, αιρεμ [B], ερεβ [AL]), a site in the hill-country of Judah (Josh. 15 52). If DUMAH (*q.v.*, **4)** is ed-Dōmeh, there may possibly be an echo of Arāb in *er-Rabīyeh*, the name of a site, with ruins, in the mountains of Judah, S. of Hebron (*PEF Mem.* 3 311 360).

ARABAH (הָעֲרָבָה, η αραβα [BAL], often translated by η rrpoc (εις, επι, κατα) δυςμας, sometimes by καθ' (προς) εςπεραν [BAL]), as a common noun, from a root probably meaning 'dry' (cp ARABIA, § 1), is used as a parallel (Is. 35 1 6, etc.) to מִדְבָּר, 'desert-steppe,' and to אֶרֶץ צִיָּה, 'parched ground,' with much the same force. **As** a proper name, with the article, it is generally confined to the great depression of the Dead Sea valley, 'the 'Ariibah.' So correctly in RV ; in AV it is more usually translated 'plain' (*q.v.*, *6)* or 'wilderness' (but in Josh. 18 18 ''Arabah,' 𝔊^BAL Βαιθαραβα, see BETH-ARABAH). Along with the hill-country, the slopes, the Shephēlah, and the Negeb, it is reckoned as one of the great parallel divisions of the land (Dt. 1 7 Josh. 11 16 12 8), and **it** is clear that the name was applied not only to the depression from the Lake of Galilee (Dt. *3 17* ; cp ARBATTIS) to Jericho (2 K. **254)** and the Dead Sea (which was called the Sea of the 'Arabah : Dt. **449**, etc., Josh. 316, etc.), but also to the rest of the same great hollow as far as the Gulf of 'Aḳabah (Dt. 1 *1)*.

Different parts of the Arābah were called 'Arbōth (construct plur. of 'Arābah) ; cp Josh. 5 10 Jer. 395, etc., EV 'plains of Jericho' ; Nu. 22 1 26 3, etc., 'plains of Moab.' See too AKBATTIS.

To-day the name *El-'Araba* is confined to the south of the line **of** cliffs that crosses the valley obliquely a few miles south of the southern end of the Dead Sea; and all N. **of** this is **known** as *El-Ghōr*, 'the depression' (Rob. ***BR*** **2490).**

The singular geological formation of the 'Arābah **is** indicated under PALESTINE (§ **3).** Here it is sufficient to explain how such a name was applied to the valley even N. of the Dead Sea. In spite bf the enormous possible fertility of the Jordan valley under proper irrigation, the vast stretches of jungle, marl, saline soil, and parched hillsides out of reach of the streams, along with the sparseness of cultivation in most ages (owing to the great heat, unhealthy climate, and wild beasts), fully justify the name 'Arābah. In the NT also the valley is called a wilderness (τῇ ἐρήμῳ Mk. **14**).

For the 'Arābah S. of the Dead Sea, see Rob. ***BR*** i. and ii., Hull *PEF Mem.*, 'Geology,' and for the part N. **of** the Dead Sea, 'Stanley, *SP* 7 ; Conder, ***Tent Work in*** *Pal.* **14** ; GASm. *HG* 22*J*. ***G.*** A. S.

ARABAR, BROOK OF THE, AV **River of** the **Wilderness** (נַחַל הָעֲרָבָה), is in Am. 6 **14** the southern limit of the land of Israel in opposition to the northern Pass of Hamath. The name occurs nowhere else; but by some has been taken as another form of Brook of the 'Arābīm (הָעֲרָבִים ; EV BROOK OF THE WILLOWS [AV^mg. BROOK OF THE ARABIANS]—rather of the *Populus euphratica : ZDPV* 2 209), given in Is. 15 7 as the southern boundary of Moab. This may be the long Wādy el-HBsy (or Hessi, *PEF* Map) which Doughty (*Ar.* ***Des.*** 1 26) describes as dividing the uplands of Moab and Edom, and running into the S. end of the Dead Sea; by some thought to be also the Brook ZERED. It is doubtful, however, whether the Israelite kingdom could ever have been described as extending S. of the Arnon. Hoffmann (*ZATW* 3 115 ['83]) suggests that the Brook of the Arabah may have lain at the N. end of the Dead Sea. 𝔊's rendering, τοῦ χειμάρρου τῶν δυσμῶν [BAQ], is no help. It is to be noted that N. Israel under Jeroboam II. in the time of Amos is stated in 2 K. 14 25 to have extended from 'the entering in of Hamath unto the Sea of the Arabah.' The difficulty is increased by the uncertainty as to whether Amos means to include Judah. G. A. S.

ARABATTINE (ακραβαττηνη [AK]), I Macc. 5 3† AV, RV AKRABATTINE.

ARABIA, ARABIANS (עֲרָב ; gentilic עֲרָבִי and in Neh. עֲרָבִי, pl. עֲרָבִים, also once עַרְבִיאִים, and once Kt. עַרְבִיִּים ; αραβ[ε]ια decl. and indecl. [BKAL, etc.], -Βιccα [BℵA], αραψ (-αβος) [BℵAL, etc.], αραβ[ε]ι [BℵA]).

The name *'Arab'* (ערב) seems originally to have meant nothing more than 'desert' : hence 'people of the desert.' So Isaiah[1] uses the word, 'In the forest in the desert (*'ărab ;* but 𝔊 ἑσπέρας) ye halt for the night' (Is. 21 13).

1. Earlier OT usage.

More usual in Hebrew is the fem. form *'ărābāh* (*e.g.*, Job 24 5 39 6), a word employed as a proper name to denote the desolate valley, in which the Dead Sea is situated, reaching to the north-eastern extremity of the Red Sea (see ARABAH, i.). In the OT the term *'Arab*, as the name of a particular nation and country, is confined to comparatively late writings ; it must therefore appear highly improbable that the Homeric 'Ερεμβοί (*Od.* **484)** are to be identified with the Arabs. The lists in Genesis, which specify various Arabian tribes, do not mention the name—a very significant indication of their antiquity. The word being certainly an appellative ('desert') in Is. **21** 13 (with EV cp Hab. 1 8 𝔊, Zeph. 33 𝔊), the heading מַשָּׂא בַּעְרָב, 'Oracle concerning the Arabs,' cannot be in accordance with the author's real meaning.[2] No certain instance of the use of *'Arab* as a proper name occurs before the time of Jeremiah. He speaks of 'all the kings of *'Arab'*[3] (ואת כל־מלכי ערב, Jer. 25 24). The words which follow in MT, ואת־כל מלכי הערב, are of course **a** dittography; in order to make sense the scribes pronounced הָעֶרֶב 'the mixed people,' a form which really occurs in *v.* 20, as well as in Ez. 305 and I K. 10 15 (where 𝔊 reads הָעֵבֶר for הערב). The Greek text of Jer. 25 **24** (*κ. πάντας τ. συμμίκτους* [BℵQ],[4] it may he noticed, does not presuppose a repetition, and moreover (followed by Co.) omits the word 'kings,' necessary though it is to the sense. The phrase, 'like a *'Arābī* in the desert' (Jer. *32*, κορώνη [BKA] ; Aq. αραψ [Q^mg.]), may be explained to mean either 'like an Arab' or 'like a Nomad'—the word has not yet acquired a strictly ethnographical signification. The same thing applies to a passage dating from the end of the Babylonian Exile, 'No *'Arābī* shall pitch his tent there, nor shall shepherds cause their flocks to lie down there' (Is. 13 20, Ἄραβες [BℵA^mg.]). In Ez. 27 21, however, *Arab* (עֲרָב ; Αραβ[ε]ια [BAQ], with the note εσπερα [Q^mg.]), appears as the name of a people, coupled with Kedar, a desert tribe very frequently mentioned at that period (see ISHMAEL, § 4 [2]).

[1] Isaiah's authorship, it is true, has heen disputed (see **ISAIAH,** § 9).

[2] 𝔊 omits **it ;** but Aq. Symm. Theod. all have it.

[3] Giesebr., however, while agreeing as to the dittography which follows, denies that 'and all the kings of *'Arab'* are the words of Jeremiah ; the closing words of the verse ('who dwell in the wilderness') alone are genuine ; they give the locality of those 'who have the comers of their hair polled' (*v.* 23). Cp. 926 [25], 'all that have, etc., who dwell in the wilderness.'

[4] 𝔊^A has κ. π. τ. σ. αὐτοῦ.

It would seem that the name of the Arabs came into use among the Hebrews at a time when the old names Ishmael, Midian, etc., were disappearing from ordinary speech. This change may be connected with the fact that during the period in question various tribes were advancing from the S. into the northern deserts and dispossessing the former inhabitants, who, in all probability, were closely akin to the Hebrews. Such shiftings of the population have occurred repeatedly in the course of ages. However unproductive the districts to the E. and to the S. of Palestine may appear *to* us, they are nevertheless, from the point of view of the Nomads, decidedly preferable to many parts of Arabia proper,

2. Other sources. From the ninth century B.C. and onwards, the name of the Arabs occurs in the Assyrian inscriptions, where it presents a variety of forms[1] (*Arabi*, *Arubu*, *Aribi*, etc., the adjective being *Arbaya*).

The name *Urbi* (*KB* 284 *f.*), however, can scarcely be, as Delitzsch (*l.c.*) supposes, another form of the same word and the equivalent of the Arab ʿ*Urb* (which appears *to* be quite late) and of the Heb. עֲרָב. The Arabs mentioned in the cuneiform inscriptions were probably all, or for the most part, natives of the Syrian desert, though we have no reason to assume that the name was applied to them exclusively as distinguished from the inhabitants of Arabia proper.

The inscriptions of the Persian King Darius (*e.g.*, Behistūn, 1. 15) mention *Arabāya* among the subject lands, always placing it after Babylonia and *Athura* (*i.e.*, Assyria. Mesopotamia proper, and possibly northern Syria) and before Egypt; here also the word must refer to the great deserts of Syria—perhaps also to those of Mesopotamia and the Sinaitic peninsula. Æschylus (*Pers.* 316), the first extant Greek writer in whose works the name occurs, speaks of a distinguished Arab in the army of Xerxes, and the contemporary authority whom Herodotus follows in his account of the Persian army makes mention of Arabs on the same occasion (Herod. 769). While the notions of Æschylus, however, about the geographical position of the Arabs, are altogether fantastic—he represents them as dwelling near the Caucasus (*Prom.* 422)—Herodotus shows himself much better informed. He applies the term Arabia to the whole peninsula (cp Herod. 2 11 3 107-113 4 39); but, as might have been expected, he refers in particular to those Arabs who inhabited the country between Syria and Egypt (2 12 30 3 4 7 *ff.* 8 80 91, etc.). It is also to be remarked that, in accordance with a peculiar classification, he gives the name of Arabia to that part of Egypt which lies to the E. of the Nile valley (2 8, etc.). Xenophon (*Anab.* vii. 8 25) speaks of a governor set by the Persian king over 'Phœnicia and Arabia,' by which is meant the S. of Syria, including Palestine and the neighbouring desert—a separate governor being set over 'Syria and Assyria.' Similarly in the *Cyropædia* he doubtless always means by Arabia the desert lands which were to some extent dependencies of the Persian Empire, not the peninsula itself; we must remember, further, that Xenophon had no definite ideas about these countries, through which he had not himself travelled. The name Arabia is used, in particular, for the desert of Mesopotamia (*Anab.* i. 5 1); it can hardly be an accident that this very district is called ʿ*Arab* by Syriac writers from the third century after Christ and onwards. Whilst, however, the term is regularly applied to that part of the desert which remained under Roman dominion till the Mohammedan conquest, the eastern portion, which belonged to Persia, is more commonly known as *Bēth ʿArabāyē* (or *Bā ʿArbāyā* in the Arabicised form)—*i.e.*, 'land of the Arabs.' Traces of this usage are found in late Greek authors also.

A strictly ethnographical sense belongs to the word 'Arab' in the writings of a contemporary of Herodotus,

3. Later OT writers. Nehemiah, who suffered much from the enmity of an Arab (Neh. 2 19 6 1 *6*) and enumerates 'the Arabs' as such in the list of his opponents (Neh. 4 7 [1]). The Arab in question bears a name which, according to the Massoretic vocalisation, is to be pronounced GESHEM (*q.v.*) or Gashmū, and appears in the Greek text as Γησάμ [BℵA], Γισαμ [L]; the correct form is probably *Gushamū*, a well-known Arabic name. It is very likely that at that time the great migration of the Nabataeans had already happened (see EDOM, § 9, NABATÆANS). The Chronicler too refers to 'the Arabians.' They brought tribute, he tells us, to the pious King Jehoshaphat (2 Ch. 17 11). He relates, also, how God punished the wicked Joram by means of the Philistines and 'the Arabians who were beside the Ethiopians' (2 Ch. 21 16, cp 22 1), and how he succoured the pious Uzziah in the war against 'the Arabians that dwelt in GUR-BAAL' [*q.v.*] and other nations (2 Ch. 26 7)—all this is written from the point of view of the author's own time (*circa* 200 B.C.), and has no claim to be regarded as historical.

By the beginning of the Maccabean period the kingdom of the NABATÆANS [*q.v.*] had long been firmly established. At that time various other Arabian tribes were also to be found in the great Syrian desert, and from among these certain families and persons rose to great power during the decline of the Seleucid Empire. In several Syrian towns we find Arabian sovereigns, and at Palmyra, at least, there was an Arabian aristocracy; elsewhere also Arabian chieftains occasionally played an important part in the politics of that period. 1 Macc. several times mentions Nabatæans and other Arabs (5 25 39 9 35 11 17 39 12 31; cp 2 Macc. 5 8 12 10 *f.*).

4. NT. The apostle Paul, after his conversion, retired into Arabia (Gal. 1 17)—probably some desert tract in the Nabatæan kingdom. When he speaks of Arabia he of course includes the Sinaitic peninsula (Gal. 4 25). Similarly, 'Arabs' (Arabian Jews or proselytes) in Acts 2 11 probably means natives of the Nabatæan kingdom (see NABATÆANS) or of the Roman province of Arabia which covered almost the whole extent of that kingdom. The province was constituted by A. Cornelius Palma, governor of Syria (*circa* 105 A.D.).

5. Native Arabian usage. At what period certain tribes began to call themselves Arabs, and at what period the name was adopted by the whole nation, cannot be determined. The distinguished scholar, D. H. Müller,[1] has maintained that the name 'Arab' was unknown to the natives of Arabia till Mohammed introduced it as a national designation. This view, however, is scarcely tenable. The present writer does not happen *to* have made any notes on the occurrence of the name in the pre-Islamic poetry;[2] but the verse in Tabari, i. 1036 5, which dates from the beginning of the seventh century, is a sufficient proof of its occurrence—the poet, who can have known nothing of Mohammed, speaks of 3000 Arabs as opposed to 2000 foreigners. The events there described happened in the neighbourhood of the low-er Euphrates—that is to say, in a district where Arabs, Aramæans, and Persians frequently came into contact with one another, and where, for that very reason, a special term to denote the Arabian nationality and language was absolutely required. When we take into account the frequent communication between the Arabs of this district and those of the distant W. and S., and the great uniformity of the Arabian nation, it must appear highly probable that the name 'had long been generally used in Arabia itself.

1 See Del. *Par.* 295 304 *ff.*; and cp Schr. *KGF*, 100 *ff.*

1 *Neue Freie Presse*, 1894, 20th April.

2 He would not lay great stress on the words *ḳurā ʿarabīyātin*, 'villages of Arabian women,' or *ḳuran ʿarabīyātin*, 'Arabian villages,' in a verse ascribed to the old poet Imra'-al-ḳais (about 550 A.D.) 39 2 (Ahlwardt), the fragment being very obscure and the text not quite to be trusted. Nor could he affirm the genuineness of the verses ascribed to old poets in *Aġānī* ix. 10 second last line, x. 149 2 where the word 'Arab occurs.

Ḥassān and other poets contemporary with Mohammed make use of the word *'Arab* and its plural *A'rāb* as a term known to every one *(see* the Dīwān of Ḥassān, ed. Tunis 10 1 174 103 13, *Aǵānī* xii. 15628). It is also very likely that in the common phrase 'no *'Arīb* is to be found there,' the word *'Arīb* means simply) 'an Arab' and hence 'any human being.' Still more conclusive is the fact that the verb *'arraba* or *a'raba* which occurs in one of the oldest poets signifies 'to explain,' properly 'to speak in Arabic' (*i.e.*, 'distinctly'); hence this name for the language must have been current long before the Prophet. That *Arab* was already employed to denote the country and its inhabitants is shown, further, by the words *'irāb*, 'horses, or camels, of pure native breed,' and *mu'rib*, 'possessor, or connoisseur, of such horses,' both of which terms were commonly used in the early days of Islam.

The plural form *A'rāb*, 'Bedouins,' is presumably derived from the primitive sense 'desert.' In the Koran the *A'rāb* are several times distinguished from the inhabitants of the towns. When we find that a poem, composed shortly before Islam, mentions 'the nomadic and the settled A'rāb,'[1] the latter class must be understood to consist of the inhabitants of small oases, who retained, on the whole, the customs of the Bedouins, and differed widely from the people of the towns. Since, however, the Bedouins always formed the great bulk of the natives of Arabia, it is not strange that, from the earliest days of Islam, the name ***Am6*** was frequently used specially of them. So in the great Sabæan inscription of Abraha, the Abyssinian prince of Yemen, in **543** A.D., the name ערב (or, with the postpositive article, ערבן) seems to signify the Nomads.[2] T. N.

ARAD (עֲרָד; ἀραδ [BAL]; *ARAD;* for gentilic Aradite, see below). 1. A South Canaanitish town, with a king or chieftain of its own, conquered by the Israelites, Josh. 12 14 (α[ι]ραθ [B], αδερ [AL], *HERAD*). The reference to the 'king of Arad' in Nu. 21 1, and the abrupt notice **in** Nu. 33 40, are useless for historical purposes, the former all but certainly, and the latter certainly, having been inserted by a later editor (see Moore on Judg. 1 17, Di. on Nu. 33 40). This removes one of the chief difficulties connected with the notices of Arad (cp HORMAH, ZEPHATH). Another difficulty arises from the reference in Judg. **1 16** to 'the wilderness of Judah which is in the Negeb of Arad' (*i.e.*, in that part of the Negeb to which Arad belonged). The expressions appear to Prof. Moore to be self-contradictory, the Wilderness of Judah and the Negeb being distinct regions *(Judges*, 32). He points ont as an additional ground for scepticism that 𝔊^BA differs from MT in reading במורד instead of בנגב.[3] It would be unsafe, however, to assert that in usage the term 'wilderness of Judah' cannot have included the Negeb S. of Arad —*e.g.*, the *Wādy el-Milḥ* (see SALT, CITY OF; JUDAH) —and, as to 𝔊's reading, we may certainly disregard it, chiefly on the ground (suggested by Prof. Moore himself) that there is no steep pass (מורד, κατάβασις) in the neighbourhood of Arad.

The site was found by Robinson at *Tell 'Arid*, which is a round isolated hill **17** m. SE. of Hebron, and the details given by Eus. and Jer. (OS 214 55 87 22 88 2) are quite consistent with this identification. There are indeed no relics here of the ancient city, and only scanty remains of ancient bridges; but this does not prevent Guérin from pronouncing Robinson's view 'extremely probable, not to say certain' (*Judée*, **3** 185). The city of Arad, it may be noticed in conclusion, existed long after the 'age of Joshua,' for Shishak includes it in his list of conquered cities in Palestine (WMM, *As. u. Eur.* 168). 'Aradite,' therefore, may well be restored in 2 S. 23 25*a* (see HARODITE). The connection of DAVID (*q.v.*, § 1, note on 'Bethlehem'; cp also ARDATH) with S. Judah throws a new light on the interest of narrators in the fortunes of Arnd and ZEPHATH.

2. (ωρηρ [B]; αρωδ [A]) in a genealogy of BENJAMIN (*q.v.*, § 9, ii. β) 1 Ch. 8 15. T. K. C.

ARADUS (ἀραδος [AℵV]), 1 Macc. 15 23†. See ARVAD.

ARAH (אָרַח [so in pause, cp Baer *ad* Ez. 2 5], § **70**, 'wayfarer'?).

1. b. Ulla, in genealogy of ASHER (*q.v.*, § 4). 1 Ch. 7 39† (ορεχ [BA]); 𝔊^L omits Ulla and Arah, and ascribes the remaining names in *v.* 39 to Ithran (*v.* 38).

2. In the great post-exilic list (see EZRA, ii. § 9, § 8*c*); Ezra 2 5 (ηρα [B], apes [A], ωρεε [L]) = Neh. 7 10 (ηρα [BA], -μ [ℵ], ηιρα [L]) = 1 Esd. 5 10 ARES (αρες [BA], ηιρα [L]). His son Shechaniah [6] was the father-in-law of the Ammonite Tobiah, 4 (Neh. 6 18 ηραε [BℵA], ηιρα [L])

ARAM (אֲרָם; 𝔊^BAL ἀραμ, **συρια, ο** συρος, **οι συροι**; on Aramæans see below, § 7).

The EV commonly translates 'Syria' or 'Syrians' (cp however Hos. 12 12 RV 'Aram'), but occasionally (viz., Gen. 10 22 *f.* 22 21 Nu. **23** 7 1 Ch. **1** 17 2 23 7 34) retains the Hebrew form 'Aram' (on Mt. 1 3 *f.* AV, and Lk. 3 33 AV see RAM, 1, ARNI). The gentilic אֲרַמִּי, on the other hand, is always translated 'Syrian' (except Dt. 26 5, RVmg. **'Aramean'**; אֲרַמִּיָּה 1 Ch. 7 *14* EV 'Aramitess'). אֲרָמִית is rendered by 'Syrian language' (Is. 36 11 2 K. 18 26 EV Dan. 2 4 RV) or 'Syrian tongue' (Ezra 4 7 AV), 'Syriac' (Dan. 2 4 AV), and by 'Aramaic' (Dan. 2 4 Ezra **4** 7 both RVmg.).

Arain appears in Gen. 10 22 (Αραμων [A]) as one of the sons of Shem. This in itself does not prove anything as to the nationality and language of the people in question, for the classification adopted in the chapter is based, to a large extent, on geographical and political considerations. But there is no reason to doubt that Aram here stands for the whole, or at least for a portion, of those 'Semitic' tribes whose language is called 'Aramaic' in the OT (Ezra 4 7 Dan. 2 4) and is placed in the mouth of Laban the Aramæan, according to the ancient gloss in Gen. 31 47. In later times the name was still known, though often supplanted by 'Syrian,' which the Greeks employed, from a very early period, as the equivalent of the native *Aram* and its derivatives. *Aram* may perhaps be the source of the Homeric Ἔρεμβοί *(Od.* 484).

1. Name.

It has long been known that Aramaic was used as the official language in the western half of the Achæmenian empire. From 2 K. 18 26 (= Is. 36 11) we might have concluded that this language occupied a similar position under the Assyrian rule; moreover, if Friedr. Delitzsch be right ***(Par.* 258)**, an Assyrian and an Aramaic 'secretary' are mentioned together in a cuneiform inscription. The recent excavations at Zenjirli have proved that in that district, to the extreme N. of Syria, Aramaic served as a written language as early as the eighth century B.C., although the population was not purely Aramaean. On the other hand, the Aramaic inscriptions of Tēma, to the N. of Medina, bear witness to the existence of an Aramaean colony in the NW. of Arabia about 500 B.C. That Mesopotamia proper (*i.e.*, the country bounded by the Euphrates, the Tigris, the N. mountain-range, and the desert—hence exclusive of Babylonia) was inhabited by Aramaeans appears from the OT. Moreover, an inscription of Tiglath-pileser I., who is placed about 1220 B.C., mentions an Aramæan tribe in this district, in the neighbonrhood of Ḥarrān (Schr. *KB* 133). A similar statement is found in an inscription three centuries later (*ibid.* 1 165). Hence the Greeks, from the time of Alexander onwards, called this country Συρία ἡ μέση τῶν ποταμῶν, or, more shortly, ἡ Μεσοποταμία (see Arrian, *passim).* On the lower Tigris and Euphrates, near the confines of Susiana,—that is to say, in much the same region that was afterwards known as 'the land of the Aramaeans' (*Bēth Aramāyē*, in Persian *Sūristān*), and contained the royal cities,—there were nomadic (?) Aramæans according to an in-

[1] *Dīwān of Ḥassān ibn Thābit*, 51, *l.* 9 = *Aghānī*, 14 126.

[2] See Ed. Glaser, *Zwei Inschriften über den Dammbruch von Mârib*, 33, etc.

[3] εἰς τὴν ἔρημον τὴν οὖσαν ἐν τῷ νότῳ Ἰούδα, ἥ ἐστιν ἐπὶ καταβάσεως Ἀραδ [B]; ε. τ. ἔ. Ἰούδα τ. ο. ἐν τῷ νότῳ ἐπὶ καταβάσεως Ἀράδ [AL]. ἐν τῷ νότῳ is a duplicate rendering, and to be rejected. So far, van Doorninck, Bu., and Ki. (*Hist.* 1 268) are right. It is premature. however, to assume that במורד is the original reading; it is really a conjectural correction of a false reading (due to repetition) במדבר.

scription of Tiglath-pileser III. (745-727 B.C.), and an inscription of Sennacherib (705-681 B.C.). (See Del. *l.c.* 238, Schr. *KAT* 116, *KB* 285). The name occurs also in a few other Assyrian inscriptions; but, owing to the imperfection of the writing, it may sometimes be doubted whether the word is really ארם, 'Aram,' and not some such form as ערם, הרם, or חרם. It is remarkable that the cuneiform inscriptions, at least according to the opinion of Del. and Schr., never give the name of 'Aramaeans' to the Aramaic-speaking populations W. of the Euphrates, whereas in the OT this is the Aramæan country *par excellence* (cp ARAM-NAHARAIM, MESOPOTAMIA, § 1).

2. Language. Though at several periods the whole, or the greater part, of the Aramaean nation has been subject to a single foreign power, the Aramaeans have never formed an independent political unity; in fact, so far as we know, there has never existed a state comprehending the Aramaeans of the main part of Syria or of Mesopotamia proper, to the exclusion of other races. From a very early time, however, the population of these countries must have been predominantly Aramaean, as is shown by the fact that all the other nationalities were gradually eliminated, so that, even before the Christian era, the various dialects of the Aramaic (or, as the Greeks say, Syrian) language prevailed almost exclusively in the cultivated lands which lie between the Mediterranean and the Mountains of Armenia and Kuidistan. Aramaic was used by the neighbouring Arabs as the language of writing; it also took possession of the land of Israel (see § 5, end). It is indeed very unlikely that, as early as the time of Solomon, there was an important Aramæan element in Palestine, as W. Max Müller supposes (*As. u. Eur.* 171); the ending *ā* in many names of Palestinian cities in the list drawn up by the Egyptian king Šošenḳ is probably nothing more than the Hebrew ending ָה, expressing motion towards—the so-called *Hê locale*. Even in some books composed before the Exile, however, the influence of the language spoken by the neighbouring Aramaeans is occasionally perceptible. This influence became very much greater after the Exile (when those Israelites who remained, or founded settlements in Judaea, Samaria, and Galilee, were at first feeble in numbers) and little by little the Aramaic tongue spread over the whole country. Though the language of such parts of the OT as Esther, Ecclesiastes, and several of the Psalms is Hebrew in form, its spirit is almost entirely Aramaic. The compiler of Ezra inserted into his book an extract from an Aramaic work composed, it would seem, about 300 B.C.; and half of the Book of Daniel (which was written in 167 or 166 B.C.) is in Aramaic. Moreover, a dialect of this language was spoken by Christ and the apostles, and in it the discourses reported in the Gospels were originally delivered. Nor did the Latin language (under the Roman rule) ever threaten to supplant the prevalent Aramaic. Greek, it is true, gained some footing in Syria, and, since it was the vehicle of intercourse and literary culture, exercised a great influence on the native dialects. It was the conquests of the Moslems, however, that suddenly brought to an end the ascendency of Aramaic after it had lasted for more than 1000 years. The Arabic language was diffused with surprising rapidity, and at the present day there are only a few outlying districts in which Aramaic dialects are spoken.

What group of tribes the author of Gen. 10$_{23}$ includes under the name of Aram, we are unable to say precisely.

3. In Pentateuch. Of the 'sons of Aram' enumerated there is unfortunately none that can be identified with tolerable certainty (see GEOGRAPHY, § 24). The position of 'Uz,' although it occurs several times in the OT, is unknown. It must, however, have been situated not far from Palestine. 'Mash' is usually supposed to be the country of the Μάσιον ὄρος (Strabo, 506, etc.), the source of the river Mashē (*n'hur Mashē*, in Arabic *Hirmās*), which flowed by Nisibis ([pseudo-]Dionysius of Tel-Mahrē, ed. Chabot, 71$_{8}$, and Thomas of Margā, ed. Budge, 346$_{19}$); this is, however, by no means certain. Other theories respecting the names in Gen. 10$_{23}$ might be mentioned; but they are all open to question.

A second list, in Gen. 22$_{21}$, represents Aram as a son of Kemuel, son of Nahor and brother of Uz, Kesed (EV Chesed; the eponym of the Chaldeans), Bethuel, and others. Bethuel is called an 'Aramaean' in Geu. 25$_{20}$ 28$_{5}$, as is also his son Laban in Gen. 25$_{20}$ 31$_{20\,24}$. The passages in question belong, it is true, to different sources; but they may have been harmonised by the redactor. All these statements seem to point to the district of Ḥarrān (HARAN, *q.v.*), where, as Hebrew tradition affirms with remarkable distinctness, the patriarchs (Abraham, Jacob), and the patriarchs' wives (Rebecca, Leah, Rachel), either were born or sojourned for a long time. Here, in remote antiquity, Hebrew tribes and Aramæan tribes (represented by Nahor) probably dwelt side by side.[1] Hence it is said in Dt. 26$_{5}$ 'a nomad Aramaean was my father.' In one of the sources of Genesis the country of Laban is called 'Aram of the two rivers,'[2] which seems to mean, as has long been held, the Aramaean land between the Euphrates and the Tigris, or between the Euphrates and the Chabōras (Kiepert, *Lehrb. d. alt. Geogr.* 154). What is meant by Paddan Arām, however, the name given to the dwelling-place of Laban and his kinsmen in the other source (see PADAN), is not clear. In Aisyrian (?) and Aramaic *Paddan* signifies 'yoke,' and by a change of meaning, found also in other languages, it comes to denote a certain area of land, and finally 'corn-land,' but not a 'plain,' as is sometimes assumed by those who wrongly take the phrase 'field of Aram' (Hos. 12$_{13}$[12]) to be a translation of 'Paddan Aram.' This latter can scarcely be the name of a country. It may denote a *locality* situated in the land of Aram. We might, therefore, be tempted to identify Paddan Aram with a place near *Ḥarrān* called *Paddānā* (see Wright, *Cat. Syr. MSS.* 1127*a*; Georg Hoffman, *Opusc. Nestor.* 129, 1 21), in Gr. φαδανâ (Sozom. 6$_{33}$), and io Ar. *Faddān*, in the neighbourhood of which *Tell Faddān* is situated (see Yāḳūt *s.v.*). It is, however, a somewhat suspicious consideration that several of the passages which have been cited mention the patriarchs in connection with the place. Hence the name may be due to a mere localisation of the biblical story on the part of the early Christians. According to the narrative of Balaam, 'Pethor' is in Aram (Nu. 32$_{5}$ 23$_{7}$; see PETHOR). If Schr. (*KAT* 155 *ff.* *KB* 1 133) be right in identifying it with the city of *Pitru*, mentioned in Assyrian inscriptions, and situated on the river Sagur (Sājūr)—that is to say, not far from Mambij (Hierapolis)—the statement that Pethor is on the Euphrates itself cannot be quite correct. Such an inaccuracy, however, would not be surprising.

What historical foundation there may be for the account of the subjugation of Israel by Cushan Rishathaim (*q.v.*), 'king of Aram of the Two Rivers' (Judg. 3$_{8\text{-}10}$), is uncertain.

4. Damascus. Of all the Aramaean states, by far the most important from the point of view of the Israelites, during the kingly period, was Damascus, the inhabitants of which, from the time of David (*q.v.*, § 8*b*) onward, were often at war with their Israelite neighbours; but there must also have been much peaceable intercourse between the two nations. In most cases where the OT speaks of Aram the reference is to Damascus (even though the latter name be not expressly mentioned), the small Aramaean states of the neighbourhood being sometimes included. That

[1] On this point see ISRAEL § 1.

[2] It is not necessary to suppose with W. Max Müller (*l.c.* 252, 255) that the Dual *naharaim* is a mistake for the plural *nĕhārīm*. On this subject, however, cp ARAM-NAHARAIM, MESOPOTAMIA, § 1.

this mode of speaking was actually current in early times is proved by such passages as Am. 15 9 Is. 7 2 4 *f.* 8. Cp DAMASCUS.

Not far from Damascus lay the Aramaean districts of Maacah (*q.v.*, 2) and Geshur (*q.v.*, 1). That Maacah was Aramaean is not expressly stated—except in 1 Ch. 196, where the text is very doubtful;[1] but it seems to be indicated by Gen. 2224, where Maacah is represented as a son, or daughter, of Nahor by a concubine. Moreover, in 1 Ch. 716 Machir, the chief representative of the tribe of Manasseh beyond the Jordan, is the husband of Maacah, and in *v.* 14 of the same chapter he is a son of Manasseh by an Aramæan concnhine—whence we may infer that the Israelite tribe which had penetrated farthest to the NE. became mingled with the Aramaeans of Maacah. That the Maacathites were not included in Israel, though they dwelt among the Israelites, is stated in Josh. 1313. Their geographical situation is to some extent determined by the fact that Ābel, though regarded as an ancient Israelite city (2 S. 2019), is sometimes called Abel-bēth-Maacāh, 'Abel in the land of Maacah' (2 S. 20 14,[2] etc.), in order to distinguish it from other places bearing the name Abel. In accordance with the statements in 1 K. 1520 2 K. 1529 (to which must he added 2 S. 2018, a passage preserved in 𝔊 hut mutilated in MT), this Abel is now generally admitted to be identical with the northern Abil, near Hūnīn, on one of the brooks which unite to compose the Jordan (see ABEL-BETH-MAACAH). That this region, on the slopes of Hermon, was the home of the Maacathites appears from Dt. 314 Josh. 125 1311 13, where they are mentioned together with the Geshurites, another foreign people who continued to dwell among the Israelites (Josh. 1313), and belonged to Aram (2 S. 158; cp also 1 Ch. 223, where the text, it must be admitted. is obscure and seems to he corrupt). Not far off was the territory of Rehob or Beth Rehob, which included the city of Dan (Judg. 1828), often mentioned as the northern limit of Israel, the modern Tell el-ķādi, a few miles east of the aforesaid Ābil. In Josh. 1928 Rehob, it is true, is reckoned as belonging to the Israelite tribe of Asher; but, according to 2 S. 106, its inhabitants were Aramaeans. Thus it appears fairly certain that several Aramzean tribes were settled near, or within, the borders of the northern tribes of Israel (Naphtali, Asher, and Eastern Manasseh). In these parts the Aramaean population seems to have extended, with scarcely any interruption, as far as Damascus. The Aramaeans of Maacah and Rehob fought on the side of the Ammonites against David (2 S. 106 = 1 Ch. 196). David married a daughter of the king of the Geshurites,[3] and she became the mother of Absalom. It is remarkable that she bore the name of Maacah (2 S. 33 = 1 Ch. 32), which, as we have seen, occurs often in connection with Geshur; and the same name was given by Absalom to his daughter,[4] afterwards the mother of two kings of Jndah (1 K. 152 10 13 2 Ch. 1120 *ff.*). After he hnd murdered his brother Amnon, Absalom took refuge with his grandfather the king of Geshur, and remained there for a considerable time (2 S. 1338 1423 32). The king of Geshur must, therefore, have been to some extent independent of David. Of all these Aramaean tribes we hear nothing more in later times; but one of them has left a trace in 'the Maacathite' (see MAACAH, 1), an appellation borne by the father of Jaazaniah, a contemporary of Jeremiah the prophet (2 K. 2523 = Jer. 408).

5. Maacah, Geshur, Rehob.

These Aramaeans, who were so closely connected with the Israelites, probably played an important part in the diffusion of the Aramaic language over Palestine.

Another state, also described as Aramæan, was that of ZOBAH (*q.v.*) (2 S. 1068; cp 1 Ch. 196 Ps. 60 [title]), which seems to have been for a while of greater consequence. In it was situated the city of BEROTHAI (2 S. 108), no doubt identical with BEROTHAH (*q.v.*), which in Ez. 4716 is placed between Hamath and Damascus. With this it agrees that; according to the statements of the historical books, Zobah had relations with Hamath on the one side, and with Damascus on the other. Its site must, therefore. be approximately in the neighhourhood of Emesa; and we may hope that archæological researches will throw further light upon the subject.[1]

6. Zobah.

The statement about Saul's wars with 'the kings of Zobah' (1 S. 1447) is open to grave suspicion; it is, in fact, doubtful whether the warlike operations of Saul ever extended so far (see SAUL, § *3*). A little later, however, we find Zobah and Damascus assisting the Ammonites in their war against David (see DAVID, § 86). At length Hadad'ezer, king of Zobah, even brought to his help Aramæans from beyond the Euphrates, hut was utterly defeated, together with the king of the Ammonites, and David carried off a rich booty. Upon this the king of Hamath, who had been at war with the king of Zobah. sent an embassy to the Judæan king, expressing great satisfaction (2 S. 810). According to 2 S. 2336, one of David's heroes (among whom were several non-Israelites) came from Zobah; in 1 Ch. 1138, however, the reading is quite different (see ZOBAH). A servant of the above-mentioned Hadad'ezer, named Rezon, fled from his master, became the chief of a hand of robbers, and after David's death founded a kingdom at Damascus (1 K. 1123 *ff.*; see DAMASCUS, § 3). It is not easy to extract a satisfactory sense from the passage which describes the capture of 'Hamath of Zobah' by Solomon (2 Ch. 83), and there is reason to suspect the integrity of the text. After the time of Solomon we find no mention of Zobah in the OT; but Assyrian monuments bear witness to the existence of this city in the seventh century B.C.—if, as seems likely, the same place he meant.

In the account of the wars of David against the Ammonites and their allies, these latter are classed together under the name of 'Aramæans' (2 S. 108 *ff.* 14 *ff.*); but this is perhaps nothing more than a classification *a potiori*. It is of more importance to notice that the army of Nebuchadrezzar is called by a contemporary 'the army of the Chaldeans and of the Aramaeans' (Jer. 3511). That the great mass of the Babylonian army was composed of Aramaeans might have been naturally inferred, even if we had not this explicit statement on the subject.

7. 'Aramæans.'

Cp Nöldeke, 'Die Namen der Aram. Nation u. Sprache,' in *ZDMG* 25113 *ff.*; Ἀσσυριος Συριος Συρος in *Hermes*, 5443 *ff.*; and the section on the Aramaic dialects in Art. 'Semitic Languages,' *EB*(9), published separately in German, *Die Sent. Sprachen*, Leipsic, 1887, p. 27 *ff.*, 2nd ed., 1899.

2. An Asherite (1 Ch. 734t; [ακ]αραν [Bl, αραμ [AL]). *See* also RAM, 1, and ARNI. **T.** N.

ARAMAIC **LANGUAGE.**[2] Aramaic is nearly related to Hebrzeo-Phcenician: there is. nevertheless. a sharp line of demarcation. Of its original home nothing certain is known. In the OT 'Aram' appears at an early period as a designation of certain districts in Syria (see ARAM, § 1) and in Mesopotamia. The language of the Aramaeans gradually spread far and wide. It occupied all Syria—both those regions which had been in the possession of non-Semitic peoples, and

1. Geographical extent.

[1] Instead of ארם מעכה, the 'Aramæans of Maacah,' the parallel passage 2 S. 106 has מלך מעכה, 'the king of Maacah,' for which 𝔊B reads βασιλέα Ἀμαλήκ. Here the word Ἀμαλήκ is certainly due to a mistake (𝔊AL have μααχα); but βασιλέα [BAL] supports the Massoretic reading מלך.

[2] In this verse we should no doubt read אבלה בית מעכה with Ew., Wellh., and others.

[3] See, however, GESHUR, 2, where the view is proposed that David's wife was from the Southern Geshur.

[4] On this see, however, MAACAH, ii.

[1] It would appear that the Assyrian inscriptions sometimes mention this place as *Subutu* or *Subiti* (see Del. *Par.* 279 *ff.*; Schrader, *KGF* 122, *KAT* *182 ff.*); but they have not enabled us to fix the site.

[2] Revised and adapted by the author from art. 'Semitic Languages' (Aramaic section) in *EB*(9) 21.

those which were most likely inhabited by Canaanite tribes. Last of all, Palestine became Aramaised (*ib.* § 2). Towards the E. this language was spoken on the Euphrates, and throughout the districts of the Tigris S. and W. of the Armenian and Kurdish mountains; the province in which the capitals of the Arsacides and the Sasanians were situated was called 'the country of the Aramaeans.' In Babylonia and Assyria a large, or perhaps the larger, portion of the population were most probably Aramaeans, even at a very early date, whilst Assyrian was the language of the government.

2. Earlier history.

Some short Aramaic inscriptions of the Assyrian period, principally on weights, have long been known. To these have recently been added longer ones from the most northern part of Syria (Zenjirli, about 37° N.). In these, as in the weight inscriptions, the language differs markedly from later Aramaic, especially by its close approximation to Hebrew-Canaanite or, perhaps, to Assyrian; hut Aramaic it undoubtedly is. It is to be hoped that more of these inscriptions, important alike for their language and for their contents, may yet be discovered.[1]

In the Persian period Aramaic was the official language of the provinces W. of the Euphrates; and this explains the fact that some inscriptions of Cilicia and many coins which were struck by governors and vassal princes in Asia Minor (of which the stamp was in some cases the work of skilled Greek artists) bear Aramaic inscriptions, whilst those of other coins are Greek. This, of course, does not prove that Aramaic was ever spoken in Asia Minor, and as far north as Sinope and the Hellespont. In Egypt Aramaic inscriptions have been found of the Persian period, one bearing the date of the fourth year of Xerxes (482 B.C.);[2] we have also official documents on papyrus, unfortunately in a very tattered condition for the most part, which prove that the Persians preferred using this convenient language to mastering the difficulties of the Egyptian systems of writing. It is further possible that at that time there were many Aramaeans in Egypt, just as there were many Phœnicians, Greeks, and Jews.

This preference for Aramaic, however, probably originated under the Assyrian Empire, in which a very large proportion of the population spoke Aramaic: in it this language would naturally occupy a more important position than it did under the Persians. Thus we understand why it was taken for granted that a great Assyrian officer could speak Aramaic (2 K. 18 26 = Is. 36 11), and why the dignitaries of Judah appear to have learned the language (*ibid.*): namely, in order to communicate with the Assyrians. The short dominion of the Chaldeans probably strengthened this preponderance of Aramaic.

A few ancient Aramaic inscriptions have been discovered far within the limits of Arabia, in the palm oasis of Teima (in the north of the Ḥijāz); the oldest and by far the most important of these was perhaps made somewhat *before* the Persian period? We may presume that Aramaic was introduced into the district by a mercantile colony, which settled in the ancient seat of commerce; and, in consequence, Aramaic may have remained for some time the literary language of the neighbouring Arabs. Those Aramaic monuments, which we may with more or less certainty ascribe to the Persian period, exhibit a language which is almost absolutely uniform. The Egyptian monuments bear marks of Hebrew, or (better) Phoenician, influence.

Intercourse with Aramaeans' caused some Aramaic words to be imported into Hebrew at a comparatively early date.

3. Biblical Aramaic.

This influence of Aramaic on Hebrew steadily grew, and shows itself so strongly in the language of Ecclesiastes, for example, as almost to compel the inference that Aramaic was the writer's mother-tongue, and Hebrew one subsequently acquired, without complete mastery.

Certain portions of the OT (Ezra 4 8-6 18 7 12-26 Dan. 2 4-8 28; also the ancient gloss in Jer. 10 11) are written in Aramaic. The free and arbitrary interchange between Aramaic and Hebrew, between the current popular speech and the old sacred and learned language, is peculiarly characteristic in Daniel (167 or 166 B.C.); see DANIEL, ii. § 11 *f.* Isolated passages in Ezra perhaps belong to the Persian period, but have certainly been remodelled by a later writer.[1] Still in Ezra we find a few antique forms which do not occur in Daniel.

The Aramaic pieces contained in the OT have the great advantage of being furnished with vowels and other orthographical signs. These were not inserted until long after the composition of the hooks (they are sometimes at variance with the text itself); but Aramaic was still a living language when the punctuation came into use, and the lapse of time was not so very great. The tradition ran less risk of corruption, therefore, than in the case of Hebrew. Its general correctness is further attested by the innumerable points of resemblance between this language and Syriac, with which we are accurately acquainted. The Aramaic of the OT exhibits various antique characteristics which afterwards disappeared—for example, the formation of the passive by means of internal vowel-change, and of the causative with ha instead of with *a*—phenomena which have been falsely explained as Hebraisms.

4. Nabatæan, etc.

Biblical Aramaic agrees in all essential respects with the language used in the many inscriptions of Palmyra (beginning soon before the Christian era and extending to about the end of the third century), and on the Nabataean coins and stone monuments (concluding about the year 100 A.D.). Aramaic was the language of Palmyra, the aristocracy of which were largely of Arabian extraction. In the northern portion of the Nabataean kingdom (not far from Damascus) there was probably a large Aramaic population; but Arabic was spoken farther south. At that time, however, Aramaic was highly esteemed as a cultivated language, for which reason the Arabs in question made use of it, as their own language was not reduced to writing, just as in those ages Greek inscriptions were set up in many districts where no one spoke Greek. The great inscriptions cease with the overthrow of the Nabataean kingdom by Trajan (105 A.D.); hut, down to a later period, the Arabian nomads in those countries, especially in the Sinaitic peninsula, often scratched their names on the rocks, adding some benedictory formula in Aramaic. These inscriptions having now been deciphered with completeness and certainty, there is no longer room for discussion of their Israelitic origin, or of any similar fantastic theories concerning them. That several centuries afterwards the name of 'Nabataean' was used by the Arabs as synonymous with 'Aramaean' was probably due to the gradual spread of Aramaic over a great part of what had once been the country of the Nabataeans. In any case, Aramaic then exercised an immense influence. This is proved by the place which it occupies in the strange Pahlavî writing, various branches of which date from the time of the Parthian empire. Biblical Aramaic, as also the language of the Palmyrene and the Nabatæan inscriptions, may he described as an older form of Western Aramaic. The opinion that the Palestinian Jews brought their Aramaic dialect directly from Babylon—whence the incorrect name 'Chaldee'—is untenable.

[1] Cp *Ausgrabungen in Sendschirli*, Sachau, *Königl. Mus. zu Berlin, Mittheil. aus den or. Samml.* 1893; also D. H. Muller, *altsem. Inschrift. v. Sendschirli*, Vienna, 1893; Halévy, *Rev. Sem.*, Paris, 1894, and on the language, Nöld. *ZDMG* 47 99; D. H. Muller, 'Die Bauinschrift des Barrekub,' *ZKMW* 10; Wi. in *MVG*, 1896; Halévy, *Rev. Sem.* 1897; G. Hoffmann, *ZA*, 1897, 317 *ff.* Two old Aram. inscriptions from Nerah (near Aleppo) have since heen brought to light; cp Hoffmann, *ib.* 207 *ff.*

[2] See the Palæographical Society's *Oriental Series*, plate lxiii., and *CIS* 2, no. 122.

[3] See *CIS* 2, nos. 113-121.

[1] The decree which is said to have been sent hy Artaxerxes (Ezra 7 12-26) is in its present form a comparatively late production (cp EZRA, ii. § 10).

By the time of Christ Aramaic had long been the current popular speech of the Jews in Palestine, and the use, spoken and written, of Hebrew (in a greatly modified form) was confined to scholars. Christ and the apostles spoke Aramaic, and the original preaching of Christianity, the Εὐαγγέλιον, was in the same language. And this, too, not in the dialect current in Jerusalem, which roughly coincided with the literary language of the period, but in that of Galilee, which, it would seem, had developed more rapidly, or, as is now often but erroneously said, had become corrupted. Unfortunately, it is impossible for us to know the Galilean dialect of that period with accuracy. The attempts made in our days to reduce the words of Jesus from Greek to their original language have, therefore, failed.

5. NT.

In general, few of the sources from which we derive our knowledge of the Palestinian dialect of that period can be implicitly trusted. In the synagogues it was necessary that the reading of the OT should be followed by an oral 'targūm'—a translation, or rather a paraphrase into Aramaic, the language of the people—which was at a later period fixed in writing; but the officially sanctioned form of the Targum to the Pentateuch (the so-called Targum of Onkelos) and of that to the prophets (the so-called Jonathan) was not finally settled till the fourth or fifth century, and not in Palestine but in Babylonia. The redactors of the Targum preserved, on the whole, the older Palestinian dialect; yet that of Babylon, which differed considerably from the former, exercised a vitiating influence. The punctuation, which was added later (first in Babylonia) is not so trustworthy as that of the Aramaic passages in the OT. The manuscripts which have the Babylonian superlinear punctuation may, nevertheless, be relied upon to a great extent. The language of Onkelos and Jonathan differs but little from biblical Aramaic. The language spoken some time afterwards by the Palestinian Jews, especially in Galilee, is exhibited in a series of rabbinical works—the so-called Jerusalem Targums, a few Midrashic works, and the Jerusalem Talmud. Of the Jerusalem Targums, at least that to the Pentateuch contains remains that go back to a very early date, and, to a considerable extent, presents a much more ancient aspect than that of Onkelos, which has been heavily revised throughout;[1] but the language, as we now have it, belongs to the later time. The Targums to the Hagiographa are, in part, very late indeed. All these books, of which the Midrashím and the Talmud contain much Hebrew as well as Aramaic, have been handed down without care, and require to be used with great caution for linguistic purposes. Moreover, the influence of the older language and orthography has, in part, obscured the characteristics of these popular dialects: for example, various gutturals we still written, although they are no longer pronounced. The adaptation of the spelling to the real pronunciation is carried furthest in the Jerusalem Talmud, but not in a consistent manner. All these books are without vowel-points; but the frequent use of vowel-letters in the later Jewish works renders this defect less noticeable (cp TEXT, § 64).

6. Targums.

Not only the Jews but also the Christians of Palestine retained their native dialect for some time as an ecclesiastical and literary language. We possess translations of great portions of the Bible (especially of the Gospels) and fragments of other works in this dialect by the Palestinian Christians dating from about the fifth century, partly accompanied by a punctuation which was not added till some time later. This dialect, the native country of which was apparently not Galilee, but Judæa, closely resembles that of the Palestinian Jews, as was to be expected from the fact that those who spoke it were of Jewish origin.

7. Christian Palestinian.

Finally, the Samaritans, among the inhabitants of Palestine, translated their sacred book, the Pentateuch, into their own dialect: see TEXT, § 48. The critical study of this translation proves that the language which ies at its base was very much the same as that of the ieighbouring Jews. Perhaps, indeed, the Samaritans may have carried the softening of the gutturals a little farther than the Jews of Galilee. Their absurd attempt to embellish the language of the translation by arbitrarily introducing forms borrowed from the Hebrew original has given rise to the false notion that Samaritan is a mixture of Hebrew and Aramaic. The introduction of Hebrew and even of Arabic words and forms was practised in Samaria on a still larger scale by copyists who lived after Aramaic had become extinct. The later works written in the Samaritan dialect are, from a Linguistic point of view, as worthless as the compositions of Samaritans in Hebrew: the writers, who spoke Arabic, endeavoured to write in a language with which they were but half acquainted.

8. Samaritan dialect.

All these Western Aramaic dialects, including that of the oldest inscriptions, have this characteristic among others in common, that they form the third person singular masculine and the third person plural masculine and feminine in the imperfect by prefixing?, as do the other Semitic langnages. And in these dialects the termination *ā* (the so-called *status emphaticus*) still retained the meaning of a definite article down to a tolerably late period.

9. Western dialects.

As early as the seventh century the conquests of the Moslems greatly circumscribed the domain of Aramaic, and a few centuries later it was almost completely supplanted in the W. by Arabic. For the Christians of those countries, who, like every one else, spoke Arabic, the Palestinian dialect was no longer of importance. They adopted as their ecclesiastical language the dialect of the other Aramæan Christians, the Syriac (Edessan; see § 11 *ff.*). The only localities where a W. Aramaic dialect still survives are a few villages in Anti-Libanus.[1]

The popular Aramaic dialect of Babylonia, from the fourth to the sixth century of our era, is exhibited in the Babylonian Talmud, in which, however, as in the Jerusalem Talmud, there is a constant mingling of Aramaic and Hebrew passages. To a somewhat later period, and probably to a somewhat different district of Babylonia, belong the writings of the Mandaeans, a strange sect, half Christian and half heathen, who, from a linguistic point of view, possess the peculiar advantage of having remained almost entirely free from the influence of Hebrew, which is so perceptible in the Aramaic writings of Jews as well as in those of Christians. The orthography of the Mandæans comes nearer than that of the Talmud to the real pronunciation, and in it the softening of the gutturals is most clearly seen. In other respects there is a close resemblance between Mandæan and the language of the Babylonian Talmud. The forms of the imperfect which we have enumerated above take in these dialects *n* or *l*. In Babylonia, as in Syria, the language of the Arabic conquerors rapidly drove out that of the country. The latter has long been extinct—unless, which is possible, a few surviving Mandaeans still speak among themselves a more modern form of their dialect.

10. Babylonian and Mandæan.

At Edessa, in the W. of Mesopotamia, the native dialect had already been used for some time as a literary language, and had been reduced to rule through the influence of the schools (as is proved by the fixity of the grammar and the orthography) even before Christianity

11. Syriac or Edessan Aramaic.

[1] This in opposition to Dalman's *Gramm. d. jüd. pal. Aram.* (Leipsic, 94)—a book highly to be commended for the fulness and accuracy of its facts, but less so for its theories.

[1] On this subject we have **now** very valuable information in a series of articles by **M.** Parisot (*Journ. As.*, 1898); moreover it is hoped that Professors Prym and Socin will soon be able to furnish more ample details.

acquired power in the country, in the second century. At an earlyperiod the Old and the New Testaments werehere translated, with the help of Jewish tradition (see TEXT, § 59). This version (theso-called Peshíṭta or Peshito) became the Bible of Aramaean Christendom, and Edessa became its capital. Thus the Aramaean Christians of the neighbouring countries, even those who were subjects of the Persian empire, adopted the Edessan dialect as the language of the church, of literature, and of cultivated intercourse. Since the ancient name of the inhabitants, 'Aramaeans,' just like that of Ἕλληνες, had acquired in the minds of Jews and Christians the unpleasant signification of 'heathens,' it was generally avoided, and in its place the Greek terms 'Syrians' and 'Syriac' were used. 'Syriac,' however, was also the name given by the Jews and the Christians of Palestine *to* their own language, and 'Syrians' was applied by both Greeks and Persians to the Aramæans of Babylonia. It is, therefore, incorrect to employ the word 'Syriac' as meaning the language of Edessa alone; but, since it was the most important of these dialects, it has the best claim to this generally received appellation. It has, as we have said, a form very definitely fixed; and in it the above-mentioned forms of the imperfect take an *n*. **As** in the Babylonian dialects, the termination *â* has become so completely a part of the substantive to which it is added that it has wholly lost the meaning of the definite article; whereby the clearness of the language is 'perceptibly impaired. The influence exercised by Greek is very apparent in Syriac.

12. Its history. From the third to the seventh century **an** extensive literature was produced in this language, consisting chiefly, but not entirely, of ecclesiastical works. In the development of this literature the Syrians of the Persian empire took an eager part. In the Eastern Roman empire Syriac was, after Greek, by far the most important language; and under the Persian kings it virtually occupied a more prominent position as an organ of culture than the Persian language itself. The conquests of the Arabs totally changed this state of things. Meanwhile, even in Edessa, a considerable difference had arisen between the written language and the popular speech, in which the process of modification was still going on. About the year 700 it became a matter of absolute necessity *to* systematise the grammar of the language and to introduce some means of clearly expressing the vowels. The chief object aimed at was that the text of the Syriac Bible should be recited in a correct manner. It happened, however, that the eastern pronunciation differed in manyrespects from that of the W. The local dialects had, to some extent, exercised an influence over the pronunciation of the literary tongue; and, on the other hand, the political separation between Rome and Persia, and yet more the ecclesiastical schism—since the Syrians of the E. were mostly Nestorians, those of the W. Monophysites and Catholics—had prodnced divergences between the traditions of the various schools. Starting, therefore, from a common source, two distinct systems of punctuation were formed, of which the western is the more convenient, but the eastern the more exact, and generally more in accordance with the ancient pronunciation: it has, for example, *ā* in place of the western 6, and 6 in many cases where the western Syrians pronounce *ū*. In later times the two systems have been intermingled in various ways.

Arabic everywhere put' a speedy end to the predominance of Aramaic—a predominance which had lasted for more than a thousand years—and soon began to drive Syriac out of use. Nevertheless, up to the present day Syriac has remained in use for literary and ecclesiastical purposes, and may perhaps be even spoken in some monasteries and schools; but it has long been a dead language. When Syriac became extinct in Edessa and its neighbourhood is not known with certainty. It is very desirable that theologians who interest themselves scientifically in the history of the first centuries of Christianity should *barn some Syriac.* The task is not very difficult for those who know Hebrew.

13. Neo-Syriac dialects. In somedistricts of northern Mesopotamia, of the Mōṣul territory, of Kurdistan, and on Lake Urmia, Aramaic dialects are spoken by Christians and occasionally by Jews. Among these that of Urmia has become the most important, since American missionaries have formed a new literary language of it. Moreover, the Roman Propaganda has printed books in two of the Neo-Syriac dialects.

14. Literature. On the Aramaic dialects in general, see Nljldeke, 'Die Namen d. Aram. Nation u. Sprache, in **ZDMG** 25 113 *ff.* ('71); Wright, *Comp. Gramm. Sem. 14 ff.*, Kau. *Gramm. d. Bibl.-Aram. 6 ff.* The Aramaic inscriptions from Assyria, Babylonia, Asia Minor, and Egypt are found in the second part of the *CIS* (the Sinaitic and Palmyrene inscriptions have not yet appeared). For the Nabatæan the most important publication is Euting's *Nabatäische Inschriften* Berlin, 1885. Othersare to be found in various journals. Of thkse the most considerable is the great inscription of Petra, first edited by De Vogüé, *J.As.*, **1896,** 8 304 *ff.* Many Sinaitic are contained in Euting's *Sinaitische Inschr.* ('91), and of the Palmyrene the (comparatively small) collection in De Vogue's **La** *Syrie Centrale* (1868-77) is the most convenient for use. Many others are to be found scattered through journals devoted to Oriental subjects, the most important being the great Fiscal Inscription in Palmyrene and Greek: see **ZDMG** 42 370 *ff.* **('88)** where the literature is cited. **A** few Palmyrene inscriptions: annotated, are appended to Bevan's ***Commentary*** *on* ***Daniel.***

The most complete Syriac grammar is Nöldeke's *Syrische* ***Grammatik*** (Leipsic, **'80**; 2nd ed., **'98).** Duval's (Paris, '81) is useful for comparison with the other Aramaic dialects, and Nestle's, in the *Porta Linguarum Orientalium* (2nd ed., Berlin, '88), is an introductory handbook. To theologians wishing to learn Syriac, Roediger's *Chrestomathia syriaca* (3rd ed., Halle, '92) may be highly recommended. Articles on the Nabatæan, the Palmyrene, and the Christian-Palestinian dialects by Nöldeke are to be found in the ***ZDMG*** 17 703 *ff.* 19 637 *f.* 24 85 *ff.* ['63, **'65,** '70]. Of Syriac dictionaries, Castell's for a long time was the only one of general utility. Recently three have appeared, Payne Smith's great ***Thesaurus*** (unfortunately not yet finished), Brockelmann's and Brun's. Of glossaries to the Aramaic inscriptions, we **must** now add to Ledrain's ***Dict. des noms*** *propres Palmyréniens* **('87)** the glossary of Stanley **A.** Cook (Cambridge, '98) and Lidzbarski's *Handbuch* ***der nordsemitischen*** *Epigraphik* ('98).

For the various dialects used in early Jewish literature, including the Hebrew parts of it, we have, besides the old Huxtorf (Basel, **1639),** Jacob Levi's *Neuheb. u. Chald. Wörterb.* (Leipsic, 1876-89), and the shorter one of J. Dalman (part I, Leipsic, **'97).** Levy had previously edited a *Chald. Wörterb. über* **die** *Targumim* (Leipsic, **'67).**

On the biblical Aramaic there are, besides the grammar of Kautzsch ('84), the little books of Strack (2nd ed., Leipsic, **'97)** and of Marti (Leipsic, '96). For the Targum dialects there is no grammar that meets the requirements of modern science. Nor is there yet an adequate grammar of the Aramaic dialect of the Babylonian Talmud, although the little tract of S. D. Luzzatto, ***Elementi grammaticali*** *di Caldeo biblico* **e** *del dialetto Talmudico Babilonese* (Padua, '65), is a very useful work. For fhe Palestine Jewish dialects see Dalman's Grammar (Leipsic, **94);** for the Samaritan, the grammar of Uhlemann (Leipsic, '37) and Petermann (Berlin, '73). Neither of these, naturally, represents the results of modern scholarship. For the Mandaic, see that of Niildeke (Halle, '75), for the Neo-Syriac that of the same author (Leipsic, '68), and especially the most valuable grammar **of** A. **T.** Maclean (Cambridge, '95). T. N.

ARAMAIC VERSIONS. See TEXT, §§ 59 *f.*, 64.

ARAMEAN (אֲרַמִּי), **Dt.** 26 5 RV$^{mg.}$, and **Aramitess** (אֲרַמִּית), 1 Ch. 7 14 EV. See ARAM (beginning).

ARAM-MAACAH (אֲרַם מַעֲכָה), 1 Ch. 19 6 RV. See MAACAH, 1.

ARAM-NAHARAIM (אֲרַם נַהֲרַיִם). EV preserves the form Aram-naharaim only in Ps. **60** (title: μεσοποταμίαν συρίας [BℵT], *p.* συρίαν [R]) and in Dt. **23 5 [4]** RV$^{mg.}$; else-

1. OT expression. where the phrase is invariably rendered MESOPOTAMIA, even in Judg. 8 10 (so **B** **συρίας ποταμῶν**) where MT has simply Aram (ארם; συρίας **[A;** L om. altogether]). The other 𝔊 forms are: Judg. 3 8, **ποταμῶν** συρίας [B], συρίας μεσοποταμίας **ποταμῶν** [AL]; 1 Ch. 19 6 συρίας μεσοποταμίας [BℵAL].

Apart from Judg. 3 8, where its genuineness is more than doubtful (see CUSHAN-RISHATHAIM), and the confused editorial data of 1 Ch. 19 6 and Ps. 60 2 (title in

EV), which are, of course, too late to be anything but antiquarian lore,[1] the phrase Aram-nahar(a)im occurs in MT only twice—once in J, defining the position of the 'city of Nahor' (or perhaps rather 'of Ḫarrān'; see NAHOR), Gen. 24 10, and once in D, defining the position of PETHOR on the ***west*** bank of the Euphrates (Dt. 23 5 [4]). Whilst the two towns in question are Aramaean cities known in later[2] as well as in earlier[3] periods of history, the stories connected with them in the passages citecl are legends. of prehistorical times, whose interpretation is necessarily more or less conjectural (see NAHOR, BALAAM). We have no other evidence for the actual currency of **a** compound geographical expression Aram-nahar(a)im. Indeed, Aram is properly a race-name rather than the name of **a** district : apart from the passages cited, there does not appear to be any unambiguous case of its use, whether alone or in combination, as **a** geographical expression. Naharim, or Naharin (see below; § 2), on the other hand, is well known as an ancient name for Northern Syria and the country stretching eastwards from it. Aram-Naharaim, or (better) Aram-Naharim, might then be, like Aram-Zobah, etc., properly the name of **a** people rather than of a territory —unless, indeed, Aram be perhaps a simple gloss explaining Nahar(a)im (cp the converse case of Yahwè-elohim in Gen. 2). That Nahar(a)im is a dual ('the two rivers') is extremely doubtful (cp Moore on Judg. **38**) —the word, as already hinted, should probably be pronounced Naharim (see § 2).

The term MESOPOTAMIA (*q.v.*, § 1) is explained by the Greek geographers as meaning 'between the rivers'; hut they need not have been right in assuming that the rivers referred to were two. It seems not improbable that the Greek name is really connected with the ancient name.[4]

2. The name Naharīn. The form Naharin (the spelling varies : on this pronunciation see WMM, *As. u. Eur.* 251, 252 n. 3 [*-în* can, of course, also be read *-ên.*—WMM]) **is** attested by the Egyptian records of the New Empire, when this name seems to take the place of the earlier phrase Upper Ruṭenu (*ib.* 249). W. M. Miiller regards the form as plural[5] (252); but it may also be **a** locative like Ephraim, etc. (see NAMES, § **107**).

In Assyrian or Babylonian inscriptions the name has not yet been met with (see § **3**); but in the Amarna letters it occurs repeatedly as *mātu* Naḫrima or Narima, from which we learn the valuable fact that in Phcenicia (Gebal) and Palestine (Jerusalem) the form with *m* was usual.

3. Extent. Naharin (Naḫrima) was, as the meaning of the name ('river-land') would suggest, a term of physical rather than of political geography. It need not, therefore, have been used with a very great definiteness (cp the ancient names Παραποταμία, Polyb. v. 69; and the mod. Riviera); and the inscriptions, in fact, bear this out.

It seems to have extended from the valley of the Orontes, across the Euphrates, somewhat indefinitely eastwards (*As. u. Eur.* 249). Explanations, based on the view that *aim* is dual, like those of Dillmann (the territory between the Chabōras and the Euphrates), of Schrader in *KAT*[(2)] (between the middle Euphrates and the Baliḫ), and of Halévy in *Rev. Sém.* July 1894 (the neighbourhood of Damascus, watered by the so-called Abana and the Pharpar) seem less satisfactory. In its widest application, the whole water-system draining into the Persian Gulf could be called 'the waters' or 'the great water system' of Naharin' (*As. u. Eur.* 253-255). In its stricter (narrower) application it probably, at one time, included or formed part of Hanigalbat (Ḫani-rabbat). On the history of this whole district see MESOPOTAMIA. H. W. H.

[1] The passages in which the phrase has been inserted are obviously borrowed from 2 S.

[2] Pethor mentioned by Shalmaneser II.

[3] Pethor mentioned by Thotmes III.

[4] It is at least worth considering whether Mesopotamia may not be a translation of the Aramaean expression ܒܝܬ ܢܗܪܝܢ 'district of rivers,' a natural rendering (cp the Syriac Beth 'Arbāyē for Xenophon's 'Αραβια) of Naharim ('riverland'), afterwards—by an easy misunderstanding (of which there are examples)—due to the two like-sounding words *beth*—supposed to mean *between* rivers.'

[5] If the suggestion made in the preceding footnote he adopted, ποταμῶν implied in Mesopotamia will he plural.

ARAM-ZOBAH (אֲרַם צוֹבָה). See ARAM, § 6, DAVID, § 9, and ZOBAH.

ARAN (אֲרָן, perhaps 'mountain goat'—cp EPHER—but Nold. and Di. question this; αρραν [BAL]), a 'son' of Dishan the Horite; Gen. 36 28 (ארן [Sam.]; αραμ [AE]) = 1 Ch. 1 42 (αραν [L]). C. Niebuhr (influenced by the preceding name Uz) prefers the reading Aram, which is supported by some Heb. MSS, Targ. Jon., 𝔊[A] Vg. and *Onk.* (cp *Gesch.* 1 29). The MT is, however, probably correct (cp OREN,[1] 1 Ch. 2 25), though if Oren is the right pronunciation of ארן in 1 Ch. 2 25, it is probably correct also in 1 Ch. **1 42**, and ***vice versa*** (see We. *De gent.* 39).

ARARAT (אֲרָרָט; αραρατ [BAL]). **1.** Ararat is mentioned in the OT as a country; 2 K. 19 37 (αραραθ [B], αραδαδ [A]) = Is. 37 38 (αρμεν[ε]ια [BℵAOQ]); cp Tob. 1 21 (*αραραθ* [B]) AV **Ararath**, Jer. 51 27 (αρατε παρ' εμου [Bℵ]; *αραρεθ* [A]; *αραρετ* (Q).

1. Country: biblical allusions. The first two passages referred to are parallel; they relate that the two sons of Sennacherib (Sin-aḫi-irba), after having slain their father, 'escaped into the land of Ararat' (so RV). A collateral confirmation of this report is given by an inscription of Esar-haddon[2] (Ašur-aḫ-iddina) which states that on the news of the murder of his father he quickly collected the forces (with which he was probably carrying on **a** campaign in Cappadocia or Cilicia), marched against Nineveh, and defeated the army of the murderers at Hanirabbat (Hanigalmit? Schrader). This district lies in the neighbourhood of Melitēne, just where, at **a** later time, the Romans entered Armenia (*i.e.*, Ararat). In Jer. *l.c.* the prophetic writer summons the kingdoms (or, as 𝔊[Bℵ], the kings) of Ararat, Minni, and Ashkenaz to fight against Babylon. This too agrees with the representations of the inscriptions, which constantly distinguish between the land of Mannu and Urarṭu or Ararat. Mannu (which lay to the S. or SE. of Lake Urŭmĭa) was generally subject to the Assyrians, but at least once was conquered from them by Argištis son of Menuaš (see Tiele, *BAG* 208, **215**). See further MINNI, ASHKENAZ.

2. Assyrian texts, etc. The name Urarṭi appears in the Assyrian texts from the ninth century onwards. It appears to be interchangeable with Naïri (*i.e.*, the streams), the old Semitic name of the country, which it bore, for example, under Tiglath-pileser **I.** (*circa* 1108 B.C.) and, as appears from the notices in the Egyptian inscriptions of the eighteenth dynasty, at **a** much earlier date (*circa* 1400 B.C.). The kings, who are called by the Assyrians Urarṭians, never apply this name to themselves. Sarduris I., the first king whose inscriptions, written in Assyrian (*circa* ***830*** B.C.), have come down to us, calls himself king of Naïri, **a** title which the Assyrians naturally did not grant him, because they themselves laid claim to his country. His successors, who use their own language, call their land Biaina, out of which the later name Van has arisen, a name which must at that time have been transferred from the district where the kings resided to the whole kingdom.

Next, as to the extent of the kingdom of Urarṭu or Naïri. The greater part of the later Armenia was, sometimes at any rate, included within its limits; for Vannic inscriptions have been found even in Malaṭīyah, near Palu on the Upper Euphrates, and as far away as the Russian province Erivan. It would appear that originally Naïri denoted **a** more southerly region, where

[1] On Ornan see ARAUNAH. [2] 3 R. 15, col. i. 17.

the Tigris and the Euphrates rise, whilst Ararat proper (Urarti) lay to the N., in the plain of the Araxes; but that between the eleventh century and the ninth, the Urarṭians (whom their language shows to have been a non-Semitic people) conquered the more southerly region, and established there the chief seat of their dominion—a conquest which they were enabled to make by the great decline of Assyria at that time. Afterwards, both names, Naïri and Urarṭu, were used for the whole country. The Assyrian king Sargon broke the power of Urarṭu for a long time; but his successors did not succeed in their endeavours to destroy it, and so it is not unnatural that Assyriologists have sometimes defended the pre-exilic origin of the long prophecy against Babylon at the end of the Book of Jeremiah, on this ground among others, that the kingdoms of Ararat and Minni are still well known to the Israelites, and considered to be formidable powers.[1] Kuenen, however (*Ond.*(2) 2 242 = *Einl.* 2 232 *f.*), has sufficiently shown that these arguments are not conclusive. Proper names like Ararat and Minni simply prove the literary and antiquarian research of the author, and the phenomena of the prophecy as a whole appear to both the present writers to presuppose a period later than that of Jeremiah. (See JEREMIAH, ii.).

2. Ararat is mentioned also in the post-exilic version of the Deluge-story. The statement runs thus: 'And the ark rested . . . upon the mountains of Ararat' (Gen. 8 4 RV; Samar. text הרדט).

3. Deluge-story. This is precisely parallel to the statement of the cognate Babylonian story (see DELUGE, § 1): 'The mountain of the land of Niṣir stopped the ship,' or, as the following lines give it, 'The mountain Niṣir stopped the ship.' That Niṣir (protection? deliverance?) is properly the name of a mountain or mountain range seems to he clear from Ašur-nāṣir-pal's inscription (see *KB* 1 77), and Ararat too, in the intention of the Hebrew writer, will he the name of a mountain or mountain range. The situation of Niṣir is clear from the inscription just referred to. It was in Media, E. of the Lower Zāb, and S. of the Caspian Sea. There lies Elburz, the Hara berezaiti, or Hara haraiti bares, thus named by the N. Iranians after their mythic sky-mountain. Now, it is remarkable that Nicolaus Damascenus (in Jos. Ant. i. 36, cp also *OS*(2) 20948) names the mountain of the ark Baris, and places it 'above Minyas'—*i.e.*, Minni (Mannu). Báris (*bares* = high) appears to be a fragment of the Iranian name of Elburz, which this writer took for the whole name.[2] It may be conjectured that this was the mountain which the Hebrew writer, in accordance with the Babylonian tradition, had in view. If so, he gave it the name which it bore in his own time, Hara haraiti, shortening it into Ararat, not perhaps without confusing it involuntarily with the land of Urarṭi, which latter name may have had a different origin.

It was natural enough that the most widely spread tradition accepted the identity of the Ararat of the Hebrew Deluge-story with the kingdom of Ararat spoken of above. There (*i.e.*, in the plain of the Arases) a lofty mountain rises, worthy, so it may have appeared, to he the scene of such a great event as the stranding of the ark. 'Of its two conical peaks, one is crowned with perpetual snow, and rises 17,000 ft. above the sea-level; the other is 4000 ft. lower. That the Hebrew writer thought of these mountains is in the highest degree improbable (see Di. *Genesis,* 131). Another tradition identified Ararat with the land of Cardu (so Pesh., Targ.)—*i.e.*, the ancient Korduene or Karduchia on the left bank of the Upper Tigris, and the mountain of the ark with the Jebel Jūdi, SW. of Lake Van, which has become the traditional site with the Moslems.

In the Table of Nations (Gen. 10) the name of Ararat does not occur; hut Ashkenaz, Riphath (or Diphath), and Togarmah (see special articles) probably denote districts of W. and NW. Armenia.

For the geography of Urarṭu cp especially Sayce, 'Cuneiform Inscr. of Van,' *JRAS* xiv. pt. ii. 388 *ff.*, where, however, the Armenians, who entered the country from the W., and are related to the Aryan races of Asia Minor, are regarded as Iranians. It is against this view that, shortly after the first mention of the name Urarṭu by Ašur-nāṣir-pal, names of an Aryan sound occur in an inscription of his son Shalmaneser II. (Artasari and Data). C. P. T.—W. H. K.

[1] Sayce, *Crit. Man.* 485 *f.* Prof. Sayce is uncertain whether Jeremiah 'has made use of some earlier prophecy of which Nineveh was the burden, or whether 'the prophecy belongs to a time when Babylon had already taken the place of Nineveh, but when in other respects the political condition of W. Asia still remained what it was in the closing days of the Assyrian Empire.' 'In any case the prophecy must he earlier than the age of the second Isaiah, to which modern criticism has so often referred it.' This was printed in 1894, five years after the appearance of vol. ii. of the most authoritative summary of 'modern criticism,' Kuenen's *Onderzoek*(2), and two years after that of the German translation. Prof. Tiele, who, in 1886 (SAG 480), from an incomplete view of the critical arguments maintained Jer. 50 *f.* to have been written before Cyrus among the exiles in Babylon, now accepts Kuenen's main conclusions as expressed in the work referred to.

[2] Whether Luhar, the name of the mountain of the ark in *Jubilees,* chaps. 5 and 10, has any connection with Baris, it is unimportant to decide.

ARARATH, AV$^{mg.}$ 4 Esd. 13 45; RV ARZARETH.

ARARITE (הָֽאֲרָרִי), 2 S. 23 33 *b* RV; AV HARARITE, 3.

ARATHES (ΑΡΑΘΗϹ [VA]), 1 Macc. 15 22 RV, AV ARIARATHES (*q.v.*).

ARAUNAH (אֲרַוְנָה, so Kr. everywhere in 2 S. 24, but Rt. האורנה *v.* 16, ארניה *v.* 18, ארונה *vv.* 22-24), or ORNAN (אָרְנָן in Ch.), a Jebusite, whose threshing-floor, consecrated by the presence of the angel of Yahwè, David purchased as a site for an altar (cp MORIAH). The story is told in two forms, which agree in essentials. On 1 Ch. 21 20 see note to Kittel's translation in *SBOT* (2 S. 24 16 *ff.* 1 Ch. 21 15 *ff.* 2 Ch. 3 1, *ορνα* [BAL]; cp *ορονα* Jos. *Ant.* vii. 3 3, *οροννα ib.* 13 4). The real name, however, was not Araunah, which is thoroughly un-Hebraic, and presumably un-Canaanitish. The critics have in this case not been critical enough. Even Budde (*SBOT,* Heb. ed., note on 2 S. 24 16) admits, rather doubtfully, the form Arannah. Klost. prefers 𝔊's form Orna, which, however, is no better than the Ornan of the Chronicler. One has a right to require a definitely Hebrew name, and such a name for this Jebusite MT actually gives us in 2 S. 24 18—viz., ארניה = אדניה Adonijah (cp Ορνια[ς] [AL] = Adonijah in 2 S. 3 4, and in 𝔊^{L} of 1 Ch. 3 2, and in 1 K. 1 *f.*). It is proposed, therefore, to correct 'Araunah' into 'Adonijah' throughout, except in *v.* 23 (on which see below); cp 'Adonibezek,' miswritten in Judg. 1 for 'ADONIZEDEC' (*q.v.*).

The critics have been very near making this correction. They have rightly rejected the pretty romance based on the phrase 'Araunah the king' in 2 S. 24 23 (MT), from which Ewald (*Hist.* 3163) inferred that Araunah was the old dethroned king of Jebus. They have also rejected the makeshift rendering of RV, 'All this, O king, doth Araunah give unto the king,' because a subject speaking to his sovereign was bound to call himself humbly 'the king's servant' (cp 1 S. 26 19 1 K. 1 26). As Wellhausen first saw, the sense required is, 'All this doth the servant of my lord the king give unto the king.' This means correcting ארונה into ארני, and prefixing my—a capital correction which only needs to be supplemented by the emendation of ארונה elsewhere into ארניה (see above).

An additional argument has thus been gained for the substitution of 'Adonijah' for 'Araunah.' The correction is certain, and it is of the highest interest. The Israelite king and his Jebusite subject worship the same god—the god of the land of Canaan. Adonijah too was not an ex-king, but simply a member of the Jebusite community, which continued to exist even after the conquest of Jerusalem. 𝔊^{L} (2 S. 6 6 'Ορνά, Heb. נָכוֹן)

apparently identified the place with the threshing-floor at Perez-Uzzah (see NACHON). T. K. C.

ARBA (אַרְבַּע; αρΓοΒ [B], αρΒο [A] -Βε [L]), 'the greatest man among the Anakim' (Josh. 14 15). See ANAK, and HEBRON, 1.

ARBAH (אַרְבַּע) Gen. 35 27 AV. See HEBRON, 1.

ARBATHITE (הָעַרְבָתִי)—*i.e.*, a man of Beth-arābah (2 S. 23 31 1 Ch. 11 32). See ABI-ALBON.

ARBATTIS AV, or rather **Arbatta** RV (εΝ αρΒακτοις [Aℵ[c.a]]; -Βανοις [ℵ*], -Βατν. [V*], -ταν. [V[a]]; Vg. *in Arbatis;* the Syriac gives the strange form *Ardbat*, [Syriac]), 1 Macc. 5 23.† Simon the Maccabee, after his successes in Galilee against the Gentiles, brought back to Judæa 'those [Jews] that were of (reading ἐκ for ἐν) Galilee and in Arbatta.' A district rather than a town is obviously to be understood. Ewald *(Hist.* 5 314) thinks of the plain called el-Baṭīḥa on the NE. shore of the Sea of Galilee (cp the Syriac form); more probably the Arabah or Araboth (עֲרָבוֹת) of Jordan is intended. See ARABAH, 1.

ARBELA (ΕΝ, αρΒΗλοις [AℵV]), 1 Macc. 9 2. Bacchides and Alcimus, in their second expedition into Judzea, 'went forth by the way that leadeth to Galgala (γαλααδ [codd. 64, 93]), and pitched their tents before Masaloth (RV Mesaloth; μεσσαλωθ [A], μαισα. [ℵV]), which is in Arbela.' There are four alternative explanations (but see CHISLOTH-TABOR).

1. In Galilee? *First:* Josephus *(Ant.*xii. 11 1) seems to have read for 'Galgala,' 'Galilee,' which Wellhausen (*IJG*[(3)] 261, n. 2, where he quotes the parallel case, Jos. xii. 23 𝔊[B] τῆς Γαλειλαίας) adopts, and, without explaining Masaloth, takes Arbela to be the well-laown spot at the head of the cliffs overhanging the western border of the plain of Ḥaṭṭīn, the modern Irbid. The interchangeableness of the two forms Arbed and Arbel is proved by the Arab geographers. Nāsir-i-Khusrau, 1047 A.D., calls it Irbil; Yāḳūt in 1235 A.D., and others, call it Irbid. The limestone caverns near Irbid were the haunts of bandits, who were only with difficulty dispossessed by Herod the Great; the methods he employed are graphically described by Josephus *(Ant.*xiv. 15 4 *BJ* i. 16 2 *ff.*). Robinson, who, with most moderns, accepts this identification, conjectures that Mesaloth 'which is in Arbela' represents the Heb. מְסִלּוֹת in the sense of *steps, storeys, terraces,* and describes the fortress on the face of the almost perpendicular cliff (3 289). With more reason Tuch *(Quest. de Flav. Jos. Libb. Hist.*), followed by Wellhausen (*l.c.*), proposes to read Μεσαδωθ (cp HP 93, Μασσαδωθ) as if for מְצוּדוֹת 'strongholds.' The objections to this identification are that Josephus is the only authority for the reading Γαλιλαίαν, and that, by all we can learn from him, the task of reducing Arbela would have cost Bacchides more time than in the circumstances he was likely to be willing to spend. The direction through Galilee by Arbela would, however, be a natural one for the Syrians to take.

2. By Aijalon? *Second;* As natural a line of march for the Syrian army lay along the coast down to the mouth of the valley of Aijalon, and up that valley or one of the parallel defiles farther S. On this line there was a Γαλγαλα, the present Jiljūliyeh, a little more than 13 m. NE. of Joppa, on a site so important that the main road might well be described as ὁδὸν τὴν εἰς Γαλγαλα. There is, however, no trace along it of a Μαισαλώθ or an Ἀρβηλα.

3. In Samaria? *Third;* If Bacchides wished to avoid the road by the coast and up Aijalon, which had proved so fatal to Nicanor, he may have taken the road from Esdraelon S. through Samaria, which Holofernes is represented in Judith as taking—the road which this book (4 7) expressly calls 'The *anabaseis* of the hill-country,' 'the entrance into Judaea.' Upon it there stand two Gilgals, one near Shechem, and one 5 m. N. of Gophna, which Ewald *(Hist.* Eng. ed. 5 323) takes to be the Galgala of the narrative (but see GILGAL). On this route Masaloth might be Meselîeh or Meithaliin, respectively 5 and 8 m. S. of Jenin, each of them a natural point at which to resist an invader. A greater difficulty is presented by ἐν Ἀρβήλοις. The plural form evidently signifies a considerable district. Now, Eusebius (*OS*[(2)] Ἀρβηλά) notes the name as extant in his day, on Esdraelon, 9 R. m. from Lejjūn, while the entrances from Esdraelon on Meselîeh and Meithaliin are 9½ R. m. from Lejjūn. It is therefore possible that the name Ἀρβηλά covered in earlier days the whole of this district. The suggestion is, however, far from being capable of proof. The chief points in its favour are the straight road from the N., which was regarded as a natural line of invasion, and the existence along the road of a Jiljūliyeh, a Meselîeh, and a Meithalfin.

4. In Gilead? *Fourth:* There is some MS authority[1] for reading γαλααδ instead of γαλγαλα; and if the march of Bacchides be conceived as having been through Gilead, the Arbela of 1 Macc. 9 2 may be the Ἀρβηλά (mod. Irbid) which Eusebius (OS 214 73) vaguely defines as a certain village beyond Jordan on the confines of Pella. This Irbid, however, lies very far E. and not in a direct line from the N. Even from Damascus, it would be a roundabout way for the Syrian troops marching with speed on Jerusalem. (We can hardly compare the advance of Antiochus III. upon Ptolemy IV. [Polyb. 5 6], in the course of which Antiochus, after taking Tabor and Bethshean, crossed Jordan and overran Gilead from Arbela to Rabbath-ammon).

Of these four alternatives the first and third seem the most probable. The difficulties of all, horn-ever, are so great that most historians (*e.g.* Schurer and Stade) shirk discussion of the line of march, and bring Bacchides without delay to the walls of Jerusalem. G. A. S.

ARBITE, THE (הָאַרְבִּי), 2 S. 23 35, probably an error for Archite. See PAARAI.

ARBONAI (αΒρωνα [BA], χεΒρων [ℵ]; [Syriac] 'Jabbok' [Syr.]; *mambre*). In Judith 2 24 it is stated that Nebuchadrezzar 'went through Mesopotamia, and destroyed all the high cities that were upon the river (χείμαρρος) Arbonai till ye come to the sea.' Various commentators, following Grotius, have taken the Chabōras to be meant. There is much plausibility, however, in the suggestion of Movers that the proper name may have arisen out of a failure to understand the original, which he conjectures to have been בעבר הנהר '(the cities which were) beyond the river,' עבר having been taken for a proper name and supplied with a Greek ending.

ARCHANGEL (αρχαΓΓελος [Ti. WH]), Jude 9. See ANGEL, § 4.

ARCHELAUS (αρχελαος [Ti.WH], Mt. 2 22†), son of Herod the Great by Malthakè, and elder brother of Herod Antipas. By his father's will he was macle ruler over Jndzea and Samaria, and his visit to Augustus for the confirmation of this inheritance doubtless suggested a point in the parable Lk. 19 12 *ff.* Upon his coins he bears the family name of Herod and is called 'Ethnarch,' for 'king' he never was, in spite of his assumptions (cp Jos. *Ant.* xvii. 4 5). He may, however, have been *popularly* called 'king.' (Cp Jos. *Ant.* xviii. 4 3, and the use of βασιλεύει in Mt. 2 22. See further HERODIAN FAMILY, 3.)

ARCHER. See WAR, WEAPONS.

ARCHES is the rendering in the EV of אֵילַמּוֹת, etc., in Ez. 40 16 *ff.* The word אילם or אלם occurs in MT only in this chapter; but 𝔊[BAL] transliterates αιλαμ also where MT has אֻלָם, אולם. Whatever explanation be adopted of the variation of form, the meaning is

[1] HP οδον εις γην γαλααδ [cod. 64], ο. την εις γαλααδ [cod. 93].

doubtless the same throughout—viz., 'porch.' See PORCH, PALACE, TEMPLE.

That the principle of the arch early became known to Israel is a probable inference from the shape of their TOMBS.

ARCHEVITES (Kt. אַרְכְּוָי, cp Kau. *Gram. d. bibl. Aram.* § 61 6; Kr. אַרְכְּוָיֵא; 𝔊 Swete, αρχογοι; αρχογςι [B]; αχγαιοι [A]; αρχ. [L]), mentioned in Ezra 4 9† as a tribe settled in Palestine by ASNAPPER (*q.v.*). The word is not to be regarded as meaning inhabitants of Erech (Ryssel, Ryle), or as equivalent to ἄρχοντες (Jensen, *TLZ*, 1895, n. 20), but rather as miswritten for (י)דִּ, כּוּ(תָ)יֵא, 'who are Cuthæans' (see 2 K. 17 24 'from Babylon and from Cuthah,' etc.). So Marq. *Fund.* 64 *f.*

ARCHI (הָאַרְכִּי), Josh. 16 2 AV, RV ARCHITES.

ARCHIPPUS (αρχιππος [Ti. WH]) is included as a 'fellow-soldier' of Paul and Timothy in the address of the epistle to Philemon (Philem. 2), and in that to the Colossians (4 17) he received this massage : 'Take heed to the ministry (διακονίαν) which thou hast received in the Lord, that thou fulfil it.' Most probably he had recently become the minister (more than 'deacon' in the narrower sense) of the church at Colossæ, perhaps in succession to Epaphras, who was now with the apostle. In *Ap. Const.* (7 46) he is said to have been apostolically ordained bishop of Laodicea in Phrygia.

ARCHITES, AV ARCHI (הָאַרְכִּי; TOY αρχι [L]; 𝔊BA combine the word with the following Ataroth, χαταρωθει [B], αρχιαταρωθ [A]), a clan mentioned in the difficult phrase גְּבוּל הארכי עטרות (Josh. 16 2) in the delimitation of the southern frontier of Joseph. Probably we should reverse the order of the last two words and read 'the border of Ataroth-of-the-Archites.' Indeed, we might plausibly go a step further and change הארכי to האדרי (or הארדי), 'Addarites' (or 'Ardites'). See ATAROTH, 2. That the name Archi lingers in that of the village *'Ain 'Arīk*, 5 m. WSW. of Beitīn (*PEF Mem.* 3 7), is at best a hazardous hypothesis (cp Otth, and Buhl *Pal* 170 *f.*). The home of the clan of Archites to which HUSHAI and, according to 𝔊 (2 S. 23 11 הָרָרִי, 6 Ἀρουχαῖος [BA], 6 Αραχι [L]; and *v.* 35 הָאַרְבִּי, [του Ουραι] οερχει [B], 6 Αραχειεις [A], 6 Αφαρει [L]), SHAMMAH [*q.v.*, 3 and 4] and PAARAI, two of David's heroes, belonged, may have been farther S.

ARCHITECTURE. See CONDUITS AND RESERVOIRS, FORTRESS, HOUSE, PALACE, TEMPLE, TOMB.

ARCHIVES, See HISTORICAL LITERATURE, § 5.

ARCTURUS, AV's rendering of עָשׁ (Job 9 9) and עַיִשׁ (Job 38 32); RV BEAR. Most probably, however, עש in Job 9 9 has arisen from dittography of עשה which precedes, for כסיל follows without ו. The whole verse seems to be an unmetrical interpolation (see Bickell); Duhm. agrees as to עש, and goes so far as to excise *vv.* 8-10 (so also Beer). Observe that Am. 5 8, which is certainly (see AMOS, § 12) an interpolation, and very possibly alludes to Job 9 9 (as Am. 4 13, also interpolated, may allude to Job 9 8), does not include עש among the constellations. We have, therefore, only to explain the עיש (עַיִשׁ?) of Job 38 32. That the Pleiades are meant is not unlikely (see STARS, § 3 (a), cp Tg. (38 32) ונהא על אפרחהא, 'the hen with her chickens'). Cheyne, however, prefers 'the Lion with his sons' (on Job 38 31, etc.' *JBL*, 1898, 103 *ff.*). Epping's list of 'stations' for Venus and Mars, obtained from Seleucidean tablets, gives as the tenth 'the fourth son behind the king' (ρ Leonis). The 'king' is Regulus (α Leonis); he is preceded by *rîs arî* 'Lion's head' (ε Leonis).

(ἕσπερον [B*A]; *kīyūthā* [Pesh.]; *arcturum* [Vg. 9 9], *vesperum* [*ib.* 38 32]. In 9 9 𝔊, Pesh., presuppose the order כסיל עש, כימה.) Cp MAZZAROTH, ORION, PLEIADES.
C. F. B.—T. K. C.

ARD (אַרְדְּ, Gen. 46 21 Nu. 26 40† cp ARDON, AKOD), perhaps a better form than ADDAR (אַדָּר) of ‖ 1 Ch. 8 3† (Gen. αραδ [ADL; B lacking; Jos. σαρολος]; Nu. αδαρ [B], αδερ [AFL]; 1 Ch. αδει [B], αρεδ [A], αδαρ [L]) in genealogy of BENJAMIN (*q.v.*, § 9; ii. β); variously designated son of Benjamin (Gen. MT), son of Bela (Nu. and 1 Ch.), son of Gera b. Bela (Gen. [ADL; B lacking]). Gentilic ARDITE (אַרְדִּי; 𝔊BA om., ὁ Αδερι [L *q.v.*]).

ARDATH, RV **Ardat,** the name of a field mentioned only in 4 Esd. 9 26 as the scene of a vision of Esdras.

The Eth. and Syr. read *Arphad*, which Fritzsche and Hilgf. follow. The Lat. Vss. vary :—*ardath* [Vg.], *adar* [S*], *ardad* [A], etc.; cp Bensly *ad loc.* Supported by the description in *v.* 24 ('a field . . . where no house is builded'), Volkmar would emend to *Arba*, 'desert' (more correctly *Araba*). Similarly Rendel Harris, who, however, connects Arba with Kirjath-arba (*Rest of Words of Baruch*, Camb. 1889), in which case the 'oak' in 14 1 will be Abraham's oak of Hebron. On the other hand, we should then expect rather the usual name Hebron, or, at least, the fuller form, Kirjath-Arba. If Ardat is indeed to be sought for in this district (in 31 Esdras is in Babylon) we might follow T. Rec. more closely and identify it with the well-known Arad, which also was situated in a desert. See ARAD, 1.

ARDITES (הָאַרְדִּי), Nu. 26 40. See ARD.

ARDON (אַרְדּוֹן; ορνα [BA], αβδων [L]), b. Azubah, a Calebite (1 Ch. 2 18†). See AZUBAH, 1.

ARELI (אַרְאֵלִי; Gen. 46 16; αριηλις [*D*], αροηλεις [A], απηλεις [L]; Gen. *l.c.*, also τω αριηλ [BFL], om. A; see ARIEL), b. Gad. In Nu. 26 17*b* the name is used also collectively with the art. (EV 'the **Arelites**'; ο αριηλ[ε]ι [BFL]), with consciousness that 'son of Gad' = Gadite clan. Doubtless *v.* 17*b* should be corrected to 'Of Ariel (לְאַרְאֵל), the family of the Arielites (הָאַרְאֵלִי),' and it is possible that the names should rather be Uriel, Urielites (see NAMES, § 35).
T. K. C.

AREOPAGUS, AREOPAGITE (Acts 17 19 επι τον αρ[ε]ιον παγον [Ti. WH] EV 'unto [the] Areopagus'; *v.* 22, AV 'Mars' Hill,' RV 'Areopagus'; hence the title Areopagite, Acts 17 34†, αρεοπαγειτης [Ti.], -γι- [WH]). Difficulty is caused by the fact that the name signifies both a hill and a court.

1. The hill. The hill is that formless mass of rock which lies towards the NW. below the Acropolis, separated from it by a depression now largely filled with earth (Herod. 8 52; Luc. *Pisc.* 42). The NE. corner of the hill is a precipice, to the top of which we ascend by means of sixteen ruined steps, cut in the rock at the SE. angle. At the head of the stair are the remains of an altar. The deep chasm at the foot of the precipice was connected with the worship of the Semnai (Eumenides or Furies). 'The whole place was sacred to the most awful associations. Mythology had here lent to the majesty of the law a most solemn background.'

2. The Court. As a Court, the Areopagus was, before the development of the democratic spirit, the supreme authority in Athens. Its powers were of two kinds, definite and indefinite. 'The definite powers were :—(1) a limited criminal jurisdiction; (2) the supreme direction of religious worship especially of the cultus of the Eumenides. The indefinite powers were :—a general supervision or guardianship (1) of all magistrates and law courts; (2) of the laws; (3) of the education of the young; and (4) of public morals—in addition to which there was (5) the competence to assume in political and national emergencies a dictatorial authority.'

During the earlier history of the city the court held its sittings, for the trial of blood-guiltiness, upon the hill itself. For the hill was the Hill of the Aræ, the Curses or Imprecations—'the place for the solemn irrevocable oath, the natural court for the trial of terrible offences of blood-shedding that might not be tried under a roof.' Moreover, to the early city, the Areopagus was the

place *without* the gates, a place to condemn the criminal, to erect a monument for the outcast tyrant, to bury the stranger (Robert, *Aus Kydathen,* 101). It was during the earlier and the later periods of Athenian history that the Court of the Areopagus (ἡ ἐκ τοῦ Ἀρείου πάγου βουλή) enjoyed its powers to the full. In the interval Ephialtes, aided perhaps by Themistocles (Arist. *Const. Ath.* 25; 462 B.C.), abolished most of its indefinite functions, and thus deprived it of its strongest influence; it became merely a 'criminal court of narrow competence.' Thenceforth, as in Aristotle's time, it dealt only with cases of wilful homicide, of poisoning, and of arson (*Const. Ath.* 57), while the superintendence of religion was in the hands of the King Archon. As indictments for impiety (ἐνδείξεις ἀσεβείας) came, in their preliminary stages, before the latter, cases which once would have gone before the Areopagus were now tried before the popular jury-courts. It was in this way, therefore, that Socrates, accused like Paul of not worshipping the gods of the city and of introducing new divinities,[1] was tried. As the regular place of business of the King Archon was the Stoa Basileios—the associations of which were, in later days, exclusively religious—it was within that portico that the charge of impiety was brought against the philosopher. It is probable, however, that the Areopagus also always met within the Stoa (Dem. *in Aristog.* 776) when ritual did not demand a midnight-sitting on the open rock—in other words, in all cases other than those of murder. When, with the advent of the Romans, the Areopagus reappeared, after its long eclipse, as once more the supreme authority of the city (cp Cic. *Ep. ad Fam.* xiii. 1 5; *Nat. Deor.* 2 74), and the specific control of religion fell again within its competence, it would naturally continue to meet there.

There it was, therefore, and before that body, that Paul was summoned. To speak of him as 'perhaps standing on the very stone where had once stood the ugly Greek who was answering the very same charge' (Farrar, *St. Paul,* 390) is to sacrifice historical truth to sentiment. We must relinquish the fond idea that Athens has the interesting distinction of being the one city of the world where we can tread in the very footsteps of the apostle. The view now generally taken errs in a double manner. It maintains, first, that the proceedings were in no sense legal or magisterial; and secondly, that they were upon the hill. The marginal rendering (AV *v.* 22) is no doubt right in representing that it was before the court that Paul was brought. Can we believe that a crowd of idlers, parodying the judicial procedure of the court, could have been allowed to defile the neighbourhood of 'that temple of the awful goddesses whose presence was specially supposed to overshadow this solemn spot, and the dread of whose name was sufficient to prevent Nero, stained as he was with the guilt of matricide, from setting foot within the famous city' (Suet. *Ner.* 34; Dio Cas. 43 14)? Such a view requires better support than is given by the bare assertion that 'the Athenians were far less in earnest about their religion than in the days of Socrates, and if this was meant for a trial it could only have been by way of conscious parody' (Farrar, *op. cit.* 390, n. 3). Nor can an appeal to Acts 9 27 prove that ἐπιλαβόμενοι (Acts 17 19, AV 'took') is here not used in the sense of 'arrest.'

3. Paul.

The view advocated by Curtius (*Stadtgesch. von Athen,* 262 *f.*) is correct. Paul was taken not to the Areopagus hill,—a place not adapted either for hearing or for speaking, upon an occasion such as this,—but to the Stoa Basileios (ἐπὶ τὸν Ἄρειον πάγον; cp Acts 9 21 16 19, etc.) for a preliminary examination (ἀνάκρισις). There it was to be decided whether the new teaching would justify a prosecution for the introduction of a new religion. Standing in the midst of the assembled Areopagites (ἐν μέσῳ τοῦ Ἀρείου πάγου, cp Cic. *ad Att.* i. 14 5; *Fouilles d'Epidaure*, 168, Ἄρειος πάγος λόγους ἐποιήσατο), he made his defence. Much of what fell from his lips may be presumed to have awakened an echo in the breasts of his audience (on the speech see HELLENISM, § 9); but the mention of the resurrection of the body seemed to remove the case altogether out of the domain of the serious and practical. The court refused to continue the examination, and Paul was contemptuously dismissed (ἐχλεύαζον *v.* 32 *f.*). Curtius, *Paulus in Athen*, modifies his view. For another view, see Rams. *Paul.* 243 *f.* See also Findlay, ***Ann. Brit. Sch.*** 1 78 *f.* W. J. W.

[1] Cp Xen. *Mem.* 1 1 with Acts 17 18. Yet there is probably no conscious reference on the part of the Christian writer to the 'trial of Socrates, though the contrary has been asserted.

ARES (αρεс [BA]), 1 Esd. 5 10 = Ezra 2 5, ARAH, 2.

ARETAS (αρεταс [Ti. WH]), an ancient name (strictly Ḥārĭthă; חרתת in inscriptions: *e.g.*, Euting *Nab. Inschr.* No. 16) of Nabatzan princes, mentioned in the story of Jason the high priest (in the time of Antiochns Epiphanes), 2 Macc. 5 8 (Ἀρετας [VA]). The Arĕtas of this passage is called 'king of the Arabians'; he was hostile to JASON (*q.v.*). Another Aretas was master of Damascus in the time of Paul—three years after the apostle's conversion. His 'ethnarch' sought (see below) to apprehend Paul, who, however, made good his escape (2 Cor. 11 32 *f.*). The story of the Nabataeans has been told elsewhere (see DAMASCUS, § 12, NABATÆANS). It is certain that about *85* B.C. they had possession of Damascus; but it should be added that the autonomy of Damascus in 70-69 *B.C.* is established by numismatic evidence. The first collision with the Romans was in 64-62 B.C., when the Nabatzan king, Aretas III., intervened in the struggles between Hyrcanus and Aristobiilus. Damascus now came under Roman sovereignty. During the following decennia the Nabatzean kingdom became involved in the wars occasioned by the Parthinns—with varying bnt for the most part ill success. The king also had various disputes with his neighbour Herod the Great. Aretas IV. (9 B.C.–40 A.D.) had tact and skill enough to keep terms with Augustus; his daughter became wife of Herod Antipas (Jos. *Ant.* xviii. 5 1), but was set aside in favour of Herodias. Disputes on frontier questions furnished the aggrieved father with pretexts for war. Vitellius was ordered by Tiberins to avenge the defeat inflicted by Aretas upon Herod; but the death of the Emperor put an end to the scheme (cp CHRONOLOGY, § 78). At this time, according to 2 Cor. 11 32, Damascus must again have fallen into the hands of Aretas; Damascene coins of Tiberins do not occur later than 33-34 A.D. A tempting conjecture is that it was Caligula that sought at this price, after his accession,[1] to buy over Aretas, against whom Tiberins had so recently ordered war; yet, in our complete ignorance of this chapter of history, we are not precluded from supposing that Tiberius himself in 34 A.D. had already taken occasion to present Aretas with the city as a peace-offering (cp CHRONOLOGY, § 78). A violent capture of the city by Aretas is not to be thought of: such a deed would have called for exemplary punishment at the hands of the Romans. Equally improbable is the view of Marquardt (*Röm. Staatsverwaltung,* 1 405) and Mommsen (*Röm. Gesch.* 5 476) that Damascus had remained subject to the king of Arabia continuously from the beginning of the Roman period till 106 A.D. For (1) in Pompey's time Damascus belonged to the Decapolis (Plin. *HN* v. 18 74; Ptol. v. 15 22; cp DECAPOLIS, § 2); (2) in the reign of Tiberius it was the Roman governor that gave the authoritative decision on a question of frontier between Damascus and Sidon (Tac. *Ann.* xvii. *63)*; (3) we have imperial coins of Damascus with figures of Augustus, Tiberius, and Nero; (4) in Domitian's time there was a cohort raised in Damascus, the Cohors Flavia (*CIL*

[1] So also Gutschmid (Excursus in Euting's *Nab. Inschr.* 85) and Schiirer (*GJV* 1 618, ET2 357 *f.*).

2 870; 5 194, 652 *ff.*); (5) Damascus was not included in the Roman province formed out of the Nabatæan kingdom in 106 A.D.

What it was that induced Aretas's 'ethnarch' in Damascus to persecute Paul, it is impossible to say. Perhaps he regarded Paul as a turbulent and dangerous Jew; perhaps he wished to propitiate the other Jews in Damascus, who were many and powerful (Jos. *BJ* ii. 20 2; vii. 8 7)—so powerful that the synagogues had been able to hand over to the 'young man' Saul and his helpers such Jews as accepted the Gospel. The subsequent years, down to the absorption of the kingdom by the Romans, offer no incident of special interest. It is, however, significant that in 67 A.D., in the Jewish war, Malchus II. (Malku) contributed auxiliary troops to the army of Vespasian (Jos. *BJ* vii. 4 2). Shortly before this, Damascus must have been retaken from the Nabataeans by Nero, for imperial coins of Damascus are again met with from 62-63 onwards.

Consult Schurer, *GJV* 1610 *f.*, where further literature is referred to; and cp DAMASCUS, § 12; NABATÆANS. H. v. S.

AREUS (αρης [AKV, but cp Swete; Jos. αρειος]) 1 Macc. 12 20 AV. See SPARTA.

ARGOB. 1. a territory in Bashan, always in the phrase חֶבֶל אַרְגֹּב (Dt. 3 4 13 *f.* הארגב), 'district' or 'circuit' of Argob (περιχωρον αργοβ[1] [BAL]; once αρβοκ [B*]). It was taken by Israel in the war with Og, and contained sixty cities with walls and gates (Dt. 3 4 *f.*). We are ignorant of its precise situation. In Dt. 3 4 it seems equivalent to 'the kingdom of Og in Bashan' (cp 1 K. 4 13 where 𝔊 is corrupt); but in *v.* 13 it stands in apposition to 'all Bashan.' The term 'district,' literally meaning 'line' of Argob, which seems to imply very definite limits, has led many (Targums, Porter, Henderson, and the Pal. Surv. Maps) to identify it with the present Lejā, the low, rough plateau of congealed lava, whose sharp edge distinctly marks it off from the surrounding plain. For this, however, there is no other evidence; nor does the OT narrative carry the conquest of Israel so far to the NE. The one certainty is that Argob lay in Bashan. The addition in Dt. 3 14 that it ran up to the border of Geshur and Maachah is indefinite, and the text of the rest of this verse, which identifies Argob with the conquest of Jair, is corrupt. The Havvoth-Jair were tent villages and lay in Gilead; the cities of Argob were fortified and lay in Bashan. The only places with names (whether in Greek or in modern times) of any similarity are the Ῥάγαβα (so Ραγαβαν 1 K. 4 13 [L]) of Jos. *Ant.* xiii. 155, a fortress E. of Jordan, whose site is unknown (cp Reland, *Pal.* 201), and the modern Rajib (Rujēb) and Wādy Rajib (Rujēb), which, however, lie in Gilead. The name Argob may be derived from Heb. *regeb*, a *clod* (see EZEL). Besides authorities named, see Eus. OS; Wetz. *Reiseber. über Hauran*, etc. 83; GASm. *HG* 551 *ff.*; Dr. *ad* Deut. 3 4-5. On archaeological remains, see BASHAN, § 3. G. A. S.

2. Argob and Arieh (אֶת־אַרְגֹּב וְאֶת־הָאַרְיֵה), two names mentioned in connection with Pekahs conspiracy against Pekahiah (2 K. 15 25). but whether of officers on the side of the king, who shared his fate (his *gibbōrīm*, according to Targ. Jon.), or of conspirators along with Pekah, it is difficult to say, owing to the corrupt state of the text.

Argob (αργοβ [BAL] ܐܪܓܘܒ) is not suitable for a personal name. It is a well-known place-name (see above, 1), and Arieh (αρ[ε]ια [BL], αριε [A], ܐܪܝܐ) has the article prefixed (as if 'the lion'). The Vg. ('percussit eum . . . juxta Argob et juxta Arie') accordingly treats the names—we think correctly—as names of places[2] (cp Tisch.), in which case they are doubtless glosses. Argob may have easily arisen from the preceding ארמון (BAL om.) or may he a gloss upon the 'Gileadites" (see below). St. (*ZATW* 6 160) for 'Arieh' would read חַוּוֹת יָאִיר, and suggests that 'Argob and Havvoth Jair' were originally glosses belonging to *v.* 29. On that theory, the origin of the difficult את (prefixed to both names) becomes clear.

The MT leaves it obscure whether the 'fifty men of the sons of Gileadites'[2] were fellow-conspirators with Pekah (so 𝔊BL, which reads ἄνδρες) or whether they were slain along with the king (so 𝔊A ἄνδρας, Vg. *viros*). 𝔊BA (not L) presents a different reading, 'fifty of the four hundred,' which, if correct, must refer to some body-guard. This may be a trace of the true text, and Klostermann accordingly restores 'he (Pekah) smote him . . . with his (Pekahiah's) 400 warriors, and with him (Pekah) were fifty men of the Gileadites.' PEKAH [*q.v.*] was possibly a Gileadite.

ARIARATHES, RV ARATHES (αραθης [VA], αριαρ. [א]), one of the sovereigns enumerated in 1 Macc. 15 22. Ariarathes VI., Philopator, king of Cappadocia (163-130 B.C.), is obviously intended. See CAPPADOCIA.

ARIDAI (אֲרִידַי; αρσαιος [BAL] αρσεος [א]; but cp ARISAI), son of Haman (Esth. 9 9). See ESTHER, § 3 (end).

ARIDATHA (אֲרִידָתָא; σαρβαχα [BKAL], but cp Gr. readings of PORATHA). son of HAMAN (*q.v.*), Esth. 98. See ESTHER, § 3 (end).

ARIEH (הָאַרְיֵה), 2 K. 15 25; see ARGOB, 2.

ARIEL (אֲרִיאֵל, but אֲרִאֵל in S.; αριηλ [BAL]).

1. A personal name. So (i.) Gen. 46 16 Nu. 26 17, 𝔊; MT אַרְאֵלִי (see ARELI [EV], where *b's* readings are given), the eponym of a family of GAD (*q.v.*) in P; (ii.) Ezra 8 16 (= 1 Esd. 8 43, EV IDUEL, mg. ARIEL; ιδουηλος [BA]), head of family, temp. Ezra (see EZRA, i. § 2, ii. § 15 (1) *d*); and (iii.) 2 S. 23 20 [BL; A omits] = 1 Ch. 11 22 [BKAL]. a Moabite whose two sons[3] were slain by David's warrior, Benaiah. So RV,[4] Kau. *HS*, Ew. We. Dr. Some more striking action, however, is required in such a context, and it is best to adopt some form of Klostermann's emended reading, which makes Benaiah the slayer of two young lions (so Bu. in *SBOT*). Marquart, however, suggests that for Ariel in 2 S. we should read Uriel (cp URIAH, 1 [2 S. 23 25]), and the author of NAMES (§ 35) makes a similar suggestion for Ariel, 2, and for ARELI (*q.v.*).

2. A prophetic name for Jerusalem, Is. 29 1 *f.* 7 (6),[5] probably to be read Uriel (אֻרִיאֵל) in *vv.* 1, 2*a*, 7, and Arial (אֲרִיל = אֲרִאֵל) in *v.* 2*b*. Uriel (or Uruel?) would be a modification of Urusalem (ארושלם; Am. Tab. Urusalim; see JERUSALEM), and mean originally, Gods enclosure or settlement (cp JERUEL). Arial (cp Ar. *iratun*, hearth) means altar-hearth,[6] as it probably does in Mesha's inscription (אראל *ll.* 12, 17 *f.*). The prophecy containing it was written during Sennacherib's invasion (see ISAIAH, ii. § 20); it aimed at dissipating the false confidence of the people in the security of Jerusalem. The proper name of the city was Urušalem (which afterwards became Jerusalem). Isaiah alters this into Uriel (Uruel?) in order to make a paronomasia. In a year or two the city against which David had encamped will be besieged by a greater than David, and so great will be the slaughter in its streets that its

---

1 In Jos. 14 15 𝔊B gives Αργοβ for ארבע; see Kirjath-arba.

2 Not to be connected with αρια (Eus. *OS*(2) 288 10), or rather *arima* (Jer. *ib.* 146 26); see ARUMAH.

1 Argob and Gilead lie close together.

2 a fusion of מבני גלעד and מן־הגלעדים (so 𝔊L.); cp Kö. ... גלעדים, crit. note.

3 MT omits 'sons' in both places, and 𝔊BAא in Ch.

4 RV 'the two (sons of) Ariel'; AV 'two lion-like men.

5 In *v.* 7 𝔊 has a doublet; ιερουσαλημ [BZΓ both times, and AQ second time], ιηλ [אAQ* first time], ιλημ οι γ' αριηλ [Q mg. first time], ιελμ [א second time].

6 The same word probably occurs with this meaning in Ezekiel's plan of the temple; Ez. 43 15 *f.* (*v.* 15*a* הַרְאֵל; 15*b Kt.* 16*a Kt.* הָאֲרִאֵיל; *v.* 15*a* φως μου θς ' ητοι ορος θυ δις το θυσιαστηριον ουτως εκαλεσε [adnot in Qmg.]).

name will become no longer Uriel, but (by a slight modification) Arial—*i.e.*, altar-hearth. The reading Uriel seems to have been known to the author of 31 9:[1] 'says Yahwè, who has a fire (אור) in Zion and a furnace in Jerusalem.' The other explanations of this prophetic name are (1) lion, or lioness, of God (Ew., Di., Che., *Isa.*[(1)]); (2) hearth of God (Del., König, Kittel); (3) altar-hearth (Stade, Duhm, Che., *SBOT*). Of these, the third is probably the easiest; but none of them quite accounts for the selection of the new name for David's city, nor for the expression 'and will become to me like (an) Ariel (*v.* 26). T. K. C.

ARIMATHÆA (ἀριμαθαια [Ti. WH]), Mt. 27 57, etc. See RAMATHAIM-ZOPHIM.

ARIOCH (אַרְיוֹךְ; ἀριωχ [BADEL 87, ℵ[c.a]], -χης [87 in Dan. 2 14 *f.*]). Probably a Hebraised form of an old Babylonian name (see CHEDORLAOMER, § 3) used, (1) possibly with archæological accuracy, in Gen. 14 1 9 of an ally of an ancient king of Elam; (2) by a literary fiction, of Nebuchadrezzar's captain of the guard (Dan. 2 14 *f.* 24 *f.*); and (3) of a king of Elam (so the Syriac) in alliance with Nebuchadrezzar (Judith 1 6, αριασε [K"]. Cp Bezold, *Babyl. Assyr. Lit.* 53.

ARISAI (אֲרִיסַי; Ρουφαιον [BℵL], -φανον [A], unless we regard this as an intruder and identify Arisai with the succeeding name Αρσαιος; see ARIDAI), son of Haman (Es. 9 9). See ESTHER, § 3 (end).

ARISTARCHUS (ἀρισταρχος [Ti. WH]), a Thessalonian (Acts 20 4 27 2), one of Paul's companions in travel (Acts 19 29), was among those who accompanied him from Europe on his last recorded visit to Jerusalem (Acts 20 4), and also on his voyage to Rome, having joined him at Cæsarea (Acts 27 2). As the apostle's 'fellow-prisoner' (συναιχμάλωτος) he unites with him in saluting the Colossians (Col. 4 10). Cp COLOSSIANS, § 10 *f.* He joins in the salutation to Philemon (Philem. 24), but in this passage is designated simply as 'fellow-worker,' Epaphras alone being called 'fellow-prisoner.' From this it has been inferred, with much probability, that the companions of Paul relieved one another in voluntarily sharing his captivity.

In the lists of the 'seventy disciples' given by the Pseudo-Dorotheus and Pseudo-Hippolytus (not earlier than the fifth cent.), Aristarchus is bishop of Apamēa in Syria. Pseudo-Dorotheus also has it that along with Pudens and Trophimus he was beheaded in Rome at the same time as Paul.

ARISTOBULUS (ἀριστοβουλος [VA; Ti. WH], a Greek name adopted by Romans and Jews, and borne by several members of the Maccabean and Herodian families).

1. The teacher (διδάσκαλος) of Ptolemy (no. 1), to whom Judas (the Maccabee) sent letters (2 Macc. 1 10). He is the well-known Jewish-Hellenistic philosopher of that name, who resided at the court of Ptolemy VI. Philomētor (180-145 B.C.). He was of priestly descent (ἀπὸ τοῦ τῶν χριστῶν ἱερέων γένους, *v.* 10; cp Lev. 4 3 הַכֹּהֵן הַמָּשִׁיחַ), and was the author of (among other writings) certain works on the Pentateuch, fragments of which are preserved in Clement of Alexandria and in Eusebius. See Schur. *GJV* 2 760 *ff.*, Ew. *GVI* 4 355, and Kue. *Godsd.* 2 433 *ff.*

2. 'They of the household of Aristobulus' are saluted in Rom. 16 10. It is not implied that Aristobūlus himself was a Christian. The name was a common one in the dynasty of Herod. The list of the 'seventy disciples' given by the Pseudo-Dorotheus names Aristobulus as bishop of Britain.

ARIUS (ἀρης [AKV; 𝔊 is not certain, see Swete], *ARIUS*), 1 Macc. 12 20 RV; see SPARTA.

ARK. See DELUGE, § 10.

[1] Isaiah's authorship is doubted (Che. *Intr. Isa.* 204). It is unlikely that Isaiah explained Uriel 'God's fire'; the paronomasia in *v.* 2*b* would then disappear. Moreover אוּר in the sense of fire seems to be late. Cp 30 32 *f.*; 33 17 (late).

ARK OF THE COVENANT or Sacred Ark (אֲרוֹן;[1] κιβωτος [BAL]; *ARCA*).

There is nothing more significant than the changes in the titles of sacred objects. We must, therefore, be careful to place these titles in their chronological order. According to Seyring (*ZATW* 11 116 ['91]) the oldest name of the ark (or sacred chest) is 'the ark of Yahwè the God of Hosts (Ṣĕbā'ōth) who is enthroned upon the cherubim.'

Names: Ark of God, etc.

This title is reached by an analysis of the designations of the ark in (*a*) 2 S. 6 2 and (*b*) 1 S. 4 4 (both passages belong to early documents). The titles given in (*a*) are 'ark of God' (*hā-elōhīm*), and 'called by the name of Yahwè Ṣebā'ōth that is enthroned upon the cherubim.'[2] In (*b*) the title is 'ark of the *b'rith* of Yahwè Ṣebā'ōth who is enthroned upon the cherubim.' Recombining the supposed oldest elements in these titles, Seyring obtains the title mentioned above. This usually careful scholar, however, has overlooked, in dealing with (*b*), 𝔊's reading in the preceding verse—viz., 'the ark of our God' (τὴν κιβωτὸν τοῦ θεοῦ ἡμων [B], τ. κ. τῆς διαθήκης τοῦ θ. ἡ. [A], τ. κ. τ. δ. κυρίου τ. θ. ἡ. [L]), which is self-evidently more correct than the Deuteronomic formula[3] of MT, and, taken together with *a*. 6 ('ark of Yahwè'), justifies us in assuming that the equally simple title 'ark of Yahwè' stood originally in *a*. 4*a* and *v.* 5, and 'ark of God' (cp *vv.* 11 17 19-22) in *v.* 4*b*. Nor has Seyring noticed that after 'ark of God' in (*a*) the relative clause which follows is superfluous, and presumably a later insertion. It must be added that it remains most improbable that the divine name Yahwè Ṣĕbā'ōth is older than the Assyrian period, to which indeed Amos who undoubtedly uses it belongs; at any rate the theory that this name represents Yahwè as the God of Israel's hosts, and has any special connection with the ark, has insuperable difficulties.[4] Thus, so far as (*a*) and (*b*) are concerned, the popular names for the ark were very short—viz., 'ark of Yahwè,' 'ark of God,' and 'ark of our God,'—and from the context of the former passage we find that there was a still shorter name, 'the ark' (2 S. 6 4), which occurs thrice in old parts of Samuel, and five times (or seven, including Josh. 3 14 17; see Kau. *HS*) in the Hexateuch. The title 'ark of God' (ארון האלהים, or twice ארון אלהים) occurs often in old parts of Samuel, and also in Chronicles. In a solemn speech of David in 1 Ch. 15 12 14 we find the sonorous phrase 'the ark of Yahwè, the God of Israel,' which reminds us of the phrase used by the Philistines in 1 S. 5 7 *f.* 11.[5] Side by side with 'the ark of Elohim' we naturally find the phrase 'the ark of Yahwè.' It occurs first in the composite work JE, and may reasonably be ascribed in the first instance to J, though in some passages it may have been inserted by the editor, either as an altogether new addition, or in lieu of the phrase 'the ark of God,' which was probably used in E. Once (Josh. 3 13) we find this remarkable addition 'the Lord of the whole earth,' which, apart from *vv.* 11 13, occurs only in late writings, and, as Seyring points out, is

[1] Cp Ass. *eru*, *erênu* (*erinnu*), 'box,' 'receptacle' (DELUGE, § 10).

[2] The same renderings are given for תֵּבָה, Noah's ark, but not for תֵּבָה, the 'ark' in the bulrushes.

[3] This rendering implies that שֵׁם, 'name,' occurs twice in MT by pure accident. Otherwise we should have to suppose that the name by which the ark was called was 'the name of Yahwè Ṣĕbā'ōth,' etc.

[4] Smend's arguments (*Rel.-gesch.* 185 *ff.*), weakly met by Marti (*Gesch. der Isr. Rel.* 140), appear conclusive, only he should have fortified himself by Assyrian parallels. Thus, Aim is said to rule kiššat ilâni 'the mass, or entire multitude, of the Gods,' Nebo to be the overseer kiššat šamê u irsitim 'of the mass (multitude) of heaven and earth.' Amos and his school represent Yahwè as the lord of all supernatural beings in the universe, in opposition to all rival deities. See, however, NAMES, § 123.

[5] On these points see further, Budde's crit. note in *SBOT*: Couard, *ZATW* 12 71 ['92], n. 1; We. *TBS* 167 (especially as to the right rendering of 1 Ch. 13 6).

presumably due to a post-exilic writer whose idea of Yahwb differed from that of JE. The phrase 'the ark of Yahwb' passed from JE into the terminology of the historical books in general (including Chronicles).

2. Ark of b'rith. A new title for the ark seems to have been coined by the author of the original Deuteronomy (Deut. 10 8), and adapted from him by writers and editors who shared his religious point of view, and even (strange to say) by the Chronicler, who, in general, stands so completely under the influence of the Priestly Code. This phrase is 'the ark of the d'rith' (usually rendered 'covenant'; see below), either simply (Josh. 3-6) *or* in various combinations, such as 'ark of the *d'rith* of Yahwb,' 'ark of the d'rith of Elohim,' and 'ark of the *b'rith* of Adōnai.' The Deuteronomistic editors have freely introduced the term *d'rith* into the titles of the ark in the older sources which they edited. The work of the editor clearly betrays itself in such phrases as הָאָרוֹן הַבְּרִית (Josh. 3 14), הָאָרוֹן בְּרִית־יְהוָֹה (Josh. 3 17), where the editor has forgotten to make the omission of the article, necessitated by the introduction of a dependent genitive.

And now as to the correct meaning of the phrase ארון הברית. It is rendered by 𝔊BAL ἡ κιβωτὸς τῆς διαθήκης, by Vg. *arca fœderis* and *arca testamenti* (Nu. 14 44), and by EV 'ark of the covenant.' That *b'rith* cannot, however, in this phrase mean 'covenant' in our sense of the word is clear from 1 K. 8 21 (= 2 Ch. 6 11), where we are told that 'the *b'rith* of Yahwb' was 'in the ark.' The phrase is parallel to that in Ex. 25 16 21, 'into the ark thou shalt put the testimony' (את הָעֵדֻת), which (see below) is a technical term for the 'two tables' of the Decalogue. Hence Kau. *HS* rightly rejects the obscure if not misleading phrase 'ark of the covenant,' and substitutes 'ark with the law (of YahwB),' which is at any rate, by common admission, the best approximate rendering (cp COVENANT, § 1).

3. Ark of 'ēdūth. The latest phase in the historical development of the names of the ark is marked by the title which occurs eleven times in the Priestly Code and also in Josh. **4 16** (introduced into JE by the editor?), meaning 'ark of the publicly delivered ordinance' (𝔊BAL ἡ κιβωτὸς τῆς διαθήκης τοῦ μαρτυρίου, Vg. *arca testimonii*, EV, ark of the testimony). The meaning given above is confirmed by Ex. **31** 18 (E?) 32 15 (E), 34 29 (P), where we hear of 'the two tables of the עֵדֻת. Probably this new title appeared to the priestly writer clearer and more definite than that introduced by Deuteronomy. It did not, however, displace the older phrases, which reappear not only in Chronicles but also in the Greek Apocrypha, and (κ. τῆς διαθήκης) in the NT (see below, § 15).

On looking back, we see that the names and titles of the ark fall into three classes. We have, first, the names 'ark of Yahwè,' 'ark of God,' 'ark of our God,' which indicate that the ark contained an object which in some way symbolised and represented Israel's God; and next, the names, 'ark of the law,' 'ark of the ordinance,' which suggest that the object contained in the ark was inscribed with laws; and lastly, attached to the older names, titles such as those in Josh. 3 (11) 13 2 *S.* 6 2, which indicate a desire to correct the materialistic interpretation which might seem to convert the ark into an idol. A critical study of the texts is the necessary commentary on these deductions from names. The following sections aim at bringing together the chief notices of the ark, indicating the sources from which they are derived, and then, at fitting points, giving the reader some idea of the results which follow from a critical treatment of these notices.

We turn first of all to the documents called J and E (as far as we can separate the one from the other) in the Hexateuch. It is more than probable [1] that both J and

1 See the **analysis** of **Ex.** 32 *f.* in Exodus, ii. § 3, and cp Bacon, *Exodus*, 143, 146; We. *CH* 95; Di. *Ex. u. Lev.* 345.

4. Traditional origin of ark: JE. E, in their original form, related how Yahwb or Elōhim, at Sinai or at Horeb, directed an ark to be made as a substitute for his personal presence as leader of his people. These passages were omitted by the editor, who preferred the muck more suitable account (so he must have deemed it) given in P (see below, § 13), but has preserved the tradition of J and E that, both in the wilderness and on the entrance into Canaan, the ark led the van of the host. In referring to this J quotes two poetic formulæ (Nu. 10 35 36), which he says were spoken by Moses at the beginning and the end of a day's march, but which more probably arose at a later time.' Whether J and E agreed with Deuteronomy in stating that the 'two tables of stone' were placed in the ark is a matter which can be only conjecturally decided. There is, however, a very strong probability that they did not. E's story, at any rate, is much more forcible if we suppose no renewal of the shattered tables (Ex. 32 19), and we cannot believe J to have differed on this important point from E. Historical considerations (see below, § 10) confirm this conclusion. In particular, the ark was not, in the succeeding narratives of J and E, **a** symbol of the revealed law, but the focus of divine powers. Twice, we are told, the Israelites omitted to take the ark with them and were defeated (Nu. **14 44** Josh. 7 4), and on the latter occasion Joshua prostrated himself before the ark,[2] and remonstrated with YahwB, the God of Israel. The crowning proof of the potency of the ark was given when the Israelites crossed the Jordan (according to one of the traditions, at harvest time), and captured Jericho (Josh. 3 *f.* 6). The Deuteronomic editor has made the former part of the narrative difficult to restore to its original form (which was a combination of J and E); but it is probable that J and E already described the priests (not, 'the priests, tlie Levites') as bearers of the ark. In the latter part it is not very difficult to recover a simpler, more natural, and presumably earlier account, in which no express mention is made of the ark, and nothing is said of the falling down of the walls of Jericho (on the narrative see JOSHUA, ii. § 7).[3] Thus far, then, the most genuine tradition is clear and intelligible.

['The invention of portable sanctuaries, and especially of portable idols, may possibly go back to the nomadic Semites and to a time when the gods were still tribal rather than local; but the probabilities are all against such a view. There is less trace of such an institution in Arabia than in any other part of the Semitic world, and nowhere else is the principle so strongly marked that **a** tribe that changes its seats changes its gods. Even the ark of Yahwè is not carried back by Hebrew tradition to patriarchal times; the patriarchs do worship only where they have afixed altar. It is, therefore, more likely that portable symbols of the godhead first arose among the settled Semites and in connection with the religion of the army in war. In this connection the idea of a portable god involves no great breach with the conception that each deity has a local home, for when the campaign is over the god returns to his temple. When the notion of portable gods was once established, however, its application could easily be extended and would serve **to** smooth away the difficulty of establishing new permanent sanctuaries in conquered regions or colonies over the sea. A Greek colony always carried its gods with it, and it is probable that this was often done by the Phoenician colonists also. Even in Israel we find that the sanctuary of Yahwb at Dan was constituted by setting up the image from Micah's sanctuary (Judg. 18 30), just as David gave a religious character to his new capital by transferring the ark to it.'] [4]

But by what critical process can we bring simplicity

1 Delitzsch, however, defends the Mosaic authorship, *ZKW* 8 225-235 ['82].
2 So MT and 𝔊L; 𝔊BAF omit 'the **ark** *(of)*.'

4 From WRS, *Burnett Lectures*, 2nd series, Lect. I. (MS).

into the episode of the capture and restoration of the sacred ark by the Philistines (1 S. 4 1-7 1)? Some facts are admitted. That at the end of the period of the Judges the ark rested at the Ephraimitish sanctuary of Shiloh is a trustworthy Statement, guaranteed by 1 S. 4 3 *f.* (chap. **3** we must regretfully pass over, as coming from a different hand and later writer; see **SAMUEL,** ii.). It must, also, he a fact that the Philistines had defeated the Israelites near Eben-ezer (ISRAEL, § 11). Tradition doubtless added that the leaders of Israel attributed their misfortune to the absence of the ark from the host, and that they therefore fetched the sacred chest from Shiloh. The immediate consequences are graphically described. On the arrival of the ark the Israelites were in a state of wild delight; and the Philistines who heard the shoutings were proportionately alarmed, for 'who (said they) can deliver us from these great gods?' (*ĕlōhīm*). Nevertheless, with the courage of despair, the Philistines renewed the fight with complete success, and were even able to carry off the arlc in triumph. Then begins a series of wonderful incidents from which it is difficult to extract a kernel of early tradition. Stade thinks (*GVI* 1 202 *f.*) that in chaps. 5 and **6** he can find the remnants of two distinct accounts; but the recognition of this would only diminish the number of difficult features in the narrative. It would ohviously not provide an intelligible statement of facts. Of the difficult details referred to there is only one which it is necessary to criticise here. It is a statement which the study of the Assyrian monuments seems to make historically impossible. The Philistines, we are told, under the pressure of pestilence, returned the 'gods' which they had captured from Israel. Ancient nations did not act thus in such circumstances. For example, we know that the image of the goddess Nanā (see NANÆA) was taken from Erech by an Elamite king, and detained in Elam for 1635 years. Did any calamity ever suggest to the Elamites the idea that Nanā was chastising them for the insult to her image? No. Ašurbānipal, king of Assyria, had to devote all his energies to the task of crushing the Elamites before he could restore the image to its ancient home (cp ASUR-BANI-PAL, § 8). Similar stories of reconquered idols are told in connection with the names of Ašurbānipal's grandfather Sennacherib (cp ASSYRIA, § 20) and the old Babylonian king Agu-lralc-rime.[1]

5. Capture and recovery.

The fragmentary document which we have thus far studied closes with the statement that the ark was placed in the house of Abinadab at Kirjath-jearim, and that Abinadab's son was consecrated to keep it. It is to an entirely different (and probably earlier) source[2] that we owe the narrative of the bringing of the ark to Zion. We learn here that at the time when David bethought himself of the ark, it rested at a place called Baal in Judah (2 S. 6 2; see Driver *ad loc.*). During the whole of Saul's reign and during David's seven-years' reign in Hebron, it had lain forgotten in a provincial town. Neither Saul nor David had thought of taking it into battle; nor, so far as our evidence goes, had it been visited by the people. What, then, had been the effect of the repeated attestations which the divine judgments had given to its supernatural power? Let us see whether the narrative in 2 S. 6 (which appears to be older than that in 1 S. 4 1-7 1), when critically treated, suggests any way out of our manifold difficulties. It is permissible, and indeed necessary, to disregard so much of chap. **6** as relates to the death of Uzzah (a passage which in its difficulty resembles parts of the story in 1 S. 5 *f.*, and the growth of which can he accounted for), and to fix our attention on the simpler narrative in *vv.* 10-15, the kernel of which is that, early in David's reign, the ark was in the house of one Obed-edom of Gath, and that David fetched it thence with much jubilation to Zion. How came the ark to be there? That David of his own accord entrusted such a sacred object to a Philistine is highly improbable; hut how if Obed-edom was not a Philistine sojourning in Judah, but a foe residing in his native town of Gath? How if the ark had never left Philistine territory, though it had been shifted from Dagon's temple to a private house? How if David acted as Assyrian kings acted in similar circumstances, and reconquered the precious object which was to him in some sense the dwelling of his God? This is the hypothesis of Kosters, who held not only, with Kittel and Budde, that 2 S. 21 15-22 is properly the continuation of the narrative in 2 S. 5 17-25, but also that the sequel of the story of the battle in Gath (2 S. 21 20) was once the notice that David fetched the ark from the house of Obed-edom in Gath and deposited it for a time at Baal.[1] After this, according to Kosters, came originally the story of the capture of Jerusalem (an event which this critic places *after* the hostilities referred to in 2 S. 5 17 *ff.*), and of the bringing up of the arlc to Zion. The editor to whom the present form of 2 S. 6 1-12 is due appears to have had a religious rather than a historical motive. The facts as stated in the original narrative might suggest to some readers that Yahwè needed the interference of David to deliver him from captivity: in other words, that David was stronger than his God. The editor shrank from inventing an entirely new narrative, but, to counteract that idea, put the central facts in the traditional story in an entirely new setting.

This hypothesis, the present writer has long felt, is absolutely required to clear up an important historical episode.[2] Without it the central facts of tradition, including David's almost ecstatic joy (2 S. 6 14), are hopelessly obscure. A glance at 2 S. 6 1 *f.* will convince the reader that there is nothing arbitrary in the view proposed. That *vv.* 2-12*a* cannot have been the original sequel of *v.* 1 must be clear. Unless *v.* 1 is simply misplaced, it must have been followed by a record of some martial exploit of David. To the present writer it seems probable (see DAVID, § 7) that the exploit consisted in a great victory near Gath (cp 2 S. 21 20 *f.*), which so weakened the Philistines that they offered to restore the ark on condition of David's making with them a treaty of peace, and that David himself fetched the ark from Obed-edom's house. It will be remembered that when David defeated the Philistines at Baal-perazim he had 'taken away the images' (2 S. 5 21) which, by their presence, should have ensured a Philistine victory. It seems probable that when the Philistines restored the ark David gave back the captured 'images.' Cleverness was a characteristic of this king. It was all-important to him not to wage an internecine warfare with the Philistines, and he therefore 'contented himself with a peace honourable for both parties' (Kamphausen). The original story may have referred to this restoration of the images captured at Baal-perazim, and this compound name may have suggested the mention of 'Baal' and 'Perez-uzzah' in 2 S. 6 as it now stands. In a certain sense, indeed, the ark *was* recovered from Baal-perazim.

Our next notice of the ark is in 2 S. 7, a passage full of varied interest, though in its present form not older than the sixth century. It tells us (and no doubt the

[1] Tiele, *BAG* 128 *f.* 305 *f.* 392 *ff.*, referred *to* by Kosters, *ThT* 27 364 ['93].

[2] The reference in 2 S. 6 3 *to* the house of Abinadab seems to be an editorial insertion (see Kosters, *op. cit.* 368).

[1] The reason why David deposited the ark at **Baal** was, according *to* Kosters, that he had not yet conquered Jehus or Jerusalem. Those who hold another view as *to* the time of the conquest of Jebus will give a different reason. David had indeed conquered Jebus, hut had not yet adapted it by fresh buildings *to* serve the purpose of a capital. See DAVID, § 10.

[2] Since the above was written, Winckler has made another attempt to produce an intelligible view of the history of the ark (*GI* 70 *ff.*). It is difficult *to* see that there is any solid ground for his very revolutionary hypothesis; but, at any rate, he perceives **a** problem which escaped the earlier writers before Kosters.

statement is historical) that David wished to build a cedar-house for the ark. but was forbidden bv an oracle.

6. Permanent abode. We can understand, therefore, that for a time (as 2 S. 11 11 suggests) the ark was still carried with the armv as an insurance against defeat.[1] The capture of it by the Philistines, however, had already given a blow to the primitive, fetishistic conception of the ark, and an occasion arose when David, it would seem, was inwardly moved to express a far higher view. It was probably a turning-point in Israel's, as well as in David's, religious development. The circumstances were these. David was fleeing from Jerusalem before Absalom. Zadok wished to carry the 'ark of God' with David and his body-guard. The king, however, protested, and commanded Zadok to carry it back, 'that it may be seated in its place' (2 S. 15 25, 𝔊L). He was conscious (if *v.* 26 may be followed) that YahwB might have cause to be displeased with him, and would rather suffer his punishment meekly than seem, by having the ark with him, to demand the interposition of Yahwè as a natural right. Henceforth, therefore, the symbol of Yahwè's presence should no more 'leave its place': Yahwè would direct Israel's affairs, both in peace and in war, from Zion. Early in Solomon's reign the greatest of all Israel's sanctuaries was erected. Much as the original passage of Solomon's biography has been edited (see Kau. *HS* and cp 𝔊), it is beyond question that this king transported the ark from its temporary abode to the sanctuary of his temple. There—so both he and David hoped—it was to serve as a national centre, and complete the unification of Israel. The hope was, however, disappointed; nor do even the writers of Judah spend a word on the ark, or give a hint as to the feelings of the people towards it.

Our next news of the ark is indirect, and comes from an exilic or post-exilic passage of the Book of Jeremiah (3 16).

7. Disappearance. The passage runs thus: 'In those days no more shall one say, "The ark of the *b'rith* of YahwB," neither shall it come into one's mind, neither shall one think npon it, nor miss it, neither shall it be made again.' The full import of the words may be doubtful; but at least one thing is clear—the ark, on the possession of which the weal or woe of Israel had once seemed to depend, had passed away. This is too patent from later writings to be denied. Ezra 1 and 1 Macc. 4 do not mention the ark among the sacred vessels. Josephus (*BJ* v. 55) declares that the Holy of Holies contained nothing at all. Lastly, Tacitus, relating the entrance of Pompey into the temple, uses the emphatic words, 'Inde vulgatum nullas intus deum effigies; vacuam sedem et inania arcana' (*Hist.* 59). How the ark disappeared will be considered presently (see next §). Suffice it to add here that the *sēpher tōrāh* or 'Book of the Law' succeeded to the undivided reverence of true Israelites, and is still, with its embroidered mantle and ornaments, the most sacred object in every synagogue.

When, then, and how did this holy thing, which, according to Jer. 3 16, was by many so painfully missed, pass out of sight?

8. Its fate. We have accounted for one strange gap in our historical notices respecting the ark: how shall we explain the still longer and stranger lacuna which extends from (say) 960 to 586 B.C.? Why is it that neither the historians nor the prophets of this period (so far as we possess their works) refer to the fortunes of the ark or to the popular reverence for it in their own time? Three answers seem possible. (1) Soon after 960 the ark may have been captnred by an enemy—a calamity which was deliberately suppressed by the historians, just as they suppressed the destruction of the temple of Shiloh. Giesebrecht and Couard have pointed to the invasion of Judah by Shishak (Šešonk I.), king of Egypt, about 928, as the occasion of this (*see* 1 K. 14 26). The objection is that Shishak's campaign, as the bas-reliefs at Karnak appear to prove,[1] was against Israel as well as Judah, and that, Egypt being too weak at that time to think of permanent conquests, the expedition must have been simply due to vainglory and to greed. If Shishak took away from Palestine anything in the nature of an idol, it must have been the 'golden calves' of Jeroboam, and not the outwardly unattractive wooden chest in the sanctuary of the temple of Rehoboam. Besides, Rehoboam and his priests would never have allowed the capture of the ark to become known: they would certainly, in the interests of the temple, have substituted a new chest, for which pious fiction the supposed discoveries of Babylonian kings mentioned by Tiele (*BAG* 461) may perhaps furnish a parallel. (2) The ark may have been carried away with the temple treasures in 785, by Joash, king of Israel (2 K. 14 14), who would hardly have omitted to reclaim the long-lost treasure of the Ephraimitish sanctuary at Shiloh. The objection to this is that the ark had long ceased to be the special possession of a tribe, and that events had proved that Joash could well dispense with the ark, while to have carried it away would have been an offence against the great hero of united Israel—David. **(3)** The ark (which was probably renewed by the priests, when decayed from age) may have retained its place till the great catastrophe in 586, and previously to this may have lost much of its ancient prestige owing to the growing sense of the inconsistency of identifying such an object as the ark with the great God Yahwè, and perhaps also to discourses of the prophets against a superstitious reverence for the ark which have been lost, or even suppressed by editors. This view—which is in the main that adopted in 4 Esd. 10 22, and implied by the legend in 2 Macc. 2 5 (cp below, § 15), that Jeremiah[2] hid the tabernacle and the ark and the altar of incense in a cave—is by no means an improbable one. The only obvious objection to it can easily be met. The assertion in Dent. 10 4 *f.* that the ark was simply the repository of two inscribed tables of stone need not imply that D, like P, is an archæologist, and that the object which is thus wrongly described no longer existed. It is more natural to suppose that, like the other fetishes to which this writer is *so* vehemently opposed, the sacred stones which (as we shall see) were the objects venerated of old in the ark still held their place, concealed from view but secure. The Deuteronomist, speaking in the name of Moses, could not help assuming the sanctity of the ark and its contents. In the interests of piety, however, he transformed (as far as words could do it) the nature of the objects in the ark. That venerable coffer was not, he meant to say, in any sense the dwelling of the deity. whom no temple could hold (1 K. 8 27): it simply contained a perfect written embodiment of the fundamental demands of Israel's righteous God.

This leads us to consider the origin and affinities of the ark. For the ark of the Deuteronomist (and of P),

9. Real nature. with its two inscribed tables, no parallel has been found. Prof. Sayce indeed refers to Mr. Rassam's discovery of a coffer with two inscribed alabaster tablets in a little temple at Balawāt, near Mōṣul;[3] but the coffer (which was not placed in the sanctuary) also was of alabaster, and with its contents corresponds to the chests containing sacred books which were among the regular appurtenances of Egyptian (and probably of Syrian) temples, but were not meant to be carried. For the ark known to the earliest Hebrew traditions, however, there are many monumental

1 We must not refer here to 1 K. 2 26, which states, according to MT, that Abiathar used to 'bear the ark before David—*i.e.*, in his campaigns. The right reading is, not ארון, ark,' but אפוד, 'ephod'; cp 1 S. 23 6 9. Cp the same mistake in 1 S. 14 18, MT. (So first Thenius.)

1 St. *GVI* 1 353 *f.*; WMM, As. *u. Eur.* 166-169.
2 In the Talmud (*Horajoth*, 12*a*) it is Josiah who hides the ark and other sacred objects, including the pot of manna (see below, § 15).
3 Sayce, *Hibbert Lectures*, 65; cp Pinches, *TSBA* 7 83.

parallels. In Egypt, for instance (from which Renan too hastily derives the Israelite ark), no festal procession could be sculptured or painted without them.[1] The arks, with their images, were placed on boats, which were ornamented at the ends with heads of the divinities within; the king himself, being divine, also had his ark-boat. Such an ark-boat, too, is referred to in the strange story of the daughter of the king of Baḫtan,[2] where an image of the god Ḫonsu is said to have been transported to Syria, to deliver a princess from the spirit that oppressed her. These shrine-boats must originally have had their parallels in Babylonia : the constant expression for the sacred arks in the cuneiform texts is *elippi*[3]—*i.e.*, 'ships.' Within the best-known historical periods, however, it was in simple arks or coffers that the images of the gods were borne in procession at the Babylonian (and Assyrian) festivals.

Thus it appears that two things were essential in a sacred arlc—that it should be of a size and a material which woold permit it to he carried, and that it should contain a representation or mystic symbol of a deity. The ark known to David and Solomon doubtless complied with these conditions. It was a simple wooden box, such as the ancestors of the Israelites had used in their nomadic state for their few valuables,[4] without either the coating of gold or the cherubim with which the reverence of a later writer provided it. As to its

10. Contents. contents, the inscribed 'tables of stone,' which we should never have expected to find in the Holy of Holies, were but a substitute of the imagination for some mystic symbol or representation of Yahwè. Of what did that symbol consist? We are, of course, bound to do what we can to minimise the fiction or error of the Deuteronomist; but we must not deviate from the paths of historical analogy. These duties are reconciled by the supposition that the ark contained two sacred stones (or one).[5] This view, no doubt, implies a survival of fetishism; but there are traces enough of fetishism (on which see IDOLATRY, § 4) elsewhere in Hebrew antiquity to justify it. The stones (or stone) must have been ancient in the extreme. They (or it) originally had no association with Yahwk; they represented the stage when mysterious personality and power were attached to lifeless matter. Being portable, however, they were different from the sacred stones of Bethel, Beth-shemesh, Shechem, and En-rogel, and are most naturally viewed as specimens of those bætyls, animated stones, which, according to Sanchoniathon, were formed by the heaven-god, and were presumably meteorites. They may have belonged originally to the tribe afterwards called Ephraim; and when the several tribes united in worshipping Yahwk, the God of Moses, the Ephraimitish ark with its contents may have been adopted as the chief sacred symbol of Yahwk. Theearliest narrators (see above, § 3, end) viewed the arlc (which was virtually one with what it contained) as a substitute for the immediate presence of Yahwk, the sin of the 'Golden Calf' at Sinai having proved the Israelites to be unripe for such an immense privilege. The primitive Israelites, however, who knew nothing of the story referred to, must have regarded it, not as a substitute, but as the reality itself.

The portableness of the Israelitish ark did not, it is true, lead to its being carried about in processions. The

11. Treatment. reason is that, to the Israelite, the object within the ark was much more than an idol. It was not merely one of a class of objects, each of which contained a portion of the magical virtue of the deity whom it represented :[1] it was the only object with which Yahwk was so closely connected that the ark (for reverence forbade mention of the stones) and Yahwè were practically synonymous terms. It was, therefore, too sacred to be moved for a slight reason. Worshippers would rather make a procession round or before the ark (cp 2 S. 6 14) than bear it in procession themselves. The reverence implied in the story in 2 S. 6 6 *f.* may represent the feeling of an age later than David's; but circumstances had long been leading up to that extreme exaggeration. The higher the conception of Yahwk became, the greater was the awfulness which encompassed the ark,[2] until (it appears probable) by a natural reaction the nobler Israelites rejected the fetishistic conception of the ark and its contents altogether, Thus we get one great distinction between the arlc of the Israelites and other sacred arks : it was not subservient to idolatry. The only occasions on which it left its resting-place were times of war. Then, indeed, it was carried with the host into the fray, just as the Philistine images were carried into battle by the Philistines (2 S. 5 21)—not to speak of Arabian and Carthaginian parallels.[3] It was not specially a 'warlike palladium,' however, except for the periods when war rather than peace was the normal state of the people;[4] and we have found even David, at a great crisis in his life, deciding to put his trust in his God without the presence of the ark.

The notices of later writers are valuable mainly for the religious history of the period of their authors. They

12. Later notices. show us how, near the close of the pre-exilic (and afterwards in the post-exilic)age, pious men imagined to themselves the nature and circumstances of the ark. It is, therefore, unsafe to infer with Berthean, from 2 Ch. 353, that the ark was removecl from the sanctuary by Manasseh ; unsafe, also, to infer, with the old Cambridge scholar Spencer, from P s description of the ark, that it was designeclly macle like the arks of Egypt, in order that the Israelites might miss no splendour or elegance which had charmed their eyes at Zoan. That Manasseh, with his syncretistic liberality, would have removed the ark is altogether improbable. Spencer's theory, on the other hand, may contain an element of truth, and is, at any rate, more plausible than the view developed out of P s acconnt by Riehm.[5] It is probable that the priestly legislator (P_2), in his description of the ark, did, unconsciously and in no servile manner, take suggestions from the sacred chests of Babylonia and Egypt, which he had seen or heard of. The simple chest of which J and E had doubtless spoken was unworthy (he thought) to be in any sense the symbol of the 'Lord of the whole earth.' Not such an ark could Moses have ordered to be made, for Yahwk was all-wise and must have 'filled' the artificers of the ark and the tabernacle 'with a divine spirit in wisdom and understanding' (Ex. 35 31). We must not, however, overlook the references to the ark in writings of the Deuteronomic school. We are told (Dt. 108) that Yahwk 'separated the tribe of Levi to bear the ark of the *b'rith* of YahwB,' and in Dt. 31 9 (cp 25 *f.*) we find a special title given to 'the priests the sons of Levi,' which is derived from this function (cpJosh. 33). For other Deuteronomicreferences to the ark, see Dt. 31 25 *f.* Josh. 833 1 K. 3 15 619 8 9 21.

1 See the procession of the arks of Amen Rē', Mūt, and Ḫonsu (the Thehan triad) in the second court of the temple of Ram[e]ses III. at Medinet Hābū (Wilkinson, *Anc. Egyptians*, 3 289), and Plate V. in Naville's *Festival Hall of Osorkon*, 2 (cp p. 18).

5 Cp Vatke, *Die Rel. des A T* 321 ; St. *GVI* 457 *f.* ; Benzinger, *Hebr.* Arch. 370. There were and still are two sacred stones, a black and a white, built into the wall of the Ka'ba at Mecca (WRS, *Kin.* 297 *f.*).

1 Cp Maspero, *RP*(2) 343, n. 2.

2 Cp 1 S. 6 20, 'And the men of Beth-shemesh said, Who is able to stand before Yahwk, *this holy God?*'

3 See WRS, *Rel. Sem.*(2) 37.

4 Kautzsch and Kraetzschmar (see 'Literature') hardly seem to hit the mark. We cannot lay any stress on the titles in 1 S. 44 2 S. 6 2, on grounds stated already (above § 1).

5 Riehm thinks (*HWB*(2), art. 'Bundesladk') that the ark was constructed in such a way as to show the diametrical opposition between the religion of revelation and the religion of nature worship, the presence of Yahwk (symbolised by the cherubim on the ark) being conditional on Israel's performance of its covenant-duties.

We now return to the much more important notices in the Priestly Code and in Chronicles. A fnll description of the ark is given in Ex. 25 10-22 37 1-9. It was made of acacia wood.

13. P's description.

This statement is possibly based on tradition which is particular as to the materials of sacred objects. The shittah-tree grows not only in Arabia, but also in parts of Palestine : the ark, therefore, could be renewed if necessary. It was oblong—two cubits and a half in length, one and a half in breadth and in height. Gold was overlaid on it within and without, and on the lid, which had a projecting golden rim (זֵר), was a plate of pure gold (כַּפֹּרֶת ; see MERCY-SEAT), sustaining two golden cherubim (see CHERUB, i.), or winged figures, whose wings extended over the ark. From these cherubim Yahwè promised to communicate with Moses, and reveal his will for Israel. According to Ex. 30 26, the arlc was to be anointed along with the tabernacle and the rest of its furniture. When made, it was brought, we are told, to Moses (39 35), and placed by him in the tabernacle, screened by the veil[1] (*i.e.*, in the Holy of Holies ; see 26 33 *f.*). In Lev. 16 2 the sanctity of the arlc is emphasised by the command that Aaron (*i.e.*, the High Priest) shall enter the Holy of Holies only once a year. In Nu. 3 31 the charge of the ark is committed to the Kohathites, and in 45 it is commanded that when the tabernacle is moved Aaron and his sons (*i.e.*, the priests) shall carefully cover up the ark with the veil, before the Kohathites take it up, in order that the latter may neither see (*v.* 20) nor touch (*v.* 15) the holy things. In 789 (RV) the Voice (*i.e.*, of Yahwè) speaks to Moses from the 'Mercy-Seat.' The gloss in Judg. 20 27 *f.* —a gloss added under the influence of P_2—states that the ark was at Bethel in the days of Phinehas, and the editors, who follow P_2, doubtless understood that the ark was always in the tabernacle till the battle of Aphek (cp TABERNACLE).

The Chronicler adds scarcely any fresh incidents to the account of the ark, and edits the earlier narratives in Samuel and Kings on the assumption that the regulations of the Priestly Code were observed throughout the history.

14. Chronicler, etc.

In 1 Ch. 15 1 *f.* he makes David say, 'None ought to carry the ark of God but the Levites,' and they carry it accordingly ; and at first sight it appears as if the Philistine Obed-edom became a Levite (*vv.* 18 21 24) ; see however OBED-EDOM, 2. A profound sense of the sanctity of the ark is shown in 1 Ch. 28 2, where the ark or the 'Mercy-seat' is called 'the footstool of God,' and in 2 Ch. 8 11, where Solomon refuses to let Pharaoh's daughter dwell in the palace of David, 'because the places (?) are holy, whereunto the ark of Yahwè hath come.' In 353, Josiah commands the Levites to 'put the holy ark in the Temple' : 'it shall not be a burden on your shoulders.'

The only direct references to the ark in the Psalms are in Ps. 1328 (cp 2 Ch. 6 41), where it is styled אֲרוֹן עֻזֶּךָ, 'ark of thy strength' ; and in Ps. 78 61, where God is said to have delivered his 'strength' (*i.e.*, the ark) into captivity. An indirect reference has often been supposed in Pss. 24 47 and 68 ; but this involves the untenable assumption of their pre-exilic origin.

The ark is only twice mentioned in the NT. It and its contents are described in Heb. 94 as in P,, except that the pot of manna (see above, § 8, note) is said to have been *in* (instead of *beside*) the ark.

15. NT.

In Rev. 11 19, after the seventh angel has sounded, 'the temple of God in heaven' is opened, and the 'ark of God's covenant' is seen within. The words 'in heaven' (ὁ ἐν τῷ οὐρανῷ) are however probably an editorial insertion (Spitta). It is the earthly (not the heavenly) temple that is referred to, and the meaning of the statement is that the ark which was hidden (so tradition variously said) by Jeremiah or Josiah, shall suddenly reappear in the sanctuary in the latter days.

16. Literature.

See, besides Spencer, De *legibus Hebræorum* (1685), Seyring (on the names of the ark), *ZATW* 11 114-124 ['91] ; Couard (on the religious and national import of the ark), *ZATW* 12 ['92] ; Kautzsch (on the title Yahwè Seba'oth), *ib.* 6 ['86], 17-22 ; Kosters, *ThT*, 27 361-378 ['93] ; Di. on Ex. 25 ; Nowack's and Benzinger's *Heb. Arch.* ; Winckler, G I 1 ['95], 70-77 ; Kraetzschmar, *Die Bundesvorstellung*, 1896, pp. 208-220 ; Bähr, *Symbolik*, 1482, etc. (on other sacred arks) ; Simpson, 'Ark-shrines of Japan,' *TSBA* 5 550-554.

T. K. C.

ARKITE (הָעַרְקִי—*i.e.*, the 'Arkite, man of 'Arka ; ἀρουκαῖος [ADEL, Jos. *Ant.* i. 62 ; cp Sam. ערוקי]), a Canaanite (Phœnician) tribe, Gen. 10 17= 1 Ch. 1 15 (om. B, ἀρακει [L]); see GEOGRAPHY, § 16, 1. Arka (cp ἀρκη, Jos. *l.c.*) is mentioned among the cities taken by Tiglath-pileser III. (cp *KAT*(2) 104, 254 *f.*), and, at a much earlier period, in the Amarna tablets (*e.g.*, 78, 12, *Irkata* ; once [126, 22] *Irkat* ; the *Arkantu* of Thotmes III. seems to be a collateral form).[1] The lofty *tell* commanding the remains of the ancient city was discovered by Shaw in 1722. At its S. foot flows the Nahr 'Arka in a deep rocky bed, towards the sea, two hours distant. To the E. of the *tell* is the village of 'Arka, about 12 m. N. of Tripolis. It was an important place in the Roman period, when, through being the birthplace of Alexander Severus, it was called Caesarea Libani. It was famous for the worship of Astarte. See Smiths *Dict. Class. Geog. s.v. Arca* ; Schü. *GJV* 1498 n.

ARMAGEDDON, RV HAR-MAGEDON (ἀρμαγεδ-δων [TR], ἁρ μαγεδων [WH], ἀρμαγεδων [Ti. Treg.] ; cod. Am. *Hermagedon* ; cp ερμακεδων, vers. Memph.), the name of the last great battlefield (Rev. 16 16).

1. How understood by author.

Between the sixth vial and the seventh is inserted a vision (Rev. 16 13 *f.* 16) which has no connection with the context, being apparently the sequel of the vision of the three angels in Rev. 14 6-11. The three angels proclaim the coming judgment upon the world-power and the way to escape it ; the three demoniacal spirits (from the dragon, the beast, and the false prophet) seek to counteract this by 'gathering the kings of the whole world for the war of the great day of God the Almighty.' The junction of forces is made at 'the place which is called in Hebrew Har-Magedon.'

Two questions have to be asked : (1) What did the writer understand by Har-Magedon (if this is the correct reading)? and (2) What was the meaning of the term in the source, whether written or oral, from which he drew? It is in the highest degree probable that the writer himself interpreted the phrase, 'the mountains of Megiddo' (cp Ἀργαριζιν = Mount Gerizim, Eupolemus *ap.* Eus. *PE* 9 17). Both from its natural advantages and from its history the *Plain* of Megiddo (Zech. 12 11) would have been the more obvious scene of such a great gathering; but the writer could plausibly justify the substitution of 'mountains' for 'plain' by the much-studied apocalyptic descriptions of Ez. 38 8 21 392417, where the hordes of Gog are said to meet their end 'upon the mountains of Israel.' Megiddo itself is, of course, a hill-town, though close to the great Plain of which it commands the southern entrance : there is nothing incorrect, therefore, in the phrase 'the mountain-district of Megiddo.' Har-Magedon is no doubt half-Hebrew ; but it would be strange if readers of Jewish Greek could not interpret it (cp terms like Ναγεβ in 𝔊). *See* APOCALYPSE, § 46.

If, however, we hold it to be probable that the small apocalypse (see Spitta, *Offenb.* 568) to which 16 16 belongs is a translation of a Hebrew original, and certain, at any rate, that the writer built to a considerable extent on traditional

2. Original meaning.

1 This seclusion is in harmony with the transcendentalism of the later conception of the divine nature.

1 Cp the ethnic *Irkanatai* on the monolith of Shalmaneser II. (292 ; *KB* 1 172). So Hommel, *Gesch.* 609, Ed. Meyer 'Glossen z. d. Thontaf. von el-Am.,' *Ægyptiaca* ('97), p. 69 ; cp WMM, *As. u. Eur.* 247.

semi-mythic stories eschatologically interpreted, it becomes a question whether his interpretation of the name of the great battlefield as meaning 'mountains of Megiddo' is correct. The restoration of the original text offered by a writer in *ZATW* 7 170 ['87], הַר מְגִדּוֹ ('will gather them unto his fruitful mountain'—*i.e.*, the monntain-land of Israel), does not give a definite locality, which seems. to be required in this context. Nor are the attempted numerical explanations quoted by Spitta (*Offenb.* 402) more probable. Gunkel, therefore, thinks (*Schöpf.* 266) that 'Harmagedon' must be a name of mythic origin, connected in some way with the fortunes of the dragon who is the lineal heir of the Babylonian dragon Tiāmat, the personification of chaos and all evil (cp CREATION, § 1). On p. 389 of the same work Zimmern communicates a conjecture of Jensen that *μαγεδων* is identical with *μιγαδων* in the divine name Ὑεσεμιγαδων, the husband of Ἐρεσχιγαλ (=Bab. Ereškigal), the Babylonian goddess of the underworld. See *Rhein. Mus.* 4949, where in a magic formula given by Kuhnert from Greek papyri we read, *θεοῖς χθονίοις Ὑεσεμιγαδων καὶ κούρῃ Περσεφόνῃ Ἐρεσχιγαλ κ.τ.λ.* (*see* also HADAD-RIMMON). The same two (doubtless Babylonian) names occur on a leacl tablet from Alexandria, *Rhein. Mus.* 18 563, where the former is given as Ὑεσεμμιγαδων. It would be natural that the spot where Tiāmat was defeated (and was again to be defeated) by Marduk should be called by a name which included that of a god of the underworld. T. K. C.

ARMENIA (אֲרָרָט), *a* K. 19 37 Is. 37 38† AV, **RV** ARARAT.

ARMLET (כּוּמָז, ϵΜΠλΟΚΙΟΝ [BAFL]), so RV for AV TABLET in Ex. 35 22 (ΠϵΡΙΔϵΖΙΟΝ ? [BAFL]), Nu. 31 50. It may be doubted, however,'whether the word does not mean an ornament for the neck (so RVmg. NECKLACE)—perhaps a necklace consisting of a number of little spheres, cp Ar. *kumzat*[un], a little ball. *See* ORNAMENTS.

ARMONI (אַרְמֹנִי, 'Palatinus'? ϵΡΜωΝΟϵΙ [B], -ΝΙϵΙ [A], ΑΧΙ [L]), a son of Saul sacrificed by David to the vengeance of the Gibeonites (*a*S. 21 8†). See RIZPAH. Neither he nor Mephibosheth [1], the two sons of Rizpah, is mentioned elsewhere.

ARMOUR, ARMS (כֵּלִים), 1 S. 17 54. *See* BREASTPLATE, 1, HELMET, GREAVES, SHIELD; and cp WAR, and WEAPONS.

ARMOUR-BEARER (נֹשֵׂא כֵלִים, which happens to occur only with a suffix, נ' כליו, Judg. 9 54, etc., or in the constr. st., נֹשֵׂא כְלֵי יוֹאָב, 2 S. 23 37 1 Ch. 11 39). Abimelech, Sail, Joab, all had armour-bearers; Goliath's squire is called a shield-bearer (1 S. 17 7). On the age of armour-bearers, cp WRS, *OTJC*(2) 431; Che. *Aids to Crit.* 77 n. Is. 52 11, נֹשְׂאֵי כְּלֵי יהוה (EV 'Ye that bear the vessels of the Lord') is taken by most commentators (Aben Ezra, Kimchi, Cheyne formerly) to mean 'armour-bearers of Yahwè'; but this is improbable (*see* Di. *ad loc.*).

ARMOURY. In Neh. 3 19 הַנֶּשֶׁק, 'weapons, arming,' (𝔊, ἡ συνάπτουσα), and in Jer. 50 25 אוֹצָר, 'treasure, store,' are probably contractions for בֵּית הנשק, 'house of weapons,' and בֵּית האוצר, 'house of treasure' respectively. In Cant. 4 4 'thy neck is like the tower of David builded for an armoury' לְתַלְפִּיּוֹת is difficult. Vg. renders it *cum propugnaculis*, while 𝔊 merely transliterates (θαλπιώθ [BK]. -λφι. [A]), and *OS*(2) 202, 84 has θαλπιωθ—ἐπάλξη ἢ ὑψηλά. The meaning 'armoury' has no philological basis (see Del. *ad loc.*), and yet it is the only meaning which suits the context. Cheyne (*Exp. Times*, June '98) supposes corruption of the text and reads לִשְׁלָטִים 'for the shields.' The neck of the Shulamite is compared to the tower of David adorned with small metal plates—*i.e.*, perhaps to the 'house of the forest of Lebanon' in which were suspended the shields and targets of gold. Fancifully the poet represents these shields as suspended on the outside (cp Ezek. 27 11). Budde and Siegfried agree in placing the 'tower' at Jerusalem.

ARMY (צָבָא, חַיִל, מַעֲרָכָה). The main army of Israel, like that of all primitive nations, and, in the last resort, of all nations, consisted of the whole able-bodied adult male population.

1. General levy. In Nu. 1 1-3 (P), twenty is fixed as the age at which a man became a soldier; but it is not probable that any such regulation was rigidly observed in practice. This general levy constituted the fighting force of Israel in the wilderness, at the time of the settlement and under the 'Judges,' and remained its chief military resonrce throughout its national history. Under the 'Judges,' the armies mentioned are, for the most part, the levy of the tribes or clans immediately concerned. On special occasions, however, such as the war against Sisera, and Saul's relief of Jabesh-gilead, all the fighting men of Israel were summoned, and their obedience to the summons was represented as a paramount religious duty.

The armies obtained from such levies varied greatly in number and efficiency; a clan, or even a tribe, whose immediate interests were threatened, would readily take the field in its full strength. An appeal for a general levy of Israel would scarcely ever be more than partially responded to; Deborah (Judg. 5) complains of the absence of Reuben, Gilead, Dan, and Asher; the national leaders sought to prevent such derelictions from duty by the most solemn appeals to religious sanctions—Deborah curses Meroz (Judg. 5 23), and Saul, when a spirit (or impulse) from God came upon him, threatened to cut in pieces the oxen of all recreants (1 S. 11 6).

When armies were required these national or tribal levies were called together by messenger (בְּיַד הַמַּלְאָכִים 1 S. 11 7), sound of trumpet (שׁוֹפָר Judg. 6 34), or erection of standard, or other signal (נֵס Jer. 4 6, see ENSIGN); when the emergency was over they dispersed to their homes. They were well suited to carry on or repel border forays, but could not maintain prolonged warfare, especially at any distance from their own territory, or even oppose adequate resistance to any formidable invasion. These levies were composed entirely of infantry (רַגְלִי 1 S. 4 10 15 4); the Israelite territory, in early times, was chiefly hill-country, where cavalry force could neither be formed nor used. The first Israelite who is mentioned as possessing horses is Absalom, *a*S. 15 1 (cp HORSE, § 3).

Such armies were very loosely organised. As Wellhausen (*HI* 436 ['85]) points out, 'what there was of

2. Command. permanent official authority lay in the hands of the elders and heads of houses; in time of war they commanded each his own household force.' So Abraham leads the expedition to rescue Lot (Gen. 14), and Jair conquers the 'tent villages of Jair' (Nu. 32 41). Similarly, P describes the 'princes' of the tribes as also their captains in war (Nu. 1 *f.*). Deborah (Judg. 5 14 *f.*) speaks of the princes and leaders of Issachar and other tribes (see GOVERNMENT, § 21). In practice, however, the hereditary heads of tribes and clans were often set aside on account of the ability and self-assertion of other leaders. Indeed, these hereditary heads of houses play a very small part in the actual history, possibly because history emphasises what is exceptional. The 'judges,' whose main function was to head the Israelite armies in special emergencies, were men called by a kind of divine inspiration. Gideon and Saul are not the heads of their tribes or even clans :

Gideon's family was 'poor in Manasseh and he was the least in his father's house' (Judg. 615), and Saul's family is described in almost identical terms (1 S. 921). In the absence of any other widely recognised authority, the priests of the great sanctuaries, 'and especially of the ark, sometimes assumed the command of armies, when called by ambition or the sense of duty (DEBORAH [*q.v.*], the house of ELI [*q.v.*], SAMUEL [*q.v.*]). When the tribes were partly merged in the kingdoms, and tlie clans and families were in a measure superseded by the towns and village communities, the levy would naturally follow the new order (Amos 53). Probably under the kings the levies did not always assemble by clans, but men were collected by the royal officials from the various districts (cp GOVERNMENT, § 20). In any case, the organisation of the levies was subordinated to that of the standing army, and they were divided into 'thousands,' 'hundreds,' 'fifties,' and 'tens,' institutions which are said by an ancient tradition, Ex. 1825 (JE), to have originated with Moses.

A second important element of the military strength of Israel, as of all nations at a similar stage of development, lay in the personal following of men who made war their occupation.

3. Bands. These 'bands' (גְּדוּד, also used of a division of an army) may be roughly 'likened to the vassals of feudal chiefs, the 'free companies' of the middle ages, and even to the banditti in unsettled districts. As in the case of England and Scotland, the 'bands' flourished specially on the frontiers; the territory of lsrael had a frontier very long in proportion to its area. Such 'bands' could take the field mnch sooner than a clan-levy, and would be better disciplined and much more expert in warfare. More than once they rendered signal service to the nation. The 'vain fellows' whom that captain of banditti, Jephthah, gathered round him (אֲנָשִׁים רֵיקִים, Judg. 113) were the kernel of the army which defeated Ammon, and David's following was one chief instrument in the restoration of Israel after Gilboa. 1 S. 22-30 gives us a detailed account of the formation, character, and career of such a body (see DAVID, § 4). It was a self-constituted frontier-guard, living on the plunder of the neighbouring tribes and by levying blackmail on their fellow-countrymen, whom they claimed to protect. The warlike services rendered by the 'bands' were accompanied by serious drawbacks. They added to the danger of civil war; they embittered the relations with neighbouring tribes; and they were capable, like David, of taking service with foreigners even against their own countrymen. We do not hear of them after David's time; they would scarcely be tolerated by powerful kings, hut were sure to reappear in unsettled times.

As the main function of a king was that of permanent commander-in-chief, a monarchy implied some sort of standing army and permanent military organisation.

4. Army. In time of peace the king kept a bodyguard as the main support of his authority, and this bodyguard formed the nucleus of the army in war (cp GOVERNMENT, § 18). We find Saul 'choosing' 3000 men (1 S. 132) and sending the rest of the people to their tents. He did not keep these chosen men as a permanent army, for in 1 S. 242 he chooses another 3000 when he wishes to pursue David. Probably he did his best throughout his reign to keep by him a picked force, which was virtually a standing army. He had a permanent commander-in-chief, Abner (שַׂר־צְבָאוֹ, 1 S. 1450), and his personal following must have included other permanent military officers (cp GOVERNMENT, § 21). David's band of followers during his exile served as the kernel of a much more complete and extensive military organisation. The office of commander-in-chief remained a permanent institution, and the captains of the host (שָׂרֵי הַחַיִל 2 S. 244) also appear as permanent officers. A bodyguard, practically a continuation of David's companions in exile, was formed, and its captain is mentioned as one of the great officers of state (2 S. 818 2023 2323, מִן־הַשְּׁלֹשִׁים נִכְבָּד וְאֶל־הַשְּׁלֹשָׁה לֹא־בָא). Now, however, the bodyguard had come to consist of foreign mercenaries, 'Cherethites and Pelethites,' probably Philistines (see CHERETHITES, CAPHTOR). In 2 S. 1518 we find 600 Philistines from Gath in David's army; 𝔊's *μαχηταί*, however (in a doublet), suggests a reading *gibbōrīm*, or 'mighty men,' for *gittīm*, or 'Gittites.' If the latter is the correct reading, the Gittites may have been either part of the bodyguard, or else an independent band of mercenaries (see DAVID, § 11(*a*)). The Cherethites and Peletliites are not mentioned after the death of David; but the bodyguard of foreign mercenaries must have remained a permanent institution. 1 K. 1427 speaks of the captains of the guard, literally 'runners' (שָׂרֵי הָרָצִים), that kept the palace gates (cp 2 K. 1025). 2 K. 114 speaks of 'the centurions of the Carites and of the guards' (שָׂרֵי הַמֵּאוֹת לַכָּרִי וְלָרָצִים), where the Carites are possibly identical with the Cherethites. If the reading in 2 S. 238 is correct, and if שָׁלִשִׁי in רֹאשׁ הַשָּׁלִשִׁי (AV 'chief among the captains'; RV 'chief of the captains') is rightly explained as referring to the third occupant of a chariot (*τριστάτης* [BAL], Ex. 147 154, etc.), it may indicate the use of chariots by David, though it is probably used in its later sense of 'captain' (see CHARIOT, § 10).

With the very doubtful exception of these 'shalishim,' we have no reference to Israelite chariots and cavalry before the end of David's reign.

According to EV of 2 S. 84, he reserved horses for a hundred chariots out of the spoil taken from Hadad'ezer ben Rehob, king of Zobah; 𝔊BAL translates 'reserved for himself a hundred chariots.' Reuss and Kautzsch translate 'a hundred chariot horses. No reference is made to the use of these chnriots or horses in war; moreover, the passage probably belongs to the last editor of Samuel.

Solomon, however, established a force of 1400 chariots and 12,000 horsemen (1 K. 1026), and accordingly we find mentioned among his officers 'captains of his chariots and of his horsemen' (שָׂרֵי רִכְבּוֹ וּפָרָשָׁיו, 1 K. 922). Occasional references occur in the later history to Israelite chariots and horsemen (2 K. 821 137). Probably the armies of Israel and Judah were modelled on the army of Solomon till the end of these monarchies; but their main reliance would be on the infantry. Towards the close of the Jewish monarchy a quasi-religious feeling against the use of chariots and cavalry seems to have arisen, and Dt. 1716 forbids the king to multiply horses (cp. Dt. 201 Is. 311). The references to the houghing of horses by Joshua (Josh. 1169) and David (2 S. 84) are probably due to a Deuteronomic redactor.

Nothing is said about paying soldiers. In earlier times the Israelites who formed the national levy would find their own weapons and provisions, the latter being often obtained

5. Maintenance. from the enemy by plunder or from friends by gift or exaction. Probably throughout the history the general levy was mostly provided for in this way; though, as the royal government became more powerful and more completely organised, it may have done something towards feeding and arming these levies (see GOVERNMENT, § 20).

The bodyguard and the rest of the standing army, including the charioteers and cavalry, stood on a different footing. They were maintained by the government (1 K. 427), chariot cities being assigned as a provision for the chariots and cavalry. They were probably paid; certainly the foreigners in the bodyguard did not serve for nothing. The plunder taken from enemies would be an important part of the remuneration of the soldiers, and a principle of division between the actual combatants and the reserve is laid down in 1 S. 3024. The rules as to exemption from military service in

Dt. **20** are probably an ideal based on traditional public opinion.

No reliance can be placed on the numbers which are given for Israelite armies. At the same time, the two kingdoms seem to have been populous in prosperous times, and a general levy of able-bodied adults may sometimes have attained very large dimensions.

Under powerful kings the Israelite armies were strengthened by rhe auxiliary forces of subject allies —*e.g.*, Edom (2 K. 3). Doubtless such assistance was sometimes purchased, after the manner of the narrative in 2 Ch. 25.

6. Levitical guard. The details as to the Levites **in** the account of the deposition of Athaliah in 2 Ch. **23** (cp 2 K. 11) were probably suggested by the institutions of the Chronicler's own time (*circa* **300** B. C.). These details seem to show that the Levitical guard of the Temple was then in existence. As this guard is not provided for in the Priestly Code, it was probably formed after the time of Ezra. Possibly the προστάτης τοῦ ἱεροῦ [VA] in 2 Macc. 3 4 may have been the captain of this guard. If so, however, it is difficult to suppose that the present text is correct in ascribing him to the tribe of Benjamin (see, however, BENJAMIN, § 7 end). The captain of this guard, under the title of στρατηγός, is mentioned by Josephus in his account of the time of Claudius Cæsar (*Ant.* xx. 6 2), and of the destruction of the Temple (*BJ* vi. 5 3). and in Lk. 22 4 52 and Acts 4 1 5 24 26. Probably the officers, ὑπηρέται, who assisted in the arrest of Jesus (Jn. 18 3, cp 7 32 45) belonged to this body.

7. Post-exilic. In the post-exilic period. under the suzerainty of the Persians, and of the Greek kings of Egypt and Syria, the Jews could scarcely be said to have an army. The Book of Nehemiah clearly shows that they had to trust to their own energy and courage for protection against hostile neighbours ; but they fought as a city militia rather than as a peasant levy.

The revolt of the Maccabees made Judæa a military power. The long wars not only habituated the bulk of the people to arms, but also produced a standing army, which soon included many foreign mercenaries. Jewish soldiers also received pay (1 Macc. 14 32), probably, however, only picked bands that formed the standing army and ranked with the other mercenaries. Josephus (*BJ* i. 2 5) tells us that Hyrcanus I. (135-107 B.C.) was the first Jew who maintained foreign mercenaries (ξενοτροφεῖν). Alexander Jannæus (106-79 B. C.) employed Pisidian and Cilician mercenaries, and at one time was at the head of a mercenary army of 1000 horse and 8000 foot, in addition to 10,000 Jews. These mercenaries are styled 'Greeks' (*BJ* i. 4 3 5, cp 5 4). As the Jews had long been subjects of the Greek kings of Egypt and Syria, their armies would be equipped and disciplined after the Greek fashion.

8. Roman Period. When the East fell under the supremacy of Rome, the Herods, as clients of Rome, formed their armies on the Roman model. Indeed, Herod the Great was at times in command of Roman forces, and Jewish and mercenary 'cohorts' (σπεῖραι) are spoken of as fighting side by side with the Romans (*BJ* i. 15 6 16 2). Herods army consisted largely of mercenaries drawn chiefly from the Teutonic subjects and neighbonrs of the empire—Thracians, Germans, and Gauls (*BJ* i. 33 9).

The insurgent armies in the Jewish war were very heterogeneous. The national government appointed military commanders for the various districts, among whom was Josephus. He tells us that he organised an army of 100,000 on the Roman model, including 4500 mercenaries, a bodyguard of 600, bnt only 250 horsemen : a typical Hebrew army in its constitution. The garrison of Jerusalem is said to have consisted of 23,400 men, including Idumæans and bands of Zealots. They seem to have possessed some organisation and discipline, but were divided into adverse factions (*BJ* v. 6 1).

9. Foreign armies. The armies of the other states of Syria did not differ essentially from those of Israel. From the first, however, they made use of chariots and cavalry, and throughout the history, except during the reign of Solomon, the Syrians were superior to the Israelites in these arms (Josh. 11 4 17 16 Judg. 1 19 4 7 1 S. 13 5 2 S. 8 4 1 K. 20 1 25 22 31, etc.). On the other hand, the great military empires of Egypt, Assyria, and Babylon possessed a much more extensive and effective military organisation. They had corps of chariots, light-armed and heavy-armed cavalry and infantry, together with archers and slingers and engineers. Their armies inclnded large forces of mercenaries and tributaries. For military purposes these great empires stood to the Syrian kingdoms in about the same relation as that of a first-class European power to the smaller Asiatic states.

It is not necessary to notice the Persian army, and of the armies of the Ptolemies and Seleucides we need say only that they were modelled on the Macedonian armies of Philip and Alexander, with some modifications due to Oriental influences. For example, they employed elephants (1 Macc. 1 17, etc.).

10. Roman army. The Roman army is incidentally alluded to in the NT. The legion (Mt. 26 53 Mk. 5 9 15 Lu. 8 30) varied considerably at different times in numbers and in constitution; during the early empire it was a composite force, consisting of about 6000 legionary infantry, together with cavalry, light-armed auxiliaries, and military engines. The legionary infantry, or legion proper, were divided into ten cohorts. The 'band' (σπεῖρα) which took Jesus (Mt. 27 27 Mk. 15 16 Jn. 18 3 12) was probably a cohort (so RV^mg.) forming the Roman garrison in Jerusalem. The same cohort is mentioned in Acts 21 31. In Acts 10 1 we read of the Italian band, and in 27 1 of the Augustan 'band.' The Italian 'band' may have been an independent cohort of Italian volunteers (Schur. *GJV* 1 386). The 'Augustan band' (σπείρης Σεβαστῆς) may have been part of the Sebastene—*i.e.*, Samaritan—auxiliaries, who, according to Josephus (*Ant.* xx. 8 7), farmed a large part of the Roman garrison of Palestine. The name might be, and doubtless was, understood as 'Augustan' as well as 'Sebastene' (the title 'Augustan' was borne by some of the Roman legions). See further, CORNELIUS, § 1. The officers of the legion were the tribunes and centurions. Six tribunes were attached to a legion and were associated in command. We frequently find a tribune holding independent command of a cohort or larger force : the 'chief captain' (Jn. 18 12 Acts **21-25**), χιλίαρχος, commanding the cohort at Jerusalem was a tribune. Each cohort contained ten centuries or bodies nominally consisting of a hundred men ; these were commanded by centurions. As the independent cohorts were organised on the model of the legions, it is probable that the cohorts, tribunes, and centurions of the NT belonged to the auxiliary forces. Mommsen says of the Roman garrison in Palestine that it consisted, as elsewhere in provinces of the second rank, of a moderate number of cavalry and infantry divisions, in this case of Samaritans and Syrian Greeks—subsequently one ala and five cohorts or about **3000** men. The province, therefore, did not receive a legionary garrison. A small force under a Roman commandant occupied the citadel at Jerusalem. During the time of the Passover this was reinforced by stationing a stronger division of Roman soldiers in one of the temple buildings (*Prov.* **Rom.** *Emp.*, ET, 2 186).

W. H. B.

ARNA (*ARNA*) b. Ozias, in the genealogy of Ezra (4 Esd. 1 2), apparently = ZERAHIAH in ‖ Ezra 7 4.

ARNAN (אַרְנָן ; ορνα [BA], αρνων [L]). According to MT of 1 Ch. 3 21, the 'sons of Arnan' occur in the

genealogy of Zerubbabel. 𝔊, Vg. and Syr., however, make Arnan the son of Rephaiah. The name might mean 'noisy'; but ארנן elsewhere, as a personal name, being corrupt (see ARAUNAH), and the names of the other descendants of Hananiah (see RV) being compounded with -iah, it seems plausible to correct to ארניה (Adonijah), which may have been abbreviated ארני (whence, by corruption, ארנן or ארנן). T. K. C.

'ARNI (ἀρνει [Ti. WH after ℵBLXΓ]), Lk. 3 33 RV, is the reading to be preferred to AV ARAM. See RAM, 1.

ARNON (אַרְנוֹן), Nu. 21 13; see MOAB.

AROD (אֲרוֹד, ἀροδει [B*], ἀροαδ[ε]ι [B^{ab}AF], ἀορὰδ [L]), Nu. 26 17 = Gen. 46 16, Arodi (אֲרוֹדִי, ἀροηδις [A], ἀγαρις [D], ορροδεις [L]), for which gentilic form EV in Nu. *l.c.* has Arodite. A name in genealogy of GAD (*q.v.*). Cp ARELI.

AROER (עֲרֹעֵר, עֲרוֹעֵר; in Judg. 11 26 עַרְעוֹר; *i.e.*, 'bushes of dwarf juniper'[1] [Lag. *Semit.* 1 30]; ἀροηρ [BAL]; gentilic Aroerite, עֲרֹעֵרִי, see HOTHAM, 2).

1. A city 'on the edge of the torrent-valley of Arnon,' see MOAB. (Dt. 2 36 etc.; cp *OS*(2) 212 31 86 28, ἐπ' ὀφρύος τοῦ ὄρους, *in vertice montis*); the descriptions agree with the position of the ruins of *ʿArāʿir*, on the edge of the precipitous N. bank of the ravine of the Arnon (Burckhardt, *Syria*, 372; Tristram, *Moab*, 129-131). The spot is about 11 m. from the mouth of that river. Aroer marked the S. limit of the Reubenite territory and of the Israelitish possessions eastward of the Jordan, Nu. 32 34 Dt. 2 36 3 12 4 48 Josh. 12 2 (αρνων [B]) 13 9 16 2 S. 24 5 (αροηλ [B]) 2 K. 10 33; cp Judg. 11 26 (ιαζηρ [A], om. L); 1 Ch. 5 8. In Jer. 48 19 (post-exilic) and in the inscription of Mesha (l. 26, ערער) it appears as Moabitish. The Moabites had in fact possessed it before the Israelites, in succession to the Amorites (cp Nu. 21 26). That Aroer on the Arnon is meant in 2 S. 24 5 is now generally admitted (see Dr. *TBS* 285 *f.*). The expression 'the cities of Aroer' in Is. 17 2 is geographically difficult; there is no doubt a corruption of the text (see 𝔊 and cp *SBOT*).

2. A place E. of Rabbath-Ammon, Josh. 13 25 (αραβα [B], -ρωηρ [A]) Jud. 11 33†; not identified. Jer. (*OS*(2) 96 5) says it was on a mountain 20 R. m. N. from Jerusalem.

3. A place in the far south of Judah, 1 S. 30 28 (mentioned after Jattir), and probably Josh. 15 22 (mentioned after Dimonah). Identified by Rob. with the ruins of *ʿArʿāra*, 3 hrs. ESE. from Beersheba. (The ραγουηλ of 𝔊^L in 1 S. is perhaps from αρουηλ: see ADADAH.) T. K. C.

AROM (ἀρομ [BA]), 1 Esd. 5 16. See HASHUM.

ARPACHSHAD (אַרְפַּכְשַׁד), Gen. 10 22 RV; see below, ARPHAXAD, 1.

ARPAD, AV twice (in Is.) Arphad (אַרְפָּד, ἀρφαδ [BAL], *ARPHAD*, Ass. *Arpaddu*), 2 K. 18 34 (αρφαλ [B], -φατ [A], 19 13 (-φαθ [B]), Is. 10 9 (not in 𝔊), 36 19 and 37 13 (-φαθ [BℵAD (Q)]), Jer. 49 23 (-φαθ [A], αφαδ [ℵ*]). Of these passages Is. 10 9 is the most important, because we can unhesitatingly fix its date and authorship. Isaiah, writing in 711 B.C., makes the Assyrian king refer to the recent capture of Hamath and Arpad (reckoned by the Assyrians to Hatti-land) as a warning to Jerusalem. Arpad had been frequently captured by the early Assyrian kings, but was finally subjugated and Assyrianised by Tiglath-pileser III. in 740. From this time it takes its place among the Eponym cities. Its importance probably lay in its command of a Euphrates ford, though it was not on that river. We find that a city Nibiru ('the ford') was reckoned to belong to the governor of Arpad. Arpad is now *Tell-Erfād*, 13 m. from Aleppo to NW. C. H. W. J.

[1] 'Aroer' is an Arabising 'broken plural' of *ʿarʿār*, 'dwarf juniper,' a plant which abounds in rocky localities (see HEATH).

ARPHAXAD, RV better Arpachshad (אַרְפַּכְשַׁד; ἀρφαξαδ [BAL]; -ξης [Jos.]), the third 'son' of Shem, Gen. 10 22 24; cp Gen. 11 10-13 (all P), 1 Ch. 1 17 *f.* (𝔊^B omits these two) 24. The name has been much discussed.

Bochart and many after him (*e.g.* Franz Del., Kautzsch in *HWB*, and Nöld. *ZDMG* 36, 182 ['82], *Neusyr. Gr.* 20) identify it with the Arrapachitis of Ptol. (vi. 1 2), a region on the Upper Zab, NE. from Nineveh. On this theory, however, *-shad* (שד) remains unaccounted for, as we can hardly, with Lag. (*Symm.* 1 54), have recourse to the Armenian *šat*. Jos., on the other hand, long ago identified Arphaxad with the Chaldæans (*Ant.* i. 6 4), and Ges., Ew., Schr. (*COT* 1 97), Sayce (*Crit. Mon.* 147), adopting this view, regard the ארפכשד as compounded of an assumed noun ארף, 'boundary' (Ar. *'urfat*), and כֶּשֶׂד = כַּשְׂדִּים, 'Chaldaea.'

Two things at least are certain; we cannot dispense with Babylonia in this context, and in Gen. 11 10 *ff.* Arpachshad is represented as the source of the Terahite family to which Abraham belonged. The latter part of the name ארפכשד must, therefore, be כשד—*i.e.*, Chaldaea. It is equally clear, however, that the Assyrian province of Arbaḫa (which may, or may not, be the Arrapachitis of Ptol.) would be very appropriately introduced after Asshur, and that, apart from the last syllable (-shad), Arpachshad has received from the earlier critics no explanation that is even plausible, except that of Bochart and Noldeke.

Putting these facts together, the present writer suggested (*Expos.* Feb. 1897, pp. 145 *ff.*) the following theory. Arpachshad, or at least ארפכשד, is really not one word but two words—Arpach (אַרְפַּךְ) and Chesed (כֶּשֶׂד). The former is the Heb. name of the Assyrian province of Arbaḫa or (*KB* 2 88 *f.*) Arabḫa, which, according to Winckler, is not Arrapachitis, but a district N. of the Tigris, S. of the Median Mountains, and W. of Elam.[1] The latter is Chaldaea (see CHESED). Gen. 10 22, therefore, upon this theory, originally ran, 'The sons of Shem; Elam and Asshur and Arpach—Chesed and Lud and Aram.' Verse 24, as E. Meyer and Dillmann agree, is an editorial interpolation (cp 11 10 *ff.*). The form Arpachshad in 11 10 *ff.* will be due to the editor. who misunderstood וארפככשד in 10 22, and it will not be too bold to restore כשד—*i.e.*, Chesed. The alternative[2] is to suppose the original reading to have been ארפח כשד—*i.e.*, Arpaḫ Chesed, which the scribe, through an error of the ear, changed into Arpach Chesed (ארפכ כשד).

Hommel, however (*Acad.* 17th Oct. 1896; *AHT* 212, 294-298), prefers to explain the word as Ur-pa-keshad, an 'Egyptian variant' for the Heb. Ur-kasdim, *pa* being taken as the Egyptian article; he compares the old (?) Egyptian-Hebrew name Putiel, and the Semitic-Egyptian *pa-ba'-ra = ha-baal* (WMM, *As. u. Eur.* 309). If only we had sure evidence that there was an Egyptian' mania in early Palestine similar to the Semitic mania of the Egyptians of the Middle Empire, and could also think that P had access to records of extreme antiquity, fairly accurately preserved, this explanation would at once become plausible. A comprehensive study of the names in P, however, does not compel us, indeed it scarcely permits us, to make the second of these assumptions. PUTIEL (*q.v.*) is distinctly an artificial name, and if Arpachshad should really be read Ur-pa-keshad we should on this analogy be inclined to regard it as artificial too. In itself a reference to Ur-kasdim would no doubt be admissible, since this place or district is referred to by P (11 31) as well as by J2. It is chiefly the presence of פ (p) in ארפכשד that

[1] Prof. Jensen informs the writer that he has independently formed the same opinion as to the origin of Arpachshad, but that he prefers to identify Arpach with Arrapachitis = mod. Albak. This view has occurred to the writer also.

[2] The transition from ḫ (in Arbaḫa) to כ in ארפך has not then to be accounted for. On the former theory, the Priestly Writer, who was not indebted either to a cuneiform record or to a Babylonian informant, received the name in a slightly incorrect form, the final ḫ having been softened in pronunciation to *ch*.

prevents us from reading Ur-Casdim (written אר כשר) in Gen. 10 22 between Asshur and Lud.

2. The name given in Judith i. to the king of Media who was formerly identified with Deioces the founder of Echatana, or with Phraortes his son. The name, however, has been borrowed to give an air of antiquity to the narrative, and, as in the cases of HOLOFERNES, and others in this book, stands for some more modern personage, probably Mithridates. See JUDITH, ii.

T. K. C.

ARROW, see WEAPONS, DIVINATION, § 2 (1).

ARROWSNAKE in Gen. 49 17 AVmg. = שְׁפִיפֹן, 'cerastes,' ἐγκαθήμενος [𝔊BADFL] (see SERPENT, § 1, no. 10), and in Is. 34 15 RV = קִפּוֹז (ἐχῖνος [𝔊BℵAQΓ]), AV GREAT OWL (*q.v.*, 2); see SERPENT, § 1, no. 8.

ARSACES (ἀρσάκης [AK, -σικ. (ℵ once) V]), 'king of Persia and Media,' by whom Demetrius Nicātor (DEMETRIUS [2]) was defeated and made a prisoner (1 Macc. 14 2 *f.* 15 22). See PERSIA.

ARSARETH, RV ARZARETH (so Lat. *arzareth*, also *arzaren*, *arzar*; AVmg. ARARATH)—*i.e.* אֶרֶץ אַחֶרֶת (Cp Dt. 29 27 [28] Jer. 22 26)—'the other land,'[1] the region, a journey of one year and a half beyond the Euphrates, where the exiled tribes were supposed to be settled (4 Esd. 13 45; cp *v.* 40). This belief in the 'Lost Tribes' is found already in Jos. (*Ant.* xi. 5 2).

ARSIPHURITH (ἀρσ[ε]ιφουρειθ [BA]), 1 Esd. 5 16, RV; see JORAH.

ARTAXERXES (אַרְתַּחְשַׁשְׁתָּא, Ezra 4 7*a*, or אַרְתַּחְשַׁשְׂתָּא, Ezra 4 7*b*, or אַרְתַּחְשַׁשְׂתָּא, Ezra 4 8 7 1 7 11 8 1 Neh. 2 1 5 14 13 6, Baer's text; ἀσαρθαθα [B]; ἀρθασασθα [A]; ἀρσαρσαθα [ℵ*cb (*ubique*)]; ἀρταξέρξης [ℵc.aL]; *Artaxerxes*). The following variants occur:—

Ezra 4 7*ab* 8 (ἀρσαρθα [B], αρτασασθα [A]), 11 (ἀρσαρθα [B], αρ | θα [A]), 6 14 (ἀσταρθα [B]), 7 1 (ἀρθασεσθα [B]), 7 11 (ἀσσαρθαθα [B]), 12 (ἀσαρθαθα [BA]), 21 (ἀρσαρθαθα [B]), 8 1 (ἀρθασθα [B]), Neh. 2 1 (ἀρσαθερθα [B], ἀρσαρσαθα [ℵ*cb], ἀρταξέρξης [ℵc.a]), 5 14 (ἀρσεναθα [B], σαρσαθα [ℵ], ἀρθασασθαι [A]), 13 6 (ἀρσοσαθα [Bℵ]).

Artaxerxes is the name given to the king of Persia, who, we are told (Neh. 2 1 5 14 13 6), gave permission to Nehemiah his cupbearer to rebuild the walls of Jerusalem, and to this end made him governor (*peḥa*; cp Assyr. *bel-paḥāti*, town governor, and piḫātu, province, satrapy). The same name is borne by the king who permitted Ezra and his band to return to Palestine, and, along with his ministers and princes, lavished tokens of favour on the returning exiles (Ezra 7 *f.*). The statement in Ezra 4 7-23 that earlier efforts of the Jews to rebuild the walls of Jerusalem ceased at this king's command is unhistorical (see EZRA, ii. § 10), and the account in Ezra 7 11-26 of the favour shown by him to the temple and its ministers is probably exaggerated (see EZRA, i. § 2). It is certainly incorrect to name him along with Cyrus and Darius as having promoted the building of the temple (Ezra 6 14), for this had already been completed in the reign of Darius.

The name, which is certainly identical with the Persian *Artakhshatra* ('the true, or legitimate, kingdom,' an expression taken from the teaching of the Avesta; Assyr. *Artakšatsu*, Susian *Irtakshazsa*,—forms more closely approximating the Hebrew), was pronounced by the Greeks Artaxerxes (so in 1 Esd. B; but Ἀρταρξέρξης AaBAB sometimes). The king intended is beyond doubt one or another of the three Persian rulers who bore that name. The attempts to identify him with Cambyses, or with Pseudo-Smerdis, or with Xerxes, on the false assumption that Artakhshatra was not a name but a title, were abandoned long ago. The only question is, Which of the three?

The third in the list, Artaxerxes Ochns, is excluded, both by chronology and by the known character of that energetic despot and zealot for the Mazdean creed, which alike prohibit the supposition that he can have been the benevolent patron of Nehemiah and Ezra. Which of the remaining two is meant is still disputed among scholars.

As in Ezra 4 6 *f.* the name follows immediately on that of Ahasuerus, and no more precise designation is added, it is natural enough to think of Artaxerxes I. If, however, as seems probable (see EZRA ii. § 10), Ezra did not come to Palestine till after Nehemiah: and if it be true, as we read in Ezra 7 7, that the date of Ezra's arrival was in the seventh year of Artaxerxes, while the established date of Nehemiah's arrival is the twentieth year of Artaxerxes, then Ezra's expedition must have been under Artaxerxes Mnemon, and so more than half a century after Nehemiah's mission. This, however, is not at all probable, and it seems preferable to assume that the date assigned to Ezra's arrival (in the seventh year of Artaxerxes) is an invention that had been suggested by the transposition of the two expeditions.

We have thus good reason for assuming, with Kuenen, Ryssel, Ryle, and others, that by Artaxerxes we ought throughout to understand Artaxerxes I., Longimanus, a surname which is doubtless to be taken in the same sense as the expression in the inscription of Darius (Naḳš i Rustem, inscr. *a*, § 4, *l.* 43 *f.*) to the effect that the spear of the Persian reaches far. He is described as having been a good-hearted but weak sovereign, ruled by his wives and favourites,—an account which harmonises with what we learn from Nehemiah.

C. P. T.—W. H. K.

ARTEMAS (ἀρτεμᾶς [Ti. WH]), most probably a contraction from ἀρτεμίδωρος; see Varro, *De Ling. Lat.* 89 (§ 21), and cp APOLLOS, § 1 n.), a companion or messenger of Paul, mentioned once in the Pastoral Epistles (Tit. 3 12: 'When I shall send Artemas unto thee . . . give diligence to come unto me').

In the lists of the 'seventy disciples' which we owe to Pseudo-Dorotheus and Pseudo-Hippolytus he appears as bishop of Lystra.

ARTEMIS (ἀρτεμις [Ti. WH]), Acts 19 24 27 *f.* 34 *f.* RVmg.; EV DIANA.

ARTILLERY (כְּלִי), 1 S. 20 40 AV; AVmg. 'instruments,' RV WEAPONS (*q.v.*).

ARTS and MANUFACTURES. See TRADE AND COMMERCE, and HANDICRAFTS.

ARUBOTH (אֲרֻבּוֹת—*i.e.* as in RV **Arubboth**; ἐν ἀραβωθ [A], . . . βηρ βηθ . . . [L]; . . . θ, βηρ . . . [B]), 1 K. 4 10†, the seat of the third of Solomon's twelve prefects (see BEN-HESED). The third is one of the districts omitted by Jos. (*Ant.* viii. 2 3, ed Niese). See BEN-HESED. Cp Schick, 'Wādy 'Arrūb, the Aruboth of Scripture,' *PEF Qu. St.* Oct. 1898, pp. 238 *ff.*

ARUMAH (בָּארוּמָה, Kr. בָּרוּמָה, with prep. ב; ἀρημα [B], ἀριμα [AL and *OS*(2) 225, 2], *RUMA* [Vg.]), the place where Abimelech dwelt before his capture of Shechem—obviously not very far from that town (Judg. 9 41). Perhaps it is represented by the modern *el-'Ormah*, 6 m. SSE. from Shechem, where there are ruins still (Van de Velde, *Reisen*, 2 268). Otherwise the place is quite unknown.

For בְּתָרְמָה (*v.* 31; ἐν κρυφῇ [B] μετὰ δώρων [AL]), AV 'privily,' RV 'craftily,'[1] RVmg. 'in Tormah' (so Jos. Ḳimḥi, who took it to be the name of a town), it is best to read בָּארֻמָה, 'in Arumah.' Eus. wrongly identifies it with ῥουμά near Diospolis = Lydda (cp RUMAH).

ARVAD (אַרְוַד [Bä.], אַרְוַד [Gi.]), whence the gentilic **Arvadite** (אַרְוָדִי), Gen. 10 18 = 1 Ch. 1 16† (so 𝔊BAQL everywhere ἀράδιος, but Ἀρουαδει 1 Ch. 1 16 [L]; Egypt. *'Araṯut*[*u*], etc.; Assyr. usually *Arm*[*u*]*ada*; ἄραδος, for ἄρϝαδος, 1 Macc. 15 23; Targ. Jer. אַנְטְרִידְנָאֵי—*i.e.*, of Antaradus;—Jos. *Ant.* i. 6 2 ἀρουδαῖος, etc.; mod. *Ruwād*, etc.), a town referred to by Ezekiel (27 8 11) in his elegy on Tyre as one of some thirty cities and countries that had contributed to its

[1] Less probably ארץ ארת, land of Arat—*i.e.*, Ararat (Volkmar).

[1] בתרמה would mean rather 'deceitfully'; but the form is anomalous—it would be easier to read בְּעָרְמָה.

splendour and dignity—men of Arvad, he says, rowed its ships (v. 8) and manned its walls (v. 11)—and likewise mentioned (Ἄραδος, the only Syrian place named) in the list of nineteen places in 1 Macc. 15 23 (see MACCABEES, FIRST, § 9). Arvad was the most northerly of the great Phœnician cities, ancestress, with Sidon and Tyre, of Tripoli, which lies some thirty miles farther south.

Built on an island (*ša kabal tiâmti*, *KB* 1 108, *l.* 86 *f.*), about half a mile long from N. to S., and a little over a quarter of a mile broad, lying slightly less than two miles from the mainland, it dared to resist Thotmes III. when apparently most of the other Phœnician cities yielded without force (see his Annals in Brugsch, *Hist. of Egypt* (2), ET 1 376 *f.*); and Tiglath-pileser I. tells how he embarked in ships of Arvad and sailed on the Great Sea. It was still independent in the ninth century B.C., and in the time of Sargon it and Tyre and Gebal were the really important Phœnician centres. Cp also AŠUR-BANI-PAL, § 4, end.

In the days of Ezekiel it was subordinate to Tyre; but in the Persian age it regained its ancient importance, and in the time of Alexander exercised control over quite an extensive district on the mainland.

In the first half of the second millennium B.C. there must have been more equality between the Arvadites of the mainland and those on the island, if W. Max Muller is right in believing that the Egyptian name corresponds to a plural form אֲרָוְדוֹת. The ruins of the gigantic wall that once surrounded the island on three sides (see Pietschm., as below, and esp. Renan, Pl. ii. *f.*) prove that the Arvadites knew other things besides rowing. Eus. (*Chron. Armen.* ed. Aucher, 2 172 *f.*) records that Ar(a)dus was founded in 761 B.C., and Strabo (xvi. 2 13 *f.*) states, although only with a ὥς φασιν,[1] that it was founded by fugitives from Sidon. We cannot, of course, assign to the eighth century the real founding of Aradus or even—what Dillmann (on Gen. 10 18) seems to suggest—the founding of the insular town as distinguished from a settlement on the mainland (cp the later Antaradus, mod. Ṭarṭūs [see Targ. above]). The words of Ašur-naṣir-pal quoted above (cp *RP* (2) 2 172) preclude this. The Egyptian inscriptions show that in the second millennium B.C. Aradus was one of the most important Phœnician cities (see PHŒNICIA).

ARZA (אַרְצָא; ωϲα [B], αρϲα [A], αϲα [L]), King Baasha's prefect of the palace at Tirzah, and doubtless Zimri's accomplice in the assassination of the king (1 K. 16 9†), see ZIMRI. The form of the name appears to be somewhat uncertain

ARZARETH (*ARZARETH*), 4 Esd. 13 45, RV; AV ARSARETH.

ASA (אָסָא, § 51 αϲα [BAL],[2] perhaps short for אֲסָיָה—*i.e.*, 'Yahwè healeth';—cp Aram. and Ar. *'asā*, 'to heal,' Ass. *āsū*, 'a physician,' a title applied to the god Ea [Del. *Ass. HWB*]; the name may express a pious wish that Yahwè would heal—*i.e.*, restore prosperity to—his people; cp Hos. 7 1 11 3).

1. Son of Abijah and third king of Judah (first half of 9th cent. B.C.; see CHRONOLOGY, § 32). Of Asa's long reign but one event is handed down to us on the best authority (1 K. 15 16-22), and it speaks in favour of the royal annals that they have not buried such an action of the reigning king in oblivion. The subject of the narrative is nothing less than the purchase by Asa of help from the king of Damascus against Judah's northern brethren. All the silver and gold that was still to be found in the royal treasury, Asa, we are told, sent to Benhadad, king of Aram, to bribe him to transfer his covenant of friendship from Israel to Judah. Thus it was to Judah that the first Aramæan invasion of Israel was due, and we can believe the statement of the Chronicler that Asa's conduct did not pass without prophetic rebuke (2 Ch. 16 7-10; on the details no stress can be laid). The situation of Asa was, it is true, difficult. By pushing his frontier to Ramah, Baasha threatened to reduce the kingdom of Judah to vassalage, for Ramah was only 4 m. from Jerusalem. The diversion caused by the Aramæan invasion removed this danger. Asa summoned 'all Judah' to the task of pulling down the fortifications executed by Baasha at Ramah, and with the material fortified Geba and Mizpah, the one a little to the NE., the other to the SW., of Ramah. It is quite another writer who tells us that Asa 'did that which was right in the eyes of Yahwè, like David his father' (1 K. 15 11). To the Deuteronomistic compiler matters affecting the cultus were more important than was political morality; a later writer, the Chronicler, has a much more complete justification (if it were but trustworthy) for his religious eulogy of Asa. The details of 1 K. 15 12-24 are dealt with elsewhere (see BAASHA, BENHADAD, § 2 (1), etc.).

Three other points alone, in the compiler's own statements. need to be referred to. The name of Asa's mother is given (v. 10) as 'Maacah (𝔊BL ανα), and she is called the daughter of Abishalom,' whilst in *v.* 2 Maacah is the name of the mother of Abijah. Most probably 'Abishalom' in *v.* 10 is a mistake for 'Uriel' (see 2 Ch. 13 2); but it is not altogether impossible to hold with Wellhausen that Abijah and Asa were brothers (cp MAACAH, ii. 4).

The second point is that in his old age, according to the compiler, Asa had a disease in his feet (1 K. 15 23). The Chronicler accepts this (doubtless traditional) statement, but gives it a new colour, partly by changing the date of the war between Asa and Baasha (on which see CHRONICLES, § 8, and WRS, *OTJC* (2) 197), partly by the remark (cp MEDICINE) that 'he sought not to Yahwè, but to the physicians' (2 Ch. 16 12). Whether the assumption that there was a class of physicians who treated diseases from a non-religious point of view is justifiable may be questioned.

The third point is a tantalising mention (1 K. 15 23) of 'all Asa's warlike deeds (כָּל־גְּבוּרָתוֹ).' Is this, as Klostermann supposes, an allusion to the victory over that Cushite king, who, according to 2 Ch. 14 9-15, invaded Judah with a huge force, and came as far as Mareshah (see ZERAH, 5)? Or does not the compiler make the most of the achievements to which Asa, it is probable, could legitimately lay claim (cp 1 K. 15 23), not always with much benefit to his reputation?

2. Father of BERECHIAH, 2; 1 Ch. 9 16 (Οσσα [B]); omitted in ‖ Neh. 11 17. T. K. C.

ASADIAS (αϲαδιου [B] ϲαδαιου [A], *sedei*), an ancestor of Baruch (Bar. 1 1); cp. HASADIAH.

ASAEL (Tob. 1 1, αϲιηλ [BKA]; Itala, *Asihel*; Eth. *'Az'hil*; Heb. versions אשׂיל, עשׂאל), a name occurring in the genealogy in Tob. 1 1. The genealogy is omitted by the Aram. version, but given in a very regular form in the Heb. (ed. Neubauer), Itala, and K. The Greek texts, however, mark off Asiel (*sic*) from the other names by saying ἐκ τοῦ σπέρματος Ἀσιήλ, a distinction preserved in Vg. 'ex tribu et civitate Nephthali,' though the word Ἀσιήλ is omitted. They are, therefore, probably right also in their orthography, since, according to Gen. 46 24 Nu. 26 48 [AF], etc., Ἀσιήλ is a Naphtalite clan (see JAHZEEL). If this is so the name is יַחְצְאֵל.

ASAHEL (עֲשָׂהאֵל, § 31; αϲαηλ [BNA]; acc. [L, but 1 Ch. 11 26 as in B]; ασαηλος Jos.), youngest (? 2 S. 2 18) son of Zeruiah David's sister, and brother of Joab and Abishai. He was renowned for his lightness of foot (*ib.*). As in the case of his unfortunate cousin, almost all we know of him is the story (2 S. 2 19-25) of his death at the reluctant hands of ABNER (*q.v.*). 'There lacked of David's servants but nineteen men and Asahel' (*v.* 30): such is the statement of David's loss in the battle of Gibeon. With this special mention agrees the fact that his name stands first in the list of the 'thirty' heroes in 2 S. 23 and 1 Ch. 11 (but cp AMASAI). It is true, another account is given in the new version of the list of

[1] It has been supposed (*e.g.* Ges. *Thes.*) that the name Arvad means 'Refuge.'

[2] Mr. Burkitt argues that Ασαφ, Asaph, 'was once the rendering of the LXX' for Asa, as σιραχ is for סירא Sira (*Cambridge University Reporter*, March 1897, p. 699 *f.*). Cp. ASAPH, 4.

heroes in 1 Ch. 27 (II. 7), where we find Asahel commander of a division of David's army. The incompatibility of this statement with his death before David became king of Israel was obvious. The present text, accordingly, adds 'and Zebadiah his son after him,' for which 𝔊^BA has 'son καὶ οἱ ἀδελφοί,' to which 𝔊^L adds ὀπίσω αὐτοῦ.

2. An itinerating Levitical teacher temp. Jehoshaphat, 2 Ch. 17 8 (Ιασ[ε]ιηλ [BA], Ασιηλ [L]).

3. An overseer of chambers in the temple temp. Hezekiah (2 Ch. 31 13†).

4. 'Father' or ancestor of JONATHAN [13], temp. Ezra; Ezra 10 15 (ασηλ [B], σαη. [א*], א?A as in 1) = 1 Esd. 9 14†, AZAEL (αζαηλου).

ASAHIAH (עֲשָׂיָה), 2 K. 22 12 14, RV ASAIAH, 2.

ASAIAH (עֲשָׂיָה, § 31, 'Yahwè hath made'; ασαια [BAL]).

1. One of the Simeonite chieftains who dispossessed the Meunim [see RV], 1 Ch. 4 34-41 (*Aura* [B]).

2. 'King's servant' to Josiah, 2 K. 22 12, AV ASAHIAH (Ιασαι [A], Αζαριας [L]), 14 (ασαιας [BA] αζαριας [L]) = 2 Ch. 34 20 (Ισαια [B], Ιωσιας [L]).

3. A Merarite family, 1 Ch. 6 30 [15] (Ασαβα [B]), 15 6 (Ασαι [B], ασαιας [A^a]), 11 (ασαιας [A]).

4. A Shilonite family, 1 Ch. 9 5 (Ασα [B]), probably same as (3), but cp MAASEIAH, ii. 18 (Neh. 11 5).

ASANA (ασσανα [B]), 1 Esd. 5 31 = Ezra 2 50, ASNAH.

ASAPH (אָסָף an abbreviated name, § 50, ασαφ [BAL]).

1. The father of Joah, the recorder, 2 K. 18 18 (ιωσαφατ [BA], ιωαχ υιος σαφαν [L]), 37 (σαφαν [B]) = Is. 36 3 22; but 𝔊 suggests the reading 'Shaphan' or 'Shaphat.'[1]

2. The keeper of the royal 'paradise' or forest (probably in Palestine), Neh. 2 8 (ασαφατ [L], αδδαιος [Jos.]).

3. The eponym of the Asaphite guild of singers, Ezra 2 41 3 10 Neh. 7 44 11 17 (only א^c.a L in 𝔊) 22 (ασαβ [Bא]) 1 Ch. 25 1 *f.*, and elsewhere, who is represented by the Chronicler, as a seer (2 Ch. 29 30) and as a contemporary of David and Solomon, and chief of the singers of his time, Neh. 12 46 1 Ch. 15 17 19 (Ασαβ [א]) 16 5 (Ασσαφ [א]) 2 Ch. 5 12, etc.[2] On the later equation of Asaph with the Ar. Lokmān and Gk. Æsop, cp *Story of Aḥiḳar*, lxxvii. *f.* Complicated as the history of these guilds is, we are able to see from Ezra 2 41 that at one time the terms 'b'ne Asaph' and 'singers' were identical, and that the singers were kept distinct from the Levites. The guilds of the b'ne Asaph and b'ne Korah were the two hereditary choirs that superintended the musical services of the temple. They do not seem to have been very prominent before the Exile. More important, however, was the triple division. This comprised the three great names of Asaph, Heman, and Ethan (or Jeduthun), which were reckoned to the three Levitical houses of Gershom, Kohath, and Merari (1 Ch. 6; see PSALMS). A still older attempt to incorporate the name among the Levites may, according to WRS, *OTJC* (2) 204, n. 1, be seen perhaps in the occurrence of the name ABIASAPH (*q.v.*), the eponym of the Asaphite guild, as a Korahite. Of the threefold division of singers a clear example may be seen in Neh. 12 24 where Hashabiah, Sherebiah, and Jeshua, the chiefs of the Levites, are appointed to praise. Similarly, in Neh. 11 17 three singers are mentioned—Mattaniah, Abda, and Bakbukiah. Mattaniah and Abda are descendants of Asaph and Jeduthun. 'Bakbukiah' we should correct to 'Bukkiah,' a son of Heman. Thus, each of the three great guilds finds its representative. See ETHAN, 2, HEMAN, JEDUTHUN.

The name Asaph occurs in the titles of certain Psalms (see PSALMS).

4. The best supported reading in Mt. 1 7 (ασαφ [Ti. WH], cp RV^mg.; on this reading see ASA, footnote) where TR and EV have Asa. See GENEALOGIES OF JESUS, § 2 *b*.

[1] In 2 Ch. 34 15 𝔊^A has ασαφ for שפן.

[2] In 1 Ch. 26 1 𝔊^B reads Αβιαζαφαρ, which corresponds very nearly to 1 Ch. 9 19 (𝔊 Αβιασαφ). In 2 Ch. 29 13 𝔊^B reads Ασα.

ASARA (ασαρα [BA]), 1 Esd. 5 31 RV; AV AZARA.

ASARAMEL, a name occurring in the inscription set up in honour of Simon the Maccabee (1 Macc. 14 28). The writing begins as follows:—'On the 18th day of Elul in the 172nd year, this is the third year of Simon, the high priest εν σαραμελ (so 𝔊^A, whence AV SARAMEL, εν ασαραμελ [אV], *asaramel* [Vg.]) in a great congregation'—etc. It has long been recognised that this expression is a transliteration of some Hebrew word which stood in the original, as is the case with the difficult *sarbeth sabanai el* in the title of this book (see MACCABEES, FIRST, § 1). By some it is taken to represent a place—*e.g.*, it might be a corruption of Jerusalem (Castellio)—or to represent the Heb. חֲצַר עַם אֵל, 'the court of the people of God'—*i.e.*, the great court of the temple (Keil; cp Ew. *Gesch.* (3) 4 438)—or חֲצַר מִלֹּא, the court of Millo (Grotius), or שַׁעַר עַם אֵל, 'the gate of the people of God.' It is better, however, to see in this expression an honorific title. From 1 Macc. 13 42 we see that contracts were dated from the first year of Simon 'the great high priest, and captain and leader of the Jews' (cp the titles given him in 14 47 and 15 1), and it seems natural that in an inscription written in honour of Simon we should find more than the simple title 'high priest.' (Cp the Pesh. ܪܒܐ ܕܐܝܣܪܝܠ, 'leader (or '(great one") in Israel'). Hence Asaramel is taken by many (Wernsdorf, Scholz, Grimm, Zöckler, etc.) to represent שַׂר עַם אֵל, 'prince of the people of God.' The great difficulty would then lie in the presence of the preposition ἐν. This, however, may have been inserted by a copyist who supposed that the word was the name of a place not of a person.[1] Possibly εν is an integral part of the word, and we should read נֵצֶר עַם־אֵל, 'the sprout (cp Is. 11 1) of the people of God,' or, better, נֹצֵר עַם־אֵל, 'protector of the people of God' (cp *v.* 47 6).

ASAREEL, or, better, RV Asarel (אֲשַׂרְאֵל, § 67; cp אשריאל, and see AHAB, § 4, n. 5; ισεραηλ [B], εσ. [A] ασερη. [L which adds καὶ ιωαχειμ]), 'son' of (the unknown) Jehaleleel (1 Ch. 4 16) and 'brother' of ZIPH (*q.v.*, 2), Ziphnh and Tiria.

ASARELAH (אֲשַׂרְאֵלָה [Bä. Ginsb.], § 73; cp אשראל; εραηλ [B], ιεσιηλ [A], ασειρηλα [L]), a 'son of Asaph' 1 Ch. 25 2; called Jesarelah, EV JESHARELAH (יְשַׂרְאֵלָה; ισεριηλ [B], ισρεηλα [A]) in *v.* 14.

ASBACAPHATH (ασβακαφαθ [B]; in Pesh. the name is ܐܣܒܩܦܬ), 1 Esd. 5 69 RV^mg., AV (1611) Asbasareth, RV Asbasareth (ασβασαρεθ [A]), the name answering in 1 Esd. 5 69 𝔊^BA to the Esarhaddon of ‖ Ezra 4 2 (which is reproduced by 𝔊^L, αχορδαν). The right reading is ασβαφαθ, which represents אסנפר. This is evidently an alternative to the reading אסנפר of Ezra 4 10, and it suggests that the writer of the gloss in Ezra 4 9 *f.* (see 'Ezra' in *SBOT*) found, not אסרחדן, but אסנפר, in his text of Ezra 4 2. So Marq. (*Fund.* 59); but, in connection with the difficult theory that the name originally given in Ezra 4 2 was סרגון=אסרגן, Sargon; see ASNAPPER.

ASCALON (ασκαλων), 1 Macc. 10 86, etc., RV ASHKELON (*q.v.*).

ASCENT OF THE CORNER (עֲלִיַּת הַפִּנָּה; ανα

[1] The prefixed ἐν is explained by Schürer (*GVI* 1 197, n. 17) as a corruption of σεγεν (סְגַן), which corresponds to the Gr. στρατηγός. Renan's suggestion (*Hist. d'Isr.* ix. cap. 1 *ad fin.*) that εν ασαραμελ is a corruption of some *wish*, may he mentioned; in his view the expression is similar to those which Arabian authors often add to the names of persons.

MBCON THC KAMΠΗC [B]; ΑΝΑΒΑCΕWC ΤΗC Κ. [HA]; THC A. T. ΓWNIAC [L]) Neh. 3 31 RV. See JERUSALEM.

ASEAS (ΑCΑΙΑC [BA]), I Esd. 9 32 = Ezra 10 31, ISSHIAH, 5.

ASEBEBIA; RV Asebebias (ΑCΕΒΗΒΙΑC [BA]), I Esd. 8 47 = Ezra 8 18, SHEREBIAH, *q.v.*

ASEBIA (ΑCΕΒΙΑΝ [A]), I Esd. 847 AV, RV Asebias = Ezra 8 19, HASHABIAH, 7.

ASENATH (אָסְנַת; ΑCΕΝΝΕΘ [ADE], -ΕΝΕ. [E]), ΑCCΕΝΕΘ [L], daughter of Potipherah, priest of On; wife of Joseph (Gen. 41 45 50 46 20†). A genuine Egyptian name. See JOSEPH 1, § 4; and on the apocryphal 'Life of Aseneth,' APOCRYPHA, § 12.

ASER, RV ASHER (ΑCΗΡ [BA]), Tob. 1 2. *See* HAZOR, I.

ASERER, RV SERAR (CΕΡΑΡ [BA]), I Esd. 5 32 = Ezra 2 53, SISERA, *2*.

ASH (אֹרֶן, ΠΙΤΥC), better RV **Fir-Tree,** seems to be named (Is. 44 14) as a tree used by makers of idols. If *ōren* is genuine (see below) we may reasonably hold it to be the Assyrian *irin*—cedar or fir.

'Fir' is supported by the versions (*πίτυς*, *pinus*) and by the Rabbis (reff. in Ges. *Thes.*); Tristram's suggestion, *Pinus halepensis*, Mill, the Aleppo Pine (*NHB*, 335), is attractive. That Heb. *ōren* = Lat. *ornus* is improbable; ארן cannot he *Fraxinus ornus*, L., the Manna Ash a native of S. Europe, not found farther E. than W. Asia Minor. Celsius (*Hierobot.* 1 185 *ff.*) held ארן to be the *arān* of Abulfadl, and the 'thorny tree' that he meant it is not difficult to make out. *Rhus oxycantha* (leaves and drupes somewhat like *Sorbus Aucuparia*) is called *'ern, 'crin* (*Illustr. de la flore de l'Égypte*, 205), and that the little tree grows in Arabia, though not yet proved, is by no means improbable. *Rhus Coriaria*, which also might he thought of, resembles *Sorbus Aucuparia* more closely.

The reading, however, is uncertain. ארן occurs only in this passage, and a Mass. note calls attention to the 'small ן,' which seems to point to a reading ארז 'cedar.' Perhaps a better emendation would be אל ('God').

So Klo. and Che. (*SBOT*, Heb. 138), following 𝔊. The word *πίτυς* is wanting in nearly all the best MSS (BℵAQΓ) of 𝔊, and in others appears as a Hexaplaric addition with an asterisk. The text of the whole verse as it appears in 𝔊B and other MSS is simply—*ἔκοψεν ξύλον ἐκ τοῦ δρυμοῦ ὃ ἐφύτευσεν ὁ κύριος καὶ ὑετὸς ἐμήκυνεν* (the Peshitta is even shorter, 'the wood that was cut down from the thicket, that by rain was nurtured'). Between *ἔκοψεν* and *ξύλον* Origen inserted in the Hexaplaric text this addition, from Aq. and Theod., *ἑαυτῷ κέδρους, καὶ ἔλαβεν ἀγριοβάλανον καὶ δρῦν καὶ ἐκαρτέρωσεν αὐτῷ* and similarly added *πίτυν* after *ὁ κύριος*; see Field's *Hexapla* in loc.).

N. M. —W. T. T.-D.

ASHAN (עָשָׁן; ΑCΑΝ [BAL], ΑCΕΝΝΑ [A], ΑCΑΝΝΑ [L]), an unidentified site in the lowland of Jndah, apparently in its most southern part (Josh. 15 42, ΑΝWΧ [B], ΑCΕΝΝΑ [A], -CΑΝΝ. [L]), assigned in Josh. 19 7 (ΑCΑΜ [A]) to Simeon, and named among the priests' cities in I Ch. 6 59 [44] = Josh. 21 16 (where for MT עַיִן, EV AIN, ΑΙΝ [A], ΝΑΕΙΝ [L], we should probably read עָשָׁן, Ashan; cp 𝔊B ΑCΑ; so Bennett in *SBOT*). Ashan may perhaps be the same as the BOR-ASHAN [*q.v.*], or CHOR-ASHAN (RV COR-ASHAN) of I S. 30 30, the site of some well or reservoir.

ASHARELAH (אֲשַׂרְאֵלָה, Bä. Ginsb.), I Ch. 25 2 RV, AV ASARELAH.

ASRBEA (אַשְׁבֵּעַ, § 42, for אשבעל?; ΕCΟΒΑ [BA], ΑCΕΒΑ [L]). The 'house of Ashbea' included 'the (Judahite) families of the house of those that wrought fine linen' (I Ch. 4 21); or Beth Ashbea may be the name of their dwelling-place. Nothing further is known of this weaving guild.

ASHBEL (אַשְׁבֵּל, § 43; ΑCΒΗΛ [ADL]; ΑCΑΒΗΛΟC [Jos.]; Sam. אשבאל), gentilic **Ashbelite,** Nu. 26 38 אַשְׁבֵּלִי, ΑCΥΒΗΡ[Ε]Ι [BAF], -CΟΥΒΗΡΙ [L]), in a genealogy of BENJAMIN (*q.v.*, § 9 ii. [*β*]), Gen. 46 21 = Nu. 26 38 ΑCΥΒΗΡ [BAF], -CΟΥΒ [L]) = I Ch. 8 1 (CΑΒΑ [B]); apparently represented by JEDIAEL in I Ch. 7 6-11 (*v.* 6). Probably the name is a corruption of ISHBAAL (*q.v.*).

ASHCHENAZ (אַשְׁכְּנַז), Jer. 51 27 AV; RV ASHKENAZ, *q.v.*

ASHDOD, AZOTUS (אַשְׁדּוֹד, 'strength, strongly-fortified' or perhaps 'man [men] of Dod, Dudu'; cp ASHHUR, BENE-BERAK?; ΑΖWΤΟC [BAℵQΓL], hence its name in Apocr., NT, etc.), gentilic **Ashdodite, AV Ashdothite** אַשְׁדּוֹדִי, Josh. 13 3 (ΑΖWΤ(Ε)ΙΟC [BAL]; pl. fem. אַשְׁדּוֹדִיּוֹת; Neh. 13 23 in Kr. אַשְׁדֳּדִיּוֹת; ΑΖWΤΙΑC [BAL], -ΙΔΑC [ℵ]), a famous Philistine city some *2-3* m. from the Mediterranean coast, about half-way between Gaza and Joppa. It was one of the five confederated towns of the Philistines, and stood far above the others in importance—a pre-eminence due doubtless to its commanding position on the great military road between Syria and Egypt, at the spot where a branch of it leads off to Ekron and Ramleh. It survives in the modern *Esdūd*, a miserable little village on a woody and beautiful height, to the W. of which, at an hour's distance, are still found the traces of a harbour now called Mīnet el-Ḳal'a.[1] JE assigns Ashdod to Judah (Josh. 15 46 *f.*, *ασηδωθ*, *ασειεδωθ* [B], *ἀσδωμ* [A, in *v.* 47 om.], *εσδωδ* [L]); but this statement clearly needs modification in view of Josh. 13 3 (D_2; cp 11 22, *ασελδω* [B], *αδωθ* [A], *ασηδωθ* [F], *ασεδδωδ* [L]), which is supported by the fact that Israel seems never to have subdued the Philistine stronghold (2 Ch. 26 6 is doubtful). In Samuel's time the ark was removed thither from Eben-ezer, and placed in the temple of Dagon (I S. 5 *f.*), whose cult was more particularly associated with Ashdod (cp I Macc. 10 83 11 4).[2] Ashdod is denounced by Amos with other Philistine towns for the infamous slave-raids upon Judah, and the same prophet alludes to it again in terms which show that in the middle of the eighth century it was a place of no little repute (3 9 [|| Egypt], 𝔊BA reads 'Assyria,' against which cp We.; Now.; Aq., Sym., Theod. read Ashdod). Although nnmentioned in the annals of Tiglath-pileser's campaign against Philistia and Phœnicia (cp Wi. *GVI* 1223) it probably suffered at his hands. On the other hand, we are fortunately well-informed of its fate some years later in the siege alluded to in Is. 20 1 (711 B.C.).[3] As a commemorative record relates (cp *KAT*(2) 398 *f.*, *KB* 2 65 *f.*), Azuri (cp Heb. עַזּוּר, Azzur), king of Asdudu, had been superseded[4] by his brother Aḫi-miti (cp Ahimoth, Mahath), who in turn was overthrown by the anti-Assyrian party (the Ḫa-at-tí)[5] in favour of Yamani (or Yavani = the Ionian?). Ashdod was besieged, not by Sargon, but, as the MT more correctly states, by his general or TARTAN [*q.v.*]. This siege, as Is. 20 6 suggests, involved the surrounding peoples, and ultimately resulted in the flight of Yavani to the land of Muṣri, which belongs to Miluḫḫa, the district lying in N. Arabia, bordering on Edom (see MIZRAIM, § *2b*). The same tablet records the destruction of (*ir*) *Gimtu Asdudimmu*, which, according to Schrader, is 'Gath of

[1] In early Christian times Ἄζωτος παράλιος and Ἄζωτος μεσόγειος are kept distinct. Josephus sometimes speaks of Ashdod (and similarly of Jabneh, Jamnia) as an inland town (*Ant.* xiv. 4 4, *BJ* i. 7 7) at other times as a coast town (*Ant.* xiii. 15 4). There may have been a harbour here in the time of Sargon; cp above.

[2] Hence it has been conjectured that Dagan-takala in the Amarna tablets (*KB* 5 215 *f.*) belonged to Ashdod.

[3] For the date, etc., cp Ch. *Intr.* 120 *f.*; Wi. *Alt. Unt.* 142 *ff.*

[4] He had sought to ally himself with the surrounding kings against Assyria. Another inscription relates that the men of Philistia, Judah, Edom, and Moab had sent presents to Pir'û, king of Muṣri, for a like purpose (cp *KB* 2 64 *f.* and note).

[5] These Ḫa-at-tí of Ashdod seem to have been closely related to Muṣri (cp also Wi., "Muṣri, etc." in *MVG*, 1898, 1 26 *f.*).

the Ashdodites' (cp 'Gath of the Philistines,' Am. 6 2, and for a wider use of Ashdod see below). Others (Del. *Pur.* 289 *f.*, Wi. Che.) read as two names, and explain the latter as אַשְׁדּוֹד הַיָּם—*i.e.*, the port of Ashdod (cp note 1, below).

Ashdod soon regained its power, and in the following century the 'great city of Syria' (Herod 2 157) was besieged by Psammetichus for twenty-nine years, an allusion to which is seen in Jer. 25 20 (less probably also Zeph. 2 4 : see ZEPHANIAH, ii.). Further evidence of its independence may be seen in the mention of Aḫi-milki, king of Ashdod, temp. Esarhaddon (*KAT*(2) 355 12).

The Ashdodites were allied with the Arabians and the Ammonites against the Jews of Jerusalem (Neh. 4 7 [1]), and Nehemiah, denouncing the foreign marriages, mentions the women of Ashdod (also of Ammon and Moab), whose offspring speak a degraded dialect called אַשְׁדּוֹדִית (Neh. 13 23 *f.*, ἀζωτιστ[ε]ὶ [BKAL]) : cp the allusion in Zech. 9 6. The use of Ashdod in these passages is peculiar, and, if genuine, suggests that the name Ashdod comprised also the surrounding district (cp Schrader's explanation of *asdudimmu* above).

Ashdod and its neighbourhood was ravaged by Judas (1 Macc. 5 68, cp 4 15), and in 147 B.C. his brother Jonathan defeated Apollonius there and burnt the temple of Dagon (1 Macc. 10 77 *ff.*, cp 11 4). John Hyrcanus burnt the towers in the surrounding fields after defeating Cendebzeus (1 Macc. 16 10). In the time of Alexander Jannaeus it belonged to Judæa (Jos. *Ant.* xiii. 15 4) ; but it was separated from it under Ptolemy (Jos. *BJ* i. 7 7). In the NT it is mentioned only once, in connection with Philip's return from Gaza to Caesarea (Acts 8 40). See Schür. *GVI* 267 *f.*, Wi. *GVI* 1 223 *f.* ; and cp PHILISTINES. S. A. C.

ASHDOTH-PISGAH (אַשְׁדּוֹת הַפִּסְגָּה) is uniformly translated, in RV, 'the slopes (*marg.* or springs) of Pisgah' (Dt. 3 17 4 49 [here also AV] Josh. 12 3 [no marg. note] 13 20 ; for 𝔊's readings see PISGAH). In like manner, the Heb. אֲשֵׁדוֹת, rendered 'springs' in Josh. 10 40 12 8, is in RV 'slopes.' The declivities or shoulders of a mountain plateau, where it sinks sharply into the plain, are meant. The word is perhaps derived from אשד, in the sense of 'pouring out'; [2] the explanation usually given is that the Ashēdoth are the line on the mountain-side where springs break forth. See PISGAH.

ASHER (אָשֵׁר ; ασηρ [BAL], αcηρ [A*Nu. 7 72], ιαcηβ [B, Josh. 17 10] ; Jos. ασηρος ; gentilic אָשֵׁרִי Asherite), the eponymous head of the tribe of the same name.

1. Name and origin. Unimportant for the history of Israel—it is traced by the Yahwist to Zilpah, Leah's maid (Gen. 30 12 *f.*), —this tribe, perhaps more than the other Zilpah and Bilhah tribes (see ISRAEL, § 5), raises questions difficult to answer. Is the popular etymology (Gen. 30 13, probably also alluded to in the 'Blessings') correct, or does the name not rather point to some deity—in which case it is natural to connect it with the root אשר (ישר), 'to be propitious,' whence the name of the Assyrian God Ašur? [3] In what relation does Asher stand to a once somewhat important state called *Aseru*, *As(s)aru*, which occupied W. Galilee in the time of Seti I. and Ramses II. (WMM, *As. u. Eur.* 236-9)? Did that ancient people to some extent throw in their lot with the invaders from the wilderness (cp HARNEPHER), or is Asher in the OT simply a geographical name for some Israelites who settled in a district already long known as Asher? Hommel (*AHT* 228, 237) thinks that the Asherites were one of several Israelitish tribes which, before the time of Moses, had encamped in the district between Egypt and Judah (cp SHIHOR-LIBNATH) and that they are the Habiri referred to in the Amarna letters as having burst into Palestine from the south. Jastrow, on the other hand, inclines to identify the Ḥabiri with the Asherite clan Heber (see below, § 4) and to connect the Asherite clan Malchiel with the followers of Milkili, the writer of several of the Amarna letters, while G. A. Barton suggests that the sons of Abd-aširta (b'nē Ebed Ašera), of whom we hear so much in the letters of Rib-Addi of Gebal, may have become an important constituent part of the OT tribe of Asher, so that it inherited their name in abbreviated form. That the OT Asherites were at all events not very closely bound to Israel is proved by

2. Earlier references. our earliest historical notice of the tribe, according to which it took no interest in the rising against Sisera : 'Asher sat still at the shore of the sea, and abode by his creeks' (Judg. 5 17).[1] Moreover, that they were somewhat mixed up with older inhabitants appears clearly enough in Judg. 1 32. Whilst, therefore, the fertility ascribed in the 'Blessings of Jacob and Moses' to the district where Asher dwelt, although it at once suggests the popular etymology (see above), is known to have been really characteristic of the part of Galilee in question (see reff. in Dr. on Dt. 33 24, and cp BIRZAITH), we can hardly say how far the distinctness from the Phœnicians of the coast, apparently implied in *v.* 25 of the later Blessing, was an actual fact. On the other hand, the writer of the account of ISHBAAL (*q.v.*, 1) seems to have thought Asher worth mentioning as included in the Benjamite claim (see ASHURITES, GESHUR, 1). It is not surprising in view of the prevailing vagueness, that the 'Blessing of Jacob' speaks of ZEBULUN in almost the same words that the Song of Deborah had applied to Asher, and that the 'Blessing of Moses' then associates ISSACHAR with Zebulun. Definite boundary there can hardly have been, whilst the distribution of the population must have changed somewhat from age to age. We need not wonder that the account of Asher's territory

3. Boundaries. which the priestly compiler has given us in Josh. 19 24-31 (in which some scholars have found traces of JE) is unusually vague. Not many of the places can be identified with certainty.

ALAMMELECH (Wādy el-Melek) JIPHTHAH-EL (Jefāt), CABUL (Kabūl), KANAH (Ḳāna) have) probably been identified, and possibly also Ehron (*i.e.*, ABDON, i.) and HAMMON, 1 (Umm el 'Amūd). UMMAH should probably be read Accho. SHIHOR-LIBNATH (*q.v.*) may perhaps be the Nahr ez-Zarḳā. MISHAL and HOSAH (*qq.v.*) are probably to be recognised in Egyptian and Assyrian inscriptions.

That Accho or Achzib or Sidon was ever included in an Israelitish tribe Asher, is a purely ideal conception, and the same is clearly true (Judg. 1 31 *f.*) of other cities in the list. For indications of an Aramzean element in the population (z S. 10 6) see ARAM, § 5.

The tribe to the S. of Asher was Manasseh. In Josh. 17 11 we have a Yahwistic passage which is commonly interpreted as declaring that Dor lay within the limits of territory ideally assigned to Asher, although it really belonged to Manasseh. This interpretation gives support to the hypothesis that Shihor-Libnath (Josh. 19 26) is to be taken as the southern boundary of Asher, and to be identified with the river Zarḳā, which enters the sea almost midway between Dor and Cæsarea. If Asher really moved northwards from an earlier home

[1] So in 1 Macc. 14 34 Gazara (in reality 17 m. to NE.) is 'upon the borders of Azotus'; cp also (doubtfully) 2 Ch. 26 6.

[2] Delitzsch compares the Ass. *išdu*, pl. *išdâti*, the 'base' of anything (*Prol.* 46 ; cp Dr. on *Deut.* 3 17).

[3] Tiele long ago wrote, 'Asher, like Gad, is a god of good fortune, the consort of Asherah' (*Vergelijk. Gesch. van de Egypt. en Mesopotam. Godsdiensten*, 1872, p. 542), and both parts of this statement may still be defended. So Che. *Proph. Is.*(1) 1 103 (on Is. 17 8). Cp Del. *Ass. HWB* 148. G. A. Barton (*JBL* 15 174 ['96]) suggests a connection with the divine name implied in the name Abd-aširta referred to towards the end of § 1 (see ASHERAH, § 3). Jensen (*Hittiter u. Armenier*) offers proof that the name of the consort of the goddess Ašratu was Hadad or Rammān the storm-god. Had he also the title Ašir? Lastly G. H. Skipwith (*JQR* 11 241 ['99]) even suggests a connection between אשר and Osiris (the father of Horus; cp HARNEFHER).

[1] On the statement in Judg. 6 35 7 23, that Asher took part in the conflict with Midian, see Moore, *ad loc.*

in S. Palestine (see ahove, § 1), traces or at least memorials of it may have long survived (see SHIHOR-LIBNATH). This would make it not quite so difficult to understand the account of P, even if it is a fact that he really brings Asher farther S. than Carmel (Josh. 19 26).

The linguistic peculiarities of the verse Josh. 17 11 support the suggestion of Dillmann (*ad loc.*) that all that follows the word 'Asher' except 'the three heights' belongs really to *v.* 12, taking the place there of the words 'those cities' (cp Judg. 127);[1] but we do not know what 'the three heights' are (though they certainly might include 'the heights of Dor'; cp Josh. 112 1223). There is, however, little historical importance in the question whether Dor is represented as belonging to Asher, since, as a matter of fact, it and the cities mentioned with it remained in the possession of the Canaanites or Phœnicians.

On the other three sides the territory of Asher is even less defined. According to Josh. 19 27, it was conterminous with Zebulun on the E., while according to *v.* 34 it stood in the same relation to Naphtali. It is difficult to bring it into relation with Issachar. In general, Asher must be regarded as the north-westernmost district connected with Israel, and as stretching indefinitely W. and N. and losing itself gradually amongst the Phoenicians of the coast.

4. Genealogies. (i.) P's genealogy of Asher (given twice: Nu. 2644, probably the more original, = Gen. 46 17), which is reproduced in almost identical form by the Chronicler (1 Ch. 7 30 *f.*), is very simple, consisting probably of (primarily) the three clans, the Imnites (perhaps really Jamin; so 𝔊BAL in Nu. and perhaps 𝔊B in 1 Ch.), Ishvites (doubtful), and Beri'ites.

With the last mentioned are associated as secondary clans the Heberites (known as a Kenite name)[2] and the Malchielites (known as a personal name in the Amarna letters from S. Palestine) as 'sons,' and Serah (perhaps an Aram. name; root not found in Hebrew) as sister. There is no earlier mention however, of any of these names in connection with Asher: though the first and third are well known in the central highlands of Palestine.

(ii.) To this simple genealogy the Chronicler appends (1 Ch. 7 31 6-39) a remarkable list of one Malchielite and over thirty Heberites—remarkable because the names are not of the distinctive type that abounds in the Chronicler. The list if we remove certain textual corruptions,[3] looks as if it were meant to be schematic (*e.g.*, 3 sons and 3 X 3 grandsons, followed by some seventeen in the fourth, fifth, and sixth generations); but we cannot reach a text that inspires confidence. It must he remembered, however, that many of the names may well be foreign. Harnepher has been referred to above. The affinities of some of the names are worthy of note: note, *e.g.*, the remarkable groups Heber, Ithran, Jether; so also Beria, Shelesh = Shilsha of *v.* 37 (Shalisha? cp 𝔊B), Shual.

Lk. 2 36 speaks of a certain Anna as being of the tribe of Asher (but see GENEALOGIES, i. § 8).

2. Tob. 1 2 RV, AV ASER. See HAZOR, 1.

H. W. H.

ASHER (אָשֵׁר; ΑCΗΡ [BAL]), a town on the southern border of Manasseh, mentioned in Josh. 17 7 (RV) in the following terms:—'And the border of Manasseh was from Asher to Michmethath which is before [*i.e.*, E. or] Shcchem.' After this we are told that 'the border went along to the right hand [*i.e.*, to the S.], unto the inhabitants [*i.e.*, the district] of En-tappuah.' These statements must be taken in connection with the description of the N. border of Ephraim in 16 6, where the names which correspond to Asher and Michmethath are Michmethath and Taanath-Shiloh, and Taanath-Shiloh is stated to be E. of Michmethath. On the assumption that En-tappuah is SW. of Shechem (see TAPPUAH, 2), Asher must lie somewhere to the E. of Shechem, between Michmethath and Taanath-shiloh. Thus far we have proceeded on the

[1] 'Dor' in Judg. 1 31 𝔊BAL is no objection, for it does not fit the context, and is probably simply an insertion based on the passage in Joshua.

[2] Note that for Jehnhhah (1 Ch. 7 34) 𝔊B reads κ. ωβαβ—*i.e.*, Hobab?

[3] Ahi in *v.* 34 should certainly be 'his brother.' Probably Hotham (*v.* 32) is a miswritten Helem (cp *v.* 35), in which case 'sister' (*ăhōthām*) in *v.* 32 may he a duplicate of Hotham. Ulla (*v.* 39), as it ought to resume some name already mentioned may he a corruption of Shnal, which we should perhaps restor; for Shua in *v.* 32.

theory that RV's reading is correct; it is in fact that of most scholars, including Dillmann and Kautzsch. The rendering seems, however, to need revision. Considering that MICHMETHATH (*q.v.*) stands in 17 7 in close proximity to Asher (without any connecting *and*), and that it would be natural to distinguish this Asher from the better known one (with which indeed Kerr in *PEFQu St.*, 1877, p. 45, actually confounds it) by adding the name of the district in which it was (cp 'Kedesh-Naphtali'), it seems probable that Michmethath is the name of a district, and that we should render (against the accents and Targ., but in accordance with 𝔊AL), 'And the border of Manasseh was from Asher of (the) Michmethath,' the starting-point alone being mentioned in the opening clause, as in 15 2 (so Reland, J. Schwarz, Conder). The description in 17 7 will then exactly correspond to that in 16 6 in so far as Michmethath is the first point mentioned on the border between Ephraim and Manasseh. 'Asher of the Michmethath' might be some place in the N. of the district called 'the Michmethath.' If this district is the plain of *el-Makhna*, two ruined places at once suggest themselves, now called the upper and the lower *Makhna* respectively (Guérin, *Sam.* 1 459 *f.*). Here, however, no villages preserve any traces of the ancient name. Eus. and Jer. (OS 222 29 93 28) suggest another identification. They refer to a village called Asher, 15 R. m. from Neapolis on the road to Scythopolis, a description which points to *Teyāṣīr*, 1 R. m. NE. of Thebez, where the 15th R. milestone has actually been discovered (Séjourné, *Rev. Bibl.*, 1895, p. 617 *f.*). *Teyāṣīr* is now a mud hamlet; but it succeeds a place of some importance. Rock-cut sepulchres abound (Guérin, *Sam.* 1 108). It is not probable, however, that Eus. and Jer. had a clear or correct view of the boundary line, and the transition from Asher to *Teyāṣīr* is not an easy one. (The latter name seems to be the plur. of *taiṣīr*, inf. 2 conj. of *yaṣara.* So Kanipffmeyer, *ZDPV* 16 2.) T. K. C.

ASHERAH, plur. **Asherim**, the RV transliteration of the Heb. אֲשֵׁרָה (pl. אֲשֵׁרִים; in three late passages אֲשֵׁרוֹת), a word which AV, following 𝔊 (αλcoc [BAFL]) and Vg. (*lucus*), renders *grove*, *groves*. That this translation is mistaken has long been universally recognised. RV avoids the error by not translating the word at all; hut, by consistently treating the word as a proper noun, it gives occasion to more serious misunderstanding.

1. The Ashera post. The *ăshērā* was a wooden post or mast, which stood at Canaanite places of worship (Ex. 34 13 Judg. 6 25 and frequently), and, down to the seventh century, also, by the altars of Yahwè, not only on the high places, or at Samaria (2 K. 13 6) and Bethel (2 K. 23 15), but also in the temple in Jerusalem (2 K. 23 6). The *ashera* is frequently named in conjunction with the upright stone or stelè (*maṣṣēbā*, *ḥammān*; see MASSEBAH and IDOLATRY, § 4). The pole or post might be of considerable size (cp Judg. 6 25 *f.*); it was perhaps sometimes carved (1 K. 15 13),[1] or draped (2 K. 23 7), but the draping especially is doubtful. The shape of an *ashera* is unknown. Many Cypriote and Phoenician gems and seals representing an act of adoration show two (more rarely three) posts, generally of about the height of a man, of extremely variable forms,[2] which are supposed by many archæologists to he the *asheras* (and *maṣṣebas*) of the OT (see PHŒNICIA). This is not improbable, though direct evidence is thus far lacking; but in view of the

[1] 'A shocking thing (Jewish tradition, *phallus*) as an ashera'; on 2 K. 21 7 see below.

[2] See Lajard, *Culte de Mithra*, 1847 *f.*; Ohnefalsch-Richter, *Kypros*, 1893, where a great many of these pieces are collected. Similar figures are found on Assyrian reliefs, and on Carthaginian. We may compare the Egyptian *dedu* column (at Busiris), the Indian sacrificial post (Oldenberg, *Religion des Veda*, 91), the so-called 'totem-posts' of the N. American Indians, etc. See in general Lippert, *Kulturgeschichte*, 2 376 *ff.*, and Jevons, *Intr. Hist. Rel.* 134 *f.*

great variety of types, and the age and origin of the figures in question, it can hardly be confidently inferred that the asheras of the Old Canaanites and Israelites were of similar forms. The representations do not give any support to the theory that the ashera was a phallic emblem.

It is the common opinion that the *ashera* was originally a living tree (*Sifrè* on Dt. 12 3, Aboda *zara*, fol. 45 a.6.; cp Di. on Dt. 16 21), for which the pole or mast was a conventional substitute.[1] This is antecedently not very probable.

2. Not a tree.

The sacred tree had in Hebrew a specific name of its own (*ēl*, *ēlā*, *ēlōn*, or, with a different and perhaps artificial pronunciation, *allā*, *allōn*), which would naturally have attached to the artificial representative also; nor is it easy to explain, upon this hypothesis, how the ashera came *to* be set up beneath the living tree (2 K. 17 10). The only passage in the OT which can be cited in support of the theory is Dt. 16 21 : 'Thou shalt not plant thee an asherah of any kind of tree (RV) beside the altar of Yahwk thy God,' or, more grammatically, 'an ashera —any kind of tree' (אשרה כל עץ). As, however, in the seventh century the *ashera* was certainly not ordinarily a tree, this epexegesis would be very strange. In the context, whether the words in question be original or a gloss, we expect, not a restriction of the prohibition such as this rendering in effect gives us, hut a sweeping extension of it. We must, therefore, translate, 'an ashera—any wooden object.'[2]

It does not appear from the OT that the asheras belonged exclusively *to* the worship of any one deity. The *ashera* at Ophrah (Jndg. 6 25) was sacred to Baal; the prohibitions of the law (Dt. 16 21 *f.*) are sufficient proof that they were erected *to* Yahwk;[3] nor is there any reason to think that those at Bethel, Samaria, and Jerusalem were dedicated to any other god. The assertion, still often macle, that in the religion of Canaan the *maṣṣebas* were sacred to male, the asheras *to* female deities, is supported by no proof whatever.

From certain passages in the OT (especially Judg. 3 7 1 K. 18 19 2 K. 23 4),[4] it has been thought that there was also a Canaanite goddess Ashera, whose symbol or idol was the ashera post.

3. A goddess?

Since in the places cited the names of Baal and Ashera are coupled precisely as those of Baal and Astarte are elsewhere (Judg. 2 13 10 6 1 S. 7 4 [𝔊^BAL τὰ ἄλση Ασταρωθ] 12 10 [𝔊^BAL τοῖς ἄλσεσιν]), many scholars have inferred, further, that Ashera was only another name or form of the great Semitic goddess, Astarte (Theodoret, *Quæst.* 55 *in iv. Reg.*, Selden, Spencer, etc.); whilst others attempt in various ways to distinguish them—*e.g.*, Astarte, a pure celestial deity, Ashera, an impure 'telluric' divinity (Movers); or the former a goddess of the Northern Canaanites, the latter of the Southern (Tiele, Sayce). Conservative scholars such as Hengstenberg, Bachmann, and Baethgen, however, have contended that in the passages in question the symbol of Astarte is merely put by metonymy for the name of the goddess; and many recent critics[5] see in these places only a confusion (on the part of late writers) of the sacred post with the goddess Astarte.[6] A critical examination of the passages makes it highly probable that in the OT the supposed goddess Ashera owes her existence only to this confusion. In the Amarna correspondence, however, there is frequent mention of a Canaanite who bears the name Abd-ašratum, equivalent to Heb. '*Ebed-ăshērā*, sometimes with the divine determinative,—*i.e.*, Servant of (the divine) *Ashera*. This has not unnaturally been regarded as conclusive evidence that a goddess Ashera was worshipped in Palestine in the fifteenth century B.C.[1] The determinative might here signify no more than that the *ashera* post was esteemed divine—a fetish, or a cultus-god—as no one doubts that it was in OT times; cp Phœnician names such as 'Ebed-stisim, Servant of (the sacred) horses (*CIS* i. 46, 49, 53, 933, etc.); or 'Ebed-hēkal, Gēr-hēkal (G. Hoffmann), which might in Assyrian writing have the same determinative; further, Assyr. *êkurru*, 'temple, sanctuary,' in pl. sometimes 'deities' (Del. *HWB* 718). The name of the 'goddess *Ašratum*,' however, occurs in other cuneiform texts, where this explanation seems not to be admissible: viz., on a hæmatite cylinder published by Sayce (*ZA* 6 161); in an astronomical work copied in the year 138 B.C., published by Strassmaier (*ZA* 6 241, *l.* 9 *ff.*); and in a hymn published by Reisner (*Sumer.-babylon. Hymnen*, 92)—in the last in connection with a god *Amurru*, which suggests that the worship may have been introduced from the West. See Jensen, 'Die Gotter *Amurru*(*ū*) und *Ašratu*,' *ZA* 11 302-305.

The word *ashera* occurs also in an enigmatical Phœnician inscription from Ma'ṣūb, which records a dedication '*to* the Astarte in the ashera of El-hammon' (G. Hoffmann);, where it is at least clear that ***ashera*** cannot be the name of a deity. The most natural interpretation in the context would he 'in the sacred precincts.' In an inscription from Citium in which the word was formerly read (Schroeder, *ZDMG* 35 424, 'mother Ashera'; contra, St. *ZATW* 1 344 *f.*; cp E. Mey. in Roscher. 2870), the reading and interpretation are insecme (see *CIS* i. no. 13). Cp PHŒNICIA.

The etymology and the meaning of the word are obscure. The most plausible hypothesis perhaps is that *ăshērīm* originally denoted only the *sign*-posts set up *to* mark the site or the boundaries of the holy place (G. Hoffmann, *l.c.* 26).

4. Etymology.

The use of the word in the Ma'ṣūb inscription for the sacred precincts would then be readily explained, and also the Assyrian *aširtu* plur. *ašrâti* (*ešrêti*), defined in the syllabaries as meaning 'high place, oracle, sanctuary.' In any case, *ăshērā* is a ***nomen unitatis***, and its gender has no other than a grammatical significance.

For some further questions connected with the prophetic opposition to the use of asheras in the worship of Yahwè and the prohibition in the laws, see IDOLATRY, § 8.

The older literature is cited under ASHTORETH [*q.v.*]. For recent discussion see We. *CH* 281 *f.* note; St. *GVI* 1 458 *ff.*, cp *ZATW* 1 345, 4 293 *ff.* 6 318 *f.*, G. Hoffmann, *Über einige phön. Inschriften*, 26 *ff.*; WRS, *Rel. Sem.*(2) 187 *ff.* On the other side, Schr. *ZA* 3 364. Reference may be made also to Baethgen, *Beitr.* 218 *ff.*, and to Collins, *PSBA* 11 291 *ff.*, who endeavours to show that the *ashera* was a phallic emblem sacred to Baal. G. F. M.

ASHES (אֵפֶר, of uncertain derivation) is used in various figures of speech typifying humiliation, frailty, nothingness, etc.: *e.g.*, *to* sit in, or be covered with, ashes (Job 2 8, cp Ez. 27 30 Lam. 3 16), to eat ashes (Ps. 102 9), to follow after ashes (Is. 44 20, Che. ad *loc.*, cp Hos. 12 1). To throw ashes on the head (2 S. 13 19 Is. 61 3), or *to* wear ashes and sackcloth (Dan. 9 3 Esth. 4 1 Jonah 3 6, cp Mt. 11 21 Lk. 10 13), was a common way of showing one's grief; see MOURNING CUSTOMS, § 1. The combination 'dust and ashes' (עָפָר וָאֵפֶר; cp also DUST) is found in Gen. 18 27 Job 42 6 (cp Ecclus. 10 9)—note the striking assonance פְּאֵר תַּחַת אֵפֶר Is. 61 3, 'instead of ashes a coronal'; cp Ewald's 'Schmuck statt

[1] See Ohnefalsch-Richter, *Kypros*, etc., Pl. lxxxiv. 3 and 7, where in precisely similar relations to the scene a carved post (supposed *ashera*) takes the place of a cypress tree.

[2] עץ is not only a ***tree***, but also a ***stake*** (Dt. 21 22 and often). That the trees depicted on Phœn. coins, etc., were called asheras (Pietschmann, *Phönizier*, 213) is merely inferred from the OT.

[3] The condemnation is based, not on the fact that the presence of these symbols presumes the worship of other gods, but on the principle that Israel shall not worship Yahwb as the Canaanites worship their gods (Dt. 12 2 *ff.*).

[4] In 2 K. 21 7, 'the image of the *ashera*,' the word *image* is a gloss; cp *v.* 3 and 2 Ch. 33 7. On 1 K. 15 13 and 2 K. 23 7, see above. In 1 K. 18 19 the 400 prophets of Ashera are interpolated (We., Klo., Dr.).

[5] We. G. Hoffmann, E. Mey., St., WRS, and others.

[6] This confusion is found in a still greater measure in the versions.

[1] Schr. *ZA* 3 364, and many. The name is once written with the common ideogram for the goddess IStar (Br. *Mus.* 33 obv. 13).

Schmutz.' 'Proverbs of ashes' (Job 13 12) is a symbolism of empty trifling sayings.[1]

To denote the 'ashes' of sacrificial victims the above word is found only in Nu. 19 9 *f.*, where the ashes of the burnt heifer are represented as endowed with the power of rendering clean or unclean the person who came into contact with them (cp Heb. 913). The usual term is דֶּשֶׁן *dešen*, prop. 'fatness,' which comes to be used of the ashes of the victims mixed with fat. From Lev. 1 16 **(P)** it would seem that these were placed on the east side of the altar, and afterwards removed to a place 'outside the camp' (*ib.* 4 12, cp 6 10 *f.* [3 *f.*] P).[2]

It is noteworthy that דֶּשֶׁן occurs only twice outside P : viz., Jer. 31 40 and 1 K. **13** 3 5 (the latter in a passage which is a late addition to the book; see KINGS, § 5, n. 1). פִּיחַ כִּבְשָׁן 'ashes (RV mg. 'soot'; cp Ges.-Bu.) of the furnace,' **Ex.** 9 8 10 (𝔊 αἰθάλη) is quite obscure; see **FURNACE.** Σποδός, 𝔊's usual rendering of אֵפֶר (cp also in NT *l.c.* above), is found again in 2 Macc. 13 5, in connection with the tower full of ashes at Berea (2) wherein Menelaus met his death. Τέφρα (of which the verb τεφρόω, 'to turn to ashes,' is used in 2 Pet. *26* of Sodom and Gomorrah) is found only in Tob. 6 16 8 2, 'ashes of perfume' (or 'incense,' RV) and Wisd. 2 3, 'our body shall be turned to ashes.'

ASHHUR (so RV); AV ASHUR (אַשְׁחוּר, § 81, originally 'man of Horus' [on this class of names see also ELIDAD]; in 1 Ch. 2 24, ασχω [B], ασδωδ [A], ασσωρ [L]; in 4 5 σαρα [B], ασχουρ [A], ασσωρ [L], *ASHUR, ASSUR*), mentioned apart from the more important branches of Hezron—Jerahmeel, Ram, and Chelubai (Caleb)—as a posthumous child (*1* Ch. 2 24 4 5), father of Tekoa (see JUDAH).

ASHIMA (אֲשִׁימָא ; ασ[ε]ιμαθ [BA], ασεναθ [L]). a Hamathite deity (2 K. 17 30†). On the true form of the name (cp 𝔊) and its meaning, see HAMATH.

ASHKELON (אַשְׁקְלוֹן, deriv. unknown, ασκαλων [BℵAL]:[3] ethnic אַשְׁקְלוֹנִי, -[ε]ιτης, Ashkelonite, Josh. 13 3 RV, AV ESHKALONITE); mod. *'Askalān* [with initial ע]), one of the five cities of the Philistines, the only one (it is generally held)[4] just on the sea coast (cp Jer. 47 7), lies 12 m. N. from Gaza. The site is a rocky amphitheatre, with traces of an old dock, filled with Herodian and Crusading ruins. It has no natural strength; its military value seems to be due to its command of the sea, though the harbour was small and difficult of access.

Under the Egyptian rule Ashkelon was a fortress; letters from its governor Jitia appear in the Amarna correspondence (Am. Tab. 211 *f.*), and Abd-ḫiba of Jerusalem complains that the territories of Asḳaluna and Gazri have joined in the alliance against him (*ib.* 180, 14). Ashkelon seems to have revolted from Rameses II. (WMM, *As. u. Eur.* **222**; cp EGYPT, § 58), and from Meneptaḥ (see EGYPT, § **60**, n.); but it was reconquered by them.[5] The storming of the city is represented on a wall of the Ramesseum at Thebes; the inhabitants are depicted in the sculptures with Hittite features.

Ashkelon is not enumerated among the towns of Judah in Josh. 15, and apparently in Judg. 1 18 also we ought, with 𝔊, to read a negative; cp Josh. 13 3. It was Philistine in the days of Samson (Judg. 14 19), Samuel (1 S. 6 17), David (2 S. 1 20), Amos (Am. 1 8), Zephaniah (2 4 7), and Jeremiah (Jer. 25 20 47 5 7), and in the Greek age (Zech. 9 5). It was taken by Sennacherib (Schrader, *KAT* [(2)] 165 *f.*, *Isḳaluna*), who deposed its king Ṣidḳa in favour of Šarludâri, son of Rukibti, **701** B.C. In the time of Ašurbānipal it had a king Mitinti.

The fish-goddess, Derketo (see ATARGATIS), had a temple to the east of the city on a tank, of which, between *el-Mejdel* and *'Asḳalān*, some traces still remain. After the conquest of Alexander the Great, Ashkelon became, like the other Philistine cities, thoroughly Hellenic; but, more prudent than they, it twice opened its gates to Jonathan the Maccabee (1 Macc. 7086 11 60), and again to Alexander Jannaeus. It was the birthplace of Herod the Great, who gave it various buildings (Jos. *BJ* i. 21 11); and was afterwards the residence of his sister Salome (Jos. *BJ* ii. 63). It is said to have been 'burnt to the ground' by the Jews in their revolt against Rome (Jos. *BJ* ii. 18 1), but then to have repulsed the enemy twice (*cl* iii. 2 12). **In** Roman times it was a centre of Hellenic scholarship; and under the Arabs, who called it the 'Bride' and the 'Summit of Syria,' was a frequent object of struggle. It was taken by the Christians in 1154; retaken by Saladin in **1187**; dismantled and then rebuilt by Richard in **1192** (cp Vinsauf, *Itin. Ricard.* 54 *ff.*); and finally demolished in **1270**. There are considerable ruins, which have been described by Guérin (*Jud.* 2 153-171), and, best and most recently, by Guthe (*ZDPV* 2 164 *ff.*, with plan; cp *PEF Mem.* 3 237-*247*). The neighbourhood is well watered and exceedingly fertile, the *Ascalonia cæpa*, scallion (shallot) or onion of Ascalon, being among its characteristic products. See, further, PHILISTINES, and, for Rabbinical references, Hildesheimer, ***Beitr.*** *zur Geogr. Palästinas*, 1 *ff.* **G.** A.S.

ASHKENAZ (אַשְׁכְּנַז ; ασχαναζ [BADEL]; *ASCENEZ*). The people of Ashkenaz are mentioned in Gen. 10 3 and (ασχενεζ [A]) in ‖ 1 Ch. **16** in connection with Gomer; in Jer. 51 27† (ασχαναζεοι or -αιοι [BHA], ασκα. [Q]) after Minni. There is no occasion to connect their name with the proper name Askanios in Hom. *Il.* 2862 13793, nor with the Ascanian tribes in Phrygia and Bithynia, and infer that the original home of Ashkenaz was in Phrygia (Lenormant, E. Meyer, Di.). Rather Ashkenaz must have been one of the migratory peoples which in the time of Esar-haddon burst upon the northern provinces of Asia Minor, and upon Armenia. One branch of this great migration appears to have reached Lake Urumiyeh; for in the revolt which Esarhaddon chastised (*1* R 45, col. 2, 27 *ff.*), the Mannai, who lived to the SW. of that lake, sought the help of Išpakai 'of the land of Ašguza,' a name (originally perhaps Ašgunza) which the scepticism of Dillmann need not hinder us from identifying with Ashkenaz, and from considering as that of a horde from the north, of Indo-Germanic origin, which settled on the south of Lake Urumiyeh. (See Schr. *COT* 2 *293*; Wi. *GBA* **269**; ***AF*** 6 488 491; similarly Friedr. Del., Sayce, Knudtzon.) T. **K.** C.

ASHNAH (אַשְׁנָה, ασνα [AL]), the name of two unidentified sites in the lowland of Judah; one apparently in the more north-easterly portion (Josh. 15 33 ασσα [B]), the other much farther south (15 43, ιανα [B], ασεννα [A], -σανν. [LIT).

ASH-PAN (מַחְתָּה), 1 K. 7 50 AV[mg.]; see CENSER, 2.

ASHPENAZ (אַשְׁפְּנַז, αβιεσδρι [𝔊[87]], [τω] ασφανεζ [Theod. BA]), chief of the eunuchs under Nebuchad-

---

[1] In 1 **K.** 20 38 41 it is almost certain that with RV we should point אֲפֵר instead of אֵפֶר (**AV** ashes) and render 'head-band'; see TURBAN.

[2] Hence the denominative דִּשֵּׁן, 'to clear away the fat-ashes' Nu. 4 13 **Ex.** 27 3, see ALTAR, § 13.

[3] Askalon and Ekron are confused in 𝔊 more than once; *e.g.*, 1 *S.* 5 10.

[4] [With regard to the site of Ashkelon proper, it is possible to hold that, like other Philistine cities, it lay a little inland. Antoninus Martyr (ch. 33, ed. Gildemeister, 23), indeed, in the sixth century A.D., expressly distinguishes it from the sea-side town, and in 536 A.D. a synodical letter was signed, both by the Bishop of Ascalon and by the Bishop of Maiumas Ascalon. According to Clermont Ganneau (see *Rev. archéol.* 27 368), the inland town was on the site represented by the modern villages, *Ḥamāmeh* and *el-Mejdel* (see Guérin, *Jud.* 2 129; Cl. Ganneau, *Arch.* Res. ***in Pal.*** 2 190). In a Greek translation of a lost Syriac text (published by Raabe) Ascalon appears to be described as bearing the name of πάλαια—*i.e.*, πέλεια (dove)—in allusion to the sacred doves of Astarte, and as being about 2 m. from the sea. The Ar. name *Ḥamāmeh* means dove. There are, however, two other theories respecting *el-Mejdel*, one of which possesses much plausihility (see MIGDAL-GAD).]

[5] Ascalon (Askalni) is one of the places in Palestine which Meneptah, on the Israel-stele, claims to have captured.

rezzar (Dan. 1 3). The current explanations are untenable,[1] and the cause is obvious. The name is corrupt, and has been brought into a delusive resemblance to Ashkenaz. An earlier form of the name, equally corrupt, and brought into an equally delusive resemblance to an ancient Hebrew name, is Abiezri (אביעזרי; see ABIEZER, 1); this is the form adopted by 𝔊. What is the original name concealed in these two apparently dissimilar forms? 𝔊 enables us to discover it by its reading, evidently more nearly accurate than that of MT in Dan. 1 11—καὶ εἶπεν Δανιὴλ Ἀβιεσδρὶ τῷ ἀναδειχθέντι ἀρχιευνούχῳ ἐπὶ τὸν Δανιήλ. . . . The MT indeed, in *vv.* 11 16, represents Daniel as communicating with a third person called Melzar, or 'the Melzar'; but a comparison of *vv.* 3 7-10 18 shows that this representation must be incorrect. It was the 'prince of the eunuchs' that Daniel must have addressed in *v.* 11; a slight transposition and a change of one point are indispensable (see MELZAR). We have now, therefore, four forms to compare; *(a)* אביעזרי, *(b)* אשפנז, *(c)* המלצר, and *(d)* משיצר[2] (Pesh. in *v.* 11). Of these, *(a)*, *(c)*, and *(d)*, virtually agree as to the last two letters (if in *a* we neglect the final י, which is not recognised in Syro-Hex. or by Ephrem). These letters are צר. Next, *(a)* *(b)*, *(c)*, and *(d)* agree as to the presence of a labial; the first two are for a mute, the others for a liquid. Also *(b)* and *(c)* attest a ל or a נ, and *(a)* and *(d)* a י, which might be a fragment of a ל, while *(b)* and *(d)* present us with a ש, of which the ע in *(a)* looks like a fragment. Next, *(a)* *(b)*, and *(c)* attest an א or a ה, and lastly, *(a)* *(c)*, and *(d)* agree as to ר. The almost inevitable conclusion is that the name of the chief eunuch was בלשאצר, commonly pronounced Belshazzar. This is not the only occasion on which the name Balšarezer (= Belshazzar) has suffered in transmission (see BILSHAN, SAREZER). T. K. C.

ASHRIEL (אַשְׂרִיאֵל), 1 Ch. 7 14 AV, RV ASRIEL.

ASHTAROTH (עַשְׁתָּרוֹת—*i.e.*, Ashtoreth in her different representations;—ασταρωθ [BAL], -ταρω. [B[b] Josh. 9 10], ασθαρωμ [A Josh. 13 31]; the adjective is Ashterathite, עַשְׁתְּרָתִי, ο ασταρωθ[ε]ι [BA], θεστ. [א], εσθαρωθι [L], 1 Ch. 11 44), Ashteroth-Karnaim (עַשְׁתְּרֹת קַרְנַיִם; ασταρωθ καρναιν [A], -τερ. καιν. [E])—*i.e.*, 'Ashtaroth of the two horns'?—'Ashtaroth of (=near) Karnaim'?) in Gen. 14 5,[3] and Be-eshterah (בְּעֶשְׁתְּרָה, *i.e.*, בֵּית עֶשְׁתְּרָה, or 'house of Astarte'; βοσοραν [B], -ρρα [L], Βεεθαρα [A]) in Josh. 21 27, but עַשְׁתָּרוֹת simply in Dt. 1 4 Josh. 9 10 12 4 13 12 31, where it appears, along with Edrei, as a chief city of Og, king of Bashan; and in 1 Ch. 6 56 [71] (ασηρωθ [B] ραμωθ [A[a]]) as a Levitical city. Then, in Am. 6 13 (Grätz's restored reading) we have Karnaim as the name of a city E. of the Jordan taken by Israel, and in 1 and 2 Macc. Karnaim or Karnion as a city in Gilead with a temple of ATAXGATIS [*q.v.*] attached to it. The lists of Thotmes III. *(circa* 1650 B.C.) contain an 'A-s-ti-ra-tu (*RP*[(2)] 5 45; WMM, *As. u. Eur.* 162, 313; cp Ashtarti, Bezold and Budge, *Tell el-Amarna Tabl. in Brit. Mu.* 43, 64). Whether these names represent one place or two places is, on the biblical data, uncertain.

1. References.

It is significant, however, that Eusebius and Jerome (*OS*[(2)] 209 61 84 5 268 98 108 17) record the existence in their day in Batanea of two places called Astaroth-Karnaim, 'which lay 9 R. m. apart, between Adara (Edrei) and Abila' of the Decapolis; one of them, 'the city of Og,' (say) 6 R. m. from Edrei, the other 'a very large town of Arabia [in which] they show the house of Job'; and in the *Peregrinatio* of S. Silva of Aquitaine (4th cent.) Carneas is mentioned as the place where she saw Job's house. Now, at the present day there is a *Tell 'Ashtarah* on the Bashan plateau, on the W. of Ḥaurān, 21 m. E. of the Lake of Galilee (long. 36″ E., lat. 32° 50′ N.), 1900 ft. above the sea; and 2 m. N. lies El-Merkez, where the tombs of Job and his wife are shown, and there was the ancient Christian monastery of Job, while 1 m. farther N., at Sheikh Sa'd, is a basalt monolith, with Egyptian figures, known as Job's stone (see Erman, *ZDPV* 15 205-211). In this neighbourhood, then, must have lain one of the Ashtaroths of the OS. It does not suit the datum of the latter—'between Adara and Abila'; but this may be one of the not infrequent inaccuracies of the OS. From this Ashtaroth Eusebius places the other 9 R. m. distant. Now, 6 R. m. S., near the W. el-Ehrēr (the upper Yarmūk), lies Tell el-Ash'ari, which some (like van Kasteren) take as the second Ashtaroth.[3] This, Buhl (*Geog.* 249) prefers to find 8 R. m. S. of Tell 'Ashtarah in Muzeirib, the great station on the *Ḥaj* road, with a lake and an island with ruins of pre-Mohammedan fortifications. A market has been here since the Middle Ages, and the place must have been important in ancient times. Moreover, it suits another datum of the OS. in lying about 6 R. m. from Edrei.

2. The OS sites.

Much more difficult is the question of identifying any of these sites, or the two Ashtaroths of the OS., with the corresponding names of OT. Names in this part of Palestine have always been in a state of drift. That Tell 'Ashtarah is the 'Ashteroth Karnaim of Gen. 14 5 or the 'Ashtaroth of other texts has in its favour, besides its name, the existence of a sanctuary, even though this has been transferred in Christian times to Job. On the other hand, Muzeirib must have been of too great importance not to be set down to some great place-name of the OT; and its accessibility from Edrei suits the association, frequent in the OT, of the latter with Ashtoreth. As to the Karnaim of 1 Macc. 5 26 (which, of course, is the same as the Karnaim of Am. 6 13), it cannot have been Muzeirib, as Buhl contends, for in such a case the lake would certainly have been mentioned in connection with the assault of Judas upon it (a lake is mentioned near Caspis or CASPHON [*q.v.*] which Judas took previously); and in 2 Macc. 12 21 Karnion is said to be difficult to get at διὰ τὴν πάντων τῶν τόπων στενότητα. This does not suit Muzeirib, or Tell 'Ashtarah, or Sheikh Sa'd. Furrer, therefore, has suggested for Karnion *Ḳrēn* or *Grēn*, the Agræna of the Romans, in the inaccessible *Lejā*. Till the various sites have been dug into and the ancient name of Muzeirib is recovered, however, we must be content to know that there was an 'Ashteroth Karnaim near *Tell 'Ashtarah*, and that possibly there was a second site of the same name in the same region in OT times.

3. OT sites.

On the whole subject see especially *ZDPV* xiii. xiv. and xv., Schumacher, *Across the Jordan* (203-210), and Buhl, *Stud. zur Topogr. des N. Ostjordanlandes*, 13 *ff.*, Pal. 248-250; also Moore, *JBL* 16 155 *ff.*, and, for an Egyptological explanation of the name 'Ashtoreth of the two horns,' WMM, As. *u. Eur.* 373. *G. A. S.*

ASHTORETH (עַשְׁתֹּרֶת), a goddess of the Canaanites

[1] For example, Halévy compares Pers. *aspanj*, 'hospitium' (*JAs.*, 1883, 2 282 *f.*); Nestle too explains 'hospes' from the Armenian (*Marg.* 38). Frd. Del. and Schr. offer no explanation.

[2] If we adopt the form מניצר, a slight difference in the summation will be the result.

[3] Here it is described as the abode of the Rephaim at the time of the invasion of Chedorlaomer. Or were there two neighbouring cities? Kuenen, Buhl, and Siegfr.-St. read 'Ashtaroth *and* Karnaim,' claiming 𝔊[L] as on their side. Probably, however, the right 𝔊 reading is Ασταρωθ Καρναιν [AL] (see Nestle, *Marg.*). Moore explains 'the Astarte of the two-peaked mountain'; see especially G. F. Moore, *JBL* 15 6 *ff.* ('97), and cp col. 336, n. 3.

[1] *Sab* Αστ. Καρναειν. [2] *Sub* Καρναειμ.

[3] So Schumacher. 'The double peak of the southern summit of *Tell el-'Ash'ari*, formed by the depression running from N. to S., would make the appellation of Karnaim, or "double-horned," extremely appropriate' *(Across Jordan*, 208). In a Talmudic discussion as to the constructions for the Feast of Booths it is said that Ashteroth Karnaim was situated between two mountains which gave much shade (*Succa*, 2*a*; cp Neub. *Géog.* 246). Many regard this statement as purely imaginative.

and Phœnicians. The Massoretic vowel-pointing, which

1. Name.

is followed by EV, gives the word the vowels of *bōsheth*, 'scandalous thing' (cp Molech for Melek); the true pronunciation, as we know from the Gr. Ἀστάρτη (so even 𝔊^BAL; alongside of ασταρωθ [BAL]) and from Augustine,[1] was "Ashtart.' In the OT the name in the plural (the *'Ashtārōth*) is coupled with the Baals, in the general sense, 'the heathen gods and goddesses,'[2] a usage with which the Assyrian *ilāni u-ištarāti* is compared. Solomon is said to have built on the Mt. of Olives (1 K. 11 5, cp 33) for the Phœnician 'Ashtart a high place, which was destroyed more than three centuries later by Josiah (2 K. 23 13).

Of the character of this goddess and her religion we learn nothing directly from the OT. Her name does

2. Character.

not occur either in the prophets or in historical texts in any other connections than those cited above; it is nowhere intimated that the licentious characteristics of the worship at the high places were derived from the cultus of Astarte. The weeping for Tammuz (Ez. 8 14), which Cyril of Alexandria and Jerome identify with the Phœnician mourning for Adonis (so 𝔊^Q.mg.), was more probably a direct importation of the Babylonian cult.[3] This is doubtless true also of the worship of the 'Queen of Heaven' (Jer. 7 18 [𝔊^BℵAQ τῇ στρατιᾷ τοῦ οὐρανοῦ], 44 17 *ff.*), whatever the name may mean (see QUEEN OF HEAVEN). The law which forbids women to wear men's garments, or men women's (Dt. 22 5), may be aimed at obscene rites such as obtained in the worship of many deities in Syria and Asia Minor, but need not refer specifically to the cult **of** Astarte.

Many inscriptions from the mother-country and its colonies, as well as the testimony of Greek and Latin

3. Varying forms.

writers, prove the prominent place which the worship of Astarte had among the Phœnicians; Egyptian documents place the "Ashtart of the Hittite country' by the side of the 'Sutech of Heta,' the principal male divinity; the Philistines deposited Saul's armour as a trophy in the temple of 'Ashtart (1 S. 31 10 𝔊^BAL το ασταρτ[ε]ιον), perhaps the famous temple at Ashkelon of which Herodotus writes (I 105);[4] the stele of Mesha, king of Moab (9th cent. B.C.), tells how he devoted his prisoners to Ashtar-Chemosh; a city in Bashan often mentioned in the OT bears the name Ashtaroth (cp also Ashteroth Karnaim, Gen. 14 5, and Beeshterah, Josh. 21 27; see ASHTAROTH). 'Ashtart was worshipped in Babylonia and Assyria under the name IStar (considerable fragments of her myth have been preserved); in Southern Arabia as 'Athtar (masc.); in Abyssinia as 'Astar;[5] in Syria as 'Atar or 'Athar (in proper names: cp ATARGATIS [*q.v.*] = Derĕto). The Arabs are the only Semitic people among whom we do not find this deity; and even here it is possible that al-Lāt and al-'Uzza were originally only titles of Astarte. The normal phonetic changes in the word show that the worship of Astarte did not spread from one of these peoples to the others, but was common to them before their separation. The fem. ending is peculiar to the Palestinian branch of the race, and, as has been observed, in Southern Arabia 'Athtar was a god, not a goddess.

Unlike Baal, Astarte is a proper name; but under this name many diverse divinities were worshipped. The IStar of Arbela was recognised by the Assyrians themselves as a goddess different from the IStar of

1 *Quæst. 16 in Jud.*, Estart, Astart. Confirmatory evidence is given by the Egyptian transcription.
2 Judg. 2 13 **10 6** 1 S. 7 3 (𝔊^BAL τὰ ἄλση) **4** 12 10 (𝔊^BAL τοῖς ἄλσεσιν); all belonging to the later elohistic (E_2) or deuteronomic school.
3 The identification of **Tammuz** with Adonis is found also in Melito (Cureton, *Spicil.* 25). The connection of the myths *is* unquestioned. See TAMMUZ.
4 It is, of course, not to **be** inferred that the Philistines worshipped Astarte before they invaded Palestine. The temple was an old Canaanite sanctuary.
5 Halévy's discovery is confirmed by the recent publication of the Axum inscriptions.

Nineveh; the IStar of Agadè from the IStar of Urk (see ASSYRIA, § 9, BABYLONIA, § 26). The inscription of Eshmunazar shows that more than one 'Ashtart had a temple in Sidon; and we know many others. Whether these differences are only the consequence of natural divergence in the worship of the primitive Semitic deity, in the immense tract of time and space, or, as is altogether more probable, in great part due to the identification of originally unconnected local *numina* with Astarte, the result is the same:[1] there were many Astartes who were distinguished from one another by character, attributes, and cultus—a class of goddesses rather than a single goddess of the name.[2]

Astarte was often the tutelary divinity of a city, its 'proprietress' (*ba'alat*); and then, of course, its protectress and champion, a warlike god-

4. Character.

dess. On the other hand, she was a goddess of fertility and reproduction, as appears strikingly in the myth of the descent of IStar. These two characters might be attributed to different Astartes, as among the Assyrians (cp the Aphrodites); but they might also coexist in one and the same goddess, and this is doubtless the older conception.

The figures from Babylonia and Susiana, as well as from Phœnicia and Cyprus, which are believed to represent Astartes, express by rude exaggeration of sexuality the attributes of the goddess of generation.[3] That the cultus-images of Astarte were of similar types is not probable. At Paphos she was worshipped in a conical stone, and many representations show the evolution from this of a partially iconic idol.

In the astro-theology of the Babylonians the planet Venus was the star of IStar. It is a common but ill-founded opinion that in Palestine Astarte was a moon goddess. The name of the city, Ashteroth Karnaim, is often alleged in support of this theory. Even if the translation, 'the horned Astarte,' be right, however, it is a very doubtful assumption that the horns represented the crescent moon—it is quite as natural to think of the horns of a cow or a sheep, or of an image of the goddess made after an Egyptian type (see EGYPT. § **13**);[4]—and it is a still more unwarranted assumption that Astarte was elsewhere in Palestine represented in the same way. It would be a much more logical inference that the horns were the distinctive attribute of this particular Astarte.[5] The other testimony to the lunar character of Astarte is neither of an age nor of a nature to justify much confidence (*De dea Syr.* 4; Herodian, v. 6 4). The point to be insisted on is that the widely accepted theory that Astarte was primarily a moon goddess, by the side of the sun god, Baal, has as little foundation in the one case as in the other.

In Dt. 7 13 'the *'ashtārōth* of the flocks' are parallel to the 'offspring of the herds,' from which it has been ingeniously argued that among the nomadic Semites Astarte was a sheep-goddess (WRS, *Rel. Sem.*(2) 310, and 469 *ff.*); but this also seems hazardous.

Of the cultus of Astarte we know comparatively little. Religious prostitution (Hdt. 1 199; Strabo xvi. 1 20;

5. Cultus.

Ep. Jerem. 42 *f.* [Bar. 6 42 *f.*]; *De dea Syr.* 6, etc.) was not confined to the temples of Astarte, nor to the worship of female divinities. Nu. 25 1-5 connects it with Baal-peor; Am. 2 7 Dt. 23 18 (17), etc., show that in Israel similar practices infected even the worship of Yahwè. There is no doubt, however, that the cultus of Astarte was saturated with these abominations.

1 In **the** period from which most of our monumental evidence comes, still another cause must be recognised: syncretism with the Egyptian religions (see **EGYPT, § 16**).
2 This use predominates in Hebrew, which has, indeed, no other word for 'goddess'; but, as has been remarked above, it is found io Assyrian also.
3 Heuzey, *Rev. Archéol.* xxxix., 1880, p. 1 *ff.*; Ohnefalsch-Richter, *Kypros*, etc. On the origin of this type *see*, however, S. Reinach, *Rev. Archéol.* 3 sér. 26, 1895, p. 367 *ff.*
4 Cp the representation of Baalat of Byblos, *CIS* 1 1, Pl. I.
5 On Ashteroth Karnaim see *JBL* 16 155 *ff.*

The origin and the meaning of the name are obscure; but this is hardly a sufficient reason for supposing that the most universally worshipped of Semitic divinities was of non-Semitic extraction (see Haupt, *ZDMG* **34** 758): The relation between Astarte and Aphrodite is an interesting and important question, npon which we cannot touch here.

ASHUR (אַשְׁחוּר), 1 Ch. 2 24 AV, RV ASHHUR.

ASHURITES, THE (הָאֲשׁוּרִי, TON θACEIPEI [B], θACOYP [A], EZPI [L; 'Jezreel' follows]), arementioned in 2 Sam. 2 9† among various clans subject to the authority of Ishbaal. Pesh. Vg. read הַגְּשׁוּרִי, the Geshurites, which is accepted by some (see GESHUR), while others (Kamph. Ki. Klo. Gr.) follow the Targ. (על דבית אשר, cp 𝔊B) and read הָאָשֵׁרִי (cp Judg. 1 32)—*i.e.*, 'the Asherites,' whose land lay to the W. of Jordan above Jezreel, which is mentioned next, the enumeration proceeding from N. to S.

ASHVATH (עַשְׁוָת; ACEIθ [BA], -COYAθ [L]), in a genealogy of ASHER (*q.v.*, § 4 ii.), 1 Ch. 7 33†.

ASIA (H ACIA [Ti.WH]). Great uncertainty prevailed during the apostolic period as to the usage of the names of the districts of Asia Minor. 'The boundaries of several of the districts had long been uncertain—those between Mysia and Phrygia were proverbially so (Strabo, 564). 'This confusion arose from the fact that the names denoted ethnological rather than political divisions, and belonged to diverse epochs. They are like geological strata, which are clear enough when seen in section but impossible to disentangle when represented on a single plane. A further complication arose when the Romans imposed npon the country the provincial system. The official nomenclature was applied without any account being taken of the older history or of ethnical facts or popular usage. In the case of Lycia, Bithynia, or Pamphylia there was no distinction of any moment between the old and the new usage; but in the case of Galatia and Asia the difficulty of distinguishing the precise sense of the names is very great.

The province of Asia was formed in 133-130 B.C. when Attalus III. of Pergamus left his kingdom by will to Rome; the name Asia had early come into use because there was no other single term to denote the Ægean coast lands. The area of the province was subsequently increased, first by the addition of Phrygia (116 B.C.); we are, therefore, confronted by the difficulty of distinguishing whether, in any given case, the word Asia is restricted to the coast or extended to the entire province—in other words, whether it includes Phrygia or not.

In Acts 2 9, Asia indicates the towns of the highly civilised coast land, for the enumeration is popular and Greek in style, *as* is proved by the mention of Phrygia alongside Asia: according to the Roman mode of speaking, Phrygia was included in Asia, with the exception of that small part round Antioch (Phrygia Galatica) which fell to the province Galatia. Such names *as* Phrygia, Mysia, or Lydia were to a Roman without any political significance, being merely geographical terms denoting parts of the province of Asia, used on occasion to specify exactly the region referred to by the speaker (Cic. *pro Flac.* xxvii. § 65; Asia vestra constat ex Phrygia, Mysia, Caria, Lydia). Such use can be paralleled from the NT. In Acts 16 7 *κατὰ τὴν Μυσίαν* [Ti. WH] is used to define rigidly the point reached by the apostles when warned from Bithynia. In Acts 6 9, a decision is more difficult. The Jews who 'disputed' with Stephen were probably those educated in the schools of Smyrna or Pergamns; but we cannot on *a priori* grounds decide that some of them did not belong to Phrygia. Here therefore, Asia may or may not he used in its Roman sense: So also in Acts 21 27 = 24 18.

The whole question of the sense in which geographical terms are used by the writer of Acts centres round Acts 16 6, where the apostles are forbidden to preach in Asia (*κωλυθέντες . . . λαλῆσαι τὸν λόγον ἐν τῇ Ἀσίᾳ* [Ti. WH]). Those interpreters (*e.g.*, Con. and Hows. 1 324) who take the preceding words (*διῆλθον δὲ τὴν Φρυγίαν καὶ Γαλατικὴν χώραν* [Ti. WH]) to express the opening up of new ground by missionary enterprise N. of Antioch in Pisidia are compelled to restrict the prohibition of preaching in Asia to the coast land—in other words, to take Phrygia, Galatia, and Asia in their popular noli-Roman sense—for all Phrygia N. of Antioch belonged to Asia in its Roman or administrative sense. Yet we must ask if the simple *διῆλθον* (AV 'gone throughout') can be taken to imply preaching.[1] If, however, the apostles did not preach in their passage through the district called here *ἡ Φρυγία καὶ Γαλατικὴ χώρα*, there appears to be no necessity for giving a *popular* meaning to the geographical terms here used, unless in the interests of what Ramsay calls the N. Galatian theory (see GALATIA, §§ 7-30, especially §§ 9-16). On this view, then, the words indicate such parts of Galatic Phrygia as had not been traversed at the time of receivihg the prohibition (or, more probably, that part of Phrygia which belonged to the province Asia), together with Old or North Galatia. In favour of this is the fact that the part. *κωλυθέντες* must be prior in time to, *i.e.* contain the ground of, the action denoted by *διῆλθον*,—'they traversed . . . *because* they had been forbidden.' If, in face of the difficulties of the N. Galatian view, we fall back upon the S. Galatian theory, the district *ἡ Φρυγία καὶ Γαλατικὴ χώρα* must be regarded as partly identical with that called *τὴν Γαλατικὴν χώραν καὶ Φρυγίαν* in Acts 18 23 (which can hardly be other than that of the S. Galatian churches); and also it must already have been traversed wholly or in part *before* the prohibition to preach in Asia (Rams. *Expos.* May **1895**, p. 392; *Church*, 5 ed. p. 75). Ramsay consequently attempts to interpret the words *διῆλθον κωλυθέντες* as = *διῆλθον καὶ ἐκωλύθησαν* (*διελθόντες ἐκωλύθησαν*), or on purely subjective grounds adopts, with Lightfoot, the reading *διελθόντες δὲ* from inferior MSS (*St. Paul*(1), p 195). It seems better to take *διῆλθον δὲ* as resumptive and as summing up the previous verses, with an ellipse—' so then they traversed . . . (neglecting Asia) having been forbidden': in which case, here, as elsewhere throughout the narrative of Paul's journeyings, the word Asia is used in its technical, Roman, sense.

This sense is clearly the best in the following passages:—during Paul's residence in Ephesus, 'all they which dwelt in Asia heard the word of the Lord Jesus' (Acts 19 10; see also *vv.* 22, 26 *f.*). The deputies escort the apostle from Corinth as far as Asia (Acts 20 4); other instances in the same chap. *are vv.* 16 (Ephesus was virtually capital of the province) and 18. In 27 2 *κατὰ τὴν Ἀσίαν τόπους* [Ti. WH], there is nothing to forbid our taking the word in its Roman sense. Similarly, in the Epistles, the technical sense is required—*e.g.*, Rom. 16 5, Epænetus the first-fruits of Asia (RV); 1 Cor. 16 19, the churches of Asia; 2 Cor. 1 8, (probably) alluding to the riot at Ephesus, or to dangerous illness there; 2 Tim. 1 15. The Roman province is meant also in 1 Pet. 1 1, where the enumeration Pontus, Galatia Cappadocia, Asia, Bithynia (= Bithynia-Pontus) sums up all 'Asia Minor within the Taurus. Finally, in Rev. 1 4, the seven churches of Asia are those established in the chief towns of the Roman province. In 1 Macc. 8 6 'Antiochus, the great king of Asia,' the word is used in a wide; sense = Asia Minor, with Syria (*so* also 11 13, 'the diadem of Asia'; 12 39 13 32 2 Macc. 3 3: cp Jos. *Ant.* xii. 3 3 18 4 7). In 2 Esd. 15 46, 'Asia, that art partaker in the beauty of Babylon,' the sense is still wider = Persian empire (16 1; cp Herod. i. 96 177; **Jos.** *Ant.* xi. 8 3). W. J. W.

ASIARCR (OI ACIAPXAI [Ti. WH], AV 'the chief of Asia'; RV 'chief officers of Asia'). An officer

[1] See Acts 15 41, *διήρχετο*, **but** with *ἐπιστηρίζων* added; 16 4, *διεπορεύοντο*, but with *παρεδίδοσαν* added. On the other hand we have 13 14, *διελθόντες ἀπὸ τῆς Πέργης*—no preaching on the road; and 17 1, *διοδεύσαντες τὴν Ἀμφίπολιν καὶ τὴν Ἀπολλωνίαν* [Ti. WH], where also there was no attempt at evangelisation, so far as we can tell. (But see Rams. *Expos.* May 1895, p. 385 *f.*)

heard of only once in the NT—viz., in the account of the riot made by 'Demetrius and the craftsmen' at Ephesus (Acts 19 31). The annual assembly of civic deputies (*κοινὸν 'Ασίας*), over which he presided, was combined, in Asia, as in other provinces, with an annual festival in honour of the reigning emperor and the imperial system.

Soon after the victory of Actium, in fact as early as 29 B.C., Augustus had allowed temples to himself and Roma to be dedicated in Pergamus, the *de jure* capital of Asia, as well as in Nicomēdeia and Ancyra, the capitals respectively of Bithynia and Galatia (Tac. *Ann.* iv. 37 4). This blending of a religious with an administrative institution became a leading idea of the imperial policy; but, as regards the pomp of the festivals and the civic rivalries excited, the institution nowhere developed as it did in Asia. Naturally, the conduct of the games and festival in honour of the emperor fell to the president of the provincial Diet.

As the Asiarch bore most of the expense, though some was borne by voluntary subscription or apportioned to the several towns, this politico-religious office was open only to the wealthy—the prosperity of Tralles, for example, was shown by its continuous series of Asiarchs[1]—and the title was retained after the expiration of the year of office. To find Paul counting friends among the Asiarchs—*i.e.*, among those who then held or who previously had held the office—throws, therefore, a valuable side-light upon the attitude adopted towards Christianity by the upper classes of the provincials: it was an Asiarch, Philip, who at Smyrna resisted the cry of the mob to 'let loose a lion on Polycarp' (Eus. *HE* 4 15, § 27).

It would be a mistake, then, to imagine that the Asiarch, as such, had any connection with the Ephesian worship of *Artemis*.

In fact Ephesus, like Milētus, was expressly rejected by Tiberius as a claimant for the honour of an imperial temple, probably because of the risk of Cæsar's worship being overshadowed by the local cult (Tac. *Ann.* iv. 55 6). It would naturally, however, have the right to put forward a candidate for the Asiarchate. We hear of similar officers in other provinces—*e.g.*, a Galatarch, a Bithyniarch, a Syriarch, and a Lyciarch. The last at any rate is clearly originally a political officer—the head of the League (Straho, 665).

There was thus, at first, but one Asiarch in office at a time in all Asia—the president of the Diet at Ephesus; but as temples dedicated to Caesar multiplied in the province,[2] and each of them became the centre of an annual festival, the chief priests at such temples performed the functions discharged at the festival at Ephesus by the Asiarch, and finally the presidency of the festival even at Ephesus was taken from the chairman of the Diet and given to the chief priest. The Diet and its civil functions thus fell into the background, and the name Asiarch came to mean the priestly provider of a popular festival in connection with the worship of a dead or reigning emperor. With the growing importance of *this* worship the religious influence of the priestly Asiarchs extended; and as the worship of the emperor became the outward sign of loyalty to the empire, it was through the provincial chief-priesthoods that the old and the new faith came into contact. Hence Julian writes to the Galatarch as the proper medium for his anti-Christian propaganda. (See Momms. *Provinces*, 1 344 fol. ET, Rams. *Class. Rev.* 3 174. A different view in a long article by Brandis in Pauly's *R. Enc.* new ed. *s.v.*). W. J. W.

ASIBIAS (ασεβειας [B], ασιβιας [A], μελχιας [L]), in the list of those with foreign wives (see EZRA, i. § 5, end), 1 Esd. 9 26 = Ezra 10 25 (σαβια [א], α. [A], B om.). See MALCHIJAH, 5. Asibias is probably a Græcised form of HASHABIAH.

ASIEL (עֲשִׂיאֵל, § 31; ασιηλ [BAL]). 1. A name in the genealogy of SIMEON (1 Ch. 4 35).

[1] *καὶ δεῖ τινες ἐξ αὐτῆς εἰσιν οἱ πρωτεύοντες κατὰ τὴν ἐπαρχίαν, οὓς 'Ασιάρχας καλοῦσιν* (Strabo 649).

[2] Already in 26 A.D., for example, a temple was erected in Smyrna to Tiberius, jointly with his mother **Livia**, and the Senate (Tac. *Ann.* iv. 15 4 56 3).

2. A scribe, 4 Esd. 14 24 (*ASIHEL*).

3. Tob. 1 1 RV, AV ASAEL (*q.v.*).

ASIPHA (ασειφα [A]), 1 Esd. 5 29 = Ezra 2 43, HASUPHA.

ASKELON (אַשְׁקְלוֹן), Judg. 1 18 AV, RV ASHKELON.

ASMODEUS, RV **Asmodæus** (ασμοδαυς [B], -δαιος [אA], -δεος *[K]*), called 'the evil demon' (Tob. 3 8, 17). Considering (1) the close connection of the story of Tobit with Media, (2) the affinity of the seven archangels in Tob. 12 15 to the seven Mazdean Ameshaçpentas, and (3) the impossibility of deriving Asmodēus or Asmodai (or the later Hebrew fcrms, on which see below) from אִשְׁמֵד, 'to destroy,' we are obliged to look for an arch-demon of similar name and attributes in Mazdean demonology. The Asmodēus of Tobit has two attributes: he is lustful (like a satyr), and has the power to slay those who oppose his will (Tob. 3 8 6 15 𝔊[BA]). Now, it is true that there is no demon in Mazdeism of similar name who has exactly those characteristics; but one of the seven arch-demons who are opposed to the seven Mazdean archangels is called Aêshma, and is the impersonation of anger (the primary meaning) and rapine. So constantly is he mentioned in the Avesta beside Angra Mainyu or Ahriman (with his weapon 'the wounding spear') that we could not wonder if he became naturalised in the spirit-world of the Jews in the Persian period. Once adopted, he would naturally assume a somewhat different form; his attributes would be modified by the sovereign will of the popular imagination. This was actually the course of history, as modern critics hold. By the time the Book of Tobit was written Aêshma had already a well-defined *rôle*, and, though vindictive as ever, had exchanged the field of battle for less noble haunts. The Asmodai of Tobit is, in fact, the counterpart of LILITH (*q.v.*), and in still later times divided with her the dominion of the *shēdīm* or demons. Asmodai, or, as his name is written in Targ. and Talmud, אשמדאי or אשמדיי, was as dangerous to women as Lilith was to men, though we also find him represented in a less odious character as a potent, wise, and sometimes even jocular elf (see *Gittim*, 68*a*, in Wunsche's Der *bab. Talm.* 2 180-183). The second part of the name Ashmodai is of uncertain origin. Most connect it with the Zend *daêva*, 'demon'; but, though the combination *Aêshmô daêvô* is not impossible, it is nowhere found in the texts. Kohut's explanations (*Jüd. Angelologie* and *Aruch*, s.v.) are precarious.

Cp *Zendavesta and Pahlavi Texts* in *SBE*; Spiegel, *Erân. Alterthumskunde*, 2 131 *f.*; Grünbaum, *ZDMG* 31 204, etc.; Kohut's *Jüd. Angelologie*, 72, etc. T. K. C.

ASNAH (אַסְנָה, 'thornbush'; ασενα [BA]; -ννα [L]; *asena*). The Bne Asnah, a family of NETHINIM in the great post-exilic list (see EZRA, ii. § 9), Ezra 2 50 = 1 Esd. 5 31, ASANA (*ασσανα* [B], *ασα.* [A]) = Neh. 7 52 𝔊[L] (EV, following BKA, om.).

ASNAPPER, RV OSNAPPAR, better Āsĕnappar (אָסְנַפַּר; νασφαρ [A], ασενν. [B], σαλμανασσαρης [L], *ASENAPHAR*), Ezra 4 9 *f.* To 'the great and noble Āsĕnappar' is ascribed the transplanting, of several nations into Samaria from beyond the Euphrates. The two epithets naturally suggest that an Assyrian king is referred to, and, as Bosanquet in G. Smith's *Hist. of Assurbanipal*, 364 ['71], suggested, the king can only be the conqueror of Susa—Ašur-bāni-pal (אסנפר from אסר־בנ־פל = אס(רב)נפל).[1] This view is confirmed by the discovery (due to Marq. *Fund.* 59) of a various reading for אסנפר which underlies the impossible ASBACAPHATH (*q.v.*) of 1 Esd. 5 69, viz. אסרפר. The two readings supplement each other, and are explained by a common original אסבנפר, which is clearly Ašur-bāni-pal. This great king's name must have stood both in Ezra 4 2

[1] An explanation, in the form which Gelzer gave to it (*ÄZ* 75 *ff.* ['75]), now widely accepted. Cp, however, Halévy, *REJ* ix. 12.

('Esarhaddon' being an ignorant scribe's alteration) and in the source from which the statement in Ezra 4 2 is derived (perhaps 2 K. 17 24, which at present merely refers to 'the king of Assyria'). See further, AŠUR-BANI-PAL.

ASOM (ασομ [BA]), 1 Esd. 9 33 = Ezra 10 33, HASHUM.

ASP (פֶּתֶן, *pethen;* ασπις [BAL]) in Dt. 32 33 Job 20 14 16 (δρακων [BℵAC]) Is. 11 8 AV, in Ps. 58 4 91 13 AVmg. (βασιλισκος [BNART]), and in Rom. 3 13†; probably some species of viper (cp ADDER, 2), see SERPENT, § 1, n. 5.

ASPALATHUS (ασπαλαθος [BRA]; *balsamum*) is associated with cinnamon and other perfumes in the Praise of Wisdom (Ecclus. 24 15). Theophrastus (*Hist.* 9 7) mentions it along with various spices, etc., used in making unguents, and in Pliny (*HN* 22 24) it is '*radix unguentis expetitæ.*' Fraas, the most recent writer on classical botany (*Synopsis Plantarum Floræ Classicæ*, 49), refers it conjecturally to *Genista acanthoclada*, D.C., a native of Greece and the Grecian archipelago; but the most that can safely be said is that it seems to have been a prickly shrub, probably leguminous, with a scented wood or root. The ante-Linnæan commentaries devoted much attention to it, but with no more definite result. It has evidently been lost sight of since classical times, and supplanted by other perfumes. W. T. T.-D.

ASPATHA (אַסְפָּתָא, φασγα [Bℵc.a], φιασγα [ℵ*vid.], φα. [A], φασα [L], one of the ten sons of HAMAN (*q.v.*) Est. 9 7. Pott and Benfey explain the name as the Pers. *aspadata*, 'ab equo sacro datus' (cp Be.-Rys.); but the MT reading is too insufficiently supported.

ASPHAR, THE POOL (λακκος[1] ασφαρ [ℵV; Jos.], λ. ασφαλ [A]; *lacus Asphar* [Vg.]), in the wilderness of Tekoa, is mentioned in connection with the struggle of Jonathan and Simon the Maccabees with Bacchides (1 Macc. 9 33; cp Jos. *Ant.* xiii. 1 2). The Be'ēr Asphar is probably the modern *Bīr-Selhūb*, a considerable reservoir in the wilderness, 6 m. WSW. of Engedi, and near the junction of several ancient roads (described by Rob. *BR* 2 202); the hills around still bear the name *Ṣafrā*, an equivalent of Asphar. A less probable identification is that with the ruins and cistern, *ez-Za'ferāneh* to the S. of Tekoa (Buhl, *Pal.* 158). G. A. S.

ASPHARASUS (ασφαρασος [BA]), 1 Esd. 5 8 = Ezra 2 2, MIZPAR.

ASRIEL (אַשְׂרִיאֵל, § 67, εσριηλ [BAL]; the patronymic is **Asrielite**, הָאַשְׂרְאֵלִי, -λ[ε]ι [BAF], εσρ. [L]), a Gileadite family, descended from Manasseh through Machir, Josh. 17 2 (ιεζειηλ [B], επι. [A]). Nu. 26 31 (εσρι. [L]). In 1 Ch. 7 14-19 (ασεριηλ [B], AV ASHRIEL; see MANASSEH), a very different Manassite genealogy, the name is probably dittography of the syllables immediately following (אשריל; cp also text of 𝔊B); read, 'The sons of Manasseh whom his concubine the Aramitess bare' (cp Gen. 46 20 𝔊). The name may be old, though it comes to us from late writers.

ASS (חֲמוֹר,[2] fem. אָתוֹן;[3] ονος [BAL]; *asinus, asina*), **Wild Ass** (פֶּרֶא or עָרוֹד = Chald. עֲרָד;[4] *ονος αγριος; onager*), and **Young Ass** (עַיִר, *πωλος* [BAL]).

The following are the passages: (*a*) for 'ass' Gen. 12 16 22 3 49 11 14 (𝔊 τὸ καλόν), Ex. 13 13 Nu. 22 28 Dt. 22 10 Judg. 5 10 (υποζυγιον [AL]) 15 15 2 K. 6 25 Is. 21 7 Zech. 9 9 (𝔊 υποζυγιον) Mt. 21 2 Lk. 13 15 etc.; (*b*) for 'wild ass' Job 6 5 11 12 (𝔊 ονος ερημιτης) 24 5 (𝔊 ονοι) 39 5 Ps. 104 11 (𝔊 οναγροι) Is. 32 14 Jer. 2 24 (𝔊 επλατυνεν) 14 6 Dan. 5 21 (𝔊 οναγρων) Hos. 8 9 (𝔊 om.) Gen. 16 12† RV (𝔊 αγροικος); there was perhaps originally a reference to the wild ass also in 1 S. 24 14 [15] 26 20, where MT now reads פַּרְעֹשׁ = FLEA [*q.v.*]. (*c*) For 'young ass' Is. 30 6 (𝔊 ονος), 24 (𝔊 βοες), EV 'foal' Gen. 49 11 32 16, EV 'colt' Zech. 9 9 and (𝔊 ονος) Job 11 12, EV 'ass colt' Judg. 10 4 12 14.

A comparison of the passages in which חמור and אתון respectively occur shows that the former was more used for carrying burdens and for agriculture, the latter for riding. Hence some have thought that אתון denotes a superior breed and not simply 'she-ass'; but this opinion is now given up. We must conclude that she-asses were preferred for riding. As the name חמור shows, the Eastern ass is generally reddish in colour;[1] *white* asses are rarer, and, therefore, used by the rich and distinguished. This explains the reference in Judg. 5 10.[2]

The עיר (young ass, colt, foal; in Ar. specifically wild ass; see Hommel, *Säugethiere*, 127 *ff.*) was used variously for carrying burdens (Is. 30 6), for agriculture (*v.* 24), and for riding on (Zech. 9 9). On Judg. 10 4 12 14, see JAIR. On the place of the ass and on its employment among the Jews see generally Jos. c. *Ap.* 2 7.

The ass has been from the most ancient times a domesticated animal, and probably, in Egypt at any rate, preceded the horse as a servant of man. It is even questioned whether the wild stock from which it was derived survives at the present day, some authorities holding that the flocks of wild asses met with in various parts of Asia and Africa are but the descendants of those which have escaped from the domesticated state.

The domestic ass, *Equus asinus*, is believed to be descended from the wild ass of Africa, *E. asinus*, of which there are two varieties, *Africanus* and *Somalicus*; and the strong disinclination to ford even narrow streams which these animals show, and their delight in rolling in the dust, are regarded as indications that their origin is from some desert-dwelling animal. In former times this species seems to have extended into Arabia.

In the East the ass plays a large part in the life of the people, and has received a corresponding amount of care at their hands. Much trouble is taken in breeding and rearing the young. Darwin distinguishes four different breeds in Syria: 'first, a light and graceful animal (with an agreeable gait), used by ladies; secondly, an Arab breed reserved exclusively for the saddle; thirdly, a stouter animal used for ploughing and various purposes; and lastly, the large Damascns breed, with . . . peculiarly long body and ears.'

The wild asses which roam in small herds over a considerable part of Asia are sometimes regarded as belonging to one species, the *Equus hemionus;* sometimes to three, the *E. hemippus* found in Syria, the *E. onager* the Onager of Persia, Beluchistan, and parts of Northern India: and the *E. hemionus* of the high table-lands of Tibet. Sven Hedin describes the last-named as resembling a mule. Living at such high altitudes it has unusually large nostrils. These are artificially produced by the Persians, who slit the nostrils of their tame asses when about to use them for transport purposes in mountainous districts. The Syrian species or subspecies rarely enters the N. of Palestine at the present time. Wild asses congregate in herds, each with a leader, and are said to migrate towards the south at the approach of winter. They are so fleet that only the swiftest horses can keep pace with them, a fact recorded both by Xenophon and by Layard; and they are so suspicious that it is difficult to approach within rifle-shot of them. They are eaten by the Arabs and the Persians. N. M.—A. E. S.

ASSABIAS (ασαβιας [L]), RV SABIAS, 1 Esd. 1 9 = 2 Ch. 35 9, HASHABIAH, 6.

ASSALIMOTH (ασσαλιμωθ [really -ας σαλ. A]), 1 Esd. 8 36 AV = Ezra 8 10, SHELOMITH, 4.

ASSANIAS, RV **Assamias** (ασσαμιας [B]), 1 Esd. 8 54 = Ezra 8 24, HASHABIAH, 7.

ASSAPHIOTH (ασσαφειωθ [B]), 1 Esd. 5 33 RV = Ezra 2 55, HASSOPHERETH.

[1] The usual rendering of בְּאֵר or בּוֹר in 𝔊.

[2] Root חמר, 'to be red.' On the form cp Lag. *Uebers.* 11, Barth, *NB* 192.

[3] The Ar. verb '*atana* = 'contracto brevique gressu incessit'; but this may he denominative. אתון has of course no connection with *asinus:* see Lag. *Arm. St.* 817.

[4] Lag. derives ערוד from '*arada*, 'he threw a stone far,' referring to the effect of the animal's trampling hoofs (*Uebers.* 38 *f.*). פרא seems to be connected with the notion of swift flight.

[1] Cp Plutarch's statement that the Egyptians execrate the ass διὰ τὸ πυῤῥὸν γεγονέναι τὸν Τυφῶνα, καὶ ὀνώδη τὴν χροάν (quoted by Bochart).

[2] אֲתֹנוֹת צְחֹרוֹת, not strictly *white*, but white spotted with red, as the same word means in Arabic, where it is specially applied to the she-ass.

ASSASSINS, the RV rendering, of CIKAPIOI [Ti. WH], *sicarii—i.e.*, 'daggermen : Acts **2138** (AV murderers). They are so called from the *sīca* or small curved sword, resembling the Persian acīnăces (Jos. *Ant.* xx. 8 10), which they carried under their cloaks. Though used generally without any political meaning (cp Schür. *GVI* 1480, note), the term *sicarii* came to be employed to denote the baser and more fanatical associates of the zealots, whose policy it was to eliminate their antagonists by assassination. See ZEALOT.

ASSEMBLY (קָהָל)[1] is frequently used, especially in post-exilic literature, to denote the theocratic convocation of Israel, the gathering of the people in their religious capacity. It thus becomes synonymous with ἐκκλησία (so generally 𝔊; in Nu. **204** 6 10 12 συναγωγή, so Lk. **4** 13 14), which in the NT is used of the Christian church, in contrast to the Jewish *ḳāhāl* of the Mosaic dispensation. See CHURCH, § 1. Closely allied in meaning and usage is עֵדָה (from יעד, 'to appoint': a company assembled together by appointment), employed to denote the national body politic, Mosaic Israel encamped in the desert (cp Kue. *Einl.* § **15**, n. **12**). Both, *e.g.*, include the *gēr* (cp for 'y Ex. 1219, for 'ק Nu. 15 15; see STRANGER AND SOJOURNER), but are sometimes interchanged (cp Nu. 16 46 *f.* [17 10 *f.*] **20**). The distinction between the two, which was doubtless always observed, is clearly seen, *e.g.*, in Lev. 4 13 *f.* ('if the whole *congregation* of Israel shall sin, and the thing be hid from the eyes of the *assembly* . . . when the sin therein is known then the *assembly* shall offer' . . .), where the *ḳāhāl* is composed of the judicial representatives, the picked members of the עדה (cp also Dt. **23** 1 *f.* where certain classes of the people —*i.e.*, the *'ēdāh*— may not enter into the ḳāhāl). See SYNEDRIUM.

Apart from their occurrence in the more secular meaning of 'multitude, number, swarm,' both קהל and עדה occur but rarely in pre-Deuteronomic literature.

קהל (1) EV 'assembly': cp Ex. 16 3 Lev. 4 13 *ff.* and Jer. 26 17 (συναγωγη) 50 9 (-γωγαι) Ez. 23 24 (ὄχλος), etc. (2) EV 'congregation': 1 K. **81465** 12 3 (see KINGS, § 5) Ezra 10 8 (of the *gōlāh*) Pr. 5 14 Mi. **2** 5. (3) AV 'congregation,' RV 'assembly': Nu. 15 15[2] 16 47 [17 12][2] Dt. 23 1 *ff.* 31 30 **Josh. 835**; Judg. 215 (see JUDGES, § 13) Job 30 28 Ps. 89 5 [6] 107 32. The collocation 'day of assembly' Dt. 9 10 10 4 (𝔊 om.) 18 16, refers *to* the day on which the Law was given upon Sinai. For its more secular meaning cp Gen. **35** 11 (P)[2] Ez. **17** 17 (𝔊 ὄχλος EV 'company'); Gen. 28 3[2] 484 (P)[2] Nu. 22 4 (E)[2] AV 'multitude,' RV 'company' (in Ez. 16 40 **2346**, 𝔊 ὄχλος, RV 'assembly'). Cp also 1 S. 17 47: the assembly of Israel present at the fight between David and Goliath (E? see **SAMUEL**, § *4*). The earliest occurrence is probably Gen. **496** (@ σύστασις) the *ḳāhāl* of Simeon and Levi (parallel to סוד). Closely related *is* קְהִלָּה 'assembly,' Neh. **5** 7; cp Dt. 33 4[2] (AV 'congregation'), and 1 S. 19 20 (after 𝔊; cp *SBOT ad loc.* The passage is Midrashic). The verb (𝔊 ἐξεκκλησιάζειν, ἐκκλ.) is equally rare in pre-exilic literature; cp Jer. **2G9** Dt. 4 10 31 12 28 also 1 **K.** 8 1 *f.* **12** 21 (see KINGS, § 5) Judg. **201** (see JUDGES, § 13) Ex. **321** (E) (συνιστάναι) 16 46 (παρεμβολή) and 2 S. 20 14 (E? cp under **SHEBA**).

עֵדָה, 'congregation' (𝔊 usually συναγωγή) EV **Ex.** 16 1 *ff.* Nu. **2011**, etc. EV 'assembly,' Ps. 22 16 [17] Pr. 5 14; but RV 'congregation,' Lev. **84** Nu. 89 10 2 *f.* 16 2 208 Ps. 86 14. In pre-exilic literature cp Nu. 20 11 (R?); Jer. 6 18 (𝔊 ποίμνια) and Hos. 7 12 (𝔊 θλίψεως) (in both corrupt?) 1 K. 8 5 12 20 (cp above) Judg. **20** 1 **21** 10 13 16 (cp above). In a wholly secular sense, cp Judg. **148** swarm (of bees), Ps. 68 30 [31] multitude (of bulls).

'Assembly' also represents the following :—

1. a % ~עֲצֶרֶת[3] *ăṣārāh, ăṣereth*, apart from Jer. 9 2 [1] where it is used of a 'band' of evil doers (σύνοδος, EV. 'assembly'; Che. emends to חֲבֶרֶת, *JQR*, July 1898), is a technical term for some public religious convocation imposing restraints on the individual (EV, SOLEMN ASSEMBLY); cp 2 K. 10 20 (in honour of Baal, ἱερ[ε]α [BA], θεραπεία [L]), Joel 1 14 2 15 ('y קראו parallel to קדשו צום, θεραπ[ε]ία = עֲבֹדָה), Am. 5 21 (parallel to חג, πανήγυρις), and Is. 1 13 ('yi און, read צום וע', and see Jastrow, *Amer. J. Theol.* '**98**, p. **336**; νηστεία κ. ἀργία?).

Technically, *'ăṣārāh* is used almost wholly in post-exilic writings (@ invariably ἐξόδιον, finale, close; cp 𝔊's title Ps. **28** [29]), of *(a)* the assembling upon the seventh day of unleavened cakes, Dt. 16 8[1] (RV^mg. CLOSING FESTIVAL); *(b)* the eighth or supernumerary day—in ecclesiastical language the octave—of the Feast of Booths, Lev. **2336** Nu. **2935** (RV^mg. as above) Neh. 818; similarly the eighth day at the close of Solomon's dedicatory festival (2 Ch. 7 9), and (c) the Feast of Weeks, Jos. *Ant.* iii. **106** (ασαρθα) and in the Mishna.

2. מוֹעֵד, *mō'ēd* (Nu. 16 2); קְרִאֵי מ', famous in the congregation, RV, preferably 'called to the assembly'; 𝔊 βουλή; cp also Ps. 748 RV^mg. (EV synagogues, 𝔊 ἑορτή). The locution אֹהֶל מוֹעֵד, 'tent of congregation (RV meeting)' (𝔊 σκηνὴ μαρτυρίου), occurs frequently in P, also **Ex.** 33 7 Nu. 12 4 Dt. **31** 14 (E), Nu. **11** 16 (J); and outside Hex. in 1 S. *222 b*; but 𝔊^B om.) 1 **K.** 8 4 (𝔊 τὸ σκήνωμα τοῦ μαρτυρίου) (see KINGS, § 5). Cp also CONGREGATION, MOUNT OF; SYNAGOGUE; and see TABERNACLE.

מוֹעֵד is properly an *appointed time* or *place* (like עֵדָה from יעד); cp Gen. 18 14 (𝔊 καιρός), etc., Lam. 2 6 (𝔊 ἑορτή), etc.; hence used of a sacred season or set feast (Hos. **95**, 𝔊 πανήγυρις, etc.), probably also one set by the moon's appearance (cp Gen. 1 14 𝔊 καιρός). In designating feasts it is employed in a much wider sense than חג (see **FEASTS**, § *6*, DANCE, § 3). It is used not only of the year of Release (Dt. 31 10 𝔊 καιρός), and of the Passover (Hos. 12 9 [10] 𝔊 ἑορτή),[2] hot also of the Sabbath, New Year, and Day of Atonement (cp Lev. **23** 𝔊 ἑορτή).

3. מִקְרָא, *miḳrā'*; Is. 1 13 קרא מ', the calling of assemblies (𝔊 ἡμέρα μεγάλη); cp Is. 4 15 (𝔊 τὰ περικύκλῳ). The locution מִקְרָא קֹדֶשׁ, 'holy convocation' (𝔊 κλητή, or ἐπίκλητος ἁγία), only in P (Ex. 12 16 Lev. 23 2 *ff.* Nu. **28** 18 25 *f.* 29 1 7 12†).

4. סוֹד, *sōd*, Jer. 6 11 (𝔊 συναγωγή) 15 17 (𝔊 συνέδριον); Ps. **897** [8] 111 1, RV 'council,' 𝔊 βουλή; also in Ez. 13 9, AV^mg. RV 'council,' RV^mg. 'secret,' 𝔊 παιδεία. See COUNCIL, 3.

5. בַּעֲלֵי אֲסֻפּוֹת, *ba'ălē ăsuppōth*, Eccl. 12 11 (𝔊 παρὰ τῶν συνθεμάτων), masters of assemblies, a reference to the convocations of the wise men (cp Ph. בן אספה, 'member of an assembly'); RV^mg. 'collectors of sentences'; Tyler, 'editors of collections'; Haupt, 'verses of a collection'; Che. 'framers of collections'—*i.e.*, בַּעֲלֵי א' (*Jew. Rel. Life*, **182**).

6. ἐκκλησία (cp above) Mt.1618 1817 Acts19323941 Heb. 12 23; see CHURCH.

7. συναγωγή (cp above) Ja. **22** AV, RV^mg.; RV SYNAGOGUE (*q.v.*).

ASSHUR. See ASSYRIA.

ASSHUR, CITY OF. See TELASSAR.

ASSHURIM (אַשּׁוּרִם, ACOYPIM [A]; ACCOYPIEIM [DL]; ACCOYPIHΛ *[E]*), the first born of DEDAN (Gen. 25 3). The name is enigmatical. Hommel (*AHT* 239 *f.*) thinks that we should read Ashurim, not Asshurim, and that Ashur is the fuller and older form of SHUR. In a Minæan inscription (Glaser, 1155; cp Wi. *AOF* 28 *f.* and see *ZDMG*, 1895, p. 527) Egypt, Ashur and 'Ibr Naharān are grouped together (see EBER). The same territory, extending from the 'River of Egypt' (?) to the country between Beersheba and Hebron, may perhaps be meant in Gen. **25** 18, where the gloss 'in the direction

[1] קהל (to call) ≐ Ar. *ḳāla* (to speak); cp Syr. *ḳehal* to call, collect; *ḳahlānā* brawler. The change from 'calling' to 'assembling' is easy; cp use of Heb. נצעק. The relation between קהל (assembly) and Ar. *ḳāla* is analogous to that between סוֹד, council, etc., and Syr. *sewādhā*, talk, conversation (in Gen. **496** they are parallel). 'ק finds an interesting parallel in Sab. קהלת עתתר, the assembly of 'Athtar (Ashtoreth). On the usage of *ḳāhāl* see Holzinger, *ZATW* 9 105 *f.* ['89].

[2] In these passages 𝔊 has συναγωγη.

[3] From עצר, to press, restrain; cp נעצר 'detained' (1 S. 21 7 Jer. 36 5); perh. 'ע a taboo, *tempus clausum*; cp WRS, *Sem.* **456**, who notes the proverbial עָצוּר וְעָזוּב 'one under a taboo and one free.' Cp Ass. *eṣeru*, to bind, enclose; *uṣurtu*, magical spell, constellation (Muss-Arnolt).

[1] The only pre-exilic occurrence **of 'y** in a technical sense; but note that according to St. *GVI* 1 658, *vv.* 1-4 5-8 are doublets; cp Nowack, *Arch.* 2 154 note.

[2] We., however (*Kl. Proph.*(5)), reads נעוריך, and Now. עולם

of אשור ("Ashur")' was misunderstood by the authors of the vowel-points. The reference intended was, according to Hommel, to Ashur in S. Palestine; he proposes to read Ashur, not Asshur, also in Nu. 24 22 24. The latter view, at any rate, is very improbable (see BALAAM, § 6). Cp also GESHUR, 2.

ASSIDEANS, RV 'Hasidæans,' RVmg. 'that is Chasidim' (ασιδαιοι [AKV]), is a transcription of the Hebrew *ḥasīdīm, pious ones* (AV, generally, *'saints*). It is often used of faithful Israelites in the Psalms (17 times in plur., 5 times in sing.), and sometimes unquestionably of the so-called Assideans (*e.g.*, 116 15 149 1 5 9). In 1 Macc. the name appears as the designation of a society of men zealous for the law (1 Macc. 2 42—according to the correct text as given by Fritzsche), and closely connected with the scribes (1 Macc. 7 12 *f.*). It is plain from these passages that this society of 'pious ones,' who held fast to the law under the guidance of the scribes in opposition to the 'godless' Hellenising party, was properly a religious, not a political, organisation. For a time they joined the revolt against the Seleucids. The direct identification of the Assideans with the Maccabee party in 2 Macc. 146, however, is one of the many false statements of that book, and directly contradictory to the trustworthy narrative of 1 Macc. 7, which shows that they were strictly a religions party., who scrupled to oppose the legitimate high priest, even when he was on the Greek side, and withdrew from the war of freedom as soon as the attempt to interfere with the exercise of the Jewish religion was given up. We are not to suppose that the Assidean society first arose in the time of the Maccabees. The need of protesting against heathen culture was donbtless felt earlier in the Greek period. The 'former *ḥasīdīm*,' as a Jewish tradition (*Nedarim*, 10 *a*) assures us, were ascetic legalists. Under the Asmonean rule the Assideans developed into the better known party of the Pharisees, and assymed new relations to the ruling dynasty. It appears, from the *Psalter of Solomon*, which represents the views of the Pharisees, that the party continued to affect the title of 'pious ones' (ὅσιοι), but less frequently than that of 'righteous ones' (δίκαιοι). Indeed, the third Jewish party of the Asmonean period had already appropriated the former name, if we may adopt Schurer's derivation of ESSENE (*q.v.*). See We. *Ph. u. Sadd.* ('74), p. 76 *ff.*, whose results WRS adopted, and cp Schür. *Hist. ET* 1 212; Che. *OPs*, 56 (on the use of 'Assideans'), and other passages (index under *khasîdîm*). W. R. S.—T. K. C.

ASSIR (אַסִּיר, 'prisoner'; but perhaps rather אֹסִיר = Osiris;[1] cp HuR).

1. (In Ex. ασειρ [BF], ασηρ [AL]; in 1 Ch. αρεσει, ασερει, ασειρ [B], ασειρ [A], ασηρ ασερ [L]; *Asir*). The eponym of one of the families or divisions of the Korahite guild of Levites; Ex. 624 [P]. Cp 1 Ch. 6 22 *f.* 37 [7 *f.* 20], and for the interpretation of these discrepant genealogies see KORAH.

2. Son of Jeconiah (1 Ch. 3 17; ασειρ [BAL]). So AV, following a Jewish view that Assir and Shealtiel are the names of two different sons of Jehoiachin (*Sanhedrin*, 37 *a*; Midrash *Vayikra*, par. x.; Midr. *Shir ha-Shirim*, on 86; so Kimchi); but the best texts (Ba., Ginsb.) make 'Jeconiah-Assir' the name of one man. Kau. *HS* and *SBOT* rightly restore the article before Assir (the preceding word ends in ה). Render, therefore, 'Jeconiah the captive' (so RV). Cp SHEALTIEL.

ASSOS, or ASSUS (ασσος [Ti. WH]), Acts 20 13,[1] a town and seaport in the Roman province of Asia; now *Behram Kalessi*. Strabo, who ranks Assus and Adramyteum together as 'cities of note,' pithily describes the former as lying in a lofty sitnation, with splendid fortifications, and communicating with its harbours by means of a long flight of steps (610, 614). So strong was the position that it gave rise to a pun by the musician Stratonicus, who applied to it the line

ἄσσον ἴθ', ὥς κεν θᾶσσον ὀλέθρου πείραθ' ἵκηαι.

'Come anigh, that anon thou mayest enter the toils of death' (Hom. *Il.* vi. 143). The joke lay in reading "Ἄσσον ἴθ' = 'Come to Assus.' The town was always singularly Greek in character. Leake observes that its ruins give 'perhaps the most perfect idea of a Greek city that anywhere exists.' The material is granite, which partly accounts for their immunity from spoliation. One of the most interesting parts is the Via Sacra, or Street of Tombs, extending to a great distance to the NW. from the gate of the city. It is bordered by granite coffins, some of them of great size. In Roman times, owing to its supposed pow-er of accelerating the decay of corpses (Pl. *HN* 298 36 27), the stone of Assns received the name *sarcophagus*. Paul must have entered the city by the Street of Tombs on his last journey to Jerusalem (Acts 20 13 14). The apostle had landed at Troas and walked or rode the 20 m. thence to Assns in time to join his companions, who had meanwhile sailed round Cape Lectum.

A good account of Assos is given in Fellows, *Asia Minor*, 52; Murray's *Handbook of A. M.* 64: for its inscriptions see *Report* of the American Expedition, 1882. W. J. W.

ASSUERUS (ασυηρος [B] etc.) Tob. 14 15† AV, RV AHASUERUS (*q.v.*, no. 3).

ASSUR (1) (אַשּׁוּר) Ezra 4 2 Ps. 838 AV, 4 Esd. 2 8 EV (*Assur* [ed. Bensly]) Judith 2 14 etc. AV, RV ASSHUR; elsewhere RV ASSYRIA (*q.v.*).

2. (ασουρ [BA]), 1 Esd. 5 31 = Ezra 2 51, HARHUR.

Aššur, the name of the country known to us as Assyria, was written in Hebrew אַשּׁוּר, EV ASSHUR, 1. Names. or more fully אֶרֶץ אַשּׁוּר, in the LXX ασσουρ and ασσυριος (𝔊L sometimes ασουρ) by Josephus and the Greek historians Ἀσσυρία, in the Greek of the Alexandrian epoch Ἀτουρία, and in Aramaic *Āthūr*, *Āthūrīyā*, in which form the name survived as that of a diocese of the Nestorian Church.

Other forms occurring once in 𝔊 are:—ασουρ in E and in A; ασσουριειμ in D, in A, and in L respectively; -ριηλ in E; ασσυρος in A[1]; ασουριμ in A; συριοι in B*; σουρ in Bab ℵa? a.b c.a (and twice in A); τουρ in ℵ*.

By the Assyrians themselves the name of their country was written phonetically  or , or (combining the two) , the signs  and  being determinatives respectively for 'land' and 'place.' Subsequently, the two signs that formed the word,  (= *aš*) and  (= *šur*), were run together and the name was written ,

1 In 20 13 Vg. translates ἄραντες ἄσσον (Ti. WH) by *cum sustulissent de Asson*, taking the word (incorrectly) as the name of the city.

2 For literature see, BABYLONIA, § 19 *ff.*

, and finally the writing of the name was abbreviated to'the single horizontal stroke that forms its first syllable, . The name was also written ,  or —*i.e.*, 'land of the god Ašur." [1] In fact, it is'probable that the city of Ašur, from which the land of Aššur was named, received its title. from the national god. Other instances are known in which a god has given his name to the country or city that worshipped him. The land of Guti that lay to the E. of Assyria beyond the Lower Zāb appears to have taken its name from Guti its national god, whilst the god Sušinak gave his name to the city of Šušinak or Susa, the principal town on the banks of the Eulæus. The general term among the Greeks for all subjects of the Assyrian empire was Ἀσσύριοι, which was more usually shortened into Σύριοι or Σὔροι. [2] The abbreviated form of the word was, however, gradually confined to the western Aramaic nations, being at last adopted by the Aramaeans themselves. These people, on becoming Christians, dropped their old name in consequence of the heathen associations it had acquired in their translation of the NT, and styled themselves *Sūrᵉyāyē*, whence the modern term ' Syriac.' The nnabbreviated name was used to designate the district on the banks of the Tigris, and this form of the word, passing from the Greeks to the Romans, finally reached the nations of northern Europe.

2. Biblical references.

References to Assyria or the Assyrians in the OT are very numerous, though they are in the main confined to the historical and the prophetic books ; the former describing the relations of Assyria with the later kings of Israel and Judah, the latter commenting on these relations and offering advice. The prophets, in their denunciations and predictions, sometimes rcfcr to the Assyrians by name ; at other times, though not actually naming them, they describe them in terms which their hearers could not possibly mistake.

The principal references may he classified under the following three headings : *(a)* Geographical use of the name Assyria : to describe the course of the Tigris in the account of the garden of Eden (Gen. 2 14), and to indicate the region inhabited by the sons of Ishmael *(25* 18). (*b*) References to matters of history : the foundation of the Assyrian empire (Gen. **10** 11), and its classification among the nations **(10** 22**)**; Menahem's tribute (2 K. 15 19 *f.*); thecaptivityofnorthern Israel (Is. 9 1 [8 23]; 2 K. 15 29 ; 1 Ch. **5** 26); the assistance of Ahaz by Tiglath-pileser, followed by the capture and captivity of Damascus (2 K. 16 5-18 ; 2 Ch. 28 20 *f.*) ; Hoshea's subjection to Shalmaneser (2 K. **17** 3) ; his treachery and punishment **(174)**; the siege and capture of Samaria (17 5 *f.* 18 9-12), and the colonisation of the country by foreigners (17 24 *ff.*); Sennacherib's invasion of Palestine and Hezekiah's payment of tribute, his refusal to submit to further demands, the escape of Jerusalem from the Assyrian vengeance, and Sennacheribs death (2 K. 18 13-19 **37** ; Is. **3G** and 37 ; 2 Ch. **32** 1-23); the trade of Assyria with Tyre (Ezek. 27 23); general references to past captivity or oppression by Assyria (Is. 52 4 ; Jer. *50* 17 ; Lam. **5** 6; Ezek. 23 9 *ff.* 23); reference to the punishment that overtook Assyria (Jer. 50 18) : reference to the colonization of Palestine by Esarhaddon (Ezra 4 2). (c) Prophetic criticism and forecasts : evil or captivity threatened or foretold as coming from Assyria (Nu. **24** 22 ; **Hos. 9** 3 **11** 5 ; Is. 7 17 *ff.* **10** 5 **23** 13 ; Ezek. **23 23** 32 22 ; **Ps.** 83 8); the futility of depending on Assyrian help (Hos. 5 13 7 11 *f.* 8 9 *f.* 10 4-6 12 1 ; Jer. 2 18 36); the participation of Israel in Assyrian idolatry (Ezek. 16 28 *23* 5 *ff.*); prophecies of the return from captivity in Assyria (Hos. 11 11 ; Mic. 7 12 ; **Is. 11** 11 **16** ; Zech. **10** 10) ; predictions of overthrow or misfortune for Assyria (Nu. **24** *24* : Mic. 5 5 *f.* : **Is. 10** 24 *ff.* **14** 25 **30** 31 '318 ; Ezek. **31** 3 *ff.* ; the prophecy of Nahum ; Zeph. 2 13; Zech. 10 11); references to Assyria as taking part in the final conversion and reconciliation of mankind (**Is. 19** 23 *ff.* **27** 13). In some'of these passages, however, Assyria may = SYRIA (*q.v.*).

3. Position and extent.

It is difficult to define exactly the boundaries of Assyria. The extent of the country varied from time to time according to the additional territory acquired in conquest by its monarchs, and the name itself has at times suffered from a somewhat vague and general application. The classical writers employed it in a conventional sense for the whole area watered by the Tigris and the Euphrates, including northern Babylonia, whilst its use has even been extended *so* as to cover the entire tract of country from the coast of the Mediterranean to the mountains of Kurdistan. In a definition of the extent of Assyria proper, however, any vague use of the name may be ignored, for, although at one time the Assyrian empire embraced the greater part of western Asia. the provinces she included in her rule were merely foreign states not attached to herself by any organic connection, but retained by force of arms. In general terms, therefore, the land of Assyria may be said to have been situated in the upper portion of the Mesopotamian valley about the middle course of the river Tigris, and here we may trace certain natural limits which may be regarded as the proper boundaries of the country. The mountain chains of Armenia and Kurdistan form natural barriers on the N. and E. On the *S.* the boundary that divided Assyria from Babylonia was in a constant state of fluctuation ; but the point at which the character of the country changes from the flat alluvial soil of the Babylonian plain into the slightly higher, and more undulating tracts to the N. gives a sufficiently well-defined line of demarcation. On the W., Assyria in its earliest period did not extend beyond the territory watered by the Tigris; but, finding no check to its advance in that direction, it gradually absorbed the whole of Mesopotamia as far *S.* as Babylon, until it found a frontier in the waters of the Euphrates.

4. Description.

The chief feature of the country is the river' TIGRIS (*q.v.*), which, rising in the mountains of Armenia, runs southward and divides Assyria into an E. and a W. district. That part of Assyria which is situated on the E. or left bank of the Tigris, though the smaller, has always been much the more important. The country on that side of the river consists of a continuous plain broken up by low detached ranges of limestone hills into a series of shallow valleys through which small streams run. All the main tributaries, too, that feed the Tigris rise in the Kurdish mountains, and flow through this E. division of the country. The E. Khābūr, the Great or Upper Zāb, the Little or Lower Zāb, the Adhem, and the Diyālā join the Tigris on its left or E. bank. Being therefore so amply supplied with water, this portion of the country is very fertile, and well suited by nature for the rise of important cities. On the other hand; W. Assyria, which lies between the Tigris and the Euphrates, is a much drier and more barren region. The fall of the two rivers between the point where they issue from the spurs of the Taurus and the point where they enter the Babylonian alluvium—a distance of six hundred or seven hundred miles—amounts to about one thousand feet, the Tigris having the shorter course, and being, therefore, more rapid. The country between the rivers consists of a plain, sloping gently from the NW. to the SE. In its upper part this region is somewhat rugged ; it is intersected by many streams, which unite to form the Belikh and W. Khābūr. The rivers flowing S. join the Euphrates, and the district through which they pass is watered sufficiently for purposes of cultivation. In the SW., however, the supply of water is scanty, and the country tends to become a desert, its slightly undulating surface being broken only by the Sinjār range, a single row *of* limestone hills. The district

[1] Throughout the present article the form Ašur is employed for the name of the god and city, Aššur for that of the land. In the inscriptions the name of the land is written with the doubled sibilant, an original Assyrian form that is not inconsistent with the later Greek and Aramaic renderings of the name (see Nöldeke, *ZA* 1 268 *ff.*). The name of the god, however, is written in the inscriptions both with the single and doubled sibilant, of which the former may he regarded as the more correct on the basis of the Greek and Hebrew transliteration of certain proper names, in which the name Ašur occurs (see Jensen, *ZA* 1 1 *ff.* and Schrader, *ib.* 209 *ff.*).

[2] On this see SYRIA.

S. of these hills is waterless for the greater part of the year; the few streams and springs are for the most part brackish, while in some places the country consists of salt deserts, and in others vegetation is rendered impossible by the nitrous character of the soil. It is true that on the edges of this waterless region there are gullies (from one to two miles wide) which present a more fertile appearance. These have been hollowed out by the streams in the rainy season, and, being submerged when the river rises, have in the course of time been filled with alluvial soil. At the present day they are the only spots between the hill-country in the north and the Babylonian plain in the south where permanent cultivation is possible. It has been urged that this portion of the country may have changed its character since the time of the Assyrian empire, and it is possible that in certain districts extensive irrigation may have considerably increased its productiveness; but at best this portion of Assyria is fitted rather for the hunter than for the tiller of the soil. The land to the left of the Tigris is, therefore, much better suited for sustaining a large population, and it is in this district that the mounds marking the sites of the ancient cities are to be found.

5. Cities. Ašur, the earliest city of Assyria, is indeed situated to the west of the Tigris, near the spot where Ḳal'at Sherkāt now stands; but its site is within a short distance of the river, and it was the only city of importance on that side of the stream. Apart from its earliest capital, the chief cities of Assyria were Nineveh, Calah, and Dūr-Šargina. Nineveh, whose foundation must date from a period not much more recent than that of Ašur, was considerably to the N. of that city, opposite the modern town of Mosul (*Mawṣil*), on the E. bank of the Tigris, at the point where the small stream of the Khosr empties its waters; its site is marked by the mounds of Kuyunjik and Nebi Yūnus (cp NINEVEH). Calah, founded by Shalmaneser I., corresponds to the modern Nimrūd, occupying a position to the S. of Nineveh on the tongue of land formed by the junction of the Upper Zāb with the Tigris (cp CALAH). Dūr-Šargina, 'the wall of Sargon,' was founded by that monarch, who removed his court thither; the site of the city is marked by the modern village of Khorsabād, to the NE. of Nineveh (cp SARGON). It will be seen that there was a tendency throughout Assyrian history to move the centre of the kingdom northwards, following the course of the Tigris. Other cities of importance were Arba'il or Irba'il (Arbēla) on the E. of the Upper Zāb; Ingur-Bēl (corresponding to the modern Tell-Balawāt), situated to the SE. of Nineveh; and Tarbis, its site now marked by the village of Sherīf-Khān, lying to the NW. of Nineveh.

From the above brief description of the country, it may be inferred that Assyria presents considerable differences of climate.

6. Natural resources. E. Assyria was the most favoured region, possessing a good rainfall during winter and even in the spring, and having, in virtue of its proximity to the Kurdish mountains and its abundant supply of water, a climate cooler and moister than was generally enjoyed to the W. of the Tigris. In this latter region the somewhat rigorous climate of the mountainous district in the N. presents a strong contrast to the arid character of the waterless steppes in the centre and the S. The frequent descriptions of the extreme fertility of Assyria in the classical writers may, therefore, be regarded as in part referring to the rich alluvial plains of Babylonia. Not that Assyria was by any means a barren land. She supplemented her rainfall by extensive artificial irrigation, and thus secured for her fields in the hot season a continual supply of water. Her cereal crops were good. Olives were not uncommon, and the citrons of Assyria were famous in antiquity. Fruit trees were extensively cultivated, and, although the dates of Assyria were much inferior to those of Babylonia, orange, lemon, pomegranate, apricot, mulberry, vine, and fig were grown successfully. The tamarisk was an exceedingly common shrub; oleanders and myrtles grew in the eastern district; but, except along the rivers and on the mountain slopes, trees were scanty. The trees, however, included the silver poplar, the dwarf oak, the plane, the sycamore, and the walnut. Vegetables such as beans, peas, cucumbers, onions, and lentils were grown throughout the country. Though Assyria could not compete with Babylonia in fertility, her supply of stone and minerals far exceeded that of the southern country. Dig where you will in the alluvial soil of the south, you come upon no strata of rock or stone to reward your efforts. In Assyria limestone, sandstone, and conglomerate rock were common, whilst gray alabaster of a soft kind, an excellent material for sculpture in relief, abounds on the left bank of the Tigris; hard basaltic rock and various marbles were also accessible in the mountains of Kurdistan. Iron, copper, and lead were to be found in the hill country not far from Nineveh, while lead and copper were obtained from the region of the upper Tigris in the neighbourhood of the modern town of Diārbekr. Sulphur, alum, salt, naphtha, and bitumen were also common; bitumen was extensively employed, in place of mortar or cement, in building (cp BITUMEN). Of the wild animals of Assyria the lion and the wild hull are those most often mentioned in the historical inscriptions as affording big game for the Assyrian kings. Less ambitious sportsmen might content themselves with the wild boar and the deer, the gazelle, the ibex, and the hare; while the wild ass, the bear, the fox, the jackal, the wild cat, and wild sheep were to be found. The most common of the birds were the kite or eagle, the vulture, the bustard, the crane, the stork, the wild goose, wild duck, teal, tern, partridge (red and black), the sand grouse, and the plover. We know from the monuments that fish were common. Of the domestic animals of the Assyrians the principal were camels, horses, mules, asses, oxen, sheep, and goats. Dogs, resembling the mastiff in appearance, were employed for hunting. From the fact that heavy stone weights carved in the form of ducks have been found, it may he assumed that the duck was domesticated.

The Assyrians belonged to the northern family of Semites, and were closely akin to the Phœnicians, the Aramæans, and the Hebrews.

7. National character. Their robust physical proportions and facial characteristics are well known from the monuments, and tally with what we know of their character from their own inscriptions and the writings of the Hebrew prophets. Is. 33 19 describes the Assyrians as 'a fierce people'—an epithet that fits a nation whose history is one perpetual warfare. The dividing line between courage and ferocity is easily overpassed, and in a military nation, such as the Assyrians were, it was but natural that there should be customs which to a later age seem barbarous. The practice of impaling the defenders of a captured city was almost universal with the Assyrians; the torturing of prisoners was common; and the practice of beheading the slain, whilst adding insult to the vanquished, was adopted as a convenient method of computing the enemy's loss, for it was easier to count heads than to count bodies. The difference in character between the Assyrians and the milder Babylonians was due partly to the absence of that non-Semitic element which gave rise to and continued to influence the more ancient civilisation of the latter (see BABYLONIA, § 5); partly, also, to differences of climate and geographical position. The ferocity and the courage of the Assyrians are to a great extent absent from the Babylonian character. It has been asserted that the Semites never make great soldiers, yet there have been two prominent exceptions to this generalisation—the Assyrians and the Carthaginians. The former indeed not

MAP OF SYRIA, ASSYRIA, AND BABYLONIA

INDEX TO NAMES (A-J)

Parentheses indicating articles that refer to the place-names are in certain cases added to non-biblical names having no biblical equivalent. The alphabetical arrangement ignores prefixes el (the), J. (Jebel, mt.), Kh. (Khirbat, 'ruin'), L. (lake), Mt., N. (Nahr, 'river'), R. (river).

only displayed the energy of conquest; but also combined with it a great power of administration by which they organised the empire they had acquired. It was, however, the custom of the Greek historians, and afterwards of the Romans, to paint the Assyrians as a singularly luxurious and sensual nation. Their monarchs, from the founder of the empire down to the last king who held the throne, were described as given up to pleasure. It is possible that as regards the later empire this tradition contains a substratum of truth, for the growing luxury of Assyria may well have been one of the causes that brougbt about her fall. For the earlier and the middle period of Assyrian history, however, the statement is proved to be untrue, both by the records of Assyria herself and by the negative evidence of the Hebrew prophets. These contemporaries of Assyria, who hated her with the bitter hatred which the oppressed must always feel for their oppressors, rarely, if ever, denounce her luxury; it was her violence and robbery that impressed her victims. In the language of prophecy the nation is pictured as a lion (Nah. 2 12), and it is not as a centre of vice but as 'the bloody city' that Nahum foretells the destruction of her capital (3 1).

8. Language, etc. The Assyrians spoke a Semitic language, which they inherited from the Babylonians—a language that was more closely allied to Hebrew and Aramaic than to Arabic and the other dialects of the S. Semitic group. They wrote a non-Semitic character, one of the varieties of the cuneiform writing (see BABYLONIA, § 5 *ff.*). Like their language, this system of writing came to them from the Babylonians, who had themselves inherited it from the previous non-Semitic inhabitants of Babylonia. The Assyrians, although retaining the Babylonian signs, made sundry changes in the formation of them, and in some it is possible to trace a steady development throughout the whole period covered by the Assyrian inscriptions. The forms of some of the characters in the inscriptions of almost every Assyrian king display slight variations from those employed by his predecessors. Indeed, in some few cases, the forms used at different periods differ more widely from one another than they do from their Babylonian original. The literature of the Assyrians was borrowed. In a sense they were without a literature, for they were not a literary people. They were a nation of warriors, not of scholars. In this they present the greatest contrast to their kindred in the S. Possessed of abundant practical energy, they were without the meditative temperament which fostered the growth of Babylonian literature; and, although displaying courage in battle and devotion to the chase, they lacked the epic spirit in which to tell the tales of their enterprise. The majority of the historical inscriptions which they have left behind them are not literature: they are merely lists of conquered cities, catalogues of captured spoil, and statistics of the slain. Though not original, however, the Assyrians were far from being illiterate. They took over, root and branch, the whole literature of Babylonia, in the copying, the collection, and the arrangement of which they displayed the same energy and vigour with which they prosecuted a campaign. It was natural that the priests and scribes, whose duty it was to copy and collate, should attempt compositions of their own; but they merely reproduced the matter and the methods of their predecessors. In a word, the Assyrians made excellent librarians, and it is to their powers of organisation that we owe the greater part of our knowledge of Babylonian literature. Since, therefore, the language, the system of writing, and the literature of the Assyrians were not of their own making, but merely an inheritance into which they entered, the description of them in greater detail falls more naturally under the article BABYLONIA (see § 19 *ff.*).

9. Religion. The religion of the Assyrians resembles in the main that of the Babylonians, from which it was derived. The early colonists from the south carried with them the gods of the country which they were leaving; but from the very first they appear to have somewhat modified the system and to have given a distinctly national character to the pantheon they borrowed. This end they achieved by the introduction of the worship of Ašur, their peculiarly national god, who was for them the symbol of their separate Existence. Ašur they set above all the Babylonian deities, even Anu, Bēl, and En taking a subordinate position in the hierarchy. It is true that we find Bēl mentioned at times as though he were on an equal footing with Ašur, especially in the double royal title 'Governor of Bēl, Representative of Ašur,' while Assyria is sometimes termed 'the land of Bēl' and Nineveh 'the city of Bel.' These titles, however, were not inconsistent with Ašur's supremacy. He was 'the king of all the gods,' and any national success was regarded as the result of his initiative. It was Ašur who marked out the kings of Assyria from their birth, and in due time called them to the throne. It was he who invested them with power and gave them victory over their enemiks, listened to their prayers, and dictated the policy they should pursue. The Assyrian army were 'the troops of Ašur'; the national foe was 'Ašur's enemy'; and every expedition is stated to have been undertaken only at his direct command. In fact, the life of the nation was consecrated to his service, and its energies were spent in the attempt to vindicate his majesty among the nations that surrounded them. His symbol was the winged circle in which was frequently enclosed a draped male figure wearing a headdress with three horns and with his hand extended; at other times he is represented as holding a bow or drawing it to its full extent. The symbol may, perhaps, be explained as a visible representation that Ašur's might had no equal, his influence no limit, and his existence no end. This symbol is often to be found on the monuments as the accompaniment of royalty, signifying that, the Assyrian king, as Ašur's representative, was under his especial protection; and we find it not only sculptured above the king's image but also graven on his seal and even embroidered on his garment. It is possible that we may trace in this exaltation of the god Ašur the Semitic tendency to monotheism, the complete vindication of which first found expression in the Hebrew prophets. It must not be supposed, however, that the new deity stood in any opposition to the older gods. These retained the respect and worship of the Assyrians, and stood by Ašur's side—not so powerful, it is true, but retaining considerable influence and lending their aid without prejudice to the advancement of the nation's interests.

The spouse of Ašur was Belit—that is, 'the Lady' *par excellence*—and she was identified with the goddess Ištar (see especially 3 R. 24, 80; 53, n. 2, 36 *f.*), and in particular with Ištar of Nineveh. Another goddess who enjoyed especial veneration in Assyria was Ištar of Arbela, who became particularly prominent under Sennacherib and his successors, and was generally mentioned by the side of her namesake of Nineveh. She was especially the goddess of battle, and from Ašur-bāni-pal we know the conventional form in which she was presented. This monarch, on the eve of an engagement with the Elamites, feeling far from confident of his own success, appealed for encouragement and guidance to Ištar of Arbela. The goddess answered the king's prayer by appearing that night in a vision to a certain seer while he slept. On recounting his dream to the king, the seer described the appearance of the goddess in these words: 'Ištar, who dwells in Arbela, entered. On the left and the right of her hung quivers; in her hand she held a bow; and a sharp sword did she draw for the waging of battle.'

Besides Ašur and Ištar, two other gods were held in particular respect by the Assyrians—Ninib, the god of battle, and Nergal, the god of the chase. Almost all

the Assyrian kings, however, had their own pantheons, to whom they owed especial allegiance. In many cases the names constituting the pantheon occur in the king's inscriptions in a set order that does not often vary.

Such were the principal changes which the Assyrians made in the pantheon of Babylonia, the majority of whose gods they inherited, with their functions and attributes to a great extent unchanged. It is true that our knowledge of Babylonian religion, like that of Babylonian literature, comes to us mainly through Assyrian sources; but though it passed to them, its origin and development are closely interwoven with the history of the older country. The cosmology of the Assyrians and their conception of the universe were entirely Babylonian (see BABYLONIA, § 25); their astrology (*id.* § 34), their science of omens (§ 32), their system of ritual and their ceremonial observances (§ 29 *f.*) were an inheritance from the temples and worships of the south.

Though in language, writing, and literature Assyria so closely resembles Babylonia, in her architecture she presents a striking contrast. The alluvial plains of the southern country contained no stone, and the Babylonian buildings were, therefore, mainly composed of brick. The resources of Assyria were not so poor; the limestone and the alabaster with which her land abounded stood her in good stead.

10*a*. Architecture.

The palace was the most important building among the Assyrians, for the principal builders were the kings. It was erected, usually, on an artificial platform of bricks or earth; in which fact we may possibly see a survival of a custom of Babylonia, where such precautions against inundation were necessary. The platform was generally faced with stone, and was at times built in terraces which were connected by steps. The palace itself was composed of halls, galleries, and smaller chambers built round open courts, the walls of the former being ornamented with elaborate sculptures in relief. It is only from their foundations that our knowledge of the Assyrian palaces has been obtained. From these remains a good idea of their extent can be gathered; but there is no means of telling the appearance they presented when complete. Their upper portion has been totally destroyed: it is a matter of conjecture whether they consisted of more than one story. The paving of the open courts was as a rule composed of brick; but sometimes stone slabs, covered with shallow carving in conventional patterns, were employed.

The temple was subordinate to the palace. Our knowledge of its appearance is based mainly on its representation on the monuments, from which it would appear that the Assyrians inherited the Babylonian *ziḳḳurratu* (temple-tower), a building in stages which diminish as they ascend (see BABYLONIA, § 16, beg.). Unmistakable remains of a building of this description were uncovered on the N. side of the mound at Nimrūd. Another type of building depicted on the monuments has been identified as a shrine or a temple; it was a single-storied structure, with a broad entablature supported by columns or pilasters.

The domestic architecture of the Assyrians has perished. The dwellings of the more wealthy must have resembled the royal residence. On the bas-reliefs are to be found villages which bear a striking resemblance to those of modern Mesopotamia; and, having regard to the eternal nature of things eastern, we may regard it as not unlikely that the humbler subjects of Assyria were housed neither better nor worse than the villagers of to-day.

It was to adorn their palaces and temples that the Assyrians employed the sculptured slabs and bas-reliefs with which their name is peculiarly associated. The majority of these have come from the palaces of Ašur-nâṣir-pal, Sargon, Sennacherib, and Ašur-bāni-pal. The work of the earliest of these kings is distinguished from that of his successors by a certain breadth and grandeur of treatment; but the constant repetition of his own figure, accompanied by attendants, human or divine, becomes monotonous. The work of Sargon presents a greater variety of subject and treatment; but it is in the sculptures of Sennacherib and Ašur-bāni-pal that the most varied episodes of Assyrian life and history are portrayed. It was natural that battle-scenes should chiefly occupy the sculptor; yet even here the artist could give his fancy play. Whilst he was bound by convention to depict the vulture devouring the slain, he could carve at the top of his slab a sow with her litter trampling through a reed-bed. Armies in camp or on the march, the siege of cities or battles in the open, the counting of the slain and the treatment of prisoners—all are rendered with absolute fidelity. When an army crosses a river and boats for transport are not to be had, the troops are represented as swimming over with the help of inflated skins[1]—a custom that survives on the banks of the Tigris to the present day.

10*b*. Sculpture.

Though the sculptures of Sennacherib and Ašur-bāni-pal have much in common, as regards both their matter and the method of their treatment, each king had his own favourite subject for portrayal on his monuments. Sennacherib liked most to perpetuate his building operations; Ašur-bāni-pal, his own deeds of valour in the chase. Sennacherib erected two palaces at Nineveh—the one at Nebi Yūnus, the other at Kuyunjik—but it is only at Kuyunjik that the palace has been thoroughly explored. On the walls of this latter edifice he caused to be carved a series of scenes in which his builders are represented at their work. Stone and timber are being carried down the Tigris upon rafts; gangs of slaves are collecting smaller stones in baskets, and piling them up to form the terrace on which the palace is to stand; others are wheeling hand-carts full of tools and ropes for scaffolding, or transporting on sledges huge blocks of stone for the colossal statues. The hunting-scenes of Ašur-bāni-pal may be regarded as marking the acme of Assyrian art. Background and accessories are for the most part absent. Thus, grotesque efforts at perspective, common to the most of early art, are avoided, with the result that the limitations in the methods of the early artist are not so apparent. The scenes portrayed are always spirited. The figures are all in motion. Whilst the elaboration of detail is not carried to an extreme, action is represented with complete success. This series of hunting-scenes contains pieces of great beauty. It is in striking contrast to the large majority of Assyrian sculptures, which tend to excite interest rather than admiration. Still, even the earlier work has not entirely failed in its purpose—ornamentation. The stiff arrangement of a battlefield has often a decorative effect; and the representation of a river with the curves and scrolls of its water contrasting with the stiff symmetrical line of reeds upon its bank, is always pleasing. Indeed, from a decorative point of view, Assyrian art attained no small success. Traces of colour are still to be found on some of the bas-reliefs, on the hair and beards of figures, on parts of the clothing, on the belts, the sandals, etc.; but the question whether the whole stone-work was originally covered

1 A singular detail may be noticed with reference to the representation of these skins. The soldier places the skin beneath his belly, and by means of his arms and legs paddles himself across the water. Even with this assistance he would need all his breath before his efforts landed him on the opposite bank, but in the sculptures each soldier is represented as retaining in his mouth one of the legs of the inflated skin, into which he continues to blow as into a bagpipe. The inflation of the skin could be accomplished far more effectually on land before he started, and the last leg of the beast could then be tied up so that the swimmer need not trouble himself further about his apparatus, but devote his entire attention to his stroke. This, no doubt, was what actually happened; but the sculptor wishes to indicate that his skins are not solid bodies but full of air, and he can find no better way of showing it than by making his swimmers continue blowing out the skins, though in the act of crossing. This instance may be taken as typical of the spirit of primitive art, which, diffident of its own powers of portrayal, or distrusting the imagination of the beholder, seeks to make its meaning clear by means of conventional devices.

with paint, or only parts of it picked out in colour, cannot be decided.

Even more famous than their sculptured slabs are the colossal winged lions and human-headed bulls of the Assyrians. They fired the imagination of the Hebrew prophet Ezekiel, and they impress the beholder of to-day. These creatures were set on either side of a doorway or entrance, and were intended to be viewed both from the front and from the side—a fact that explains why they are invariably represented with five legs. A very curious effect was often produced by running inscriptions across the bodies of these beasts without regard to any detail of carving or design. ASur-nāṣir-pal was a great offender in this respect. Not content with scarring his colossi in this manner, he ran inscriptions over his bas-reliefs as well, and displayed a lack of imagination by repeating the same short inscription again and again with but few variations.

Carving in the round was rarely practised. A stone statuette of Ašur-nāṣir-pal, a seated stone figure of Shalmaneser II., and some colossal statues of the god Nebo have been found; but, though the proportions of the figure are more or less correct, their treatment is exceedingly stiff and formal. Modelling in clay, however, was common. A few small clay figures of gods have been discovered, and we possess clay models of the favourite hounds of Ašur-bāni-pal. We know, too, that the stone bas-reliefs were first of all designed and modelled on a smaller scale in clay: the British Museum possesses fragments of these clay designs, as well as the rough drafts on clay tablets which the Assyrian masons copied when they chiselled the inscriptions.

11. Metal work.

In their metal work the Assyrians were very skilful. This we may gather both from the monuments and from the actual examples of the art that have come down to us. A good majority of the originals of the metal trappings, ornaments, etc., that are represented on the monuments must have been cast. The metal weights in the form of lions are among the best actual examples of casting that we possess. In the British Museum, moreover, there is to be seen an ancient mould that was employed for casting. It was found near Mōṣul, and, although it must be assigned to a period about two centuries subsequent to the fall of Nineveh, it probably represents the traditional form of that class of matrix, and we shall not be far wrong in supposing that such moulds were extensively employed in the Assyrian foundries of at least the later empire. The mould in question is made of bronze, and is formed in four pieces which fit together accurately. Three holes may be observed on the flat upper surface. Into these holes the molten metal was poured. When the mould was opened after its contents had been given time to cool, there would be seen lying within it three barbed arrow-heads.

It was, however, in the more legitimate art of metal-beating that the Assyrians excelled. Much of the embossed work that adorned their thrones, their weapons, and their armour was wrought with the hammer, while the dishes and bowls from Nimriid and the shields from the neighbourhood of Lake Van are covered with delicate *repoussé* work, the design on the upper side being finished and defined by means of a graving tool. The largest and finest examples of this class of work that have been preserved are the bronze sheathings of the gates of Shalmaneser II., which were excavated at Tell-Balawrlt in 1879 and are now to be seen in the British Museum. The bronze gates of nations in antiquity were not cast in solid metal. They would have been too heavy to move, and metal was not obtained, in sufficient quantities to warrant such an extravagance. The gate was built principally of wood, on which plates of metal were fastened; the object being to strengthen the gate against an enemy's assault, and especially to protect its wooden interior from destruction by fire. The metal coverings of Shalmaneser's gate consist of bronze. bands which at one time strengthened and adorned it. A brief inscription runs round them, while the space is filled with designs in delicate relief illustrating the battles and conquests of the king and in general treatment resembling the bas-reliefs of stone to which reference has been made.

Iron was used by the Assyrians; but bronze was the favourite substance of the metal-worker. Specimens of the bronze employed have been analysed. and it has been ascertained that it consists roughly of one part of tin to ten parts of copper. We know from the jewels represented on the monuments that ornamental work in silver and in gold was not uncommon, and specimens of inlaid work and of work in ivory have been found at Nimrūd. Many of the examples we possess, however, betray a strong Egyptian influence, apparent in the general method of treatment and in the occurrence of the scarabæus, the cartouche, and a few hieroglyphs. Thus they must be regarded not as genuine Assyrian productions, but rather as the work of Phcenician artists copying Egyptian designs. Enamelling of bricks was extensively employed as a means of decoration. The designs consist sometimes of patterns, and sometimes of scenes in which men and animals take part. The colouring is subdued, and the general effect is harmonious. The fact that the tones of the colouring are so subdued is regarded by some as a proof that they have fadecl. Some excellent examples of enamelled architectural ornamentation in terra-cotta have been found at Nimrūd. They bear the name of Ašur-nāṣir-pal.

12. Seals, etc.

Engraving on gems and the rarer stones and marbles was an art to which the Assyrians especially devoted themselves. There have been found a few gems and seals that are oval in shape; but the general form adopted was that of a cylinder. Those of cylindrical form vary from about an inch and a half to two inches in length and from about half an inch to an inch in diameter. They were pierced along the centre so that the wearer could suspend them from his person by a cord. The use to which they were put was precisely similar to that of the signet ring. A Babylonian or an Assyrian, instead of signing a document, ran his cylinder over the damp clay tablet on which the deed he was attesting had been inscribed. No two cylinder seals were precisely alike, and thus this method of signature worked very well. As every wealthy Assyrian carried his own seal-cylinder, it is not surprising that time has spared a good many of them. (It may be noticed in passing that the class of poorer merchants and artisans did not carry cylinders. When they attested a document they did so by impressing their thumb-nail on the clay of the tablet. Whether a certain social status brought with it the privilege of carrying a cylinder, or whether the possession of one depended solely on the choice or rather on the wealth of its possessor, is a question that has never been solved.)

The work on the cylinders is always intaglio, the engraver aiming at rendering beautiful the seal impression rather than the seal itself. The subjects represented, which are various, include acts of worship, such as the introduction by a priest of a worshipper to his god, mythological episodes, emblems of gods, animals, trees, etc.: the engravings are generally religions or symbolical. The official seal of the Assyrian kings forms the principal exception to this general rule; it is circular and represents a royal personage slaying a lion with his hands. The character of the work itself varies from the rudest scratches to the most polished workmanship, and it may be regarded as a general rule that the more excellent the workmanship the later the date. The earlier seals are inscribed by means of the simplest form of drill and graver, and the marks of the tools employed for hollowing are not obliterated, the heads of the figures being represented by mere holes, while the bodies resemble fish-bones; it should be noted, however, that

early Babylonian seals of great beautv have been found at Telloh.

It' is strange that the Babylonian and the Assyrian, living in a land of clay, building their houses of brick and writing on clay tablets — in fact, with plastic clay constantly passing through their hands — produced no striking specimens of pottery. They employed clay for all their vessels; but the forms these assumed do not show great originality, and ornamentation was but niggardly applied. That the Assyrians were glass-blowers is shown by the discovery of small glass bottles and bowls.[1]

13. Pottery.

The domestic furniture of the Assyrians does not demand a detailed description. All that was made of wood has perished. Only the metal fittings survive; but these, with the evidence of the bas-reliefs, point to a high development of art in this direction. Perhaps the most sumptuous specimens of Assyrian furniture that the monuments portray are the throne in which Sennacherib is seated before Lachish, the furniture in the 'garden-scene' of Ašur-bāni-pal (both in the British Museum), and the chair of state or throne of Sargon on a slab from Khorsabad in the Louvre.

14. Furniture and embroidery.

Of the art of embroidery, also, as practised by the Assyrian ladies, the invaluable evidence of the monuments gives **us** an idea. The clothes of the sculptured figures are richly covered with needle-work, especially on the sleeves and along the bottom of robes and tunics, while the royal robes of Ašur-nāṣir-pal are embroidered from edge to edge. The general character of the designs, whether consisting of patterns or of figures, resembles that of the monuments themselves.

One other subject must be noted in this connection, — it does not strictly fall under the heading either of art or of architecture, though it is closely connected with branches of both, — the knowledge of mechanics that the Assyrians display. To those who have had any experience in the removal or fixing of Assyrian sculpture, and know the thickness of the bas-reliefs and the weight of even the smallest slab, the energy and skill required by the Assyrians to quarry, transport, and fix them in position is little short of marvellous. Yet all this **was** accomplished with the aid of only a wedge, a lever, a roller, and a rope. Representations of three of these implements in use are to be seen in the building-slabs of Sennacherib.

15. Mechanics.

Among mechanical contrivances may be mentioned the crane for raising water from the rivers to irrigate the fields, and the pulley employed for lowering or raising **a** bucket in a well. The ingenuity of the Assyrians is apparent also in their various engines of war and the elaborate siege-train that accompanied their armies. The battering-rams, the scaling-ladders, the shields and pent-houses to protect sappers while undermining a wall — not to mention their chariots, weapons, and defensive armour — all testify to their mechanical skill.

The position of Assyria was favourable for commerce. Occupying part of the most fertile valley of W. Asia, she formed the highway between E. and W. Of her two great rivers, the Euphrates approaches within one hundred miles of the Mediterranean coast, yet empties its waters into the Persian Gulf. At the time of the Assyrian empire a highway of commerce must have lain from the Phcenician coast to Damascus and thence along the Euphrates to the Indian Ocean. Many important caravan routes also lay through Assyria. Nineveh maintained commercial relations with the districts around Lake Urŭniyah, and with Ecbatăna, while to the west the Phœnician traders journeyed by the Sinjar range to Thapsăcus on the Euphrates, thence south to Tadmor and through Damascus into Phcenicia: a second western caravan route lay through Ḥarrān into upper Syria and Asia Minor, while Egypt's trade with Assyria as early as the fifteenth century is attested by the Amarna tablets. The prophet Ezekiel has borne witness to the presence of Assyrian merchants at Tyre in his time; yet it was the nations that traded with Assyria rather than Assyria with the nations, for the Assyrians were essentially a people who preferred to acquire their wealth by conquest rather than in the market-place. The internal trade of Assyria is represented by the contract tablets dating from the ninth century to the end of the empire, that have been found at Kuyunjik. These tablets — not nearly so many as those discovered throughout Babylonia (*q.v.*, § 19, beg.) — deal with the sale of slaves, cattle, and produce, the purchase of land, etc., and bear witness to the internal prosperity of Assyria. They are written more carefully than the majority of those of Babylonia; and the Babylonian device of wrapping the tablet in an envelope of clay on which the contract was inscribed in duplicate, with a view to its safer preservation, was not often adopted.

16. Commerce.

The form of government in Assyria throughout the whole course of her history was that of a military despotism. The king was supreme. He was Ašur's representative on earth and under the special protection of the gods. Whatever policy he might aaopt was Ašur's policy, and it was the duty of every subject of Assyria to carry out his will. The nation therefore existed for the monarchy, not the monarchy for the nation. The kingship rested on the army, on which it relied to quell rebellion and maintain authority as well as to conquer foreign lands. The army was in consequence the greatest power in the state. Its commander-in-chief, the *turtan* or *tartan*, held a position next to that of the king himself, in whose absence he led the troops and directed operations (cp TARTAN). The *šaḳū* was an important lower officer; the *rab-ḳiṣir* was his superior; and the *šud-šaḳē* and *rab-šaḳē* were only second to the tartan (cp RABSHAKEH). The titles of many court officers are known; but it is difficult to ascertain their functions. The more important were eligible for the office of the *limmu*, to which they succeeded in order, each giving his name to the year during which he held office (see § 19 and CHRONOLOGY, § 23). In a military state such as Assyria a system of civil administration, it may be said, had almost disappeared. The governors of the various cities in the realm, whose duty it was to maintain order and send periodical accounts to the king, were not civilians. In fact, every position of importance in the empire was filled from the army. Priests and judges exercised a certain authority; but it was small in comparison with that of similar classes in Babylonia.

17. Government.

It was Assyria that at first attracted the attention of explorers, though within recent years Babylonia has enjoyed a monopoly of excavation and discovery

18. Excavations.

In the year 1820 Rich, the resident of the East India Company at Bagdad, visited Mōṣul and made a superficial examination of the mounds of Kuyunjik and Nebi Yiinus. He obtained some fragments of pottery and a few bricks inscribed in cuneiform characters, and he published an account of what he bad seen. It was not until 1842 that attention was again attracted to these mounds. Botta, the French Consul at Mōṣul, then began to explore Kuyuniik. His efforts, however, did not meet with much success, and next year he transferred **his** attention to Khorsabad, 15 m. to the N. of Mōṣul. There he came across the remains of a large building that subsequently proved to be the palace of Sargon, king of Assyria (722-705 B.C.). The majority of the sculptures that he and Victor Place excavated on this site are to be found in the Louvre, some, however, were obtained for the British Museum by Sir Henry Rawlinson.

In 1845 Sir Henry Layard explored the mounds at Nimrūd

[1] They shine with beautiful prismatic tints. Most glass that has been buried for a considerable period, indeed, whether of Assyrian, Egyptian, Greek, or Roman manufacture, presents this iridescent appearance. It is a popular error to suppose that it possessed these tints from the beginning and that the art by which the colouring was attained has perished with those who practised it. The ancients must not he allowed to take the credit due to nature. The earth and the atmosphere acting on the surface of the glass have liberated the silex, and the process of decomposition is attended with the iridescent appearance.

and Kuyunjik, undertaking excavations at these places for the trustees of the British Museum ; these diggings were continued by Loftus, Rassam, and others, under the direction of Sir Henry Rawlinson, who was then serving as Consul-General and political agent at Bagdad, and they resulted in the discovery of the principal remains of Assyrian art that have been recovered. At Nimriid the palaces of Ašur-nāṣir-pal (884-860 B.C.), Shalmaneser II. (860-824 B.C.), and Esarhaddon (681-669 B.C.) have been unearthed (cp CALAH), and at Kuyunjik (cp NINEVEH) the palace of Sennacherib (705-681), and that of Ašur-bāni-pal (669-625). The bas-reliefs, inscriptions, etc., from that palace are preserved in the British Museum. At Kuynnjik (1852-54) the famous library of Ašur-bāni-pal, from which the greater part of our knowledge of Babylonian and Assyrian literature is derived, was discovered. At Kal'at Sherkāt and at Sherif Khān excavations were successful ;'important stone inscriptions and clay cylinders of the early kings were found at Karat Sherkāt.

The years 1878-79 were times of remarkable discoveries. During this period the 'finds' at Kuyunjik included the great cylinder of Ašur-bāni-pal (*q.v.*), the most perfect specimen of its kind extant; at Nimrūd a large temple dating from the time of Ašur-nāṣir-pal was nnearthed, while excavation at Tell-Balawāt resulted'in the recovery of a second temple of Ašur-nāṣir-pal and the bronze coverings of the gate of Shalmaneser II. (cp *supra*). Besides the excavators and explorers of Assyria to whom reference has been made, two others should he mentioned —George Smith and E. A. Wallis Budge. George Smith in the years 1873, 1874, and 1875-76, undertook three expeditions to that country, on the last of which he lost his life. The most recent additions to the collection of cuneiform tablets from Kuyunjik were made by Budge in the years 1888 and 1891.

Of the Assyrian antiquities which have been recovered, most of the sculptures of Sargon from Khorsabād are in the Louvre ; Berlin possesses a stele of Sargon found at Cyprus (cp SARGON) and a stele of Esarhaddon ; a few slabs from the palace of ASur-nāṣir-pal have found their way into the museums at Edinburgh, the Hague, Munich, Ziirich, and Constantinople, and others from Kuyunjik into private galleries ; almost all else is to be found within the walls of the British Museum.

19. Chronology. There are four main sources of information for the settlement of Assvrian chronology—the so-called 'Eponymlists' (seebelow),thechronological notices scattered throughout the historical inscriptions (see § 20, beg.), the &ealogies some of the kings give of themselves (see § 20, end), and lastly those two most important documents which have been styled the 'Synchronous History' (§ 21, beg.) and the 'Babylonian Chronicle' (§ 21, end).

The early Babylonians had counted time by great events, such as the taking of a city, or the construction of a canal (cp CHRONOLOGY, § 2, beg.). This primitive system of reckoning, by which a period or date could be but roughly estimated, gave place among the later Babylonians to the fashion of counting time according to the years of the reigning king.

The Assyrians adopted neither of these methods. They invented a system of their own. They named the years after certain officers, each of whom may possibly have been termed, a *līmu* or *limmu*, though the majority of scholars agree in regarding this term as referring not to the officer himself, but to his period of office. These officers or eponyms were appointed in a general rotation ; each in succession held office for a year and gave his name to that year; the office was similar to that of the archonate at Athens or the consulate at Rome. Lists of the *limmus* have been preserved from the reign of Rammān-nirari II. (911-890 B.C.) down to that of Ašur-bāni-pal (669-625 B.c.). Some of them merely state the name of the eponym ; others add short accounts of the principal events during his term of office. Now, it is obvious that the dates of all the years in this known succession will be known if there be any of them that can be determined independently. It fortunately happens that there is such a year. From the list we know that in the eponymy of Pur-Šagali in the month of Sivan (May-June) the sun was eclipsed, and astronomers have calculated that there was a total eclipse at Nineveh on the 15th of June 763 B.C. Hence the year of Pur-Šagali is fixed as 763, and the dates of the eponyms for the whole period covered by the lists are determined (see further CHRONOLOGY, § 24, and cp below, § 32).

For the chronology before this period other sources must be sought. Approximately it can sometimes be determined by means of data supplied by the inscriptions of the kings in the form of chronological notices or remarks.

20. Earlier period. For example, Sennacherib in his inscription engraved on the rock at Bavian (see *KB* 2 116 *ff.*), in recounting his conquest of Babylon (689 B.c.), adds that Rammān and Sala. the gods of the city of Ekallāti which Marduk-nādin-aḫē, king of Aklrad, in the time of Tiglath-pileser, king of Assyria, had carried away to Babylon, he now recovered and restored to their place after a lapse of 418 years (cp below, § 28). According to Sennacherib's computation, therefore, Tiglath-pileser I. must have been reigning in the year 1107 B.C., and from the inscription of Tiglath-pileser himself on his cylinders (cp below, § 28, beg.) we know that this year is probably not among the first five of his reign (cp below, § 28). Moreover, Tiglath-pileser himself tells us that he rebuilt the temple of Anu and Rammān, which sixty years previously had been pulled down by Ašur-dān because it had fallen into decay in the course of 641 years since its foundation by Šamši-Rammān (cp below, § 25). This notice, therefore, proves that Ašur-dān must have been on the throne about the years 1170 or 1180 B.C., and further approximately fixes the date of Šamši-Rammān as about the year 1820. The date of one other Assyrian king can be fixed by means of a reference made to him by one of his successors. Sennacherib narrates (cp below, § 27) that a seal of Tukulti-Ninib I. had been brought from Assyria to Babylon, where after 600 years he found it on his conquest of that city. Sennacherib conquered Babylon twice, once in 702 and again in 689 ; it may be concluded, therefore, that Tukulti-Ninib reigned in any case before 1289 B.c., and possibly before 1302 B.C. We thus have four settled points or pegs on which to hang the early history of Assyria.

Further assistance in the arrangement of the earlier kings is obtained from genealogies. Rammān-nirari I., for example, styles himself the son of Pudil (=Pudi-ilu), grandson of Bēl-nirari, great grandson of Ašur-uballiṭ, all of whom, he states, preceded him on the throne of Assyria. Most of the Assyrian kings of whom we possess inscriptions at least state the name of their father, while in one instance we know the relationship between two early kings from a considerably later occupant of the throne, Tiglath-pileser I., informing us that Šamši-Rammān was the son of Išmi-Dagan and that each was an early *patesi* of Assyria. We thus know to a great extent the order in which the kings must be arranged, and in cases where a son succeeds his father we can assign approximately the possible limits of their respective rules.

21. Synchronous history. A further aid is found in the 'Synchronous History' of Assyria and Babylonia. This inscription was an official document drawn- up with the aim of giving a brief summary of the relations between Babylonia and Assyria from the earliest times in regard to the boundary line dividing the two countries. The chief tablet on which this record is inscribed is, unfortunately, broken; but much still remains which renders the document one of the most important sources for Babylonian and Assyrian history. From it we ascertain for considerable periods which kings of Babylonia and Assyria were contemporaries.

Similar information for the period from about 775 to 669 B.C. is obtained from the Babylonian Chronicle.

Now, we know the order and the length of the reigns of a great majority of the Babylonian kings from the Babylonian lists of kings that have been discovered, and the dates of some can be fixed, like those of the earlier Assyrian kings, from subsequent chronological notices (cp BABYLONIA, § 38). The dates and order, therefore, of the kings of both Babylonia and Assyria can to some extent be approximately settled independently of one another, and each line of kings can be controlled

from the other by means of the bridges thrown across between the two by the 'Synchronous History' and the 'Hnbylonian Chronicle.'

A further means of control is supplied by the points of contact that we can trace between Assyria and Egypt. Such are the Egyptian campaigns of Ašur-bāni-pal recounted on his cylinder inscription and the letter from Ašur-uballiṭ to Amenophis IV., recently found at Tell el-'Amārna, and now preserved in the Gizeh Museum. These points of contact are not, however, sufficient to warrant a separate classification; and to go to Egyptian chronology to fetch help for that of Assyria would be to embark on an explanation *ignoti per ignotius* (cp EGYPT, § 55 *f.*, and CHRONOLOGY, § 19).

Assyrian chronology, therefore, unlike that of early Babylonia, may be regarded as tolerably fixed. The dates of the later Assyrian kings, with the exception of the successors of Ašur-bāni-pal, can be settled almost to a year, while the dates assigned by various scholars to the earlier Assyrian kings, though differing, do not differ very widely. The data summarised above, which must form the basis of every system of Assyrian chronology, are not elastic beyond a certain point. Thus, whilst no two historians agree precisely as to the dates to be assigned to many of these earlier kings, the maximum of their disagreement is inconsiderable, and the results arrived at by almost any one of them may be considered approximately correct.

22. Names. With the Semitic races in general and the Babylonians and Assyrians in particular proper names retained their original forms with great persistency. Among these two nations, in fact, many names consist of short sentences, complete and perfectly grammatical; indeed, were it not for the determinatives placed before them to show that they are names ( for males,  for females) the difficulty of reading Assyrian texts would be considerably increased.

The following are translations of some of the names of Assyrian kings the interpretation of which may be regarded as certain. Where the real Assyrian form of the name differs from the form now in common use it is added in brackets:—

Išmi-Dagan . . . . 'Dagon hath heard.'
Šamši-Rammān . . . 'My sun is Rimmon.'
Ašur-bēl-nišišu . . . 'Ašur is lord of his people.
Puzur-Ašur . . . . 'Hidden in Ašur.
Ašur-nādin-aḫē . . . 'Ašur giveth brethren.'
Ašur-uballiṭ . . . . Ašur hath quickened to life.
Bēl-nirari . . . . . 'Bel is my helper.
Rammān-nirari . . . 'Rimmon is my helper.
Shalmaneser (Šulmanu-ašaridu) 'Šulman is chief.
Tukulti-Ninib . . . 'My help is Ninib.'
Bēl-kudur-uṣur . . . 'Bel, protect the boundary!
Ninib-pal-Ešara . . . 'Ninib is the son of Ešara.'
Ašur-dān . . . . . 'Ašur is judge.'
Ašur-rēš-iši . . . . 'Ašur, raise the head!'
Tiglath-pileser (Tukulti-pal-Ešara) 'My help is the son of Ešara.
Ašur-bēl-kala . . . . 'Ašur is lord of all.'
Ašur-nāṣir-pal . . . 'Ašur protecteth the son.'
Ašur-nirari . . . . 'Ašur is my helper.'
Sargon (Šarru-kīnu) . 'The legitimate king.'
Sennacherib (Sin-aḫē-erba) 'Sin (*i.e.*, the Moon-god) hath increased "brethren."'
Esarhaddon (Ašur-aḫ-iddina) 'Ašur hath given a brother.'
Ašur-bāni-pal . . . 'Ašur is the creator of a son.
Ašur-etil-ilāni . . . 'Ašur is prince of the gods.'
Sin-šar-iškun . . . . 'Sin hath established the king.'

23. History. The beginnings of the Assyrian empire are not, like those of Babylonia, lost in remote antiquity. It is far more recent in its origin. The account contained in Gen. 10 11 to the effect that the Assyrians went forth from the Babylonians and founded their own cities is supported by all the evidence we can gather from the inscriptions. It is true that no actual account of this emigration has yet been found among the archives of either nation; but every indication of their origin tends to support the biblical account, for the Assyrians in all that they have left behind them betray their Babylonian origin. Their language and method of writing, their literature, their religion, and their science were taken over from their southern neighbours with but little modification, and their very history is so interwoven with that of Babylonia that it is often difficult to treat the two countries separately.

24. Settlement. The period at which the Assyrian offshoot left its parent stem, though not accurately known, can be set within certain limits. It must have been at least before 2300 B.C. The Babylonian emigrants, pushing northwards along the course of the Tigris, formed their first important settlement on its W. bank some distance to the N. of its point of junction with the Lower Zāb. Here they founded a city, and called it Ašur after the name of their national god,—a city that long continued to be the royal capital of the kingdom.

25. Earliest rulers. The oldest Assyrian rulers did not bear the title of king. They bore that of *iššakku*, a term equivalent to the title *patesi*, assumed by many rulers of the old Babylonian cities in the S. The phrase '*iššakku* of the god Ašur' is not to be taken in the sense of 'priest.' In all probability it implies that the ruler was the representative of his god—an explanation that is quite in accordance with the theocratic feeling of the period.

The earliest iššakkus at present known to us are Išmi-Dagan and his son Šamši-Rammān. The latter built a temple to the gods Anu and Rammān, which, Tiglath-pileser I. tells us, fell into decay; 641 years afterwards Ašur-dān pulled it down, and 60 years later it was rebuilt by Tiglath-pileser himself. This reference enables us to fix the date of Šamši-Rammān at about 1820, and it is usual to assign to Ilmi-Dagan, his father, a date some twenty years earlier, *circa* 1840 B.C. In addition to his buildings at Ašur, Šamši-Rammān restored a temple of Iltar at Nineveh. The names of other iššakkus are known, although their dates cannot be determined.

Bricks, for example have been found at Ḳal'at-Sherḳāt, the site of the ancient city of Ašur, which bear the name of a second Šamši-Rammān, the son of Igur-kapkapu, and record that he erected a temple to the national god in that city. Another brick from the same place is inscribed with the name of Irišum, the son of Ḫallu, commemorating his dedication of a building to the god Ašur for the preservation of his own life and that of his son.

There are no data for determining the relation of Assyria to Babylonia at this period. Whether the early iššakkus still owed allegiance to their mother country or had already repudiated her claims of control is a question that cannot be decided with certainty. It is generally supposed, however, that at some period between 1700 and 1600 B.C. Assyria finally attained her independence.

26. First kings. The oldest Assyrian king whose name is known to us is Bēl-kapkapu. Rammān-nirari III., in an obscure passage in one of his inscriptions, mentions Bēl-kapkapu as one of his earliest predecessors on the throne of Assyria. This passage is, however, the only indication we possess of the time at which he ruled. The first Assyrian king of whom we have more certain information is Ašur-bēl-nišišu. With this king our knowledge of Assyrian history becomes more connected, and we can trace in greater detail the doings of the various kings and the relations they maintained with Babylonia. The source of information that now becomes available is the 'Synchronous History' (see above, § 21). *circa* 1480.

From this document we learn that Ašur-bēl-nišišu was on friendly terms with Kara-indaš, a king of the third Babylonian dynasty, with whom he formed a compact and determined the boundary that should divide their respective kingdoms. These friendly relations were maintained by Puzur-Ašur, king of Assyria, who concluded similar treaties with Burna-Buriaš, king of Babylonia. Puzur-Ašur was probably succeeded by Ašur-nādin-aḫē (*circa* 1420). This king is mentioned in a letter of Ašur-uballiṭ to Amenophis IV., king of Egypt, in which he refers to Ašur-nādin-aḫē as his father. How long the friendly relations between Assyria and Babylonia continued we *circa* 1440.

cannot say; hut it was impossible that friction should always he avoided. Assyria was proud of her independence, while Babyloniacould not hut be jealous of her growing strength. Thus it was not long before their relations became hostile. **It** is under *circa* 1410. Ašur-uballiṭ that we first find the two nations in open conflict. Ašur-uballiṭ, to cement his friendship with Babylonia, had given his daughter Muballiṭat-šerũa in marriage to **a** Babylonian king, and Kara-ḫardaš, the offspring of this union, in time succeeded his father on the throne. He was slain, however, in **a** revolt, and Nazi-bugaš, ***a*** man of unknown origin, was set up in his stead. To avenge the death of his grandson, Ašur-uballiṭ invaded Babylonia, slew Nazi-bugaš, and set the youngest son of Burna-Buriaš, Kurigalzu II., on the throne. (Such is the account given **in** the 'Synchronous History' of Ašur-uballiṭ's intervention in Babylonian affairs. It may he mentioned, however, that a parallel text contains a somewhat different version of the affair, with which the account in the 'Synchronous History' has not yet heen satisfactorily reconciled.) Kurigalzu did not long maintain friendship with Assyria. Soon we find him at war with Ašur-uballiṭ's sou *circa* 1380. and successor, Eel-nirari. Bēl-nirari, however, defeated him at the city of Sugagu, and after plundering his camp added to the Assyrian territory half of the country from the land of Šubaru to Babylonia. Bel-nirari's son Pudi-ilu ***(circa*** 1360) retained the territory his father had acquired, but did not attempt to make further encroachments on the S. He undertook successful expeditions, however, against the tribes on the E. and SE. of Assyria. **We** possess an inscription on a brick from his palace at Ašur, and another inscription of his on **a** six-sided stone (in the Eritish Museum) records that he erected a temple to Šamaš the Sun-god. His son *circa* 1345. Rammān-nirarı I., after strengthening the Assyrian rule in the territory recently acquired by his father, turned his attention to his S. boundary. He conquered the Babylonian king Nazi-maruttaš in Kār-Ištar-Akarsallu, and added considerably to his empire.

Rammān-nirari was succeeded by his son Shalmaneser I. He has left us no account of the expeditions he *circa* 1330. undertook; but that he was a great conqueror we gather from a reference in the annals of Ašur-nāṣir-pal. This king relates that in his reign the Assyrians whom Shalmaneser, king of Assyria, a prince who preceded him, had settled in the city of Ḫalzidipḫa revolted under Ḫulai, their governor, and took the royal Assyrian city of Damdamnsa. These places lay on the upper course of the Tigris; and it is evident from Ašur-nāṣir-pal's account that Shalmaneser had formed a sort of military outpost *at* this spot which shows that he must have undertaken successful expeditions against the countries to the NW. of Assyria. We may conclude that it was in consequence of this extension of his territory along the Tigris that Shalmaneser transferred his capital from ASur in the south, which had formed the royal residence of Assyria, to Calah, a city of which he was the founder, as we learn from Ašur-nāṣir-pal. This new capital was situated about eighteen miles S. of Nineveh (cp CALAH). Shalmaneser, however, did not neglect the older capital. He enlarged its royal palace and restored the great temples.' We know also that he restored the great temple of Ištar at Nineveh.

27. Shalmaneser I., etc.

On his death he was succeeded by his son Tukulti-Ninih, who, like his father, busied himself in extending *circa* 1290. the NW. limits of his kingdom. At the sources of the Subnat, a river that joins the Tigris some distance above the modern Diār-bekr, he caused an image of himself to be hewn in the rock. He conquered Babylonia, and for seven years governed the country by means of tributary princes. Though we have not recovered any actual inscription of this king, we possess a copy of one made by the orders of Sennacherib, on a clay tablet in the British Museum. The original was inscribed on a seal of lapis-lazuli, and Sennacherib tells us it had been carried from Assyria *to* Babylon. Six hundred years later, says Sennacherib, on his conquest of that city, he found the seal among the treasures of Babylon and brought it back (cp above, § 20). The inscription itself is short, merely containing the name and titles of Tukulti-Ninib, and calling down the vengeance of ASur and Rammān on any one who should destroy the record. How or at what period the seal was brought to Babylon cannot be said with certainty; but it is not improbable that it found its way there during Tukulti-Ninib's occupation of the country. This occupation was not permanent. At the end of seven years the nobles of Babylon revolted, and set Rammān-šum-uṣur, or Rammān-šum-nāṣir (the name may be read in either way), on the throne there as an independent king. Tukulti-Ninib was *not* a popular ruler, for he was slain in **a** revolt by his own nobles, who set his son, Ašur-nāsir-pal, upon the throne. We possess an Assyrian copy of a letter written by a Babylonian king named Rammān-šum-nāṣir to Ašur-narara and Nabū-daian, kings of Assyria. If, as has been suggested, the writer of this letter and the king who succeeded Tulcnlti-Ninib on the throne of Babylon are identical, we obtain the names of two other Assyrian kings of this period.

A few years later, under Bēl-kudur-uṣur ***(circa*** 1210), we find the Assyrians and Babylonians again in conflict. Bēl-kudur-uṣur, *circa* 1205. the Assyrian king, was slain in the battle; but Ninib-pal-ESara retreated with the Assyrian army, and when the Babylonians followed up their advantage by an invasion of Assyria he defeated them and drove them from the country. The Babylonians, however, though repulsed, appear to have regained **a** considerable part of their former territory from the Assyrians. The next occupant of the throne ***was*** *circa* 1200. Ašur-dān, the son of Ninib-pal-Ebara. He retrieved the disasters which his father had sustained at the hands of the Babylonians. He invaded Babylonia against Zamama-šum-iddin, captured the cities of Zaban, Irria, and Akarsallu, and returned with rich booty to Assyria. The only other fact that **we** know of this king **was** that he pulled down the temple of Rammān and Ašur which had heen erected by Šamši-Rammān, hut had since fallen into decay. His must have been an energetic reign, to justify the eulogy pronounced on him by his great-grandson Tiglath-pileser I. This monarch describes him as one 'who wielded a shining sceptre, who ruled the men of Bel, whose deeds and offerings pleased the great gods, and who lived to **a** good old age. Ashur-dān was succeeded by his son Mutakkil-Nusku ***(circa*** 1150), of whose reign we know nothing. He in turn was succeeded by his son *circa* 1140. Ašur-rēš-iši, whom Tiglath-pileser calls 'the mighty king who conquered the lands of the foe and overthrew all the exalted'; and from **a** clay howl of his, hearing an inscription, we learn that the peoples of Liillumi and Kuti were among those he overthrew. He **was** victorious against the Babylonians. The Babylonian king, Nehuchadrezzar I., desiring to extend the northern limits of his country invaded Assyria and besieged **a** border fortress. Ašur-rēš-iši, however, summoned his chariots of war, and on his advance the Babylonians retreated burning their siege-train. Nehuchadrezzar, with fresh chadots and troops, soon returned; hut Ašur-rēš-iši, after reinforcing his own army, gave him battle and inflicted on him a crushing defeat. The Babylonian camp was plundered, and forty chariots fell into the hands of the Assyrians.

On the death of Ašur-rēš-iši the throne passed to his *circa* 1120. son Tiglath-pileser I., whose reign marks an epoch in Assyrian history. He is, moreover, the first Assyrian monarch who has left us a detailed record of his achievements. The great inscription of this king is contained on four octagonal cylinders of clay which he buried at the four corners of the temple of Rammān at ABur *to* serve as a permanent record of his greatness and of the extent of the Assyrian empire during his reign. Each of the four cylinders contains the same inscription. Where one is broken or obscure the text can be made out from the others.[1]

28. Tiglath-pileser I.

In the course of the introduction with which he prefaces the account of his expeditions he gives the following description of himself: 'Tiglath-pileser, the mighty king, the king of hosts who has no rival, the king of the four quarters, the king of all rulers, the lord of lords, . . . the king of kings, the excellent priest who, at the command of the Sun-god, was entrusted with the shining sceptre and has ruled all men who are subject to Bēl, the true shepherd whose name has heen proclaimed unto the rulers, the exalted governor whose weapons ASur has commanded and whose name for the rule of the four quarters he has proclaimed for ever, . . . the mighty one, the destroyer who like the blast of **a** hurricane over the hostile land has proved his power, who by the will of Bēl has no rival and has destroyed the foes of ASur.' On the conclusion of this preface the inscription goes on to recount the various campaigns in which Tiglath-pileser was engaged during the first five years of his reign. He first advanced against the inhabitants of Mušku (the Meshech of the OT; see TUBAL), who had overrun and conquered the land of Ḳummuḫ, which lay on hoth sides of the Euphrates to the NW. of Assyria. Tiglath-pileser, therefore, crossed the intervening mountainous region and defeated their

[1] Translation in *KB* 114-47.

five kings with great slaughter. 'The bodies of their warriors,' he says, 'in the destructive battle did I cast down like a tempest. Their blood I caused to flow over the valleys and heights of the mountains. Their heads I cut off, and around their cities I heaped them like . . . Their spoil, their possessions, their property without limit, I brought out. Six thousand men, the remainder of their armies, who before my weapons had fled, clasped my feet (*i.e.*, tendered their submission). I carried them away and reckoned them as the inhabitants of my land.' Tiglath-pileser then attacked the land of Ḳummuḫ, burnt the cities, besieged and destroyed the fortress of Šeriše on the Tigris, and captured the king. He defeated the tribes that came to the assistance of Kummuḫ, and after receiving the subiission of the neighbouring city of Urarṭinaš returned to Assyria with great booty, part of which he dedicated to the gods ASur and Rammān. This expedition was followed by one against the land of Šubari (or Šubarti), in the course of which he defeated four thousand warriors of the Ḫatti (see HITTITES) and captured one hundred and twenty chariots. Another campaign in the mountainous regions of the NW. met with similar success, and resulted in the submission of many small states and cities. Tiglath-pileser now devoted his energies to extending his border in another direction. He crossed the Lower Zāb and overran the districts of Murattaš and Sarada'uš to the S. of Assyria. Shortly afterwards, however, he returned to the N., whence he hrought back with him the captured images of twenty-five gods, which he set up as trophies in the temples of his own land. Tiglath-pileser next extended his conquests still farther north into the district around the upper course of the Euphrates. The mountains he passed with great difficulty, and crossed the Euphrates itself on rafts which his troops constructed out of the trees that clothed the hill-sides. Here twenty-three kings of the land of Na'iri, alarmed at his approach, assembled their combined forces to give him battle. 'But,' writes Tiglath-pileser, 'with the violence of my mighty weapons I oppressed them, and the destruction of their numerous host I accomplished like the onslaught of the Storm-god. The corpses of their warriors I scattered in the plains and on the mountain-heights.' After completing the subjugation of the district he restored the kings he had captured, and in addition to the spoil he had taken he received from them as tribute twelve thousand horses and two thousand oxen. The Assyrian king now turned his troops against the region of the W. Euphrates. He subdued the district around the city of Carchemish, and even extended his conquests beyond the river, which his army crossed on rafts buoyed up by inflated skins. The last campaign of which we have a detailed account is that against the land of Muṣri to the N. of Assyria, the inhahitants of which, when at length driven into their chief city of Arini, tendered their submission. Tiglath-pileser then marched through the neighbouring country carrying with him fire and sword, burning the cities he took and digging up their foundations. The royal scribe, speaking in his master's name, concludes his record of these early conquests of Tiglath-pileser with the following summary: 'In all forty-two lands and their kings from beyond the Lower Zāb, from the border of the distant mountains as far as the farther side of the Euphrates up to the land of Hatti and as far as the upper sea of the setting sun (*i.e.*, Lake Van), from the beginning of my sovereignty until my fifth year, has my hand conquered. One command have I caused them to hear; their hostages have I taken; tribute and tax have I imposed upon them.'

The cylinder-inscription of Tiglath-pileser does not recount the later expeditions of his reign. From the Synchronous History,' however, which deals with his relations with Babylonia, we learn that Tiglath-pileser, king of Assyria, and Marduk-nādin-aḫē, king of Babylonia, had 'a second time' set in battle array their chariots of war that were assembled above the Lower Zāb in Arzuḫina. 'In the second year' they fought in Akkad, where Tiglath-pileser 'captured the cities of Dūr-Kurigalzu, Sippar of the Sun-god, Sippar of Anunitu, Babylon, Opis, the great cities together with their fortifications: at the same time he plundered Akarsallu as far as the city of Lubdi, and the land of Suḫi (on the Euphrates to the NW. of Babylon) in its entirety up to the city of Rapiḳu he subdued.'[1] The phrase 'a second time' is puzzling, for the 'Synchronous History' does not relate a previous campaign of Tiglath-pileser against Babylon. Some scholars therefore suggest that it refers merely to the former struggle of Ašur-rēš-iši, Tiglath-pileser's father, with the Babylonian king Nebuchadrezzar I.; but it must be remembered that Tiglath-pileser did not meet with unvarying success in his relations with Babylonia, for Sennacherib mentions that during his reign Rammān and Sala, the gods of the city of Ekallāti, had been carried off by Marduk-nādin-aḫē, king of Akkad (cp above, § 20). The question whether this conquest of Ekallāti was before or after Tiglath-pileser's successful Babylonian campaign is still indeed an open one: hut the supposition is plausible that Marduk-nādin-aḫē's advance against Assyria was in the first year of hostilities between the two countries, and that his success was merely temporary, being followed 'in the second year' by Tiglath-pileser's extensive conquests in Babylonia as related in the 'Synchronous History.'

Tiglath-pileser was a great hunter. He kept a record of the beasts be slew in the desert. This was inserted in the cylinder-inscription after the account of his campaigns. From it we learn that with the help of the gods Ninih and Nergal he slew 'four wild oxen, mighty and terrible in the desert of the land of Mitāni and in Araziḳi, which is in front of the and of Hatti,' ten elephants in the district of Ḫarrān and on the bank of the Khahiir, one hundred and twenty lions on foot, and eight hundred with spears while in his chariot. He caught four elephants alive, and brought them hack, together with the hides and tusks of those he had slain, to the city of Sur. No less energetic was the king in his building operations. The temples of the gods in ASur that were in ruins he restored; he repaired the palaces throughout the country that his predecessors had allowed to fall into decay; he extended his water-supply by the construction of canals; he accumulated considerable quantities of grain. As a result of his conquests, he kept Assyria supplied with horses, cattle, and sheep, and brought back from his campaigns foreign trees and plants, which became acclimatised.

The reign of Tiglath-pileser was a period of great prosperity for Assyria. He pushed his conquests until the bounds of his empire extended from below the Lower Zāb to Lake Van and the district of the Upper Euphrates, and from the mountains to the E. of Assyria to Syria on the W., including the region watered by the Khābūr. He was a good warrior; yet he did not neglect the internal administration of his realm. devoting the spoil of his campaigns to the general improvement of the country. In fact, the summary he gives of his own reign is a just one: 'To the land of ASur I added land; to its people I added people. The condition of my people I improved: I caused them to dwell in a peaceful habitation.'

The prosperity which Assyria had enjoyed under Tiglath-pileser does not appear to have long survived his death.

At the time of Ašur-bēl-kala, Tiglath-pileser's son, relations between Assyria and Babylonia were of a friendly nature. Ašur-bēl-kala at first made treaties with Marduk-šāpik-zēr-māti, king of Babylon; and later, when Rammān-aplu-iddina, a man of obscure extraction, ascended the throne of Babylonia, he further strengthened the connection between the two countries by contracting an alliance with the daughter of the Babylonian king. Šamši-Rammān, another son of Tiglath-pileser I., also succeeded to the throne, hut whether before or after his brother Ašur-bēl-kala cannot be determined. The only inscription of this king that we possess records that he restored the temple of the goddess Ištar in Nineveh.

Such are the only facts we know concerning the immediate successors of Tiglath-pileser I., and at this point a gap of more than one hundred years occurs in our knowledge of the history of Assyria. We may surmise that the period was one of misfortune for the empire. What little can be gathered from the inscriptions concerning these years speaks of disaster.

29. Gap. *circa* 1070-950.

Shalmaneser II., in his monolith-inscription,[1] states that he recaptured the cities of Pethor and Motkinu (beyond the Euphrates), which had been originally taken by Tiglath-pileser I., but had meanwhile been lost by Assyria in the time of a king named ASur- . . . (the latter half of the name being broken). This king may he identified with Ašur-erbi, and in that case he must have met with at least some success in the W., for we know that at a place on the coast of Phœnicia Ašur-erbi cut an image of himself in the rock, near which at a later time Shalmaneser II. caused his own to be set. The names of two other kings are known: Erba-Rammān and Ašur-nādin-aḫē, whose reigns must have fallen during this period: They are mentioned in the so-called 'hunting inscription' of Ašur-nāṣir-pal as having erected buildings in the city of Ašur, which were restored by Ašur-nāṣir-pal.

No direct light is thrown on this dark period by the 'Synchronous History.' As, however, it is written with a strong Assyrian bias, its silence is an additional testimony that during this period Assyria must have suffered misfortunes.

When we once more take up the thread of Assyria's history, our knowledge of the succession of her kings is unbroken down to the time of Ašurbānipal.

30. Predecessors of A.

Tiglath-pileser II. heads this succession of rulers; hut of him we know nothing heyond his name, which occurs in an inscription of his grandson Rammān-nirari II.,[2] who styles him 'king of hosts, king of Assyria.' Tiglath-pileser II. was succeeded by his son Ašur-dān II. Of this king we know that he constructed a canal, which, however, in the course of thirty years fell into disrepair, and was therefore made good by Ašur-nāṣir-pal. Rammān-nirari II. who succeeded his father, has left behind him only the short inscription (just

circa 930.

911.

[1] *KB* 1 198.

[1] *KB* 1 150 *ff.* [2] *KB* 1 48.

mentioned) recording his own name and those of his father and grandfather. He was an energetic ruler, as is evinced by the 'Synchronous History,' which records various successes of his against the Babylonians—first against the Babylonian king, Šamaš-mudammiḳ, and later against his successor, Nabu-šum-iškun, who had set himself by force upon the throne. From this latter monarch he captured many cities and much spoil. He did not however, press his victory. He concluded a truce with the Babylonian king, either Nabū-šum-iškun or his successor, and each added the other's daughter to his harem. His
890. son, Tukulti-Ninib, succeeded him, and from an inscription of this monarch at Seheneh-Su we may infer that he undertook successful expeditions to the N. of Assyria, at least.

Tukulti-Ninib was succeeded by his son Ašur-nāṣir-pal,
884. one of the greatest monarchs Assyria ever produced. The annals of his reign he inscribed on a slab of stone, which he set up in the temple of the god Ninib at Calah. In this inscription,[1] one of the longest historical inscriptions of Assyria, he gives an account of the various campaigns he undertook.

31. Ašur-nāṣir-pal.

In the first years of his reign, he tells us, he went against the land of Numme, a mountainous tract of country to the N. of Assyria, and subdued the lands and cities in its neighbourhood. The king then proceeded against the district of Kirruri that lay along the W. shores of Lake Urŭmīyah. Turning W. from Kirruri, he passed through the land of Kirḫi on the Upper Tigris, and city after city fell into his hands. He returned to Assyria with the booty he had collected, and brought with him Būbu, the son of Bubā, the governor of Ništun, a city where he had met with an obstinate resistance. This wretch he flayed alive in Arbēla, nailing his skin to the city wall. In the same year he again repaired to the region of the Upper Tigris, against the cities at the foot of the mountains of Nipur and Paṣatu. He then passed westward to the land of Kummuḫ, quelling a revolt in the city of Sūru on the Khābūr, and seizing the rebel leader Aḫiababa who was brought back to Nineveh, where he was flayed. The tribes surrounding the disaffected region tendered their submission. In the next year the first act of the king was to stamp out another rebellion. News was brought to him that the city of Ḫalzidipḫa, which Shalmaneser II. had colonised (see above, § 27, beg.), was in a state of revolution, and had attacked the Assyrian city of Damdamusa. While on his way against the rebels he set up an image of himself at the source of the river Subnat, beside images of two of his predecessors, Tiglath-pileser I. and Tukulti-Ninib. He then defeated the rebels at the city of Kinahu, which he captured, and proceeded to punish the revolt with severity, flaying the rebel leader Ḫulai. Next he attacked the city of Tēla and burnt it, mutilating the prisoners by cutting off their ears and hands and putting out their eyes. These wretches, while still alive, he piled up in a great heap; he made another heap out of the heads of the slain, while other heads he fastened to trees round the city; the youths and maidens he burnt alive. These details may suffice to show the brutal practices of this great conqueror. Ašur-nāṣir-pal next proceeded to the city of Tušḫa, which had been deserted by the Assyrians in consequence of a famine. After restoring and strengthening its walls, he built a palace for himself and brought back the former inhabitants of the city. After his return he again undertook a pillaging expedition in the mountainous regions of the north. The next two years were mainly taken up with campaigns in Dagara and Zamua, which were in a state of insurrection, Nūr-Rammān, the chief of Dagara, leading the revolt. The war was a protracted one, and three expeditions were required before order was completely restored. These expeditions were followed by others in the region of Kummuḫ, and in the land of Na'iri. From his residence at Tušḫa, the king then crossed the Tigris and captured Pitura and certain towns round the city of Arhaki. Ašur-nāṣir-pal records at this point the death of Ammeha'la, one of his nobles, who was murdered by his subordinates. The king's anger, however, was appeased by a large tribute although, according to one account, he flayed Bur-Rammān, the chief rebel, and nailed his skin to the wall of Sinabu.

One of the most important campaigns in the reign of Ašur-nāṣir-pal was that against the land of Suḫi. Although Šadudu, the ruler of that land, obtained help from Nabū-aplu-iddina, king of Babylonia, his capital Sūru was taken and he himself escaped only by flight. A second campaign led to the subjugation of the whole district and a considerable extension of the Assyrian sphere of influence along the Euphrates. Ašur-nāṣir-pal next crossed the river and carried his arms into N. Syria. He first made his way to Carchemish and received the submission of Sangara, king of the land of Ḫatti. Proceeding SW. and exacting tribute from the districts through which he passed, he crossed the Orontes and marched S. into the district of Lebanon. The cities on the coast of the Mediterranean, including Tyre, Sidon, Byblos, and Armad (Arvad), sent presents. In the N. districts he cut down cedars, which he used on his return in building temples to the gods. One more expedition Ašur-nāṣir-pal undertook on the N. of Assyria, traversing the land of Ḳummuḫ and again penetrating to the upper reaches of the Tigris.

[1] *KB* 1 50 *ff.*, *RP*(2) 2 134 *ff.*

Ašur-nāṣir-pal firmly established the rule of Assyria in the NW. and the N., while he extended his empire eastwards and laid the foundations of Assyria's later supremacy in the W. on the coast of the Mediterranean. He was one of Assyria's greatest conquerors; but his rule was one of iron, and his barbarity was exceptional even for his time. He was a great builder. At Nineveh he restored the royal palace and rebuilt the temple of Ištar. The city of Calah, which Shalmaneser I. had founded, he rebuilt, peopling it with captives taken on his expeditions. He connected it with the Upper Zāb by means of a canal, and erected two temples and a huge palace, from which his bas-reliefs, now in the British Museum, were obtained (cp above, § 18).

Ašur-nāṣir-pal was succeeded by his son Shalmaneser II. who extended the kingdom of his father beyond Lake
860. Van and Lake Urŭmīyah. He exercised a protectorate over Babylonia in the S., and his kingdom included Damascus, which he had conquered. During his reign, for the first time in history, Assyria came into direct contact with Israel: he mentions Ahab of Israel as one of the allies of Benhadad of Damascus (cp SHALMANESER II.). His later years were troubled by the revolt of his son Ab-dānin-pal; but his younger son, Šamši-Rammān, put down the rebellion, and on his father's death succeeded to the throne.

32. Shalmaneser II. and successors.

On a monolith of Šamši-Rammān II., now in the British Museum, is an inscription in archaistic characters narrating
824. four campaigns of this monarch. He restored order to the kingdom, which had been thrown into confusion by the rebellion of his brother, and, having established his own authority over the territory subjugated by his father, extended it on the E. He routed the Babylonian king, Marduk-balaṭsu-iḳbi, in spite of the large army the latter had collected, comprising drafts from Elam and Chaldea in addition to his regular troops.

Šamši-Rammān II. was succeeded by his son, Rammān-nirari III.

Two inscriptions on stone slabs from Calah, an inscription on some statues of the god Nebo, and an inscription on a brick
811. from the mound of Nebi-Yūnūs, are the records actually dating from his reign; but these are supplemented by a short notice in the 'Synchronous History,' and by the Eponym Canon, which adds short notices of the principal events during each year of his reign.

Rammān-nirari III. undertook expeditions in Media, Parsua, and the region of Lake Urŭmiyah on the E.; conquered the land of Na'iri on the N.; and subjugated all the coastlands on the W., including Tyre, Sidon, Israel, Edom, and Philistia. Mari', king of Damascus (see BENHADAD, § 3), attempted no defence of his capital. He sent to Rammān-nirari his submission, paying a heavy tribute in silver, gold, copper, and iron, besides quantities of cloth and furniture. A considerable portion of Babylonia also owned the supremacy of Rammān-nirari. In his inscription on the statues of Nebo, he mentions the name of his wife Sammuramat (the Assyrian form of the Greek Semiramis). He was a great monarch. His energetic rule and extensive conquests recall those of Shalmaneser II. his grandfather.

Of the three kings that follow not much is known.
782. Shalmaneser III. succeeded Rammān-nirari, and from the Eponym Canon we gather that he undertook campaigns against Urarṭu (Armenia), Itu', Damascus, and Hatarika (Hadrach). He was succeeded
772. by Ašur-dān III. This king made foreign expeditions. His was a troubled reign. The most important event recorded in his time was the eclipse of the sun in 763 (cp above, § 19, end; AMOS, § 4; ECLIPSE, § 1). The same year saw the outbreak of civil war: the ancient city of Ašur had revolted. In 761 the rebellion was joined by the city of Arapḫa, and in 759 by the city of Gozan. In 758, however, after it had lasted six years, the revolt was brought to an end; Gozan was captured, and order once more restored. The troubles of Assyria during the reign of Ašur-dān

were aggravated in the years 765 and 759 by visitations of the plague. On his death he was succeeded by Ašur-nirari.
754. Although at the beginning of his reign this king undertook expeditions against Hadrach and Arpad, and later two campaigns against the Zimri, for the greater part of his reign he was inactive. In 746 the city of Calah revolted, and next year a man of unusual energy usurped the throne, and, assuming the name of Tiglath-pileser, extended Assyrian supremacy farther than it had ever reached. In the reign of Tiglath-pileser III. Assyria came into close contact with the Hebrews, a contact that continued under each of his successors until the reign of Esarhaddon. The events of their reigns and the influence they exerted on the history of Israel and Judah are described in the separate articles on these successive kings.

33. Tiglath-pileser III. [Suc]cessors.
745.

Tiglath-pileser III. was succeeded, in 727 by SHALMANESER IV. (*q.v.*), and he in 722 by the
727-669. usurper SARGON (*q.v.*), to whom succeeded in 705 his son SENNACHERIB (*q.v.*), in 680 his grandson ESARHADDON (*q.v.*), and in 669 his great-grandson Ašur-bāni-pal. For the expeditions of the last-named monarch in Egypt, Elam, Arabia, etc. see AŠUR-BANI-PAL. His literary tastes found expression in the collecting of a great library at Nineveh. The Eponym list and his own inscriptions cover only the first part of his reign; his later years are clouded in uncertainty, and the date of his death is a matter of conjecture. The period from his death until the fall of Nineveh is equally obscure. We know the names of two of his sons, Ašur-etil-ilāni and Sin-šar-iškun, who both occupied the throne; but the length of their respective reigns and even the order of their succession are matters of dispute. It used to be assumed that during this period Assyria was entirely stripped of her power and foreign possessions; but this view has now been modified in consequence of recently discovered contract-tablets dated from both northern and southern Babylonian cities according to the regnal years of the last two Assyrian kings. These prove that the Assyrian supremacy in Babylonia continued for some little time at least. Assyria's power, however, was waning. A long career of conquest had been followed by an age of luxury, and her strength was sapped. The Scythian hordes that had swept across W. Asia had further weakened her. Thus, when Nabopolassar, repudiating Assyrian control, allied himself with Cyaxares. king of Media, and their combined forces invaded the country, her resistance met with no success.
circa 606. Though Nineveh held out for two years, the city was at last captured and destroyed, and Assyria was annexed to the empire of the Medes.

34. Decline and fall.

36. Bibliography. The most recent, and at the same time most scientific, work on Assyrian art and architecture is Perrot and Chipiez's *Hist. de l'art duns l'antiquité* vol. ii., *Chaldée et Assyrie*, Paris, 1884. 'Of works which appeared soon'after the discovery of the remains of Assyrian art, and do not attempt a scientific treatment, one of the earliest was Botta and Flandin's *Monuments de Ninive*, 5 vols., Paris, 1849-50. The two works of Sir Henry Layard, *Nineveh and its Remains* and *Monuments of Nineveh*, contain a good account of his discoveries. In *Assyrian Discoveries*, Lond. 1875, George Smith has described the results of his own explorations.

For the history of Assyria the principal work is Tiele's *Bab.-Ass. Gesch.* Gotha, 1886-88. Reference may also be made to Hommel's *Gesch. Bab. u. Ass.* Berlin, 1885-88, the *Gesch. Bab. u. Ass.* by Miirdter and Delitzsch, Calw and Stüttgart, 1891, and' Winckler's *Gesch. Bab. u. Ass.* Leipz. 1892. Among English works dealing with the history of Assyria, see George' Smith's *Assyria* (*SPCK*, Oxf. 1875), and Prof. G. Rawlinson's *Five Great Monarchies of the Eastern World*, vols. i. and ii. Lond. 1871. Both these works have been superseded on several points in consequence of later discoveries.

Assyrian history can be rightly understood only if followed in the inscriptions themselves. Translations of most of the historical inscriptions of Assyria are given in Schrader's *KB* i. and ii. Berlin, 1889-90, each of which contains an explanatory map. A series of popular English translations of Egyptian and Assyrian monuments was founded and edited hy Dr. S. Birch of the British Museum and entitled *RP* (12 vols. Lond. 1873-81), of which vols. i. iii. v. vii. ix. and xi. deal with Assyrian and Babylonian inscriptions. These translations have now, of course, been superseded. In a new series edited by A. H. Sayce (6 vols. Lond. 1888-92) the old methods and plan were not modified. As a collection of all the points in the OT illustrated or explained by the monuments, Schrader's *COT* is still unrivalled.

For works treating of the religion of the Assyrians see **BABYLONIA, § 71.**

For the student who would gain a more than superficial knowledge of Assyriology it is needless to give a list of works, as this has already been done in Bezold's *Bab. Ass. Zit.* Leipz. 1886; the literature since 1886 can be ascertained from the bibliographies appended to the *ZA* and to the *American Journal of Semitic Languages and Literatures*, and from the *Or. Bibliographie.*

See TEMPLE.

ASUR (ασουρ [BA]), 1 Esd. 5 31 RV = Ezra 2 51, HARHUR.

AŠUR-BANI-PAL. Though mentioned by name only once or twice in OT (see ASNAPPER), Ašur-bāni-pal is important to OT literature from his deportation of troublesome populations to the region of Samaria (see SAMARIA, SAMARITANS, and cp below, § 12); also from references to his campaigns in Egypt and Arabia in the prophecies (see ISAIAH, ii. § 9, and NAHUM, § 2). He was one of Assyria's greatest kings, and famous not less for his devotion to art and literature than for his extensive conquests. His name, which is best read Ašur-bāni (or bani)-apli, means 'Ašur is the creator of a son.' He was the eldest son of Esarhaddon, and ascended the throne in 668 B.C. His succession had been secured by his having been publicly proclaimed king before his father's death, while his brother., Šamaš-šum-ukīn, was installed in Babylon as viceroy or tributary prince.

1. 1st Egyptian campaign. From the moment of his accession he was plunged into a prolonged war in Egypt, for Tarḳū (TIRHAKAH), king of Ethiopia, in the words of Ašur-bāni-pal, 'forgot the might of Ašur, IStar. and the great gods my lords, and trusted in his own strength': that is, he raised a large army and descended upon Egypt. The prefects and governors appointed by Esarhaddon fled at Tarḳū's approach. He captured Thebes, descended the Nile to Memphis where he fixed his capital, and proclaimed himself king of Egypt. On receiving the news of this disaster, Ašur-bāni-pal determined to recover Egypt. During the passage of his army through Syria and along the coast of the Mediterranean, reinforcements in men and ships, in addition to the customary tribute, were received from twenty-two subject Icings of

Palestine and Cyprus, among whom Manasseh, king of Judah, is mentioned (cp ESARHADDON). Tarkii, hearing of the advance of the Assyrians, sent out his own forces from Memphis. At Kārbānīti, within the Egyptian border, the forces of Tarḳū were utterly routed, while the king himself abandoned Memphis and escaped by boat to Thebes, leaving his capital and the whole of Lower Egypt in the hands of the Assyrians. The various governors and petty kings, who had formerly been tributary to Esarhaddon and had been expelled by Tarḳū, now returned, and joined their own forces to those of the Assyrians, upon which the combined armies ascended the Nile in a fleet of boats to dislodge Tarḳū from Thebes. In forty days the journey was accomplished. Tarḳū abandoned the city without striking a blow, and retreated into Ethiopia, leaving the whole of Egypt in the hands of the Assyrians.

He did not, however, abandon his designs upon Egypt, and, as his former attempt at open opposition had proved unsuccessful, he now resorted to stratagem. Perceiving that the native Egyptian princes were far from contented under the military sway of the Assyrians, he opened secret negotiations with them, Nikū (NECHO), Šarrulūdāri, and Pakruru leading the conspiracy on the Egyptian side. It was agreed that they should transfer their allegiance to Tarḳū, who in return would leave them in undisturbed possession of their principalities, and that, while he attacked Egypt from the south, they would raise a revolt in the interior. The Assyrian generals, however, suspecting that some treachery was afoot, intercepted their messengers, and learnt the full extent of the plot. Nikū and Šarrulūdāri were hound hand and foot and sent to Nineveh, while their fellow-conspirators were slain. The revolt, thus prematurely hastened, was quelled without difficulty. Tarḳū was once more driven from Upper Egypt, and soon afterwards died.

2. Revolt suppressed.

Ašur-bāni-pal, in restoring the country again to order, appears to have mitigated his former rigour, seeking to conciliate rather than to suppress the native rulers. Nikū was pardoned. He was clothed in costly raiment; a ring was set upon his finger, and a fillet of gold about his head (as an emblem of his restoration); and with presents of chariots, horses, and mules, he returned to Egypt, where he was once more installed as governor in Saïs, while his son Nabū-šēzibanni was appointed governor of Athribis.

Ethiopia, however, could not long keep her eyes from Egypt; and, although Tarḳū was dead, the ambitions of his country did not die with him. It was not long before Urdamanē, his successor, marched northwards' and took Upper Egypt (cp EGYPT, § 66). He advanced from Thebes to meet the Assyrian expedition sent against him, hut was worsted in the battle, returned to the city, and thence fled farther south to Kipkip. The Assyrians marched on Thebes, and the city itself, together with immense booty, fell into their hands. They carried back with them to-Assyria two huge obelisks, and thus set the fashion, adopted by all the later conquerors of Egypt, of perpetuating their victory by means of the monuments of the conquered country itself. 'With full hands,' writes Ašur-bāni-pal, 'I safely returned to Nineveh, the city of my rule.' This successful expedition, however, had no lasting effect. Egypt was too far off to remain for any length of time the vassal of Assyria. Psammetichus, the son of Nikii, obtained the supremacy over the whole country, and permanently shook off the Assyrian yoke.

3. 2nd Egyptian expedition.

After his second Egyptian campaign Ašur-bāni-pal directed his forces against Ba'al, king of Tyre, 'who dwelt in the midst of the sea'—a good description of the city (see TYRE). Like his predecessors, Ašur-bāni-pal failed to capture a stronghold so favoured by nature. He erected towers and earthworks, however, and attempted *to* cut off communication from the sea as well as from the land, and maintained so effectual a blockade that Ba'al, at last reduced to extremities, sent Yaḫi-milki to ask for terms. Ašur-bāni-pal contented himself with levying tribute on the city, and with demanding the king's daughter and nieces for his harem, together with their dowries. After humbling Tyre, it was no hard matter to obtain the submission of the less important princes of the Mediterranean coast. Among these were Yakinlū, king of the island-city of ARVAD, Mugallu, king of Tabal, and Sandašarmū, king of Cilicia (CILICIA, § 2).

4. Siege of Tyre.

Gyges (Gugu), king of Lydia, also appears to have heard of the success of the Assyrian;, and to have sent in his submission. For some years he maintained these friendly relations, and to this fact attributed his success over the Cimmerians, in proof of which he sent to Nineveh two captive Cimmerian chiefs bound hand and foot with fetters of iron. Towards the end of the reign of ASur-bāni-pal, however, Gyges severed his connection with Assyria. and aided Psammetichus (Psanietik) in his struggle for Egyptian independence (cp EGYPT, § 67).

5. Gyges of Lydia, etc.

Ašur-bāni-pal was now free to turn his attention to the eastern borders of his kingdom.

During the absence of the Assyrian army in its distant campaigns, the E. frontier of Assyria had been constantly violated by the king of Mannai (see MINNI). Ašur-bāni-pal determined to chastise Aḫšēri. He marched northwards, and foiled an attempt of his opponent to surprise the Assyrians by a night attack. Aḫšēri fled to his capital Izirtu, while Ašur-bāni-pal laid waste the country. On his death in a revolt he was succeeded by his son Ualli, who bought terms of peace from Ašur-bāni-pal.

The most warlike nation on the E. of Assyria, however, and indeed her most powerful enemy, was ELAM (q.v.). Urtalcu its king had shown his hostility to Assyria already in the reign of Esarhaddon, by attempting to stir up a rebellion in Chaldea; and although, when his people were suffering from famine, he had received assistance from Ašur-bāni-pal himself, he now proposed an invasion of Babylonia, hoping thereby to cripple the Assyrian power.

6. Elam.

Acting on the advice of his general, Mardnk-gum-ibni, he formed an alliance with Bēl-iḳīša king of Gambulu—a conntry situated in the lower basin of thk Tigris, on the shores of the Persian Gulf—and having won over to his side Nabū-šum-īriš, a governor in Chaldea, he crossed the Babylonian border. On news being brought to Ašur-bāni-pal that the Elamites had advanced 'like a flight of locusts' and were encamped against Babylon, he set on foot an expedition, and, marching southwards, drove Urtaku beyond the frontier.

On the death of Urtaku, shortly afterwards, the throne was seized by Teumman, who immediately sought to rid himself of the sons of the former kings, Urtaku and Ummanaldaš I. His intended victims, however, escaped with their friends to the court of Ašur-bāni-pal, where they were in kindliness received, and protected. This incident caused a renewal of the war between Elam and Assyria. An interesting fact, which throws light on Assyrian prophecy, is related. On the eve of the campaign Ašur-bāni-pal prayed solemnly to the goddess Ištar, who to encourage him appeared in a vision to a seer, and promised victory to the Assyrian arms.[1] Confident of success, Ašur-bāni-pal set out for Elam, and pressed on up to the walls of Susa. Here, on the banks of the Eulæus, there was a decisive battle, in which the Elamites were utterly routed.

'The land of Elam,' writes Ašur-bāni-pal, 'through its extent I covered, as when a mighty storm approaches; I cut off the head of Teumman, their king, the rebel who had plotted evil. Beyond number I slew his warriors; alive in my hands I took his fighting men; with their corpses as with thorns and thistles I filled the vicinity of Susa; their blood I caused to flow in the Eulæus, and I stained its waters like wool.'[2]

Ašur-bāni-pal divided the land, proclaimed as vassal kings Ummanigaš and Tammaritu, the two sons of Urtaku who had cast themselves on his protection, and,

[1] See the striking passage in the annals (Smith, *Hist. of Assurb.* 123-126).

[2] [5 R 3, 43, *aṣrup kīma nabāsi. Nabāsu* = 'red-coloured wool.' The adverb *nabāsiš* 'like red wool,' acc. to Ruben, *JQR* 10 553, is an 'Ass. loan-word in the Song of Deborah, corrupted in our text.]

returning by way of Gambulu, exacted a terrible vengeance from that land.

We now approach the greatest crisis in the history of Ašur-bāni-pal. On ascending the throne of Assyria he had appointed his younger brother Šamaš-Sum-ukin king of Babylon, without renouncing his own suzerainty. Šamaš-Sum-ulcin, however, was dissatisfied with his dependent position, and resolved to revive, if possible, the relations between Assyria and Babylon. His own resources being insufficient for subjugating Assyria, he began to form a coalition of the neighbouring nations, all glad of an opportunity to strike a blow at their powerful neighbour. The Chaldeans and the Aramæan tribes of the coast gave assistance; Ummanigaš, king of Elam, threw over his patron Ašur-bāni-pal, and joined the revolt ; Arabia, Ethiopia, and possibly Egypt, sent help. Ašur-bāni-pal did not lose an instant, but set out with the whole of his force to the SE., where he successfully kept his enemies in check.

7. Revolt of Babylon suppressed.

Fortune favoured him by neutralising to some extent the assistance which Šamaš-šum-ukīn expected to receive from Elam, his most powerful ally. That country was thrown by internal revolution into a state bordering on anarchy, Ummanigaš and the whole of his family having been slain by Tammaritu, who in turn was dethroned by Indabigaš, and only saved his life by flight to Assyria.

Ašur-bāni-pal hastened to attack the allied forces, easily defeated them, and proceeded to besiege the four cities —Babylon, Borsippa, Sippara, and Cutha—in which they had sought shelter after their defeat. The defenders held out stubbornly for some time. When all was over, Šamaš-šum-ukīn, to avoid his brother's vengeance, set fire to his palace and perished in the flames.

After stamping out the rest *of* the rebellion and restoring order throughout Babylonia and Chaldea, Ašur-bāni-pal directed his forces against Elam, where for the next two or three years he carried on a war with Ummanaldaš II., who had ascended the throne of Elam after slaying Indabigaš, his predecessor. It is true that for a short time during this period Ummanaldaš was driven into the mountains by Ašur-bāni-pal, who set Tammaritu on the throne of Elam in his stead; but, as soon as the Assyrian army had withdrawn, Ummanaldaš came out from his retirement, gathered his 'forces, and compelled Ašur-bāni-pal again to take the field against him. On the appearance of the Assyrian army Ummanaldaš retired, allowing Ašur-bāni-pal to capture the cities and lay waste the country on his march. At length, however, he hazarded a battle. He met with a signal defeat and was again driven to take refuge in the mountains, while Susa and its accumulated riches fell into the hands of the Conquerors.

8. Subjugation of Elam.

'By the will of ASur and Ištar,' boasts Ašur-bāni-pal, 'into its palaces I entered and sat myself down rejoicing. Then opened I their treasure-houses, within which silver and gold, furniture and goods, were stored, which the former kings of Elam and the kings who had ruled even to these days had collected and placed therein, whereon no other foe besides myself had set his hands: I brought it forth and as spoil I counted it.' He recovered also all the treasures with which Šamaš-šum-ukīn and his Predecessors had purchased Elamite support. Susa itself was rased to the ground ; the royal statues were carried to Assyria ; the groves were cut down and burnt, and the temples violated.

After the subjugation of Elam the annals of Ašur-bāni-pal relate a series of conflicts with Arabia (Smith, *Hist. of Assurb.* 256 *ff.*). This was the last great war in which this monarch is known to have engaged. At the beginning of his reign he appears to have had friendly relations with the Arabian king Uaite' ; but on the revolt of Šamaš-šum-ukīn the latter joined the coalition against Assyria. Uaite' himself attacked Palestine, overrunning Edom and Moab, and penetrating almost as far N. as Damascus. Here, however, he was defeated by the Assyrians.

9. Arabia.

Leaving his camp standing, Uaite' fled alone to Nabatæa. He appears, however, to have surrendered to Ašur-bāni-pal, who threw him into chains, and kept him a prisoner in a kennel with his hounds—Adiyā his wife and the king of Ḳedar, his ally sharing the same fate. The othkr division of the Arabian army: which had joined the forces of Šamaš-šum-ukīn shared his defeat and perished in Babylonia. Abiyate', their leader, surrendered to Ašur-bāni-pal kissed his foot in token of submission and was appointed king 'of Arabia in the place of Uaite'. Nb sooner, however, had he returned to his country, than he associated himself with the Nabatæans in aseries of joint attacks on the frontier of Assyria. Ašur-bāni-pal, therefore, crossed the Tigris with his army, and embarked on a difficult march through the Syrian desert. The Assyrians, after some minor conflicts in which they were successful, eventually engaged the main body of the Arabian army in the mountains of Ḫukkuruna, to the SE. of Damascus. The Arabians were defeated, Ahiyate' and Ayamu were taken, and Ašur-bāni-pal set out for Assyria with immense numbers of captives and herds of cattle; on his return camels were distributed throughout Assyria 'like sheep.'

The annals conclude their record of the wars of Ašur-bāni-pal with an account of his triumphal procession through Nineveh in celebration of his victories.

10. Closing years.

Ummanaldaš, the Elamite, who had shortly before been captured, Tammaritu and Pa'e, two other captive Elamite kings, with Uaite', the king of Arabia, were fastened to the yoke of the chariot in which he rode. He then entered the temple of his gods, offering sacrifices and praising them for the triumphs they had vouchsafed him over his enemies.

Ašur-bāṇi-pal probably reigned till *625* B.C.; but of his later years the royal records do not speak. It is impossible to assign with certainty a reason for this silence. Possibly the kingdom, which had been shaken to its foundations by the revolt of Šamaš-šum-ukīn during these years, showed signs of its approaching end. It is certain, at any rate, that the Medes, whom Ašur-bstni-pal had earlier in his reign defeated, again showed signs of activity (see PERSIA) ; and it is probable that during his reign the wild hordes of the Scythians descended from the N. and the NE., slaying and plundering and carrying all before them. The question whether the empire of Assyria declined only under Ašur-bstni-pal's successors, or had already become disintegrated before his death, is one that cannot be answered with certainty.

Turning from foreign politics to the internal condition of Assyria during the reign of Ašur-bāni-pal, we find the country superficially, at least, prosperous. Though the constant wars of Ašur-bāni-pal must have been a great drain on the manhood of'the nation, his almost unvarying success resulted in a great accumulation of wealth—the spoil of the conquered cities. Not only did his generals carry off the gold and silver, and anything else of value that was portable; not only did they drive to Assyria the flocks and herds of the whole country : the population itself they deported. It was the Assyrian policy (see above, § 1) to weaken the patriotic feeling of the conquered races in this way, and so to lessen the chances of revolt. A secondary object of the conquerors, however, had reference to Assyria herself, for huge bands of captives were brought back in chains to replenish the labouring populace at home. Many of these wretches found their way into the possession of private owners; but the majority of them were retained as slaves by the king himself, who, like his predecessors, sought to gratify his desire for splendour and to perpetuate his name by the erection of huge buildings in the capital. The most important of these buildings of Ašur-bāni-pal was his own palace, which he built to the north of that of his grandfather Sennacherib —the remains exist at the present day in the mound of Kuyunjik opposite the modern town of Mōṣul. The walls of its chambers he lined with sculptures in relief, representing his own exploits on the field of battle and in the chase, in which the details are most carefully and elaborately carved, while the designs themselves mark the acme of Assyrian art. Ašur-bāni-pal restored the palace of Sennacherib, strengthened the fortifications of Nineveh, and built

11. Policy and buildings, etc.

or restored various temples throughout Assyria and Babylonia.

It was the custom of the classical historians to represent Ašur-bāni-pal as of an effeminate and luxurious disposition, spending his life 'at Nineveh in idleness and dissipation. The Assyrian records have dissipated this illusion. Though it is probable that many of his campaigns were conducted by his generals, the king's personal valour in the field and in the hunt is undoubted. His skill as an administrator is testified by his organisation of the immense territory acquired in his victorious campaigns. His palaces and buildings, even to this day, bear witness to his love for art and architecture. It is for none of these things, however, that his memory is honoured above that of other kings of Assyria. He was the first of his nation to make a systematic and universal study and collection of his country's literature, and it is to the library he collected in his palace that we owe the greater part of our knowledge of Babylonian and Assyrian literature and language. L. W. K.

ASYLUM, a sanctuary, within whose precincts those who take refuge may not be harmed without sacrilege.

1. General principle. In early times, holy places, as the homes or haunts of the gods, extended over everything in them the protection of their own inviolability. Wild animals, and sometimes even domestic animals which strayed into them, shared this protection with debtors, fugitive slaves, and criminals, as well as the victims of unjust pursuit or violence. Manslayers sought refuge in them from the sword of the avenging kinsmen, and the right of asylum had an especial importance among those peoples in which the primitive law of blood vengeance was most persistently maintained.[1] The right of asylum was possessed by different sanctuaries in various degrees, depending on prescription, the holiness of the place, and other circumstances; it sometimes extended to an entire city, or even to a mark beyond its walls. Even within the same sanctuary it was, of course, a greater sacrilege to drag the suppliant away from the altar or from the image of the god, or to slay him there, than merely to violate the sacred precincts. In later times the abuse of these privileges led to legal regulation and restriction (cp, *e.g.*, Tac. *Ann.* 3 60-64 4 14).

In Israel the oldest law (Ex. 21 12-14) recoguises the right of asylum, but denies its protection to the

2. Early practice. murderer with malice aforethought : 'from beside my altar thou shalt take him to die.' Doubtless every altar of Yahwè (Ex. 20 24 *f.*) was an asylum; but not all were equally venerated, nor would the village high-place protect the suppliant as securely as the more famous sanctuaries. The only historical instances in the OT in which men who fear for their lives take refuge at Gods altar are those of Adonijah (1 K. 1 50-53) and Joab (1 K. 2 28-34; on the text cp 𝔊 and Klo.). Adonijah was persuaded to leave the asylum; Joab, by Solonion's orders, was slain at the very altar.

When the drastic reforms of Josiah (621 B.C.) destroyed and desecrated all the old holy places of

3. In Dt. Yahwè in his kingdom except the temple in Jerusalem, one of the necessary measures of the reform laws was to provide a substitute for the asyla thus abolished; since it was obviously impossible that manslayers from the remote parts of the land should escape to Jerusalem. Accordingly, six cities of refuge are appointed — three E. of the Jordan (Dt. 4 41-43),[2] three W. of it (Dt. 19 2 *f.*)—with eventual provision for three more, in Philistia, Phcenicia, and Ccele-Syria (Dt. 19 8-10). The distinction between manslaughter and murder is clearly defined and illustrated; the case is tried at the place where the offence was committed, and if the verdict be murder the elders of the city in whose territory the defendant resides are empowered to take him from the asylum and deliver him to 'the next kinsman of the murdered man, as the natural executor of the sentence.[1]

The post-exilic law also (Nu. 35 9 *ff.*, cp Josh. 20 2-6) appoints six cities of refuge (עָרֵי הַמִּקְלָט), and defines the

4. In P. crimes in substantially the same way; but it differs radically from the Deuteronomic legislation in providing (1) that the manslayer shall be brought from his asylum to be tried before the 'congregation' ('*ēdāh*)—*i.e.*, the religious community of the post-exilic Jerusalem (Nu. 35 12 24 *f.*)—and (2) that at the death of the high priest the manslayer may without peril return to his home and estates (*vv.* 25 28).[2] Further, it is explicitly forbidden to compound the crime by talcing a bloodwite, or to allow the homicide upon payment of a fine to leave the city of refuge before the death of the high priest.

The cities designated are, E. of the Jordan, Bezer, Ramoth in Gilead, and Golan in Bashan (Dt. 4 41-43

5. Cities of refuge. Josh. 20 8); W. of the Jordan, Kedesh in Galilee, Shechem, and Hebrou '(Josh 20 7). The last three were all venerable sanctuaries, older, indeed, than the Israelite invasion, and were probably chosen not only on account of their location, but also because they were already asyla of established sanctity. It may be assumed that this was the case also with the cities of refuge E. of the Jordan, of which, with the exception,of Ranioth, we know little. Jewish scholars, with some plausibility, maintain that, besides those, all the other Levitical cities, of which there were forty-four, many of them seats of ancient sanctuaries, possessed the right of asylum in a lower degree.[3] Whether this system was ever actually introduced in its whole extent is doubtful. Neither in the brief years between Josiah's reform and the fall of the Judæan kingdom nor after the restoration did Judah possess more than a small part of the territory contemplated by these laws.

In the Greek period, and later (under Roman rule) many Hellenistic cities in Syria enjoyed the privileges of

6. Parallels. asylums. Not to speak of the famous sanctuary of Apollo and Artemis at Daphne, near Antioch, where the Jewish high priest, Onias, is said to have taken refuge (2 Macc. 4 33 *ff.*, cp Strabo, xvi. 2 6), the title ἄσυλος appears on coins of Cæsarea, Panias, Diocæsarea (Sepphoris) in Galilee, Ptolemais (Acco), Dora (Dor), Scythopolis (Beth-shean), Gadara and Abila in the Decapolis, and others. According to Josephus (Ant. xiii. 2 3), this character was conferred on Jerusalem by Demetrius I.; but 1 Macc. 10 31 knows nothing of it. Cp. ASHTORETH, ASHERAH.

There is no recent and adequate work on this subject. *The Law of Asylum in Israel*, by A. P. Bissell (Leipsic, 1882) is a laboured attempt to prove that the laws must all have originated in the age of Moses. See also S. Ohlenhurg, *Die biblischen Asyle in talmudischem Gewande*, 1895; and compare Steugel, art. 'Asylon' in *Pauly-Wissowa*, *Real-encycl. der class. Altertumswiss.* On the wide diffusion of the fundamental conception of asylums, and on its possible origin, *see* J. G. Frazer's article on 'The Origin of Totemism and Exogamy' in *Fort. Rev.*, April 1899. G. F. M.

ASYNCRITUS (ἀσύγκριτος [Ti.], -υνκ. [WH]) is one of five who, with 'the brethren that are with them,' are saluted in Rom. 16 14. They seem to have been Christian heads of households, or perhaps class leaders of some sort.

Asyncritus figures in the list of the 'seventy disciples' by the

[1] So, *e.g.*, in Greece; whilst in Rome, where blood vengeance was early abolished by law, the right of asylum was almost exclusively reserved for slaves.

[2] These verses are out of place, and probably secondary; see DEUTERONOMY, § 20.

[1] In all these particulars there is a striking and instructive resemblance to the Athenian code of Draco (624 B.C.).

[2] In this provision it is evident that the sojourn in the city of refuge is regarded as a species of exile, a punishment which was removed hy a general amnesty at the ascension of the new high priest, the real sovereign. Accordingly, in the Mishna, and in Jewish jurisprudence generally, residence in the city of refuge is called *gōlā*, 'exile,' cp *e.g.* *Makkoth*, 3 1.

[3] See Maimonides, *Yad Ḥazaḳa*, Hilkoth Roṣeah, ch. 8.

Pseudo-Dorotheus as bishop of 'Urbania,' and in that of the Pseudo-Hippolytus as bishop of 'Hyrcania' (doubtless the preferable reading). In the great Greek *Menæa* he is commemorated along with Herodion and Agahus on 8th April.

ATAD (הָאָטָד), Gen. 50 10. See ABEL-MIZRAIM.

ATAR (ατaρ [A]), 1 Esd. 5 28 RV = Ezra 2 42, ATER, 2.

ATARAH (עֲטָרָה, 'crown'; αταρα [BL], ετερα [A]), second wife of Jerahmeel (1 Ch. 2 26). In genealogical phraseology this signifies that the clan occupied a new region (cp Caleb's wife Ephrath: and see AZUBAH, CALEB), and presumably, like Caleb, it moved farther N., in which case we may compare Atarah with ATROTH-BETH-JOAB, mentioned along with Bethlehem, etc., in 1 Ch. 2 54.

ATARGATIS, TEMPLE OF (το ατεργατιον [AV]), 2 Macc. 12 26; cp 1 Macc. 5 43 *f.* In the walled enclosure of this trans-Jordanic temple the Ammonites and Arabians defeated by Judas the Maccabee, after throwing away their arms, took refuge (see ASHTAROTH, § 1). It was in **164** B.C., the year after the re-dedication of the temple at Jerusalem, which had animated the foes of the church-nation to a deadly persecution (1 Macc. 5 2). Judas had already acted with the severity of the old Israelitish law of war, dealing with the trans-Jordanic towns and the heathen part of their peoples as Joshua had dealt with Jericho (1 Macc. 5 5 28; cp Josh. 6 24, JE), but with the added zeal against idolatry justified by Dt. 7 5 12 3. Naturally, this champion of monotheism, like his successor Jonathan at Ashdod (1 Macc. 10 83), had no scruple in violating the temple precincts. The unarmed multitude he slew (2 Macc..), and the temple-buildings, with all the objects polluted by idolatry, he burned (1 Macc.).

Atargătis (עתרעתה; cp Vogüé, *Syr. Cent.* n. 3; also עתרעתו; cp *ZDMG* ['52] 6 473 *f.*), to whom the temple belonged, is in *The Speaker's Commentary* (n. on 1 Macc. 5 26) identified with Astarte. This is a natural error, for Carnaim is no doubt Ashteroth-Karnaim—so called from the addiction of the town to the worship of various forms of Ashtoreth or Astarte. We know, however, that these deities were different: for at Ascalon there were temples of Astarte and of Atargătis (Derkĕto) side by side. All that is true is that the first part of the name Atargătis (*i.e.*, עתר) is the Aramaic equivalent of the Phœnician and Heb. עשתר[ת] without the fem. ending (see PHŒNICIA); but the religious significance of this Atar ('Attâr for 'Athtar) is profoundly modified by its union with 'Athe (usually written עתה or עתי), a Palmyrene divinity whose name is well attested, and occurs in many proper names.[1] Atargătis is, in fact, that form of Astar[te] which has absorbed into itself the characteristics of another deity called 'Athe (cp Ashtar-Kamosh in the inscription of Mesha). Lucian, in his *De Dea Syra*, has left us a minute account of the temple and worship of the Syrian goddess (who was no doubt Atargătis) at Hierapolis (Mabug), which illustrates the Jewish hatred of it.

The connection of this 'omnipotent and all-producing goddess' (Apuleius) with sacred life-giving waters has been studied by Prof. W. R. Smith (*RS*(2) 172-175). *See* also Prof. W. Wright *TSBA* 6 438 *f.*; Baethgen, *Beitr.* 68 *ff.* 256 *f.*; Baudissin, art: 'Atargatis,' in Herzog-Plitt, *PRE* vol. i. (who notices the different forms under which the goddess was represented); Puchstein, *ZA* 9 420; Roscher, *Lex. s.v.* 'Astarte,' 4 *(a)*. T. K. C.

ATAROTH (עֲטָרוֹת, 'crowns' or 'wreaths,' cp Is. 28 1 Zech. 6 11 14, etc.; αταρωθ [BAL]).

1. 1 Ch. 2 54. See ATROTH-BETH-JOAB.

2. **Ataroth-Addar** (עַטְרוֹת אַדָּר, Josh. 16 5, *ασταρωθ και εροκ [B], υτ. κ. αδαρ [A]*, υτ. *asap* [L]; 18 13, AV **Ataroth-Adar**, *μααταρωθορεχ* [B], *υτ. αδδαρ* [A], *ατ. εδδαρ* [L], called also simply ATAROTH, Josh. 16 2, *χαταρωθει* [B, where χ is all that is left of ארכי]), perhaps the present *'Aṭārā* on the high road from Jerusalem to Bethel, 3½ m. S. of Bethel, and 6 E. of the upper Beth-horon (see Guérin, *Judée*, 3 6 *f.*; but on the other side Robinson, 2 314). As it is a Benjamite locality, we might plausibly identify ADDAR with the Benjamite clan-name ADDAR, ARD [*q.v.*].

3. An unknown site (עֲטָרוֹת, Josh. 16 7, *ασταρωθ* [B]) between Janoah and Naarah, on the north-eastern frontier of the territory of Ephraim.

4. A city of Gad (עֲטָרוֹת, Nu. 32 3 34, *αταρων [A]* 34, *ασταρωθ* [F$^{1\,vid.}$]), mentioned in the inscription of Mesha (*l.* 11, עטרת) as reconquered by him, along with a 'land of 'Ataroth (*l.* 10) dwelt in from of old by the men of Gad.' The name survives as that of a mountain, and a ruined site *'Attārūs*, at the top of the Wady Zerḳā Ma'in, 10 m. E. of the Dead Sea. (Tristram, *Moab*, 272-276.) The *OS* (Eus. 214 51, *ασταρωθ* : Jer. 87 17) wrongly identify with no. 1, presumably confusing Joab with Job, whom tradition associates with Ashtaroth-Karnaim. See ATROTH-SHOPHAN. G. A. S.

ATER (אָטֵר, § 66; ατηρ [BA]; 'left-handed'? cp Judg. 3 15 Heb., and the Lat. name Scævola).

1. The B'ne Ater of Hezekiah (בְּנֵי־אָטֵר לְיחִזְקִיָּה; *ατηρ τῳ εζεκια* [BNA]), a family in the great post-exilic list (see EZRA, ii. § 9, § 8 *c*), Ezra 2 16 (*αζερ τῳ εζεκι* [L]) = Neh. 7 21 (*αζηρ τῳ εζεκια* [L] = 1 Esd. 5 15 (*ατηρ εζεκιου* [A], *αζηρ ε.* [B], *αζηρ τῳ εζεκια* (L), Aterezias, RV ATER OF EZEKIAS. ATER HEZEKIAH, AV ATER HIZKIJAH (אָטֵר חִזְקִיָּה), appears also among the signatories to the covenant (see EZRA, i. § 7), Neh. 10 17 [18] (*αδηρ ε.* [BN], *ατηρ ε.* [A], *αζηρ εζεκιας* [L]).

2. The B'ne Ater (υἱοὶ *ατήρ* (BNAI, υἱοὶ *αζήρ* [L]), a family of doorkeepers in the great post-exilic list (see EZRA, ii. § 9) (בְּנֵי הַשֹּׁעֲרִים), Ezra 2 42 (υἱοὶ *ατт.* [A]) = Neh. 7 45 (υἱοὶ *ατηρ* υἱοῦ *ατηρ* [B]) = 1 Esd. 5 28, JATAL, RV ATAR (om. B, *αταρ* [A] *αζηρ* [L]).

ATERGATIS (το ατεργατιον [VA]), 2 Macc. 12 26 RV, AV ATARGATIS.

ATETA (ιτητα [A]), 1 Esd. 5 28 RV = Ezra 2 42, HATITA.

ATMACH (עֲתָךְ, 'inn'? [Ges.]; νοο [B], νομβε [TR], αθαγ [A], ναγεβ [L]), one of the towns of Judah to which David sent a part of the Amalekite spoil (1 S. 30 30†). According to Wellhausen, Driver, and Budde, it is the ETHER (*q.v.*) of Josh. 15 42 (*ιθακ* [B], *αθερ* [AL]), 19 7 (*ιεθερ* [B], *βεθ.* [A], *εσερ* [L]); these scholars decline to decide which of the variants is correct, though Budde retains עתך in the text of 1 S. The *νοο*, *νομβε*, and *ναγεβ* of certain MSS may, however, point to a various reading NOB. Guérin visited a place called *Nūbā*, near *Kharās*, and W. of the *Kh. Ḳīlā* (Keilah), which, he thinks, may be meant by *νομβε* (*Judée*, 3 349). That there must have been several places called Nob is generally admitted. Klostermann suggests עֲנָב, *ANAB* (Josh. 11 21), a place near Hebron (Hebron follows), and the question arises whether Nob itself may not be a shortened form of Anāb (see NOB). In Josh. 11 21 𝔊^{n} gives *αναβωθ* = ענבת, out of which both תכן TOCHEN [*q.v.*] and עתך Athach may perhaps have arisen by the loss of one letter and the transposition and slight corruption of other letters. It so happens that there are to-day two 'Anābs S. of Hebron called the great and little. These may represent the Anaboth or Grape-towns. T. K. C.

ATHAIAH (עֲתָיָה, § 39, meaning obscure; cp Gray, *HPN* 297; αθεα [B], -εαι [A], -εε [ℵ], αθαραcθαc [L]; *ATHAIAS*), in list of Judahite inhabitants of Jerusalem (see EZRA, ii. § 5 [*b*], § 15 [1] *a*), Neh. 11 4 = 1 Ch. 9 4†, UTHAI (עוּתַי; γωθ[ε]ι [BA], ουθι [L]), where different links are given between him and Perez.

ATHALIAH (עֲתַלְיָה, עֲתַלְיָהוּ, §§ 39, 52; 'Yahwè is great'; cp with Che., Ass. *etellu*, 'great, high,' also 'lord,' used of gods and kings [Del. *Ass. HWB*, *s.v.*]).

1. (*γοθολια [BAL]*, but -θλ. [A vid. in 2 K. 11 13]). Daughter of Ahab and Jezebel, and wife of Jehoram,

[1] The oldest centre of the worship of 'Athe is thought by Hommel (*PSBA*, 1897, p. 81) to have been the E. of Asia Minor, whence the cult spread to W. Asia Minor and N. Syria.

king of Judah (2 K. 8 18 26 11 1 *ff.* 13 20). The death of AHAZIAH (*q.v.*, 1) deprived Athaliah of her proud position as queen-mother (גְּבִירָה). Having apparently no other son whom she could place on the throne, she determined to put to death all the surviving male members of the royal family, and to govern in her own name. For six years (841-836 B.C.) she maintained herself on the throne—a singular fact which raises questions more easily asked than answered. We hear of nothing done by her for her adopted country; but whose interest was it to preserve the memory of this? On the story of her deposition and violent death, see JOASH (1). Observe that the massacre of the royal princes by Athaliah, adopted by the Chronicler in 2 Ch. 22 10, is inconsistent with the massacre attributed to Jehoram in 2 Ch. 21 4 and the captivity of all Jehoram's sons but Ahaziah, imagined in 2 Ch. 21 17.

2. In a genealogy of BENJAMIN [§ 9 ii. β], 1 Ch. 8 26 (ογοθολια [B], γοθολια [A], οθνια [L]).

3. A family in Ezra's caravan (see EZRA, i. § 2, ii. 5 15 [1] *d*), Ezra 8 7 (αθελει [B], αθλια [A], γοθονιου [L])=1 Esd. 8 33. JOTHOLIAS EV (γοθολιου [BA], -θου. [L]).

ATHARIAS, RV ATTHARIAS (ατθαριας [BA]), 1 Esd. 5 40=Ezra 2 63, TIRSHATHA (*q.v.*).

ATHARIM (אֲתָרִים), in the expression דֶּרֶךְ הָאֲ׳ (Nu. 21 1†) is taken by RV for a place-name ('by the way of Atharim'; so οδον αθαρειν [B], ο. -ειμ [AFL]); by AV and RV^mg. (following Targ. and Syr.) as equivalent to הַתָּרִים ('[the way of] the spies'). That האתרים should have been substituted for התרים is, however, highly improbable. Dillmann has suggested that the word may be connected with the Arab. *athar*, 'vestige' or 'footprint,' and proposes to translate 'the caravan path.' The expression may be corrupt (see KADESH, § 3 i.).

ATHENOBIUS (αθηνοβιος [AKV]), friend of Antiochus VII. Sidētes, and his envoy to Simon the High Priest (1 Macc. 15 28-36).

ATHENS (αθηναι). We must repeat the words of Strabo—ἀλλὰ γὰρ εἰς πλῆθος ἐμπίπτων τῶν περὶ τῆς πόλεως ταύτης ὑμνουμένων τε καὶ διαβοωμένων ὀκνῶ πλεονάζειν (p. 396). There is, indeed, an essential impropriety involved in making Paul's visit to Athens the occasion for a *résumé* of the architectural and artistic treasures of the city.' What the apostle might have seen we can learn from Pausanias; what he did see may safely be reduced to a minimum.

1. Its art unappreciated.

'A Hebrew of the Hebrews,' who, 'after the most exact sect,' 'lived a Pharisee,' could at best feel only indifference to the history of the heathen, and his spirit could not fail to be 'stirred' at the frequent signs of ignorance of God visible on every hand in their cities, even though he had been brought up 'at the feet of' a Rabban Gamaliel, whose liberality of sentiment is, after all, largely problematical. Not one of the associations which are valuable to us crowded into the apostle's mind as he landed at Phalērum or Piræus. And the many-sided art of Athens had no message for a man of his intensity and whole-hearted devotion to the task of destroying the paganism in which that art was rooted.

Much more valuable, and more difficult also, is it to realise the spiritual atmosphere in which Paul found himself.

2. Intellectual atmosphere.

The period of Athenian greatness in politics had long been past. Athens now only a free city of the province of Achaia was not even the seat of the governor (Str. 398). In art and in literature also she was no longer the schoolmistress of nations; in every department of mental activity the creative faculty was dead. In the domain of philosophy alone the manipulation of the dry bones of logical science continued to give the semblance of life. Here also the spring of Athenian wisdom had run dry. The masters of the schools sprang from Asia, Syria, or the Eastern Archipelago; Greece proper was represented exclusively by third- or fourth-rate men. Nevertheless, for centuries Athens continued to be regarded as the chief seat of Greek philosophy; nor did she renounce her claim as a seminary of philosophy to the most important place, even when she had to share that honour with other cities, such as Alexandria, Rome, Rhodes, and Paul's own Tarsus. The whole city, indeed, resembled one of our University towns at an epoch of intellectual stagnation. The so-called education of a Roman was incomplete unless some time had been spent in loitering through the groves and porticoes of Athens. 'Two schools in particular, markedly different and decided in their peculiarities, stood opposed to each other—the school of the Stoics (who insisted almost exclusively on the universal element), and that of the Epicureans, who gave prominence to the individual element in man, pursuing happiness by looking within. The Stoics regarded man exclusively as a thinking being; the Epicureans, as a creature of feeling' (Zeller, *The Stoics, Epicureans,* and *Sceptics,* 27). Probably in no other city of the world at that time was it easier to meet 'certain philosophers of the Epicureans and of the Stoics' (Acts 17 18). A well-known and curious parallel to the apostle's visit is afforded by the Life of Apollonius of Tyăna. On his way up from his ship to the city Apollonius met many philosophers, some reading, some perorating, some arguing, all of whom greeted him (*Philos. Vit.* 417). In a word, Athens at the time of Paul's stay, and more notably afterwards, was a city of pedagogues; and 'le pédagogue est le moins convertissable des hommes' (Renan, *St. Paul,* 199). In the midst of this academic element Paul found himself alone (1 Thess. 3 1). For his inner life at this time we must look to the Epistles, not to Acts. He was more attracted by the eager artisans of Thessalonica and the earnest men of business in Corinth than by the versatile and superficial schoolmen of Athens (cp 1 Thess. 1 9). Still, it would be unfair to attribute his failure entirely to the Athenian character[1] (Dēmădes said that the crest of Athens should have been a great tongue): allowance must be made for the inevitable exaggeration of the reformer, whether in morals or in politics: his perspective is distorted. Nor is it fair to count it blame to Athens that she was regarded as ultra-religious, δεισιδαιμονεστέρους, Acts 17 22 (this opening compliment of the apostle's speech admits of rich illustration).[2] It would be a mistake to see in the altar dedicated to the unknown god (Acts 17 23) a desire to include in their Pantheon any and every deity that might possibly be worthy of honour (see UNKNOWN GOD). Worship found expression in art, not in the minutiæ of formalism. Athens was, therefore, pre-eminently a city of statues, and Renan is right in remarking that the prejudices of Paul as a Jew blinded him: he took all the statues he saw for 'objects of worship' (σεβάσματα, Acts 17 23). We are not guilty of 'corrupt Hellenism' in attempting a true estimate of the apostle's attitude.

An explanation of the disappointing effect of Paul's teaching must be sought in the position of the Jewish colony in Athens, and not solely in exaggerated commonplaces on Athenian character and philosophy.

3. Paul's failure.

The colony was evidently not a large one; there would be little to attract Jews thither in preference to Corinth. Paul's work among his countrymen in Athens was slight: he 'conversed' with them (διελέγετο, Acts 17 17). No trace of any building which could have been a synagogue has been found, with the exception of the marble (*Inscr. Æt. Rom. Ath.* 404)

1 Still more would this remark apply to the only places in the OT where Athenians are referred to (2 Macc. 6 1 9 15): on the reading (Vg. has *Antiochenum* in 6 1) see Grimm, *ad loc.*

1 Quotations might be multiplied to illustrate Athenian loquacity (Acts 17 21; cp Thuc. i. 70, νεωτεροποιοί; Ar. *Eq.* 1263, τῇ Κεχηναίων πόλει='Gapenians'; Demosth. Phil. i. 10, 43; Menand. *Fr. Georg.* 9; Plutarch *passim*).

2 Paus. i. 17 1, θεοὺς εὐσεβοῦσιν ἄλλων πλέον: *e.g.*, they erected an altar to Mercy; i. 24 3 Ἀθηναίοις περισσότερόν τι ἢ τοῖς ἄλλοις ἐς τὰ θεῖά ἐστι σπουδῆς: Philos. *Vit.* vi. 2, φιλοθύτας: Jul. *Misop.* φιλόθεοι; Æl. *Var. Hist.* v. 17, τοσοῦτον ἦν Ἀθηναίοις δεισιδαιμονίας.

containing the words *αὕτη ἡ πύλη τοῦ κυρίου* (Ps. 118 20); this might have belonged to the entrance of a synagogue. The Hellenic belief *ἅπαξ θανόντος οὔτις* ***Par'*** *ἀνάστασις* was not, in Athens, reduced by the powerful solvent of Judaism. Hence, the moment the apostle uttered the words 'raised from the dead' his audience revolted. Elsewhere his difficulties centred round another point—whether Jesus was the Messiah or not. In Athens, where Jewish thought had no hold, the idea of the resurrection of the body was unfamiliar—least so to the Stoics, although it would be an anachronism to quote here the remarkable approach made by such Stoics as Seneca to Christian modes of thought. Little wonder, then, that Paul's work at Athens was a comparative failure, and that he felt it to be **so** (Acts 17 34 1 Cor. 2 3). His visit to the city was a mistake; and perhaps it was from the first due to accident. In the hurried departure from Berœa (Acts 17 10 *ff.*), there would be little time for making plans or for choosing modes of transport, and the apostle's abode in Athens seems to have been largely, if not entirely, due to the necessity he was under of waiting for his companions (Acts 17 15 *f.*). W. J. W.

ATHLAI (עַתְלַי=עֲתַלְיָה, §§ 39, 52, ATHALIAH, *q.v.*), in list of those with foreign wives (see **EZRA**, i. § 5, end), Ezra 10 28 (*θαλει* [B], *-μ* [ℵ], *οθαλι* [A], *θελεει* [L]; *ATHALAI*) = 1 Esd. **9** 29 AMATHEIS, RV EMATHEIS (*εμαθθις* [B], *-αθεις* [A], *θελεει* [L]).

ATIPHA (ατεφα [BA]), 1 Esd. 5 32 = Ezra 2 54, HATIPHA.

ATONE, ATONEMENT (כִּפֶּר, 𝔊 εξιλαcκειν; כִּפֻּרִים, 𝔊 εξιλαcμα; NT καταλλαγη). The expression '*to* atone' (כפר) generally describes the effect of the sacrifices in removing guilt. The pure religious idea of atonement, however, as W. R. Smith remarks (*OTJC*(1) **439**) is to be found in the Prophets (and, surely, in Ps. 51; see *vv.* 1 [2] 2 [3] 7 [8] 9 [10]; also, with כפר in 65 3 78 38 79 9). There it has no relation to sacrificing. and we cannot fail to see the appropriateness of this scholar's explanation of כִּפֶּר ***Kipper*** as meaning primarily 'to wipe out.' This is in accordance with Syriac usage; but the only OT passage in which the sense of 'wipe out' is possible is in Is. 28 18, where the reading is much disputed (Houbigant, Lowth, Du. [but not Di., Che.] read וְתֻפַּר instead of וְכֻפַּר), and where it is at any rate open to us to obtain the sense 'wiped-out' indirectly from the common reading ('covered over'; cp Gen. 6 14). The usual view is that a propitiation is expressed by ***kipper*** metaphorically, as a 'covering' (cp Ar. *kafara*: in i. stem *texit*, in ii. *expiavit*), as when Jacob, fearing Esau's anger, says, 'I will ***cover*** his face with a present' (cp Gen. 20 16 Job 9 24). The Hebraistic usage of the word is well set forth by Driver, *Deut.* 425, **439.** W. R. Smith's note in *OTJC*(1) 438-440 also deserves attention; but *OTJC*(2) **381**, etc., should here be compared.

In the NT 'atonement' is given by AV for *καταλλαγή*, Rom. **5** 11; but RV, with a proper regard to consistency, substitutes 'reconciliation'; cp 2 Cor. 5 18 *f.*, 'the ministry, the word, of reconciliation.' Elsewhere *καταλλαγή* occurs in Rom. 5 10 *f.* 11 15; cp Col. 1 21; it is hardly one of 𝔊's words, being found only in 2 Macc. 5 20. See further, ATONEMENT, DAY OF, MERCY-SEAT, RANSOM, SACRIFICE; and cp WRS, *Rel. Sem.*(2) 237, 320, **437**, etc.; also We. *CH* 335 *f.*

See also Ritschl, ***Die christl. Lehre von d. Rechtfertigung u. d. Versöhnung***, ii.; Weiss, *Bibl. Theol. of* ***NT*** 1 419-452 2 202-216; Dale, ***The Doctrine of the Atonement;*** Wilson, *Hulsean Lectures* ***on the Atonement*** (1899). The semi-popular literature is extensive.

ATONEMENT, DAY OF (יוֹם הַכִּפֻּרִים; later, יוֹם הַכִּפֻּר; in Talmud יוֹמָא רַבָּא, 'the great day,' יוֹמָא, 'the day,' and צוֹמָא רַבָּא, 'the great fast'; cp Acts 27 9, η νηcτεια—as the only fast enjoined by the law).

1. Analysis of law.

The law relating to this day (Lev. 16), which as it now stands connects with the story of Nadab and Abihu in Lev. 10 1-7, is not in its present form a homogeneous unity.[1] This is evident, not only from the duplicate verses 6 and 11, and from peculiarities of the arrangement, but also from the contents of the law.

The chapter as a whole treats of ***two*** quite distinct subjects: viz., (1) the warning of the high priest that he is to enter the Holy of Holies not at pleasure, but only under certain specified precautions, (2) the ordering of a yearly Day of Atonement, for which an exact ritual is prescribed. 1. is contained in ***vv.*** 1-4 6 12 13 34 8, and belongs to P_2; 2. is itself composite. ***(a)*** *vv.* 29-34 ***a*** give complete directions for the annual observance of a day of fasting and humiliation, on which the sanctuary and people are to be cleansed **by** 'the priest who shall be anointed' (cp 8 12)—*i.e.*, the high priest of the time; the atonement is supposed by the lawgiver to be carried out in accordance with the ritual (which, originally, immediately preceded it) of Lev. 9, and with the law of the sin-offering laid down in Nu. 15 24. On critical grounds this law also must be held to belong to P_2. *(b)* *vv.* 5 7-10, 14-28, on the other hand, by which the quite peculiar ritual of the Day of Atonement is prescribed, are the work of a much later hand.

Why and when these various portions of the present law were combined into one are questions that will be discussed elsewhere (see LEVITICUS, § 6 *f.*, and HEXATEUCH); the important fact, gained from critical analysis, is that the Day of Atonement, as far as its ceremonies are described in Lev. 16, is of comparatively recent origin, and the result of a very interesting development.

2. Stages of development.

This conclusion is supported by a variety of considerations. (*a*) That the pre-exilic worship knew of no such day as is described in Lev. 16 is evident, not only from the absence of all mention of it (an omission which cannot be accidental, the other high days being referred to), but also from the fact that consciousness of sin and sense of need of a propitiation, which are the necessary conditions of such an institution, first became prominent in the time of Ezekiel (see FEASTS, § 11). *(b)* The earliest trace of public days of fasting and humiliation in the exilic period appears in Zech. 7 3 5 8 19; the four yearly fasts there mentioned were commemorative of the national calamities at the fall of Jernsalem, and appear *to* have been still observed in post-exilic times.

Ezekiel, in this as in other respects the forerunner of the priestly law, had enjoined two atonement-days (the first day of the first month and the first of the seventh, 45 18-20).[2] A young bullock as a sin-offering was *to* be brought, and with its blood were to be smeared the posts of the house, the four corners of the altar, and the posts of the gate of the inner court—'so shall ye make atonement for the house'; together with this, certain sin-offerings for priest and people are enjoined for the passover-day (Ezek. **45** 22).

(c) When we turn to the detailed account of the reading of the law in Neh. 8 *f.*, we find mentioned a joyous celebration on the first day of the seventh month, and a celebration of the Feast of Tabernacles on the fifteenth, without any reference to a Day of Atonement on the tenth.[3] On the twenty-fourth day, on the other hand, a general fast with confession of sin was held, by no means in accordance with the ritual of Lev. 16 14-28. This makes it clear that what stood in the Law-book used by Ezra (P_2) was not the Levitical ritual (Lev. 16 14-28), but only a precept of a yearly fast-day with sabbatic rest—in other words, the precept laid down in Lev. 16 29-34.

The change from the tenth to the twenty-fourth at the first celebration **is** intelligible enough on the assumption that the fast-day was not at first so prominent in the law-book as it afterwards became in Lev. 16 14-28.

Even in the still later list of high days in Lev. 23 27 and Nu. 29 7 we do not find any reference to the specific ritual of Lev. 16 14-28; the tenth day of the

1 See Benzinger's study, *ZATW* 9 65 *f.* ['89], and cp Stade, *GVI* 2 258, and LEVITICUS, § 2.

2 The text of Ezek. 45 20 should be emended in accordance with 𝔊BAQ, בשביעי בחדש.

3 Cp Reuss, *Gesch. der* ***heil.*** *Schr.*(2) 500 *f.* (Holzinger, ***Hex.*** 750, note, differs).

seventh month is simply marked by fasting, sabbath rest, and the usual sin-offerings. The Day of Atonement described in Lev. *16* must have been the result of a long process of development, and the pericope formed by Lev. *165* 7-10 *14-28* must belong to the very latest portions of **P.** The precept in Ex. 30 10 is, of course, a still later addition to the ritual, enjoining that the blood of the sin-offering should also be applied to the altar of incense.

It is a significant fact that, as the later title proves (see above, § 1), the Day of Atonement became the most important in the ecclesiastical year; Jewish feeling in the later age inevitably led to this. Now as to the meaning of the law. The terms of Lev. 16 permit no uncertainty. The law has reference to the thorough purification of the people and sanctuary. The sin-offerings throughout the year have left many unknown or 'secret' sins; and since the people, the land, and, above all, the sanctuary are rendered impure by sin (Lev. 15 31 Nu. 19 13-20 Ez. 45 18 Lev. 16 16), there was a danger that the sacrificial services might lose their efficacy and even that Yahwè might desert his defiled sanctuary. This was the reason for the institution of the Day of Atonement—that the Israelites might annually make a complete atonement for all sin, and that the sanctuary might be cleansed (Lev. *1633).* The leading idea of the entire Priestly Law found here its best expression. The Day of Atonement quickened, on the one hand, the people's sense of sin and dread of Yahwè's avenging holiness, and, on the other hand, their assurance of reconciliation and of their renewed holiness. This holiness was guaranteed by their religious system, the efficacy of which, marred by sin, was again restored by this solemnity of expiation. It is the key-stone of the whole system, the last consequence of the principle, 'Ye shall be [ceremonially] holy, for I am holy.'

3. Fundamental principle, etc.

If we turn to the ritual, we can without difficulty discover its fundamental ideas. The high priest, after bathing, puts on plain white linen garments instead of his elaborate vestments, for he is to appear as a humble suppliant before the Holy One whom only the pure may approach. Of course, before he can make atonement for the people he must first do so for himself and for his 'house'—*i.e.*, for the entire priesthood. On entering the Holy of Holies he is to envelop in a cloud of holy incense-smoke the place of God's personal presence, lest he die. The ritual of blood-sprinkling, as far as it is peculiar to this day, is only an elaboration, required by the extreme closeness of the approach to God, of the usual procedure in sacrificial offerings. The conception has been explained by Robertson Smith[1] as an inheritance from primitive ideas about sacrifice. See SACRIFICE, § 22. I. B.

4. Propitiatory Character.

The Day of Atonement has been called by Delitzsch the Good Friday of the Law. This can hardly be maintained with regard to its earlier period. Good Friday was not instituted to restore the impaired ceremonial holiness of the community; it had from the first a reference to the individual and to spiritual religion. It was otherwise with the *Yōm Kippūrīm*, even if its institutors were not personally opposed to the supplementing and counteracting agency of teachers of a nobler religion. We will not deny that the poetic prayers composed for the 'great day' during the Dispersion touch the Christian deeply from their extraordinary spiritual depth and their sense of individual religion. These prayers, however, are no evidence of the spirit of the original institution. It is not necessary. to dwell on the hazel-ritual. The ritual of the Day of Atonement has grown (this can be shown by literary analysis as well as by archaeological considerations),[1] and the Azazel-ritual is the latest portion of it. We might perhaps suppose that those who continued Ezra's work were not up to his level; but when we look at Lev. 16 29-34*a*, which is the earliest part of the law (cp 9 7 *ff.*), we still find in it provisions opposed in tendency to the pure religion of the greatest prophets and psalmists. The procedure with the blood may be archæologically explained so as to minimise the shock which it causes us; it may also be spiritualised, so as to assume a totally new appearance; but it is, as has been stated, out of harmony with that prophetic religion which is restated in Pss. 40 50 *51.* It is also in this part of the law that we find an expression which, when correctly explained, condenses the unspiritual elements of the law into a nutshell. It is the expression *šabbath šabbāthōn*, which may well be more ancient than the day to which it is applied. RV renders Lev. *1631* thus: 'It is a sabbath of solemn rest unto you, and ye shall afflict your souls; it is a statute for ever.' Jastrow (*Amer. Journ. Theol.* 1 312 *ff.* ['98]) has made, it probable that *Sabbath* and *šabbāthōn* answer—the latter more exactly[2] than the former—to the Babylonian ceremonial term *šabattum*, which means a day of propitiation with reference to the ***dies** nefasti* of the kings. **If** *so*, the terms *šabbath* and ***šabbāthōn,*** which are derived from שׁבת, to rest, imply that by the usages on the day to which these terms are applied, rest is given to an angry God.[3] The expression 'to afflict the soul' (*'inn4nephesh*), used in the same verse, is not less archaic in spirit, even if much later in use;[4] it was adopted by late theologians as a synonym of the old word צוּם, 'to fast.' This, too, implies an unspiritual doctrine—viz., that by denying the body certain generally desired goods the mind of a deity can be influenced by his worshipper.

To examine the full force of the ceremonies of the Day of Atonement, archæologically viewed, is not our purpose. Our purpose is to emphasise their strictly propitiatory character. That same character belonged, according to the Jewish liturgy, to the ritual of New Year's Day (*Roš haš-Šanah*). It was believed,[5] through the influence of Babylonian mythology, that the fate of man was decreed on New Year's Day (the festival of Creation), and that on the Day of Atonement the decree was 'sealed.' No wonder that the nine days which intervened between the first day of the seventh month (New Year's Day) and the tenth (the Day of Atonement) were regarded by the Jews as penitential days. Precisely when this view of New Year's Day as the Day of Destiny began to be taken, we know not. Probably it began among the Jews of the Eastern Dispersion. It gives a new force, however, (1) to the collocation of ***Yim** Kippūrīm* and *Roš haš-Šānāh* in the same month, and (2) to the designation of both days (see Lev. *2324)* as *šabbāthōn.* To what extent, if at all, the ritual of these days is a revival of primitive custom, is obscure. It is quite possible that in primitive times Israelitish ritual, at any rate in certain places, approxi-

1 *Rel. Sem.*(2) 40 *f.*

1 The literary analysis of Lev. 16 is passed over in ***SBOT*** (Heb.; 1894); in the article 'Day of Atonement' in Hastings, ***DE*** 1200 6 ['98], the omission has been supplied from Benzinger. Driver's moderating remarks, however, do not affect the position taken **up** by Stade and Benzinger, who are both fully awake to the incompleteness of merely literary analysis of ancient laws. The deficiencynoted in *SBOT* **is** also to be observed in the Leviticus in Kautzsch's new translation (*HS*). Cp LEVITICUS.

2 Sabbath, acc. to Jastrow, 'is the distinctively Hebrew name given to **a** particular *šabbāthōn'* (*op. cit.* 349 *f.*). Šabbathon = Bah. ***šabattum;*** the terminations correspond (Jastrow, 332).

3 The most common term for 'propitiation' was ***nūḥ libbi*** (lit. 'rest of the heart'); *ūm* (=יוֹם, 'day') ***nūḥ libbi*** has the sense **of** 'day of propitiation' (Jastrow, 330).

4 It occurs in **Is. 58** 3 5 10 **Ps.** *35* 13 . also in Lev. 16*31* **23** 27 **32** Nu. **29** 7. That the historical Isaiah, in disparaging fasts, does not use the phrase (Is. 1 13, but cp 𝔊) is significant.

5 See ***K63*** 14 *f.* (Marduk comes at Zagmuk, the beginning of the year, 'to destine the fate of my life'); cp Karppe on 'Jewish New Year' in ***Rev. Sém.***, and Jensen, *Kosmol.* 84-86, *238.*

mated rather more to Babylonian than was afterwards the case. One could wish this to be true, for it would then be easier to account for the ceremonies of the *Yōm Kippūrīm*, so archaic in spirit, and so contrary to the tendency of Jer. **31** 31-34 Ezek. **36** 25-27 Mic. **7** 19.

At any rate, the propitiation-days of the post-exilic Israelites were nobler than those of the Babvlonians. in as far as they were for the benefit of the whole people, and not merely for that of the rulers. The Babvlonian regulations of the 'days of appeasement' (*šabattum* = שַׁבָּתוֹן) bear upon the conduct of the king; but, since 'the whole congregation is holy,' those of the *Yōm Kippūrīm* necessarily touch the conduct of all faithful Jews and even of 'sojourners (Lev. 16 29). In this respect the Jewish religion has a much closer affinity with the Zoroastrian than with the Babylonian or the Assyrian. If the provision for giving the uneducated populace a visible sign of the forgiveness of all its sins and the removal of their punishment appears to us barbaric and unspiritual (see AZĀZEL, § 1)—if, too, the populace was only too likely to misinterpret the comprehensive expressions of Lev. **16** 16 21 30, and to think that all sins whatever were cancelled by the ritual—we must remember (as regards Azāzel) the compromising spirit natural to large educational churches, and (as regards the other point) the difficulty in an Eastern language of guarding against all possible misinterpretations of phrases. A misinterpretation it certainly is when a Mishua treatise declares that—

5. Comparative nobility.

'The goat which is dismissed atones for all (other) transgressions, as well the light as the grave, the intentional and the unintentional, those foreknown and those not foreknown' (*Shebu'oth* 1 6).

The analogy of Lev. 4 2 13 etc. Nu. 15 24 distinctly shows that in such propitiatory ordinances it is accidental transgressions (בשגגה), not deliberate transgressions (ביד רמה), that are referred to; and in *Yōmā* 8 9 we read, 'He who says, I will sin, the Day atones; to him the Day will bring no atonement.'[1]

In NT times the Jews had advanced religiously beyond the contemporaries of Ezra. In the Epistle to the Hebrews and in that of Barnabas we meet with a Christian gnosis : but there was, no doubt, also an allegorising gnosis that was Jewish. There must have been both poetic symbolisers (cp Ps. 51 7 [9]) and typologists. What Barnabas says (7 8) about the scarlet cloth tied on the neck of the 'scapegoat' is absurd; but it is an exquisite allegory that the Epistle to the Hebrews suggests in the words (Heb. 10 19-22)—

6. NT references.

'Having therefore boldness to use the entrance into the holy place with the blood of Jesus—the entrance which he dedicated for us—a fresh and living way—through the vail, that is to say, his flesh, and having a great priest over the house of God, let us approach,' etc.

Christians are, strictly, no priests (Christ is the 'great priest'); but the rending of the flesh of Christ, which brought him, the perfect one, near to God, enables his followers to make a nearer approach to the divine presence than the greatest priests and prophets of the age before him could make. The entrance of Christ into the heavenly regions through death is likened to the entrance of the high priest once in the year into the Holy of Holies. Of these two entrances the same epistle speaks thus (Heb. 9 12) :

'Nor yet through blood of goats and hulls,[2] but through his own blood, he entered once for all into the holy place.

The Jewish high priest entered the holiest through the blood of goats and bulls. The goat was the offering for the people; the bullock for the high priest himself (Lev. 16 11 15). Christ entered through his own blood. The high priest went in once in the year; Christ once for all, as the representative of his people, that they might ever after have free access to God. 'Once for all' (ἐφάπαξ) is to be explained by 9 25, 'the high priest enters the holy place every year with blood not his own' (ἐν αἵματι ἀλλοτρίῳ).

The point is not how many times in the day the high priest entered the holiest, but that he entered on one day in the year. Of course, he went in more than once on the 'great day'; the Mishua says four times—(1) with the incense; (2) with the blood of the bullock; (3) with that of the goat; (4) after the evening burnt-offering, to bring away the censer and the incense-plate. Lev. **16** 13-15 also implies more than one entrance.

There is a reference to the ritual in Heb. 13 11, where the death of Jesus outside the gate is compared with the burning of the remnants of the sin-offering without the camp. This, however, as Davidson has shown,[1] disjoints the ritual, and is really a mere isolated analogy.

The treatise *Yōmā* (cp also Jos. *Ant.* iii. 10 3 and Ep. Barn. ch. 7) throws much fresh light on the details of the ritual; we must not, however, suppose that it is in all respects literally accurate. In the Cambridge MS (Palestinian recension) it is called *Masseketh Kippūrīm*, which is its true title, as the commentary of Maimonides on the Mishna also proves. J. Derenbourg has attempted a restoration of the oldest recension (see below, § 8).

7. Details in Mishna.

The minute directions for the purification of the high priest need not detain us. Three confessions of sin (*widdūy*) form the most beautiful part of the ritual; they are preserved in *Yōmā* 3 8 4 2 and 6 2, and have passed with slight changes into the Jewish liturgy. In each of these confessions the sacred Tetragrammaton (יהוה) occurs; altogether it was pronounced ten times and as often as the high priest came to the name those who stood near fell on their faces, while the multitude responded : Blessed he the Name, the Name of the glory of his kingdom, for ever and ever.' The first part of the service (including the blood-sprinkling) was gone through close to the Most Holy Place. The rest was performed close to the worshippers, in the eastern part of the court of the priests, north of the altar, where stood two goats and an urn with two lots. The high priest drew the lots, and it was held to be a good omen if his right hand drew forth the lot 'for Yahwb.' To the horn of the 'goat for Azāzel' a 'tongue' of scarlet cloth was tied. The high priest then went to the bullock, over which he had already confessed the sins of himself and his house, and now confessed those also of 'the seed of Aaron, thy holy tribe.' Hearing the censer and the incense, he was seen to disappear within the sanctuary. There he stood alone; he rested his censer on a stone called שְׁתִיָּה[2] which stood in the place of the ark. Outside the Holy of Holies he uttered a prayer; it had to he a short one, lest the people should become anxious.[3] Again the rite of blood-sprinkling is performed in the Holiest, and then the 'goat for Yahwè' is sacrificed. A third time the high priest enters the Holiest, and again there is blood-sprinkling in all parts of the sanctuary. Forty-three such sprinklings have purified the sanctuary. But the people at large have to receive the visible sign of forgiveness. The 'goat for Azāzel' now becomes prominent. A *widdūy* or confession is uttered over the animal's head, which is now to he led to the precipice marked out for the destruction of the goat. Men of rank from Jerusalem accompany it; cries and curses hasten its progress (see AZĀZEL, § 4) Meantime the high priest puts on his 'golden vestments';[4] 'then he puts them off again, and a fourth time (see above) enters the Holiest.

The evening of the 'great day' closed with a banquet for the high priest and his friends, and with dancing in the vineyards for the maidens of Jerusalem. Probably this dance was primitive; it attached itself to the Day of Atonement, as a natural mode of relief to tired human nature (*Taanith* 4 8). See, further, DANCING, § 8; CANTICLES, § 8.

8. Literature.

The treatise *Yōmā* (*Mishna* by Surenhusius; *Yōmā* alone ed. Strack; cp Wunsche, *Per Jab. Talm.* 1 340 *ff.*); J. §§ 1-3 I. B. ; §§ 4-8 T. K. C.

ATROTH (Nu. 32 35 AV). See ATROTH-SHOPHAN.

ATROTH-BETH-JOAB (עַטְרוֹת בֵּית יוֹאָב—*i.e.*, 'crowns of the house of Joab'; αταρωθ οικου ιωαβ [B], α. ο. ιωβαβ [A], αταρω κ. βηθιωαβ [L][1]), an unknown locality, mentioned in 1 Ch. 2 54 along with Bethlehem and Netophah, in a Calebite connection; its people were sons of Salma b. Hur b. Caleb (see JABEZ). Salma was the 'father' of Beth-lehem. the burial-place of Joabs father ZERUIAH [*q.v.*]. Meyer (*Ent.* 147) suggests a connection with the valley of CHARASHIM.

ATROTH-SHOPHAN, AV ATROTH, SHOPHAN (עַטְרוֹת שׁוֹפָן ; σωφαρ [BA], -αν [F], σοφαρ [L], Eus. 214 54), a town of Gad (Nu. 32 35); perhaps one of the two localities in Moab still called 'Attārūs. See ATAROTH, 4.

ATTAI (עַתַּי, perhaps abbrev. of ATHAIAH).

1. Son of **the Egyptian** Jarha by **the daughter of Sheshan the Jerahmeelite; his** son was **Nathan**; 1 **Ch.** *2* 35 *f.* (εθθει [B], ιεθει [L], ιεθθ[ε]ι [A]). **See** JARHA, JERAHMEEL.

2. One of David's warriors; 1 Ch. 12 11 (εθοι [BN], εθθ[ε]ι [AL]). **See** DAVID, § 11, **a**, iii.

3. Son **of Rehoboam; 2 Ch. 11 20 (ιεθθ[ε]ι [BAL]).**

ATTALIA (ατταλεια [-ια Ti. WH]). A town on the coast of Pamphylia, founded by Attalus Philadelphus, king of Pergamus, for the Syrian and Egyptian trade, which it shared with Perga. There has been some discussion about the site, as Strabo (p. 667), enumerating from west to east, mentions Olbia, the river Catarrhactes, and then Attălia; from which it would seem that Attălīa must be the modern *Laara*. Ptolemy, however, is more exact : he puts it west of the Catarrhactes. Thus, it is equivalent to the modern *Adalia*, which is still a port with considerable trade. The town has a picturesque appearance, being perched on the long line of cliffs created by the calcareous deposits of the Catarrhactes, which pours over them in torrents to the sea. The remains are almost entirely Roman. The apostle Paul passed through the town on his return from his 'first missionary tour' in the interior (Acts **1425**). It is still a bishopric. [See PERGA, and Ramsay, *Hist. Geogr. of Asia Minor*, 420.] W. J. W.

ATTALUS (ατταλος [ANV]). Three kings of Pergamus bore this name; but we are here concerned with the last two—Attalus II., Philadelphus, 159-138 B.C., and his nephew Attalus III., Philomētor, 138-133 B.C. The Pergamene kings were all allies of Rome, and the last made the Roman people his heir (see ASIA). In 1 Macc. 15 22 we read that 'Lucius, consul of the Romans,' wrote letters in favour of the Jews to Ptolemy, Attalus, Ariarathes, and others. Attalus II. is probably meant; but, as the date of the letters falls in 139-138 B.C., it is possible that they were sent to his successor. Attalus III. was the son of Eumenes by Stratonice, the daughter of Ariarathes, king of Cappadocia, who was a close ally of the Romans, sharing the fate of Publius Licinius Crassus in the war with the Pergamene pretender Aristonicus, 130 B.C. Josephus (*Ant.* xiv. 10 22) quotes a Pergamene decree in favour of the Jews about the time of Hyrcanus. W. J. W.

ATTHARATES (ατταρατη [B], ατθαρατης [A], αθαρασθας [L]), 1 Esd. 9 49 = Neh. 8 9, TIRSHATHA.

ATTHARIAS (ατθαριας [BA]), 1 Esd. *640*, RV = Ezra *263*, TIRSHATHA.

ATTIRE. For Ezek. 23 15 (טְבוּלִים, *ṭ*ᵉ*bûlîm*) see TURBAN; for Jer. 2 32 (קִשֻּׁרִים, *ḳiššūrîm*) see GIRDLE; for Prov. 7 10 (שִׁית, *šîth*) see DRESS, § 1 (4).

[1] **After 𝔊L we may assume a separate place-name Ataroth ; see** ATARAH.

ATTUS (αττους [AL]), 1 Esd. 8 29, RV = Ezra 8 2, HATTUSH, 1.

AUGIA (αυγ[ε]ια [BAL]), 1 Esd. 5 38. Not in ‖ Ezra 2 61 = Neh. 7 63. See BARZILLAI, 3.

AUGURY ('one who practises augury,' RV Lev. 19 26 Dt. 18 10 14 **2 K. 216**; AV 'observer of times,' מְעוֹנֵן). See DIVINATION, § 2 (2).

AUGUSTUS (αυγουστος [Ti. WH]), an honorific title bestowed upon Octavian (27 B.C.), and from him handed on to his successors. It is applied to him, along with the title of CÆSAR (*q.v.*), in Lk. 2 1 'EV. For his reign, in as far as it concerns Jewish history, see HERODIAN FAMILY, 1, and ISRAEL; and for the difficulties raised by Lk. ***2*** 1 with regard to the census, see CHRONOLOGY, § 59 *f.*

In Acts 25 21 25 the AV 'Angustus' for *σεβαστός* should rather be, as in RV, simply 'the emperor,' or, as in RVᵐᵍ·, 'the Augustus.' The reference is to Nero (see CÆSAR). For 'Augustus's band,' or rather (as in RV) 'the Augustan band' (Acts 27 1 *σπείρης Σεβαστῆς*), see ARMY, § 10.

AURANUS (αυρανου [VA]; cp AVARAN), leader of the Assassins in Jerusalem in the time of Lysimachus (2 Macc. 4 40).

AUTEAS (αυταιας [BA]), 1 Esd. 9 48 = Neh. 8 7, HODIAH, 2.

AUTHORITIES (εξουσιαι, 1 Pet. 3 22). See ANGELS, §§ 1, 9.

AVA (עַוָּא), 2 K. 17 24 AV; RV AVVA.

AVARAN (αυαραν [ANV]), 1 Macc. 2 5. See ELEAZAR, 7; MACCABEES, i. § 3; cp AURANUS.

AVEN (אָוֶן; ων [BAQΓ] in Hos. 10 8 Am. 1 5, but ηλιου πολεως [BAQ] in Ezek. 30 17†). 1. In Ezek. 30 17 the reference is doubtless to the Egyptian Heliopolis (see ON).

2. In Hos. 10 8 (EV 'the high places of Aven') Targ. Jon. has בֵּיתְאֵל, Bethel, which explanation is given by all ancient and most modern interpreters; but, in consideration of the well-attested use of אָוֶן (*aven*) in the sense of 'false worship,' 'idolatry' (see, *e.g.*, Hos. 12 12 [11]), it is a question (1) whether we should not render with **G.** A. Smith, 'Destroyed are the high places of idolatry, the sin of Israel,' and (2) whether, when we have regard to the parallel passage Am. 7 9, and to the probably not infrequent occurrence of glosses in the MT of the prophetic writings (see, *e.g.*, Mic. 1 5*b*), the words און חטאת should not be either omitted or printed in a different type as an editorial insertion. The passage, as Wellhausen remarks, gains greatly by this omission. Vg.'s reading, *excelsa idoli*, favours the view here taken of אָוֶן. Ibn Ezra paraphrases במות בעלים 'the high places of the Baals.'

3. In Am. 1 5 Maundrell (1697), Grove, W. A. Wright, and G. A. Smith (with Hitzig) are inclined, in company with 𝔊, to identify the 'plain (or broad valley) of Aven' (BIKATH-AVEN; so AVᵐᵍ·) with the great plain between Lebanon and Antilibanus (the so-called *Beḳā'*), in which the famous temple of the Syrian Heliopolis (Baalbec) was situated. The vocalisation אָוֶן will then imply a play on the name.—not On, but Aven. This, however, is a far-fetched supposition. On (= Egyptian *Anu*) represents the secular, not the religious, name of the Egyptian Heliopolis (see BETH-SHEMESH, 4). It is very doubtful, moreover, whether the second Heliopolis (Baalbec) was an Aramæan city in the time of Amos, and it is a plausible view of Wellhausen that אָוֶן 'false worship,' has been substituted for the name of some god. Cp Winckler, ***A T Untersuch.*** 183, n.

AVENGER (גֹּאֵל), Nu. 35 12. See GOEL.

AVIM, AVIMS, AVITES. See AVVIM.

AVITH (עֲוִית, in 1 Ch. Kt. עיות; γεθθα[ι]μ [BADEL]), the city of Hadad I., king of Edom, Gen. 36 35 1 Ch. 1 46 (γεθθαμ [A], ευιθ [L]). 𝔊's reading of the Hebrew must have been גִּתִּים, Gittaim, which is clearly correct. The city of the next king had a name of similar meaning (Masrekah). See GITTAIM. T. K. C.

AVVA, AV AVA (עַוָּא or עַוָּה; Vg. *Avah*); 2 K. 17 24 (αια [BA], αιαν [L]), RV; also **Ivvah,** AV IVAH, עִוָּה (omitted or only represented in corrupt form in 𝔊; Vg. *AVA*), 2 K. 18 34 (αυα [A]; not in 𝔊^BL), 19 13 (ουλου [B], αυτα [A], om. L) = Is. 37 33 (ουγαυα [B ℵ OQ^mg.], εγγουγαυα [A], ουτε or ουτα [Q*]). In the latter group of passages the punctuation implies an exegetical mistake (see commentators on Is.): the name throughout should be Avva or Avvah, and it used to be thought that the city referred to the same as that from which the king of Assyria brought colonists to the 'cities of Samaria' (2 K. 17 24). It is clear, however (Wi. *AT Untersuch.* 101 *f.*), that 2 K. 17 24 31 have been interpolated by some one who supposed SEPHARVAIM [*q.v.*] in 2 K. 18 34 19 13 to be the Babylonian city of that name. It is only in the speeches of Sennacherib's envoys that Avva has a right of existence; 'Avva or 'Avvah, however, is surely a corruption of 'Azzah (עַזָּה), 'Gaza.' Tiglath-pileser, when he conquered Gaza in 734 B.C., appears to have introduced the cultus of Asur (Wi. *GBA* 228, 333). 'Where,' then, 'are the gods of Sepharvaim and of Gaza?' (So Che. *Exp. Times*, June 1899.) T. K. C.

AWIM (עַוִּים, so RV; AV AVIM, AVIMS, AVITES [**Avvites,** RV]). 1. According to Dt. 2 23, the Avvim inhabited the Philistine coast 'as far as Gaza' before they were 'destroyed' by the Caphtorim—*i.e.*, the Philistines. The same late writer, in whom the antiquary's interest is prominent,[1] states that the Avvim dwelt in villages or settlements (חֲצֵרִים; see HAZOR); 𝔊 and Vg., however, read החוים, 'the Hivites' (οι ευαιοι [BAFL]; *Hevæi*). In Josh. 13 2-6 (an editorial insertion which expands the simple statement of JE in *v.* 1) we find the Avvim again introduced, and described (if RV is right) as belonging to the S. of Philistia; probably, however, 'on the south' belongs to the whole region defined in *vv.* 2*b* 3. Here 𝔊 and Vg. once more read 'the Hivites.' Sir G. Grove (in Smith's *DB*) suggests that the Avvim may be identical with the Hivites (cp 𝔊 Vg. above); but the latter name is uniformly found in the singular (החוי). The word might, to a Hebrew ear, mean, yet probably does not mean, 'ruins' (cp IIM). Not improbably it is a mutilated form of עַרְבִים, 'Arabians' (Che. *Exp. Times*, June 1899). The Avvim (so-called) were Bedawin who had begun to adopt a settled life.

2. הָעַוִּים, with def. art., 'the ruins' (αιειν [B], αυειμ [AL], Vg. *Avim*), an unidentified place in Benjamin (Josh. 18 23). It is mentioned in immediate connection with Bethel and Parah, and on this account has been conjectured by Knobel to be the same as Ai.

3. In Josh. 15 29 𝔊^AL reads 'Avvim' for 'Iim.' See IIM (1).

4. The people of AVVA (*q.v.*), 2 K. 17 31. 𝔊 again οἱ ευαιοι [BAL (there is a second rendering, αιωνειμ in L)]; Vg. *Hevæi*. T. K. C.

AWL (מַרְצֵעַ, lit. 'borer'; 'οπητιον [BAFL]). An instrument for boring, mentioned in the description of the 'law of slavery' (Ex. 21 6 Dt. 15 17). It probably resembled the Egyptian boring instruments depicted in Kitto (*s.v.*), or those more recently discovered by Bliss at Tell el Hesy (see *A Mound of Many Cities*, S 1). Such instruments were used by workers in leather (see Erman, *Life in Ancient Egypt*, 450 *f.*). Cp SLAVERY.

AWNING (מְכַסֶּה, cp Gen. 8 13), Ezek. 27 7 RV, correcting the punctuation (מְכַסֵּךְ, AV 'that which covered thee'). Cp DRESS, § 1 (4).

1 Cp Kue. *Hex.* 117-119; Mey. *GA* 1 217 (§ 179).

AXE. From the rude stone chisels and hatchets ('Celts') of palæolithic man, bronze and iron axe, hatchet, tomahawk, and adze were gradually developed. Various early forms of these implements (needed alike in war and in peace) are found in our museums of Egyptian and Babylonian antiquities; the monuments also give ample evidence of their existence. See HANDICRAFTS and WEAPONS.

Of the OT words for 'axe,' three at least may be nearly synonymous:

1. גַּרְזֶן, *garzen* (*securis*); Dt. 19 5 (ἀξίνη); 20 19 (σίδηρος); 1 K. 6 7 (πέλεκυς); Is. 10 15 (ἀξίνη) everywhere an implement for felling trees or hewing large timber for building. The word is used thrice in the Siloam inscription (*ll.* 2 4), in the sense of a quarryman's or miner's pick. On 2 S. 12 31 2 K. 6 5, cp IRON, § 2.

2. קַרְדֹּם, *ḳardōm*, ἀξίνη, *securis* (Judg. 9 48 Ps. 74 5 1 S. 13 20 *f.* Jer. 46 22†), perhaps specially used for felling trees; if so, it would have a heavier head than the *garzen*.

3. כַּשִּׁיל, *kaššīl*, πέλεκυς, *securis*, Ps. 74 6†; in Tg. Jer. 46 22 for Heb. קַרְדֹּם. RV gives 'hatchet,' apparently to suggest a diminutive axe. 𝔊, Sym., Pesh., however, read, not פִּתּוּחֶיהָ 'its carved work,' but פְּתָחֶיהָ 'its gates.' The rather improbable word כַּשִּׁיל should perhaps be שַׂכִּין 'knife' (Che. *Ps.*(2)), and in the light of the Tg. we should emend כילפות to בַּעֲלֵפִיּוֹת 'two-edged' (Herz, Che.(2), 'with two-edged axe').

Somewhat different from these, and probably adze-shaped, is:

4. מַעֲצָד, *ma'ṣād*, χώνευμα [B ℵ AQ, reading מוצקה?], *ascia* in Jer. 10 3 Is. 44 12[1] (σκεπάρνῳ, *limâ*, AV 'tongs'), and by emendation of the text in Is. 10 33[2] (Duhm) and Zech. 11 3 [2]) (see FOREST). Ḳimḥi understands something lighter than the *ḳardōm*, or axe. In Jer. 10 3 *ma'aṣād* is a tool suitable for fashioning or carving wood.

Two other words are doubtful.

5. חֶרֶב In Ezek. 26 9, EV 'axe,' an insecure rendering. The text is possibly corrupt (see Co.; ταῖς μαχαίραις [BAQI, τοῖς ὅπλοις [Q^mg.]).

6. מְגֵרָה, 2 S. 12 31 (ὑποτομεύς [A]) = 1 Ch. 20 3, מְגֵרָה, which Berth. and Kittel conform to Sam. The text, however, perhaps needs more extensive emendation. Che. reads במגרות הברזל a marginal correction of the במגרה (after וישם) which found its way into the text (*Exp. Times*, x. 1899, p. 285). See SAW.

Of the NT names the ἀξίνη of Mt. 3 10 Lk. 3 9 is the woodman's axe; but Rev. 20 4 (πελεκίζεσθαι; cp 𝔊 1 K. 5 18) refers to the axe of the headman (πέλεκυς).

Axes were among the emblems of high rank in Egypt and at Mycenæ (see the axe figured in Erman, *Egypt*, 73; Schliemann, *Mycenæ*, 252). In the OT it is rather the mace that is the favourite emblem of sovereign power (see ROD). There is, however, a sarcastic passage in Bar. 6 15 which suggests that the axe could be an emblem of divinity; and we may perhaps illustrate it by Frazer's learned note on Paus. x. 14 1. The double-headed axe is characteristic of so-called Hittite sculptures. The Labrandean Zeus of Caria also is represented on coins as carrying a double-headed axe (*labrus* = axe in Lydian; Plut. *Quest. Græc.* 45). There appears on the coins of Tenedos a similar axe, which, being generally accompanied by a cluster of grapes, may be a symbol of the worship of Dionysus. Cp also Ohnefalsch-Richter, *Kypros*, 125 7.3 Of course, the bow and the sword, not the axe, are the emblems of Yahwè, though in Ezek. 9 2 the supernatural agents of Yahwè carry mauls (or like weapons). See BATTLE-AXE.

AYEPHIM (עֲיֵפִים), the rendering of RV^mg. in 2 S. 16 14, where the text has, 'and the king and all the people that were with him came weary.' So 𝔊, ἐκλελυμένοι [BL], ὁ ἐκλελυμένος [A]. The name of

1 מַעֲצָד as it stands does not make sense. For proposed emendations see Che. (*SBOT*, Isaiah, Heb.), Duhm, Di.-Ki.

2 'With a terrible crash' (במערצה) is only a conjectural rendering of MT.

3 Perhaps, however, the axe was depicted as a survival of the time, before the introduction of coined money, when it may have been the unit of barter (Ridgeway, *Origin of Metallic Currency*, etc., 317 *f.*). Perhaps too the 'tongue' (לשון) of gold in Josh. 7 21 was in the shape of an axe; see *Exp. Times*, Nov. 1897, p. 61.

some place seems to be required by the context. If Ayephim be indeed a place-name, the locality it indicates remains unidentified. On the other hand, it may be a corruption, or the place-name may have dropped out. Cp We. *in loc.*; 𝔊ᴸ adds *παρὰ τὸν Ἰορδάνην*.

G. A. S.

AYYAH (עַיָּה [Bä. Gi.]), 1 Ch. 7 28† RV$^{mg.}$ = AV **GAZA** [*q.v.*, 2]. See AI, 1.

AZAEL (ΑΖΑΗΛΟΥ [BA]), 1 Esd. 9 14 = Ezra 10 15, ASAHEL, 4.

AZAELUS (ΑΖΑΗΛΟC [B]), 1 Esd. 9 34 = Ezra 10 41, RV **AZAREEL,** 5.

AZAL, or rather RV AZEL (אָצַל; ΙΑCΟΛ [BאΓ], ΑCΑΗΛ [AQ]), the point to which the cleft of the mountain is to reach when Yahwè descends upon the Mt. of Olives in battle (Zech. 14 5). This place, presumably situated near Jerusalem, is often identified with the equally obscure **BETHEZEL.** Kohler, Wright, and others (after Vg. Symm.), with less probability, take אל-אצל to be an adverbial expression, 'very near, hard by' (cp Olsh. § 167 6; but see also König, § 330 *f.* [γ]). Clermont Ganneau thinks of the Wādy Yāṣūl, a little valley on the right of the ʿAin el-Lōz, in the Wādy en-Nār (*PEFQu.*, 1871, p. 101).

AZALIAH (אֲצַלְיָהוּ, ΕCCΕΛΙΟΥ [AL]), father of Shaphan the secretary, 2 K. 22 3 (ΕΛΙΟΥ [B]) = 2 Ch. 34 8 (CΕΛΙΑ [BA]).

AZANIAH (אֲזַנְיָה, § 32, 'Yahwè weighs,' cp Jaazaniah; ΑΖΑΝ[Ε]ΙΑ [BA], -ΝΙΗΛ [א], ΑΖΑΙΟΥ [L]), a Levite signatory to the covenant (see EZRA, i. § 7), Neh. 10 9 [10].

AZAPHION (ΑCCΑΦΕΙΩΘ [B]), 1 Esd. 5 33 AV = Ezra 2 55 RV, HASSOPHERETH [*q.v.*].

AZARA, RV ASARA (ΑCΑΡΑ [BA]), a family of **NETHINIM** mentioned after Phinees (= P[h]aseah) in the great post-exilic list (see EZRA, ii. § 9), 1 Esd. 5 31†. Unmentioned in ‖ Ezra 2 49 Neh. 7 51.

AZARAEL (ΟΖΕΙΗΛ [BA]), Neh. 12 36 **AV,** RV AZAREEL, 4.

AZARAIAS. 1. AV **SARAIAS,** 1 Esd. **8** 1 (ΑΖΑΡΑΙΟΥ [B], CΑΡΑΙΟΥ [AL]) = Ezra 7 1, **SERAIAH,** 7.

2. **AV** AZARIAS (2 Esd. 1 1); see **AZARIAH,** 3.

AZAREEL, or rather, as in RV, Azarel (עֲזַרְאֵל, § 28; 'God helps'; ΕΖΡΙΗΛ [AL], cp AZRIEL).

1. One of David's warriors (1 Ch. 12 6; οζρειηλ [BN], ελιηλ [A]; ειηλ [L]). See DAVID, § 11, *a.* iii.

2. One of the sons of Heman (see LEVI), 1 Ch. 25 18 (αζαρια [B]; οζιηλ [L]; cp UZZIEL).

3. A Danite 'prince' under David (1 Ch. 27 22; αζαραηλ [B], αζριηλ [L]). See DAVID, § 11, *c.* i.

4. A priest in list of inhabitants of Jerusalem (see EZRA, ii. § 5 [*b*] § 15 [1] *a*), Neh. 11 13 (εσδριηλ [Bא]); in the procession at the) dedication *of* the wall (see EZRA, ii. § 13 *g*), Neh. 12 36, AV AZARAEL (οζειηλ [Bא*A], οζρειηλ [א$^{c.a}$ ρ superscr.]).

5. In list of those with foreign wives (see EZRA, i. § 5, end), Ezra 10 41 (εζερηλ [B], εσριηλ [א]) = 1 Esd. 9 34 (ESRIL, RV EZRIL, εζρ[ε]ιλ [BA], εσριηλ [L]), apparently repeated as AZAELUS (*ib.* αζαηλ [A], -ος [B], om. L).

AZARIAH (עֲזַרְיָה, §§ 28 84 [or עֲזַרְיָהוּ; in nos. 1, 2, 6, 7, 8, 13, 15, 19, 20; cp Baer on 1 Ch. 2 38], 'Yahwè helps'; cp **ELEAZAR,** AZRIEL; ΑΖΑΡΙΑC [BAL]).

1. b. Zadok; priest, temp. Solomon, 1 K. 4 2 (αζαρει [B]). See **BEN-HUR.**

2. Chief priest, temp. Uzziah (2 Ch. 26 17-20).

3. Chief priest, temp. Hezelciah (2 Ch. 31 10-13).

In 1 Ch. 6 9-14 (5 35-39) the name of Azariah is borne by the twelfth, the fourteenth, and the twentieth in descent from Aaron in the line of Eleazar (*vv.* 9 11 13 αζαρια [B]); of the fourteenth it is said that he 'executed the priest's office in the house that Solomon built in Jerusalem' (1 Ch. 6 10 *f.* [5 36 *f.*]). Omissions and transpositions allowed for, the three Azariahs in this series may be held to be identical with nos. 1, 2, and 3 above; at the same time, it is difficult to suppose that the Hilkiah of 1 Ch. 6 13 *f.* (5 39 *f.*) should be distinguished from the Hilkiah of 1 Ch. 9 11 and Ezra 7 1 (ζαρειου [B]); if we identify these, Azariah (3) was a contemporary of Josiah, not of Hezelciah. This name appears also as Azarias, Azaraias, Aziei, Ezerias, and Ezias.

4. Expounder of law (see EZRA, ii. § 13 *f.*; cp i. § 8; ii. § 16 [5], § 15 [1] *c.*), Neh. 8 7 (om. BאA) = 1 Esd. 9 48 (AZARIAS), and signatory to the covenant (see EZRA, i. § 7), Neh. 10 2 [3] (αζαρια [Bא$^{c.a}$A], ζαχαριας [א*]). See also Neh. 3 23 (αζαρια [BNAI), 24 (βηθαζαρ[ε]ια [BNAI, οἴκου α< [L]). He is apparently the EZRA of Neh. 12 1 13.

5. A Kobathite Levite (1 Ch. 6 36 [21], αζαρια [BL], cp 2 Ch. 29 12, עזריהו). In 1 Ch. 6 24 [9] his place is taken by UZZIAH, 2.

6. h. Nathan, supervisor of Solomon's twelve prefects (1 K. 4 5). Probably he had to see that the contributions of the different departments were punctually furnished. His father was most likely the well-known prophet who in 2 S. 12 1 is called simply Nathan (so Ew., We., Klo.). Others (*e.g.*, Bähr) make Azariah Solomon's nephew; cp 2 S. 5 14 (𝔊 ορν[ε]ια [B*L]). See however, ZABUD.

7. A son of King Jehoshaphat, twice enumerated (as Azariah and Azariahu) in 2 Ch. 21 2, but omitted in 𝔊 [B].

8. A son of Jehoram, king of Judah in 2 Ch. 22 6 (οχοζ[ε]ιας [BAL]); hut it is clear from 2 K. 8 29, as well as from 2 Ch. 22 1, that AHAZIAH [2] is meant. In 2 Ch. 21 17 he is called JEHOAHAZ (*q.v.*, 3).

9. King of Judah, otherwise known as UZZIAH (*q.v.*, 1).

10. One of the 'three children,' companions of Daniel; otherwise called ABEDNEGO [*q.v.*] (Dan. 1 6 7 11 19 Song of Three Children, *v.* 66 [𝔊, Theod. Dan. 3 88], AZARIAS, 7).

11. A Judahite, son of Ethan, 1 Ch. 2 8 (ζαρεια [B]; αζαρια [A]).

12. A Jerahmeelite, 1 Ch. 2 38 *f.* (αζαρια [B]).

13. b. ODED, a prophet of Judah, whose prophecy to King Asa is recorded in 2 Ch. 15 1-8. The prophecy is attributed to Odcd in *v.* 8.

14. Son of Jeroham; one of the captains who were associated with Jehoiada in deposing Athaliah (2 Ch. 23 1).

15. Son of Obed; another of the captains associated with Jehoiada (2 Ch. 23 1; cp 1 Ch. 2 38 *f.*).

16. Son of Hoshaiah; an opponent of Jeremiah, Jer. 43 2 (αζαχαριας [א*]). Cp JAAZANIAH, 1.

17. Leader (see EZRA, ii. § 8 2) in the great post-exilic list (*ib.* ii. g), Neh. 7 7 (αζαρια [Bא], -ρεα [A]) = Ezra 2 2, SERAIAH; see EZRA (αραιας [BA*], σαραιας [A$^{a?}$L]).

18. In procession at dedication of wall (see EZRA, i. § 13 *g*), Neh. 12 33, ζαχαριας [Bא] (see Baer), cp (4).

19. An Ephraimite, temp. Ahaz, who took part in restoring the captives of Judah, 2 Ch. 28 12 (ουδεια [B]).

20. h. JEHALLELEL, a Merarite Levite, 2 Ch. 29 12 (ζαχαριας [BA]).

AZARIAS (ΑΖΑΡΙΑC [BAL]), the Greek form of AZARIAH.

1. 1 Esd. 9 21 = Ezra 10 21, UZZIAH, 3.

2. In list of Ezra's supporters (1 Esd. 9 43), wanting in ‖ Neh. 8 4; see Be. *ad loc.*

3. 1 Esd. 9 48 = Neh. 8 7 AZARIAH (4).

4. RV AZARAIAS (2 Esd. 1 1), b. Helkias; see AZARIAH (3).

5. The name assumed by the angel RAPHAEL [*q.v.*] when accompanying Tobit (Tob. 5 12 6 6 13 18 9 2).

6. A captain in the army of Judas the Maccahee, 1 Macc. 5 18 56 60 (in *v.* 56 ζαχαριας [ANI]).

7. Song of Three Children, 66 (𝔊 Theod. Dan. 3 88); see AZARIAH (10).

AZARU (ΑΖΑΡΟΥ [B]), 1 Esd. 5 15 RV; **AV** AZURAN.

AZAZ (עָזָז, ΟΖΟΥΖ [BA]; but L gives ΙΩΑΖΑΖ—*i.e.*, Joazaz): cp Azaziah, a Reubenite name (1 Ch. 5 8†).

AZĀZEL (עֲזָאזֵל).[1] Of the two goats sgt apart for the great Day of Atonement (see **ATONEMENT, DAY OF**), one was chosen by lot for a sin-offering for Yahwè, the other for ʿAzāʾzel (Lev. 16 8-10).

1. Levitical practice.

After the sin-offering had been made in behalf of the people, the high priest was to lay both hands upon the head of the goat for ʿAzāʾzel, and confess over it all the sins of the Israelites (cp the confession of sin in Mishna, *Yōmā* 6 2), laying them on its head and sending it out into the wilderness to Azāzel (*v.* 21 *f.*). The meaning of this act, which is further described in the Targum of pseudo-Jonathan, is clear. The goat symbolically bears away the sins of the people. Something analogous is found in Lev. 14 4 *ff.*, where, for the purification of the leper, one bird is to be killed, and the other, charged with the disease, is to be let loose

[1] AV renders 'scapegoat.' For the renderings in 𝔊, see col. 395, note 7.

into the open field. Cp also Zech. 5 5 *ff.*, where sin is carried away bodily into the land of Shinar.[1]

The meaning of AzHzel is much disputed; it is, of course, a subject closely connected with the inquiry into the origin of the custom. It is at least certain that, as AzHzel receives one goat while Yahwè receives the other, both must be personal heings.

2. Who was Azāzel?

The theory of the Jewish interpreters (Tg. ps.-Jon., Rashi, Kimḥi; cp Ibn Ezra's references to current views), that Azāzel is a place in the wilderness, is inadmissible, and equally so are the views of Aq., Symm., Jer., AV, that it means the goat itself (τράγος ἀπερχόμενος and ἀφιέμενος, *caper emissarius*, 'the scape-goat'), and of Merx in Schenkel's *Bib. Lex.* 1 256, and others, that it is an abstract term = 'complete removal or dismissal' (from √עזל), a view probably taken by 𝔊.

It seems most natural to connect the belief in question with the demonology and angelology which developed so largely in the post-exilic age (*Enoch* 6 7 8 1 9 6 10 4). One group of interpreters, on this view, take AzHzel as a prominent member of the class of se'irim, or demons of the field and the desert, to whom sacrifices were offered in post-exilic times (Lev. 17 7; see SATYR, § 2), —to whom possibly all the sins of the people with their evil effects were symbolically sent every year (so, with various modifications, Ew., Di., Dr. [*Expos.*], Now., Benz.). We need not, however (with the first three scholars), regard the conception as a primitive one, or as having been taken over by the religion of Yahwè from an earlier stage; and least of all is there any imitation of the symbolic vengeance taken by the Egyptians on Set-Typhon[3] (see Brugsch, *Relig. u. Mythol. d. alt. Aeg.* 710). On the other hand, Cheyne ('The Date and Origin of the Ritual of 'Azâ'zel' in *ZATW* 15 153-156 ['95]) considers it to have been one of the objects of the ritual 'to do away with the cultus of se'irim by substituting a personal angel for the crowd of impersonal and dangerous se'irim.'[4] His arguments for this very attractive view are (*a*) the form of the name (deliberately altered from עזואל, 'God strengthens'; cp עֲזַזְיָהוּ, 1 Ch. 15 21), which seems to be akin to that of the other names of angels; and (*b*) more especially the passages of the Book of Enoch referring to AzHzel as a leader of the evil angels (Gen. 6 1 2 4). 'AzHzel is therefore of literary not of popnlar origin; he is due to the same school of speculative students of Scripture to which we owe the other names of angels, good and evil, in the later literature.' In any case, we must admit that the old interpreters who identified Azāzel with Satan[5] had some plausibility on their side (Orig. *c. Cels.* 6 305; Iren. *Hær.* 1 12, followed by Spencer, Hengstenberg, Kalisch, and Volck). We may at least venture to say with Reuss[6] that 'the conception of AzHzel lies on the way which led later to that of the devil.' For Azāzel is certainly described as in some sense a being hostile to God. I. B.

It is strange that so many modern critics should have failed to comprehend the ritual of the scapegoat, and

3. Recent criticism.

have rejected with much positiveness the only natural explanation of the name Azāzel, so that it has become a kind of dogma that עֲזָאזֵל is not from עזז אל, but either a weakened form of אלולל, meaning 'averruncus,' or 'porro abiens,' or 'amotio' (Ol., Merx, Stade, Kautzsch-Ges., Volck),[7] or else a broken plural of difficult interpretation 'perhaps some particular class of unfriendly demons; see Steiner in Schenkel, *Bib. Lex.* 5 599, and Bochart).[1] The truth is that the old derivation of Azāzel from √עזז, 'to be strong' (see Tg. ps.-Jon., Saadia), needed to assume a new form in order to commend itself.

The explanation of the name as עֲזָאז אֵל (which was retracted by Diestel its author) implies an un-Hebraic mode of formation, says Di., and the names of angels compounded with אֵל belong to the later Jewish theology. The former objectinn is not absolutely decisive; the name Abirel in *Jubilees* seems to be אַבִּיר אֵל (see ABRECH). Still, there is no necessity to follow Diestel; the later Jews could form names correctly, and the explanation offered above, which, with the connected theory, may claim to be virtually a new one, is not open to Di.'s objection. Di.'s second objection points the way to the true reason why modern scholars have often given such far-fetched and improbable [however learnedly justified) etymologies. They felt that a name formed on the analogy of Michael and Gabriel must be late; but their theory compelled them to suppose that Azāzel was early, and that the name Azāzel in *Enoch* (like Belial and Beelzebub, Delitrsch ventures to add) was simply borrowed from the OT.[2] Thus the light thrown on the name by the Book of Enoch was missed. Nor was sufficient use made of the Mishna treatise called *Yōmā*, with its strange but not imaginary details, although the description comes from a time not very far removed from that of the later portions of the priestly code. Nor did critics give heed enough to the facts of comparative folklore, which illustrate certain details in the *Yōmā*.

The more we study the Priestly Code, the more we are struck by the combination of firmness and laxity which its compilers display. They are firmness itself as regards the essential principles of the law,[3] but very compliant to minor popular superstitions. Nothing, therefore, can be more probable than that the legal authorities to whom the later portions of Lev. 16 are due gave their sanction to a custom which it had perhaps been found impossible to root out, on condition of its being regulated and modified by themselves. Assuming this to have been the case, we can explain the name Azāzel, and even account for the spelling, which has struck many scholars as inconsistent with the etymology עזז אל. From the point of view here adopted—viz., that the priestly code is not Mosaic, but a combination of diverse elements due to many different persons in the exilic and the post-exilic periods, and framed in a statesmanlike, compromising spirit—there can be no doubt that the view here mentioned is correct. There is no uncertainty as to the meaning of the name Azāzel, and very little as to the origin and significance of the rite.

To supplement the account of the present writer's theory given above, it may be said that, like Diestel

4. Jewish superstitions.

formerly, he opposes the widely received view that AzHzel was a κακοδαίμων to whom the sin of the people and the resulting calamities were sent, and that the belief goes back to pre-exilic times.

The first part of this view was that of Benzinger (*Arch.* 478) in 1894; it is, however, scarcely tenable. The sultan of the *jinn* to whom the *se'īrīm* propitiated by the Jews in post-exilic time; correspond (see SATYR, § 2), has no personal name; he and his subjects are impersonal. If Azāzel were a demon we should hear of him in other parts of Leviticus. Nor is it likely that even a later legislator would have adopted Azāzel as an evil demon.

---

1 For extra-biblical parallels, see below, § 3; also Ew. *Ant.* 158; WRS, *Rel. Sem.*(2) 422 [and for an Assyriological explanation of the reference to the wilderness, *see* RITUAL, § 10].

2 Cp however, below, note 7.

3 This view has left a trace in Smith, *DB*(2) 1 297, hut has received no sanction from Di. or Dr., whose names are mentioned. Against it see Diestel, *Zt. f. List. Theol.* ('60), pp. 159 *ff.*

4 Prof. G. F. Moore suggests a reference to Nachmanides on Lev. 16 8.

5 The Rabbinic identification of Satan with Sammael as 'chief of the Satans' (*Mid'. R.* on Dt. 11 3) may here he chronicled.

6 *Gesch. der Schriften des A T*(2), 501.

7 Some critics refer to 𝔊 as having initiated the theory of an abstract formation. Certainly in Lev. 16 10 *b*, 𝔊BAFL renders לעזואל εἰς τὴν ἀποπομπήν; and in *v.* 26, εἰς ἄφεσιν. What the translator means by this, however, is ἀποπεμπόμενος (so Theodoret, *Quæst.* 22 in Lev.). In short, he agrees with Aq., Symm., Jer. in deriving the name from עז and עָזַל. This gives the right interpretation of ἀποπομπαῖος [BAFL], which answers to Azāzel in *v.* 10*a*. *Averruncus* in this view of the facts, is not the equivalent of 𝔊's term', as Ew. (*Ant.* 363) supposes.

1 Del. is not happy in his explanation, 'Defier of God.' He traces the name to Arabic mythology: '*azz* is used of a horse which successfully resists its rider (*ZKW* 1 182 ['80]); hut Kdnig is no more successful—'fortis decedens' is his rendering (*Lehrgeb.* 2 *a*, 417).

2 So Driver (*Expositor*, 1885, *b*, p. 215). In Hastings' *DB* (art. 'Azazel') no very definite conclusion is reached; hut reference is duly made to the too generally neglected analogies of other popular religions.

3 Kalisch rightly says that, 'although Azazel and his goat are a stain on the Levitical legislation, they do not taint the main principle of Judaism—Gods absolute sovereignty' (*Leviticus*, 2 294).

Azāzel[1] to the Jewish theologians (including the authors of the scapegoat-ritual) was a fallen angel, evil no doubt, yet not altogether unfriendly to man, for he was the true Tubal-cain, one of the 'sons of Elōhim' mentioned in Gen. 6 1 *f.* 4[2] (see *Enoch* 6 6 *f.* 8 1 and especially 104-8 13 1). He was said to have been bound hand and foot, and placed in 'an opening in the desert which is in Dudāēl'; rough and jagged rocks have been laid upon him. Now, Dudāēl is not 'God's caldron' (Di.), but (Geiger, Charles) a fantastic modification of Hadudo in Beth Hadudo, where was the crag (צוק) down which, according to *Yōmā* (6 4; cp Tg. ps.-Jon. Lev. 16 22), the 'goat for Azāzel' was pushed, which crag Schick[3] identifies with mod. *Bēt-ḥudēdūn*, on the edge of a chalk cliff, overhanging a rocky chasm, at the right distance from Jerusalem. The coincidence seems too striking to permit a doubt as to the true character of Azāzel.

It was this personal angel (the later Jews gave a quasi-personality to the angels) that the author of the scapegoat-ritual substituted for the crowd of *se'irim* (or earth-demons) to whom the people sacrificed; just as the scapegoat was the substitute for the sacrificial victims.[4] The need must have been great indeed. In the marriage songs of the Canticles we twice find (it is probable) the strange appeal, 'I charge you, O ye daughters of Jerusalem, by the fairy-hosts and by the tree-spirits.'[5] In such a poem the name of Yahwè could not be lightly used: all the world, however, knew of the supernatural beings who haunted thickets and sometimes inhabited trees, and like the *jinn* to-day, were sometimes friendly to man, sometimes unfriendly.[6] The substitution appears to have produced an effect: at least, the Chronicler, in the third century, represents the custom of sacrificing to the *se'īrīm* as pre-exilic (2 Ch. 11 15). Certainly, too, we may infer from the details respecting the שעיר המשתלח ('the dismissed goat') in *Yōmā* that the popularity of the institution was great. The cries, 'Take (them) away and get out,'[7] reported by the Gemara on *Yōmā* 6 4, show how intensely the lower classes (Babylonians they are disparagingly called) believed in the removal of their sins by the goat. See also Ep. Barn. 7; Tertull. *adv. Marc.* 37; *adv. Jud.* '14; Just. *c. Tryph.* 40. That the 'goat for Azāzel' was really pushed over the precipice (*Yōmā*, 6), we have no reason to doubt. It is instructive to notice, however, that the scribe who inserted the directions in Lev. 16 could not bring himself to put down all that actually happened. What we read is that Aaron was to confess all the sins of the Israelites (there is great emphasis on 'all') over the goat, and to send him away in the charge of a certain man into a solitary land (אֶרֶץ גְּזֵרָה *v.* 21 *f.*). This is explained in Tg. ps.-Jon., 'and shall send him away by a man prepared from the preceding year, to take him into a rocky desert which is Beth-hadwe' (see above). In compensation for this, it is Leviticus that gives us one detail not preserved in *Yōmā*. In *v.* 10 it is said that the goat for Azāzel is to be presented alive before Yahwè, that atoning rites may be performed over him (לְכַפֵּר עָלָיו); which recalls the direction about the 'living bird' (see § 1) that forms a parallel to the scapegoat in the law of cleansing the leper (Lev. 14 6 *f.*).

[1] Another form of the name may have been Uzziel (cp Tg. ps.-Jon. on Gen. 6 4 with *Enoch* 6). The form Azael also is found.
[2] It is not worth while to examine the Jewish inter retations of this strange passage (see *Enoch*, Tg. ps.-Jon., Jude?.
[3] *ZDPV* 3 214 *ff.* ['80].
[4] See WRS, *Rel. Sem.*(2) 418, 422, 468.
[5] Cant. 27 35, בִּצְבָאוֹת וּבְאֵילוֹת. The change in the pointing is very slight: אַיְ should be אֵי. The usual explanation is very fanciful (*see* Budde). The sacred trees (especially the locust. or carob-trees) are still reverenced in Palestine as being possessed.
[6] See WRS, *Rel. Sem.*(2) 131-133; Baldensperger, *PEFQu. St.*, July '93, p. 204 *ff.* Some of the *jinn* are believed to be dangerous to newly married people. Don't play with love, say: the passage (Cant. 2 7),—for fear of the *jinn*.
[7] טול וצא טול וצא.

To resume and to supplement: the usages described in *Yōmā* are a combination of a primitive sacrifice to the demons of untilled or (especially) mountainous country with a superstitious custom still widely prevalent, according to which evils of all kinds were sought to be got rid of by the device of lading them on some animal, which was thereupon driven away from the community like the scapegoat (see Lyall, *Fortnightly Review*, 1872, p. 131; Frazer, *Golden Bough*, 2 189-193; E. F. Knight, *Where Two Empires Meet*, 221 *f.*). Such customs, as Frazer points out, tend to become periodic, like the rite of the scapegoat. See, further, ATONEMENT, DAY OF.

AZAZIAH (עֲזַזְיָהוּ, § 29, 'Yahwè is strong,' or 'strengthens'; οζ[ε]ιας [BKAL]).
1. A Levite musician, temp. David (see LEVI), 1 Ch. 15 21.
2. An Ephraimite, temp. David (1 Ch. 27 20).
3. A Levite, temp. Hezekiah (2 Ch. 31 13; Ὀζαζας [A]).

AZBAZARETH (ασβασαρεθ [A]), 1 Esd. 5 69 AV, RV$^{mg.}$ ASBACAPHATH.

AZBUK (עַזְבּוּק; αζαβογ [א], -χ [B], αζβογχ [A], εζλογκ [L] *AZBOC*), father of NEHEMIAH [2] (Neh. 3 16†). Possibly of non-Judæan origin; cp Mey. *Ent.* 147 167.

AZEKAH (עֲזֵקָה, αζηκα [BKAQL]), a town in the lowland of Judah (Josh. 15 35, Ἰαζηκα [B]), not far from the supposed scene of David's combat with Goliath (1 S. 17 1). This was in the VALE OF ELAH (*W. es-Sanṭ*, on the upper course of the Sukereir) near Socoh (Shuweikeh), which is about 12 m. S. from Aijalon and 2 m. S. from Jarmuth. Azekah is mentioned as one of the points to which the pursuit of the five kings by the Israelites extended after the battle of Beth-horon (Josh. 10 10). It was fortified by Rehoboam (2 Ch. 11 9, Ἀζεκα [L]), besieged by Nebuchadrezzar (Jer. 34 7), and re-inhabited by Jews in post-exilic times (Neh. 11 30). Perhaps an echo of the name survives in *Bīr ez-Zāġ*, N. of Socoh (cp Buhl, *Pal.* 90, n. 92; and see, on the other hand, Seybold, *MDPV*, 1896, p. 26).

AZEL (אָצַל), Zech. 14 5 RV=AV AZAL, *q.v.*

AZEL (אָצֵל, § 50; abbrev. from AZALIAH, *q.v.*; εσηλ [BA], ασαηλ [L]), a descendant of Saul, in a genealogy of BENJAMIN (*q.v.*, § 9, ii. [β]), 1 Ch. 8 37 *f.* (ασσαηλ [L])=9 43 (εσαηλ [Bא]), 9 44 (εσαηλ [א]).

AZEM (עֶצֶם), Josh. 15 29 AV, RV EZEM.

AZEPHURITH, RV ARSIPHURITH (αρσειφογρειθ [B]), 1 Esd. 5 16=Ezra 2 18, JORAH.

AZETAS (αζηταс [BA], om. L), a family in the great post-exilic list (see EZRA, ii. § 9, § 8 *c*) in 1 Esd. 5 15, but not in || Ezra 2 16=Neh. 7 21; perhaps the name owes its presence to some mistake (Mey. *Ent.* 155 n.).

AZGAD (עַזְגָּד, § 43—*i.e.*, 'strong is Gad' [cp Azbaal, *CIS* 1 118, and see GAD], or, 'fate is hard' (?); αζγαδ [AL]). The Bne Azgad, in the great post-exilic list (see EZRA, ii. § 9), Ezra 2 12 (reckoned at 1222; ασγαδ [B], αβγ. [A], ασιαδ [L])=Neh. 7 17 (reckoned at 2322; ασγαδ [B], αγεταδ [A], ασταδ [K]) =1 Esd. 5 13, AV SADAS, RV ASTAD (αργαι [B, where the number of the family is given as 1322], ασταα [A]). A band of 110 males of them came up with Ezra, Ezra 8 12 (see EZRA, ii. § 5 *a*; § 3) (ασταδ [B])=1 Esd. 8 38, EV ASTATH, RV$^{mg.}$ Azgad (ασταθ [BA]), and they were represented among the signatories to the covenant (see EZRA, i. § 7), Neh. 10 15 [16] (ασγαδ [B], ασταδ [א]).

AZIA (ΟΖΕΙΟΥ [B]), 1 Esd. 5 31 = AV Ezra 2 49, UZZA, 2.

AZIEI (4 Esd. 1 2) in the genealogy of Ezra, see AZARIAH, 3.

AZIEL (עֲזִיאֵל, 1 Ch. 15 20). See JAAZIEL.

AZIZA (עֲזִיזָא, § 83; 'strong'; ΟΖΕΙ [L], -Α [BN], οζιζα [A], in list of those with foreign wives (EZRA, i. § 5, end), Ezra 10 27 = 1 Esd. 9 28, SARDEUS, RV ZARDEUS (ζεραλιας [B], ζαρδαιας [A], οζει [L]).

AZMAVETH (עַזְמָוֶת, perhaps 'Death is strong' [cp Cant. 8 6], a possible name for a hero [see AHIMOTH, and cp Gray, *HPN* 231]; acc. to Kittel the ending should be *-moth* or *-muth* [**SBOT** 1 Ch. 1 20]; om. BA, ΑΖΜΩΘ [N$^{c.a\ mg.}$], ΑΣΜ. [L]). A Benjamite place near Geba (Neh. 12 29), usually identified with *el-Ḥizmeh*, a village 4 m. NE. of Jerusalem, between Jebaʿ and ʿAnāta (*ZDPV* 2 155; *PEF Mem.* 39).

The b'ne Azmaveth occur in the great post-exilic list (see EZRA, ii. § 9), Ezra 2 24 (υἱοὶ ασμωθ [B] . . . αζ. [A] . . . αμωθ [L]) = Neh. 7 28 (ἄνδρες βηθασμωθ [BN], *b.* βηθ'. [A], υἱοι ασθμωθ [L]), BETHAZMAVETH (בֵּית עַזְמָוֶת) = 1 Esd. 5 18, **RV** BETHASMOTH, which is preferable to AV BETHSAMOS (βαιτασμων [B], Βαιθασμωθ ζαμμωθ [A]).

AZMAVETH (עַזְמָוֶת,[1] see above; ΑΣΜΩΘ [BL], ΑΖΜ. [A]).

1. One of David's thirty mighty men, 2 S. 23 31 (ασβωθ [B*], σμω. [Bb], -ας μωθ [A], αζελμων [L]) = 1 Ch. 11 33 (αζβων [BN]), a native of BAHURIM [*q.v.*] (הַחֲרוּמִי [1 Ch.] and הַבַּרְחֻמִי [2 S.] being both miswritten for הַבַּחֻרִמִי [We. Dr.]). Azmaveth, the 'father' of JEZIEL and PELET, 2 (1 Ch. 12 3; ασμωθ [N]), two of David's warriors, may, however, be the place-name; cp above. See DAVID, § 11 (*a*) ii.

2. b. Jehoadah or Jarah; a descendant of Saul in a genealogy of BENJAMIN (§ 9, ii. [β]), 1 Ch. 8 36 (σαλμω [B]) = 9 42 (γαζαωθ [BN]).

3 b. Adiel, one of David's overseers (1 Ch. 27 25). See DAVID, § 11 (*c*) i.

AZMON (עַצְמוֹן), an unidentified site, marking the western portion of the southern frontier of Judah before the point where 'it went out at the brook of Egypt' (Josh. 15 4 Nu. 34 4 5†). 𝔊 has Ασεμωνα [BAL], Σελμωνα [BA], Ασελμωνα [AFL]; Targ. has קֶסֶם, on which last precarious reading Trumbull bases his identification of Azmon with ʿAin el-Ḳasēme in the W. Ḳasēme. With Azmon cp Ezem (עֶצֶם).

AZNOTH-TABOR (אַזְנוֹת תָּבוֹר—*i.e.*, 'ears, or outliers, of Tabor'—§ 99; cp UZZEN-SHEERAH), a landmark of Naphtali, doubtless near Mt. Tabor, Josh. 19 34 (ΕΝΑΘ ΘΑΒΩΡ [B], ΑΖΑΝΩΘ Θ. [A], ΑΖΩΘ Θ. [L]). According to *Onom.*, αζανωθ (*OS*[2] *224*, **88**) lay near Diocæsarea or Sepphoris; cp CHISLOTH-TABOR, and see TABOR.

AZOR (ΑΖΩΡ [Ti. WH]), Mt. 1 13; see GENEALOGIES, ii. § 2.

AZOTUS (ΑΖΩΤΟΣ [ANV], Jos. *Ant.* xii. 11 2, ΕΖΑΣ [ed. Niese], ΑΖΑΣ ΑΖΑΡΑ), the 'mount' to which Bacchides pursued the Jews in the battle (Apr. **161** B. C.) in which Judas the Maccabee lost his life (1 Macc. 9 15), is unknown. Michaelis has very plausibly conjectured that the expression may be due to a mistranslation of the Heb. inn אשדות (cp ASHDOTH-PISGAH), meaning the slopes where the hill country of Judah descends into the Shephēlah. Ewald (*Gesch.*[3] 4 422, n. 2) compares Atārā W. of Bir ez-Zēt, a small hill.

2. The Azotus (αζωτος [Ti. WH]) of Acts 8 40 1 Macc. 4 15 5 68 10 77 f. 8 41 14 14 34 16 10 Judith 2 28 is ASHDOD [*q.v.*]. Some (including Bnhl, p. **188**) also identify with Ashdod the Azotus of 1 Macc. 9 15.

AZRIEL (עַזְרִיאֵל,[2] perhaps 'help of God,' § 29).

1. One of the chiefs of Manasseh-beyond-Jordan, 1 Ch. 5 24† (εσδριηλ [B], ιεζρ. [A], εζρ. [L]).

2. A Naphtalite, 1 Ch. 27 19† (εσρειηλ [B]; but some Hebrew MSS have UZZIEL, a reading supported by 𝔊^{AL} οζιηλ).

3. Father of Seraiah [2], Jer. 36 26† (εσριηλ [BN], εσζ. [AI, εσδρ. [Q]).

AZRIKAM (עַזְרִיקָם, ΕΖΡΙΚΑΜ [AL]).

1. Levite, in list of Judahite inhabitants of Jerusalem (EZRA, ii. § 5 [*b*], § 15 [1] *a*), Neh. 11 15 (εζερει [B], εεχρει [N* vid], εζρικαν [N$^{c.a}$], εσζρι [A]) = 1 Ch. 9 14 (εσρεικαν [B], αζρικαμ [L]).

2. A descendant of Zerubbabel, 1 Ch. 3 23 (εζρεικαν [B], εσρικαμ [A], ασρ. [L]).

3. Descendant of Saul in a genealogy of BENJAMIN (§ 9, ii. [β]), 1 Ch. 8 38 (εζρεικαι [B*], εζρεικε [Bab]) = 1 Ch. 9 44 (εσδρεικαν [B]).

4. 'Ruler of the house' under Ahaz, 2 Ch. 28 7 (εγδρεικαν [B], εζρικαν [A]).

AZUBAH (עֲזוּבָה, 'forsaken'; ΑΖΟΥΒΑ [BAL]).

1. Wife of CALEB [*q.v.*] in 1 Ch. 2 18 *f.* (γαζουβα [B, A in *v.* 19], αβουζα [L]). The names in this passage are as peculiar as the constructions. Kittel (*SBOT*) renders an ***emended*** text thus: 'And Caleb b. Hezron took Azubah (deserted one) to wife, and begat Jerioth (tent-curtains); 'and these are her sons, Jesher (uprightness), Shobab (backsliding), and Ardon.' As to the names of these sons, Jesher may be read Jojashar (Yahwè is right), and Shobab Jashub (one who turns to God), and Ardon Ornan (𝔊 ορνα). But ישר can hardly be thus used of God (in spite of Dt. 32 4 Ps. 119 137), and Ornan, or (1 Ch. 3 21 MT) Arnan, has a suspicious aspect. Hence Klostermann (***Gesch.*** 115) takes *v.* 18 to be a record of a shortlived colony of Calebites, founded on the spot where there had been a pastoral settlement. He renders 'Caleb b. Hezron made the deserted one—the woman of tent-curtains—to bear children, namely, Upright. and Backslider, and Destruction' (reading אֵשֶׁת יריעות, יָשָׁר, and אַבְדָן). The colonists began well, but 'left the paths of uprightness' (Pr. 2 13), and were given up to 'destruction' (=Sheōl, Pr. 15 11). Wellhausen also (***De Gent.*** 33 *f.*) notices the symbolic character of the names; יֵשֶׁר, according to him, = יְשֻׁרוּן, Jeshurun; בת־יריעות (so he reads) is a tent-dwelling woman; עֲזוּבָה, the desert region inhabited at first by the Calibbites.

2. Mother of Jehoshaphat, 1 K. 22 42 (ἀζαεβα [B]) = 2 Ch. 20 31. T. K. C.

AZUR (עַזּוּר), Jer. **28** 1 Ezek. **11** 1 AV; RV better AZZUR [*q.v.*, 1 *f.*].

AZURAN, RV AZARU, RV$^{mg.}$ **Azuru** (ΑΖΑΡΟΥ [B], ·ζουρ. [A], om. L), family in the great post-exilic list (see EZRA, ii. § 9, § 8 *c*), in 1 Esd. 5 15, but not in ‖ Ezra 2 16 = Neh. 7 21; probably identical with AZZUR, 2 (Neb. 10 17 [18]). Note in each case the occurrence of the preceding names, Adin, Ater, and Hezekiah.

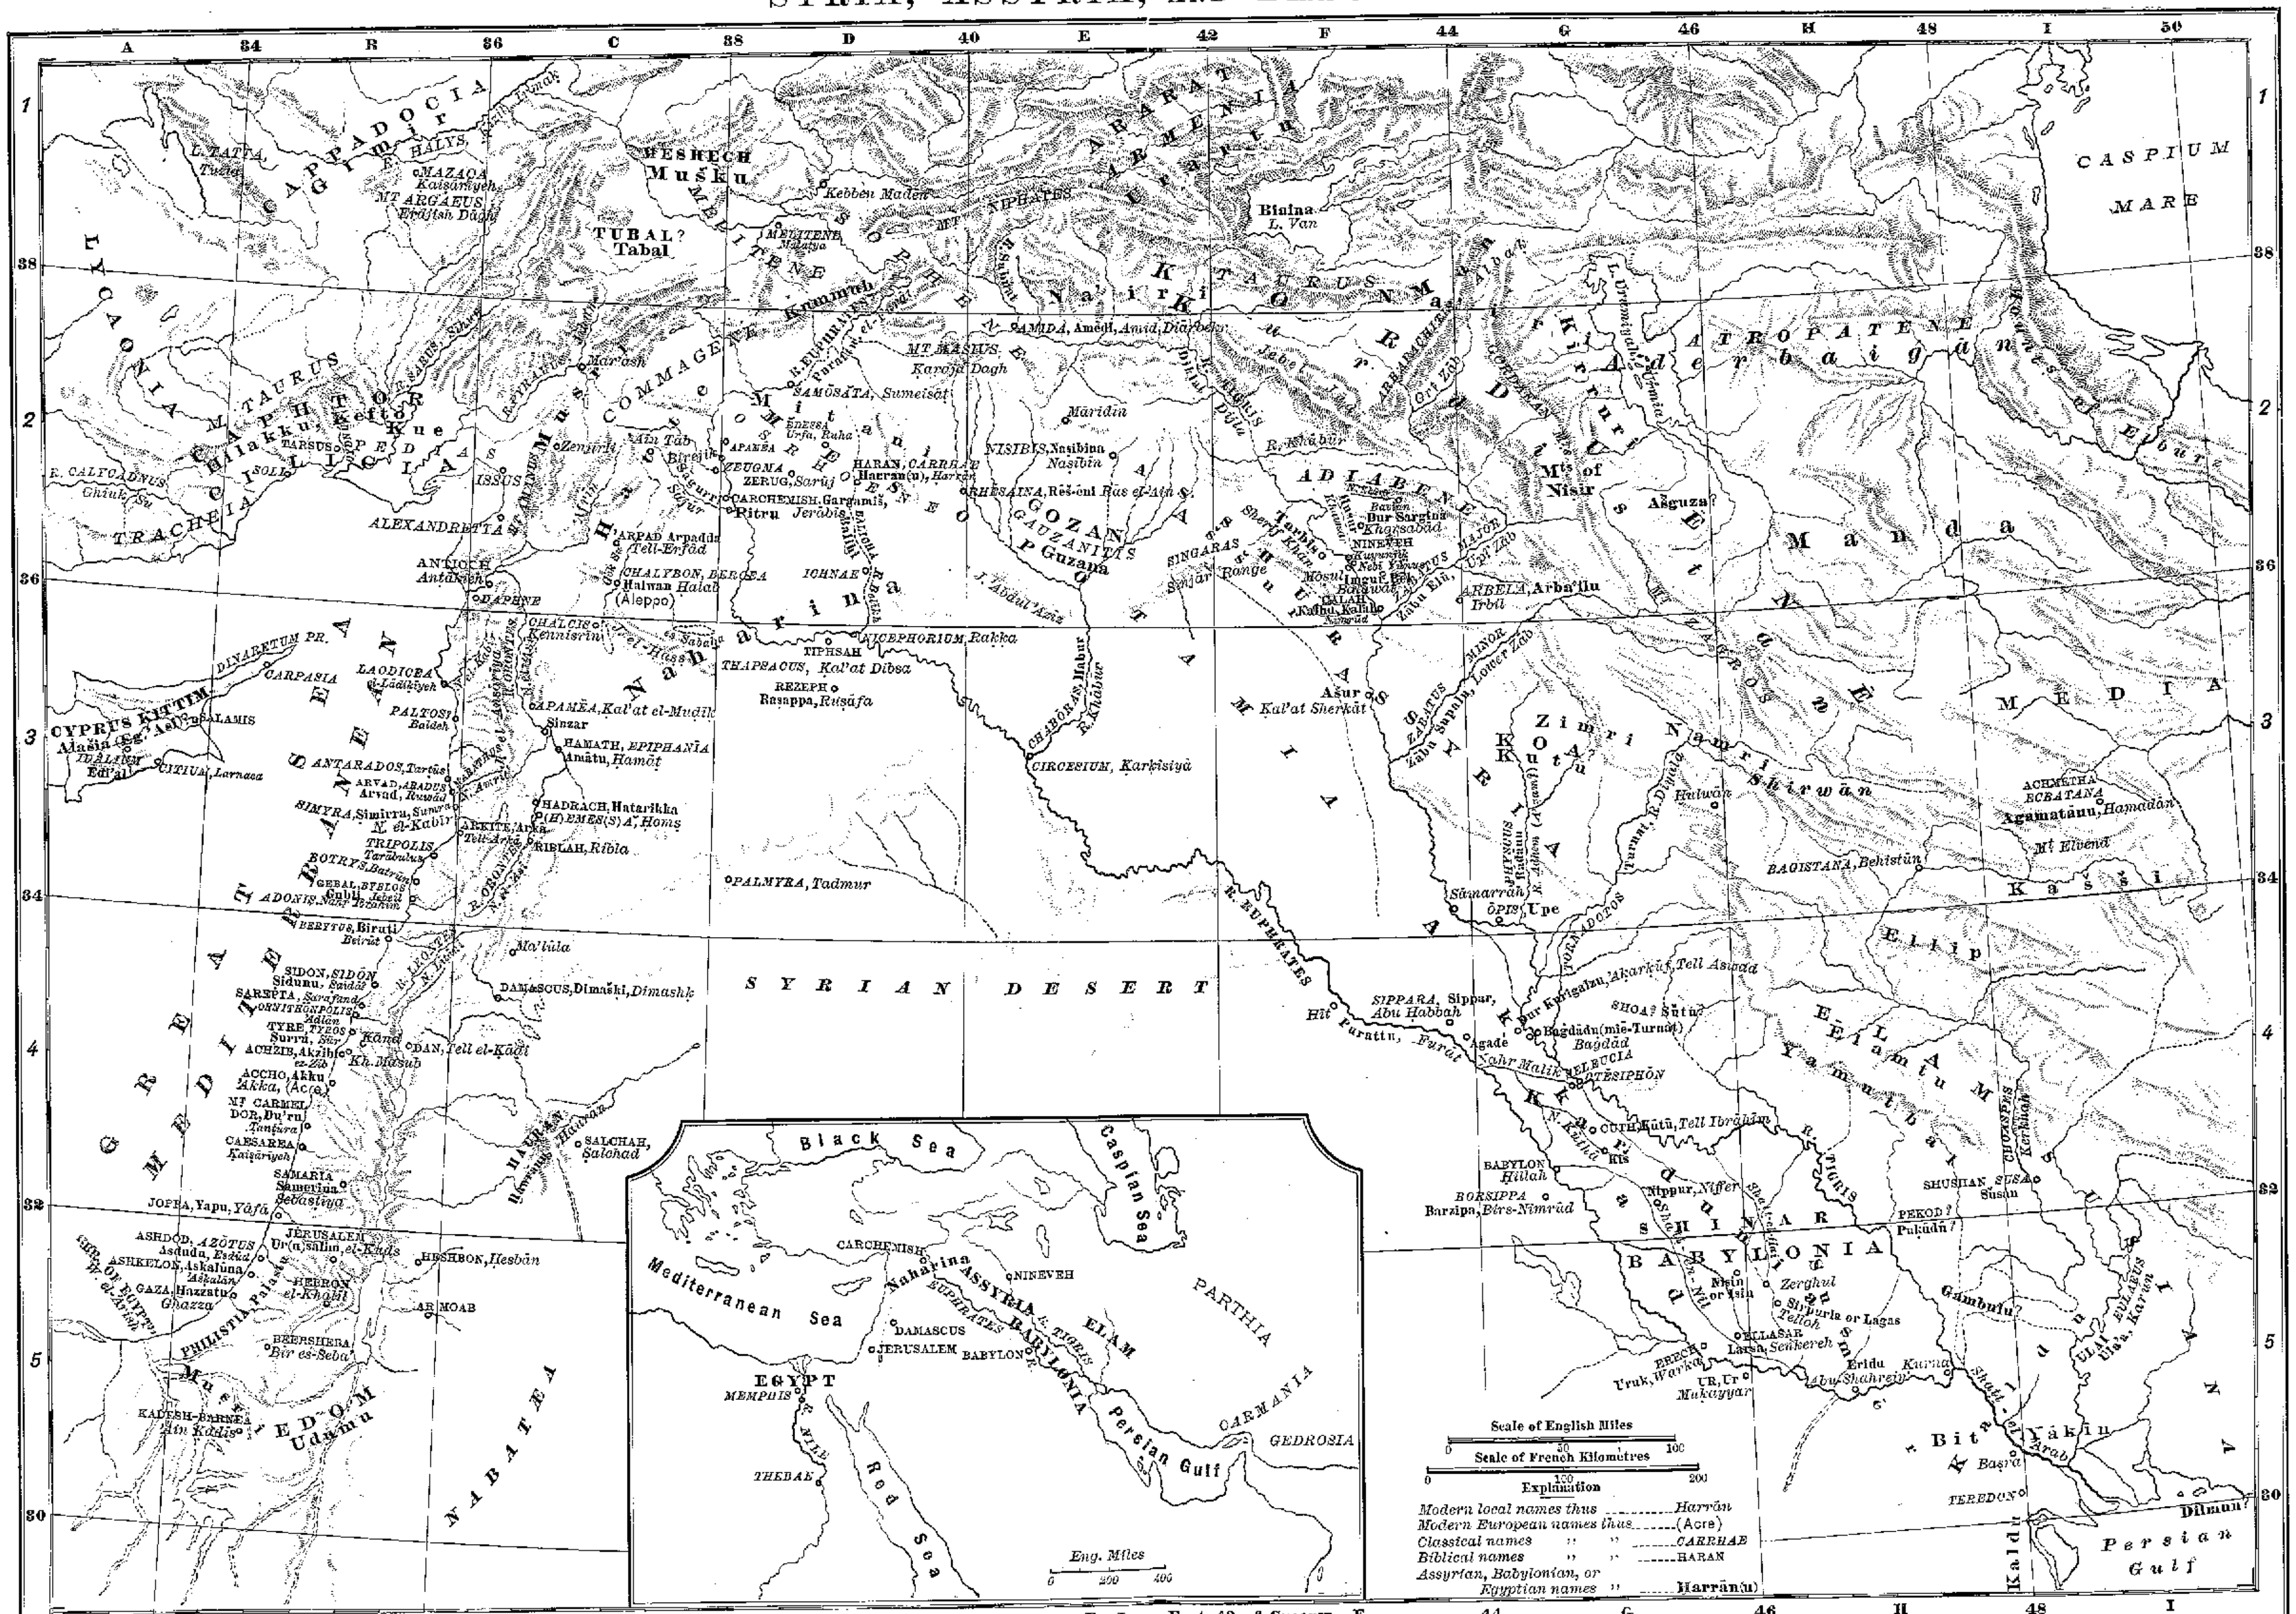
AZZAH, **AV GAZA** (עַזָּה, ΓΑΙΑΝ [B], ΓΑΖΗΣ [A], ΑΔΙΑ [L]), 1 Ch. 7 28 RV. Many Hebrew MSS here **read** עַיָּה (Ayyah; cp 𝔊^{B}), a reading recommended by the context. The place was apparently N. of Shechem. *See* GAZA.

AZZAN (עַזָּן, 'gifted with strength'; ΟΖΑ [BAFL]), father of PALTIEL, 2 (Nu. 34 26†).

AZZUR (עַזּוּר [עַזֻּר in 2], 'helped [by God]'); see NAMES, § *56*, and cp Azuri of ASHDOD.

1. Father of Hananiah, the prophet, of Gibeon, Jer. 28 [𝔊 ch. 35] 1 (αζωρ [BKAQ]); AV AZUR.

2. Father of JAAZANIAH [4], Ezek. 11 1 (εζερ [B], ιαζερ [A], αζουρ [Q], αζερ [Q$^{mg.}$], ιεζερ [ΓL]); AV AZUR.



3. One of the signatories to the covenant (see EZRA, i. § 7); Neh. 10 17 (αδουρ [B], αζ. [NAL]); AV AZURAN; perhaps also **a** Gibeonite?

---

[1] On the vocalisation and 𝔊's readings cp HAZARMAVETH.

[2] עֶזְרִי is an Aram. pronunciation (cp עַזְרִיאֵל), and it is noteworthy that here contrarily to its usual practice, 𝔊 prefers the Hebrew vocalisation (cp Kittel, **SBOT** *ad loc.*).

B

BAAL[1] (בַּעַל; 𝔊 often Η Βααλ, indicating that the reader is to substitute αισχυνη; the substitute has found its way into the text in 1 K. 18 19 25, as the corresponding בֹּשֶׁת has in the Heb. text of Jer. 3 24 and elsewhere; see Di. *MBBA* Phil.-hist. Kl. 1881) is a word common to all the Semitic languages, which primarily signifies *owner, proprietor, possessor.* It is used, for example, of the owner of a house, a field, cattle, and the like; the freeholders of a city are its *bĕʿālīm.* In a secondary sense *baʿal* means *husband;* but it is not used of the relation of a master to his slave or of a superior to his inferior; nor is it synonymous with the Heb. and Phœn. *ādōn*, Syr. *mārā*, Arab. *rabb*, in the general sense of *lord, master.* When a divine being (*ēl*) is called *baʿal* it is not as the lord of the worshipper, but as the proprietor and inhabitant of some place or district, or the possessor of some distinctive character or attribute, and therefore a complement is always required. Each of the multitude of local Baals is distinguished by the name of his own place.

1. Meaning of name: local numina.

There was a Baal of Tyre, a Baal of Sidon, a Baal of Harran, a Baal of Tarsus; a Baal of the Lebanon, and a Baal of Mt. Hermon; a Baalat of Byblos,—and so on.[2] We know that in some cases the Baal of a place had a proper name: the Baal of Tyre was Melḳart; in Southern Arabia Dhū Samāwī was the Baal of Bāḳir, 'Athtar of Gumdān, and so on. In other cases the local Baal was distinguished in some other way. The god of Shechem was Baal-berith (perhaps as presiding over an alliance; but see BAAL-BERITH); Baalzebub (to whom was ascribed control of flies; cp BAALZEBUB) had a celebrated oracle at Ekron; a βαλμαρκως, κοίρανος κώμων (Baal-marlsod), is known from inscriptions found near Beirūt; a בעל מרפא (*sanator?*) in Cyprus, and so on. In Baal-gad and Baal-zephon the second element seems to be the name of a god (see FORTUNE, BAAL-ZEPHON). On Baal-hanimon and Baal-shamem see below, § 3 *f.* There is nothing in these peculiar forms to shake the general conclusion that Baal is primarily the title of a god as inhabitant or as owner of a place.

There were thus innumerable Baals—as many as there were towns (Jer. 2 28 11 13), sanctuaries, natural objects, or qualities which had a religious significance for the worshippers. Accordingly, we frequently find in the OT the plural, Baalim, the Baals, which we must interpret not, as many still do,[3] of the multitude of idols, or of local differentiations of one god, but of originally distinct local numina. The Baals of different places were doubtless of diverse character; but in general they were regarded as the authors of the fertility of the soil and the increase of the flocks (Hos. 2 5 12), and were worshipped by agricultural festivals and offerings of the bounty of nature (Hos. 2 8 13). An interesting survival of this conception is the Talmudic phrase, field of the baal, place of the baal, and the Arab *baʿl*, for land fertilised, not by rain, but by subterraneous waters (cp *Rel. Sem.*(2) 97 *ff.*). Proper names of persons such as Hannibal (Favour of Baal), Hasdrubal (Help of Baal), Baal-yatan (Baal has given), Shamaʿ-baʿal (Baal hears), compared with similar Yahwè names, Hananiah, Azariah, Jonathan, Shemaiah, show that Phœnician parents acknowledged in the gift of children the goodness of Baal, as Israelite parents that of Yahwè.

1 See WRS, *Rel. Sem.*(2) 92 *ff.*
2 Cp in the OT Baal-hazor, Baal-meon, Baal-peor, Baal-tamar, and the like.
3 For example, Baethgen.

That Baal was primarily a sun-god was for a long time almost a dogma among scholars,[1] and is still often repeated. This doctrine is connected with theories of the origin of religion which are now almost universally abandoned.

2. Not sun-god.

The worship of the heavenly bodies is not the beginning of religion. Moreover, there was not, as this theory assumes, one god Baal, worshipped under different forms and names by the Semitic peoples, but a multitude of local Baals, each the inhabitant of his own place, the protector and benefactor of those who worshipped him there. Even in the astro-theology of the Babylonians the star of Bēl was not the sun: it was the planet Jupiter. There is no intimation in the OT that any of the Canaanite Baals were sun-gods, or that the worship of the sun (Shemesh), of which we have ample evidence, both early and late, was connected with that of the Baals; in 2 K. 23 5 cp 11 the cults are treated as distinct.

The *ḥammānīm* (חמנים), included in the inventory of places of idolatrous worship with *maṣṣēbas* and *ashēras* (Ez. 6 4 6 and elsewhere), have indeed, since Rashi, been connected with the late biblical and Mishnic *ḥammā (nen)*, 'sun,' and explained as *sun images* (RV), sun pillars;[2] and it has further been conjectured that the *ḥammānīm* belonged specifically to the cultus of Baal-hanimon, whose name occurs innumerable times in Punic inscriptions,[3] and is commonly explained 'the glowing Baal'—*i.e.*, the Sun.[4]

3. Baal-hammon.

This translation, however, can hardly be right: the article would be expected: according to all analogy, *ḥammōn* should be a genitive. 'The deity which dwells in the sun-pillars' would be formally possible; but with the direct connection of Baal-ḥammon with the sun, one of the chief arguments for interpreting *ḥammānīm* to mean 'sun-pillars' falls to the ground. In this state of the case we cannot be sure that Baal-hammon was a solar deity; and if fresh evidence should prove that he was, it would be unwarrantable to infer that the Baals universally bore the same character.

Another Baal, whose cultus was more widely diffused than that of Baal-hammon—in later times he rose above all the local Baals, and perhaps in many places supplanted them—was Baal-shamem, whose name we must interpret, not 'Lord of Heaven,' but 'The god who dwells in the heaven,' to whom the heavens belong.[5]

4. Baal-shamem.

Philo of Byblos identifies Baal-shamem (κύριος οὐρανοῦ) with the Sun (Ἥλιος; see *Fragm. Hist. Gr.* 3 565 *f.*); Macrobius says that the god of Heliopolis was at once Jupiter and Sol (*Sat.* 1 23); a Palmyrene bilingual (Vog., no. 16) seems to give "Ηλιος for בעלשמן, but the reading is not quite certain. The Greeks and the Hellenised Syrians identify Baal-shamem with Zeus (*e.g.*, Ζ. μέγιστος κεραύνιος), which is better in accord with the obvious significance of the name.[6]

When the Israelites invaded Western Palestine and

1 See, for example, Creuzer, *Symb. u. Myth.*(3) 2 413; Movers, *Phön.* 1 169 *ff.*
2 It is singular that this interpretation did not suggest itself to any of the ancient translators. See further, MAṢṢEBA, § 6.
3 In Phœnician also El-hammon.
4 In a Palmyrene inscription a *ḥammānā* is dedicated to the sun; De Vogüé, no. 123 *a.*
5 The name is equivalent to Dhū Samāwī in Southern Arabia.
6 Baal-shamem in Dan. 12 11 (perverted by Jewish wit to Šiḳḳūṣ šōmēm, 'the appalling abomination') was probably a Roman Jupiter (see ABOMINATION, ii.).

passed over from a nomadic to an agricultnral life, they learned from the older inhabitants not only how to plough and sow and reap, but also the religious rites which were a part of Canaanite agriculture—the worship of the Baals who gave the increase of the land, the festivals of the husbandman's year. At first, probably, this worship of the Baals of the land went side by side with that of Yahwè, the God of their nomadic fathers. When Israel came into full possession of Canaan, however, Yahwè himself became the Baal of the land. Names like Jerubaal (Gideon), Eshbaal (son of Saul), Baaljada (son of David), prove that Israelites in whom the national spirit was strongest had no scruple in calling Yahwè their Baal. The worship on the high places was worship of Yahwe in name; its rites were those of the old Baal cult. The prophets of the eighth century, especially Hosea, denounced this religion as pure heathenism. In whose name it is practised is to them immaterial: it is not the name but. the character of God that makes the difference between the religion of Israel and that of the heathen.

5. Israel's Baal.

In the preceding century Elijah had roused the spirit of national Yahwism in revolt against the introduction of the worship of the Tyrian Baal (Melkart) by Ahab, and Jehu had stamped out with sanguinary thoroughness the foreign religion; but this conflict was of a character wholly different from that in which the prophets of the eighth century engaged with the Canaanite Baal-religion practised in Yahwb's name. In the seventh century, with the introduction of Assyrian cults, there was a marked recrudescence of the kindred Old Israelite and Canaanite religions, which provoked the violent measures of Josiah, but was only temporarily checked by them, as we see from Jeremiah and Ezekiel.

With the cultus of the Baals in Canaan we are acquainted chiefly through the descriptions which the prophets give of the Baalised—sit *venia verbo*—worship of Yahwè. The places of worship were on the hill-tops, under the evergreen trees; they were marked by *ashēras*, *maṣṣēbas*, *ḥammānīm*. Images were not always, perhaps seldom, present: an image required a shrine or temple. At the altars on the high places, offerings of the fruits of the land and the increase of the flocks were made;[1] beside them fornication was licensed—nay, consecrated. The Baals had their priests (CHEMARIM, *q.v.*) and prophets. At the great contest on Carmel they leap upon the altar, and cry, and gash themselves with knives 'after their manner.' We may supplement these scanty notices by descriptions of Phoenician worship, especially of the Tyrian Baal, Melkart, and of the Punic 'Kronos,' in Greek authors. See, further, HIGH PLACES, IDOLATRY, and, with reference to human sacrifices, MOLECH.

6. Baal cultus.

Literature. Selden, *De Dis Syris*, 1617; Movers, *Die Phönizier*, i.; Münter, *Religion der Karthager*; Oort, *Worship of Baalim in Israel*, translated by Colenso, 1865; Baudissin, art. 'Baal,' *PRE*(3); Pietschmann, *Phönizier*, 1889 182 *ff.*; Baethgen *Beitr. z. semit. Rel.-gesch.*; E. Meyer, art. 'Baal' in Roscher,' *Lexikon der Griech. u. Röm. Myth.* 2867 *ff.* W. R. S.—G. F. M.

BAAL (בַּעַל, 'Lord'; cp מֶלֶךְ, 1 Ch. 835).

1. In a genealogy of REUBEN; 1 Ch. 55 (ιωηλ [B], βααλ [A], βαλα [L]).

2. In a genealogy of BENJAMIN (*q.v.*, § 9, ii. β); 1 Ch. 830 (βααλακαιμ, *i.e.* βααλα και? [B], βααλ [και νηρ] [A], βαελ [και ναδαβ και νηρ] [L]) = 936 (βααλ [BA], βαελ [L]). It is more probable that MT, followed by some ancestor of 𝔊L, dropped Ner (ונרב [ונר]) in 1 Ch. 8 than that it has been added elsewhere (so *SBOT*). The conjecture (We. *TBS* 31 n.) that Baal and Nadab are to be read together as a compound name is thus unsupported; it is also unnecessary, since Melech (מֶלֶךְ) likewise occurs (1 Ch. 835 etc.) alone as a proper name. See NAMES, § 42.

[1] Punic temple inscriptions defining the dues of the priests for various kinds of sacrifice (so-called Tariffs of Marseilles and Carthage) show that both the animals offered and the classes of sacrifice were closely similar to those of the Hebrew laws.

BAAL (בַּעַל), 1 Ch. 433†. See BAALATH-BEER.

BAALAH (בַּעֲלָה, § 96). 1. See KIRJATH-JEARIM.

2. A city in the Negeb of Judah, Josh. 1529 (βαλα [B], βααλα [AL]). In Josh. 193 the name is written BALAH (בָּלָה; βωλα [B], βελβωλα [A], βολα [L]), and the place is assigned to Simeon. In 1 Ch. 429 it appears as BILHAH (בִּלְהָה; αβελλα [B], βαλαα [A], βαλααδ [L]). The reading is uncertain and the site unknown.

3. Mt. Baalah, a landmark on the boundary of Judah between Shikkeron and Jabneel, Josh. 1511 (ὅρια ἐπὶ λιβα [B], ὄρος γῆς βαλα [A'], ο. γ. γαβαλα [A? a?], ο. τῆς βααλων [L]). The site is unknown, unless with Clermont-Ganneau (*Rev. Crit.* '97, p. 902) we should read נהר for הר, and identify the 'river of the Baal' with the Nahr Rūbīn (see JABNEEL, 1). More than one river in Palestine, doubtless, was dedicated to Baal.

BAALATH. See KIRJATH-JEARIM.

BAALATH-BEER (בַּעֲלַת בְּאֵר, Josh. 198 Βαρεκ [B*], Βαλεκ [Bab], Βααλθερηρραμωθ [A], Βααλεθ Βηρραθμωθ [L]) or **Baal** (1 Ch. 433), also called RAMAH of the South (רָמַת נֶגֶב, Josh. 198) or RAMOTH of the South (1 S. 3027 ραμα [BL], -θ [A] νότου); perhaps the same as the Bealoth (בְּעָלוֹת, βαλμαιναν [B], βαλωθ [AL]) of Josh. 1524 (and 1 K. 416; see ALOTH), an unidentified site in the Negeb—probably its most southern part—of Judah. The name implies that it had a well and was a seat of Baal-worship.

BAAL-BERITH (בַּעַל בְּרִית—*i.e.*, 'the [protecting] Baal of the covenant'),[1] a form of the Canaanitish Baal worshipped at Shechem (Judg. 94), called El-berith (אֵל בְּרִית, 'God of the covenant') in Judg. 946 RV.

𝔊 has in Judg. 94 Βααλβεριθ [B], βααλ διαθήκης [A], βααλβερ[ειθ] διαθήκης [L], in *v.* 46 βαιθηρ βεριθ [B], βααλ διαθήκης [A], ηλ διαθ. [L]; in 833 βααλ βεερ [A], βααλβερειθ [L], βααλ διαθήκην [B].

The covenant intended was probably that between Shechem and some neighbouring Canaanitish towns, which were originally independent, but were at length brought under Israelitish supremacy (Ew., Kue., We.). Of the rival views—viz., (*a*) that the covenant was between Baal and his worshippers (Baethgen, Sayce in Smith's *DB*(2)), and (*b*) that it was between the Canaanitish and the Israelitish inhabitants of Shechem (Be., Ki.)—the former gives an undue extension to a specially Israelitish idea, and the latter misconceives the relation of the Israelites within Shechem to the Canaanites. Gen. 1413 cannot possibly establish the former (Baethgen), nor can the name of Gaal's father, or the speech of GAAL (*q.v.*) in Jndg. 928, be used to support the theory of an influential Israelitish element in the population of Shechem. Any Israelites who might be dwelling in Shechem would be simply גֵּרִים or protected strangers, and not parties to a covenant. The temple of Baal-berith had a treasury from which the citizens made a contribution to Abimelech (Judg. 94). It was there that Gaal first came forward as a leader of the rebellion (927), and within its precinct the inhabitants of the tower of Shechem (the 'acropolis,' We.) found a temporary refuge from Abimelech at the close of the revolt (946). The deuteronomic editor mistakenly accuses the Israelites of apostatising to Baal-berith after Gideon's death (Judg. 833; see Moore's note). T. K. C.

BAALE JUDAH. See KIRJATH-JEARIM.

[1] 'Or may not Baal-berīth, El-berith, simply mean "God of the community" (cp COVENANT § 5)? The original story probably gave the name of the god of Shechem' (Prof. N. Schmidt).

BAAL-GAD (בַּעַל גָּד, 'Lord of Good Fortune'; cp Gudubal = Gud Baal [Hoffmann, *Ueber einige* **phon.** *Inschrr.* **27**]; Βααλγαδ [FL], and through corruption Βαλ(α)γαδ(α) [BA]),[1] 'in the valley of Lebanon, under Mt. Hermon,' is thrice mentioned in Joshua (11 17 12 7; 13 5 Γαλγαα [B], γαλγαλ [A], βαελγαδ [L]) as marking the northern limit of Joshua's conquests. Though Sayce and others identify it with Ba'albek because it is described as in the בקעה of Lebanon, it is much more probably the BAAL-HERMON of 1 Ch. 5 23 (cp also the 'mount Baal-hermon' of Judg. 3 3), now known as *Bāniās;* see CÆSAREA, § 7 *f.*, and DAN, ii.

BAAL-HAMON (בַּעַל הָמוֹן; Βεεθλαμων [B], Βεελλ. [ℵ], Βεελ. [A]), a place where, according to a marriage song of no historical authority (Cant. 8 11), Solomon had a vineyard which he entrusted to keepers. Some (*e.g.*, Del., Oettli) have identified it with the Balamo(n) of Judith 8 3, which seems to have been not far from Dothan. It is obvious, however, that some well-known place is meant, and the references to N. Israelitish scenery elsewhere in the Song of Songs give some weight to Gratz's conjecture that for 'Baal-hamon' we should read 'Baal-hermon' (Judg. 3 3 1 Ch. 5 23). If Socin (*Baed.*[(3)] 331) is right, Baal-hermon and Baal-gad are the same, and are to be sought at the mod. Ḥāṣbeiyā (see, however, CBSAREA PHILIPPI): on the luxuriant terraces on both sides of the valley vines and other fruit-trees are still cultivated. Most probably, however, 'in Baal-hamon' is due to a corrupt repetition of 'to Solomon.' Bickell is right in omitting it. T. K. C.

BAAL-RANAN (בַּעַל־חָנָן, § 42, 'Baal has been gracious'; cp Johanan, Ph. חנבעל, and the well-known 'Hannibal,' also Ass. *Baalḫanunu*, *COT*, 189).

1. Ben Achbor; one of the kings of Edom, according to Gen. 36 38 *f.* (βαλαεννων [A], βαλαενων [*D*], βαλαεννωρ [E], βααλενων [L]) = 1 Ch. 1 49 *f.* (βαλαεννωρ [B], βαλαεννω̄ [A], βαλλενων [L]). Strangely enough, the name of his city or district is not given. Moreover, the scribe's error עברים ('Hebrews') for עכברים ('mice') in 1 S. 14 11 (see **Bu.** *SBOT*) suggests that בן עכבור (ben Achbor) in *v.* 38 *f.* may be a variant to בן בעור in *v.* 32. Now, as Hadad II., an important king, (probably) the founder of a dynasty, has no father's name given, it seems likely that Baal-hanan is the lost father's name; and thus the text should run, 'And Saul died, and Hadad, hen Baal-hanan, reigned in his stead' (so Marq. *Fund.* 10 *f.*; see, however, BELA pi.]). See EDOM, § 4, HADAD.

2. A Gederite; according to the Chronicler, superintendent of olives and sycamores in the Shephēlah of Judah in the time of David; 1 Ch. 27 28 (βαλανας [B], βαλλανα [A], βαλααναν [L]). See DAVID, § 11 *c.*

BAAL-RAZOR (בַּעַל חָצוֹר, §§ 93, 96), 2 S. 13 23. See HAZOR, 2.

BAAL-HERMON (בַּעַל חֶרְמוֹן; § 93, Βαιλειμ [B*], Βααλειμ [B[ab]], Βααλ ερμων [AL]), 1 Ch. 5 23; see BAAL-GAD, BAAL-HAMON, and, especially, CBSAREA PHILIPPI.

BAALI (בַּעֲלִי), Hos. 2 16 EV; mg. rightly 'my lord' AV, RV 'my master.' See HOSEA, § 6.

BAALIM (הַבְּעָלִים), Judg. 2 11. See BAAL, § 1.

BAALIS (בַּעֲלִיס; Βελ[ε]ισα [Bℵ[c.a]AQ], Βενεσα [ℵ*] Βααλις [Q[mg.]], cp Sw. ad *loc.*; Jos. *Ant.* x. 9 3, § 164, Βααλιμος—*i.e.*, בעלים as some Heb. MSS read), king of the Ammonites, the prime mover in the murder of Gedaliah (Jer. 40 [47] 14; cp 41 10). The name is interesting as an etymological problem. Some render 'Son of exultation,' on the precarious supposition that in this name and a few others ב stands for בן (see BIDKAR); while Baethgen (*Beitr. zur Sem. Rel.-gesch.* 16) compares the Phœnician עברם (*CIS* 1, no. 308; עבראס, *ib.* no. 50) and renders 'husband of Isis'—a still more precarious derivation. See AMMON, § 8. W. R. S.

BAAL-MEON (בַּעַל מְעוֹן; §§ 93 96; Nu. 32 38 Ezek. 25 9 1 Ch. 5 8), otherwise **Beth-baal-meon** (Josh. 13 17), **Beth-meon** (Jer. 48 23), or Beon (בְּעֹן; Nu. 32 3).

𝔊's readings are: in Nu. 32 38, βεελμεων [BAL]; in Ezek. 25 9, επαναγωγης [B*], επανω πηγης [B[ab]AQ]; 1 Ch. 5 8, βεελμασσων [B], -μαων [A], -μεων [L]; in Josh. 13 17, οικου μεελβωθ [B], οι. βελαμων [A], οικους βεελμωθ [L]; in Jer. 48 23, οικον μαων [BAQ], ο. μαωθ [ℵ*], ο. γαμων [ℵ[c.a]]; in Nu. 32 3 βαιαν [BF[vid.]L], βαμα [A]).

The place is assigned in Numbers, Joshua, and Chronicles to the Reubenites. It is twice mentioned, once as Beth-baal-meon and once as Baal-meon, in the inscription of Mesha (*ll.* 9 30), from which we learn that it was Moabite before the time of Omri and became so again under Mesha. It was Moabite also in the time of Jeremiah (Jer. 48 23), and in that of Ezekiel. who names it with Beth-jeshimoth and Kiriathaim as 'the glory of the country' (Ezek. 25 9). It is represented by the modern Mā'īn, in the W. Zerḳā Mā'īn on the Moabite plateau, 2861 ft. above sea-level, 5 m. SW. from Madaba. There are extensive ruins (**Baed.**[(3)] **177**).

It may probably be identified with the Maccabæan BEAN [q. v.]. The *Onomastica* (*OS*[(2)] 32 40 101 32) quote the Reubenite city under the forms βαιαν, Bæan, πολὶς τοῦ 'Αμορραίου.

BAAL-PEOR (בַּעַל פְּעוֹר, Βεελφεγωρ 𝔊[BℵAFRΓL]), or, rather, the Baal of Peor (so RV[mg.] Nu. 25 3; *see* BAAL, § 1), the Moabite god to whose cult Israel yoked itself while in Shittim (Nu. *l.c.* JE, Dt. 4 3 Ps. 106 29, thrice in later writings abbreviated to PEOR [*q.v.*, 2]). The name occurs in Hos. 9 10 as a *place-name*—an abbreviation, it would seem, for Beth-Baal-Peor (see BETH-PEOR). The nature of the worship of this god is unknown, although it is not improbable that it was a local cult of Chemosh (Gray, *HPN* **131**). For the old speculations, based mostly upon precarious etymologies, see Selden, ***De*** *Dis Syris.* See, further, PEOR, and cp Baudissin, *Studien*, 2 232, Baethg. *Beitr.* 14 *f.* **261**, and Di. *Num.* ad *loc.*, Dr. *Deut.* ad *loc.*

BAAL-PERAZIM (בַּעַל־פְּרָצִים, § 89), a place mentioned in connection with a battle between David and the Philistines in the valley of REPHAIM (*q.v.*), hard by Jerusalem, 2 S. 5 20 (ἐπάνω [or, ἐπ' ἄνω] διακοπῶν [BAL]);[1] 1 Ch. 14 11 *bis* (φααλφαθισειμ . . . διακοπὴ φαρισιν [B], φαλααδ' φαθεισει . . . διακοπὴν φαριειν [ℵ], βααλ'φαρασειν . . . διακοπὴ φαρασειν [A], βαελφαρασιν *bis* [L]). According to the narrator, the name was so called because David had said, 'Yahwè has broken through my foes before me as at a breaking through of water,' Baal-perazim (*i.e.*, 'Lord of acts of breaking through') being regarded as a title of the God of Israel. The same event seems to be referred to in Is. 28 21, where the place is called Mt. Perazim (ὄρος ἀσεβῶν [BℵAQ], ὡς ὄρει διακόπτων [Aq. in Q[mg.]], ἐν τῷ ὄρει τῶν διακοπῶν [Sym. Theod. in Q[mg.]]). This form of the name suggests the most complete explanation of David's question, 'Shall I go *up* against the Philistines?' (*v.* 19). He asks whether he shall come upon the Philistines from the chain of hills which bounds the valley of Rephaim on the east (in *v.* 20 read, 'And David came *from* Baal-perazim,' with 𝔊 and Klo.); he starts, be it remembered, from Jerusalem (see DAVID, § 7). On the next occasion he did not 'go up' (on the hills), but came upon his foes from the rear (*v.* 19). In spite of this narrative, which is written from the later Israelitish point of view, the name Baal-perazim must have existed long before David. It is analogous to RIMMON-PEREZ, which means 'Rimmon (Rammān) of Perez,' and belonged properly to some point in the chain of hills referred to, which was specially honoured

[1] Through confusion of λ, *a*, and δ in the uncial writing.

[1] ἐπάνω cannot = מֵעַל, being preceded in *v.* 20 *a* by ἐκ τῶν.

by Canaanitish Baal-worshippers. David, however, beyond doubt took Baal as synonymous with Yahwè; the name gave him a happy omen, and received a fresh significance from his victory. Whether 'Perazim' was originally a name descriptive of the physical appearance of the hills E. of the valley of Rephaim, or whether it had some accidental origin, cannot he determined.

T. K. C.

BAALSAMUS (Βααλσαμος [BA]), 1 Esd. 9 43 RV = Neh. 8 4, MAASEIAH, 15.

BAAL-SHALISHA, RV **Baal-Shalishah,** (בַּעַל שָׁלִשָׁה, Βαιθσαρ[ε]ισα [B*A^vid. (ras σα A?)], Βηθσαλισα [L]), in Ephraim, evidently near GILGAL (2 K. 4 42), doubtless identical with the *Bethsalisa* and Βαιθσαρισαθ of Jer. and Eus. (*OS* 107 11 239 92), 15 R. m. N. of Diospolis (Lydda). These conditions seem to be met by *Kh. Sirīsiā*, which is exactly 13 Eng. m., or about $14\frac{1}{3}$ R. m. from Lydda (*PEFQ*, '76, p. 68). Four miles farther on is the village Kh. Kefr. Thilth, with which Baal-shalisha is now identified by Conder (*PEFM* 2 285). In illustration of 2 K. *l.c.* the Talmud (*Sanh.* 12 *a*) states that nowhere did the fruits of the earth ripen *so* quickly as at Baal-shalisha. See SHALISHA, LAND OF, and cp ZELZAH.

BAAL-TAMAR (בַּעַל תָּמָר—*i.e.*, 'Baal of the Palm,' §§ 96 103, Βααλ θαμαρ [BAL]), an unidentified locality in the neighbourhood of Gibeah, where the Israelites put themselves in array against the Benjamites (Judg. 20 33). Some think of 'the Palm of Deborah' (Judg. 4 5), which, however, was too remote (Moore). Eus. (OS 238 75) speaks of a Beth-thaniar near Gibeah.

BAALZEBUB (בַּעַל זְבוּב; ἐν τῷ [ἐν τῇ A *v.* 2, BA *vv.* 6 16; δια τον, L *v.* 1 *f.*] Βααλ μυιαν [BA], taking Zebub or μυια as the name of the god; *so* Jos. *Ant.* ix. 2 1), a god of Ekron, whose oracle was consulted by Ahaziah king of Israel in his last illness (2 K. 1 2 *f.* 6 16†).

1. Not Fly-god. The name is commonly explained 'lord of flies.' True, there is no Semitic analogy for this; but Pausanias (viii. 26 7; cp J. G. Frazer's note on v. 14 1) tells us of a Ζεὺς ἀπόμυιος who drove away dangerous swarms of flies from Olympia, and Clement of Alexandria attests the cultus of the same god in Elis (*Protrept.* 238); and we may, if we will, interpret the title 'a god who Sends as well as removes a plague of flies' (so Baudissin), which lifts the god up a little. Let us, however, look farther.

Bezold (*Catalogue*, K. 3500) thought that in an *Assyrian inscription of the 12th cent. B.C. he had met*

2. Not god of Zebub. with Baal-zabubi as the name of one of the gods of the Ebir nāri (on which see EBER, § 1), in which case Baal-zebub was a widely known divine name, adopted for the god of Ekron. The restoration of the final syllable *-bi*, however, is admittedly quite uncertain, and the reading Baal-ṣapuna (see BAAL-ZEPHON, 1) seems much more probable.[1] Winckler, therefore, suggests that Zebub might be some very ancient name of a locality in Ekron[2] (no longer to be explained etymologically), on the analogy of Baal-Sidon, Baal-Hermon, Baal-Lebanon. No such locality, however, is known, and Ekron, not any locality in Ekron, was the territory of the Baal.

3. Real name Baal-zĕbūl. It is, therefore, more probable that Baal-zebub, 'lord of flies' (which occurs only in a 'very late' narrative, one which has a pronounced didactic tendency),[3] is a contemptuous uneuphonic Jewish modification of the true name, which was probably Baal-zebul, 'lord of the high house' (cp 1 K. 8 13, and Schrader's note in *COT*). This is a title such as any god with a fine temple might bear, and was probably not confined to the god of Ekron (in the Pananimu inscription of Zenjīrli, *l.* 22, the god Raktibel bears the title בעל בית, 'lord of the house'). The second part of it strongly reminds us of É-sagila, the 'high house' of the god Marduk (see BABYLON, § 5). 'High house' (zĕbūl) would at the same time refer to the dwelling-place of the gods on the הר מועד or 'mountain of assembly' in the far north[1] (see CONGREGATION, MOUNT OF). There is some reason to think that the Phoenicians knew of such a dwelling-place. The conception is implied in the divine name Baal-Saphon, 'Lord of the north' (see BAAL-ZEPHON), and in the Elegy on the king of Tyre (Ez. 28 12 *ff.*); and the Semitised Philistines also probably knew of it. At any rate, the late Hebrew narrator—or, if we will, an early scribe—may have resented the application of such a title as 'Lord of the high house' (which suggested to him either Solomon's temple [בֵּית זְבֻל 1 K. 8 13] or the heavenly dwelling of Yahwè [מָעוֹן, Dt. 26 15 Ps. 68 6]) to the Ekronite god, and changed it to 'Lord of flies,' Baal-zebub. See BEELZEBUB. This explanation throws light on three proper names,—JEZEBEL, ZEBUL, and ZEBULON—also on Is. 63 15, 'from thy *zĕbūl* (high house) of holiness and glory.' The same term *zĕbūl* could be applied to the mansion of the moon in the sky (Hab. 3 11, We.).

T. K. C.

BAAL-ZEPHON (בַּעַל צְפֹן), or, no doubt more accurately, Baal-Zaphon (בּ׳ צָפוֹן).

1. The name of a Phœnician god, formed like Baal-Gad, Baal-Hermon, and meaning 'Baal of the north.' Though not mentioned in OT, it is important as enabling us to account for certain ancient Israelitish proper names (ZAPHON, ZEPHON, ZEPHONITES, ZIPHION), and also for the enigmatical reference to a mountain abode of the Elōhim, situated 'in the recesses of the north' (Is. 14 13; see CONGREGATION, MOUNT OF). The latter conception was evidently believed by Ezekiel (28 13 *f.*) to be familiar to the Phoenicians, and is clearly connected with the divine name in question, which describes and designates 'the Baal whose throne is on the sacred mountain of the gods in the north' (Baethg. *Beitr.* 23, 261). The Assyrian inscriptions contain several references to this god. A text of Esar-haddon speaks of Bad-ṣapunu as one of the 'gods of Ebir-nâri' (see EBER, 1], and more than one mountain-district may have borne the name of Baal-Zaphon.[2] The chief seat of the god, however, must have been in the centre of Mount Lebanon. Elsewhere (COPPER, § 3) other texts are referred to in which *Ba'ali-ṣapuna* is described as *rich* in copper, which appears to have been the case with Lebanon. Altogether we cannot be wrong in identifying Baal-Zaphon with Baal-Lebanon, 'the Baal of Lebanon.' The relation of this national deity of the Phoenicians to the Baal-Zaphon of Goshen requires separate consideration (see 2). On the question whether Baal-Zaphon was known under another of his names in Philistia, and even perhaps among the Israelites, see BEEL-ZEBUL, § 2.

T. K. C.

2. βεελσεπφων: so most MSS, but many MSS[3] βεελσεφων; Vg. *Beelsephon* (*-sefon* in Jer. OS; Targ. בְּעֵיל־צְפוֹן, cp Syr. Bĕ'el-Ṣĕphûn; Arab. Walton, 'Ṣafûn, the idol,' *ṣafūn aṭ-ṭāġūth*), a place near the point where the Israelites crossed the Red Sea, and opposite their encampment (Ex. 14 2 9 Nu. 33 7). The name is usually understood to point to a national Phœnician god of the

1 Wi. *GI* 1 223,225; Hommel, *AHT* 196, 255. Halévy has made a similar mistake (see next note).

2 Halévy (*Rev. sém.* 123) thought that he had proved this; but in Am. *Tab.* 174, 16, to which he refers for an Ekronite Zabubu, the right reading is Ṣapuna.

3 Kuenen, *Ond.* 1 409 (§ 25, n. 8).

1 This is akin to the theory of Movers, who makes Baal-zebul ('Lord of the heavenly dwelling') originally a name of Saturn, a theory which lacks evidence.

2 Tiglath-pileser III. (*KB* ii. 26 *f.*) speaks first of the mountains of Lebanon and then of the land of Ba'ali-ṣapuna as far as the mountains of Ammana.

3 *E.g.*, AF 7 10, perhaps L. This form also seems to be Hexaplaric (see the Boheiric version; the older Sahidic text has πφ for φ).

same name; but the Egyptians who mention a goddess Ba'alt(i)-ṣapuna as worshipped at Memphis[1] connect this cultus, very significantly, with that of *Sapd(u)*, a local god of Western Goshen (see GOSHEN, § 2). This divinity was, therefore, evidently not a Phoenician deity; her domain, at any rate, was either in or near the region of Goshen. Consequently, the Baal whom this local Ba'alt or Beltis implies was not also the Phœnician Baal-Zephon, though whether he had an independent origin or not, cannot as yet be determined. Like most of the local names of Goshen, Baal-Zephon (or rather—see (1)—Baal-Zaphon) is clearly Semitic.[2]

The honour accorded by the Egyptians to the consort of 'Baal-Zephon' no doubt proves the importance of that town of Goshen. It is difficult, however, at present, to determine the situation of the place (see EXODUS, i. § 6). The expression '*before* Baal-Zephon, *over against* it' (obscured in Nu. 33 7 *f.*) need not signify 'eastward of,' which in ordinary Hebrew would be the most natural meaning; it seems rather to indicate here some point not yet touched on the NE. (or S.?).

Such identifications as that with Heroopolis (Forster), 'Ajrūd (Niebuhr), etc. had to he given up even before the situation of Goshen and Heroopolis was determined by Naville's excavations. For the value of more modern theories (Brugsch—Mount Casius; Ebers, on the 'Atāḳa mountain, SW. of Suez'; Naville, on Lake Timsāḥ, near Sheikh en-Nedek), see EXODUS, i. § 7 *ff.*

I, T. K. C.—2, W. M. M.

BAANA (בַּעֲנָא, probably = BAANAH [below]; ΒΑΑΝΑ [BWAL]).

1. b. Ahilud (or perhaps better Ahimelech; see AHILUD, 2; AHIMELECH, 1), Solomon's prefect in the valley of Jezreel; 1 K. 4 12 (βακχα [B], εισβαχα [L]).

2. b. Hushai, prefect in Asher; 1 K. 4 16 (βαανας [A], βαναιας [L]). His father, Hushai, is no doubt the well-known courtier of David (2 S. 15 32). Cp AHILUD, 2.

3. Father of ZADOK [*q.v.*, 3]; Neh. 3 4 (om. A; βαναα [L]).

4. 1 Esd. 5 8 = Neh. 7 7, BAANAH, 3.

BAANAH (בַּעֲנָה; cp Nabatæan בענו [*CIS* 2 220]; ΒΑΑΝΑ [BℵAL]).

1. b. Rimmon, a Beerothite, one of the murderers of Isbhaal, 2 S. 4 2 *ff.* (βαναια [L], and in B βααμ [*vv.* 5 9], βαμμα [*v.* 6]; Jos. βανας, βαναοθα). See RECHAB, 1, ISHBAAL, 1.

2. Father of one of David's heroes, 2 S. 23 29 (βενιαμειν? [B], βααναι [A]) = 1 Ch. 11 30 (νοοζα [Bℵ] βανα [L]).

3. A leader (see EZRA, ii. § 8 *c*) in the great post-exilic list (*ib.* ii. § 9). Ezra 2 2 (βαλλεια [B], βαναα [L]) = Neh. 7 7 = 1 Esd. 5 8, BAANA [4]. Possibly the same as BAANA, 3 (above).

4. Signatory to the covenant (see EZRA, i. § 7); Neh. 10 27 [28] (om. L).

BAANI (ΒΑΑΝ[Ε]Ι [BA]), 1 Esd. 9 34 = Ezra 10 34, BANI, 2.

BAANIAS (ΒΑΝΝΑΙΑϹ [BA]), 1 Esd. 9 26, AV = Ezra 10 25, BENAIAH, 7.

BAARA (בַּעֲרָא), a 'wife' of SHAHARAIM (*q.v.*), in genealogy of BENJAMIN (§ 9 ii. β), 1 Ch. 8 8 (ΙΒΑΑΔΑ [B], ΒΑΑΡΑ [A], ΒΑΔΑΑ [L]).

BAASEIAH (בַּעֲשֵׂיָה, no doubt a textual error for מעשיה, see MAASEIAH), a Gershonite Levite; 1 Ch. 6 40 [25] (ΜΑΑϹΑΙ [B], ΒΑΑϹΙΑ [A], ΒΑϹΙΑ [L]).

BAASHA (בַּעְשָׁא or בַּעְשָׂא, § 51 [cp Ba. on 2 Ch. 16 1], ΒΑΑϹΑ [BAL]; Jos. *Ant.* viii. 12 3, ΒΑϹΑΝΗϹ; *BAASA*. Ba'sa occurs on the monolith inscription of Shalmaneser II. as the name of an Ammonite king Del. *Par.* 294, Schr. *KAT*(2) 196, M'Curdy, *Hist. Proph. Mon.* 1 273]),[1] b. Ahijah, an Issacharite, became king of Israel in succession to Nadab, whom he conspired against and slew at the Philistine town of Gibbethon, afterwards killing all the rest of Jeroboam's family (1 K. 15 27 *f.*). The fact that the Philistines were able to resume war against Israel leads to the supposition that there had been a military revolution in which Baasha, one of Nadab's generals, was the leader (cp Ki. *Hist.* 2 254). His reign was marked by his energetic operations against ASA[2] (*q.v.*). By building Ramah (1 K. 15 17) Baasha had endeavoured to shut off Jerusalem from intercourse with the outer world, and Asa was saved only by the purchased aid of Benhadad (*q.v.*, § 2), who invaded Israel 'unto Naphtali' *v.* 20, cp 𝔊). We know but little of his 'acts' or of his 'might' (גְּבוּרָתוֹ, 1 K. 16 5). He was one of the few kings who died a natural death. He was buried at Tirzah, which was still the royal residence (1 K. 15 21 33), having been made such by Jeroboam (see TIRZAH). Baasha was the head of the second dynasty, which was extirpated at a later time by Zimri, 'in accordance with the word of Yahwè which he spake against Baasha by Jehu the prophet' (see JEHU, 2, b. Hanani). The fate of the house of Baasha b. Ahijah, as also that of Jeroboam b. Nebat, is referred to by later writers; cp 1 K. 21 22 2 K. 9 9. See ISRAEL, § 29, CHRONICLES, § 8, and, for his date (about 900 B.C.), CHRONOLOGY, § 32.

BABEL,[3] TOWER OF (Gen. 11 1-9). The story of the tower (מִגְדָּל), when its lacunæ have been filled up, is to this effect. All mankind had still one language, and kept together. On one of their nomadic journeys they found a spot which suggested the adoption of a settled life; it was the plain of Shinar. Having no building material, they devised the plan of baking clay into bricks, and using bitumen for cement. They were the first city-builders. Their design, however, was to build, not only a city, but also a stupendously high tower which should be at once a monument of their strength and a centre or rallying-point that would prevent their ever being dispersed. Uneasy at their newly awakened activity, Yahwè 'came down' to take a nearer view of the buildings, and then returned (to his lofty mountain abode, Ezek. 28 14) to take counsel with the sons of Elōhim. This, he said, is but the beginning of human ambition; nothing will soon be too hard for man to do. Come, let us go down (together), and bring their speech into confusion. Hence arose the present variety of languages and the dispersion of mankind, and hence the name of the well-known city called Babylon.

1. OT story.

This naïve narrative, which is Yahwistic, probably comes from the same writer as the story of Paradise.[4]

2. General character.

Both narratives present the same childlike curiosity about causes, the same strongly anthropomorphic and in some sense polytheistic conception of the divine nature (cp *v.* 6 *f.* with

1 Sall. 4 1, rev.; cp WMM, *As. u. Eur.* 315. The reading *Ba'aly* (so Goodwin, Brugsch, etc.) is incorrect.

2 What Baal-Zaphon (at any rate the Baal-Zaphon of Goshen) signifies, is disputed. 'Watch-tower' (√צפה) it certainly does not mean. Gesenius (after Forster) compared the Gk. Τυφων (originally a wind god), who was identified by the Greeks with the Egyptian *Sêt*, Σηθ (EGYPT, § 14), on the basis of the later confusion with the giant Τυφωνεύς. Quite inadmissibly. Nor can the equation he supported by the unfortunate assertion that 'Tep' was a name of 'Sêt' (cp Kenouf, *Hibb. Lects.* for 1879, p. 114). A much more reasonable explanation is 'master of the north' *i.e.*, 'north point'; Baal-Zephon was indeed near the north end of the Gulf. Others (*e.g.*, Ebers) explain Zaphon as 'the north wind,' this wind being important for the sailors on the Red Sea, who would make their orisons at the sanctuary of BAAL-ZAPHON. Cp the name Baal-ṣapuna on Hamathite territory (Tig.-pil. III.), Hommel, *AHT*, 255, WMM, *As. u. Eur.* 315. See also ZAPHON.

1 We. (*Heid.*(1) 62) suggests that בעשא may he a contraction for בעל־שא. Similar contractions are seen in the Phœn. בעשמם and Aram. (from the Ḥaurān) בעשמן. Sa is possibly a divine name and seems to recur in the names Abishai, Ammi-sha (for Amasa), etc.; see JERUSHA. It may also be the same as the god שן mentioned in a S. Arab. inscription (*Exp. T.* 10 329). Its identification with a Palm. deity שא is open to question.

2 Cp the tradition referred to in Jer. 41 9 (𝔊ℵ omits the name).

3 On the name (בָּבֶל), see BABYLON, § 1, and below, col. 411, n. 4, and § 6.

4 According to the non-critical view, the survivors of the Deluge made their way from the mountain on which the ark had rested to the land of Shinar (so Sayce, *Crit. Mon.* 155). The Deluge-story however, makes Shem, Ham, and Japheth themselves the progenitors of the different sections of mankind, and has thus no need of the Tower-story. Even if such a narrative had been introduced into the Deluge-story, how could 'Shem, Ham, and Japheth' be called 'all the earth' (11 1)? See We. *CH* 13; but cp Stade, *ZATW* 14 276 *ff.* ['94].

3 22) ; both, therefore, have in all ages given occasion to the enemy to blaspheme. Philo (*De Confusione Linguarum*) thought that, to avoid 'the most surpassing impiety,' the anthropomorphisms must he interpreted allegorically. If we are not prepared to follow him in this, we must once more apply the mythological key (see ADAM AND EVE, § 4).

It is perhaps the second *extant* chapter in the mythic chronicle of the first family that we have before us : the passage which originally linked the story of the Tower to that of Paradise has been lost (see NEPHILIM). It is clear, however, that the first men had not gone far from Paradise : they are still on their journeys 'in the east' when this ambitious project occurs to them (see GEOGRAPHY, § 13).

The narrative may be regarded in two aspects. While explaining how the city of Babylon, with its gigantic terrace-temples, came to be built (see § 4), it accounts for the division of men into different nations, separated in abode and speech. Not to be able to understand one's neighbour seemed to the primitive men a curse (cp Dt. 28 49 Jer. 515). It is not improbable that there was an ancient N. Semitic myth which explained how this curse arose. It is said that there are many such myths elsewhere,[1] and some of them (*e.g.*, that reported by Livingstone from Lake Ngami, and that mentioned in the Bengal Census Report for 1872—to mention only two of the best attested) have a certain similarity to the Hebrew story. It is credible, therefore, that the N. Semites ascribed the curse of many languages to the attempt to erect a tower by which men might climb up 'above the stars of God' and 'sit on the mountain of assembly' and 'make themselves like the Most High'[2] (Is. 14 13 *f.*).

3. Origin of diverse tongues.

The old myth, like that which seems to underlie the story of SODOM (*q.v.*), said nothing as to where the town to which the tower belonged lay. When, however, through some devastating storm, one of the chief temple-towers of Babylon (see BABYLONIA, § 27) fell in remote days into disrepair, wandering Aramæan tribes may have marked it, and, connecting it with the 'babel' of foreign tongues in Babylon, may have localised the myth at the ruined temple-tower.[3] *Balbel*, they would have exclaimed:" it was here that God confounded men's speech, and the proofs of it are the ruined tower and the name of Babel.

4. Origin of Babylon.

It is remarkable that the polytheistic element in the old myth should have been *so* imperfectly removed. Even the writer who adopted and retold the story was still far off from the later transcendental monotheism. The changes which he introduced consisted in omissions rather than in insertions. Yahwè still has to come down to inquire ; he still has to communicate the result to the inferior divine beings, and bring them with him to execute judgment; but, though he needs society, as ruler Yahwè stands alone: there is no triad of great gods, as in Babylon. It is also worth mentioning that the narrator's idea of civilisation is essentially a worthy one. No city can be built, according to these early men, without a religious sanction. Enos, as another myth appears to have said, is at once the beginner of forms of worship and the father of Cain the city-builder (see CAIN, § 1). On the other hand, the idea that God grudges man the strength which comes from union, and fears human ambition, is obviously one of the 'beggarly elements' of ethnic 'religion from which Jewish religion had yet to disengage itself.

5. Character of myth.

We have seen that there was not improbably an old N. Semitic myth of the interrupted building of a tower to account for the dispersion of the nations. Should such a myth one day be discovered in Babylonia,[1] it will certainly disappoint many persons by not mentioning the 'confusion of languages,' nor giving Babylon as the scene of the events, (1) because the Ass. *bullulu* means 'fundere,' not 'confundere,' and (2) because the city of Babylon was regarded as of divine origin, and its name *Bābil* was explained as *Bāb-īli*, 'the gate of God,' or 'of the gods' (cp BABYLON, § 1). The latter reason is decisive also against the theory[2] that the Sibylline story of the Tower of Babel and the cognate one of Abydēnus[3] rest on Babylonian authority. That two of the reporters of the story give the polytheistic οἱ θεοί proves nothing, for the plural was sufficiently suggested by the Hebrew narrative (*v.* 7). The non-biblical features of their version, though in one point (the object ascribed to the builders) probably an accurate reconstruction of the earliest myth, are of no authority, being clearly derived from the imaginative Jewish Haggada,[4] which is responsible also for the part assigned by later writers to Nimrod (Jos. *Ant.* i. 4 2 ; cp Dante, *Inf.* 31 76-81).

6. OT form not Babylonian.

Where was the tower referred to in the Hebrew narrative ? Few scholars have declared this problem insoluble ; but almost all have missed what seems the most natural answer. Benjamin of Tudela, who travelled about A.D. 1160, supposed it to be the mound called by the Arabs Birs Nimrūd, which, he says, is made of bricks called *al-ājur*.[5] This agrees with the Midrash (*Ber. rabba*, par. xxxviii), and is probably implied in the strange gloss of 𝔊 in Is. 10 9. In the sixteenth century Balbi and Ralph Fitch, and in the seventeenth John Cartwright, give descriptions of the 'Tower of Babel' which are plainly suggested by the huge mass of brickwork, 6 or 7 m. W. of Bagdād, known as Tell Nimriid or 'Akarkūf (see Del. *Par.* 208 ; Peters, *Nippur*, i. 188 *f.*). Pietro della Valle in the eighteenth century preferred the great mound near Hillah called *Bābil*, which, however, as Rassam has shown, represents the famous hanging gardens (see BABYLON, §§ 4 8). In the nineteenth, C. J. Rich and Ker Porter revived the Birs Nimriid theory, and most scholars have followed them,[6] largely influenced by Nebuchadrezzar's Borsippa inscription. No one has put this view *so* plausibly as J. P. Peters, in an article which appeared since this article was written (*JBL*, 1896, p. 106). The statements of the king are no doubt well adapted to illustrate the disrepair into which (see § 4) the tower originally intended must have fallen even though they do not as Oppert once thought, describe the 'confusion of tongues.' Let us pause upon them for a moment. They tell us that the temple-tower (*zikkurrat*) of Borsippa had 'fallen into decay since remote days,' and indeed that it had never been quite completed by its original builder. 'Rain and storm had thrown down its wall; the kiln-bricks of its covering had split; the bricks of its chamber were in heaps of rubbish.' 'To restore it,' says Nehuchadrezzar, 'the great Lord Marduk impelled my mind.'[7]

7. Site of tower.

Borsippa, however, is not the place we should naturally go to for the tower. Babylon, and Babylon alone (which was always distinguished from Borsippa) must cover the site. The late Jewish tradition is of no value whatever: it grew up, probably, during the Exile, when Nebuchadrezzar's restoration of the 'temple of the

[1] See *EB*(9), art. BABEL, TOWER OF (Sayce), and cp Liiken, *Die Traditionen*, 318-322.

[2] In a Babylonian hymn we find the god Bel identified with. 'the great mountain whose top reaches to heaven' (Jensen, *Kosmol.* 21).

[3] In the original myth there was no hyperbole. In the localised myth, however, the description 'whose top reacheth unto heaven' seems parallel to a phrase in Dt. 1 28, and to similar descriptions of Egyptian obelisks (see Brugsch, *Egypt under the Pharaohs*, 310) and Assyrian and Babylonian temple-towers (so Tiglath-pileser ; 'its temple-towers I raised to heaven,' Del. *Ass. HWB* 162 ; and Hammu-rābi, '(the temple) whose top is high as heaven he built,' *KB* iii. *a*, 129.

[4] A popular etymology would connect *Bābel* with Aram. *balbel* much more easily than with Heb. *bālal* (see Olshausen *Lehrb.* § 189 *a*), as Bu. supposed in 1883 (*Urgesch.* 387). Onkelos on Gen. 11 9 gives בלבל for the בלל of MT.

[1] The story as it stands is not, as Stade (*ZATW*, 1895, p. 157) and Gunkel (*Schöpf.* 149) (not, of course, on the ground of the supposed discovery in *TSBA* 5 303 *ff.*, *RP* 7 129 *ff.* ; cp Sayce, *Hibb. Lect.* 406) have held, Babylonian.

[2] Gruppe, *Die griech. Culte u. Mythen*, 683 ; *ZATW* 9 154 ['89] ; Sta. *ZATW* 15 157 161 ['95].

[3] *Carm. Sibyll.* 3 97 *ff.*; Jos. *Ant.* i. 4 3 ; Syncellus, *Chron.* ed. Dindorf, 81; Eus. *Chron.* ed. Schoene, 1 33. Cp Bloch, *Die Quellen des Fl. Josephus*, 54 *f.* ['79] ; Freudenthal, *Hellenist. Studien* 1 25.

[4] See *Jubilees* 10 19-26 (Charles, *JQR* 6 208 *f.*).

[5] The Arabic *'ājurrun* comes through Aram. from Ass. *agurru*, 'kiln-bricks' (often) ; both words are used collectively.

[6] For Sir H. Rawlinson's view, which differs from the views mentioned above, see G. Smith's *Chaldæan Genesis*, edited by Sayce, 171.

[7] *KB* 3 6 52-55 ; cp *COT* 1 109 *f.*

seven lights of heaven and earth' was recent. In the *zikkurrat* of the great temple E-sagila (see BABYLON, §§ 4, 5), represented, according to Hommel, by Tell 'Amrān, we have the trne tower of Babel. Nebuchadrezzar himself speaks of this tower in the Borsippa inscription. 'Ē-temen-an-lei,' he says, 'the *zikkurrat* of Babylon, I restored and finished.' An account of this building has been given from a Babylonian tablet by the late George Smith. He tells us that 'the whole height of this tower above its foundation was 15 *gar*, or 300 feet, exactly equal to the breadth of the base; and, as the foundation was most probably raised above the level of the ground, it would give a height of over 300 feet above the plain for this grandest of Babylonian temples.'[1] What vicissitudes this *zikkurrat*, or its predecessor, passed through in early times, who shall say?

T. K. C.

BABI (ΒΑΒΙ [A]), 1 Esd. 8 37 = Ezra 8 11, BEBAI, 1.

BABYLON. The word בָּבֶל (𝔊^{BAL} ΒΑΒΥΛΩΝ), Bābel, designating the city which, in course of time,

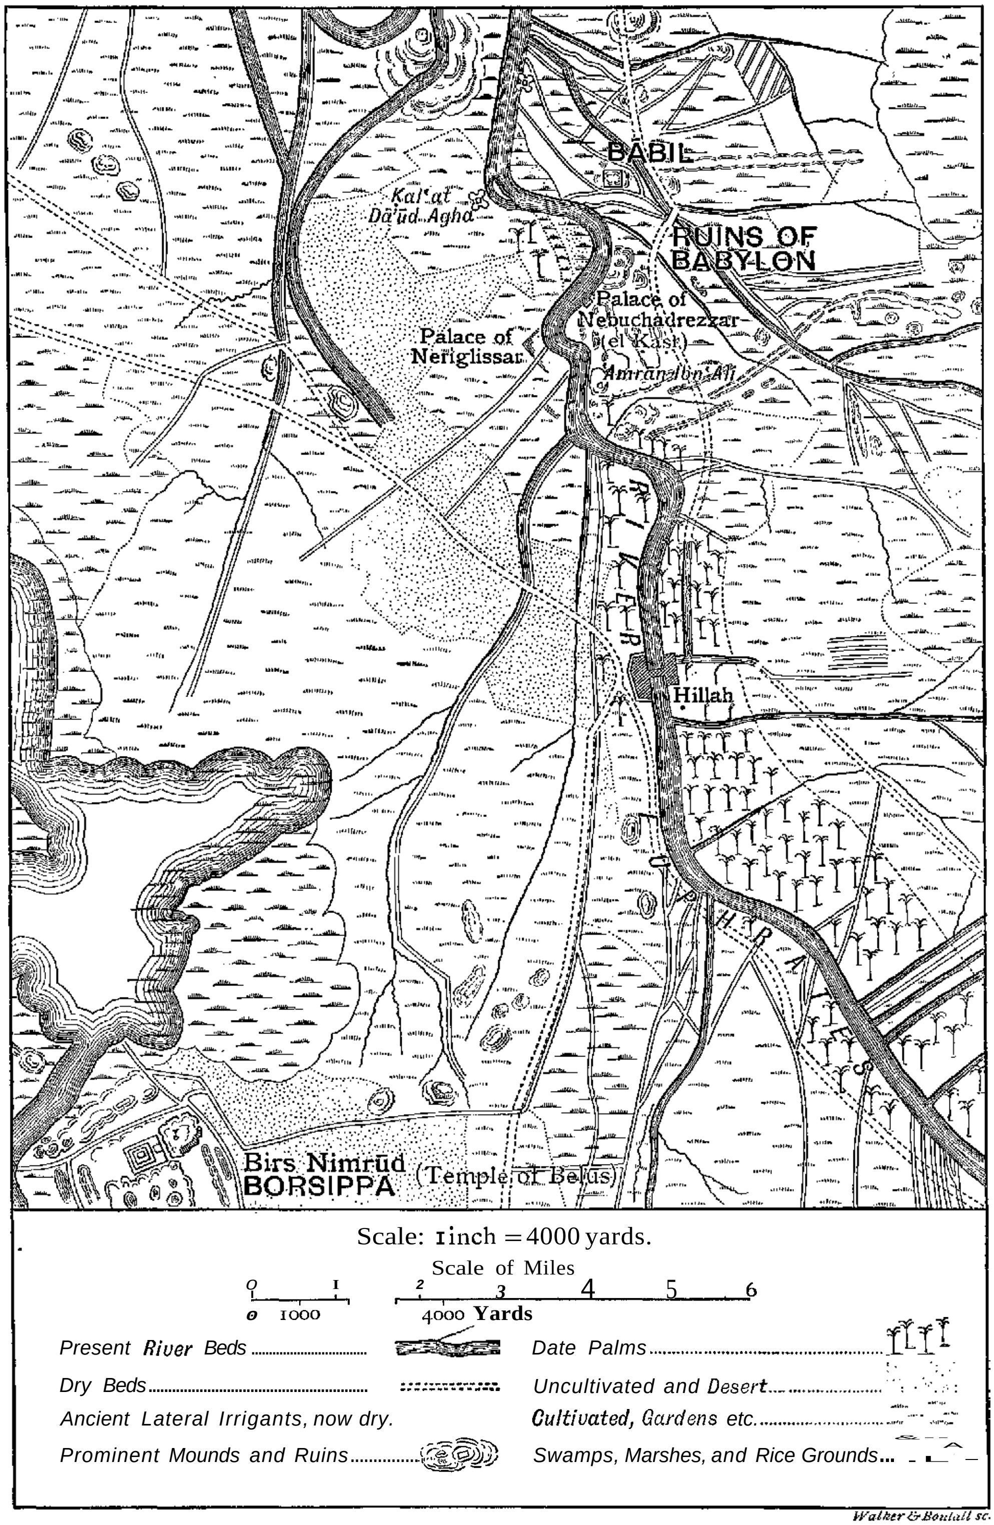
1. Name, etc. became the capital of the country known as Babylonia, is the Hebrew form of the native Bāb-īli ('gate of God,' or 'Gate of the gods'). The Accadian or Sumerian name, Ka-dingira, is a translation of the Semitic Babylonian. Of the other names of the city, Tin-tir, 'Seat of life,' and Ē or E-ki (translated 'house' or 'hollow') are among the best known. The existence of these various names is probably due to the incorporation, as the city grew, of outlying villages and districts. Among the places which seem to have been regarded, in later times, as a part of the city, may be mentioned Šu-anna (a name sometimes apparently interchanged with that of Babylon itself); Tē, which, though it had, like Babylon, a *pihatu*, or district of its own, is nevertheless described as being 'within Babylon'; and Šuppatum and Litamu, apparently names of plantations ultimately included in the city.

The date of the foundation of Babylon is still uncertain. Its association in Gen. 10 10 with Erech, Akkad, and Calneh implies that according to Hebrew tradition it was at least as old as those cities, and confirmation of this is to be found in the bilingual Creation-story (see CREATION, § 16 *d*), where it is mentioned as coeval with Erech and Nippuru, two primeval cities, the latter of which has been proved by the excavations to date back to prehistoric times.

No detailed history of the rise of the city has yet come to light. Agum or Agu-kale-rime (about 1550 B.C.)

2. History. speaks of the glorious shrines of Marduk and Zirpanitum, in the temple Ē-sagila, which he restored with great splendour. About 892 B.C., Tukulti-Ninip, king of Assyria, took the city, slaying the inhabitants, and carrying a vast amount of spoil (including the property and dues of the great temple Ē-sagila) back with him to Assyria. Sennacherib, however, went farther than his predecessor. He says that, after having spoiled the city at least once, he devoted it to utter destruction. The temples, palaces, and city-walls were overthrown. The debris having been cast into the canal Arahtu, that waterway was still further dammed up, and a flood in consequence ravaged the country. Esarhaddon, when he came to the throne, began the rebuilding of the city, restoring the temples with much splendour; and the work of beautifying them was continued by Šamaš-šum-ukīn and Ašur-bāni-pal, his sons, the former as king of Babylon, and the latter as his suzerain. Later, Nabopolassar continued the work; but it was left for his son Nebuchadrezzar to bring the city to the very height of its glory. Later still, Cyrus held his court at Babylon (Šu-anna), where vassal kings brought him tribute and paid him homage. The siege of the place and the destruction of its walls by Darius Hystaspis were the beginning of its decay. Xerxes is said (Herod. 1 183) to have plundered the temple of Bēlus of the golden statue that Darius had not dared to remove, and Arrian (3 36) states that he destroyed the temple itself on his return from Greece. He relates also that Alexander wished to restore this celebrated fane,[1] but renounced the idea, as it would have taken ten thousand men more than two months to remove the rubbish alone. Be this as it may, Antiochus Soter, in an inscription found at Birs-Nimrūd, mentions having restored the temple Ē-sagila (the temple of Bēlus), showing that some attempt was made, notwithstanding Alexander's abandonment of the task in despair, to bring order into the chaotic mass of ruin to which it had apparently been reduced. The people of the great city had, in all probability, by this time almost entirely migrated to Seleucia, on the Tigris; but the temple services were continued as late as the third decade B.C., and probably even into the Christian era. The temple was still standing in 127 B.C. (reign of the Kharacenian king Hyspasines), and had a congregation, who worshipped the god Marduk in combination with Anu, this twofold godhead being, apparently, called Anna-Bēl. A small tablet, dated '219th year, Arsaces, king of kings,' records the borrowing by two priests of E-sa-bad (the temple of the goddess Gula at Babylon) of a certain sum of silver from the treasnry of the temple of Bēl. This date, which is regarded as Arsacidean, shows that certain temples, including the tower of Bēlus, remained, with their priesthood and services, as late as the year 29 B.C. (*Bab. Or. Record*, 4 133).

Rather more than 50 miles south of Bagdād, on the east bank of the Euphrates, lie the ruins still identified



3. Ruins. by tradition as those of Babylon. These remains consist of a series of extensive, irregularly-shaped mounds covering, from north to south, a distance of about 5 miles. Bābil, the northmost ruin, has, according to Ainsworth, a square superficies of 120,000 ft., and a height of 64 ft. The next in order is the Mujellibeh, of about the same superficies and a height of 28 ft. After this come two mounds close together, the Kaṣr or 'palace,' and that called 'Amrān-ibn-'Ali to the south of it. These two together have a superficies of 104,000 ft., and a height of 67 ft., or with the *beres*, or stone monument, 115 ft. Most of these two mounds is 'enclosed within an irregular triangle formed by two lines of ramparts and the river, the area being about 8 miles' (Loftus). Other remains, including two parallel lines of rampart, are scattered about, and there are the remains of an embankment on the river side. On the W. bank are the ruins of a palace said to be that of Neriglissar.

According to Herodotus (1 178-187), the city formed a vast square, 480 stades ($55\frac{1}{4}$ miles) in circumference. Around the city was a large ditch of

4. Greek descriptions. running water, and beyond that a great rampart 200 cubits high and 50 broad, there being on it room enough for a four-horse chatiot to pass, and even to turn, in addition to space sufficient for 'chambers facing each other.' The top, therefore, would seem to have resembled a kind of street. The wall was pierced by a hundred gateways closed with brazen gates. On reaching the Euphrates, which (Herodotus says) divided the city, it was met by walls which lined the banks of the stream. The streets were arranged at right angles. Where those which ran down to the Euphrates met the river-wall, there were gateways allowing access to the river. On each bank of the Euphrates

[1] See Sayce, *Hibb. Lect.*, App. ii.; but cp Jensen, *Kosmol.* 492 *ff.*

[1] A confirmation of this occurs in the tablet Bu. 88-5-12, 619, which is dated in 6th year of Aliksandarris (Alexander), and refers to 10 mana of silver as tithe paid *ana dakû ša êpirê ša Ê-sangil* (so to be read, according to the Aramaic docket), 'for the clearing away of the dust (rubbish) of Ê-sangil (Ê-sagila)' (Oppert in the *Comptes Rendus de l'Acad. des Inscr. et Belles Lettres*, 1898, pp. 414 *ff.*).

Walker & Boutall sc.

THE SITE OF BABYLON

Compiled mainly from surveys by Jones, Selby, Bewsher, and Collingwood, 1845-65, with corrections *to* 1885 (published by the India Office). Small additions, etc., from Kiepert's 'Ruinenfelder der Umgegend von Babylon' in *Ztschr. d. Gesellsch. f. Erdkunde zu Berlin.*

were certain fortified buildings, the royal palace being on one side, and the temple of Bēlus on the other. The latter was a tower in stages, with an exterior winding ascent leading from stage to stage, and about half-way up a resting-place for the visitor. The top was surmounted by a spacious chapel, containing a richly covered bed and a golden table. None passed the night there, according to the priests, except a woman of the country whom the god had specially chosen. Lower down was another chapel containing a seated statue of Zeus (Bel-Marduk) and a large table, both of solid gold. Outside were two altars, one of them of gold; and it was here that the golden statue that was carried away by Xerxes formerly stood. Herodotus speaks also of the large reservoir, constructed, he says, by Queen Nitōcris, and of the embankments and the bridge that she made, the last being a series of piers of stone built in the river, connected by wooden drawbridges which were withdrawn at night. Nitōcris caused to be erected, over the most frequented gate of the city, the tomb which she afterwards occupied; but this, he says, was removed by Darius, who thought that it was a pity that the gate should remain unused, and coveted the treasure that she was supposed to have placed there, which he failed to find. The houses of the city, according to Herodotus, were three and four stories high. He does not mention the hanging gardens.

Ctēsias (ap. Diod. Siculus, 2 7 *ff.*) makes the circuit of the city only 360 stades (41 m. 600 yds.). It lay on both sides of the Euphrates, which was crossed by a bridge at its narrowest point. The bridge was similar to that described by Herodotus, and measured 5 stades (3032 ft.) in length and 30 ft. in breadth. At each end was a royal palace, that on the E. being the more splendid. There was a part called the twofold royal city, which was surrounded by three walls, the outmost having a circuit of 7 m. The height of the middle wall, which was circular, was 300 ft.; that of its towers, 420 ft. The inmost wall, however, was even higher. The walls of the second enclosure and those of the third were faced with coloured bricks, enamelled with various designs. Among them were representations of Semiramis and Ninus slaying the leopard and the lion. The two palaces were joined by a tunnel under the river as well as by a bridge. Diodōrus mentions the square lake, and describes the temple of Bēlus, which, he says, had a statue of Zeus (Bēl-Marduk) 40 ft. high, and statues of Hera and Rhea (probably Zirpanitum [see SUCCOTH-BENOTH] and the goddess Damkina). He describes the famous hanging gardens, which were square, and measured 400 ft. each way, rising in terraces, and provided with earth enough to accommodate trees of great size. (For other Greek accounts, see (1) Arrian, *Anab.* 7 25 1, and Plut. *Alex.* 74; (2) Diod. Sic. 27-10, Curt. Ruf. 5 1 24-35; (3) Strab. 16 1 5; (4) Diod. 19 100, 7 and Plut. *Demetr.* 7; (5) Philistr. *Vit. Apoll.* 1 25; to which may be added (6) Bērōssus in Jos. *Ant.* x. 11 1, *C. Ap.* 1 19 *f.*, and Eus. *Præp. Ev.* 9467 *c d*).

The best native account of the glories of Babylon is probably that of the well-known king Nebuchadrezzar

5. Nebuchadrezzar's account.

(*KB* 3*b* 20 *ff.*)—a ruler to whom the city owed much—who, indeed, may be said to have practically rebuilt it. The most important edifice to him was the temple of Bēlus (Ē-sagila, later called Ē-saggil or Ē-sangil), and with this he begins, speaking first of the shrine of Marduk, the wall of which he covered with massive gold, lapis-lazuli, and white limestone. He refers to the two gates of the temple, and the place of the assembly, where the oracles were declared, and gives details of the work done upon them. It was apparently a part of this temple that he calls Ē-temen-ana-ki, 'the temple of the foundation of heaven and earth,' and describes as the 'tower of Babylon' (*ziḳḳurat Babili*), stating that he 'raised its head' in burnt brick and lapis-lazuli (cp BABEL, TOWER OF, § 7). After referring to various other shrines and temples, he speaks of Imgur-Bēl and Nimitti-Bēl, the two great ramparts of the city, built, or rather, rebuilt, by his father Nabopolassar, who, however, had not been able to finish them. Nebuchadrezzar goes on to describe what he and his father had done on these defences—the digging and bricking of the moat, the bricking of the banks of the Euphrates, the improvement of the roadway called Aa-ibur-šabū, the elevation of which Nebuchadrezzar raised 'from the shining gate to (the roadway called) Ištar-sakipat-tēbi-ša,' and so on. In consequence of the raising of this street, the great city gates of the walls Imgur-Bēl and Nimitti-Bēl had to be made higher. They were at the same time decorated with lapis-lazuli and figures of bulls and serpents, provided with doors of cedar covered with bronze. Then, to strengthen the city still further, Nebuchadrezzar built, 4000 cubits beyond Imgur-Bēl, another wall (with doors of cedar covered with bronze), surrounded with a ditch. To make the approach of an enemy to the city still more difficult, he surrounded the district with 'great waters' like unto the sea. After this he turned his attention to the royal palace, a structure which reached from the great wall Imgur-Bēl to the canal of the rising sun, called Libilḫegalla, and from the bank of the Euphrates to the street Aa-ibur-šabū. It had been constructed, he says, by his father Nabopolassar; but its foundations had been weakened by a flood and by the raising of the street. This edifice Nebuchadrezzar placed in good repair, and adorned with gold, silver, precious stones, and every token of magnificence, after rearing it high 'as the wooded hills.' Other constructions that he made were a wall 490 cubits long (apparently intended to serve as an additional defence to a part of the outer wall) called Nimitti-Bēl, and, between the two walls, a structure of brick, surmounted with a great edifice, destined for his royal seat. This palace, which joined that of his father, was erected in fifteen days. After adorning it with gold, silver, costly woods, and lapis lazuli, he built two great walls around it, one of them being constructed of stone.

There is a substantial agreement between this description and the description of the Greek writers. Ē-sagila,

6. Native and Greek accounts.

'the high-headed temple,' is the temple of Bēlus; the palace constructed in fifteen days is that referred to by Josephus as having been built in the same short period (*Ant.* x. 11 1). Nebuchadrezzar does not refer to the reservoir mentioned by the Greeks; but we may recognise it in the 'great waters, like the mass of the seas,' which he carried round the district, and designed for the same purpose—namely. defence against hostile attack. The walls, Nimitti-Bēl and Imgur-Bēl, are the outer and inner walls respectively, and the latter may be that which, according to Herodotus (above, § 4), ran along the banks of the river. The hanging gardens are not referred to by Nebnchadrezzar, and it is therefore very doubtful, notwithstanding the statement of Ctēsias, whether this king built them. Such erections were not uncommon in Assyria, and it is even possible that they were due to the initiative of a king of that country. In the palace of Ašur-bāni-pal at Kuyunjik, which was discovered and excavated by Rassam, was a room the bas-reliefs of which were devoted to scenes illustrating that king's Babylonian war, one of which shows a garden laid out on a slope, and continued above on a structure of vaulted brickwork, an arrangement fairly in accord with the description of the Babylonian hanging gardens given by Diodōrus and Pliny; and it is noteworthy that the latter attributes them to a Syrian (Assyrian) king who reigned at Babylon, and built them to gratify a wife whom he loved greatly. This bas-relief was regarded by Sir Henry Rawlinson and George Smith as representing the hanging gardens at Babylon, and a neighbouring sculpture, which shows a series of fortified walls,

three or more, as well as a palace, probably represents the walls of the city as they were in the time of Ašur-bāni-pal and his brother Šamaš-šum-ukīn, with whom he waged war. The palace has columns supported on the backs of lions.

7. Details from the contract-tablets. A few additional details concerning tlie city are given bv some of the manv contract-tablets found on the spot. The city gates, some of the canals, and the streets and roadways seem to have been named after the gods. We read of the gates of Zagaga, Ninip, and Šamaš, and of the canal Nār Banitum. Others of the canals received the names of the cities to which they flowed (*e.g.*, the Borsippa canal, and the old Cuthah canal). The tablets confirm the statement of Q. Curtius that the houses of the city did not fill all the space enclosed by the walls, the greater part of the ground being apparently fields, gardens, and plantations of date-palms and other trees, sufficient to furnish all the provisions that the city needed in event of siege. There is no mention, in the native records, of a bridge across the Euphrates, such as is described by the Greeks; but a contract-tablet of the time of Darius seems to refer to **a** bridge of boats. There is no confirmation of the statement that there was a tunnel under the river.

8. Identifications of ruins. There have been various conjectures as to the identification of the different ruins on the site of Babylon. Rich thought that the hanging gardens were represented by the mound known as Bābil, and this is the opinion of Rassam, who found there 'four exquisitely-built wells of red granite in the S. portion of the mound.' They are supplied with water from the Euphrates, which flows about a mile away, and their depth is about 140 ft. Originally, he thinks, they were about 50 or 60 ft. higher. Rassam regards Mujellibeh as representing the palace begun by Nabopolassar and finished by Nebuchadrezzar in fifteen days. Remains of enamelled tiles of various colours and designs are found, he says, only on that spot. The Kaṣr he takes to be the remains of the Temple of Bēlus, though he frankly admits that there are many difficulties in the way of this identification. As the latest opinions, carefully formed by one who has frequently been on the spot, they will probably be considered to possess **a** special value.

The two queens, Semiramis and Nitōcris, to whom so many of the wonders of ancient Babylon are attributed, are not mentioned on the native monuments of the Babylonians, as far as we are at present acquainted with them.[1] In all probability, the explanation of this difficulty is that they suggested the erection of the works in question, and the reigning ruler (probably their husbands) carried. them out. Only careful exploration of the sites can decide satisfactorily the real nature of each ruin—by whom it **was** built, or rebuilt, or restored —and the changes that it underwent in the course of ages. The discovery of the wells at Bābil seems to place the nature of that ruin beyond doubt, though Oppert (*Comptes Rendus*, 1898, p. 420) thinks that its distance from the other remains is too great, in view of the fact that Alexander, when suffering from a mortal illness, was carried from the castle to the baths and the hanging gardens (Plut. *Alex.* ch. 76; Arrian, *Exp. Al.* 725). Much more may be expected from the German explorations.

There is a thorough article on the history and the topography of the city of Babylon in Pauly-Wissowa's *Xeabnc, der class. Alterthumswiss.* ii. ('96). On the Babylon of the NT see PETER, EPISTLES OF, § 7, and cp ROME. T. G. P.

BABYLONIA

1. Names. The country of Babylonia, called by classical writers ΒΑΒΥΛΩΝΙΑ, takes its name from that of its principal city BABYLON (*q.v.*, § 1). In the OT the city and the country are not sharply distinguished; both are frequently included under the Hebrew בָּבֶל. In other passages the country is termed שִׁנְעָר, Shinar (see SHINAR), while in post-exilic times the whole nation are referred to as כַּשְׂדִּים, 'Chaldæans,' and the country as אֶרֶץ כַּשְׂדִּים, 'the land of the Chaldæans' (see CHALDEA). Among the Babylonians themselves there was no single name for the whole country until the third Babylonian dynasty (eighteenth to twelfth century B.C.), when the Kassite designation of a portion of the country as Karduniash was extended and adopted in the royal inscriptions as **a** general name for the country,—a use of the term that was retained throughout the whole period of the nation's history. The whole of Babylonia could also be expressed by the double title Šumēr and Akkad, which the Babylonians adopted from the previous non-Semitic inhabitants of the land, Akkad designating the northern half of the country and Šumēr the southern half. The use of the former name was extended in the Neo-Babylonian period, and the word in such phrases as 'the king of Akkad' and 'the army of Akkad' was employed to designate the whole country. The terms *kibrat arba'im*, 'the four quarters,' and *kiššatu*, 'the world,' which occur in the royal titles *šar kibrat arba'im*, 'king of the four quarters,' and *far kiššati*, 'king of the world,' were employed to express extensions of the Babylonian empire beyond the natural limits of the country (cp MESOPOTAMIA).

2. Description. The natural features that bound the country of Babylonia are the Persian Gulf on the S., the Arabian desert on the W., and the Tigris on the E., while the limit from Assyria on the N. may be placed roughly at the line where the slightly elevated plain to the N. changes to the alluvial level. At the present day Babylonia. in the S. differs considerably in size and conformation from the ancient aspect of the country. The soil carried down by the Tigris and the Euphrates is considerable, and the alluvium so formed at the head of the Persian Gulf increases to-day at the rate of about **a** mile in seventy years; moreover, it is thought by some that the rate of formation was considerably more rapid in ancient times. Thus in the early period of Babylonian history the Persian Gulf extended some 120 to 130 miles farther north than it extends at present, the Tigris and the Euphrates each entering the sea at a separate mouth. The country was thus protected on the S. by the sea, and on the W. by the desert which, rising a few feet above the plain of Babylonia, approached within thirty

[1] On Sammuramat the wife of Rammān-nirari (or Addu-nirari) III., see ASSYRIA, § 32. Apparently the only queen who reigned in her own right was Azaga-Bau or Bau-ēllit, in whose reign omens similar to those belonging to the time of Sargon of Agadè and **his** son **were** composed. She belongs to a very early period.

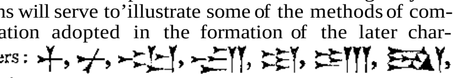
miles of the Euphrates; and it was only from the N. and E. sides that it was open to invasion. From the mountainous country to the E., across the Tigris, the Kassite and Elamite tribes found it easy to descend upon the fertile Babylonian plain, while after the rise of the Assyrian empire the boundary between Assyria and Babylonia was constantly in dispute.

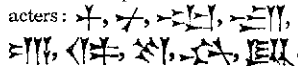
3. Cities. The principal cities of the country were situated in two groups: one in the north; the other in the south, nearer the sea. The southernmost city was Eridu, the modern Abu-Shahrein, situated on the Euphrates not far from the ancient coast-line of the Persian Gulf. To the W. of Abu-Shahrein the mound of Mukayyar marks the site of the ancient city of Ur (see UR). Between the Tigris and the Euphrates to the NW. of Ur stood Larsam or Larsa, the modern Senkereh, and to the W. of Larsam the city of Erech, the remains of which are buried under the mounds of Warka. To the E. of Warka, on the E. bank of the Shaṭṭ-el-Ḥaí, the mounds of Telloh[1] represent the city of Sirpurla, or Lagaš (as it was known in the later period of its history); the two cities, Isin and Maru, the sites of which have not yet been identified with certainty, complete the list of the principal cities in the S. The N. group of cities consists of Babylon, situated on the Euphrates, near the modern town of Hillah (see BABYLON); Borsippa, marked by the mound of Birs-Nimrūd, not far from Babylon, on the SW.; Cuthah, the modern Tell-Ibrahim (see CUTHAH), to the N. of Babylon; Sippar, the modern Abu-Habbah; the city of Kiš, still nearer the metropolis; and Nippur, the modern Niffer (the southernmost city of the group), to the N. of the Shaft-en-Nil. The site of the city of Agadè, which was in the northern half of the country, probably not far from Babylon, has not been satisfactorily identified.

4. Natural resources. The present state of the country differs considerably from that presented by it in ancient times. All ancient writers describe Babylonia as exceedingly fertile and producing enormous quantities of grain; but at the present day long neglect of cultivation has rendered the greater part of it an arid waste, varied in the neighbourhood of the rivers by large tracts of marsh land. There are still visible throughout the country embankments and trenches which mark the courses of ancient canals, by which the former dwellers in the land regulated their abundant water-supply, which was not allowed to swell the areas covered by the swamps, but was utilised for the systematic irrigation of the country. The whole land, in fact, was formerly intersected by a network of canals, and to the systematic irrigation of its alluvial soil may be traced the secret of Babylonia's former fertility.

The principal products of the country were wheat and dates. The former gave an enormous return. The latter supplied the Babylonians with wine, vinegar, and a species of flour for baking; from the sap of the date tree was obtained palm-sugar; ropes were made from its fibrous bark, and its wood furnished a light but tough building material. Wine was also obtained from the seed of the sesame plant; and barley, millet, and vetches were grown in large quantities. In addition to the palm, the cypress was common; poplars, acacias, and pomegranates grew in the neighbourhood of the streams; but the cultivation of the vine, and of oranges, apples, and pears, was artificial. The enormous reeds which abound in the swamps were used by the Babylonians for the construction of huts and light boats, and for fencing round the fields.

The domestic animals of the Babylonians were camels, horses, oxen, sheep, goats, and dogs; while the lion, the wild ox, the wild boar, and the jackal were the principal wild animals found in the country; gazelles and hares were not uncommon; a great variety of birds





1 Perhaps = Tell Lōḥ.

BABYLONIA

haunted the marshes and the plains; and fish, principally barbel and carp, were abundant in the rivers.

5. Language. The language spoken by both the Babylonians and the Assyrians is usually referred to as 'Assyrian.' It belongs to the northern group of the Semitic languages, claiming a closer relationship to Phœnician, Hebrew (see HEBREW LANGUAGE), Syriac, and the other Aramaic dialects (see ARAMAIC LANGUAGE), than to the more southern group, which comprises the Sabæan or Himyaritic, the Arabic, and the Ethiopic tongues. But while in its nominal and verbal formations it exhibits the Semitic idea of inflection from roots, and while those roots themselves are found in the other Semitic languages, it has been subjected to a stronger foreign influence and has assimilated, to an extent that is not met with in any other of the Semitic languages, a considerable body of non-Semitic words and expressions. The influence exerted by the previous inhabitants of Babylonia upon their Semitic conquerors was indelible, and throughout their whole literature, especially in their mythological and religious compositions, words of non-Semitic origin are constantly met with.

6. Sounds. The language possessed the vowel sounds, a, ā, e, ē, i, ī, u, ū, and the consonantal sounds b, g, d, z, ḫ, ṭ, k, l, m, n, s, p, ṣ, ḳ, r, š, and t, representing the Hebrew ב, ג, ד, ז, ח (*i.e.*, خ), ט, כ, ל, מ, נ, ס, פ, צ, ק, ר, ש, and ת. The existence of the *e* sound in Assyrian has been questioned, and it is true that the signs containing *e* and *i* are constantly interchanged; but that the *e* sound was used at least for a certain period, may be regarded as practically certain, for not only is it required to explain certain vowel-changes which occur, but it is also vouched for by the Greek and Hebrew forms of certain Babylonian words, and by the occurrence of some twelve signs in the syllabary, the existence of which is more naturally explained by the supposition that they contain the vowel *e*, than by the assumption that they are merely duplicates for certain other signs which undoubtedly contain the vowel *i*. The pronunciation of the consonants is in the main the same as that of the equivalent consonants in Hebrew. With regard to the pronunciation of the consonants *b*, *g*, *d*, *k*, *p*, and *t*, it is possible that in Assyrian, as in Hebrew and Aramaic, they were pronounced as spirants when coming between two vowel sounds, in writing, however, no distinction is indicated. It may be noted, that, while the Assyrians made no distinction in their pronunciation of *k* and *ḳ*, the Babylonians pronounced the latter as *g*; that among the later Babylonians, at least, *m* appears to have been pronounced as *v*; and that the pronunciation of *š* by the Assyrians gradually approximated to *s*. The Semitic sounds represented by the Hebrew consonants א, ה, ו, ח (*i.e.*, ح), י and ע (*i.e.*, ع and غ), are not distinguished in the Assyrian syllabary, as will be apparent from the following examples given in transliteration, the equivalent roots in Hebrew or Arabic being added in parentheses: *akālu*, 'to eat' (אכל); *alāku*, 'to go' (הלך): *edēshu*, 'to be new' (חדש); *ebēru*, 'to cross' (عبر); *erēbu*, 'to enter' (غرب); *alādu*, 'to bear' (ולד); and *enēḳu*, 'to suck' (ינק). That these sounds were not distinguished is due to the fact that the Babylonians did not originate their own system of writing, but borrowed the system they found in use among the earlier inhabitants of the country.

7. Writing. This method of writing has been termed 'cuneiform,' since the wedge (Latin *cuneus*) forms the basis of the written character in the later periods of its development. Each character or sign, in fact, consists of a single wedge, or is made up of different kinds of wedges in various combinations, the wedges of most common occurrence being the upright wedge , the horizontal wedge , and the arrow head , while the sloping wedges , , and  occur in several characters. The characters are written from left to right, and, except in some poetical compositions, no space is necessarily left between the words; every line, however, with one or two isolated exceptions, ends with a complete word. The following Assyrian signs will serve to illustrate some of the methods of combination adopted in the formation of the later characters:  . In the earliest forms

of the writing, however, there is no trace of the wedge: the characters consist of straight lines.

8. Origin. This is due to the fact that cuneiform was merely a descendant of a system of picture-writing.

In the case of many of the characters which occur in the most ancient inscriptions it is still possible to recognise the original pictures which underlie them. For example the sign for 'heaven,' 'god,' 'high,' is a star with eight points, or possibly a circle intersected by four diameters; the sign for 'sun' is a rough circle representing the sun's disk; the sign for 'ox' is the head of an ox with horns; the sign for 'grain' is an ear of corn.

All the characters, however, did not descend from pictures. Some were formed artificially by combination. Thus the sign for 'water' when placed within that for 'mouth' gave a new sign with the meaning 'to drink'; the sign for food placed within the sign for 'mouth' gave a sign with the meaning 'to eat'; the sign for 'wild-ox', was formed by placing the sign for 'mountain' within that for 'ox'; while other signs were formed by writing a character twice or three times. Moreover, it is possible that the artificial formation of characters was customary to a considerable extent. According to a theory recently put forward by Delitzsch,[1] certain strokes and combinations of strokes to be traced in the oldest forms of many of the characters had a meaning inherent in themselves, and formed the motive on the basis of which the signs containing them were developed. This question, however, is one on which it is impossible to form a conclusion until more of the inscriptions of the earliest period, recently discovered, have been published.

In the later forms which the characters assumed the original lines gave way to wedges from the fact that the scribes employed extensively soft clay instead of stone as a material on which to write. A line formed by a single pressure of the style naturally assumed the form of a wedge, while the increased clearness and uniformity which resulted secured for the wedge its final adoption. In addition to the changes which occurred in the forms of the characters, there was a development in their signification. Originally representing complete words or ideas, they were gradually employed to express the sounds of the words they represented apart from their meaning; and thus were developed their syllabic values.

9. Principles. The Babvlonians adopted this method of writing from the non-Semitic race (see below, §§ *43*, 71 *d*) whom thev found in possession of the country, and they adapted the system to their own idiom.

To characters or groups of characters representing Sumerian words they assigned the Semitic words which were equivalent to them in meaning; they also employed the signs phonetically, the syllables they represented consisting either of a vowel and a consonant (simple syllables)—e.g., *ha*, *id*, *su*—or of a vowel between two consonants (compound syllables)—*e.g.*, *mat*, *Kit*, *lul*. The system was further complicated by the fact that the majority of signs were polyphonous—that is to say, they had more than one syllabic value and could be used as ideograms for more than one word. A sign, therefore, might be used in one of three ways: as a syllable in a word written phonetically, or as an ideogram for a complete word, or as one sign in a group of two or more signs which together formed an ideogram for a complete word.

That this mixed method of ideographic and phonetic writing was often found ambiguous is attested by the methods which the Babylonians took to simplify it. (1) One of these methods consisted in adding to a word what has been termed its *determinative*, a sign attached to a word to indicate the class of thing to which it refers. Thus a special sign was placed before male proper names, another before female proper names; the sign for 'god' was placed before the names of deities; the sign for 'country' regularly preceded the names of countries; similar determinatives were used before the names of cities, mountains, rivers, tribes, professions, woods, plants, stones, garments, vessels, certain animals, the names of the months; stars, etc., while in a few classes the determinative is placed after the word, as in the case of places, birds, fish, etc. A determinative was never pronounced: it was designed only as a guide to the reader, indicating the character of the word it accompanied. (2) Another aid to the reader consisted in adding to an ideogram what has been termed its *phonetic complement*—that is to say, the final syllable of the word for which it is intended. By this means the reader is not only assisted in assigning the correct word to the ideogram, but also, in the case of verbs, is enabled to detect with greater ease the stem and tense intended by the writer. Even with this assistance, the writing, with its list of more than five hundred characters, was necessarily complicated. The use of ideograms was never entirely given up, and, although in the Neo-Babylonian period simple syllables were employed in preference to compound syllables, the Assyrians and Babylonians never attained the further development of an alphabet.

10. Decipherment. The decipherment of the Assyrian and Babylonian inscriptions resulted from the labours of scholars who had previously devoted themselves to the interpretation of the cuneiform inscriptions in old Persian.

From the sixth to the fourth century B.C. the Persians made use for their inscriptions of a character which they had borrowed originally from the Babylonians. Other nations of W. Asia also, such as the Susians and the people dwelling around Lake Van, borrowed from Babylon the idea of cuneiform writing, in some cases making use of the Babylonian characters, in others modifying them to a greater or less extent. The changes introduced by the Persians when they borrowed the idea of writing by means of wedges were considerable, for, instead of employing a sign-list of several hundred characters representing syllables and complete words, they confined themselves to thirty-nine, each of which represented a single alphabetic value. Of the various systems of cuneiform writing, therefore, the Persian was by far the simplest. The Achæmenian kings who ruled in Persia at this period numbered among their subjects the peoples of Susia and Babylonia, these countries having by conquest been added to their empire. When, therefore, they set up an inscription recording their campaigns or building operations, they added, by the side of the Persian text, Susian and Babylonian translations inscribed in the cuneiform characters employed by these two nations. There are thus engraved on the palaces and rocks of Persia trilingual inscriptions in the old Persian, Susian, and Babylonian characters, and it will be obvious that as soon as one of these three characters could be read the way would be opened for the decipherment of the other two. Of the three the Persian, with its comparatively small number of signs, is (as we have said) the simplest, and it was therefore natural that it was the first to attract the serious attention of scholars.

Grotefend, in a paper published in 1802, supplied the key to a correct method of decipherment. Taking two short inscriptions in the old Persian character which Niebuhr had copied at Persepolis, he submitted them to an analysis.

11. Grotefend. The inscriptions, he found, coincided throughout, with the exception of certain groups of characters, which, he conjectured, might represent proper names. On this assumption each inscription contained two proper names, the name of the king who set it up, and, it might be supposed, that of his father. But the name which occurred first in one inscription was the name which stood second in the other—that is to say, the three different groups of characters must represent the names of three monarchs following one another in direct succession. From the fact that the inscriptions were found in the ruins of Persepolis it might be concluded that their writers were Persian kings; and when he applied, by way of experiment, the three names Hystaspes, Darius, and Xerxes, he found that they fitted the characters admirably. On his further deciphering the name of Cyrus he obtained correct values for more than a quarter of the alphabet.

Of the forty Persian signs, of which one is merely a diagonal stroke employed for dividing the words from one another, Grotefend's first alphabet included thirty. He subsequently suggested values for thirty-five characters; but he did not improve upon his original alphabet. He correctly identified *a*, *u*, *d*, *p*, *f*, *r*, *s*, and *š*; his values *kh*, *dj*, and *th* were practically correct; and his *v* was not far off the correct value *b*. About 1822 St. Martin took up the investigation, working at the decipherment for the next ten years, but without much result; he identified *t* and *v*, however, and for the vowel *i*, which had been read as *o* by Grotefend, he gave the improved readingy. The characters for *m* and *n* were identified by Rask in 1826, and Burnouf in hismemoir published ten years later, identified *k*, 6, and *z*, while his reading; 4 andgh for two other characters were great improvements on the suggestions of Grotefend and St. Martin. In the same year Lassen produced his first alphabet improvements on which he published in 1839 and 1844, in a few'cases making use of the suggestions of Jacquet and Beer which had been published soon after the appearance of his first alphabet. He suggested correct readings for at least ten characters, and improved readings of some others. This final alphabet did not contain many incorrect identifications. The scholar who did most, however, for the decipherment of the cuneiform inscriptions was the late Sir Henry Rawlinson. He first turned his attention to the subject in 1835, when stationed at Kirmanshah, on the western frontier of Persia.

12. Rawlinson. At that time he had only heard of Grotefend's discovery; he had not seen a copy of his alphabet, and did not even know on what inscriptions it had been based. Thus he began the work of decipherment from the beginning. For his first analysis he took two short inscriptions similar to those used for the purpose by Grotefend, which yielded him the names of Hystaspes, Darius, and Xerxes. During the next year he had increased his list of names by the correct identification of Arsames, Ariamnes, Teispes, Achxmenes, and Persia. It was not until the autumn of 1836 that he first had an opportunity of seeing the works of Grotefend and St. Martin. Then he perceived that his own alphabet, based as it was on longer inscriptions, was far in advance of the results obtained by them. In 1837 he copied the greater part of the long inscription at Behistun, containing the annals of Darius, and forwarded a translation of the first two paragraphs to the Royal Asiatic Society; but next summer, while at Teheran, he heard that Bnrnouf's publication had meanwhile anticipated many of his improvements. In the autumn of 1838 he obtained the published copies of the Persepolitan inscriptions, and with the help of the allied languages of Sanscrit and Zend, analysed every word in the inscriptions that had up to that time been copied. He then found that Lassen's alphabet confirmed many of his own conclusions; but he obtained assistance from it in the case of only one character.

[1] *Die Entstehung des ältesten Schriftsystems* (Leipsic, 1897).

It will thus be seen that Rawlinson worked out the characters of the Persian alphabet for himself, independently of his predecessors and contemporaries; but it was not on this achievement that he himself based his title to originality. He justly claims that, whereas his predecessors had succeeded only in reading a few proper names and royal titles, he had been the first to present to the world a correct grammatical translation of over two hundred lines of cuneiform writing. This translation was in the hands of the Royal Asiatic Society, and was being prepared for publication in 1839, when his duties in Afghanistan put an end to his studies for some years. It was not until 1845 that he found leisure to complete the work, in which year he published his memoir containing a complete translation of the whole Persian text of the Behistun inscription.[1]

Now that he had completed the decipherment of the old Persian cuneiform inscriptions, Rawlinson turned his attention to the Babylonian cuneiform.

13. Babylonian.

A comparison of the third column of the Behistun inscription with the now known Persian text occurring in the first column was the starting-point of his studies, and in 1851 he published the text and translation of the Babylonian part of this inscription, at the same time demonstrating the fact that the Babylonian characters were polyphonous. The historical inscriptions on cylinders, slabs, and stelai that had been found in Assyria and Babylonia meanwhile afforded ample material for study, and other workers lent their aid in the decipherment. In the years 1849-1852 Hincks contributed papers to the Royal Irish Academy. His most important discovery was the determination of the syllabic nature of Babylonian writing. Subsequently Rawlinson, Hincks, Norris, and Oppert, while devoting themselves to the further interpretation of the historical inscriptions, classified the principal grammatical rules of the language, and so brought the work of decipherment to an end.

The earliest explorers of Babylonia did not undertake systematic excavation. They devoted themselves to surveying and describing the ruins that were still visible upon the surface. The most valuable memoirs on the subject are those on the site of Babylon compiled by Rich, who from 1808 till 1821 was the Hon. East India Company's resident at Baġdād. Systematic excavations were first undertaken in Babylonia during the years 1849-55, under the direction of Sir Henry Rawlinson assisted by Loftus and Taylor.

14. Excavations.

In 1854 Rawlinson excavated at Birs Nimrod near the Euphrates a few miles SW. of Hillah, a mound that marks the site of a great ziḳḳurrat erected by Nebuchadrezzar II. within the boundaries of the ancient city of Borsippa. Here, in addition to tracing the plan of the building, he found fine cylinders recording Nebuchadrezzar's building operations. He also successfully excavated the mounds Ḳaṣr and Bābil, to the N. of Hillah, within the site of ancient Babylon; and during the same period excavations were conducted at the mound of Niffer to the SE. of Hillah, marking the site of the ancient city of Nippur, and in S. Babylonia at the mounds of Warka, the site of Erech, Senkereh the site of Larsa, and Mukayyar the site of Ur. While Rawlinson was carrying on these extensive excavations, the French furnished an expedition which was placed under the direction of Fresnel and Oppert, and during the years 1851-54 did valuable service, especially in surveying and describing the site of the ancient city of Babylon. In 1878 the Trustees of the British Museum again undertook systematic excavations, which were continued down to the year 1883 under the direction of their agent H. Rassani. Excavations were undertaken in the neighbourhood of Hillah, at Tell-Ibrahim, the site of the ancient city of Cuthah, and at Abu-Habbah, the site of Sippar, where exceedingly rich finds of tablets and cylinders were made. The various expeditions of George Smith and E. A. Wallis Budge resulted in the recovery of many Babylonian inscriptions. The French have obtained rich finds of sculptures and inscriptions of the early period at Telloh, in consequence of the exertions of de Sarzec, who, since his appointment as French vice-consul at Bassorah (*Baṣra*) in 1877, has devoted himself to the thorough excavation of the mounds that mark the site of the ancient city of Širpurla. The most recent excavations are those of the Americans at Niffer, which were begun in 1888; they were ably conducted by Haynes, and have only recently been discontinued.

With the exception of those at Telloh, the mounds of Babylonia, unlike those of ASSYRIA (*q.v.*, § 10), do not yield many sculptures or reliefs; but the excavations have enabled us to trace the history of the brick-built palaces and temples, while the 'finds' comprise votive tablets of stone and inscribed alabaster vases, building-inscriptions upon cylinders, and thousands of inscribed clay tablets, many of which are of great literary, historical, and scientific interest.

[1] See *JRAS* 10.

As the soil of Babylonia is alluvial, it is entirely without metals, and even without stone, both of which had to be imported from other countries.

15. Building.

This scarcity of stone had a considerable influence on the character of Babylonian architecture. The difficulties of transport prohibited its adoption as a building material except to a very small extent, and as excellent clay was obtainable throughout the whole of Babylonia, all the temples and palaces as well as private dwellings were composed throughout of brick. The bricks were of two kinds, baked and unbaked. The former, though merely dried in the sun, formed a serviceable building-material, and in some cases entire buildings are composed of them. The usual practice, however, was to build the greater part of the structure of sun-dried bricks and then to face it with bricks dried in the kiln, the thin layer of harder material on the surface protecting the whole structure from rain and flood and change of temperature. Buildings of unburnt brick were often strengthened by thick layers of matting composed of reeds, while the interior structure of faced walls was in some cases strengthened at intervals by courses of baked brick. The bricks themselves vary considerably in size. Many of them were stamped with the name of the king for whose use they were made, which lends considerable aid in settling the date and history of many structures. For binding the bricks together two kinds of cement were employed, the one consisting of bitumen, the other of plain clay or mud, in some cases intermixed with chopped straw. The latter was used the more extensively, bitumen being employed only where there was special need of strength, as at the base of a building where injury from rain was to be feared (see BITUMEN). Conduits of baked bricks were employed for carrying off the water from the larger buildings (see also BRICK, § 4).

The principal building with the Babylonians was the *ziḳḳurratu* or temple, consisting of a lofty structure rising in huge stages one above the other, composed for the most part of solid brick and ascended by a staircase on the outside;

16. Temples.

the image of the god to whom it was dedicated was placed in the shrine at the top. The remains of these temple-towers at the present day are covered by huge mounds of earth and debris, and thus it is difficult to trace their plan and estimate their original dimensions. The larger ones, however, have been examined at different times. That at Warka, which at the present day rises more than a hundred feet above the plain, measures some two hundred feet square at its base, and consisted of at least two stories. The temple at Mukayyar is built on a platform raised about twenty feet above the plain; it is in the form of a parallelogram, the sides measuring 198 ft. and 133 ft., and the angles pointing to the cardinal points. Only two stories are at present traceable, of which the lower one is strengthened by buttresses. The upper story does not rise from the centre of the lower, but is built rather at one end. There are said to have been traces on it, at the beginning of the century, of the chamber or shrine which may have originally contained the image of the god. The zikkurrat at Nippur is of a somewhat similar construction. It is built in the form of a parallelogram, on the NW. edge of a large platform, the four corners also pointing to the four cardinal points. In this temple three stages have been traced, and it is not probable that there were more. In the later Babylonian period the number of stages was increased, as in the temple of Bēl or Marduk at Babylonia, and that of Nabū at Borsippa, both of which were finally rebuilt with great magnificence by Nebuchadrezzar II. (see BABYLON, NEBUCHAD-

REZZAR). Rising on their platforms high above the houses of the city and the surrounding plain, these ancient temples must have been impressive, though in the early period they were entirely without ornament or colour.

The remains of but few Babylonian palaces have been unearthed, that at Telloh being the one belonging to the early period that has been most systematically excavated, while the finest example of the later period is the palace of Nebuchadrezzar at Babylon with its hanging gardens (see BABYLON, § 55). Of the domestic architecture of the Babylonians not many remains have been recovered.

17. Other buildings.

The site from which the finest examples of early Babylonian art have been obtained is Telloh, where excavations have afforded evidence of an art *so* highly developed that its origin must be set back at least 2000 years before the consolidation of the Semitic kingdom of Babylonia (see below, § 54). Large seated statues, in diorite, of Ur-Bau and Gudea, carved in the round, stone slabs and plates sculptured in relief, small figures and carvings in marble, stone, ivory, and bronze, bronze and silver vessels, cylinder-seals, and ornaments of various kinds attest the skill of these early Sumerian artists, who were the teachers of the Semites by whom they were eventually displaced.

18. Art.

At a later period the Babylonians ornamented the interior of their palaces and houses by covering the brickwork with plaster, on which they painted; or they coated the walls with enamelled bricks. The development of sculpture, however, unlike that of Assyria, was hampered by the lack of material in which to work, and it is not surprising that the carvings that have come down to us never approach the level attained by the reliefs of the later Assyrian kings.

Of the many thousands of Babylonian and Assyrian inscriptions that have been recovered only a small proportion can be classified as literature in the strict sense of the term. Perhaps the largest section of the inscriptions consists of the contract tablets, which throw an interesting light on the social and commercial life of the people, but in no single instance can be regarded as of literary value.[1] Similarly the many texts of a magical and astrological nature (see below, § 335), tablets containing forecasts and omens, tablets prescribing offerings and ceremonies to be performed before the gods (§ 30). can hardly take rank as literature, though their classification and study is leading to a more accurate knowledge of Babylonian religion and belief; while the great body of letters and despatches dealing with both public and private affairs, written as most of them are in a terse, abbreviated style, are worthy of study from a philological rather than a literary standpoint.[2]

19. Literature.

When all these deductions have been made, however, there remains a considerable number of texts on the basis of which the Babylonians and Assyrians may justly lay claim to the possession of a literature consisting of both poetry and prose. The principal examples of Babylonian poetry are presented by the legends,[3] the majority of which are written throughout in metre, by mythological and religious compositions and penitential psalms, many of which are composed in Sumerian with interlinear Assyrian translations, and by the many prayers, hymns, incantations, and litanies which occur on tablets by themselves, or are preserved in the ritual texts interspersed with directions for the performance of ceremonies.[1] It has long been recognised that Babylonian poetical compositions, like those of the Hebrews, are written in a rough metre consisting of verse and half-verse, the Babylonian scribes frequently emphasising the central division of the verse in the compositions they copied by writing its two halves in separate columns. More recently it has been pointed out[2] that in many compositions, in addition to this central division, each verse is divided by a definite number of accented syllables or rhythmical beats.

20. Poetry.

The feet or divisions so fornied do not contain a fixed number of syllables, but consist of a single word or of not more than two or three short words closely connected with each other, such as prepositions and the substantives to which they are attached, words joined by the construct state, etc., the metre in some tablets being indicated by blank spaces left by the scribe. The commonest metre is that consisting of four divisions, in which the two halves of the verse are each subdivided; but this, in many texts, especially in some of the prayers, is interrupted at irregular intervals by **a** line of only three feet.

In many of the legends, moreover, the single verses are combined both by sense and by rhythm into strophes consisting of four or two lines each.

The best examples of Assyrian and Babylonian prose are the longer historical inscriptions belonging. to the later periods. This class of inscription demands a more detailed treatment. Apart from its literary value. it is the principal source of our knowledge of the history of the Babylonians and Assyrians themselves, and supplements and supports in many particulars the biblical narrative of the relations of Israel and Jndah to their more powerful neighbours.

21. Historical inscriptions.

Unlike all other classes of inscriptions, which were written with a style on tablets made of clay, the historical inscriptions assume a variety of forms. The shortest form consists merely of a king's name and titles, which are stamped or inscribed on bricks built into the structure of a temple or palace which he had erected or restored. In some cases the actual stamps that were used for this purpose have been recovered. Similar short inscriptions were engraved during the old Babylonian period on door-sockets of stone. Another class of short inscription records the dedication of temples on their erection or when they have been rebuilt; these are frequently written on clay cones fashioned in the form of pegs or nails, which may very possibly have had a phallic significance. The cones of Gndea and Ur-Bau are those most frequently met with, while clay cones of different shapes were engraved by Mnl-Babbar, patesi of Isban, Sin-gāšid, Kudur-Mabug and other, early Babylonian kings; cones of bronze, ornamented with the figure of a god clasping the thicker end, have also been found at Telloh. Dedicatory inscriptions were also written on circular stones, perforated through the centre; when these are small they are usually described as 'mace-heads'; but the use to which the larger ones were put has not been ascertained. The 'mace-heads' of Sargon I., Maništusu, and Nammaghani are good examples of the former class. Small square tablets of diorite, but more commonly larger oblong tablets of limestone inscribed on both sides, were employed for votive inscriptions; those of Rim-Aku and of his wife, of Ḫammu-rabi and of Samsu-iluna, are particularly fine examples of this class of inscription. In the later Babylonian period, when such a votive inscription of an early Babylonian king was found in the ruins or ancient archives of a temple, a pious Babylonian would frequently have an accurate copy of it made in clay,

BABYLONIA

which he placed as an offering in one of the temples in Babylon. Several archaic inscriptions have thus been preserved in Neo-Babylonian copies. The famous stone-tablet recording the endowment of the temple of the Sun-god at Sippar by Nabii-pal-iddina, which was found in a clay coffer with the sculptured portion protected by clay shields provided for it by Nahopolassar nearly three hundred years after it was engraved, is unique.

Clay vases and' howls were employed by some of the Assyrian kings for recording their building operations, the inscriptions running in parallel lines round the outside, while vases of alabaster which were presented to the temples frequently bore the name and titles of the king who dedicated them. Inscriptions on statues are not frequently met with in the later periods of Babylonian and Assyrian history, the short inscriptions on the statues of Ašur-nāṣir-pal, the longer inscription on the seated figure of Shalmaneser II., and those on the two large figures of the god Nebo, being the principal examples; at Telloh, however, long inscriptions of the non-Semitic kings Gudea and Ur-Bau are found engraved on their statues of diorite. Slabs of stone, marble,. and alabaster were employed for longer historical inscriptions. These were sometimes treated as tablets and engraved on both sides, as in the memorial tablets of Rammān-nirari I.; but more frequently they were intended as monuments, and set up in the palaces of the kings who made them; parts of many are decorated with sculpture, and in some instances with portraits in relief of the king whose deeds they record. The later Assyrian kings also engraved their records on the colossal winged bulls and lions that flanked the entrances to their palaces, and by the side of, and even upon, the bas-reliefs which lined their walls. In some places on the borders of Assyria, as in the district of Lebanon and at the source of the Tigris, inscriptions to record the farthest point reached by some military expedition were engraved in the living rock.

22. Clay prisms, etc.

Clay, however, was the material. most .extensively employed, and for the longer historical inscriptions some form of prism or cylinder was found to offer the greatest amount of surface in the most compact form; the two earliest prisms that have been discovered are those of Gudea, each of which contains about two thousand lines of writing.

The annals of several of the Assyrian kings also were inscribed on clay prisms, good examples of which are the four eight-sided prisms[1] of Tiglath-pileser I. (see ASSYRIA, § 28), the famous six-sided 'Taylor' prism[2] of Sennacherib, which contains an account of his siege of Jerusalem (see SENNACHERIB), the six-sided prisms[3] of ESARHADDON (*q.v.*), and the fine ten-sided prisms[4] of Ašur-bāni-pal.

Small barrel-cylinders were employe by some of the Assyrian kings, including Sargon, Esarhaddon Ašur-bāni-pal, and Sin-šar-iškun, and larger ones, containing accounts of his first three campaigns, by Sennacherih. Barrel-cylinders, however, are principally associated with the later Babylonian kings. Most of them contain accounts of the building operations of NEBUCHADREZZAR II. (*q.v.*) and Nabonidus. The two latest barrel-cylinders that have been recovered are those of Cyrus (see below, § 69), describing his taking of Babylon (538 B.C.), and of Antiochus-Soter (280-260 B.C.), recording his rebuilding of the temple of E-zida in Borsippa.

Large clay tablets with one, two, or three columns of writing on each side were employed for long historical inscriptions. Among the best examples are the tablets of Tiglath-pileser III., which were found in the SE. palace at Nimrūd the tablet of Enarhaddon inscribed with his genealogy and an'account of his building operations, the tablet giving an account of Ašur-bāni-pal's accession to the throne of Assyria, and of the installa-tion of his brother as viceroy of Babylon, and those recording Ašur-bāni-pal's conquests in Arabia and Elam, his campaigns in Egypt, and the embassy of Gyges, king of Lydia.

23. Research.

The Assyrians and Babylonians themselves were ardent students of their own literature, compiling catalogues of their principal literary compositions, and writing explanatory tablets and commentaries on many of the more difficult texts. Their language itself and their method of writing were studied in detail, archaic forms of characters being collected into lists and traced hack to the pictures from which they originally sprang. Syllabaries giving the values of the characters in Sumerian, and their Assyrian names and meanings, were compiled. Collections of grammatical paradigms for every class of tablet were made for the use of beginners; examples of verbal formations were collected and classified; and explanatory lists of ideographs were made, arranged in some instances according to the forms of the characters with which they began or ended, in others according to the meanings or roots of their Assyrian equivalents. Perhaps the most interesting of the grammatical tablets are the lists of synonymous words, which served the purpose of a modern dictionary.

24. Astronomy.

The most notable scientific achievements of the Babylonians were their knowledge of astronomy and their method of reckoning time. These two achievements are to a great extent connected with each other, for it was owing to their astronomical knowledge ,that the Babylonians were enabled to form a calendar. From the earliest times, in fact, the Babylonians divided the year into months, partly of thirty and partly of twenty-nine days, and by means of intercalary months they brought their lunar and their solar year into harmony with each other. Their achievements in astronomy are the more remarkable as their knowledge of mathematics was not extraordinary : though we possess tablets containing correct calculations of square and cube roots, most of their calculations, even in the later astronomical tablets, are based principally on addition and subtraction.

Herodotus and other ancient writers concur in tracing to Babylonia the origin of the science of astronomy, as known to the ancient nations of Europe and W. Asia. In more recent times some scholars have asserted, with less probability, that Indian and Chinese astronomers also obtained their knowledge, in the first instance, from Babylon. That the Babylonians themselves took astronomical observations from the earliest periods of their history is attested by general tradition ; and, though the forms this tradition assumed sometimes exhibit extraordinary exaggeration,—as in the calculations referred to by Pliny, according to one of which the Babylonians possessed records of astronomical calculations for 490,000 years, and according to another for 720,000 years,—there is not sufficient reason for rejecting the tradition as having no substratum of truth, and it is not improbable that the Babylonians, even before the era of Sargon I., were watching the stars and laying the foundations of the science. The first observations naturally belonged rather to the practice of astrology and can hardly he reckoned as scientific, and it is not until the later periods of Assyrian and Babylonian history that we meet with tablets containing astronomical as opposed to astrological observations.

The Assyrians made their observations from specially constructed observatories, which were not improbably connected with the temples; the observatory was termed a *bīt tamarti*, or 'house of observation'; and we possess the reports of the astronomers sent from these observatories to the king recording successful and unsuccessful observations of the moon, the unsuccessful observation of an expected eclipse, the date of the vernal equinox, etc. The astronomers, as a rule, sign their names in the reports, and from this source we know that there were important astronomical schools at Ašur, Nineveh, and Arbēla in the seventh and eighth centuries B.C. ; the many fragments of tablets containing lists of stars, observations, and calendars, which date from the same period, are, however, of an astrological rather than a scientific character.

Although we first meet with astronomical inscriptions on Assyrian tablets, it is probable that the Assyrians derived their knowledge originally from Babylonia, and we may see an indication of this origin in a fragment of

BABYLONIA

an Assyrian commentary referring to an astronomical inscription which had been brought to Assyria from the ancient city of Agadè. At a later period there were important schools of astronomy in Babylonia, at Sippar, Borsippa, and Orchoe; but it is from inscriptions obtained from the site of the first of these three cities alone that our knowledge of Babylonian astronomy is principally derived. Excavations undertaken at Abū-Habbah, the site of Sippar, resulted in the discovery of many fragments of astronomical tablets (belonging principally to the Seleucid and Arsăcid eras) written in the later cursive Babylonian; and these, though in but few instances unbroken, have sufficed to vindicate the scientific character of Babylonian astronomy. Though the Babylonians may have had no correct conception of the solar system, they had, at least in the later period of their history, arrived at the conclusion that the movements of the heavenly bodies were governed by laws and were amenable to calculation; and from the tablets we gather that they both observed and calculated the time of the appearance of the new moon, and the periodical occurrence of lunar and solar eclipses, that they noted the courses of the planets, and that they included in their observations certain of the principal constellations and fixed stars.

25. Religion: its general character.

As in all primitive religions, the gods of Babylonia were in their origin personifications of the forces of nature. The various phenomena of the world were not regarded as the result of natural laws. They were explained as due to the arbitrary action of mysterious beings of more than human power. The tempest with its thunder and lightning was mysterious —it must therefore be the work of a god; the light of the sun is the gift of the god, to whose unwearying exertion its movements in heaven are due; heaven itself is a realm as solid as the earth on which men walk; and each must be controlled by its own peculiar deity. In fact, Babylonian religion was a worship of nature in all its parts, each part the province of a deity, friendly or hostile to man, subject to human passions, and, like man, endowed with the powers of thought and speech. Many of the gods resembled mankind in having human bodies; some resembled animals; and others were monsters, partly man and partly beast. They differed from man in the possession of superhuman powers; but no one deity was all-powerful. The authority, even of the greater gods, was specialised, and beneath them were a host of demons endowed with various qualities, but of more narrowly limited influence.

Such is the general character of the Babylonian pantheon regarded as a whole; but it was not in the mass that the Babylonians themselves worshipped their gods, and this fact serves to explain the varying theology presented by the Babylonian religious texts. Every city, for example, had its own special god (cp § 68), who was not only the god of that city but also, for its inhabitants, the greatest of the gods; so too in the temple of any god a worshipper could address him in terms of the highest praise, and ascribe to him the loftiest attributes, without in any way violating the canons of his creed, and with no danger of raising the jealousy or wrath of other deities. In fact, in the Babylonian system, there was no accurately determined hierarchy, and the rank and order of the various deities was not strictly defined, but varied at different periods and in the different cities throughout the land. The tolerant nature of the Babylonian deities and the elasticity of their character explain the ease with which foreign deities were adopted and assimilated by the pantheon, while the origin of this elasticity may be traced back to the mixture of races from which the Babylonian nation sprang.

26. The gods.

In spite of the varying nature of the Babylonian pantheon, it is still possible to sketch the general character and attributes of the principal Babylonian deities. At the head of the pantheon, from the earliest period, stood a powerful triad consisting of Anu, the god of heaven, Bēl, the god of the earth, and Ea, the god of the abyss and of hidden knowledge. Next in order comes a second triad, comprising the two chief light-gods and the god of the atmosphere: *i.e.*, Sin, the Moon-god, Šamaš, the Sun-god, and Rammān, the god of storm, thunder and lightning, clouds and rain. All of these gods had their own cities, which were especially devoted to their worship. Thus the worship of Anu was centred at Erech, that of Bēl at Nippur, and that of Ea at Eridu; the oldest seat of the worship of Sin was Ur, though in Ḫarrān also there was an important temple of the Moon-god; and the cities of Larsa and Sippar were the principal centres of the Sun-god's worship. The city-god of Babylon was Marduk, whose importance in the pantheon increased as that city became the capital of the country, until in process of time he came to be identified with Bel, 'the lord' *par excellence*. The nearness of Borsippa to the capital explains the close connection of Nabū, its city-god, with Marduk, whose attendant and minister he is represented to have been. The god Ninib, whose name is read by some as Adar, was of solar origin; the fire-god, who plays an important part in the magical beliefs and ceremonies of the Babylonians, was Nusku; and the god of battle was Nergal, the centre of whose worship was at Cuthah.

The Babylonian goddesses were in most cases of minor importance; they were overshadowed by the male deities with whom they were connected, and the principal function of each was to become the mother of, other gods. In some cases their very names betray their secondary importance, as in that of Anatu, the spouse of Anu, and that of Bēlit, the spouse of Bel. The spouse of Ea was Damkina; Ningal was the lady of the Moon-god, Ai of Šamaš, Sala of Rammān, Tašmētu of Nabū, Gula of Ninib, and Laz of Nergal.

The relationships of the gods to one another are not accurately determined, in some cases contradictory traditions having been handed down; Sin, Šamaš, and Ninib, however, were regarded as the children of Bēl, though Šamaš also passed as the son of Sin and Ningal, Marduk was the son of *Ea*, and Nabū the *son* of Marduk.

On a different plane from the other goddesses stands Ištar, one of the most powerful deities in the pantheon. She appears in two distinct characters, under which she assumes different titles, and is credited with different genealogies. As the goddess of battle she was hailed as Anunitu, the daughter of Sin and Ningal, and was worshipped at Agadè and at Sippar of Anunitu; as the goddess of love she was termed Bēlit-ilāni, the daughter of Anu and Anatu, and the chief seat of her worship was the temple of E-ana at Erech; it was here that the unchaste rites, referred to by Herodotus as having been paid to the goddess Mylitta, with whom Ištar is to be identified, were performed. Her name was connected in legend with Dumuzi or Tammūz, her youthful lover, on whose death, it is related, she descended to the lower world to recover him.

The conception of the Babylonian deities as actual personalities endowed with the bodies and swayed by the passions of mankind, and related to one another by human bonds of kindred, was not inconsistent with the other and more abstract side of their character which underlay and was to a great extent the origin of the human attributes with which they were credited. Thus, the return of Tammūz and Ištar to earth was the mythological conception of the yearly return of spring. Moreover, as each force in nature varies in its action at different seasons, so each of its manifestations may be connected with a separate deity. The attributes of several gods can thus be traced to a solar origin. Whilst Šamaš represented the sun in general, special manifestations of his power were connected with other deities; Nergal, the god of war, for example, represents

the sun's destructive heat in summer and at noon-day, Ninib the sun on the horizon at sunrise and sunset, and Marduk, the special friend of man, its temperate heat in the morning and in spring. The aspect of the heavens at night also plays a considerable part in the origin of the gods of Babylonia. Thus each of the planets was connected with one of the greater gods : the fixed stars represented lesser deities, and Bēl and Ea, though ruling the earth and the abyss, also had astrological characters, in virtue of which they divided with Anu the control of the sly.

The worship of their deities by the Babylonians was attended by a complicated system of ritual and ceremony.

27. Temples. It formed one of the most important aspects of the national life, and, as their temples were the largest of their buildings, so the priests were the most powerful class in the community. In each city the largest and most important temple was that devoted to the city-god. Thus the chief temple at Babylon was E-sagila, the centre of the worship of Marduk ; the great temple at Borsippa was E-zida, the temple of Nabu; the principal temple at Nippur was E-kur, the centre of Bēl's worship ; and E-ḫul-ḫul the temple of the Moon god at Ḫarrān, E-barra the temple of Šamaš both at Sippar and at Larsa, and E-ana the temple of IStar at Erech, were the principal temples in each of these cities. Situated on a lofty platform and rising stage upon stage, these ziggurats or temple-towers dominated the surrounding houses, and were more imposing than the royal palaces themselves. At the summit of each the image of the god reposed in his shrine, and around its base clustered the temple offices and the dwellings of the priests. To each temple was attached a trained and organised priesthood, devoted exclusively to the worship of its god, and preserving its own ritual and body of tradition. The temples were under the direct patronage of the kings, who prided themselves on the rebuilding and restoration of their fabrics as much as on the successful issue of their campaigns, while the priesthoods were supported by regular and appointed offerings in addition to the revenues they drew from the lands and property with

28. Priests. which the temples were endowed. The influence of the priests upon the people was exerted from many sides, for not only were they the god's representatives, whose services were required for any act of worship or intercession, but they also regulated and controlled all departments of civil life. They represented the learned section of the nation, and in all probability the scribes belonged entirely to the priestly class. They composed and preserved the national records, and although some of the later Assyrian kings collected libraries in their palaces, this was probably accomplished only with the co-operation of the priesthood and by drawing on the collections of tablets preserved in the great temples throughout, the country.

A still more powerful influence was exerted by the priests on the common people in connection with their social life and commercial transactions, inasmuch as the administration of the law was in their hands.

The religious functions discharged by the priesthood were twofold. On the 'one hand, they carried out the regular sacrifices and services of the temple to which they were attached; on the other, they were always at the service of any one who wished to present an offering or make intercession in his own behalf. In their former capacity they celebrated regular feast-days in every month as well as the great festivals of the year, such as the New Year ; in the latter their ministrations were more personal, and consisted in introducing the individual suppliant into the presence of the deity and performing for him the necessary rites.

29. Claims of religion. Every Babylonian had his own god and goddess, to whose worship he dedicated himself. They, in return, were his patrons and protectors. When any misfortune happened to him it was a sure sign that his god and goddess were angry and had removed from him their countenance and protection, and in such a predicament he would have recourse to the temple of one of the greater gods, whose influence he would invoke for his restoration to the favour of his patron deities. The protection of his god and goddess were necessary to preserve a man from the spiritual dangers that surrounded him, for he believed that on every side were evil gods, spirits, demons, and spectres, who were waiting for any opportunity he might give them to injure him. Any sickness or misfortune, in fact, he regarded as due to a spell cast upon him which had its origin in one of several causes. It might he the result of an act of sin or impurity committed by him with or without his own knowledge ; or it was the work of an evil spirit or demon ; or, finally, it was due to the machinations of a sorcerer or sorceress. Whatever its cause, his only hope of recovery lay in recourse to the priests, through whom he could approach one of the gods.

From the carvings on Babylonian cylinder-seals we know the attitude that the suppliant must assume when

30 Religious observances. led into the presence of the god. He is represented as standing with both hands raised before him, or, with one hand raised, he is being led forward by the priest, who grasps the other. The penitential psalms and incantations preserved on tablets from the library of Ašur-bāni-pal indicate the general character of the petitions he must make, consisting of invocations of the deity addressed, confessions of sin, and prayers for assistance, recited partly by the priest and partly by the suppliant himself. Many tablets record the offerings that must be made before the gods, comprising oxen, sheep, lambs, birds, fish, bread, dates,' butter, honey, oil, date-wine, sesame wine, pieces of precious woods, gold, jewels, and precious stones, plants, herbs, and flowers. Many magical rites and ceremonies were performed by the priests, such as the knotting and unknotting of coloured threads, the burning of small images made of a variety of substances, including bronze, clay, bitumen, plaster, wood, and honey, to the accompaniment of incantations; the throwing into a bright fire of certain substances, such as a fleece, a goat-skin, a piece of wool, certain seeds or a pod of garlic, a special form of words being recited by the priest as he per-' formed the rite; the dropping of certain substances into oil and the pouring out of libations. Such ceremonies and rites were not regarded as symbolical, but were supposed to be sufficient in themselves to secure the suppliant's release from the spell or ban to which his sufferings or misfortunes were due.

The prediction of future events also plays an important part in the religion of the Babylonians and Assyrians.

31. Augury. So far from being carried on in secret and by a few isolated soothsayers, augury was practised as a science by a large and organised body of the priesthood under the direct control and patronage of the king. This being the case, it is not surprising that a considerable portion of the native literature deals with the subject of omens and forecasts. Almost every event of common life was regarded by the pious Babylonian as perhaps a favourable or unfavourable sign requiring the interpretation of an expert, and necessitating a journey to the temple. Those whose duty it was to furnish the interpretation of such an event did not necessarily pretend to second sight or rely on a vision or any divine communication ; their answer was based on their own knowledge, acquired by special training and study. In the course of time all events and the consequences said to result from them had been written down; the tablets on which they were inscribed had been divided into classes according to the subjects of their contents; and many were collected into series. Thus an important temple would contain a small library dealing with the subject, requiring to be mastered by

the novice and always at hand for the consultation of the augurs themselves. Many of these tablets have been preserved, and it is to them that we owe our knowledge of this important department of Babylonian religion.

The text of an omen-tablet consists of short sentences, each of which generally occupies one line of the tablet.

32. Omen-tablets. The construction of the sentence is invariably the same, and may be rendered by the following formula : 'when (or if) so and so is the case, such and such an event will happen.' There are, therefore, two ways in which we may classify an omen—either by its protasis or its apodosis. Regarded from the latter point of view, all omens may be roughly divided into those that relate to public affairs and those that relate to the fortunes of an individual. Thus certain occurrences may be looked upon as foretelling the death of the king or the future condition of the country, whether there will be a plentiful harvest or a famine, whether there will be war or peace, and, if war, in what quarter it may be expected. Those which relate to private affairs, on the other hand, concern themselves with the health, sickness, or death of a man or of his wife or child, or foretell the stability or destruction of his house. Some few tablets indeed relate to special classes, such as those which foretell accidents that may happen to women during pregnancy; but in the majority of omen-texts the apodosis is couched in general terms and the same phrases regularly recur. In fact, the events foretold are not very many, and may generally be classed under the headings of death and life, sickness and health, famine and plenty, war and peace; the predictions are cast in a vague form, and details, such as the place or manner of a man's death, are but rarely specified. In the protasis, on the other hand, we find an almost bewildering variety of subjects, which admit, however, of a rough classification. What is perhaps the largest section centres round the phenomena of human birth, the predictions being based on the manner of delivery and on the appearance of the child; and not only were miscarriages and the births of monstrosities regarded as of peculiar import, but variations in the appearance of normal offspring also formed the basis of prediction.

Different parts of the body of a newly-born child are dealt with independently, and to have grasped correctly the significance of every part must have required a long course of training and study of the tablets. The state of the eyes or the hair, the position and size of the ears, mouth, hands and feet, the resemblance of the face to that of certain animals, were all carefully considered. The parturition of animals also was made a special study, the appearance of' the offspring of lions, oxen, horses, and other animals, the colour of their hair and the number and position of their limbs, being regarded as significant. Omens were drawn from the appearance of the various parts of the body of an adult, male or female, especially in sickness, such as the state and colour of the eyes, the ears, and the hair, the state of the heart, the lungs, the buttocks, and other members of the body, the resemblance of the head to that of a bird or beast, the condition of the urine etc. ; with a view to predictions, studies were also made of thehctions of a man, such as that of eating, and certain other of his natural functions. Another large class of omens were drawn from the appearance of animals such as the colour of the horns of oxen and the direction in which they curve, while the actions of certain animals (pigs, horses, etc.) were likewise studied. If a man is walking and wishes to know the future he must notice the direction in which an animal moves round him, and he must note if a lion, or a hyena, or a hird crosses his path. If he sees a snake at the entrance of a gate or at the doors of a temple, or dogs and calves as he is going out of a door, he must visit the augur for an interpretation. The appearance of animals, snakes, or scorpions in a man's house, or in a palace or a temple, was of significance, while the sting of a scorpion was a warning of various events, different results following from stings on different toes. The appearance and flight of birds were exhaustively treated, and a man was wise if he did not disregard the flappings of a bird's wing and did not fail to observe the direction in which it flew should it flutter round his head. Another class of omens laid stress on the locality of certain events : those occurring in cities and streets received a treatment different from that of occurrences in the fields and open country. Predictions were made from'the state of a house, its walls, etc., and even from the state of the furniture which it contained. The time of the events or observations was in some instances considered important, and in these cases the month and day were specially noted.

As omens were taken from so many common objects and occurrences, it was natural that dreams and visions

33. Dreams. should be regarded as indications of future prosperity or misfortune, and that the objects or animals a man might behold in a dream had each a different signification. Thus, if he beheld in his dream certain people, or seemed to be fighting with a relation, such as his father or grandfather, the visions had a special meaning, while the fact that the person he fought with was alive or dead at the time was also of importance ; apparitions of spectres and demons in a house were indicative of the future. In the majority of omens the conditions on which they were based were chance occurrences and events; it was, however, possible to obtain information as to the future by artificial means, such as by observing the entrails of victims, by kindling fire on an altar and noting the direction in which the smoke rose, or by observing the flickering of the flame of a lamp.

With omens it is difficult to say how far the facts on which the predictions were based were merely signs of

34. Astrology. prosperity or misfortune which would come in any case, and how far they were regarded as in themselves the actual cause of such prosperity or misfortune. In the case of astrological forecasts, however, which are closely connected with the omens, it seems probable that the latter conception preponderated. The astrological phenomena that are mentioned were not merely passive indications of the future, but active forces influencing the lives and fortunes of the individual and the state. The practice of astrology was based principally on observations of the sun and moon and stars, their relative positions at different times, and the various combinations presented by them. Another large body of forecasts was based on eclipses of the sun and moon, the results varying with the time of the eclipse, the appearance of the sun and moon during the eclipse, and the direction in which the shadow travels. Forecasts were based also on the appearance of meteors and shooting stars, on observations of lightning, clouds, and rain, on the direction of the wind, on the various directions in which a cloud may travel, and on the colour and shape of clouds and their resemblance to animals, fishes, ships, etc. As in the case of the omen tablets, the Babylonians possessed a great body of astrological literature; observations and forecasts in course of time were collected, grouped, and classified; and large works upon the subject were copied out on consecutive tablets for the training and use of the astrologers. Many tablets belonging to these larger works have come down to us; there are also preserved in the British Museum small oblong tablets containing the answers of astrologers who had been consulted as to the future, as well as thki reports on recent astrological observations and the interpretation to be set on them.

Around the figures of their gods the Babylonians wove tales and legends, which, originating in remote antiquity,

35. Mythology. were handed down through countless generations. being added to and modified by the hands through which they passed. They were collected and arranged during the later periods of Assyrian and Babylonian history, and it is in these comparatively recent forms that they are preserved in the literature that has come down to us. It is true that the tablets containing the legends of Adapa and of the goddess Ereškigal were found at Tell el-Amarna and date from the fifteenth century B.C. ; but not one of the tablets containing the other legends is earlier than the seventh century B.C. The antiquity of the legends themselves, however, is amply attested by the divergent forms which in some cases the same legend assumes, as related on different tablets belonging to the later Assyrian and Babylonian periods, or referred to in the works of classical writers. An additional interest attaches to two sections of the legendary literature of Babylon from their close resemblance to the narrative of the early part of

Genesis, relating to the creation and the deluge. Whether we are to trace the ultimate origin of both the Babylonian and the Hebrew versions of these legends to the previous non-Semitic inhabitants of Babylonia need not concern us here: The contents of these legends and their relation *to* the Hebrew narratives will also be more conveniently treated elsewhere (see CREATION, DELUGE, CAINITES, ENOCH, NOAH). The legends of the creation and the epic of Gilgameš are certainly the most famous portions of Babylonian mythology; but they form only a part of the legends and beliefs that were current in the various cities of Babylonia. Even those which have come down to us on the tablets present a great variety of subject and treatment.

Ištar's descent into Hades is one of the best preserved of these legends. It contains a description of the lower world, and records how at each of the gates that lead thereto the goddess is stripped of a portion of her apparel until she enters naked into the realm of Allatu, and how she is detained there but is eventually brought back to earth to put an end to the troubles of men and animals that had followed the departure of the goddess of love. The Plague-god was a prominent figure in Babylonian mythology, the legends describing in detail the ravages he caused among the cities of the land. Two other legends may be mentioned briefly : that of the Zū's theft of the destiny-tablets, and the legend of Adapa and the South-wind. In the former, Zū is recorded to have fled with the tablets to his mountain, and, although the other gods would not venture against him, he was eventually captured by Šamaš the Sun-god in his net. The legend of Adapa relates how Adapa, the son of Ea, was fishing one day in the sea for his father's household when the South-wind blew and ducked him under ; how in anger he caught the South-wind, and broke her wings ; and how he came to heaven into the presence of Anu, who summoned him thither on noticing that the South-wind had ceased to blow.

36. Legends.

In many of the legends animals and birds endowed with thought and speech are introduced : as in the legend of Etana's flight to heaven with the eagle, the legend of the Eagle, the Serpent and the Sun-god, the legend of the Fox, the legend of the Horse and the Ox, and the legend of the Calf. Not only do gods, heroes, and animals figure in the mythology of Babylonia, but also ancient kings, whose actual existence is attested by the remains of their buildings and inscriptions, were raised to the level of heroes or demi-gods in the popular imagination, and their names became centres round which in the course of ages legends have clustered. The most famous of these is the legend [1] of the birth of Sargon of Agadè, who is said to have been of lowly origin ; his father he knew not, and his mother set him floating on the Euphrates in a chest of reeds smeared with bitumen; but Akki the irrigator rescued him, and while he was serving as gardener to his benefactor, the goddess IStar loved him. Eventually she invested him with the rule of the kingdom. Narām-Sin the son of Sargou, Dungi king of Ur, Nebuchadrezzar I., and other ancient kings, figure in the legendary literature.

37. Chronology: First period.

The data available for the settlement of Babylonian chronology vary for each of the three periods (see below, § 40) into which the history of the country may be divided. In the first oeriod a single date has been fixed for us by a reference in one of the cylinders of Nabonidus, from which we infer that Sargon I. lived about 3750 B.C. When Nabonidus states [2] that 3200 years have elapsed since Sargon laid down an inscription which he himself found, he is naturally giving only an approximate estimate of the period during which it had lain buried. There is no reason, however, for doubting the general accuracy of the statement; for the Babylonians were careful compilers of their records, and Nabonidus had access to sources of information which have not come down to us. This one date, therefore, gives us a fixed point in the early history of the country. In settling the chronology before and after this point we do not gain much assistance from the list of dynasties preserved from the history of Bērōssus, who places in the earliest period ten kings who ruled before the flood. Similarly a tablet from Kuyunjili containing the names of certain kings, who, it states, ruled after the deluge, is not of assistance, especially as the names it does contain are arranged not chronologically but on a linguistic basis. In settling the chronology of this period, we have, in fact, to fall back upon the internal and external evidence of date afforded by the archaic inscriptions themselves. (1) The internal evidence consists principally of the royal genealogies contained by the inscriptions, from which the relative dates of the kings so mentioned can be ascertained. Good examples of the use of such evidence are afforded by some of the inscriptions of the kings and patesis of Sirpurla : as, for example, by the inscriptions of E-din-gira-nagin, in which he calls himself the son of Akurgal, and of Akurgal, who styles himself the son of Ur-Nina; or that of Entena, in which he is called the son of En-anna-tuma and the descendant of Ur-Nina, or the gate-socket of En-anna-tuma II. from which we learn that Entena was his father ; or the circular stone plate containing an inscription of the wife of Nammaghani, in which she is referred to as the daughter of Ur-Bau, proving that Nammaghani succeeded Ur-Bau through his wife's title to the throne. (2) The external evidence afforded by an inscription is obtained partly by a study of the general style of the writing, the forms of the characters, etc. ; partly by accurately noting its relative position with regard to other inscriptions near which it may happen to be found, the different depths at which inscriptions are unearthed in some cases giving a rough idea of their comparative ages. It must be admitted, however, that the evidence to be obtained both from palæography and from systematic excavation is in its nature extremely uncertain and liable to various interpretations. Such evidence is of service when lending its weight to that obtained from other and independent sources ; but when it is without such support it cannot be regarded as indicating more than a general probability.

38. Second period.

For the chronology of the second period we have the genealogies to be obtained from the historical inscriptions, as well as the chronological notices which occur in some of them. From the latter source, for example, we gather that Burna-Buriaš lived some 700 years after Ḫammu-rabi,[1] that Šagašalti-Buriaš lived about 800 years before Nabonidus,[2] and that Marduk-nādin-aḫē defeated Tiglath-pileser I. 418 years before Sennacherib conquered Babylon[3] (cp ASSYRIA, § 20). Our principal source of information, however, lies in the chronological documents of the Babylonians themselves. (1) One of the most important of these is the 'List of Kings,' a list of the names of the kings of Babylon from about 2400 to 625 B.C., in which the kings are divided into dynasties, the length of each reign and the total length of each dynasty being added ;[4] a smaller list of kings contains the names of the kings of the first two dynasties.[5] (2) From the document known as the 'Babylonian Chronicle'[6] we obtain a record of events in Babylonia and Assyria from the early part of Nabonassar's reign (about 745 B.C.) to 669 B.C., the first year of the reign of Šamaš-šum-ukīn, and this information is supplemented by (3) the 'Ptolemaic Canon' (see CHRONOLOGY, § 24 *ff.*), which also begins with the reign of Nabonassar. The fragment of a second Babylonian chronicle refers to kings of the first, fifth, sixth, and seventh dynasties, while part of a third chronicle supplements the narrative

6 *KB* 2 274 *ff.*, or *RP*(2) 1 22 *ff.*

of the 'Synchronous History' for certain portions of the third dynasty. Finally, (4) the 'Synchronous History'[1] (see ASSYRIA, § 21, beg.) itself connects the history of Babylonia with that of Assyria, with certain breaks, from about 1480 to 810 B.C.

For the third period of the history the succession of the kings is known from the Ptolemaic Canon, which, in addition to the names of the kings, gives the lengths of their respective reigns; and the information so obtained is controlled by the many Babylonian contract tablets which have been found dated according to their regnal years.

39. Third period.

The history of Babylonia falls naturally into three main periods. The first period comprises the history of the country from the earliest times down to the consolidation of its various elements into a single empire ruled by Semitic kings with their capital at Babylon. The second period begins with the first dynasty of Babylon, to whose greatest king, Ḫammūrabi, was principally due the consolidation of the Babylonian empire, and extends to the fall of the power of Assyria, whose later kings included Babylonia in their dominions. The third period comprises the history of the Neo-Babylonian empire.

40. Historical periods.

The length of the first period can only be approximately determined, for it reaches hack into remote antiquity; the second period deals with the history of some seventeen hundred years, extending from about 2300 to 625 B.C.; the third period is by far the shortest of the three, for it contains the history of an empire which lasted for less than a hundred years, from Nabopolassar's accession to the throne of Babylon in 625 B.C. to the capture of the city by Cyrus, king of Persia, in 538 B.C.

During the first period the name of Babylon is not known. The country is under the successive domination of the more ancient cities of the land until the Semitic element eventually predominates. During the second period Babylon holds her place as the centre of the country in spite of the influx of Kassite and Chaldean tribes and the opposition of Assyria. In the third period the magnificence of Babylon became one of the wonders of the ancient world.

In treating the earliest period of the history of the country we are, to a great extent, groping in the dark. Our principal sources of information are the archaic inscriptions found on many of the sites of the old Babylonian cities, and these have been considerably increased by recent excavations. In order, then, to understand clearly the problems they present, it will be necessary to proceed gradually from the points that may be regarded as definitely fixed into the regions where conjecture still holds her own. As the earliest date that can be regarded as settled is that of Sargon I., it necessarily forms the basis or starting-point from which to reconstruct the history of the period.

41. Earliest period.

Nabonidus, the last king of Babylon, on a clay cylinder found at Abu-Habbah records the fact that while restoring the temple of the Sun-god in that city he came upon the foundation-stone of Narām-Sin, the son of Sargon, which for 3200 years no king that went before him had seen. As the cylinder of Nabonidus was inscribed about the year 550 B.C., we conclude that Nariim-Sin lived about 3750 B.C., and Sargon his father about 3800 B.C.

During the French expedition to Mesopotamia (1851-1854) Oppert found in Babylon an alabaster vase inscribed in archaic characters with the name of Narām-Sin, to which was added the title 'king of the four quarters.' The vase, which was lost in the waters of the Tigris on 23rd May 1855, formed the only remains of this king that were recovered until the American expedition in 1888.

[1] *KB* 1 194 *ff.*

BABYLONIA

Of Sargon, however, two inscriptions were known; the one on the cylinder in the possession of M. de Clerq, the other on a mace-head in the British Museum. Some doubt was thrown on the identification of this king with the Sargon of Nabonidus; for, whilst the name of the latter was written Šargina, that of the former was Šargani-šar-ali. Such an abbreviation, however, was not unusual in the names of many of the early kings, and the identity of the two names is now put beyond a doubt by the discovery at Nippur of inscriptions of Šargani-šar-ali in the same stratum which held bricks stamped with the name of Narām-Sin.

That the empire over which Sargon ruled was extensive is attested by the legends that at a later period gathered round his name (see above, § *36*). His name and that of Nariim-Sin occur in an astrological tablet,[1] in which expeditions against Phœnicia, Elam, etc., made by these two kings during certain lunar phases and astrological conditions, are recounted; and, although it would be rash to regard such statements as historical on the authority of this tablet alone, they at least bear witness to the permanent hold which the name of Sargon had attained in the popular imagination. In a cylinder[2] of Nabonidus found at Mukayyar (Ur) the title 'king of Babylon' is ascribed to both Sargon and Narām-Sin; but it is probable that the city of Agadè, not Babylon, formed the centre of their empire, as 'king of Agadè' is the title by which Sargon invariably describes himself. The site of this city has not been identified; but it is probably to be sought in Northern Babylonia.

Both Sargon and Narām-Sin were Semites, and the extent of their empire shows the progress which the Semitic invaders were making towards the final subjugation of the country.

42. Semitic kingdoms.

The name of another king who was probably of Semitic origin is Uru-mu-uš possibly to be read as Alušaršid, and from the fact that his 'inscriptions were found at Nippur near those of Sargon, which they closely resemble in character, it may he assumed that he belonged to about the same period. His name has been found on alabaster vases which he dedicated and placed in the great temple of Bēl at Nippnr; the vases he states, formed part of the spoil captured on a successful expedition against Elam and Bara'se to the E. of Babylonia. Moreover Maništusu, whose name occurs on a mace-head preserved' in the British Museum, must also be assigned to about the same period.

In addition to the empire established by Sargon, there is not lacking evidence of the existence at this time of other Semitic kings and principalities. The inhabitants of Lulubi spoke a Semitic dialect, as is evinced by the inscription engraved on the face of the rock at Ser-i-pul, a place on the frontier between Kurdistan and Turkey. The inscription accompanies and explains a relief representing the goddess Nini granting victory over his foes to Anu-bānini, king of Lulubi, and from the archaic forms of the characters the work must be assigned to a period not later than that of Sargon. It is also probable that the inhabitants of Guti, a district to the NE. of Babylonia, were Semites; for an archaic inscription of a king of Guti, which was found at Sippar, is written in Semitic Babylonian. This, we may assume, was carried to Sippar as spoil from the land of Guti, though it is also possible that the stone containing the inscription was a gift of the king of Guti to the temple at Sippar, the inscription being composed, not in the king's own language, but in the Semitic dialect of Sippar.

Still, whilst a few of the inscriptions of this early period are undoubtedly Semitic and may be adduced as evidence of the first settlements of the Semites in Babylonia, the majority of the inscriptions that have come down to us are written in a non-Semitic tongue (to which the late Sir H. Rawlinson gave the name Accadian), now generally known as Sumerian.[3] These inscriptions

43. Sumerian rulers.

[1] *KB* 3 *a* 102 *ff.* [2] *KB* 3 6 84 *f.*

[3] For many years a controversy has raged around the character, and even the existence, of this language. The theory put forward by Halévy that Sumerian was not a

have been found in the mounds which mark the sites of the ancient cities of the land, and were the work of the previous inhabitants of the country whom the invading Semites eventually displaced. One of the most important of their ancient cities is to-day represented by the mounds known as Telloh, situated to the N. of Mukayyar and E. of Warka, on the E. bank of the Šaṭṭ-el-Ḥai. These mounds mark the site of a city called by the kings and governors who ruled there Sirpurla, but known at a later time as Lagaš. The excavations that were begun on this site by De Sarzec in 1877 have resulted in a rich harvest of inscriptions on statues, cylinders, cones, tablets, bricks, etc., from which it is possible to trace the history of the city throughout a long period. Its earlier rulers called themselves 'kings,' the later ones bearing the title of patesi, which is equivalent to the Assyrian iššakku. The word patesi, whilst implying that the ruler is the representative of the national god, indicates the possession of a power less supreme than that attaching to the word lugal (Sem. šarru), 'king,' and it has been ingeniously suggested that the change in title was in consequence of an actual change in the fortunes of the city, the rule of the patesis being held to mark the subjection of their city to another power. The manner in which the succession of the various kings and patesis was determined has been already referred to (see above, § 37); the following is a brief description of their history based on those results.

44. Rulers of Širpurla or Lagash.

The oldest king of Širpurla known to us is in all probability Urukagina. After an interval, the length of which is unknown, we find Ur-Nina on the throne; and, as he gives to neither his father nor grandfather the title of king, it is not unreasonable to conclude that he was the originator of a new dynasty, a dynasty that we can trace through several generations. Ur-Ninā was succeeded by his son Akurgal, who bore both the titles, king and patesi, and it was not until the reign of E-dingira-nagin, Akurgal's son and successor, that the title patesi appears to have ousted that of king permanently. It is during the reign of E-dingira-nagin, however, that we find the first record of any extensive military operations undertaken by the inhabitants of Širpurla. To his reign belongs the famous stele of vultures, carved to commemorate his victory over the city the name of which is provisionally read as Ishan. E-dingira-nagin was succeeded by his brother En-anna-tuma I., whose son Entena and grandson En-anna-tuma II. continued the succession. After a second interval comes Ur-Bau, from whom the throne passes through his daughter to his son-in-law Nammaghani. After a third hut shorter interval there followed Gudea, who conducted a successful campaign against Elam, but, like his predecessors, devoted most of his energies to building operations. He was succeeded by his son Ur-Ningirsu; and finally there must he placed a second Akurgal, and either before or after him Lukani, whose son Ghalalama may possibly have succeeded him on the throne.

45. Their inscriptions.

The monumental inscriptions of these old kings and patesis of Širpurla are, with the exception of one of Ur-Bau and several of Gudea, comparatively short, and are generally concerned with the erection of buildings and temples in the city, an object to which both kings and patesis without exception devoted themselves. The thousands of clay tablets, however, which have been discovered dating from this period, the high point of development attained in their sculpture and carving in relief, the elaborate but solid construction of their temples and palaces, are all evidence of a highly developed civilisation; and the question at once arises

46. Their date.

as to what date must be assigned for the rise of the kingdom of Sirpurla. Additional interest is lent to the way in which this question may be answered by the fact that even the earliest inscriptions and carvings that have been discovered cannot have been the work of a barbarous race, but demand the assumption that at least one thousand years, during which they gradually attained their high level of civilisation and culture, had passed.

language but merely a cabalistic method of writing invented by the Semitic Babylonians themselves was for years stoutly defended by its adherents, it has now, however, given way before the results of recent excavations. The thousands of archaic tablets found at Telloh and elsewhere are written entirely in Sumerian by a people who both in their inscriptions and in their art exhibit no traces of Semitic origin. The existence of Sumerian as the language of these early inhabitants of Babylonia is now generally admitted. See also below, § 77 (end).

It will be obvious that, as the date of Sargon I. is already fixed, the simplest way of answering the question and of assigning a date to the earlier kings of Sirpurla is to determine the relation in which they stood to Sargon I. Until recently it was impossible to come to any definite conclusion, though it was generally held that the archaic forms of characters on the inscriptions of the kings of Širpurla favoured the theory which assigned to them an early date. The excavations at Nippur, however, have now yielded sufficient data to justify a more conclusive answer.

In the same stratum as the inscriptions of Sargon and Alušaršid, and not far from them, was found a fragment of a vase inscribed with the name of Entena, patesi of Širpurla, who is said to have presented the vase to En-lilla or Bēl, the god of Nippur. It would be rash to conclude from this fact alone that Entena was the contemporary of Sargon I., though it may be held to indicate that approximately the same date may be assigned to Sargon and the earlier patesis of Širpurla. Excavations, however, were subsequently extended below the level at which the records of Sargon had been found, and traces of a still more ancient civilisation were disclosed. An altar with a small enclosure or curb around it, two immense vases of clay standing at short intervals from each other, probably on an inclined plane leading up to the altar, and a massive building with an ancient arch, were the principal architectural remains discovered. However, there were also found inscriptions which, though occurring at a higher level and mixed with the inscriptions of Sargon, are probably to be assigned to a pre-Sargonic period. As the majority of these are broken into small fragments, it is not unlikely that' they were intentionally broken and scattered by some subsequent invader of the country. Gate-sockets and blocks of diorite, however, were not broken, and so were made use of by subsequent kings. Thus both Sargon I. and Bur-Sin II. used for their own inscriptions the blocks which already bore the rough inscription of Lugal-kigub-nidudu, one of the kings of this early period. The characters in these early inscriptions, especially on the vases of Lugal-zaggisi, the most powerful of these early kings, bear a striking resemblance to those employed in the inscriptions of the earliest kings of Sirpurla (Urukagina, Ur-Ninā, and E-dingira-nagin), sharing with them certain peculiarities of form which are not met with elsewhere. The conclusion that they date from about the same period is, therefore, not unwarranted; and, as this period must be placed before Sargon I., we are justified in assigning to Urukagina a date not later than 4000 B.C.

47. Before Sargon.

To trace in detail the history of the predecessors of Sargon I., whose existence was not suspected until the lowest strata beneath the temple of Ekur at Nippur had been sifted, is a task that requires some ingenuity. Our only source of information is afforded by the fragmentary inscriptions themselves; but, as many of these are duplicates, it is possible to reconstruct their original text. The earliest rulers of Babylonia, such as En-Hag-sagana, are found in conflict with the city of Kiś, and spoil from Kiš was from time to time placed as an offering in the temple at Nippur. Sometimes Kiš was victorious, and then the king of Kiš, as in the case of Ur-Šulpauddu, made a presentation to the temple at Nippur in his own behalf. The ultimate superiority of Kiš, however, was assured by its alliance with the powerful city of Isban; for Lugal-zaggisi, son of Ukuš, patesi of Isban, on coming to the throne, extended his sway over the whole of Babylonia. He has left us a record of his achievements in a long inscription carved

on more than a hundred vases, which he deposited in Nippur. Though he especially favoured his own city of Isban, Erech was probably his capital, while Ur, Larsa, and Nippur were important centres. Lugalzaggisi's empire did not long survive him, and the lead in Babylonian politics passed to the city of Sirpurla. E-dingira-nagin's conquest of Isban, however, was not followed up by his successors on the throne; and the hegemony passed once more to the north, this time to Sargon of Agadè, who laid all Babylonia under his sway, the rulers of Širpurla exchanging the title of king for that of patesi in consequence of their subjection to him. Such may be taken as a general sketch of the course of Babylonian history up to the time of Sargon I.

It is impossible to say to what race or nationality Lugal-zaggisi and the earlier kings belonged, though we may mention the theory of Hilprecht, who sees in their successes against the cities of Babylonia the earliest Semitic invasions of the country; regarding Kiš as their first military outpost, and Isban, which he is probably wrong in identifying with Ḫarrān, as their military base. Another patesi of Isban who may be placed in this early period is Mul-Babbar (in Semitic, Amēl-Šamaš), whose inscription on three clay cones is preserved in the British Museum.

After the fall of Sargon's empire, the first city that appears to have gained a considerable supremacy throughout Babylonia is Ur. Under Lugal-kigub-nidudu Ur had already risen to some importance; but the city had been included in Sargon's kingdom, and it was not until nearly a thousand years after his death that it again recovered its position. Only two of her kings at this later period are known to us, Ur-gur and Dungi. In addition to their title 'king of Ur,' both style themselves kings of Sumer and Akkad, a title implying that many cities throughout both southern and northern Babylonia had tendered their submission and acknowledged allegiance to them. The monuments themselves bear witness that this title was no empty boast, but had its foundation in a real supremacy.

48. Ur.

circa 2800.

A seal cylinder in the British Museum bears a dedication to Ur-Gur, 'the mighty hero, king of Ur' by a 'patesi of the city of Iškun-Sin, his servant,' while there 'is evidence that the later patesis of Širpurla were subject to Ur, the Louvre possessing a fragment of a statue dedicated to the goddess Bau by Ghala-lama 'son of Lukani, patesi of Širpurla,' for the life of Dungi, 'the 'mighty Iring, king of Ur, king of Sumer and Akkad'; an inscription with a similar purpose of the time of Ur-Ningirsu Gudea's son and successor, is preserved in the British Museum: That Ur-gur was a great builder is attested by the many short inscriptions on bricks recovered from the ruins of the buildings which he either founded or restored. From these we gather that he built the great temple of the Moon-god in Ur, while in Erech he erected a temple to Ninā, the goddess Ištar. On a brick from a tomb discovered by Loftus at Senkereh, the ancient Larsa, is recorded the fact that Ur-gur built a temple to the Sun-god there, and bricks found at Nippur record his rebuilding of the great temple of E-kur in that city. Excavations at the latter place show that this temple was larger than any of its predecessors; buildings that had been standing since the time of Narām-Sin he razed to the ground in order to erect his huge platform of sun-dried bricks, in the NW. corner of which he built a huge zikkurratu (temple tower) of at least three stories. Ur-gur thus appears to have erected or rebuilt temples in most of the principal cities of Babylonia, in his zeal for religion, however, he did not neglect to strengthen his own capital, for we have evidence that he erected, or at any rate rebuilt, the city-wall of Ur. His son and successor Dungi, 'king of Ur, king of Snmer and Akkad, king of the four quarters,' carried on the work of temple-building to which his father bad devoted himself, and restored the temple of Ištar in Erech. An interesting clay tablet in the British Museum contains a copy of an old inscription that once stood in a temple at Cuthah. The copy was made in the later Babylonian period by a scribe named Bēl-uballiṭ, and the archaic inscription, which his care has rescued from oblivion, records the erection by Dungi of a temple to the god Nergal in the city of Cuthah.

With Dungi our knowledge of the city of Ur and its supremacy comes to an end for a time. Whether Dnngi's successors retained for long their hold over the rest of Babylonia, or speedily sank into a position of dependence to some other city, we have no means of telling. When we once more come across inscriptions we see that the lead in Sumer and Akkad has passed into the hands of the kings of Isin.

49. Isin.

At present we possess inscriptions of four kings of Isin: Ur-Ninib, Libit-Istar, Bur-Sin I., and Išme-Dagan. In the case of each of them, before their chief title 'king of Isin' is given special mention is made of Nippur, Ur, Eridu, and Erech as being under their sway. The order in which these cities are mentioned is significant. The fact that Nippur heads the list proves that Ur sank greatly in importance after the days when she held the lead in Sumer and Akkad. A fifth king of Isin, named Išbigirra, is known to us; the only evidence of his existence, however, is the occurrence of his name and title on a fragment of a clay tablet in the British Museum. The rule in Babylonia now passes once more to the city of Ur, which regains its old supremacy. Išme-Dagan was the last king of Isin who retained the title of 'king of Sumer and Akkad,' and held together the confederation of Babylonian cities which that name implies; we find his son erecting a temple for the life of Gungunu, king of Ur, as a token of homage. Under Gungunu began the second dynasty of Ur, to which the kings Bur-Sin II., he-Sin, and Gāmil-Sin belong. The many inscriptions on clay tablets that have been recovered, dated in the reigns of these three kings, testify to the great commercial prosperity of Babylonia at this time. The rise of the city of Larsa followed the second dynasty of Ur. The kings of the former city held Ur as a dependency and appear to have extended their rule still farther afield, for they assume also the title 'king of Sumer and Akkad.' The two principal kings of Larsa were Nūr-Rammān and his son Sin-iddina. Both erected temples in Ur, and the latter founded a temple to the Sun-god in his capital. Sin-iddina also, after meeting with success in the field, turned his attention to the internal improvement of his territory. He rebuilt on a larger scale the wall of Larsa, and by cutting a canal obtained for that city a constant supply of water.

circa 2500.

50. 2nd Dyn. of Ur.

circa 2400.

51. Larsa.

circa 2300.

Sin-iddina does not mention the name of the enemy his victory over whom he records. It has been suggested, however, with great probability, that it was Elam whom he repulsed. This must have been the period of the Elamite invasion to which Ašur-bāni-pal refers. On taking the city of Susa, about 650 B.C., Ašur-bāni-pal relates that he recovered the image of the goddess Nanā, which the Elamite Kudur-Nanḫundi had carried off from Erech 1635 years before—Le., about 2285 B.C. Though Sin-iddina repulsed the Elamites, he did not check them for long. A few years later we find them under the leadership of Kudur-Mabug, son of Simti-šilḫak, again invading Babylonia. This time they met with more success and obtained a permanent footing in the south. Kudur-Mabug was not king of Elam. He styles himself 'prince of the Western land': that is to say, he was ruler of the tract of land lying on the W. frontier of Elam. From this position he invaded the country, and, having established himself as king of S. Babylonia, he erected a temple in Ur to the Moon-god in gratitude for his success. His son, Rim-ala, succeeded him and attempted to consolidate his kingdom, restoring and rebuilding Ur and extending his influence over Erech, Larsa, and other cities; his usual titles were 'exalter of Ur. king of Larsa, king of Sumer and Akkad.' It is a period of much interest for the biblical student (see **CHEDORLAOMER**).

52. Elam.

During the second dynasty of Ur the city of Babylon had enjoyed a position of independence, with her own kings and system of government; but her influence does not appear to have extended beyond the limits of the city. It was not until the reign of Ḫammu-rabi, the contemporary of Sin-iddina and Rim-Aku, that she attained the position of importance in Babylonia which she held without interruption for nearly two thousand years. The dynasty to which Ḫammu-rabi belongs was called by the native historians the 'Dynasty of Babylon,' and, as far as we at present know, forms the limit to which they traced back the existence, or at any rate the independence, of their city.

53 Babylon.

circa 2400.

The dynasty was founded about 2400 B.C. by Sumu-abi, who was succeeded by Sumula-ilu and Zabum, his son. It is possible that on Zabum's death a usurper, Immeru attempted to ascend the throne, but his rule cannot have been for long, as scribes of contract tablets do not give him the title of king, and his name is omitted from the list of kings of Dynasty I., Zabum's

501, Apil-Sin, being stated to have directly succeeded his father. Of the reign of Apil-Sin's son, Sin-muballiṭ, we know nothing, his only claim to remembrance being that he was the father of Ḫammu-rabi.

It is difficult to determine accurately the position occupied by Babylon when Ḫammu-rabi ascended the throne. That she was already beginning to extend her sway over the districts in her immediate neighbourhood we may conclude from a reference on a cylinder of Nabonidus, who states that the temples of the Sun-god and of the goddess Anunitu at Sippar had been falling into decay 'since the time of Zabum'; the phrase implies that Zabum had at any rate rebuilt these temples, and must, therefore, have included Sippar within his sphere of influence. We may regard it as certain, however, that the authority of the city had not penetrated into southern Babylonia.

54. Ḫammu-rabi. *circa* 2285. On Ḫammu-rabi's accession he first devoted himself to the internal improvement of his territory. In the past both Babylon and Sippar had suffered from floods, and the recurrence of these he sought to diminish by erecting dams and cutting canals. One inscription of his, written both in Sumerian and in Semitic Babylonian on clay cylinders in the British Museum, reads as follows:—

Ḫammu-rabi, the mighty king, king of Babylon, king of the four quarters, the founder of the land, the king whose deeds unto the heart of Šamaš and Marduk are well-pleasing, am I. The summit of the wall of Sippar like a great mountain with earth I raised. With a swamp I surrounded it. The canal of Sippar to Sippar I dug out and a wall of safety I erected for it. Ḫammu-rabi, the founder of the land, the king whose deeds unto the heart of Šamaš and Marduk are well-pleasing am I. Sippar and Babylon in a peaceful habitation I caused *to* dwell continuously. Ḫammu-rabi, the darling of Šamaš, the beloved of Marduk, am I. That which from days of old no king for his king had built, for Šamaš my lord gloriously have I accomplished.

In addition to his works at Sippar we learn from another inscription that he cut the 'Ḫammu-rabi canal,' on both sides of which he sowed corn-fields. He erected a granary in Babylon, in which he stored grain for use in years of famine or scarcity. The inscription recording the erection of the granary has perished; but we possess a copy of it in clay, made in the Neo-Babylonian period by Rīmūt-Gula, and deposited in Babylon in the temple E-zida. Ḫammu-rabi's works of improvement, however, were not confined to Sippar and Babylon. As he extended his authority throughout the country, he introduced the same enlightened methods, rebuilding the temples of the gods in the various cities, conciliating the inhabitants, and out of scattered principalities forming a single and organic kingdom, with its metropolis at Babylon. The principal enemy to Babylonian independence at this period was Elam; but after a series of campaigns Ḫammu-rabi signally defeated her, and effectually hindered her advances to the S. and W., after which he was again at liberty to devote himself to the material improvement of his people. Ḫammu-rabi was not the first king of Babylonia to form a great empire out of scattered elements. Lugal-zaggisi and Sargon I. had already made this achievement, and it is not unlikely that their empires considerably exceeded that of Ḫammu-rabi in extent. Ḫammu-rabi's work, however, is distinguished from theirs by its permanence. Whilst Isban and Agadè soon sank back into comparative obscurity, Babylon remained the chief town of the kingdom throughout the whole course of its history.

55. His successors. *circa* 2230. Ḫammu-rabi was succeeded by his son Samsu-iluna, the other kings of the first dynasty being Ebišum, Ammi-ditana, Ammi-zaduga and Samsu-ditana, who follow one another in direct succession. Samsu-iluna continued his father's work of irrigation, and we know from two inscriptions that he built many temples to the gods. Of his successors, however, we possess few inscriptions, though many contracts, dated in the reign of each of the kings of this dynasty, have been found which throw an interesting light on the private and social sides of Babylonian life at this period.

56. 2nd Dyn. Uru-Azag. *circa* 2090. The second dynasty consists of eleven kings—Iluma-ilu, Itti-ilu-nibi, Damki-ilišu, Iš-ki-bal, and his brother Šu-uš-ši, Gul-ki-šar and his son Kirgal-dara-maš, and his grandson A-dara-lralama, A-kur-ul-ana, Melam-mātāti, and Ea-gii.mil. Of this dynasty we know nothing, though it has been conjectured with some probability that it was during this period that the Kassites first invaded Babylonia. Descending from the mountainous territory on the borders of Media and Elam, they overran the country and took possession of the cities; and at the beginning of the third dynasty we find them firmly seated on the throne. So far as we know, they were never ejected by force, but were absorbed in process of time by the Semitic element of the nation, which gradually recovered its predominance.

57. 3rd Dyn. There were thirty-six kings of the third dynasty; but only the names of the kings at the beginning and of those at the end of the dynasty have been preserved in the Babylonian list of kings. Other sources of information, however, now become available; the 'Synchronous History' gives a résumé of the relations between Babylonia and Assyria, which during the early part of the third Babylonian dynasty attained its independence (cp ASSYRIA, § 25); the account furnished by the 'Synchronous History' is supplemented by the mutilated text of a somewhat similar Babylonian chronicle; the official correspondence between Babylonia and Egypt during a small part of this period is preserved on some of the tablets found at Tell el-Amarna; and, finally, inscriptions of several of the kings themselves have been recovered, as well as contract-tablets dated in their reigns.

circa 1725. The first king of the dynasty was Gandiš, who was succeeded by Agum-ši, Gu-ia-ši, Uš-ši, Adu-me-ur, and Uz-zi-u-maš. Here the gap occurs in the list of kings; and it is probably at some point in this gap that we must place Agum, who is known to us from a long inscription, a copy of which in Neo-Assyrian characters was preserved in the library of Ašur-bāni-pal; from it we learn that he recovered and restored to the temple of E-sagila in Babylon certain images of Marduk and of the goddess Zarpanitu, which had been carried off to the land of Ḫani. *circa* 1500.

A later place in the same gap must be assigned to Kallimma-Sin (or Kadashman-Bēl 7 cp Knudtzon, *ZA* 15 269 *f.*), four of whose letters are in the Amarna series; this correspondence serves to indicate the intimate relations between Egypt and Babylonia at this period, both the sister and daughter of Kallimma-Sin being among the princesses of western Asia whom the king of Egypt married. The order of the other kings, whose names have been recovered and must be placed within the same gap in the list of kings, has not yet been ascertained.

It has recently been suggested, for example, that Šagašalti-Buriaš, the son of Kudur-Bēl, should be placed before Kara-indaš, though a later date is possible; moreover, Kurigalzu I., the son of Kadašman-Ḫarbe, is usually placed after and not before Kara-indaš, though a suggestion has lately been made to the contrary. According to the 'Synchronous History' Kara-indaš was a contemporary of the Assyrian king, Ašur-bēl-nišišu, between whom and Ašur-uballiṭ at least two kings, Puzur-Ašur and Ašur-nādin-aḫē, occupied the throne of Assyria; from the same document we know that between Kara-indaš and Kara-ḫardaš, the contemporary of Ašur-uballiṭ, at least one king, Burna-Buriaš, occupied the throne of Babylon; yet on the similar Babylonian chronicle Kara-indaš is mentioned as the son-in-law of Ašur-uballiṭ, and the father of Kara-ḫardaš. It is possible to reconcile these two accounts only on the supposition that the Kara-indaš of the 'Synchronous History' is not to be identified with the son-in-law of Ašur-uballiṭ. On this assumption, and at the same time admitting that certain places in the order of succession are not definitely ascertained, we are still able to summarise the chief events of the period. Kara-indaš is the first Babylonian king mentioned in the 'Synchronous History,' where he is said to have formed a treaty with Ašur-bēl-nišišu, king of Assyria; similar friendly relations with the northern kingdom were probably maintained by Kurigalzu I. and his father Kadašman-Ḫarbe. *circa* 1480. Burna-Buriaš, the son of Kurigalzu I., formed a fresh treaty with Assyria concerning the frontier between the two kingdoms, and built a temple to the Sun-god at Larsa, as we learn from a brick that has been recovered from its ruins. Ašur-uballiṭ, who succeeded Ašur-nādin-aḫē on the throne of Assyria, strengthened the ties between his kingdom and *circa* 1440.

Babylonia by marrying his daughter Muballiṭat-šerūa to a king of Babylonia, who bore the name of Kara-indaš; and when his grandson, Kara-ḫardaš, the son of Kara-indaš, Succeeded to the throne of Babylon, the relations between the two countries were still more cordial. The Kassite troops, however, possibly jealous of Assyrian influence, slew Kara-hardaš and set the usurper Nazi-bugaš on the throne. The death of Kara-ḫardaš led to the invasion of Babylonia by Ašur-uballiṭ, who avenged his grandson by slaying Nazi-hugas, and putting Kurigalzu- II., a son of Burna-Buriaš, the former king of Babylon, in his place. Kurigalzu II. was ambitious to extend the boundary of his kingdom; and with this end in view he undertook a campaign against Elam, the capital of which he conquered and sacked, as we learn from an inscription on an agate tablet which was found at Nippur. On undertaking hostilities against Assyria, however, he was defeated by Bēl-nirari, and was forced to accept the terms offered by the latter with regard to the boundary between the two kingdoms. The next defeat by the Assyrians which the Babylonians sustained was in the reign of Nazi-maruttaš, the son of Kurigalzu II., when Rammān-nirari inflicted a signal defeat on the Babylonian forces and extended the Assyrian boundary still farther southward. Kadašman-Turgu, whose name was also written Kadašman-Bēl, the son of Nazi-maruttag succeeded his father on the throne, and was in turn succdeded by his son, whose name, occurring in a broken inscription from Nippur, may probahly be restored [Kadašman]-Buriaš. The Babylonian List of Kings furnishes the names of the last kings of the dynasty. Of Is-am-me- . . . -ti we know nothing, and of Šagašalti-Šuriaš only the fact that he dedicated an object to Bēl and placed it in the temple at Nippur. Šagašalti-Šuriaš was succeeded by his son Bibè, and the names of the next three occupants of the throne are Bel-Sum-iddina, Kadašman-Ḫarbe, and Rammān-šum-iddina. We do not know the relations between Babylonia and Assyria during the early part of this period; but it is probable that the last three kings acknowledged the supremacy of Assyria. Tukulti-Ninib, king of Assyria, to whom Rammān-nirari III. ascribed the title 'king of Snmer and Akkad,' invaded Babylonia, captured Bahylon, and for seven years maintained his hold upon the country. On the death of Rammān-šum-iddina, however, the Bahylonian nobles placed his son Rammān-šum-uṣur on the throne, and proclaiming him king, threw off the Assyrian yoke. Subsequently, during the reign of Rammān-šum-uṣur, the Assyrians suffered a crushing defeat; their king, Bel-kudur-uṣur, was slain in the battle; and although Rammān-šum-uṣur, on following up his victory by an invasion of Assyria, was repulsed by Ninib-pal-Ešara, he recovered a considerable portion of Babylonian territory. During the reigns of Meli-šiḫu, and of his son, Marduk-pal-iddina, the Assyrians made no attempt to wipe out the reverse they had sustained. On the accession of Zamama-Hum-iddina, however, Ašur-dān crossed the frontier and recaptured several Babylonian cities. Zamama-šum-iddina reigned only one year, and was succeeded by Bel-Sum-iddina II., the last king of the Kassite dynasty. Under this king the country suffered attacks from Elam, and the discontent and misery which followed the defeats sustained by the Babylonians brought about the fall of the dynasty.

circa 1400.

circa 1380.

circa 1340.

circa 1210.

circa 1155.

The fourth dynasty is called the dynasty of Pašè; who its founder was we do not know, though an early place in it must be assigned to Nebuchadrezzar I. In one of the two monuments that we possess of this king he styles himself 'the Sun of his land, who makes his people prosperous, the protector of boundaries'; and it is certain that to a great extent he restored the fallen fortunes of the kingdom. He successfully prosecuted campaigns against Elam on the east, he conquered the Lulubi on the north, and even marched victoriously into Syria. Against Assyria, however, he did not meet with similar success.

58. 4th Dyn. (Pašè).

circa 1130.

On Nebuchadrezzar's crossing the frontier, Ašur-rēš-iši, king of Assyria, marched against him, and Nebuchadrezzar, who was not then prepared to nieet an army of the Assyrians, burnt what engines of war he had with him. in order to facilitate his retreat. He soon returned with 'reinforcements; but Ašur-rēš-iši, who had also strengthened his army, defeated him, plundered his camp, and carried off forty of his chariots. A king who reigned early in the dynasty and may possibly have succeeded Nehuchadrezzar is Bēl-nādin-aplu, whose name is known from a 'boundary stone' dated in the fourth year of his reign. Under Marduk-nādin-aḫē Assyria and Babylonia were again in conflict. It is probable that this king enjoyed a temporary success against Tiglath-pileser I., during which he carried off from the city of Ekallati the images of the gods Rammān and Sala which are mentioned by Sennacherih in his inscription on the rock at Bavian. This campaign is not mentioned in the 'Synchronous History,' though in the beginning of the account of the campaign there mentioned, which ended disastrously for Bahylonia. the two kings, it is said, set their chariots in battle array 'as'econd time' (see ASSYRIA, § 28). This second campaign consisted of a series of successes for Tiglath-pileser, who, after defeating Marduk-nādin-aḫē in Akkad, captured Babylon itself and other important cities [illegible] the northern half of the [illegible] Ašur-bēl-[illegible] Tiglath-pileser's [illegible] on th[illegible] of Assyria, changed his father's policy and formed [illegible] with the Babylonian king Marduk-šāpik-zēr-māti.[1] On this king's death R[illegible]an-aplu-iddin[illegible], a man of obscure origin, was raised to the throne of Babylon, and Ašur-bēl-kala, in pursuance of his policy, allied himself to the new king by a marriage with his daughter. Only the beginnings of the [illegible] by the last three kings [illegible] the dynasty are preserved in the List of Kings.

circa 1110.

circa 1100.

The fifth d[illegible] was called the dynasty of the 'Sea-land,' and was a short one, consisting of only three kings, Simmaš-šiḫu, Ea-mukīn-zēr, and Kaššu-nādin-aḫi. It is not improbable that the Chaldean tribes, who are not actually mentioned in the inscriptions before the time of Ašur-nāṣir-pal and Shalmaneser II., were even at this early period making their influence felt, overrunning southern Babylonia and spreading themselves throughout the country; and the fact that at a later time we find them especially connected with the district termed the 'Sea-land' in S. Babylonia lends colour to the suggestion that the dynasty of the Sea-land was of Chaldean origin.

59. 5th Dyn. (Sea).

circa 1050.

Of the three kings of the dynasty Ea-mukīn-zēr reigned but a few months, the other two kings, who occupied the throne for longer periods, are mentioned by Nabū-aplu-iddina in connection with the fortunes of the temple of the Sun-god at Sippar. At the time of Simmaš-šiḫu this temple was in ruins in consequence of the troubles and disturbances in Akkad, the powerful trihes of the Sutu having previously invaded the country, laying the temple in ruins and breaking up the sculptures. Simmaš-šiḫu partially restored the structure of the temple, and placed it in charge of a priest for whose maintenance he appointed regular offerings. In the violent death of Simmaš-šiḫu, of which we learn from the fragment of a Babylonian Chronicle, and in the shortness of the reign of Ea-mukīn-zēr, we may probably see additional indications of the disturbed state of the country at this time. Under Kaššu-nādin-aḫi the general distress was increased by a famine, in consequence of which the regular offerings for the temple of Šamaš at Sippar ceased.

The first king of the sixth dynasty was E-ulbar-šākin-šum and on his accession to the throne E-kur-šum-ušabši, the pries; whom Simmaš-šihu had placed in charge of the temple at Sippar, complained to the king that the offerings had ceased. On hearing the state of the temple's resources E-ulbar-šākin-Sum increased the regular offerings and endowed the temple with certain property situated in Babylon. The sixth dynasty consisted of only three kings, E-ulbar-&kin-Sum being succeeded by Ninib-kudurri-uṣur and Silanim-šukamuna; it was termed the dynasty of the House of Bazi, and each of the three kings on a fragment of a chronicle is termed a 'son of Bazi.'

60. 6th Dyn. (of Bazi).

circa 1025.

From this point onwards for nearly a hundred years there is a gap in our knowledge of Babylonian history. After the dynasty of the House of Bazi an Elamite occupied the throne for six years; but his name is not known, nor are the circumstances that attended his accession. He did not perpetuate his hold upon the country; for on his death the rule again passed to native Babylonians, the kings of the eighth dynasty, which was the second to hear the title 'the dynasty of Babylon.'

61. Gap.

circa 1005.

26. 8th Dyn. (Babylon).

The names of the early kings of the dynasty are not preserved though Sibir, a Babylonian king whom Ašur-nāṣir-pal mention; as having destroyed a city which he himself rebuilt, is probably to he placed in this period. The first king of this dynasty of whose reign details are known is Šamaš-mudammiḳ, who suffered a serious defeat at the hands of Rammān-nirari II., king of Assyria. Against Nabū-šum-iškun, his successor on the throne, Rammān-nirari scored another victory, several Babylonian cities falling into his hands, though we subsequently find him on good terms with Assyria and allying himself to Nabū-šum-iškun, or possibly his successor, each monarch marrying the other's daughter. Nabū-aplu-iddina is the next king who is known to have ruled in Babylon, and, though he aided the people of Suḫi against Ašur-nāṣir-pal, his relations with Shalmaneser II. were of a friendly nature. He is the king who restored and endowed so richly the temple of Šamaš at Sippar, digging in the ruins of former structures till he found the ancient image of the god. He restored and redecorated the shrine, and with much ceremony established the ritual and offerings for the god, placing them under the direction of Nabū-nādin-šum, the

circa 910.

circa 900.

circa 880.

[1] The name has also been read Marduk-šāpik-kullat.

son of the former priest E-kur-šum-ušabši. Marduk-šum-iddina succeeded his father on the throne; hut his brother
circa 850. Marduk-bēl-usāti headed a revolt against him, and compelled him *to* call in the aid of Shalmaneser of Assyria, who defeated the rebels and restored the land *to* order. Shalmaneser's son and successor, Šamši-Rammān 11., was not on the same terms of friendship with Babylonia. He directed an expedition against that country and plundered many cities before meeting with serious opposition. Marduk-balaṭsu-
circa 812. iḳbi, the Babylonian king, had meanwhile collected his forces, which included hands from Elam Chaldea, and other districts; and the two armies met near thk city of Dūr-Papsukal. Marduk-balaṭsu-iḳbi was totally defeated: 5000 of his troops were slain; 2000 more were captured; and rich booty, including 100 chariots of war, fell into the hands of the Assyrians. Rammān-nirari III., the successor of Šamši-Rammān, also subjugated a considerable portion of Babylonia, carrying away to Assyria Bau-aḫ-iddina, the Babylonian king, together with the treasures of his palace.

Here the record of the 'Synchronous History' ceases, and there follows another gap, of about fifty years, in our knowledge of the history of the country.

63. Nabonassar.

The next king of Babylon whose name is known is Nabū-šum-iškun—the first name which occurs after the break in the List of Kings. His successor was Nabū-nāṣir, the Nabonassar of the Ptolemaic Canon; and with this
747. king our knowledge of the Babylonian succession becomes fuller, as, in addition to the evidence afforded by the List of Icings, the information contained in the Babylonian Chronicle and the Ptolemaic Canon becomes available. In the third year of Nabonassar's reign, Tiglath-pileser III. ascended the throne of Assyria; and one of his first acts was an invasion of Babylonia, during which he overran the northern districts and captured several cities, carrying away many of their inhabitants. The distress in the country due to the inroads of the Assyrians was aggravated during this reign by internal dissension: Sippar repudiated Nabonassar's authority, and the revolt was subdued only after a siege of the city.

The Babylonian Chronicle tells us that after a reign of fourteen years Nabonassar died in his palace at Babylon,
733. and was succeeded by his son Nādinu, the Nadios of the Ptolemaic Canon, who is to be identified with Nabū-nādin-zēr of the list of kings. The eighth dynasty ended with the country in confusion. Nabū-nādin-zēr, after a reign of only two years, was slain
731. in a revolt by his son Nabū-šum-ukīn or Šum-ukīn, who had hitherto held the position of governor of a province. After his accession the dynasty soon came to an end. He had not enjoyed his position for more than a month when the kingdom again changed hands and Ukīn-zēr ascended the throne.

64. Assyrian suzerainty.

From the fall of the eighth dynasty until the rise of the Neo-Babylonian empire Babylonia was overshadowed by the power of Assyria, the kings of the latter country frequently ruling both at Nineveh and at Babylon. Ukīn-zēr had reigned only three years when Tiglath-pileser again invaded Babylonia, took him captive, and ascended the throne of Babylon, where he ruled under the name of
729. Pulu (see TIGLATH-PILESER). On his death, which occurred two years later, he was succeeded in Assyria by Shalmaneser IV., who, according to the Babylonian Chronicle, also succeeded him on the throne of Babylon, though in the List of Kings Pulu is succeeded
727. by Ululai. The two accounts can be reconciled by the supposition that Ululai was the name assumed by Shalmaneser as king of Babylon (see SHALMANESER). Shalmaneser died after a reign of five years, and, while Sargon held the throne, Merodach-baladan, a Chaldeau from southern Babylonia, freed Babylonia for a time from Assyrian control. He
721. sided with Ummanigaš, king of Elam, in his struggle with Assyria; but ten years later was himself captured by Sargon after being besieged in
709. the city of Iḳbi-Bēl (see MERODACH-BALADAN, SARGON). Sargon then ascended the throne of Babylon, which he held until his death in 705.

According to the Ptolemaic Canon, the next two years were a period of interregnum, though the List of Kings assigns the throne to Sennacherib. However this may be, we know that in 703 Marduk-zākir-šum proclaimed himself king; but he had reigned for only one month
703. when he was murdered by Merodach-baladan, who had escaped from Assyria. Merodach-baladan thus once more found himself king in Babylon; but Sennacherib marched against him, defeated him, and caused him to seek safety by hiding himself in the Babylonian swamps. After plundering Babylon and the neighbouring cities, Sennacherib returned to Assyria, leaving the kingdom in the charge of
702. Bēl-ibni, a young native Babylonian who had been brought up at the Assyrian court. On the death of Merodach-baladan, shortly afterwards, a rising headed by Šuzub, another Chaldean, brought Sennacherib again into the country. Bēl-ibni also must have displeased the king; for, after defeating Šuzub. Sennacherib carried Bēl-ibni and his nobles to Assyria, leaving his own son Ašur-nādin-šum upon the
700. throne. Sennacherib next planned an expedition against the Chaldeans whom Merodach-baladan had settled at Nagitu, on the Elamite shore of the Persian Gulf, whence they were able in safety to foment insurrections and plan revolt. Sennacherib, determined to stamp out this disaffection, transported his troops in ships across the Persian Gulf. Disembarking at the mouth of the Eulæus, they routed the Chaldeans and their allies, and returned with much booty and many captives to the Babylonian coast. Meanwhile Šuzub, who had previously escaped Sennacherib's pursnit, collected his forces and with the help of Elam captured Babylon and placed himself upon the throne.
694. He is to be identified with the Nergal-ušēzib of the Babylonian Chronicle and the List of Kings. He, however, ruled for only one year. Sennacherib, on his return from the Persian Gulf, defeated his army and sent him in chains to Nineveh. Turning his forces against Elam, he plundered a considerable portion of the country, and was stopped in his advance into the interior only by the setting in of winter. In his absence a rebel bearing the name
692. of Šuzub—the Mušēzib-Marduk of the Chronicle and the List of Kings—seized the throne of Babylon. Allying his forces with those of Elam, he attempted to oppose Sennacherib in the field; but the combined armies were defeated at Ḫalule. Next year Sennacherib returned to Babylonia, captured the city of Babylon, and deported Mušēzib-Marduk and his
689. family to Assyria. According to the Babylonian Chronicle and the Ptolemaic Canon, there now occurred a second interregnum, though the List of Icings credits Sennacherib with the control of Babylonia.

On Sennacherib's murder in 681 his son Esarhaddon
681. was proclaimed king of Assyria. He succeeded to the rule of Babylonia also, though a son of Merodnch-baladan made an attempt to gain the throne. He came to Babylon and personally superintended the restoration of the city, rebuilding the temples and the walls, and placing new images in the shrines of the gods. During his reign Babylon enjoyed a season of unusual prosperity, and was free from the internal feuds and dissensions from which she had been suffering.

On Esarhaddon's death the throne of Babylon passed
669. to his son Šamaš-šum-ukīn, his elder son, Ašur-bāni-pal, having already been installed on the Assyrian throne during his father's lifetime. For some years the two brothers were on friendly terms, and when Urtaku and the Elamites, with the aid of some discontented Babylonian chiefs, invaded the country, Ašur-bāni-pal assisted his brother in repelling their attack. During all this time Šamaš-šum-ukīn acknowledged the supremacy of Assyria and acquiesced in his brother's active control of the internal affairs of both kingdoms.

At length, however, he wearied of this state of dependence, and seizing an opportunity, organised a general rising against Assyria among the neighbouring tribes and nations who had hitherto owned her supremacy. He bought the support of Ummanigaš, king of Elam, contracted an alliance with Arabia, and at the same time enlisted the services of smaller chiefs. Though one half of the Arabian army was defeated by the Assyrians, the other half effected a junction with the Elamites. This powerful combination, however, was neutralised by the revolt of Tammaritu, the son of Ummanigaš, the king of Elam. In fact, the dissensions in the Elamite camp proved of great service to Ašur-bāni-pal, who completely crushed the confederation that Šamaš-šum-ukīn had brought against him (see AŠUR-BANI-PAL, § 7). Šamaš-šum-ukīn himself was besieged in Babylon, and, on the capture of the city, he set fire to his palace and perished in the flames. According to the List of Kings, he was succeeded by Kandalanu, the
647. Kineladanos of the Ptolemaic Canon; but this king is probably to be identified with Ašur-bāni-pal himself, who, on this supposition, like Tiglath-pileser III. and Shalmaneser IV., ruled Assyria and Babylonia under different names. The last years of his reign are wrapped in obscurity; but on his death the throne was secured by Nabopolassar, who was destined

65. Nabopolassar. to raise the fortunes of his country and to found an empire, which, though it lasted for
625. less than one hundred years, eclipsed by its magnificence any previous period in the varied history of the nation. Nabopolassar, in fact, was the founder of the Neo-Babylonian empire.

During the early part of Nabopolassar's reign Ašur-bani-pal's successors on the throne of Assyria did not relinquish their hold upon the southern kingdom. They retained their authority for some time over a great part of the country (see ASSYRIA, § 33 *f.*). Though we do not possess historical documents relating to this period, we may conclude that Nabopolassar during all these years was strengthening his kingdom and seeking any opportunity of freeing at least a part of it from the Assyrian yoke, and it is not improbable that conflicts between the Assyrian and Babylonian forces were constantly occurring. Towards the end of his reign he found the opportunity for which he was waiting in the invasion of Assyria by the Medes. He allied himself with the invaders by marrying Nebuchadrezzar, his eldest son, to the daughter of Cyaxares, and on
circa 606. the fall of Nineveh had a share in the partition of the kingdom. While N. Assyria and her subject provinces on the N. and NW. fell to the Medes, S. Assyria and the remaining provinces of the empire were added to the territory of Babylon.

Before Nabopolassar could regard these acquisitions of territory as secure, he had first to reckon with the power of Egypt. Necho II., the son and successor of Psammetichus I., soon after his accession to the throne had set himself to accomplish the conquest of Syria. In 608, therefore, he had crossed the frontier of Egypt and begun his march northwards along the Mediterranean coast. Vainly opposed by JOSIAH (*q.v.*), he pressed forward and subdued the whole tract of country between the Mediterranean and the Euphrates. For three years he retained his hold on Syria, and it was only after the fall of Nineveh that Nabopolassar successfully disputed his possession of the country. Nabopolassar did not himself head the expedition against the Egyptians, for he was now old; but he placed the troops under the command of Nebuchadrezzar his son. The two armies met at Carchemish, where a decisive battle took
605. place. Necho was utterly defeated; thousands of his troops were slain; and Nebnchadrezzar pressed after his flying army up to the very borders of Egypt.

While Nebuchadrezzar was still absent on this expedition Nabopolassar died. His son, therefore, returned to Babylon and was duly installed as king in his stead. It is probable that during the early part of his reign Nebuchadrezzar consolidated his rule in Syria and on the Mediterranean coast by

66. Nebuchadrezzar. yearly expeditions in those regions. After a few years, however, the country
604. showed signs of repudiating Babylonian control. Nebuchadrezzar returned to the coast to suppress the rising. For some years things remained quiet; but soon after the accession of Apries (see EGYPT, § 69) to the throne of Egypt the ferment revived. After a siege of a year and a half Jerusalem fell (see JERUSALEM).

Tyre, the siege of which also Nebuchadrezzar undertook, held out for thirteen years, 585-572 (see PHŒNICIA). Built on an island, it was practically impregnable from the land, while the blockade instituted by the Babylonians did not prevent the entry of supplies by water. More successful were Nebuchadrezzar's campaigns against Egypt. We do not possess his own account of them; but an Egyptian inscription records that on one of them (undertaken against Apries) he forced his way through the country as far as Syēnē, the modern Aṣwān, on the borders of Ethiopia: and it is not improbable that the country was subject to Babylonia during the first few years of the reign of Amasis II., who succeeded Apries on the Egyptian throne (see EGYPT, § 69). Nebuchadrezzar's hold upon Egypt cannot, however, have been permanent: a fragment of one of his own inscriptions mentions his sending an expedition to Egypt in his thirty-seventh year. During his reign the relations between Babylonia and Media were of a friendly nature, as was not unnatural from the close alliance that had been established between the two kingdoms before the fall of Nineveh. In a war between Media and Lydia, some twenty years later, the Babylonians did not take part; but, when an eclipse of the sun on the 25th of May in the year 585 put an end to a battle between the Lydians and Medes, Nebuchadrezzar, in conjunction with the king of Cilicia, used his influence to reconcile the combatants and bring the war to a close.

While constantly engaged in extending and solidifying his empire, Nebuchadrezzar did not neglect the internal improvement of his kingdom. He rebuilt the cities and temples throughout the country, and in particular devoted himself to the enlargement of Babylon, completing its walls and rebuilding its temples with such magnificence that the city became famous throughout the world (see NEBUCHADREZZAR, BABYLON). Nebuchadrezzar died after reigning forty-three years, and was succeeded by his son Amēl-Marduk,
561. mentioned as EVIL-MERODACH (*q.v.*) in 2 K. 25 27 *ff.* Of this king we possess no inscription, though contracts dated in his reign have been found. He was assassinated after a reign of two

67. His successors. years in a revolt led by Neriglissar, his brother-in-law, who succeeded him upon
559. the throne (see NERGAL-SHAREZER). His inscriptions that have been recovered are concerned merely with his building operations. He
556. was succeeded by his son Labaši-Marduk, who, after reigning nine months, was murdered by his nobles. Nabu-na'id or Nabonidus, the son of Nabu-balaṭsu-iḳbi, was placed upon the throne.

Nabonidus was a ruler more energetic than his immediate predecessors on the throne. He devoted himself to rebuilding the ancient temples

68. Nabonidus. throughout the kingdom, and dug in their foundations until he found the
555. ancient inscriptions of the kings who had first founded or subsequently restored them. In his own inscriptions recording his building operations he recounts his finding of several such inscriptions, and, as he mentions the number of years that had passed since they had been buried by their writers, his evidence with regard to the settlement of Babylonian chronology is invaluable.

Nabonidus, however, in spite of his zeal for rebuilding the temples of the gods, incurred the hatred of the priesthood by his attempt to centralise Babylonian religion. Although the rise of Babylon to the position of the principal city of the land had been reflected in the importance of Mardulc in the Babylonian pantheon, the religion of the country had never radically changed its character. It had always remained a body of local worships, each deify retaining his own separate centre of ritual. Nabonidus set himself to centralise all these worships in Babylon. He removed the images of the gods from their shrines in the various cities throughout the country and transported them to the capital. By this act he brought down upon himself the resentment of the priests, who formed the most powerful section of the community, and they, by the support they gave to Cyrus on his capture of Babylon, considerably aided the Persian conquest of the country.

Cyrus, who had previously conquered the Medes. imprisoning Astyages and sacking Ecbatana, next turned his attention to the conquest of Babylonia.

69. Cyrus. 549. The Babylonian army was commanded by Bēl-šar-uṣur (Belshazzar), the son of Nabonidus; but it did not offer an effective opposition to the Persian forces. After

538. suffering a defeat at Ōpis on the Tigris, it was broken. Cyrus marched on and entered Sippar without further fighting, and Nabonidus fled. Babylon itself was taken two days later, and Nabonidus fell into the hands of the conqueror (cp CYRUS, § 2). In restoring order to the country, Cyrus adopted the wise policy of conciliating the conquered. He restored to their shrines the images of the gods which Nabonidus had removed. The popularity he acquired by this act is reflected in the inscription on his cylinder recording his taking of the city, which was probably composed at his orders by the official scribes of Babylon. Although naturally couched in flattering terms, it bears ample witness to the pacific policy of Cyrus, who therein allows himself to be represented as the vindicator and champion of Mardulc, the principal deity of his conquered foe:

'He (*i.e.* Marduk) sought out a righteous prince after his own heart, whom he might take by the hand; Cyrus, king of Anšan, he called by his name, for empire over the whole world he proclaimed his title. The land of Kutū, the whole of the tribal hordes he forced into submission at his feet, as for the men whom de had delivered into his hands, with justice and righteousness did he care for them. Marduk the great lord, the protector of his people, beheld his upright deeds and his righteous heart with joy. To his city of Babylon he commanded him to go, he made him take the road to Babylon; like a friend and helper he went by his side. His wide-spreading host, the number of which, like the waters of a river, cannot he numbered, girt with their weapons advance at his side. Without contest and battle he made him enter into Babylon his city, Babylon he spared from tribulation. Nabonidus, the king that did not fear him, he delivered into his hand. All the people of Babylon, the whole of Snmer and Akkad, princes and governors beneath him bowed down, they kissed his feet, they rejoiced in his kingdom, bright was their countenance. To the lord who through his strength raises the dead to life and from destruction and misery had spared all, joyfully they paid homage, they reverenced his name.' Other passages in the cylinder refer to the zeal displayed by Cyrus for Marduk and the other Babylonian gods.—'When into Babylon I entered favourably with exultation and shouts of joy in the palace of the prince; I took up a lordly dwelling, Marduk the great lord [inclined] the great heart of the sons of Babylon to me and daily do I care for his worship. . . . And the gods of Sumer and Akkad, which Nabonidus to the anger of the gods had brought into Babylon, at the word of Marduk the great lord one and all in their own shrines did I cause to take up the habitation of their heart's delight. May all the gods whom I have brought into their own cities pray daily before Bēl and Nahii for the lengthening of my days let them speak the word for my good fortune, and unto Marduk my lord let them say: "May Cyrus the king that feareth thee and Camhyses his son [have prosperity]."'

With the capture of Babylon by Cyrus the history of the Babylonians as an independent nation comes to an end. The country never regained her

70. End. independence, but remained a province subject to the powers which succeeded one another in the rule of W. Asia. Under Cambyses, indeed, and still more under Darius Hystaspis, discontent became very prevalent in Babylonia. Soon after the accession of Darius a certain Nadintu-Bēl put himself at the head of a revolt, declaring himself to be Nebuchadrezzar, the son of Nabonidus, the last king of Babylon. Darius stamped out the rebellion and executed Nadintu-Bēl. A few years later he quelled a second rebellion headed by Araḫu, who was captured and crucified, and during the reign of Xerxes a similar rising proved equally unsuccessful. These rebellions were the last struggles of the national spirit to reassert itself. They met with no response among the general body of the people, who were content to serve their foreign masters. Babylonia, in fact, remained subject to the Persians until the conquests of Alexander brought her under Greek control, which she exchanged only for the Parthian supremacy.

71. Bibliography. (*a*) For the history of Babylonia, see the works by Tiele, Hommel, Delitzsch, and Winckler cited under ASSYRIA. For the early period these histories maybe supplemented by reference to the inscriptions which are being published in E. de Sarzec's *Découvertes en Chaldée* (1884, etc.), *The Bab. Exped. of the Univ. of Pennsylvania* (1893, etc.), edited by Hilppcht, and *Cuneiform Texts from Babylonian tablets, etc. in the British Museum* (1896, etc.). Among English histories refeience may he made to George Smith's *Babylonia* (SPCK, 1877) and G. Rawlinson's *Five Great Monarchies of the Eastern World*, vols. i. and ii. (1871). In Schr.'s *KB*, vol. iii., translations of many of the historical inscriptions of Babylonia are given, while the same author's *COT* describes the principal points in the OT which are illustrated by the monuments. For other works dealing with the inscriptions of Babylonia, the bibliographies mentioned in the article ASSYRIA (§ 34) may he consulted.

(6) [On the religion of the Babylonians we have as yet only one students' handbook, Jastrow's *Religion of Assyria and Babylonia* (reviewed by D. G. Lyon, *New World*, March, 1899). Sayce's *Hibbert Lectures* (for 1887) on the same subject are less systematic. On the cosmology of Babylonia, Jensen's *Kosmologie der Babylonier* is still the most complete authority; hut editions of religious texts must he consulted by the advanced student.]

(*c*) With regard to books for the study of the language, the first dictionary to appearwas Norris's *Assyrian Dictionary* (1868-72), which he did not live to complete. In his *Alphabetisches Verzeichniss der Assyrischen und Akkadischen Wörter* (1886), Strassmaier published an immense collection of material, which has been used in subsequent dictionaries; among these may be mentioned Delitzsch's *Assyrisches Wörterbuch* (1887, etc.; unfinished), the same author's *Assyrisches Handwörterbuch* ('96), Muss Arnolt's *Concise Dictionary of the Assyrian Language* (1894, etc., in progress), and Meissner's *Supplemente zum Assyrischen Wörterbuch (1898)*; Brünnow's *Classified List of Cuneiform Ideographs*, 1889 (*Indices*, 1897), contains a full list of ideographs with their values. The best Assyrian grammar is Delitzsch's *Assyr. Gramm.* (1889; transl. by Kennedy).

(*d*) The existence of the Sumerian language, which for long was disputed, is now generally acknowledged; hut a grammar of the language has yet to be written; it should be noted that the views on Sumerian which Delitzsch expressed in his *Assyr. Gram.* he has since completely changed. A list of the Sumerian values of the cuneiform signs is given by Brünnow in his *Classified List*, while Weissbach's *Die sumersiche Frage* ('98) may he consulted for the history of the controversy.

L. W. K.

BABYLONIANS (בְּנֵי בָבֶל; υἱοὶ Βαβυλῶνος [BAQ], Ez. 23 15 [BA om. Βαβ.], 17 [-ωνος B], 23; in Aram. בַּבְלָיֵא, Βαβυλώνιοι [BAL], Ezra 4 9), in every case the land, not the city, is referred to: cp especially Ez. 23 15, 'the Babylonians, the land of whose nativity is Chaldea.'

BABYLONISH GARMENT, RV Babylonish Mantle (אַדֶּרֶת שִׁנְעָר, lit. 'mantle of Shinar,' *so* RVmg.), Josh. 7 21. See MANTLE.

BACA, VALLEY OF (עֵמֶק הַבָּכָא, § 103), or Valley of Weeping (RV, 𝔊 ἐν τῇ κοιλάδι τοῦ κλαυθμῶνος [Bℵ*R], εἰς τὴν κοιλάδα *τ. κ.* [ℵc.aAT]; cp Aq. Vg. Pesh.), mentioned only in Ps. 84 6 [7]. For the meaning given above cp the Wady of Weeping وادى البكا, found by Burckhardt near Sinai. The name is frequently explained 'balsam vale' (*so* RVmg.); but cp Cheyne, who reads בֹּכִים (cp 𝔊 here and at Judg. 2 5), and supposes a play on the name Bĕkā'īm. The pl. בְּכָאִים occurs in 2 Sam. 5 22 *ff.* (= 1 Ch. 14 14 *f.*), apparently

as the name of a spot (see REPHAIM, VALLEY OF) where there were Baca-trees. David took his stand there to wait for YahwB's signal to attack the Philistine's.[1] 𝔊 (2 S. 5 24) speaks of it as a 'grove,' meaning an Asherah; there is no mention of trees in @. On the meaning of Baca trees see MULBERRY.

BACCHIDES (Βακχιδης, also Βα[χ]χιδης; Βαρακχ. [1 Macc. 78, A], κακχ. [*ib. v.* 12, A], Βακχχ. [*ib.* 91, ℵ*A]), the chief general of DEMETRIUS I. [*q.v.*, 1], who was sent to Judaea to enforce the claims of Alcimus to the priesthood (1 Macc. 7 8 *ff.*). Almost immediately after the death of NICANOR, he was sent again with Alcimus, and inflicted a severe defeat on the Maccabæan party at Elasa,[2] who lost their leader Judas (chap. 9, 161 B.C.). Judaea suffered heavily at the hands of Bacchides; nor did any real advantage accrue when Jonathan took up the leadership (9 32 *ff.*). The capital and other important strongholds remained in the hands of Bacchides, who was engaged in fortifying them until the death of Alcimus (159 B.C.), when he returned to Demetrius (957). At the end of two years the opponents of the Maccabzean party (whose hands had become strengthened) agreed to betray Jonathan and his followers to Bacchides. This piece of treachery was discovered and avenged (958 *ff.*). Bacchides set out against Judæa (158 B.c.) and besieged Beth-basi, but met with ill success everywhere, until at last he was only too glad to accept Jonathan's overtures of peace (968). The Jewish captives of the former wars were restored, and the Maccabees had rest for four or five years.

BACCHURUS (Βακχουρος [BA], σακχουρ [L], *ZACCARUS*), singer in list of those with foreign wives (see EZRA, i. § 5, end), 1 Esd. 924; but not in || Ezra 10 24 [MT EV 𝔊BℵA], though 𝔊L adds ζακχουρ.

BACCHUS (*Liber*), the equivalent of the Greek Dionysus (so RVmg. Διονυσος [AV]), is mentioned in 2 Macc. 67, where it is said that on the occasion of the birthday of Antiochus Epiphanes (175-164) the unhappy Jews were compelled to attend the feast of Bacchus (Διονυσια; RVmg. 'feast of Dionysia') wearing the ivy-wreath (*κισσός*), the peculiar emblem of the god. A few years later Nicanor (the general of Demetrius) threatened to pull down the temple and supplant it by one dedicated to Bacchus unless Judas was handed over to him (*ib.* 14 33, *Διανυσος* [A]). The worship of Bacchus seems to have been introduced first by the Ptolemies, of which family he was the patron-god, and according to 3 Macc. 229 several years previously the Jews in Alexandria had been branded by Ptolemy Philopator (222-204) with the sign of the ivy; the object of this obviously being forcibly to identify the unwilling Jews with the detested worship of Bacchus. See CUTTINGS OF THE FLESH, § 6. His worship would he specially abhorrent to pions Jews, since one of the greatest of the Dionysian festivals fell in the month Elaphebolion (March-April), thus synchronising closely with the passover. In course of time the Hellenising Jews and Greek residents were more attracted by the cult, and when Jerusalem became a Roman colony (Ælia Capitolina) we find Dionysus with his thyrsus and panther figuring upon the coins as one of the patron gods.[3]

The worship of Dionysus flourished at Cæsarea, at Damascus, and in the Ḥaurān. He was the special patron of Scythopolis, and from him the town Dionysia (Soada) received its name. Dionysus, however, soon became identified with the Nabatæan deity Dusares (the Baal, the god of heaven, and of wine). The Dionysiac character which the latter presents is not native: it is directly due to the northern influence.[1] The priest of Dionysia (see above) calls himself the priest of Dusares, and on the coins of Bostra the latter appears with the Dionysian emblem of the wine-press. Figures of the vine and wine-cup are still found upon the lintels in many of the villages in the Ḥaurān. Although the worship of Yahwè had little in common with that of Bacchus (*nequaquam congruentibus institutis*, Tacit. *Hist.* 5 5), classical writers, observing the musical and joyful nature of their ceremonial rites, now and then fell into the error of making Bacchus a Jewish god that had been worshipped by the earliest patriarchs (cp *e.g.* Plut. *Sympos.* 146).

For the various mythological forms of Bacchus, see *Ency. Brit.*(9) *s.v.* 'Dionysus'; and Roscher, *s.v.*

BACENOR occurs in an uncertain passage, 2 Macc. 12 35, *Δωσίθεος δέ τις τῶν τοῦ βακήνορος* [VA]. It is doubtful whether it is the name of a captain or the cognomen of a company or division in the army of Judas. See DOSITHEUS.

BACHRITES, THE (הַבַּכְרִי; Nu. 26 35, 𝔊BAL [*v.* 39] om.). See BECHER.

BADGER, ROCK (שָׁפָן), Lev. 11 5 RVmg.; EV CONEY.

BADGERS' SKINS, RV SEALSKINS (עֹרֹת תְּחָשִׁים, עוֹר תַּחַשׁ, תַּחַשׁ, δερματα υακινθινα [ιανθινα, Aq., Sym., Ezek. 16 10] [BAL]; Ex. 25 5 26 14 35 7 23 36 19 [BAL om.] 39 34 Nu. 4 6 8 [*δερματίνῳ ὑακινθίνῳ*] 10-12 14 25 Ez. 16 10†), are mentioned as the fourth or outermost covering of the tabernacle (next above the 'rams' skins dyed red'), and as outer wrappings for the ark and different vessels of the tabernacle during journeys. In Ezekiel's figurative description of YahwB's adorning of Israel as a beautiful maiden, shoes of this material are included. As to the meaning of *taḥaš* there have been many opinions: five chief views may be indicated.

(1) The ancient versions with one consent understood a colour: 𝔊 Syr. Chald. Vg. render 'blue' or 'violet,' Ar. Samar. 'black' or 'dark.' This view, which has been strongly maintained by Bochart, rests, however, on no philological ground, and is refuted by the syntax of the Hebrew words.[2] Apart from the versions, all Hebrew tradition is in favour of the view that *taḥaš* is an animal.

(2) In the discussion on this animal in the Talmud (*Shabb.* c. 2, fol. 28) the opinion prevails that it is a species of תלא אילן (prob. = 'ferret'), a description which would roughly suit the *badger*; and the claim of this animal has been supported (by Ges. and others) by comparison with late Lat. ***Taxus*** or *taro* (Ital. *tasso*, Fr. *taisson*) and Germ. *Dachs.*[3] The common badger, *Meles taxus*, found throughout Europe and Northern Asia, reaches its southernmost limits in Palestine, where it is common in the hilly and woody parts of the country. It is, however, improbable that the reference is to the skins of these animals. They would be difficult to procure either in Egypt or in the desert, and there is no evidence of their being used in those regions for such a purpose.[4]

1 In *v.* 24 emend צְעָדָה to סְעָרָה (*συσσεισμός* [L] for *συνκλεισμός* [BA]), 'when thou hearest the sound of a stormy wind in the tops of the Baca trees.' If is in the tempest that Yahwè 'goes out against the Philistines.

2 Doubtless an error for ADASA.

3 See Madden, *Coins of the Jews*, 1881, p. 252 *f.*

1 For the god Dusares (*Δουσαρης*, on Nab. inscr. דושרא); see *ZDMG* 14465, 41711, Baethg. *Beitr.* 92 *ff.*, WRS, *Kins.* 292 *ff.*, and We. *Heid.*(2) 48 *ff.* The name means 'possessor (*du*) of שרא.' The latter is often taken to he equivalent to 'Sarah,' in which case Dusares is equivalent to Abraham—a hazardous theory.

2 תְּחָשִׁים is obviously gen. after עֹרֹת—*i.e.*, equivalent *to* אֵילִם, not to מְאָדָּמִים, in the phrase for 'rams' skins dyed red.'

3 Philological explanations involving roots common to the Aryan and Semitic languages are, however, notoriously precarious.

4 How little value attaches to the opinion of the Rabbis may be gathered from another view, strongly supported in the Talmud, that the תחש was a kind of unicorn which specially appeared to Moses for this purpose, and immediately afterwards disappeared (Bochart, i. 3 30).

(3) A more scientific etymology is that which compares the Ar. *tubas* or *duḥas*, 'a dolphin.' This would indicate a marine animal,—probably (*a*) the *seal* (RV text), or (*b*) the *porpoise* (RVmg.), or (*c*) the *dugong* or sea-cow. (*a*) has in its favour the adaptability of sealskins to the purposes referred to, the statement of Artemidorus (in Strab. 16776) that seals abounded in the Red Sea, one island there being called νῆσος φωκῶν, and the actual use of a sealskin covering in antiquity to protect buildings, because it was supposed that lightning never struck this material (*e.g.*, Pliny, *HN* 2 55, Suet. *Oct.* 90). One species of seal, *Monachus albiventer*, undoubtedly occurs in the Mediterranean, and some authorities are of opinion that the same is true of the common seal, *Phoca vitulina*.

(*b*) The *porpoise*, like the seal, is as a rule a denizen of the colder waters of the globe; but *Phocæna communis*, the common porpoise of the British coasts, occasionally enters the Mediterranean, whilst the Indian porpoise, *Ph. phocænoides*, inhabits the shores of the Indian Ocean from the Cape of Good Hope to Japan, and may have been captured in the Red Sea. (*c*) The *Dugong*, being more like the dolphin, has the etymology in its favour. According to Knobel (Comm. on Ex. 255) this animal (*Halicore tabernaculi*) 'is found in the Red Sea, attaining a length of 8 to 10 or more feet, is hunted like the whale, and has a skin well adapted for sandals or coverings.' Friedr. Del. sought to strengthen the case for this identification (Prol. to Baer's *Ezek.* p. xvi *f.*) by comparison with Ass. *taḫšu*, an animal whose skin, according to various Ass. inscriptions, was used to cover the beams of ships in the manner described by Herodotus (1 194). He has since (*Prol.* 77-79 ['86]), however, abandoned the view that *taḫšu* was the dugong, and supposes it to mean *wether*.[1] The dugong of the Indian Ocean, with the Manatee of the Atlantic, composes the class Sirenia. They are usually found in the estuaries of large rivers browsing on sea-weed, and they are still actively sought off the coast of Queensland for the sake of their blubber and hide.

(4) Much less probable is the opinion of Bottcher (*Neue Aehrenl.* 32 *ff.*) that תַּחַשׁ is a form of תַּיִשׁ (he-goat) with the middle radical hardened; he supposes that goat-skin was manufactured into a kind of morocco leather. It is natural that 'rams' and 'he-goats' should come together as in Gen. 32 15 [14] 2 Ch. 17 11; but apart from this the explanation has little to recommend it.

(5) The latest and perhaps most probable view is that put forward by Bondi (*Ægyptiaca*, 1 *ff.*), who makes תַּחַשׁ a loan-word from Egyptian *ṭḥs*, 'Egyptian leather,' and gives a thorough discussion of views. This meaning is especially suitable to Ez. 16 10, but is also appropriate in the other passages.

Of all the explanations those by Ar. *duḥas* or *tuḥas*, by Ass. *taḫšu*, and by Eg. *ṭḥs*, most deserve attention.

N. M.—A. E. S.

BAEAN (Βαιαν [AℵV]), 1 Macc. 5 4 *f.* RV; AV BEAN.

BAG. Several of the Hebrew words are much more general in signification than the English 'bag.'—(1) כִּיס *kīs* (Dt. 25 13 Pr. 16 11 Mi. 6 11 Is. 46 6) for holding money, or the weights employed by merchants. In Pr. 1 14 (βαλλάντιον), EV renders PURSE. (2) חָרִיט *ḥārīṭ* (cp Ar. *ḫarīṭatun*, bag of skin, etc., and see Frank. 296) in 2 K. 5 23 (θύλακος) of Naaman's bag which contained a talent of silver. In Is. 3 22 it is mentioned in the list of 'women's adornments, and signifies probably a satchel (so RV; AV 'crisping pin'). (3) כְּלִי *kĕlī*, a word of very general meaning (see VESSEL), used of a sack for containing corn (Gen. 42 25 ἀγγίον) or if the instruments carried by a shepherd (Zech. 11 15). It is rendered 'bag' only in 1 S. 17 40 49 (AVmg. 'vessel'): see SLING. (4) צְרוֹר *ṣĕrōr* (√bind, cp verb in 2 K. 12 10 [11], וַיָּצֻרוּ, 'and they put in bags'), Job 14 17 (βαλλάντιον), Pr. 7 20, צְ׳ נָקוּב, 'a bag with holes' (Hag. 1 6). It is rendered 'bundle' in 1 S. 25 29 Gen 42 35 (of money) and Cant. 1 13 (of myrrh, RVmg. 'bag'). (5) βαλλάντιον, Lk. 12 33, RV 'purse'; and (6) γλωσσόκομον (Jn. 12 6 13 29, RVmg. 'box'). See BOX, 3.

BAGO (Βαγο [A]), 1 Esd. 8 40 = Ezra 8 14, BIGVAI, 3.

BAGOAS (from Pers. *baga*, 'God'; see Ed. Meyer, *Ent.* 157; cp Bigvai, Bigtha, Abagtha), a eunuch in the household of Holofernes; Judith 12 11 *ff.* (Βαγωας [BA1]; in *v.* 13 Βαγωε [A*]).

BAGOI (Βαγοι [A]), 1 Esd. 5 14 = Ezra 2 2, BIGVAI, 2.

BAGPIPE (RVmg. of סוּמְפֹּנְיָה Dan. 3 5 10 15 [in *v.* 10 סִיפֹּנְיָא, Kr. סוּפ׳], Gr. συμφωνια, EV 'dulcimer'). The Aramaic word is from συμφωνία, a late Gr. word, used, curiously enough, by Polybius in his account of the festivities in which Antiochus Epiphanes (who is so frequently alluded to in Daniel) indulged (xxvi. 10 5 xxxi. 48; see DANIEL, § 7). For the form of the Aram. cp ספון, σύμφωνοι, 'agreed,' in the Fiscal Inscription from Palmyra, 137 A.D. (col. 3, *ll.* 14 45). See MUSIC, § 4 (*c*).

BAHARUMITE, THE (בַּחֲרוּמִי, 1 Ch. 11 33; ο Βεερμειν [B, ℵc.a], ο -ρβειν [ℵ*], ο Βαρσαμι [A], ο Βαραμαι [L]), evidently a scribe's error for 'the Bahurimite'—*i.e.*, 'the man of BAHURIM' (הַבַּחוּרְמִי). The same reading should be restored in 2 S. 23 31. See BARHUMITE.

BAHURIM (בַּחוּרִים and בַּחֻרִים; βαουρειμ [A]; 2 S. 3 16 βαρακει [B], -μ [L]; 16 5 βουρειμ [B], χορραμ [L]; 17 18 βαορειμ [B], βαιθχορρων [L]; 19 16 βαουρειμ [B], χορραν [L]; 1 K. 2 8 βααθουρειμ [B], βαθουρειμ [AL], βοκχορης [Jos. *Ant.* vii. 9 7]), a place in Benjamin (2 S. 19 16 [17]), not included in the list of Benjamite towns, which appears prominently in two very interesting narratives—that of the return of MICHAL to David, and that of the flight of David from Absalom. Michal had been given by David's angry father-in-law to PALTI (*q.v.*) or Paltiel of Gallim, and David in his returning prosperity demanded her back. Followed by her weeping husband, Michal went from Gallim[1] to Bahurim. There Abner commanded Paltiel to return. It may naturally be asked, Why was Bahurim selected as the scene of this leave-taking? The answer is furnished by the story of David's flight. It is clear from 2 S. 16 1 5 (cp 17 24) that Bahurim lay near the road from Jerusalem to the Jordan valley. Abner would have to take this road on his return to Mahanaim, and would naturally wait at Bahurim until he knew for certain that a visit to Hebron would be acceptable to the king. Meantime the envoys of David conducted Michal to Hebron. Later it was David's turn to pass by Bahurim, when he sought the Jordan valley as a fugitive (2 S. 15 28). At Bahurim he would apparently have made his first halt had not the insults of SHIMEI compelled him to go farther[2] (2 S. 16 5-14). It was at Bahurim also that Jonathan and Ahimaaz lay hid in a well, when pursued by the servants of Absalom (2 S. 17 18). The spot which best answers the topographical conditions is (as Barclay was the first to see) SE. of the village of *el-'Isāwīyeh* (see LAISHAH). Here, to the S. of the old Roman road, van Kasteren found in the upper *Wādy er-Rawāby* a ruin without a name, which he believes to be on the site of Bahurim (*ZDPV* 13 101 *ff.*). For a less probable view, fully discussed by van Kasteren, see Marti, *ZDPV* 38 *ff.*

T. K. C.

[1] Cp Shalmaneser; Monolith inscr. ii. 56, *ina elippe ša mašak taḫšī*, 'on boats of skins of wethers'; so Wi. for good reasons; but see references in Muss-Arnolt, *Ass. Dict.* s.v. 'gab-šu-u.'

[1] Sir G. Grove (Smith's *DB*) thinks this may be doubtful. The rendering of 𝔊L, however, in 2 S. 3 15 (υἱοῦ σελλειμ) suggests that the verse originally closed with מִגַּלִּים, 'from Gallim.' That Palti was with Ishhosheth at Mahanaim seems very improbable.

[2] The name of the village where he 'refreshed himself' (2 S. 16 14) seems to have dropped out. See AYEPHIM.

BAITERUS (Βαιτηρος [BA]), 1 Esd. 5 17 RV, AV METERUS; see GIBBAR.
